CONTENTS

CONTRIBUTED ARTICLES

A college library in war time	<i>Herbert Putnam</i>	5-10
How to meet the library needs of the farm	<i>Minnie Leatherman Blanton</i>	10-13
Some reference books of 1917	<i>Isadore Gilbert Mudge</i>	14-19
That girl stuff	<i>W. F. Yust</i>	35
Making the most of store-rent windows	<i>Altie J. Schooley</i>	36
Motion pictures and reading habits	<i>Orrin G. Cocks</i>	67-70
Putting your library in the movies	<i>Ernest A. Dench</i>	71-73
Library legislation during 1917	<i>Leroy J. Burlingame</i>	74-83
The rural library in practice	<i>H. N. W. Magill</i>	84-86
Wasteful duplication in cataloging	<i>J. C. M. Hanson</i>	97
The library and the book in Russia's revolutionary movement	<i>Victor S. Yarros</i>	147-151
The question of censorship in libraries	<i>Ernest C. Richardson</i>	152-154
The relation of the public library to the private business libraries	<i>Paul H. Nystrom</i>	154-157
Motion pictures and the library in Cleveland	<i>Mrs. Elmer G. Derr</i>	157-158
"All in the day's work"	<i>Georgiana Ames and Raymond L. Walkley</i>	159-163
New York librarians at play	<i>Mary A. Lenard</i>	166
The library's part in the first food exhibit	<i>O. E. Norman</i>	180-181
Arms and the man	<i>Nixon Waterman</i>	181
Librarianship as a profession in college and university libraries	<i>J. T. Jennings</i>	227-233
The question of a graduate library school	<i>Dr. Walter Lichtenstein</i>	233-235
Suggestions to librarians for a more literary form of report	<i>J. C. Sickley</i>	236-238
The great spring drive for books in New York City	<i>F. A. H.</i>	239
The housewife's glee	<i>Carolyn Wells</i>	240
Harvard rules for counting volumes and pamphlets	<i>T. Franklin Currier</i>	241-245
A plea for the special library	<i>Mrs. Georgene L. Miller</i>	246-248
Discussion of the preceding paper	<i>Katherine Kiemle</i>	248-250
Library accounting	<i>Jean L. Greenhalgh</i>	307-311
Co-ordination of technical literature	<i>Kenneth C. Walker</i>	312-314
The binding of pamphlets and the rebacking and reinforcing of books	<i>D. W. Duffield</i>	315-319
The library that Joab started	<i>Alice Spencer Geddes Lloyd</i>	320-323
Book service for our sailors and marines	<i>Mary C. Henthorne</i>	324-327
Minnesota Historical Society moves into new building	<i>C. Edward Graves</i>	328-331
Roswell P. Flower Library at Cornell	<i>Frances B. van Zandt</i>	332
Children's war work exhibits in Evanston Public Library	<i>Marcus Skarstedt</i>	333-334
Campaigning for books in a southern college town	<i>Cornelia S. Love</i>	335-336
Visit to sixteen military camps	<i>J. I. Wyer, Jr.</i>	337-339
After-war needs of reference librarians	<i>Carl L. Cannon</i>	387-389
The package library and its increasing popularity	<i>Le Noir Dimmitt</i>	390-393
Library ventures in the Kentucky mountains	<i>Mary Elizabeth Lane</i>	393-395
Instruction for pages	<i>Marion L. Horton</i>	402-403
The soldier in the Louisville Free Public Library	<i>Jennie M. Flexner</i>	404-406
Camp library advertising	<i>Joy E. Morgan</i>	407
The scope of the U. S. Naval War College Library at Newport	<i>Edwin Wiley</i>	409-410
The science of indexing	<i>Walter H. McClenon</i>	467-471
Why a County library law for Missouri?	<i>Harold L. Wheeler</i>	472-475
The county reference section of the Public Library of New South Wales	<i>W. H. Ifould</i>	476-480
The Colombian exhibit in Newark, N. J.	<i>By a Friend of Colombia and the Newark Free Public Library</i>	481-483
State institution libraries in Ohio	<i>Mary Rudd Cochran</i>	486-488
The Washington Public Library	<i>Clara W. Herbert</i>	489-490
"Your Home"—the Johnson City Library	<i>Hazel Kilian</i>	495-496

A call to service	<i>William Warner Bishop</i>	547
Civilization	<i>Thomas L. Montgomery</i>	548-551
The A. L. A. follows the flag overseas	<i>M. Llewellyn Raney</i>	552-562
Hospital library service: its organization	<i>Caroline Webster</i>	563-565
What a man reads in hospital	<i>Miriam E. Carey</i>	565-567
What a base hospital librarian should know	<i>Edith Kathleen Jones</i>	568-572
Sending books "over there"—the day's work in Hoboken	<i>Asa Don Dickinson</i>	573-574
Work of the dispatch office at Newport News	<i>William H. Brett</i>	575-577
Seven weeks at a navy training camp	<i>Artena M. Chapin</i>	577-578
The use of print in making war—and peace	<i>John Cotton Dana</i>	579-581
The library war service fund campaign	<i>Frank Parker Stockbridge</i>	643-648
The need of a plan for library development	<i>C. C. Williamson</i>	649-655
An importations canard and some notes on German periodicals	<i>M. L. Raney</i>	666-667
A personal statement regarding importations	<i>M. L. Raney</i>	667-668
The Library's share in Americanization	<i>Jasmine Britton</i>	723-727
The war and library training	<i>Frank K. Walter</i>	728-732
The government directory in the Service Bureau at Washington	<i>Emily A. Spilman</i>	733-736
Statistics of women in library work	<i>Mrs. J. T. Jennings</i>	737
The story of the house that Jack built	<i>Edwin Wiley</i>	750-751
The Associated Mountaineering Clubs of North America	<i>LeRoy Jeffers</i>	755
The dream of Tomus	<i>William F. Yust</i>	787-789
The book—in world-wide use and international co-ordination after the war	<i>Paul Otlet</i>	790-792
The university, the university library and the returned soldier	<i>John Ridington</i>	808-815
Shipments of foreign books arrive in this country	<i>M. L. Raney</i>	823-824
Sources of agricultural statistics	<i>Mary G. Lacy</i>	859-866
The A. L. A.'s reconstruction opportunity	<i>Robert S. Lynd</i>	872-874
One more tribute to Mr. Brett	<i>Rabbi Emanuel Sternheim</i>	878-879
New program for library co-operation with the Food Administration	<i>Edith Guerrier</i>	880-881
Americanization thru foreign print	<i>Della R. Prescott</i>	885
Words you ought to know	<i>Irene Dayton</i>	885

THE A. L. A. LIBRARY BUILDING AT CAMP ZACHARY TAYLOR, NEAR LOUISVILLE

THE great event of 1917 was the entrance of our country into the world war, and correspondingly the chief event of the library year was the organization of library war work by the American Library Association. The fund of "a million dollars for a million books for a million men" has outreached the original plan by \$600,000, including the \$320,000 grant from the Carnegie Corporation; the buildings provided for under that grant, and the one furnished for the Great Lakes Naval Camp, thru an anonymous subscription, are well advanced or under contract. Large purchases from publishers, who have joined in a liberal rate of discount, and large gifts from the public are pouring into the camps thru the A. L. A. dispatch station at the New York Public Library, altho freight and express congestion has interfered in many instances; solicitation for more and more books should be continued vigorously, and a plan for an intensive book campaign is under consideration. The War Council and the War Finance Committee, thru whom the fund was organized and achieved, are rounding up their work, and Dr. Herbert Putnam, as Director, is now in full executive control at the organization's general headquarters in the Library of Congress at Washington, with the War Service Committee as an Advisory Board. In reply to the published criticism that the Library War Council contained no librarians, it may again be noted that librarians avowedly kept themselves in the background, tho the actual work was done largely by them, in the modest belief that the purse strings of the public would be more freely opened if the movement were under the auspices of national representatives of the public whose names were more widely known. Splendid work is already under way in some of the A. L. A. buildings, that at Chillicothe, Ohio, under the direction of librarian Burton E. Stevenson,

being the pioneer in actual operation, and the co-operation of the Y. M. C. A., the Knights of Columbus, and later of the Young Men's Hebrew Association, utilizing their buildings as branches, completes the organization.

STATE legislation has chiefly taken shape in the development of the county system, Texas and North Dakota having both made progress in this direction, while the proposed county library law for Ohio passed the legislature, but was vetoed by the Governor because of one of its financial features. The retirement of W. R. Eastman, the youthful veteran of eighty years, from the guardianship of library legislation, is to be noted with regret. He has passed his mantle to Clarence B. Lester of the Wisconsin State Library Commission, who has not been able to take up the task in time for us to print in this number of the LIBRARY JOURNAL the usual summary of state legislation for the year. There has been no addition within the year to the lists of state commissions and associations, for the simple reason that most of the active states are already provided with such, tho there is missionary work yet to be done in half a score of our states. The development of associations has been chiefly among special or business libraries and school libraries, and this is a happy augury for the development of these important branches of library work. Local meetings of special librarians, looking to the formation of local associations, were held in Portland, Oregon and New Haven, Connecticut. The Southern School Librarians Association, organized at Washington late in 1916, has yet to make further progress south. As to meetings in general, the A. L. A. conference at Louisville brought together a larger number than was expected at a southern meeting, but concentration on war service has caused the

suspension of the mid-winter meetings in Chicago. It is understood that the Executive Board will designate Saratoga for the 1918 meeting, in the expectation that this will bring together the usual large attendance at meetings in the East. Aside from the regular meetings of state, regional, and special associations, the most notable feature of the year was the library publicity conference held at Chicago in May on the invitation of the Advertising Association of Chicago. A new library school has been started at the St. Louis Public Library, the Ontario Department of Education initiated a six-weeks library school course at Toronto, and there has been considerable development in existing schools and library training classes. During the summer the Massachusetts Library Commission held to very good purpose a second convocation of librarians from the smaller towns, at Simmons College.

DEATH has never perhaps taken so heavy a toll from the library profession as in 1917. He found a shining mark, indeed, in Henry E. Legler, universally considered one of the men of the future, who should have lived to realize the great undertaking he had initiated in the system of regional branch libraries for Chicago, which will become his memorial. Of the veterans, Alfred E. Whittaker, tho not present at the first A. L. A. conference, antedated the association as one of the twenty-one contributing editors to the LIBRARY JOURNAL in its inception, while William I. Fletcher of Amherst, whose great work as a bibliographer won universal recognition, and Henry M. Utley of Detroit, both librarians emeritus, came into the association soon after its organization. Thus the association has lost three past-presidents within the year. Another early member was Mrs. Mary H. Curran, whose weight and dignity caused her to be known pleasantly as "the Bishop of Bangor," and who has left a memorial of herself in a bequest to the Bangor Library,

with which she was so long happily and usefully associated. Among other women members Miss Mary B. Lindsay of Evanston, Illinois, took high rank. James L. Gillis of California was one of the most modern and enterprising of state librarians, to whom California owes its characteristic county library system, and Anderson H. Hopkins, associated in his latter years with Pittsburgh, will long be remembered in the A. L. A. George William Harris, librarian emeritus of Cornell, and Ralph K. Jones, librarian of the University of Maine and prominent in Maine library circles, are other college losses. William H. Winters had been librarian of the New York Law Institute for forty-five years, and Herman Rosenthal, whom the New York Public Library lost, was perhaps better known as a Slavonic scholar outside library circles than as head of that division in the Library.

ALTHO changes in personnel, partly owing to this depletion in the higher posts, have been numerous, the place of Mr. Legler is yet to be filled in Chicago by civil service examination, thru which he won his own opportunity. Mr. Gillis' post has been filled by the promotion of Milton J. Ferguson as state librarian of California. Lawrence Boyd Evans has come into the state librarianship of Massachusetts, following Foster W. Stearns' brief incumbency in succession, to Charles F. D. Belden, who resigned to accept the librarianship of the Boston Public Library, made vacant by Horace G. Wadlin's resignation after many years of faithful service. Harrison W. Craver came from Pittsburgh to succeed W. P. Cutter as librarian of the United Engineering Society in New York, with which the Library of the American Society of Civil Engineers had been united, and Ernest J. Reece left the Illinois Library School to take the vacant headship of the Library School of the New York Public Library. Charles E. Rush was appointed librarian of the Indianapolis Public Library

coincident with the opening of the new building, Miss Eliza G. Browning retiring to the post of assistant librarian, at her own request. Many have gone thru leaves of absence or otherwise, to man camp libraries of the several cantonments, in patriotic service, and are winning places on the country's roll of honor. Miss Jessie F. Hume, of the Queens Borough Library system, completed twenty-five years of faithful service, pleasantly commemorated by a loving cup. The St. Louis Public Library developed the interesting plan, started in New York state, of exchanging assistants with other libraries for specified periods, with the purpose of wider experience and mutual advantage on both sides. Progress has been made toward the standardization and certification of librarians, and in Massachusetts there was effective protest against extending ordinary civil service examinations to library service in place of the special methods already widely in operation.

LIBRARY building, which had a low record in 1916, took a new start in 1917, which witnessed the completion and opening of several important library buildings of nearly first rank, notably those at Indianapolis, St. Paul, San Francisco and Montreal. The Lawson-McGhee Library of Nashville also opened its new edifice. College library buildings were completed and dedicated at Amherst College, and at the University of Notre Dame, Indiana; Williams, Vassar, and Michigan University are making substantial additions; Leland Stanford University, California, has cleared the ground for a new library building to replace the one which the earthquake of 1906 destroyed, and the Peabody College for Teachers at Nashville has accepted plans for a library building of unique character, designed by Mr. Tilton, which will be the most important of its kind in the South. The building of the United Engineering Society in New York has been enlarged to house the added treasures of the Civil Engineers Library, by

the remarkable engineering achievement of adding two stories to a skyscraper in the shape of a four-legged stool, whose legs are steel columns ingeniously carried thru the existing building from ground foundations. Kansas City, Mo., has doubled the housing capacity of its library by an important extension. Detroit is clothing the steel skeleton of its building, completed long since, by the facing of stone, the cornerstone having been laid during the year. Philadelphia, despite litigation, has progressed with preparations for building at the fine site on the new parkway, and Brooklyn, after long delays, is making progress on the wing which is to be first completed.

IN publications and bibliographies, the year has not been notable. War bibliography has attracted attention and probably the war museum established at London, the French war library at Lyons, the German collection in Berlin, and other collections will lead to developments toward adequate bibliographical record of the world war. The fourth volume of "Books on the Great War," edited by F. W. T. Lange of the St. Bride Foundation Libraries, was received in this country early in the year. The first section of a "Catalogue of war publications," to June, 1916, compiled by G. W. Prothero and Alex. J. Philip, is designed ultimately to include every work of importance related to the war and published before its close. The high cost of paper and printing which war conditions have induced, has resulted in several discontinuances and suspensions—among them the stopping of the Portland, Oregon, *Library Bulletin* and the omission of the annual cumulation of the *Open Shelf*, published by the Cleveland Public Library. The Technical Book Index, formerly published by the Indexers of Chicago, has been taken over by the Pittsburgh Library. *Information*, a useful library tool, has been suspended, and a new *Business Digest*, cumulated quarterly, has been supplied in

its place. Mr. Koch's volume on Carnegie libraries up to 1907, with illustrations, is one of the interesting library publications, and valuable in library practice will be Miss Mudge's thoro revision of the Kroeger "Guide to the study and use of reference books." The "Apprentice course for small libraries," prepared by the faculty of the Wisconsin Library School, and the catalogs of children's books from the H. W. Wilson Company, have been other practical library helps of the year. In special bibliography, the most important issue has been the catalog of the Petrarch Collection at Cornell, published in England in a substantial volume by the Oxford University Press.

AMONG the civilian services of the war one of the most important features has been the provision of ambulances which America generously supplied in considerable numbers even before our entrance into the war. At the A. L. A. conference of 1917, Miss Hitchler proposed an A. L. A. ambulance, but the pressure, especially within recent months for other war services, has put this plan somewhat in the background. It commended itself especially to the late Henry E. Legler, whose son had volunteered for ambulance service in France, and it was his earnest wish that such an ambulance might be provided and that his son might have the honor of being the driver for the A. L. A. ambulance. Some of the western associations have taken up this thought and are pressing Miss Hitchler's plan with this in view. About half of the \$1900 necessary has been raised, and further donations may be sent to Miss Hitchler at the Brooklyn Public Library.

THE report of Dr. Raney on behalf of the A. L. A. committee on importations, shows that, in large measure thru the co-operation of the Librarian of Congress and the special representative of the library in London, Mr. Koch, much was accomplished early in the year toward the importation

of German books, by the freeing of the cases held in Rotterdam. Since then, the Trading with the Enemy Act has been passed and careful regulations have been made regarding the importation of publications originating in enemy countries. The committee has succeeded in securing a blanket license on behalf of the American Library Association, under which "universities, colleges and public institutions of approved character," inclusive of public libraries, may import enemy publications, especially serials, necessary for research purposes and not of objectionable character. This excludes not only popular literature, but also the theological works and the historico-political publications which have alike been made organs of propaganda. The committee's circular to libraries is printed elsewhere. The library profession is to be congratulated both that its national organization has been the means of accomplishing this result and that it has had the service of so active and efficient a committee.

RUSSIA, despite its political upheavals, has been coming more and more to the front in library development. The Library School in Shaniawsky University at Moscow had above 200 students this year, in addition to the thousand enjoying its training in previous years. The Russian Library Association at the end of its first year included 500 members, and has four branches in as many centers. Lectures on library economy have been given in several cities. Under the new regime, all restrictions have been removed from libraries and a number of new public libraries are in course of development. Mexico also is showing advance, a library school at Mexico City having entered upon its second year with over a hundred students for the two-year course which replaces the original one year course. The progress in these two countries is a happy surprise to those who have not carefully watched the forward movement of their peoples.

A COLLEGE LIBRARY IN WAR TIME*

BY HERBERT PUTNAM, *Librarian of Congress*

OUR purpose to-day seems at odds with the times. We are to dedicate a building to books, and the uses of books: to study, therefore, and to meditation. And the world is at war, the time a time, not of meditation, but of passion; a time for action, not for quotation; a time for asserting convictions, not for forming them. A collection of books represents agreements, sympathies and mutual understanding among men; it stands for a certain continuity in the developing relations between man and man, nation and nation. War abruptly suspends those relations between great groups of men, ignores all the previous reciprocities, and throws back the contending peoples into an attitude purely primitive. It is the office of books to seek and exploit the good, the true, the serviceable, the amiable, wherever it may be found: it is the necessity of war to invigorate itself by seeking and exploiting the base, the false, the weak and the detestable in the enemy. It is the office of books to bring men together; it is the effect of war to keep them apart.

But if these contrasts exist, there may be the more reason for exemplifying them. If the normal relations are for the moment suspended, there may be the greater need of remembering that they have existed, and will be resumed; and if civilization itself seems to have lost its hold, of recalling and emphasizing that it never does so completely, that its progress is continuous, and that even cataclysms such as the present, when viewed in retrospect, will appear to fit into an evolutionary progress, doubtless divinely ordered.

The proof of this is in books, the record in a library. And at precisely such a time as this the dedication of a building to library uses is a necessary assertion and useful reminder: just as was the steady erection of the dome of our Capitol—assertion of unity—during the disruptions of our Civil War. A reminder too—the li-

brary—that there are “first principles” in science, canons in art, lessons in history, and rules of conduct, which no political disturbances among men can affect; and particularly useful if it emphasize, as here it does, that, whatever the disturbances, the ultimate tranquillity, efficiency, and happiness of the community depend upon the individuals composing it: and that therefore the need of the individual to educate himself, by the established methods, and in the customary ways, remains imperative. If war requires temporary emphasis upon certain ideals necessary to its own efficiency, it must not be allowed to set aside as futile the ideals deemed efficacious in normal times. I mean, of course, those ideals in education, in the business of life, and in the relation of man to man—of nation to nation—which are urged in times of peace.

The ideals—the methods—and the apparatus also. Of which latter are books. Is their potency lost? Is it disposed of by the fact that, with millions of books to guide them to decent conduct and friendly appreciations, the nations are at war? Is it disparaged by the fact that the nation held by us responsible for the war, most condemned for barbarity in it, is the nation most devoted to books—most insistent and orderly in its process of education? The answer is for your faculty to give. The present offers a unique opportunity for its statement.

I am sure they will take advantage of it, and that their effective instrument will be the books themselves. Also, that it will lie not in profuse references to many books, but in the discriminate use of a few.

In many counsels there may be wisdom, but it is only the wisdom of the one wisest among them. In many books there may be a multitude of evidence for the investigator, of subtleties for the sophist, but only confusion for the man seeking a guide to conduct. And in its abilities to make the worse appear the better reason a University Library contains confusions for the under-

* Address at the dedication of the Converse Library Building at Amherst College, November 8, 1917

graduate which a College Library may well avoid. Certainly the fundamentals of history, of science, of philosophy, of good faith and of good breeding can be found within the compass of a hundred thousand volumes. And of these it is only good faith and good breeding that are for us the issue in this war. The original issues were doubtless complex and of many effects and motives. It was not they that brought us in. We came in only when one of the combatants announced and set in practice a doctrine that ignored the sanctions of humanity achieved after centuries of painful effort, and threatened every community relying for its safety upon justice rather than force—a doctrine of monstrous egotism: the doctrine that a nation "fighting for its life" [its own judge as to whether it is so fighting] need regard nothing but its own immediate profit. There are some things which a gentleman regards even when he is fighting for his life.

It may assert law in its behalf; but it isn't law that it infracts. It is a "gentleman's agreement": an understanding between nations precisely similar to that between the individuals of a border community where there is no positive law, nor courts to interpret it, nor police to enforce it. An act which shocks the good sense or the conscience for the community, or seems to imperil its safety, isn't dealt with as a breach of law. It isn't open to argument. It meets a resistant more fundamental than law. The bystanders won't "stand" for it. And they "take a hand" to suppress it.

So we took a hand, tho indeed we had also a particular hurt of our own. But the point is that the issue upon which we did so was not an involved and intricate one, not an issue of dynasties, or heredities, or territorial aggression or commercial ambition: it was the simple issue of good faith and good breeding. The test we applied was the test of what is fair and decent and safe among peoples who are to live and do business with one another. And the decision we made was the decision not so much of our minds as of our conscience. It did not require elaborate learning, for it did not admit of argument.

Most wars have a compensating side—in

the examples they furnish of personal dedication and self-sacrifice. If they rend certain groups apart, they bring others into a new and close communion of effort and suffering in a common cause. But this particular war has the especial value of being, for us at least, a war of principle. And the impress of it as such should be deep upon our younger generation.

Deep also from another side, the example of organization and of subordination which it requires, as has no other war hitherto: of an entire community bending itself to a single purpose, organizing all its energies towards this, subordinating to it every selfish, individual interest. It is a lesson in efficiency. And the application will go beyond it. For if such organization and subordination are necessary to the efficiency of the community in war, why should they not promote its efficiency in peace? The question will be raised. It will gravely concern the generation that is to deal with our civic problems in the early future; and the opportunity is extraordinary to interest that generation in it while you hold their attention. You can do so with effect only by relating the phenomena of the times to the studies which they pursue here.

An enviable opportunity. And it is available not merely in the field of history and the political and social sciences but in the natural and physical sciences as well, and in the arts: for all alike are being drawn upon and applied. There is indeed scarcely one of them unrepresented in our Council of National Defense. No such concentration of them has been witnessed before; nor such a demonstration of the application of the exact sciences and the utility of the, so-called, theoretic sciences.

But there is another lesson also—the lesson of all great crises in human affairs. It is the proof they offer of the qualities in the individual man which make for efficiency. Such crises strip off the non-essentials, bare the essentials. The man who emerges is efficient not in proportion to his learning or accomplishments, for these but enable him to deal with a familiar problem in the usual way. What enables him to cope with a crisis is the ability to deal with an unfamiliar problem in an un-

usual way. And this ability depends not upon what he knows, so much as upon a combination of this with what he sees, feels and judges, so that the whole co-operates as power. When we stress the faculty in this we call it efficiency; when we stress the quality in it we call it character. And the impressive fact is that the controlling element—that which enables him to meet supremely a great occasion—is character rather than faculty. It is the moral of him, not the intellectual in him. It is no mere possession. It is rather an adjustment within him of all his possessions with all his parts. It is this which ensures the co-operation. It is this which proportions him to his task. It is this which gives him his driving force. And it is this alone which makes his effect enduring. It is enduring, because what he has applied to the task is a something independent of his knowledge or time or circumstance. It is something fundamental—*independent of all time, superior to all circumstances.*

It is deeply ethical. And yet it may be expressed in terms quite intellectual, even in the terms of art.

Down on the Mall in Washington there is approaching completion a memorial to Lincoln. The design is classic, suggesting to the casual a near reproduction of the Parthenon. And some have questioned it as singularly inapt. A Greek temple to commemorate Lincoln! What more remote from him, less suggestive of him?

They are thinking of the superficialities of the man, contrasting this with the symmetry and refinement of Greek architecture. Even so they are thinking incompletely: for they overlook two vital qualities which even his superficialities shared with it: proportion, and repose. And the power due to both. St. Gaudens didn't overlook them: both his erect and his seated figures of Lincoln absolutely convey them: and in doing so are as "classic" as any that have come down to us from the age of Phidias.

Now in architecture proportion and repose are near expressions of the ethical. And the architecture of the Greeks expresses them pre-eminently: not perhaps because of the moral qualities of the Greek

people, but because, however in private life the Greeks may have relaxed to the pleasure or the expediencies of the moment, their aesthetic sense demanded in their architecture that perfection which includes due adjustment of parts to whole, and of the whole to its problem and its environment.

On the aesthetic side this adjustment is beauty; on the intellectual and moral, it is efficiency. And where the question is of a man, in relation to a problem requiring exercise of the moral qualities—where, for instance, his success is conditioned upon his sympathy, his tolerance, his charity, the veracity of his nature, its very basis is moral. Such a man was Lincoln; such a problem was his; and only such an adjustment enabled him to meet it. "The goodness of his greatness combined with the greatness of his goodness." And if architecture is to express him at all it will be that architecture which truly stands for veracity. Truly for proportion also, and balance, and the fit adjustment of the means to the end—which, under Providence, Lincoln himself stood for.

An adjustment: of mind and heart and soul. The building which expresses it—or the book—whether of yesterday or to-day—is equally a classic. The man who expresses it is a master in efficiency; and it is only such men—and such nations—that contribute to the permanent progress of the world. Where the adjustment fails, they fail. And the conspicuous cases where it fails are the cases where the intellectual in them overbalances the moral. Such a case seems that of the nation—or of the government which professes to interpret it—which arrays its "efficiency" against us to-day. It is a plausible efficiency, and it has ingenious and terrifying instruments; as the mind can always have if untrammelled by morality in method. It may win initial success. But it is not a complete or final efficiency. It cannot prevail. And if we can prevent, it shall not.

Are these various reflections remote from the occasion? Not as they have come to me. I am thinking of the ideals of Amherst, of this collection of books in relation to them, and of this building in relation to both. "Amherst does not look on

any man as educated unless he has been taught to interpret the problems of his own day thru the lessons of the past." That assuring declaration of your trustees implies that the man of Amherst is to study the past in relation to the duty of to-day. The duty of service and of citizenship. And the aim of Amherst is to perfect men in efficiency for both. It was the aim of your founders when they undertook to prepare men for the ministry: for that meant then, more exclusively than now, to prepare them not merely for the service of God but for the guidance of their fellows in the practical conduct of life. And I assume that it is the aim still, tho ministry is no longer the exclusive, or even the main, destination of her graduates. It requires you to consider what are the elements of efficiency, upon what it is grounded; and if the times yield illustration, to utilize it.

If, therefore, I have dwelt upon the present phenomena it is for their application; if upon the fundamental in the great issue in which we are engaged, it is because this is a moral issue. As such it is a permanent issue, for indeed it is only the moral issues that *are* permanent. It concerns society as an organism, with a developing past, a still developing future, and a present drawing upon the one and responsible to the other. It concerns us individually not as individuals, but as members of it, "functioning" (tho I dislike the word) in relation to it. And it concerns now and here these men who are preparing themselves for the opportunity and the duty which this relation involves. "Not until a man has learned to feel as well as to think organically can he be a good citizen," remarked Professor Morse, in an address here thirty years ago. For the development of right feeling the four years of college—the plastic years—may be the most important of a man's career: none the less that the development may be as much thru experience as thru formal study. In either case books—not necessarily many books, but the right books, wisely chosen, wisely interpreted—may be potent in it.

But men must also be taught to think. And from this necessity also I find warrant for connecting the times especially with

your purpose here. Your purpose, and the method upon which you rely to effect it. If war integrates the action of a people, it may disintegrate their modes of thought. It may detach them from their customary standards, and from the processes which they have considered sound and efficient. In a time of war it is especially necessary that these should be reasserted, the pledge to them renewed. But there have been disintegrating influences among us apart from the war; a disposition to loose and irresponsible thinking, an easy content to adjust ourselves merely to the phenomena of our time. What new need, on the contrary, is more close and responsible thinking, and a care to adjust ourselves to the principles of all time. It is this which it is the aim of Amherst to ensure in the men under its charge. And she ensures it by insisting upon intensive study in the few fundamentals rather than a casual acquaintance with many superfluities. It is an age of experiment in education: she adheres to those processes for the development of an efficient mind and of an orderly character which have been tried and tested by generations. For it *is* education she sets herself to, not mere cultivation: that education which, grounded on the humanities, is, however, itself the groundwork of true culture, as distinct from mere cultivation; equally distinct also from the exercises which equip for a mere vocation.

That, as I understand it, has been her aim, and I rejoice that under her present administration the aim has been reiterated. It is not the only aim of a University; but it is the fit and needed aim of a College. An argument for the founding of Amherst was that it would be equidistant from Yale, Brown and Harvard. There are, I think, respects in which it may profitably remain so.

The ultimate goal is to prepare men "to live creatively rather than possessively." It is to form them, not especially to inform them. It is less concerned to give them beliefs, than to enable them later to achieve beliefs for themselves. And in no case will it profess to "exhaust" for them or require them to "exhaust" any subject while they are under its control.

The aim in short is neither casual acquaintance with many subjects—by the easiest way—nor elaborate research in any one. It is study and experience, under guidance and discipline. Its instruments should correspond: among them especially the library. Fitly to correspond this must be a collection compact and organic rather than "comprehensive." Within each subject it should have the best, refreshed constantly by the still better. But it need not be great in dimension. A hundred thousand volumes—which you have—might suffice; the three hundred thousand which you have now accommodation for should certainly suffice. That is to say, a collection of that size; for the particular books on hand will not, nor the particular books on hand at any one time.

Among your faculty of course there will be men pursuing research—if not to "keep abreast" of their subject, at least to keep alive in it; but their special needs may be met by borrowing from other libraries—university libraries, and the National Library under our system of "inter-library loan."

It is a "working" library that I am thinking of—a library to serve men in equipping themselves for life, not to assist them in pursuing it; still less to enable them, thru its own resources, to widen the boundaries of knowledge. The former is among the aims of a municipal library; the latter a just aim of a university library. But it means the acquisition of "special collections" irrelevant to the undergraduate, which even if they come by gift are expensive to house and administer. They are tempting, they add prestige. But a college library regarding efficiency as paramount should avoid them: except, of course, those which, like your Clyde Fitch Collection, have an intimate "association interest." They are a distinct asset, and a valuable one.

On the other hand, if efficiency is to be regarded, the closest care in the choice of what it does acquire, and insistent attention to the apparatus by which alone this may be made fully useful. For your own collection this has been ensured, so far as the means permitted, by your good fortune in librarians. With a William Fletcher—

to name only the recent ones—as sound a librarian in method as our profession has produced, and one of the most industrious, in the conduct of it for so many years; and a Robert Fletcher in loyal succession to him, there is little fear that the apparatus has been or will be neglected. Only the means may have fallen short, and are always likely to. Whatever you can do to amplify them may prove more productive than an equivalent sum spent in adding to the collection.

An organic library, for intensive study and experience. The thought of it gives me peculiar relish. And it does so none the less from the fact that my own professional association has been with libraries of a different type—libraries for the diffusion of [unsorted] knowledge—or for the enlargement of knowledge in general. There are libraries and libraries, however: or rather there should be. The attempt to make them all alike is wasteful. They should be differentiated to their several purposes. And the library of a college particularly. It is part of your apparatus. It should be shaped and discriminated for efficiency as such.

But I am conscious how odd it may appear that with the custody of a collection of two and a half million volumes which I am still trying to increase, I should be declaring the sufficiency of a hundred thousand. Equally odd that on this celebration of the service of books I should be laying stress upon the qualities in men, to the formation of which books are less essential, and touch but lightly upon the possessions and accomplishments of men to which they may add uniquely. The glorification of them in other aspects—to amuse, to inspire, to cheer and to solace—I have omitted entirely. Yet it is customary to such occasions as this. It is natural, and a privilege.

But again the times are my excuse. All those aspects of books concern the individual merely. The times concern him as a member of a community. They bring a test and a challenge: of him, of the institution which is shaping him, of the instruments which it employs. The test is severe. It goes to the fundamentals. It is a test

of efficiency. "What can I do, with what I have, where I am?" What can I do? That is the test. I may be an "ornament" to society; but that does not suffice. It is not the decorative side of life that in the last grim analysis we are concerned with. What can I do?

The final test is efficiency. It is met by a college which teaches men to feel, as well as to think: to feel truly and largely, to think truly and closely. It is met by a collection of books which intensifies study and experience to the same end. And it is met by a building which expresses the elements in efficiency especially regarded here: a building compact, serious, restrained, concentrated in purpose; in treatment frugal, without parsimony; avoiding irrelevant adornments, but achieving beau-

ty, power and refinement by its proportion, its balance, and the apt adjustment of means to end; a building which draws upon the past—as you are drawing upon it, and as this collection draws upon it—for the best lessons that the past affords, but adapts these to the present need, the present environment, and a community service; a building which will promote, by exemplifying, what Lowell called the chief aim of a college education: "that good taste which is the conscience of the mind, and that conscience which is the good taste of the soul."

You may well rejoice in such a building. The donor may rejoice. And the memory of him whom it commemorates cannot but rejoice. I know of no form of memorial more enviable.

HOW TO MEET THE LIBRARY NEEDS OF THE FARM*

BY MINNIE LEATHERMAN BLANTON, *Secretary of the North Carolina Library Commission*

IF the North Carolina Library Commission really knew how to meet the library needs of the farm, how to give the farmer, the farmer's wife, and the farmer's children the library service that each requires, if the commission knew how and could and would, I believe it would mean more, not only to the rural population, but to all the people, than any other service we could render our state. Such is my faith in the power and in the influence of the right kind of books. . . .

"How to meet the library needs of the farm"—the problem is threefold: How to procure the books; how to get the books to the country people; and how to get the country people to use the books. The question of money is involved in each to a greater or less extent. Our state constitution says "Religion, Morality and Education being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged." Surely books are a means

of education second to none. Hence the state is fully justified in appropriating money to be expended in meeting the library needs of the farm, especially a state like North Carolina in which the population is overwhelmingly rural. But it requires not only money to buy books; it requires something else to select the right books—skill and training and experience, and sympathy and love, and unless one has these qualities in abundance and will put her whole heart and soul into the work, the library needs of the farm will not be met.

Do not send worn out books or collections made up largely of gifts to the country. You know what kind of books people give away. And do not, I beg of you, send books which have been discarded by some library in the North or in the South. Country people have a right to the best and we should see that they get the best.

It is sometimes said that country people do not like to read, do not want to read, and would not read even if books were available. Our experience shows that

*Abridged from a paper read before the Georgia Library Association, Oct. 16, 1916.

country people are just like town people—they will read if they can get suitable books and attractive books. They don't like soiled volumes or volumes printed in small type on cheap paper and poorly bound.

Having secured the money with which to buy the books, and having procured the right books selected by a trained and experienced librarian, the next step is to get the books to the people. The ideal way, perhaps, is by a system of county libraries, where each county has its own library located at the county seat with branches in the small towns and automobile book trucks to call regularly every two weeks at the door of every farm home in the county.

The county library, the township library and the extension of public library privileges to county residents are all comparatively recent phases of library extension development. Many years before county extension had been thought of, the importance and necessity of providing library privileges for country people had been discussed. In 1892 New York State took the lead in this work and passed a law providing for the operation of traveling libraries. Other states quickly followed the example of New York and today traveling libraries are in active operation in nearly every state of the Union.

The first traveling libraries were boxes of books containing about 50 volumes, but the traveling principle has gradually been extended and now single volumes, small collections and big collections, pictures, lantern slides, exhibits and various other educational agencies travel from school to school, from library to library, and from place to place all over the country.

It is not claimed that the traveling library effectively and adequately meets *all* the library needs of the farm, but the claim is made and with justification, that it is doing much and doing it well. To-day we hear a great deal about the disadvantages and inadequacy of a state traveling library system and some of the criticism is undoubtedly just, but the fact must not be overlooked that in the initial stages of a state library movement traveling libraries are absolutely necessary. The traveling li-

brary is the pioneer. In a state in which there are no big cities and few large towns, in which over 86 per cent. of the population is rural, in which there are only a few strong public libraries, the traveling library while not ideal nor even adequate, is nevertheless effective, and we think, necessary.

And now we come to the most important phase of the whole subject—how to get the country people to use the books, for our work is indeed useless if people do not read and do not profit thereby. You can lead people to good books but you cannot make them read. It is largely a matter of education, altho a great deal depends upon the publicity methods used; upon where the traveling library is kept and the custodian; upon having the right kind of books in attractive editions; and upon dozens of little details that must not be ignored. In an ideal library world we should have a number of agents traveling thru each state and visiting each library station regularly, but the expense renders it prohibitive in many of our commonwealths, altho it is done to a certain extent in New York, Wisconsin and several other states.

The operation of package libraries was begun in North Carolina in 1912 but it was not until two years later that the first regular traveling libraries were sent out. The traveling libraries contain between 36 and 40 volumes, never more than 40, for the simple reason that the small supply of books and limited funds go much farther and reach more people. They are lent to communities, to schools, to local library associations, to book clubs, to farmers' union locals, to community service leagues, betterment associations, civic leagues—to any regularly organized body that will assume the care of the library and sign the application, but always on condition that all the people of the community, adults as well as children, shall have free use of the books. No charge is made for the loan of libraries, but borrowers pay the transportation charges both ways. Libraries are lent for three months with the privilege of renewal for one month longer. They are not renewed for three months because we must in every instance stretch our resources just as far as possible.

Moreover four months seems to be as long as the average community cares to keep a library.

The fixed collection plan was adopted in the beginning and has never been changed. There are disadvantages, of course, and some day when both our appropriation and staff have been trebled we may change to the open shelf plan. For the present it does not make any difference because every library is in circulation all the time, and it is a question of taking whatever collection happens to be available. Moreover our borrowers for the most part do not know how to select the books, and in the majority of cases would leave it to the commission anyway.

The libraries are not intended especially for schools but are for general community use. In fact in a typical library only one-third of the books are children's books; the other two-thirds are books for grown people. A large proportion are good, wholesome, entertaining novels; then there are one or two good biographies, a book of travel, a volume on agriculture, one on public health or personal hygiene, domestic science or household economics; and in most cases, a book of recreation, as we call it; that is, a book giving suggestions for simple parties, plays, entertainments or clubs—something that will be of practical assistance in developing community spirit and community recreation. Whenever requested small collections of books on special subjects are sent in the regular traveling libraries. In this way we endeavor to meet in a general way the special or local needs of a particular community.

The libraries are kept in post-offices, telephone exchanges, express offices, general stores, drug stores, club rooms, school houses, private homes—any place in fact where the people go often and freely. Large cards with blank space for the insertion of the location of the library are sent with each collection and the librarian is requested to place these cards in public places so everyone will know the library is in the community and just where it is located.

A word should be said about the cases in which the books are shipped. Some commissions use both a bookcase and packing

box but the expense involved made such a method prohibitive in North Carolina. The problem was to find a box strong enough to stand the hard trips on the railroads and thru the country and yet attractive enough to be used as a bookcase at the different stations, and moreover cheap enough for the commission to be able to buy as many as were needed. The last cases purchased meet all these requirements and cost \$3.75 each in lots of fifty, without the locks.

But the regular traveling libraries do not always meet the special needs of the farmer, the teacher, the members of book clubs, of debate or literary societies and of the students. In North Carolina these are genuine library needs of the farm, and for that reason much of our time, effort and income are expended in the preparation and operation of package libraries.

It seems that North Carolina was the first Southern state to send out package libraries; in fact there were only a few operating them when the commission began the work several years ago. The first libraries were prepared in the winter of 1911-1912 in response to many requests from all parts of the state for literature on current, social and political questions. These requests came mostly from students, principals and superintendents of the rural districts and of towns having no public libraries.

North Carolina's debate libraries are made up not only of magazine articles, speeches, briefs, newspaper clippings, government documents and pamphlets—"shirt-sleeve" literature as Oliver Wendell Holmes called it—but, in the majority of cases, several books are also included. These are forwarded by parcel post, the amount of postage required varying from five cents in the first zone to ten cents in the third zone. Each of these package libraries contains the best material available on a subject and as much as the average public library would be able to give. Hence they are not lent to individuals but only to schools and debating societies and on condition that all taking part in the debate have the use of the material. Applications must be signed by the principal of a school or the officers of a debat-

ing or literary society. A very important package library is the collection known as the Farmer's Library. This little library, containing twelve of the best books on agriculture for North Carolina farmers, has been duplicated many times to meet the demand. The libraries were purchased from an appropriation made for the purpose by the State Department of Agriculture and are lent to Farmer's Union Locals and to other groups of farmers for two months. The collection weighs about twenty pounds and the postage in the first and second zone is 24c and in the third zone 44c.

The commission also maintains a general collection on agriculture and country life, consisting of more than 140 titles, the most important and popular being duplicated as many times as is necessary to meet the demand. A group of ten books from this collection is lent to a farmer's union local or other groups of farmers for two months or single volumes are lent to individuals for one month upon receipt of application signed by an officer of a local organization or a county official. Upon request a group of six from this collection is included in a general traveling library.

The general loan collection is a miscellaneous collection of books on all subjects and it enables the commission to send books to individuals, and to supplement the various fixed collections so that they will meet the local needs of each community and organization to which they are lent. In order that country people and people who do not have access to public libraries may secure books as easily and as promptly as possible, they are sent in response to applications endorsed by a teacher, minister, county officer, postmaster, county or town official or the officers of a book club, society or other organization. The books from this section are lent for three weeks and the borrower pays the postage both ways.

But our most valuable file is the magazine file. No one, or at least no librarian, can keep house to-day without magazines and the Wilson indexes. The collection costs practically nothing for the people gladly give us magazines to get them out

of their way and we cheerfully and gratefully accept them and beg for more. The magazines are not bound but are shelved in proper order and any desired number can be found very easily and quickly. The desired article is removed from the magazine, the magazine returned to its proper place on the shelf, and the article itself stapled in a cover or folder similar to those used by the H. W. Wilson Co. The magazine itself is never sent, for a package library often contains 15 or 16 or even 20 articles and to send complete numbers would make the postage very high. Then, too, dozens of articles in those very magazines would probably be needed for other collections. Books are often torn apart and the several chapters treated in the same way, and it certainly pays to do this in the case of essays and collective biography.

When a magazine article is returned, if it forms part of a fixed package library collection, it remains in the collection and the collection is filed in a pamphlet box; but if it is a part of a special collection the article is filed according to subject in a vertical file.

This is only one phase of the work of the Library Commission. The ideal toward which the commission is working is to make it possible for every man, woman and child in North Carolina, whether he or she lives in a city or town, a small village or on a remote farm, to read good books. Hence the commission in its attempt to meet the library needs of the whole state is waging an active campaign whose object is "A Public Library in Every Town in North Carolina by 1920." It is aiding in the organization of these new libraries, and in the reorganization of old ones. To give to every man, woman and child in North Carolina the books that belong to them is the goal towards which the commission is working. The goal will not be reached in this generation and probably not in the next, but it *will* be reached, and when that time comes our people will be a reading people, a prosperous and a happy people.

January 26, 27, or 28.

SOME REFERENCE BOOKS OF 1917

BY ISADORE GILBERT MUDGE, *Reference Librarian, Columbia University*

THE aim of this present article like that of similar surveys of reference books of earlier years is not to present a complete list of the new reference books of 1917 but rather to indicate from the point of view of the general library some of the more important, useful, or interesting of the new publications. While most of the works referred to have been published during 1917 mention is made also of some books of 1916 and 1915, principally foreign publications which were either issued or received in this country too late in 1916 to be examined in time for mention in the survey of reference books of that year. It has been necessary to omit some French and English reference books which probably should be recorded here, because on account of the delay in importation due to the war, copies have not yet been received in the various libraries to which the writer has access.

The classification of titles in the following record follows, in the main, the grouping in the new edition of A. B. Kroeger's "Guide to the study and use of reference books" (Chicago, A. L. A. Publishing Board, 1917), to which this present article forms an informal and unofficial annual supplement.

PERIODICALS AND CURRENT EVENTS

A new index of periodical literature and current events which promises to be of considerable importance in its special field is the *Business Digest* which furnishes a record of current events in all lines of business, with references to articles in about 100 periodicals and digests of many of the articles. Started early in 1917 as a monthly this new digest for a while ran parallel to *Information*, issued by the same firm, but later changed to a weekly and in July absorbed *Information* which was discontinued as a separate publication. The present form of issue is weekly, with quarterly cumulations which furnish permanent bound volumes and have the title "Current business encyclopædia." Of the hundred periodicals indexed those of a purely busi-

ness character are indexed completely while those of a general nature are indexed only for their articles on business subjects. While most of the periodicals are either English or American, some foreign journals, German, South American, etc., are included, and the list as a whole adds many titles not covered by other indexes. In the topics included special emphasis is naturally laid upon business subjects, and as a record of general current events the new digest is not always as satisfactory as its predecessor, *Information*.

Certain changes and developments in existing indexes might be noted. The "Agricultural index," started last year, has issued its first annual volume which indexes 158 agricultural journals and bulletins. The third annual cumulation of the "Public Affairs Information Service" covers considerably more material than the earlier annual volumes, indexing nearly 500 periodicals as against less than half that number indexed in the cumulation of a year ago. The *International Military Digest*, heretofore issued in three forms, monthly, quarterly and annual, has discontinued its quarterly cumulations.

Agricultural index, 1st annual cumulation, 1916. White Plains, N. Y.: Wilson, 1917. 256 p. \$8.

Business Digest. New York: Cumulative Digest Corporation, 1917. Subs., weekly, \$10 per yr.; weekly and quarterly, \$15; quarterly alone, \$10.

International Military Digest. New York: Cumulative Digest Corporation. Subs. \$3.50 per yr., with annual cumulation, \$5.

Public Affairs Information Service. 3d annual cumulation. White Plains, N. Y.: Wilson, 1917.

SOCIETY TRANSACTIONS

An important event to reference workers who handle the publications of French learned societies has been the issue of part three of Deniker's "Bibliographie des travaux scientifiques publiés par les sociétés savantes de la France," a bibliography which has been at a standstill since the issue of parts 1 and 2 in 1895-1897. The new part extends the work by some 200 pages.

Deniker, Joseph. Bibliographie des travaux scientifiques . . . publiés par les sociétés savantes de la France, dressée sous les auspices du ministère de l'instruction publique. Paris: Leroux, 1916. v. 1, pt. 3. 5 fr.

DICTIONARIES

The new dictionaries of the year have been principally small handbooks, and special glossaries and foreign language manuals called for by war work and war conditions. In the first of these classes belong the new edition of a standard English handbook, Crabb's "English synonymes," and a new Russian and English dictionary by J. H. Freese which is useful where a small work is needed but is not a substitute for Alexandrov's larger work. Of first importance in the class of special dictionaries is the new edition of Willcox's "French-English military technical dictionary," a re-issue of a standard work which has been enlarged and brought to date by the addition of a 74-page supplementary list of new words and senses. Smaller military glossaries are Pagé's "Glossary of aviation terms," Plumon's "Vade-mecum for the use of officers and interpreters in the present campaign" and an anonymous work, the "Dictionnaire des termes militaire et de l'argot poilu." This last is in French only and contains not only definitions of terms but also some encyclopedic information, *e.g.*, information about uniforms, military medals with description and illustrations, national songs, etc.

Crabb, George. Crabb's English synonymes, rev. and enl. by the addition of modern terms . . . with an introduction by J. H. Finley. New York: Harper, 1917. 769 p. \$1.25.

Dictionnaire des termes militaire et de l'argot poilu. Paris: Larousse, 1916. 320 p.—fr. 2.50.

RELIGION

New publications to be recorded in this field include both new volumes in some of the great reference sets that are in process of publication, and also smaller works complete in themselves. In spite of the pressure of war times work on the great French sets proceeds. Three new fascicles of

Cabrol's "Dictionnaire d'archéologie chrétienne," issued during 1916, carry that important work to the word *Dimanche*. A new volume, volume 9, of Hasting's "Encyclopædia of religion and ethics" advances that work thru the alphabet as far as the word Phrygians. A statistical publication of timely interest and importance, in view of the interest in and need for information about conditions in Armenia, Syria and other regions of the Turkish Empire, is "World statistics of Christian missions" by Harlan P. Beach and Burton St. John. This forms a new edition of the statistical and directory part of the "World atlas of Christian missions," published in 1911, but omits the maps and so does not entirely supersede the earlier work.

Beach, Harlan P., and St. John, Burton. World statistics of Christian missions. New York: Foreign Missions Conference of North America, 1916. 148 p. \$2.

Cabrol, Fernand. Dictionnaire d'archéologie chrétienne. Paris: Letouzey, 1916. Fasc. 35-37. 5 fr. each.

Encyclopædia of religion and ethics, ed. by James Hastings. New York: Scribner, 1917. v. 8. \$7.

SOCIAL SCIENCES

In spite of the fact that the war has caused the disappearance or temporary suspension of many established year books, new works of this type are still started from time to time and two new titles may be noted this year. A new work in international statistics is "Annuaire international de statistique," the first volume of which gives detailed statistics of European population in 1916. A new colonial annual is the "Year book of the Netherlands East Indies" which is issued in both Dutch and English editions and gives in its first issue a good deal of general descriptive matter as well as some statistical tables.

Several titles important for questions on economic conditions or economic history of this country have been published. For present conditions an important new handbook is the "Abstract of the census of manufacturers, 1914" which gives in condensed form, in advance of the detailed reports, the figures collected in 1914 and makes comparisons between these and earlier figures, giving comparative figures gen-

erally for 1914, 1909, 1904 and 1899. A new edition of "Commercial organizations of the United States" revises the earlier list published by the Bureau of foreign and domestic commerce in 1915, and carries information to July 1917. For historical purposes an important new work is the "History of transportation in the United States before 1860" prepared under the direction of B. H. Meyer by Caroline E. MacGill and others. This belongs to the Carnegie Institution's series of "Contributions to American economic history," forming a companion work to Johnson's "History of domestic and foreign commerce" and Clark's "History of manufactures" published in 1915 and 1916 respectively. Like these earlier members of the series, this new volume has special reference value both because of its detailed treatment of the subject and, particularly, because of its full bibliographies.

In college libraries and in other libraries used by readers interested in present or future possibilities of foreign study there is definite reference use for "Science and learning in France" published by the Society for American Fellowships in French Universities. The subject is covered in sections devoted to special topics such as archaeology, history, philology, political science, etc. Each section has been prepared by a special drafting committee, and indicates the record of French scholarship in its particular field, notable achievements and famous names, courses in the subject given now or recently in the different French universities, and the special facilities available, such as libraries, laboratories, etc. In addition to its main purpose, the book furnishes considerable incidental aid to the reference worker by suggesting the names of eminent writers and authorities in the various fields covered.

A convenient new handbook for both the general and the law library is "Important federal laws" compiled by John A. Lapp. This gives the text of the federal constitution and of a selection of the more important laws affecting questions of business, labor, agriculture, national defense and other questions of wide or constant in-

terest and application. A supplement which is issued separately and also bound in with later issues of the main work, brings the record quite up to date by adding the important acts of the Special session of Congress, April-October 1917. Of interest in quite a different field is Sherman's "Roman law in the modern world" which while primarily a work for the law student covers many topics of interest to the student of Roman history and institutions and thru the detailed manual and bibliographical guide in the second and third volumes furnishes reference aid to the research worker in this field.

SCIENCE AND USEFUL ARTS

Several scientific bibliographies of reference value have recently appeared. "A bibliography of fishes," by Bashford Dean, is an important work including a great number of titles accumulated during nearly twenty years of compilation and covering both book and periodical literature in all the principal languages. The two volumes so far issued form only the author half of the work and the subject index is to constitute a third volume. The "Bibliography of British ornithology" by W. H. Mullens and H. K. Swann, the first parts of which were noticed in last year's summary, has now been completed.

Dean, Bashford. Bibliography of fishes. New York: Amer. Museum of Natural History, 1916-17. v. 1-2. \$11.

Mullens, W. H., and Swann, H. K. Bibliography of British ornithology.

LITERATURE

The "Cambridge history of English literature," which has been in process of publication since 1907, has been completed

by the issue of volumes 13 and 14 which, with volume 12 published in 1916, cover the nineteenth century. For reference purposes, special note should perhaps be made of the chapters on colonial literature—Anglo-Indian, Anglo-Canadian, Australian and South African—which are included in the last volume. A companion work, the "Cambridge history of American literature" edited by William Peterfield Trent, John Erskine, S. P. Sherman and Carl Van Doren, has begun to appear, volume one (Colonial and Revolutionary literature, Early national literature I) having been published in November. The reference value of this new work is very great and the appended bibliographies are especially fine. In many cases special emphasis has been laid upon the record of contributions to periodicals and the bibliographies have therefore an added value as furnishing a key to material not covered, or perhaps incompletely indexed, in Poole.

An older bibliography of dramatic literature which has long been of importance is the Soleinne "Bibliothèque dramatique" (Paris, 1843-45. 5 vols.). This has been hard to use for some purposes because of the lack of an index. An index prepared year ago by Charles Brunet has recently been published. As this is an alphabetic title list with reference to the author's name as well as to the number in the Soleinne catalog, it serves not only as an index but also as an independent reference book for finding "who wrote it." New bibliographies which have a reference value in more limited fields are: "Early American poetry, 1610-1820, a list of works in the New York Public Library," compiled by J. C. Frank, Wise's "Bibliography of the writings of Wordsworth" and his "Bibliography of the Brontë family," and the new edition of Prideaux's "Bibliography of Robert Louis Stevenson," edited by Mrs. Luther H. Livingston. This last brings the original edition to date by adding considerable new material, and corrects some errors but does not change the plan of the work.

The Carnegie Institution has enlarged its list of concordances by publishing a Keats concordance compiled by D. L. Bald-

win and several collaborators. This is based on the H. Buxton Forman editions of 1910 and 1914, and is a complete record of all words used by Keats with the exception of some 59 very common words which are omitted altogether and ten others of which only an incomplete record is made.

Several new anthologies or collections have appeared. Of these the most extensive is the new edition of the "Warner library" which is a partial revision, but not a complete resetting, of the old edition. The main part of the work is reprinted from the old plates with some changes and insertions where the plates could be altered, and with a good many new pages added to each volume to include selections from new authors, additional selections from authors already represented, and new critical essays. The supplementary volumes, *i. e.*, biographical dictionary, synopses, courses of study, are said to have been largely rewritten and entirely reset, but as these volumes are not yet published no judgment can yet be passed on that point. Libraries which have the old edition will not need to purchase all of the new, as the additional selections and new critical essays inserted in the main work are also to be published separately in two supplementary volumes which, together with the biographical dictionary, synopses and courses of study can be purchased separately from the set and used to bring the old edition to date. Among the poetical anthologies of the year may be mentioned "The standard book of Jewish verse" compiled by Joseph Friedlander, and the "Treasury of war poetry, English and American" compiled by G. H. Clarke. This latter, together with J. W. Cunliffe's selection of "Poems of the great war" published last year, forms a convenient compilation of some of the poems written on various aspects of the present war.

HISTORY

The utility of Sherman's "Roman law" for some questions of Roman history and institutions has already been mentioned. An important event for research workers in classical history and literature has been the issue of the last fascicle of the great "Dictionnaire des antiquités grecques et romaines" of Daremberg and Saglio. This completes the work as far as the main alphabet is concerned and allows volume five to be bound, but an index volume, or section, still remains to be published.

Several titles in American and Canadian history are to be noted. A new general index to the thirty-nine volumes of the American statesmen series has been published which supersedes the index to volumes 1-31 published in 1900. This omits the selected bibliography given as an appendix to the older index and adds instead an Epitome of the United States history to 1916 which forms a useful chronological outline. One new volume in the Carnegie institution's archives series has appeared, a "Guide to the materials for American history in Russian archives," by Frank A. Golder. The Carnegie Endowment for International Peace has issued a volume containing three fundamental American documents, the Declaration of Independence, Articles of Confederation and the Constitution, which is more convenient for reading room use than the texts printed in many larger reference books because it contains an index to the Constitution.

"Canada and its makers" edited by Adam Shortt and A. G. Doughty has been com-

pleted by the publication of volume 23, which is a detailed general index to the whole set. A convenient small reference handbook for facts and dates in Canadian history is "Canadian historical dates and events" by F. J. Audet which contains many convenient chronological lists, *e. g.*, lists of governors and other officials, ecclesiastical authorities, dates of discoveries, settlements, etc.

American statesmen series. General index with an epitome of U. S. history. Boston: Houghton, 1917. 455 p.

Shortt, Adam, and Doughty, A. G. Canada and its makers: v. 23, General index, Documentary notes. Toronto, 1917. 368 p. set, 23 v. \$148.50.

EUROPEAN WAR

The development of the war and the needs of the nation have produced many new reference books and pamphlets on war topics, some of passing interest, designed only to meet the needs of the immediate present and others of a more lasting nature. The new military dictionaries and the war anthologies have already been mentioned. The literature of the war is now so prodigious that the most crying library need is for a good bibliography of carefully sifted material to guide in the selection of books and articles from the great mass. Several more comprehensive lists are in process of publication. The English list of Lange and Berry has already been mentioned in previous summaries. Two large French bibliographies should be noted. The municipal library of Lyons is issuing a classified list which indexes a good many periodical articles as well as books and is useful for material in French and other foreign magazines that is not easily findable in other ways. The Leblanc bibliography is interesting but so far of less practical use than the Lyons list, as the first volume deals only with war posters, cards, etc., and books are to be included only in later volumes. "Pros and cons of the great war, a record of foreign opinion" by L. A. Magnus, is a collection of brief extracts and quotations from various foreign writings and speeches, principally German; as references to sources are given the com-

pilation can be made to serve some of the uses of a bibliography.

A very useful reference tool for texts of official documents of the war is "Diplomatic documents relating to the outbreak of the war" edited by James Brown Scott. This includes the various gray, yellow, green and white books, etc., which have already been printed in other forms, but the addition of a subject index makes this compilation more convenient for ready reference than the documents in their original forms.

Two recent compilations of current service information will be useful in every library. The "National service handbook" compiled by Dr. J. J. Coss and published by the Committee on Public Information in its Red, white and blue series, gives information and suggestions about the possibility of service in all branches of both civil and military activity, with an appended bibliography. "The United States at war: organizations and literature," a pamphlet compiled and published by the Library of Congress, gives a useful chronology of events leading to the entry of the United States into the war, another chronology of events after the entry, and a list of American volunteer and auxiliary organizations with statement of their address, officers and activities. References to reports, articles and other printed material are given, so the handbook serves also as a partial bibliography.

United States.—Library of Congress. *The United States at war: organizations and literature.* Washington: Govt. Prtg. Off., 1917. 115 p.

BIBLIOGRAPHY

A useful addition to the by no means crowded class of bibliographies of bibliographies is A. L. Humphreys' "Handbook to county bibliography." This covers the

counties of England, Scotland and Ireland and records for each county bibliographies of material about the county, bibliographies of books printed in the county, general indexes to the various local history and archaeological societies, catalogs of libraries which have special local collections, etc. A special feature is the reference to collections of local books, manuscripts, etc., in both public and private libraries. Many to bibliographies printed in periodicals, transactions, etc., are given and the work as a whole brings together a great deal of information not easily accessible elsewhere.

Several new library catalogs of importance have been issued. The Cambridge "Catalogue of the Bradshaw collection of Irish books" forms an important contribution to the history of Irish literature and printing. It records in separate lists books printed in Dublin by known printers, 1602-1882, books printed in Dublin without printer's name, books printed in the provincial towns, books by Irish authors printed elsewhere, etc. In all nearly 9000 books are recorded, and there is a detailed general index which forms the whole of the third volume. An important American work is the "Catalogue of the Petrarch collection at Cornell University," prepared on the same general plan as Dr. Theodore Koch's well known catalog of the great Dante collection at Cornell. The present catalog not only lists all of the special Fiske collection but includes also references to periodical articles and other Petrarch material included in the general library.

Cambridge University Library. *Catalogue of the Bradshaw collection of Irish books.* Cambridge [Eng.], 1916. 3 v. 42s.

Cornell University Library. *Catalogue of the Petrarch collection bequeathed by Willard Fiske.* London and New York: Oxf. Univ. Press, 1916. 547 p. \$7.50.

Humphreys, Arthur Lee. *Handbook to county bibliography, being a bibliography of bibliographies relating to counties and towns of Great Britain and Ireland.* London: 1917. 501 p. 15s.

THE Paris office of the Red Cross Commission to France announces that a club for American nurses and other Red Cross women workers is being arranged. The plan includes a library, reading rooms, and a meeting hall. A restaurant may be added.

LIBRARY WAR SERVICE

SHIPMENT OF BOOKS TO CAMP LIBRARIES

Some criticism of the book collections in the camp libraries has reached us from the camp librarians, both as regards quantity and quality. But we can assure the librarians that books are on the way to all camps—have been on the way for weeks in some cases, and if they and the librarians at home will be patient yet a little while, the congestion of freight must soon be relieved and the books in large quantities will reach the camps early in the new year. And in no case must solicitation of books be allowed to languish! With a sound organization at headquarters, the books must and will be forwarded, and there must be an ample supply to forward.

In this connection an important matter to bring before the library public to-day is the proper transportation of donated books from libraries or from private individuals to camp libraries or central assembling stations. The method that should be employed does not seem to be well understood.

1. *Books consigned direct to a camp.* If certain definite conditions are complied with, these books will be transported at public expense.

(a) They should be packed securely in wooden cases, weighing not much over 100 pounds each, addressed impersonally to "Commanding Officer (or in case of Naval Stations, The Commandant), Camp _____, (Name of state)." Each box or address label must also be marked "Camp Library."

(b) After the books have been thus prepared notify the local U. S. Quartermaster at the place of shipment. Upon receipt of such notice he will send for the books, furnishing a government bill of lading for them, and forward them to the camp designated. In many towns there is no quartermaster, but some one has been appointed by the government to act as receiver for government shipments. In most cases his identity may be learned from the local enlisting office, or by inquiry at local freight office.

(c) Notice of shipment of books, stating number of cases, date shipped and name of

shipper, should be promptly sent to "Camp Librarian" at the camp to which books have been sent, and also to the A. L. A. War Service, Library of Congress, Washington. It is *extremely* important that the camp librarian be notified, in order that he may arrange to relieve the Camp Quartermaster of the books as soon as they arrive, as the latter does not notify the camp librarian of shipments received.

(d) It will be noticed that the Depot Quartermaster unfamiliar with the procedure may require to see the entire correspondence. Copies of it in circular form may be obtained from the A. L. A. dispatch offices (list of them below), or from the A. L. A. War Service office at the Library of Congress.

2. *Books consigned to a central assembling point.*

(a) Ship by freight notifying the library to which they are consigned.

(b) Send receipted freight bill to A. L. A. War Service, Library of Congress, and amount paid will be duly refunded. This cannot be done if receipted freight bill is not sent, as the Commission on Training Camp Activities, which may be able to make refund, can only pay direct to shipper, and receipted bill is necessary as evidence.

CORRESPONDENCE RE SHIPMENTS

Copy of the correspondence establishing the ruling by which the Depot Quartermasters are authorized to handle shipments of books consigned to camps is here appended.

LETTER HEAD OF WAR DEPARTMENT COMMISSION ON
TRAINING CAMP ACTIVITIES

August 15, 1917.

*The Judge Advocate General,
War Department,
Washington, D. C.*

Dear Sir:

Article 1144 of the U. S. Army regulations reads as follows:

A quartermaster is authorized to transport books and musical instruments purchased for, or donated to, post chapels or to post or company libraries, and gymnastic and athletic appliances purchased with regimental, exchange, or company funds, for the use of troops. Also to furnish transportation at public expense for reading matter donated for use of the enlisted men of the Army, or the United States Disciplinary Barracks at Fort Leavenworth, Kansas, or any branch thereof, such transportation to be furnished from place of donation to the post, hospital, or barracks where intended for use. All such packages will be impersonally addressed and consigned

to the proper commanding officer of troops or hospitals, or the commandant of the barracks. (C. A. R. No. 55.)

This commission is opening up in each of the cantonments and the National Guard Training Camps a well equipped library where books, magazines and newspapers can be had by the soldiers. This work is being developed for us at our request by the American Library Association, under the leadership of Doctor Herbert Putnam, head of the Congressional Library. May I trouble you to tell me whether the above regulation covers the transfer from the terminals convenient for railway companies to the cantonments and camps? Would the use of such service contemplated by this regulation in any way interfere with the right of the American Library Association to control the books after delivery?

Thank you very much for your courtesy.

Very truly yours,
(Signed) RAYMOND B. FOSDICK,
Chairman.

LETTER HEAD OF THE JUDGE ADVOCATE GENERAL

September 18, 1917.

*The Chairman,
Commission on Training Camp Activities,
Washington, D. C.*

My dear Sir:

In reply to your letter of the 15th ultimo in which you state that your commission is opening up thru the American Library Association under the leadership of Doctor Herbert Putnam in each of the cantonments of the National Guard Training Camps a library where books, magazines and papers can be had by the soldiers and request information as to whether paragraph 1144, Army Regulations, 1913, as amended by C. A. R. No. 55, covers the transfer of the books from the terminals convenient for railway companies to the cantonments and camps, and whether the use of such service contemplated by the Army Regulations would in any way interfere with the right of the American Library Association to control the books after delivery, I have the honor to advise you that the existing regulations cover transportation by the Quartermaster's Department at public expense of two kinds of literature, namely: 1. Purchased from certain funds and the other donated for the use of the enlisted men of the Army at the United States Disciplinary Barracks or any branch thereof, provided the books are impersonally addressed and consigned to the Commanding Officer of the troops, hospital or barracks.

Under the latter head and in the broad view that the books, magazines, etc., your commission is causing to be sent to the cantonments and camps are provided for the use and benefit of the soldiers stationed thereat come within the meaning of paragraph 1144, Army Regulations, 1913, I think the regulations would therefore authorize their transfer by the Quartermaster's Department at public

expense from the terminal convenient to the railroad company to said cantonments and camps. Furthermore, as all persons, associations and organizations including property at said cantonments and camps are for certain purposes under the control of the military authorities, I do not think the regulations would, under the circumstances as above stated require the American Library Association to relinquish control over the books during the period they are being used by soldiers, such control to be exercised under the supervision of the military authorities.

Very truly yours,
(Signed) S. T. ANSELL,
Acting Judge Advocate General.

LETTER HEAD OF THE WAR DEPARTMENT COMMISSION ON TRAINING CAMP ACTIVITIES, WASHINGTON

September 22, 1917.

*The Quartermaster General,
War Department,
Washington, D. C.*

My dear Sir:

On September 18 the Judge Advocate General forwarded to me the enclosed interpretation of paragraph 1144, Army Regulations, 1913, as amended by C. A. R. No. 55. I should like information as to what steps are necessary in the shipping of these books.

1. Is it essential that at the railroad terminals the books be given to an Army officer, or will they be accepted by the railroad if simply addressed to the Commanding Officer of the various camps and marked "For Camp Libraries"?

2. These books are accumulating in considerable quantities in various cities such as Boston, New York, Washington, Cleveland, Chicago, St. Louis, Kansas City, etc. Am I correct in assuming that these books can immediately be transferred to the camps and cantonments in the south if addressed as suggested above? Very truly yours,

(Signed) RAYMOND B. FOSDICK,
Chairman.

400,335-T-General.

1st Ind.
O.Q.M.G., September 25, 1917. To Mr. Raymond B. Fosdick, Chairman, Commission on Training Camp Activities, Washington, D. C.

1. Such shipments of books as you may desire to make, in conformity with decision of the Judge Advocate General of the 18th instant, should be delivered to the Depot Quartermaster, or such other quartermaster as may be available in the city from which the shipment is desired to be made. Such quartermaster will take charge of the books and attend to all details of shipping, including issuance of Government bill of lading.

2. It is important that complete copy of this correspondence be furnished to each Quartermaster who may be called upon to make shipment of the books.

By authority of the Quartermaster General.
(Signed) C. M. CURRAN,
Major Q. M., U. S. R.

A. L. A. DISPATCH OFFICES

The present central assembling points (to which others may be added later) are as follows:

- Atlanta—Carnegie Library
- Boston—Public Library
- Chicago—Public Library
- Cleveland—Public Library
- Denver—Public Library
- Kansas City—Public Library
- Los Angeles—Public Library
- New York—Public Library
- Portland (Ore.)—Library Association
- Philadelphia—Free Library
- St. Louis—Public Library
- Washington—Library of Congress

Material sent to them should be addressed

- A. L. A. Dispatch Office,
- Care Public Library,
- (City)
- (State)

Choice between delivery to the above or direct to a camp will depend (1) upon the proximity of the shipping point to an assembling point as against a camp; (2) upon the size of the shipment; and (3) upon the presence at the shipping point of a Depot Quartermaster, or other government representative, who will receive and forward. Where there is no such quartermaster or representative the shipment should always go to an assembling point unless it can be utilized in some nearby camp to which the cost of transportation will be *less than to the assembling point*.

Besides the cantonments, books are being furnished to a number of Naval Training Stations, Marine Corps Camps, Kelly Field Aviation Station at San Antonio, and other similar places such as Fort Oglethorpe, Camp Johnston, the quartermasters' camp being established in Jacksonville, Fla., etc. So far no librarians have been furnished in these places, but they may be provided later.

LIBRARY WAR COUNCIL MEETS

A meeting of the Library War Council was held in the Library of Congress Dec. 8, 1917, at 2:30 p. m. Those present were: Messrs. Coolidge, Stotesbury, Claxton, and Mrs. Horace M. Turner (representing Mrs. Cowles), and Mr. Benedict (representing Mr. Vanderlip). J. I. Wyer and Dr. Herbert Putnam were also present.

On motion of Mr. Coolidge, Mr. Stotesbury took the chair.

The chairman of the War Finance Committee submitted a report as of date showing total contributions of \$1,535,731.06. He also submitted a statement showing the contributions by states to Dec. 7.

Letters were read from Chairman Vanderlip and from Harry A. Wheeler recommending the investment of the balance of the fund not appropriated to the use of the General Director in four per cent. short term treasury certificates which could be redeemed in three months. After a general discussion it was voted, on motion of Mr. Coolidge, that the funds be invested in four per cent. short term treasury certificates.

Chairman Wyer of the War Service Committee asked the Council to continue in an advisory capacity.

On motion it was voted that the War Council thru its chairman forward to the Secretary of War the statements submitted by the chairman of the A. L. A. War Finance Committee and report that the duty of advising and counseling the War Finance Committee of the American Library Association had been completed, but that the council would remain subject to the call of the Secretary of War in an advisory capacity to the War Service Committee.

Dr. Putnam, general director of the camp library work, spoke at length upon the progress of the work.

FRANK P. HILL, *Secretary*.

STATEMENT OF A. L. A. WAR FUND

Portland	9,131.88
Seattle	8,783.86
Philadelphia (partial returns)	11,700.00
Washington, D. C.	10,322.20
Baltimore	9,755.00

FRANK P. HILL,

Chairman, A. L. A. War Finance Committee.

THANKS FROM THE A. L. A. WAR FINANCE COMMITTEE

To Trustees, Librarians and Interested Friends:

The A. L. A. War Finance Committee desires to express thru this journal its most hearty and sincere thanks for the cordial co-operation extended to the committee by everyone who took part in the recent \$1,000,000 campaign to provide books for soldiers and sailors.

The result has been beyond the fondest dream of any member of the committee and is due entirely to the untiring efforts of trustees, librarians and others who worked so hard and so long to achieve the desired result.

The committee will be able to turn over to the association at least \$1,500,000 clear of expenses, and it now remains for the Association to see that this money is so expended that the most satisfactory result will accrue to the soldiers and sailors for whose benefit it was raised.

Most appreciatively yours,

FRANK P. HILL,

Chairman, A. L. A. War Finance Committee.

PERSONNEL

William H. Brett, librarian of the Cleveland Public Library has been appointed a member of the A. L. A. War Service

* Includes \$1.00 a month subscriptions up to Nov. 1st. A slight variation from these figures may be made in final statement by states, since contributions from some cities have been drawn on banks in other states and in all such instances the proper adjustment has not yet been made.

Committee in place of Arthur E. Bostwick, resigned.

The following are additional assignments for service at camp libraries which have been made subsequent to the date of the list in the December LIBRARY JOURNAL:

Most of the other buildings under construction will be furnished and occupied in the course of the next month.

CAMP SHERMAN, CHILLICOTHE

Since the basis of good library service is the staff, Mr. Stevenson has been busy

Camp Devens, Ayer, Mass.
Camp Custer, Battle Creek, Mich.
Camp Lewis, American Lake, Wash.
Great Lakes Naval Training Station

Camp Greene.

Camp Sevier.

Camp McClellan.

Camp Shelby.

Camp Logan.

Camp MacArthur.

Camp Bowie.

Camp Cody.

Henry H. Eddy of Fall River, Mass.

B. L. Smits of Jackson, Mich.

Louis E. Castle of Seattle, Wash.

H. E. Roelke, Assistant Reference Librarian of the John Crerar Library, Chicago, Ill.

R. M. McCurdy, formerly Librarian, General Theological Seminary, New York City.

Alvan W. Clark, formerly with the H. W. Wilson Co., New York City.

George L. Doty, of University of Illinois Library School.

William Blair.

C. R. Bickham.

G. F. Griffin, of the University of Illinois Library School, Urbana, Ill.

W. R. Watsabaugh, Center Point, Iowa.

J. E. Morgan, formerly Superintendent of Guide Rock (Nebraska) Public Schools.

W. McKee, of Carnegie Library, Pittsburgh, Pa.

Ralph A. Beals, formerly Assistant High School Librarian, Rochester, N. Y.

CAMP LEWIS LIBRARY FINISHED

The first camp library to be finished, equipped and in use is that at Camp Lewis, American Lake, Washington. Full service in the library began Nov. 28. The organization by J. T. Jennings, librarian of Seattle, has been completed and the permanent librarian, E. E. Ruby, formerly librarian of Whitman College, has taken charge. He has three assistants. The camp library has a good supply of books, some purchased and many donated, and operating methods have been installed and are in good working order. Nearly all the libraries of the Pacific Northwest have assisted by furnishing books and preparing them for use.

A number of other camp libraries are practically complete and will begin service as soon as shelving, chairs and tables arrive and are installed, or else are operating with temporary makeshift furniture. Among these are the ones at Devens, Dix, Meade, Lee, Sheridan, Pike, Travis, Custer, Sherman, Taylor, Grant, Dodge, Funston and Kearny.

for some time organizing his forces so that two trained men may be on duty at the building at all times. In this he has had the cordial co-operation of all the libraries in the state. The first two men are Carl P. P. Vitz, of the Cleveland Public Library, and Charles G. Matthews, of the Ohio State University Library of Athens. These will be followed by Mr. Thayer, of Cleveland, Mr. Reeder of the Ohio State University Library, and Mr. Brandenburg of Oxford—some of the very best men in library work in the state. The State Library has been co-operating from the first, and for the past two months has furnished a man to drive the library truck and look after the newspaper and magazine distribution. To this man, J. M. Miller, will be given special charge of the branch work, making two trips a day around the eight-mile circuit of the fourteen branches.

For the work of book preparation a similar staff is being built up—two trained workers in charge of the volunteers. At

ERECTING THE BOOKSHELVES IN THE NEW BUILDING

LIBRARY SNAPSHOTS AT CAMP CHILICOTHE

THE LIBRARY TRUCK WITH A LOAD OF BOOKS

present these are Louisa K. Fast, of Tiffin, and Georgetta Haven, of Cincinnati. They will be followed by other trained women from the libraries of the state. The only outlay in connection with these workers is for railway travel and subsistence, and so it is possible to keep well within the limit of \$250 per month set by the A. L. A. for salaries and subsistence. The building at the camp is complete except for some minor details. About eight thousand books are ready for the stacks, and pocketed, carded, and cataloged just as any library books should be, except that, of course, the cataloging is the simplest possible: author and subject cards, with an occasional title card. Most of these books are donations, tho the shipments of the first purchase, made by the A. L. A. are beginning to come in. One interesting feature of the building will be the open fireplace. Realizing how much such a fire would mean to a building like the library, Mr. Stevenson finally succeeded in getting authorization to build one, which has been designed by Mr. Tilton, the architect of the building. It is eight feet wide, with a four foot opening, and will undoubtedly be a veritable magnet in drawing men to the building—the men who want to spend a quiet evening over a good book, before a good fire, with a good pipe. The library is to have an atmosphere of restfulness and quiet, good for tired nerves, so that every man in camp will think of it instinctively, when he grows weary of the rush and racket all about him. Every other recreational building is full of the noise of pianos and talking-machines and boxing-matches and band rehearsals. Here is to be the one quiet place in the camp!

Circulation for "home use" during November was 7739. This was handled entirely from branches in Y. M. C. A. and K. C. buildings and other deposit stations. No attempt was made to record the number of books used in the buildings.

CAMP ZACHARY TAYLOR, LOUISVILLE

At Camp Zachary Taylor, George T. Settle, the Louisville librarian, has been asked to take definite charge as camp librarian, and his library board has allowed

the time from his regular duties to have general supervision at the camp.

The building, as the frontispiece shows, is practically finished. The shelving is up and furniture being placed in the building, but the work is still being done thru the Public Library on account of delay in the delivery of books. The work is increasing daily.

Several committees of ladies have been organized to assist in the work and they are very much interested in it. Mrs. Alice Hegan Rice, who heads one of the committees, wrote to Mr. Settle:

"I want to thank you personally for the prompt response you made to my request for books for the Base Hospital. They were selected with such good judgment that I feel sure you must have gone over them yourself.

"We carried them in baskets from bed to bed letting the men select what they liked and I wish you could have seen the eagerness with which they were received.

"When we left only five books remained on the table, and the two wards presented a picture that would have amused you. Every soldier who was able to sit up was absorbed in his particular volume!"

READING AT CAMP DEVENS

If any one asks if the men in the camps really want to read, and have time to read, let them read some of the incidents recorded by Mr. Lowe, who is stationed at Camp Devens.

The temporary quarters at Camp Devens were located for nearly two months in a mess building formerly used by a motor truck train. It is located on the edge of the camp, nearly two miles from the center, the Post Office Square, where the new A. L. A. library building stands. In spite of this, men tramped down from their barracks to read and select books. This means they want newspapers, magazines and books, for most of the men have hiked about ten miles during the day. No statistics of attendance have been kept. One Sunday morning when the temperature was ten degrees above zero, fifteen men went in to read. Men usually spend the evening when they go, looking over books and talking with the librarians about them.

A few samples of requests from different sorts of men may suggest the demand on books. A stableman in the Field Hospital Train visited the library with some fellow muleteers and discovered a set of Brady's "Photographs of the Civil War." This brought forth streams of enthusiastic discussion. The men had seen sets at home and were eager to point out pictures which had previously particularly interested them.

A private in the Engineers' Corps walked over two miles on a day he had hiked ten miles in the morning and had spent the afternoon in the trenches, because in the morning he had discovered the sign "CAMP LIBRARY, OPEN TO ALL" on the building. He wanted books which would explain the psychology of camouflage. He has been successful with color photography and is something of an artist. He was earnest and eager to know what had been done by others with this art and wished to discover, if possible, why the eye fails to recognize a shadow when light patches have been painted where the shadow would naturally fall, and all such problems. Material was found for him and the satisfaction he received paid for the effort. He has constructed guns, painted them and hidden them so successfully as to deceive the captain of his own company. He believes he can make more of a contribution for success by study and work than by digging roads and planting fence posts.

A graduate of Dartmouth College visited the library and spent some time in talking with one of the assistant librarians. He discovered DeMorgan's "Somehow good" and became filled with enthusiasm and has since come frequently to read only DeMorgan. He is charmed with "a style which reminds me so strongly of Dickens and Thackeray."

Three men came into the library one day out of curiosity, it seemed to the librarian, who offered his services, saying "Mighty glad to see you! Can I find you a book?" "Yes, Longfellow's poems," was the answer, filled with embarrassment. A copy of the poems was found and several books on the war, some attractive non-fiction, and the men went out with "Spell of Italy," "K 1," and Fall's "Manual of military and naval information."

One man wanted some books on personal hygiene. He proffered the information about his development since arriving at camp. He hated to go to camp, now he is "crazy" about it all. He had gained twenty pounds in weight in five weeks. He had always been "mighty proud of his hands" as they were always so immaculate and fair. Now he is proud of the effect of hard work on his hands.

An architect, graduate of a middle western college and of Harvard University, was homesick and the very day he discovered the library he left his job of supervising road construction to see what it could do for him. He asked for Walter Hale's "We discover New England," which was produced. He wanted it for the pencil sketches. In looking over the shelves he found a beautifully illustrated edition of Mark Twain's "Life on the Mississippi" and he almost wept with joy as he pointed out to the librarian all the places he knew in his boyhood. In addition to these two books he took out Ferguson's "History of art" in two large volumes and Maeterlinck's "Treasure of the humble" in the original. He is a constant visitor at the library.

A detail of twenty men from one of the ambulance troops assisted the librarian in moving books. When they returned to their barracks they carried fifty volumes for their social room. One of the men has taken such interest that he visits the library constantly to return books and select new ones for the men. He is a musician with a solo tenor voice of some distinction and has developed both music and reading among his associates. He knows he is doing good missionary work even if he does not call it such, for he says, "Anyhow men stay at the barracks and read evenings instead of going to Lowell and coming back drunk."

One man who loves good reading said: "What I want is a place where I can sit down in peace and quiet with a semblance of civilization, with a book or two and a chance to read and dream. Your alcoves are godsend. The barrack's social room in which 75 to 125 men are talking and playing cards, where a piano and phonograph are rivaling one another, and where at any moment a basketball may knock your

head sideways, is certainly no decent place to read, let alone trying to do any studying."

It must be understood that from 4:30 p. m. until taps at 10 o'clock, the men are all practically free to do as they wish. In this time, soon after supper, come entertainments at the Y. M. C. A., at the K. C. buildings, lectures by officers in the barracks, classes in English for foreigners, and classes in French, English composition, history, and the trades.

At Camp Devens the demand has been ceaseless for war books. Friends have purchased special titles, the Free Public Library Commission of Massachusetts has spent large sums for needed titles, and so an attempt has been made to meet the calls. For military manuals the requests are many and serious. Magazines in French for the men who are studying the language as well as grammars and readers are in constant demand. Current magazines and newspapers have value but such quantities of magazines, even a month or more old, have poured into the camp that they are a drug on the market and have to be sold for old paper at the Post Office, the barracks and Y. M. C. A. One of the most welcome gifts received at Camp Devens was contributed by the Wellesley College Undergraduate Periodical League, of subscriptions to six monthly magazines and six weeklies, twelve copies of each. These are distributed, two in the main library, one at the Y. W. C. A. Hostess House, and the others in the Y. M. C. A. huts in each unit of the camp.

The Massachusetts Free Public Library Commission has sent for the use of the Y. M. C. A. classes in teaching English to foreign-speaking men, copies of Field's "English for new Americans" and Plass' "Civics for Americans in the making." Thruout the state, patriotic citizens have been sending their books to the local public libraries, which have in turn forwarded them to the Boston Public Library. All the libraries of Massachusetts are doing their part earnestly to further the war work of the Commission and the American Library Association. In addition to their contributions to the war fund and to the book collection, scrapbooks have been made

for the hospitals; books have been supplied to the local camps; library halls have been used for relief work; bulletin boards devoted to food conservation, exhibits and subjects relating to the war; collections of military and naval books have been enlarged; libraries have sent military manuals to the soldiers and given each enlisted man a pocket edition of a French-English phrase book. In many libraries a record of enlisted men is being kept and librarians have been granted a leave of absence for service in the camp libraries. The librarians in towns near Ayer have given willing of their time in preparing the books for circulation at Camp Devens and the commission is deeply grateful; also to the members of the Women's City Club who volunteered their services, going by automobile in the coldest weather and traveling 80 miles on a trip.

LETTERS FROM THE CAMPS

We are able to give this month another group of letters from the camps where the librarians have been able to steal for the purpose a few moments' time from their library work—and "work," as one of them writes, "is a good word to use in this connection."

Camp Lee, Petersburg, Va.

The letter from Henry S. Green, librarian at Camp Lee, came just too late to be included in the December issue. No doubt by the time this is published his library will be completed and in good running order. On Nov. 25 he wrote:

"When I reached Camp Lee four weeks ago, the ground for the library had not even been staked out, and I was told that all sorts of difficulties, particularly the scarcity of materials, were in the way of anything like an immediate consideration of a library building. Those difficulties seem to have been surmounted. We have a building now ready for the roof and by the end of this week I expect to see it under roof, and so near completion that I can bestow safely within its walls the large amount of library material already accumulated in camp, and the library equipment which I am told is on the way under a rush order Government shipment.

Meanwhile I have been placing books—those donated from different parts of the country—in the fifteen branch libraries and distributing stations, which I established at the Y. M. C. A.

houses, K. of C. houses, Remount station, Hospital and other strategic points. These branches now have from two hundred to five hundred books each available for circulation. The questionnaire letter recently addressed by me to the Educational Secretaries of the Y. M. C. A. buildings elicited the fact that they are loaning from ten to thirty of these books daily, which makes a very respectable beginning in the way of circulation.

In this work so far I have been greatly assisted by the friendly co-operation of everyone connected with the Y. M. C. A. and K. of C., and have also met with the most cordial reception from Major General Cronkhite and members of his staff to whom I have had occasion to apply for assistance in the work. Thus far my force of assistants has been small and casual. I have been able to secure the services of a very efficient stenographer from the 320th Infantry, Mr. O'Kane, who gives me two hours a day when necessary. I have also had most enthusiastic and helpful assistance from C. W. Hall from the 319th Infantry—in civil life connected with the Duquesne Library at Pittsburgh. I secured the services of a competent young man to operate and care for the Ford runabout, which is to be used as a delivery wagon for books and periodicals. By working the little machine no less than eight hours a day I hope to divert the congested flood of periodical printed matter into the barracks and into the hands of the men. This second-class matter, which comes to Camp Lee by the ton, has had a tendency to get choked up in its course and I find much of it has been lost, or has been held in transit until it has become stale and no longer attractive to the readers here in camp. A good deal of it is not very wisely selected for camp reading matter, yet there is so much that is available in the material that I feel strenuous efforts should be made to handle the matter promptly and facilitate its delivery to the individuals for whose use it is intended.

I am very much interested in Mr. Tolman's proposition at Camp Upton to install one hundred books in each of the 320 barracks; I have considered such an expedient for Camp Lee but upon the advice of soldier friends in the barracks, have hesitated to do anything more than make an experiment or two in that direction. It would be helpful to all camp librarians if Mr. Tolman will give us, thru the *LIBRARY JOURNAL*, the results of his experience, and a hint or two as to his methods in providing and caring for these collections of books in the barracks.

Branch libraries in the fifteen stations established here at Camp Lee are already doing a thriving business even tho we have had no central library from which to operate them. Another week or ten days will put us in a position to render these branches much more

efficient service and to supply them with a better selected and wider range of material.

Invoices of new books purchased by the War Service Committee are arriving and look good. The books included in these invoices will meet certain demands for which donated books were quite inadequate, as might be expected. Some day some of the camp librarians must tell the *LIBRARY JOURNAL* of some of the amazing selections which have been made by the people sending books for this work. However, a very large proportion of the donated books are surprisingly well adapted to the needs of the library here at Camp Lee, and I have no reason to suppose that this condition does not obtain in other camps. This camp library work is a real adventure in library organization and administration, and I have found it a very fascinating adventure thus far.

Camp Upton, New York

Mr. Green's suggestion that the *JOURNAL* print an account of the barracks libraries at Camp Upton, was passed on to Mr. Tolman, the librarian in charge, who replied, Dec. 13, as follows:

Our company libraries are still too new for a detailed report. We delivered to-day a second installment and have now supplied about two-thirds of the barracks with fifty volumes each. We have had no difficulty in administration or installation as yet but have not been able to make a personal investigation of conditions in the barracks.

I do not think there can be any doubt as to the desire of the men and officers for the right kind of books. The demand certainly seems as great and probably greater than in any large city with modern library facilities. We have had men come to us with requests for all kinds of material, military works, educational books, books on the war, technical books and books for French study. A considerable proportion of the men take their new profession (that of arms) seriously and appreciate that much help can be had from books in mastering its difficult aspects. We have had officers come to us for help in the technical aspects of their particular branch of the service and have had them express to us appreciation of the value of good propaganda material in building up the morale of the men.

Our building is nearly completed, and we should be in operation and ready for inspection by the New Year.

Camp Gordon, Georgia

The first news from Camp Gordon came in a letter from Albert R. Nichols, formerly of the Providence Public Library, who wrote on Dec. 15:

I have been here three weeks and the most of my time has been spent in connection with the construction of the building, which is nearly completed. It is located in the very center of the camp, and has a most beautiful park in front of it. There are sleeping quarters for the attendants in the building, and I have already begun sleeping here. I eat with the Y. M. C. A. men at their mess. The co-operation between the different organizations is remarkable.

Deposits of books have been put in the nine Y. M. C. A. buildings, Base Hospital, K. of C. building, five barracks, two Company recreation rooms, and Division Headquarters. The average circulation of 250 books at each of these places, for last week, was 1430 volumes. Purchased books have not as yet arrived. The above are simply gift books. We have also distributed a large number of magazines.

Christmas eve a large tree is to be placed in the building thru the courtesy of the Rotary Club of Atlanta, and decorated by the ladies of Atlanta. A community sing is also to be held here by two of the regiments.

Camp Wheeler, Georgia

"Things are very crude here as yet," writes Frederick Goodell, now librarian at Camp Wheeler, following its organization under direction of Adam Strohm of Detroit:

When Mr. Strohm and myself arrived at Camp Wheeler on Nov. 22 we found the Y. M. C. A. with five huts and one tent in operation and the K. C. building about ready to open. Both organizations received us very cordially. The Y. M. C. A. have turned over to my use the best sleeping room in their administration building and the K. C. has furnished me with a room for receiving and unpacking books. It was my intention at first to use the latter room for a temporary office, but the Southern climate, about which I had read so much in books, soon put an end to that. I found that I could not operate a typewriter wearing gloves!

The A. L. A. library building has been authorized and should be finished in three or four weeks. In the mean time about one thousand books which were sent to this camp thru the efforts of the Library War Service and others are being circulated in the Y. M. C. A. and K. C. buildings. The book collection is worse than poor and I have spent much of my time wandering in and out of warehouses and supply depots in search of books. Beside the seven branches in camp I am supplying reading matter to the headquarters of the Provost Guard, the reading room of the Soldiers Welfare League and the Macon Balloon School, all in the city of Macon six miles distant.

We have a beautiful collection of periodicals

dating back for a period of years and particularly rich in *To-day's*, *Housewife*, *Home Needlework* and the like. There must be twenty tons of it and the soldiers find it very useful in building camp fires.

The camp library Ford which has arrived helps a great deal as Camp Wheeler is very large in area, being really two camps, artillery and infantry, and separated by hills and ravines. The main camp road is over ten miles long. It might be interesting to note that the initials A. L. A. on the Ford have been accepted by the soldiers as standing for Alabama and I am general known about camp as the Alabama Camp Librarian. A letter so addressed was delivered to me promptly.

I shall be very glad to furnish Mr. Goodrich of Camp Greene with my original and secret method of starting a wood fire if he will inform me what to do when the wintry blasts of the Sunny South coming thru the cracks in the wall blow out one's oil heater.

Camp MacArthur, Waco, Texas

Our first news from Camp MacArthur comes in the following summary from Mr. Lewis:

The library at Camp MacArthur has been in existence since the first of October, when the function of distributing books and periodicals in the camp was taken over from the Y. M. C. A. Baylor University loaned the services of her librarian, Willard P. Lewis, to organize the library for the months of October, November and December and he has since spent most of his time at the camp. We can now boast of a temporary building—a four-roomed cottage located in the heart of the camp—secured thru the efforts of an interested Waco citizen. The government furnished lights, telephone, fuel and shelves, and altogether the building has been satisfactory as a temporary arrangement.

During November over 8000 volumes were circulated to the soldiers, using the various Y. M. C. A. buildings and the Knights of Columbus Hall as deposit stations to reach the soldiers directly. Books were also placed in the stockade, Base Hospital, Remount Station and chaplains' tents, of which no circulation record was taken. Over 15,000 numbers of magazines and periodicals were distributed to the men from the above centers of distribution and also the first sergeants' tents, the infirmaries, the guard houses and other places.

On Jan. 1 the regular librarian, J. E. Morgan of Nebraska, will arrive and take charge, and he will bring a young man assistant with him. One of the hardest problems, as at all camps, has been to get help.

The library has thus far been absolutely dependent on the shipments of gift books and is very grateful to the people who have given so many and so willingly. Shipments of gifts

have been received from the following places among others: Chicago; St. Louis; Waco; Green Bay, Wis.; Chetek, Wis.; Grand Rapids; and Waxahachie, Tex.

Of course the largest demand is for fiction but we also have very many requests for war books, for technical books and for language books, especially French. The demand for the latter we cannot fully supply until the stock of purchased books is available.

WAR POSTER EXHIBIT

A traveling exhibit of American war posters has been assembled and prepared to travel thruout the United States by the Newark Public Library, at the request of Kendall Banning, formerly director of the Division of Pictures of the Committee on Public Information at Washington, D. C.

It includes 40 American war posters, varying in size from 26" x 33" to 35" x 45", mounted uniformly. To these have been added 19 posters from other countries to illustrate the modern poster movement, and a group of small American poster work to make the display more nearly complete as an exposition of the work of our artists. To show them all and allow 3 inches of space between posters, 187 running feet of wall space will be required.

A descriptive pamphlet has been prepared, entitled "Posters and American war posters." This pamphlet was published as the contribution of the trustees of the Newark Library, in the hope that it would add to the interest of the exhibit and help to increase the study of American artists in the field of posters.

To cover the cost of preparation, including mounting, labeling, making the traveling case, preparation and printing of list and accompanying pamphlet, a charge of \$10 is made to each exhibitor. In addition each exhibitor is responsible for payment of expressage one way. He receives the posters express collect, and in turn ships them express collect to the next exhibitor. The itinerary is planned for as short hauls as possible. The exhibit may be kept for two weeks. The posters are securely packed in one box, the gross weight not exceeding 150 pounds.

To stimulate interest in the poster exhibit blank slips for voting on the posters have been prepared, points being given for excellence of design, excellence in lettering, and skilful use of color.

REPORT OF AMERICAN LIBRARY ASSOCIATION COMMITTEE ON IMPORTATIONS

In its report at the Louisville conference, this committee announced the termination of the British permit arrangement and the release of books and periodicals of enemy origin held at Rotterdam for American institutions.

To secure similar action for post parcels detained in London was indicated to be the committee's next concern.

The desired action has been taken by the Foreign Office, as appears from a Note dated September 24, 1917, addressed to Ambassador Page by Mr. Balfour, stating that "instructions have now been issued to the competent authorities that all books of enemy origin now detained in this country whatever their nature which have not yet been formally seized and confiscated shall be forwarded to the United States of America provided they are destined for universities or public institutions."

The committee then indicated that it had to mark time till the pending Trading-with-the-Enemy Act was disposed of by Congress.

This act became law Oct. 6, and a Presidential Order six days later prescribed the method of its enforcement. A War Trade Board was set up, and, for commerce, direct or indirect, with the enemy or his allies, a license from this board was declared necessary.

The committee's action thereafter is made clear in the following circular which they sent to twenty-four leading importers, with authorization and request that they communicate its text to their client institutions:

"The British Foreign Office has given instructions to release all publications of enemy origin in detention, so far as they are addressed to universities or public institutions of the United States, and has announced the termination of the permit arrangement. Accordingly, parcels held in London may be expected at any time, but shipments stored at Rotterdam, while now on shipboard there, must await the conclusion of the embargo negotiations with Holland. A solution is declared imminent.

"As to material accumulated in Germany, the committee can have nothing as yet to

say, except that they have no reason to suppose that it is not safe and may not remain so.

"We now turn to the future. Our operations hereafter fall under the control of the Trading-with-the-Enemy Act. Commerce with Germany or its allies is unlawful except under Government license.

"To save the time of all concerned and to avoid confusion, this committee applied to the War Trade Board for a blanket license in behalf of the American Library Association. This has been granted in the following terms:

Universities, colleges and public institutions of approved character or their duly accredited agents, to import, subject to Government censorship and control, and obedient to a procedure to be approved by the Department of State, such publications, especially those of serial character, issued in Germany or in countries allied with Germany, as may with reasonable assurance be considered likely to assist important work of research in science and scholarship without in any way involving the safety of the United States or hindering the successful prosecution of the war—the American Library Association pledging its assistance in keeping the lists within the strictest limits of propriety.

"Responsibility is thus shifted to the Department of State. It is found sympathetic and ready to render a reasonable service. But the responsibility is first upon us. Our first concern is to win the war, and we have no right to divert the Government's energy into unprofitable channels. Let our requests be well within the definition and even postponed if no serious inconvenience is entailed. This means the excision, for example, of the popular, the theological and the historico-political, because the first is unworthy of the time, and the others the favorite avenue of the propagandist. The perils of transportation and the possible detentions of the censor are not to be forgotten.

"First, then, subscriptions to the periodicals of 1918. The Department asks this Committee to assemble for it immediately the lists of desired orders. Will you, therefore, make up for each of the American agents whom you desire to patronize a strictly alphabetical list of the periodicals required, numbering the titles consecutively in the left margin, and mail a copy (naming

the agent who is to fill it) to the Secretary of this committee, within twenty-four hours, if possible, after the receipt of this circular. The list sent the agent constitutes an order made conditional upon its approval by the Department of State and the agent's subsequent demonstration of ability to obtain the goods from Germany. Only then may payment rightly be made.

"With the lists established, a procedure will be worked out with the agents whereby their orders will get the safe-conduct of the diplomatic pouch, and the material be distributed by them after inspection.

"Bear in mind that neither the Department nor the Committee assumes any financial responsibility in the transaction. Your dealings and correspondence are to be with your agents. We merely safeguard and assist.

"Two cautions: (1) We are concerned now with periodical subscriptions only—not exchanges, not monographic series, not books. Of them, anon. (2) Immediate dispatch of your lists to the Secretary of the Committee and to your agents is all-important.

FRANK P. HILL, *Chairman*,
E. H. ANDERSON,
C. W. ANDREWS,
M. LLEWELLYN RANEY, *Secretary*.
A. L. A. Committee on Importations."

When the lists are in, the importers' composite orders of approved titles will be sent abroad by the Department of State and appropriate instructions issued to American consular agents. If Germany allows the material to come out—and that is problematical—it will reach the United States under Government control, and be censored before being turned over to the agents for dispatch to institutions.

With periodical subscriptions out of the way, the Committee will then turn its attention to books, monographic series and exchanges, about which libraries will in due course receive advice.

Thus the American Library Association has received a marked vote of confidence both from the War Trade Board and the Department of State, which have adopted its program without change, acting at once and inviting its aid to carry the scheme thru. M. LLEWELLYN RANEY, *Secretary*.

WORK ACCOMPLISHED BY LOAN COLLECTION OF HIGH SCHOOL LIBRARY SCRAPBOOKS*

At the close of its first year of service the loan collection of high school library scrapbooks has fully justified the time and labor and expense of its preparation a year ago. It has traveled East and West, North and South, everywhere giving a visible demonstration of what we mean by the "twentieth century high school library" with its possibilities as a dynamic force in the work of a modern high school. So great has been the demand for these scrapbooks that we feel the collection should be made more comprehensive and more fully representative of the work of all the leading high schools in different sections of the country.

The collection had its origin in two high school library scrapbooks prepared for the school library exhibit of the American Library Association at its meeting in Washington in 1914. These two scrapbooks, one illustrating the work of the Cleveland high school libraries and the other the work of the Girls' High School in Brooklyn, N. Y., were found to be suggestive and helpful to high school librarians just beginning school library work and eager to know something of the methods in use in other libraries and the scope of their work. These scrapbooks traveled about the country during the years 1914 and 1915 and were in such demand that the question arose, "Why not secure similar scrapbooks from other progressive high school libraries and have a permanent loan collection which shall belong to the American Library Association and be controlled by the school library section?"

In the spring of 1916 the chairman of the school library section of the A. L. A. sent out a circular letter to all the leading high school libraries of the country urging that each library be represented by a scrapbook fully illustrating its work and methods. In order that there might be some uniformity in the scope of these books a plan of contents was suggested as a basis for each book with permission to each high school librarian to add to this material whatever

might make the book of interest to librarians, teachers or principals of high schools.

PLAN OF SCRAPBOOKS

1. *The library room or rooms and equipment*

This to include plan of room and key to plan showing the location of equipment; photographs of main reading room and other library rooms, data showing size of rooms, cost of equipment, etc.

2. *The use of library by the different departments*

Required reading lists, suggestive reading, special topics for library research in connection with each department; vacation reading lists, etc.

3. *General administration of the library*

Library rules, statistics as to contents of library, statistics as to daily attendance for reference work, daily circulation of books, etc. Library budget. Library blanks and forms; charging system illustrated; Changes in classification; reserve system; and anything in the management of the library that would be suggestive to other high school librarians.

4. *Instruction. Training students in the use of books*

Outlines of lessons. Problems. Forms and blanks.

5. *The library as a social center*

Reading clubs, receptions, use by entire classes during a recitation period as a means of arousing interest in an author through illustrated editions, pictures, etc. Bulletin boards.

6. *The library and vocational guidance*

7. *Relations with the public library and use of public library resources*

In response to the request seventeen high school librarians sent scrapbooks to the Asbury Park meeting of the American Library Association. The scrapbooks represented the following high school libraries:

1. Chicago University. University High School.
2. Cleveland Public Library. High School branches.
3. Decatur, Ill. High School.
4. East Orange, New Jersey. High School.
5. Grand Rapids. Central High School.
6. Minneapolis. South High School.
7. New York City. Girls' High School, Brooklyn.
8. New York City. Julia Richman High School.

* Report read before the school libraries section of the A. L. A. at Louisville, June 26, 1917.

- 9. Newark, N. J. Barringer High School.
- 10. Oakland, Cal. Fremont High School.
- 11. Passaic, N. J. High School. (Branch of Public Library)
- 12. Portland, Ore. High School branches of Public Library.
- 13. Spokane. North Central High School.
- 14. Tyrone, Pa. High School.
- 15. White Plains, N. Y. High School.
- 16. Winsted, Conn. The Gilbert School.
- 17. Denver, Colo. North Side High School.

These were on exhibition at the meeting in Asbury Park in 1916 and also formed a part of the high school library exhibit at the meeting of the National Education Association in New York City the following week, July 3-10.

At the Asbury Park meeting many high school librarians asked that the collection be sent to library meetings planned for the fall and at the N. E. A. school superintendents and teachers were anxious to have the collection at state teachers' meetings to arouse interest in a state campaign for better high school libraries.

The exhibit was used at Columbia University all summer at its summer school. It was given a room in the Horace Mann School and hundreds of teachers from the South and West examined the books with interest and made notes on their contents. Professors in the various subjects in Teachers College—English, history, science of education, etc.—urged visiting teachers, principals and school superintendents to visit the collection.

From Teachers College and the summer work at Columbia University the collection went South to the Board of Education and High School Library of Dallas, Texas. From there it was sent to Parkersburg, W. Va., where a new high school building was to be opened and plans were under way for a modern high school library and a trained librarian when the building should open. The librarian who was under appointment found these scrap books of the greatest value in planning for the new high school library.

With the beginning of the school year the itinerary of the exhibit was as follows:

- 1916
October. Keystone Library Association, Wernersville, Pa.

- November. Iowa State Teachers' Association, Des Moines, Ia.
- " Kansas State Teachers' Association, Topeka.
- " Kansas State Normal School, Emporia, Kansas.
- " High School, Sioux City, South Dakota.
- December. Mid-winter meeting of the American Library Association, Chicago.
Exhibited at Chicago Public Library.

- 1917
January. Cincinnati. Hughes High School.
" Norfolk, Va. Maury High School.
- February. Utica Public Library. Utica, N. Y.
- March. March meeting of the school librarians of Michigan, Ypsilanti, Mich. (Part of the collection).
" State conference of high school principals of Massachusetts at Simmons College, Boston.
" Brookline, Mass. Public Library.
- April. Rhode Island State Normal School, Providence.
Exhibited also at Providence Public Library.
" Alabama Association of Teachers of English.
- May. Mississippi State Teachers' Association and State Library Association. (Part of the collection.)
" Meeting of high school librarians of New York and vicinity including Connecticut, Massachusetts and Pennsylvania as well as New Jersey.
" Albany, N. Y. High School. (One scrap book.)
- June. State Teachers' Association of West Virginia. (Part of the collection.)
" High School, Wakefield, Mass.

As a rule the collection has been sent out as a whole and packed in the metal trunk prepared for it by Mr. Utley. Borrowers have paid all charges of transportation and such care has been taken in packing that most of the scrapbooks are in excellent condition for another year of work.

The results accomplished by this collection may be summed up as follows:

- 1. The leaders in educational work in states where the scrap books were exhibited at state educational meetings have had a vision of what a center of influence the right kind of a library may be in a high school.

2. School superintendents, principals, school architects and boards of education have found suggestions for planning and equipping high school library rooms in new buildings in process of building or to be planned in the near future, also for remodelling old high school library rooms.
3. Boards of education and high school principals have received suggestions as to what ought to be demanded of a city in the way of annual appropriations for the maintenance of the high school libraries. In the vast majority of cities no annual appropriation is made for this purpose in the school budget.
4. Teachers of all subjects have found the scrap books suggestive of ways in which they may use their own libraries to better advantage. They have learned what they ought to demand of the school board in the way of library equipment for their own work as they see how other high school libraries are serving teachers of the same subject.
5. Librarians who are just beginning work in a high school library have found the exhibit most helpful in deciding upon library rules, printed blanks and forms, methods of work, etc. They have also been given a vision of the large possibilities in their work aside from the purely technical duties of the librarian.
6. Public libraries and high schools have found suggestions for closer co-operation in the work for high school teachers and students.

This year the exhibit is strengthened by the addition of a scrap-book from the Albany, N. Y., High School, a high school which was among the first to demand a high standard of qualification in the librarian, namely, college graduation and graduation from library school. The library is one of the oldest school libraries in the country and is one of especial interest on account of its large new room and equipment and its large collection of books of reference for all departments.

Scrap-books are promised from the Stadium High School, Tacoma, the High Schools of Los Angeles, the Washington Irving High School, New York, and the Lincoln High School of Seattle. The school

section would be glad of additions to the collection as high school librarians have time to prepare these books. We should like each section of the country well represented so that the exhibit might be sent out in sections, the Far Western libraries kept as one section, those of the Middle West as another, etc., and so serve more educational gatherings than we can serve at present.

MARY E. HALL.

ANTHONY ALCOVE OPENED IN PACKER INSTITUTE LIBRARY

THE opening of the Julia B. Anthony Alcove in the library of Packer Institute, Brooklyn, on Nov. 23, was the culmination of the plan instituted by friends of Miss Anthony, who recognized her influence as a lover of good books, her enthusiasm and her zeal in supplying the needs of teachers and students during her twenty years as librarian, and who took delight in attaching her name to certain shelves, where may be found in future books such as are not ordinarily placed in a reference library.

The idea of the alcove originated in the teachers' club, whose chairman, Marjorie L. Nickerson, made the opening address. The purpose of the special collection of books was stated by Kate Morgan Ward, whose address of presentation expressed in most happy fashion the spirit of the occasion.

A bronze tablet, with inscription and artistic design, was given to mark the alcove, and a bookplate to designate the special collection. Both of these were designed by Katherine S. Vilas of the art department. A beautiful oak table was placed in the alcove, and to accompany the table, a large library chair, which was the gift of the associate alumnae.

Miss Anthony made a brief response to the address of Miss Ward, and at the close of the exercises was the guest of honor at a reception in the library. Besides the faculty of the school, there were present members of the board of trustees, officers of the associate alumnae and other alumnae organizations, former colleagues of Miss Anthony, and officers of the upper classes of the school.

THAT GIRL STUFF

UNDER the arresting title "That girl stuff," *The Bumblebee*, the weekly organ of the Rochester (N. Y.) Ad Club devotes some space to a discussion of current magazine covers.

The writer of the first of these articles, one of the "old reactionaries" who will sing hopefully to the end of Time:

I want a girl just like the girl
Who married dear old Dad.

was struck by the covers of the display of August magazines on a newsstand. The findings which were responsible for his shock, together with his subsequent philosophizing are quoted in full: "Not all the magazines had picture covers; but most of them that had were of the 'girlie' type; eleven of them 'Kellerman nudes' and eight frankly 'fleshy,' to draw it mild—nineteen different types of pornographic pulchritude, and the rest masquerading in men's clothes or in mannish poses.

"If you don't believe it, go and count them yourself.

"So much for magazine covers. Now let's back up and get a perspective and ask a few questions which these pictures suggest.

"Can we see in them a logical development of the feminist doctrines of Miss Anthony, her contemporaries and her followers?

"Has taking girls out of their natural home environment and putting them into direct, promiscuous, personal contact with men, as wage-earning rivals, cost them their old-fashioned charm of reticence?

"Recognizing this, are they falling back upon raw, primitive sex appeal?

"Granting their fiber is stronger, has it also become coarser?

"In short, is 'feminism' the disease, and are suffrage, and the above-mentioned things, symptoms?"

The reply to this is straight from the shoulder: "Are not most magazine covers selected chiefly by and for men?

"If so, does the crude portrayal of the feminine nude or near nude on magazine covers suggest any conclusion detrimental to women other than the continuation of the historic exploitation of women by men?

"And are not these crude pictures—so far from being a result of 'feminism'—actually one of the numerous causes of the woman movement?"

"Old Reactionary" replies:

"I would call your attention to the covers of the *Saturday Evening Post*, that magazine which is most typically a man's magazine, and perhaps the most popular magazine in the world. The human interest in these covers (or between) is not due to the exploitation of the female figure or feature. Men, as a rule, do not prefer the 'Girl Stuff' to the *Post* type of cover. This was what I tried to bring out, and the further fact that the buyers and readers of these salacious monstrosities which are so suggestive, inside and out, are mostly feminine, as are also the worst of the writers of that class."

At this point, baffled by a certain similarity in the discussion to the classic query about the antecedents of the chicken and the egg, "Old Reactionary" escapes into the ever-present suffrage question. But in the issue for Sept. 6, appeared the following:

"Last night while waiting for my train in Syracuse, I looked over and listed all of the magazines displayed on the newsstand. There were fifty-three. Of these twenty-three had 'girl' covers. Of the twenty-three having 'girl' covers, all but eight either were faces only or fully and decorously clothed figures. Of the eight only two in my judgment could be considered at all out of the way."

The list of magazines is then appended and the article closes with the suggestion:

"Under these circumstances would it be constructive for me respectfully to repeat the suggestion that 'B' and others should there be any others 'like-minded'—read a few good books on the subject and find out what 'feminism' really means."

Meanwhile librarians continue to buy magazines in large quantities. By so doing, are we granting the reason for the above discussion, and assuming that these magazine covers are fair samples of their contents, are we merely satisfying our public, or are we, in a measure, aiding and abetting in a deplorable coarsening of its fiber?

W. F. Yust.

MAKING THE MOST OF STORE-FRONT WINDOWS

THE first essential of a good display window is an attractive background. This may be bought from a manufacturer, may be made according to the librarian's directions by a local carpenter, or may be home-made. The following, built by a carpenter, has been found to be a satisfactory and fairly inexpensive background for the store-front windows which are a part of the branch libraries' equipment in Passaic, N. J.

It is in the form of a three-fold screen, made of soft wood covered with brown burlap and finished with a chestnut trim. The central part of the screen is 100 inches long and 42 inches high with hinged sides 23 inches wide. The floor of the window is 43 inches wide and 18 inches above the floor of the room. The screen is placed far enough back from the inside edge of the window floor so that on the room side it forms the back for a window seat where the children sit when the library is crowded. On the room side the screen is covered with burlap 20 inches from the top, giving picture display space, and the rest is paneled with the chestnut. The long part of the screen is secured to the floor by angle irons while the end pieces are left free to swing back and forth. By means of this swinging part, the window is easily reached for trimming or for removing books. In front of the screen there is 28 inches depth for display purposes on a floor covered with burlap and painted brown to allow cleaning with a damp broom. The window displays consist of pictures and posters on the screen with books on allied subjects on the window floor. The window is lighted by means of lamps with reflectors which throw the light from the floor at the front of the window to the top of the screen.

A somewhat similar background was made in the library on a smaller scale. Pulp board was covered with burlap with moulding strips for the trim. For this background, measuring 48 inches by 23 inches with the two end pieces 16 inches wide, the cost of material was about \$5. When completed, the larger

screen cost, including workmanship and materials, \$30. Where no background is obtainable for window displays, a window box filled with greenery and bright flowers makes a cheerful substitute. It is a good idea to use scrim curtains close to the glass so that when the window displays are being changed the curtains can be drawn and bulletins may be hung from the curtain rods.

The three essentials in procuring good window displays are: well lettered posters, striking pictures, and a good advertising sense of selection and arrangement. The study of books on window trimming will help much in the mechanical part of the work. Potted plants and flowers always add to the general effect. Materials and ideas can be gathered almost daily from stores, and it is a good plan to keep these ideas in a note book for future reference. Often manufacturing concerns are glad to send materials for advertising purposes. For instance The Otis Elevator Co. has lent a large model of the Woolworth Building, electrically lighted and showing the elevator running from floor to floor. Maps and mechanical charts, procured from manufacturers, always interest the boys and young men and are of educational value. Striking exhibits will be lent by nearly every store after they have been removed from the windows.

Two typical exhibits which are creating much interest just now in these windows are on Birds and on Military Art and Science. The bird window contains three large charts bought from the Audubon Society. Children constantly examine these charts and try to pick out the birds which they have seen. The military window has striking posters procured from one of the recruiting stations. In this case it took about an hour to remove the former exhibits and put in these two.

The results from window exhibits are easily traced and so of more interest than many advertising schemes. Many new borrowers, especially men, have joined the library because they have seen books of interest to them in the windows. The school exhibits draw many parents to the library as the children advertise them at

home. There is a constant loan of window books, easily obtained from the window by means of the swing ends of the background. A noticeable result has been the increased circulation of pamphlet material and books on useful arts. And above all, the window displays give the public a cordial welcome outside of the library room and thru them a spirit of co-operation is generated between the library and the public.

ALTIE J. SCHOOLEY,
Passaic Public Library.

SUMMARY OF LIBRARY BUILDINGS AS OF
DECEMBER 31, 1917

United States, 44 new appropriations, in- cluding 44 new buildings	\$563,000.00
United States, 19 increases to previous ap- propriations, including 8 new buildings.	157,934.00
Canada, 1 increase to previous appropria- tions, including 1 new building.	15,000.00
Other English-speaking countries, 2 new appropriations, including 2 new build- ings (£=\$5)	28,500.00
	<hr/> \$764,434.00
46 new appropriations, including 46 new buildings;	
20 increases to previous appropriations, in- cluding 9 new buildings;	
Total amount appropriated, including 55 new buildings	\$764,434.00
Library appropriations for 1917 total \$764,434 as compared with \$1,241,888 for 1916.	

Total library appropriations to date of December 31, 1917, made by Mr. Carnegie personally or by Carnegie Corporation of New York:	
2804 public library buildings	\$62,057,919.17
117 college library buildings	3,956,199.27
2921 library buildings	\$66,014,118.44

To the above may be added the sum of \$320,000 voted in 1917 for the erection of a library building at each of the thirty-two cantonments to be provided in the United States for the training of the National Army.

ORGANIZED MUTILATION OF BOOKS

OUR attention has been called to what seems to be deliberate and well-organized vandalism on the part of German sympathizers. In a letter of warning written to the president of one of the important technical schools, a representative of a Cleveland firm, who is also a member of the Cleveland Council of Defense, says:

"The writer was in several of the largest libraries in New York, Philadelphia, Boston, Providence, Cleveland, St. Louis and Chicago within the past six weeks and in looking up a subject in a volume called "Practical electro chemistry" by Bertram Blount, published in London by the Archibald Constable Co., and known as the second edition, I found that the chapter on "Organic electro chemistry" was in all cases cut out of the book or the leaf torn out, with the exception of three cases, where the whole volume was stolen and reported so by the librarian.

"It has recently become known that a great many volumes on "Organic chemistry" and those treating on the dye stuffs have been stolen to such an extent that the books can hardly be obtained.

"You are no doubt aware of the fact that the largest book sellers in this country do not handle a great stock of these works."

Such consistent mutilation of a given book could hardly have been accomplished without a systematic organization, and it is hoped that this note may be of some assistance to such libraries as have this book upon their shelves.

"A LIBRARY can not render good service with a good librarian who is handicapped with an inefficient staff."

Library Organizations

TWIN CITY LIBRARY CLUB

The annual fall dinner of the Twin City Library Club was held in conjunction with the Minnesota Library Association meeting on the evening of Oct. 8 at the St. Paul Association club rooms. The occasion was the twenty-fifth anniversary of the Minnesota Library Association and a special effort was made to have the founders of the association present.

A. D. Keator, of Carleton College, Northfield, president of the association, was toast master. He introduced Dr. W. D. Johnston, of the St. Paul Public Library, who gave a short address of welcome, urging everyone to attend the dedication of the new building.

Dr. M. L. Burton, president of the University of Minnesota, made a strong appeal for whole-hearted patriotism; there is no half way position now.

Mr. Keator read messages from the following who were connected with the founding and early history of the association; Dr. J. K. Hosmer, Dr. W. W. Folwell, Mrs. Margaret Evans Huntington and President C. H. Cooper, of the Mankato Normal.

Gratia Countryman gave the address of the evening entitled, "Whence and whither of Minnesota librarianship." She gave a brief history of the founding of the association and what has been accomplished in the twenty-five years of its existence.

Dr. S. J. Buck, president of the Twin City Library Club, called a short business meeting at which reports were given and the following officers were elected for the year: President, Belle Owens, St. Paul Public Library; vice-president, Ruth Rosholt, Minneapolis Public Library; secretary-treasurer, Amy Cowley, Library Commission.

AMY COWLEY, *Secretary.*

NEW YORK SPECIAL LIBRARIES ASSOCIATION

Two extra sessions of the New York Special Libraries Association were held in September for the purpose of discussing ways and means of raising the necessary 1,000,000 fund for the establishment and maintenance of libraries at the military training camps and cantonments.

Alfred F. Hoffsommer, field director of the American Library Association War Council, the chief speaker at both meetings, outlined a comprehensive plan of action and suggested excellent means of advertising.

At the first regular meeting of the year, held

in the Municipal Reference Library, Oct. 24, Dr. Frank P. Hill, chairman of the war finance committee of the Library War Council, sketched the history of the movement from its inception to the triumphant announcement of a \$250,000 over-subscription at the end of the drive.

Lieutenant-Colonel Athill, of the British army, told of conditions at the front that make this war primarily a war upon the nerves. He spoke of the great need of books among the soldiers, of the mental stimulus derived from them and of the nerve soothing effect that will make this movement a real factor in helping to win the war.

Dr. C. C. Williamson of the Municipal Reference Library, advocated the adoption of a plan that would enable the men who wished more scientific or technical books than those to be had in the camps, to have them sent for temporary use from certain large libraries that would be willing to co-operate with the camp libraries in this way. He also suggested that some means of obtaining professional information thru correspondence should be provided.

Elizabeth V. Dobbins presided. There were present about seventy members and guests.

The present officers of the association are: President, Elizabeth V. Dobbins; vice-president, Sarah B. Ball; secretary-treasurer, Lucie E. Wallace.

LUCIE E. WALLACE, *Secretary.*

NEW YORK LIBRARY CLUB

The November meeting was held in the Stuart Room of the New York Public Library Thursday, Nov. 8, at 8 p. m. Mr. Lydenberg presided and presented George Watson Cole, who read a paper on the Huntington Library.

Mr. Cole first spoke on book collecting today, and said that inasmuch as book collectors, as a rule, do not buy the current books, the responsibility for preserving the best of the current literature rests upon librarians. Some of the old and rare books have passed beyond the reach of the private collector and become part of public collections.

In bringing his library together, Mr. Huntington has had unusual opportunities because of the fact that many splendid collections have come into the market within a few years. The library of E. Dwight Church was the first large addition to the Huntington Library. It contained the finest collection of folios ever brought together, and also the Locker-Lampson Library. The Chew Library, with which Mr. Huntington rounded out his Church collection, contained small but rare copies of the

early English authors. The Halsey Library, another addition, was rich in books by American authors, while its books of French literature were perhaps unrivaled in the country.

Another library purchased by Mr. Huntington was the Benedict Library, rich in the literature of the French and Indian Wars, and in manuscript history of New York. By the addition of the Duke of Devonshire's Library, the Huntington collection became the richest in this country in early English dramatic literature. Mr. Huntington carried away the lion's share from the Hoe Library sale, paying the record price of \$50,000 for the Gutenberg Bible.

Edwin H. Anderson followed with a report on the War Libraries, and on the million dollar campaign.

The next meeting of the Club will be held Jan. 10 at 3 p. m. at the Merchants Association rooms in the Woolworth Building, when Dr. Paul H. Nystrom will speak on the special library and its relation to the general public library.

Announcement was made of the death of Ernest Steiger, an honorary member of the club.

ELEANOR ROPER, *Secretary.*

NEW YORK HIGH SCHOOL LIBRARIANS ASSOCIATION

The regular meeting of the New York High School Librarians Association was held Oct. 10 at Washington Irving High School.

Annie Carroll Moore gave a most interesting talk on the "Patriotism" list recently compiled under her direction for distribution from the New York Public Library.

ELIZABETH B. MCKNIGHT, *Secretary.*

OHIO LIBRARY ASSOCIATION

The twenty-third annual convention of the Ohio Library Association was held in Toledo, Oct. 16-18, with two hundred librarians registered. G. W. Stevens, director of the Toledo Museum of Art, kindly offered the auditorium of the museum for the use of the association, and there the first two sessions were held, the beautiful exhibit rooms being the center of attraction between the sessions. The remaining sessions were held in the auditorium of the new La Salle & Koch Co. building, whose public-spirited proprietors had been to much pains to prepare the room for the occasion, tho the building was unfinished.

The president, Alice S. Tyler, opened the convention with a few words of greeting, and Mr. Hirschberg, of the Toledo Public Library followed with an address of welcome in which he alluded to some interesting points of sim-

ilarity between the circumstances of this meeting and the one last held in Toledo in 1899. The United States was then at war with Spain, and is now in the midst of the great World war; at that time the convention met in the National Union building, on the precise spot where is now the new La Salle & Koch Co. building; the principal paper of the opening day at that convention was by Miss Eastman on "The library spirit," the theme of Mr. Bowker's address. Elizabeth Steele of Lorain gave the response, congratulating Toledo on its unique experience in sending forth from the main library a whole system of branch libraries at once.

The program included several papers of unusual interest, all emphasizing in some way the dominant thought of the times—the call to national service, and the library's part in that service. Miss Tyler, president of O. L. A. gave especial emphasis to this in her opening address, reminding us that national ideals are not simply inherited, but must be evolved. To build on the foundations of our fathers' ideals the larger structure of higher ideals is the task before all educational institutions. In this task the library will find its true part in national service.

Victor S. Yarros of Hull House, Chicago, gave an address of great present interest on the "Spirit and message of the Russian revolution." In answer to questions from the audience, Prof. Yarros said that a system of universal education might be established by 1924, but now Russia lacks teachers. The Duma doubled the number of schools during its existence. An effort is being made to establish universal primary schools under a compulsory law.

"The library spirit, national and international" was the subject of an address by R. R. Bowker, editor of the *LIBRARY JOURNAL*. The speaker defined the library spirit as one of service, with a tendency in modern times to emphasize not the book, but the people. He showed the rapid growth of library service not only in the United States, but in England, France, Scandinavia, Italy and Russia, and its beginning in far-away China and Japan.

"Art and the community" was the subject of an entertaining talk by G. W. Stevens, director of the Toledo Museum of Art, and Carl P. Vitz of Cleveland, made a real contribution to Ohio bibliographical literature in his informing paper on "Ohio books for Ohio libraries." The paper will be put in permanent form by publication later.

"The library and education for spare time" was the title of an address by Allen T. Burns

of the Cleveland Foundation Survey. Mr. Burns took for his text, "Now abideth war, labor and thought, but the greatest of these is thought." He said that the most important event of modern times is the increase of spare time, and after the war he prophesied there will be a working day of four six-hour shifts, and a working week of five days. Training for the use of this leisure is the next big question. The public library has been a pioneer in this field and should be the leader, because it provides reading—the easiest and most useful means of occupying time. Provision for social recreation is made by some libraries and by some schools, and the two should work together.

"War service of American libraries" was the theme of an instructive talk by Mr. Brett of Cleveland, who explained the plans of the committee on camp activities, the situation at Camp Sherman, and the sort of reading in demand there, among the soldiers.

This address was supplemented by Mr. Dice, State library organizer, who read a letter from B. E. Stevenson, telling of the work in Chillicothe, and the circulation of books at the camp from the Y. M. C. A. huts.

The address of Thursday afternoon was given by Annie Carroll Moore, supervisor of work with children, New York Public Library. "Youth and the world of books" was the theme. Miss Moore urged the right of children to be in touch with all the great things of the day. Only in this way will they develop strength as well as beauty of character.

"Recent significant books briefly reviewed" constituted the last numbers on the program. Louise Prouty reviewed the "Letters of Richard Watson Gilder"; Miss Collman read selections from Margaret Sherwood's delightful essays, "Familiar ways"; Mrs. J. S. Harron gave a clever criticism of Dixon Scott's "Men of letters"; and Lucy Keeler reviewed M. Jusserand's late work, "With Americans of past and present days."

The small libraries section presented an interesting program, with Miss Steele of Lorain as leader. Mr. Sohn of Wauseon led a discussion on publicity methods. Miss Long of Van Wert told of a pumpkin contest arranged for the boys and girls of Van Wert at the opening of the children's room in the Brumback library. The library distributed seeds and the pumpkins grown from them were displayed at the county fair. Booklets decorated with pumpkins explained the contest, giving hints to pumpkin planters, and a list of pumpkin stories and of books on

pumpkin-growing. Other features of the fair were library floats, showing library activities. "Campaigning for library funds" was the title of an interesting paper by Miss Miller of Massillon. The campaign was organized methodically, and a friendly rivalry created between the captains of the various districts by offering autographed copies of books by popular authors as prizes. The requests for these books met with a generous response, and the result was a large sum for the book fund of the library. Miss Peterson spoke on the work with schools, and Miss Tyler led a discussion on "How we make our budget and why."

The main topic for consideration in the college section was the place of the library in an educational institution, and the recognition of the library staff as members of the college faculty.

The trustees' section was presided over by Mrs. T. H. Bushnell, a trustee of the East Cleveland Library. Variations in library management and control under the state law were discussed by Mr. Porter of Cincinnati. Miss Keeler of Fremont spoke of "The library and local history," and there was informal discussion of other topics.

Mr. Antrim of Van Wert, chairman of the legislative committee, gave the history of the county library bill which almost became a law.

Laura Smith, chairman of the committee on women's clubs, reported that a number of clubs have contributed to the War library fund; some have furnished books for foreigners, and others have helped in the furnishings of their home libraries. The banner for substantial co-operation between libraries and clubs belongs to Youngstown, where the clubs have helped the library by subscribing \$1000, or one-sixth of the city's quota to the war library fund. They also gave a sum of money for the purpose of having free movies for the Youngstown public.

Frances Cleveland, chairman of the library extension committee gave an interesting account of the district meetings in the several districts of the state.

Mary R. Cochran, chairman of the committee on state institutions libraries, gave a detailed account of the conditions in the twenty-one institutions of Ohio as regards library service. The state penitentiary at Columbus has the largest collection, eight thousand volumes; at the other extreme is the hospital for the insane at Lima, without a book for eight hundred patients. The institution for the feeble-minded at Columbus has the only trained librarian in Ohio institutions. Prac-

tical recommendations were made by the committee for bettering library service for these wards of the state.

Miss E. C. Doren, chairman of the committee on standardization of library service, was detained at Dayton on account of the war library campaign work, but she transmitted for consideration of the association some important recommendations. Two outstanding features are: 1. Standardization of libraries according to income, population served, and lines of work. 2. Standardization of library service as indicated by the personnel of the library staff in respect to educational qualifications, technical training and experience, salary, library hours, vacation privileges, etc.

Marian Comings of the Cleveland Art Museum gave her report on the work of the State Art Club, reminding the association that the plan of loaning collections of pictures is co-operative, and urging all libraries who can, to contribute to these collections.

Mr. Sohn reported for the publicity committee that the work assigned this committee has been largely merged in the campaign for camp libraries.

Mr. Dice, state library organizer, read in detail the report of the work of the department of organization. Seventy-seven libraries had been visited, and fifty-one new libraries organized. Six district meetings were held with a total attendance of two hundred and twenty. Mr. Dice spoke of the need for some solution of the high school library problem. The department is swamped with requests for assistance which they are unable to give. The appropriation for a summer school at Columbus marks a step forward in the library development of Ohio. The initial session was held in the study rooms of the Ohio State University, with thirteen students in attendance.

At the close of the Tuesday evening session, the association spent a pleasant hour in the art rooms of the museum, as the guests of the library board.

A delightful feature of the convention was an afternoon drive thru the city to visit the new branches of the Public Library. Automobiles were furnished for the drive thru the courtesy of the Toledo Commerce Club. The drive ended at the Woman's Building where the Toledo Woman's Association served tea. A most interesting program was given at their club rooms, to which a cordial invitation was extended to O. L. A., but which, coming at the same time with the drive, many were unable to enjoy.

The association voted to appropriate a sum of money for the purchase of a Liberty bond,

to be turned over to the A. L. A. as a part of Ohio's contribution to the million dollar fund for camp libraries.

Resolutions of thanks to all who had contributed to the success of the meetings were unanimously adopted, and the association put itself on record as unswerving in loyal support of the government in this great national crisis, as grateful for the opportunity to serve which is given thru the Library War Council and its activities, as appreciative of the work by which Mr. Brett is expressing most effectively this loyalty, and welcoming the chance of giving further evidence thru the purchase of a Liberty bond.

MARIE T. BROWN, *Secretary.*

BAY PATH LIBRARY CLUB

The autumn meeting of the Bay Path Library Club was held in A. O. H. Hall, Marlboro, Mass., Oct. 18, 1917, with the president, Mrs. Robert K. Shaw, presiding.

Louis P. Howe, chairman of the board of trustees of the Marlboro Public Library, welcomed the club to Marlboro, and a short business session followed.

The president called for an expression of opinion in regard to sending notices and programs to members who are in arrears for their dues, and after some discussion it was voted to continue sending to all, irrespective of financial considerations. It was also suggested that notice of the meetings be sent to all local newspapers in towns represented in the club membership.

The secretary was asked to obtain information concerning the traveling library for which the club is responsible and to report to Miss Chandler. Miss Bell of the Worcester Public Library reported later that the traveling library was complete with the exception of one book which had not been received from the binder.

The "Book review" conducted by Robert K. Shaw, of the Worcester Public Library, was an interesting and instructive feature of the program. One point emphasized by Mr. Shaw was the desirability of the smaller libraries having some representatives of literatures other than our own and in this connection several books by Russian authors were mentioned. Other subjects covered by the reviews were "Food conservation," "European war," and "Children's books."

At the noon hour the ladies of the Baptist church served a most appetizing lunch to which the club did full justice.

Immediately following the lunch, officials of the Curtis, Rice & Hutchins shoe factory con-

ducted the club thru their modern plant where U. S. Army shoes are being made. This was an interesting and to many a novel experience and the courtesy of the manufacturers was greatly appreciated.

The afternoon session opened with the reading of the minutes of the previous meeting, followed by John A. Lowe, agent of the Massachusetts Free Public Library Commission, who spoke on "Camp Library Week." Mr. Lowe gave an outline of what had already been accomplished in the movement to furnish libraries for the soldiers and sailors of the United States both at home and abroad. Contracts for the buildings, furnishings and equipment had been let and it was hoped to have them ready by the first of December. Special emphasis was placed upon the desirability of having local newspapers on file in these camp libraries. A discussion as to the kind of books and magazines which would be useful brought out some amusing anecdotes from Mr. Lowe.

Samples of scrap books for use in the hospitals were shown and some points to be observed in their construction were discussed, after which the last number on the program was taken up. This consisted of interesting accounts by the librarians present of their experiences in helping to raise the million dollar fund for camp libraries. These reports showed that most towns had not only raised their quota but that many had exceeded it, and also that the money had been contributed in small sums, thus showing a wide-spread interest in the movement.

After voting that the secretary send a written acknowledgment to all Marlboro friends who had so generously contributed to the pleasure and profit of the day, the meeting adjourned.

MABEL E. KNOWLTON, *Secretary.*

MISSOURI LIBRARY ASSOCIATION

The eighteenth annual conference of the Missouri Library Association was held in Jefferson City, on Oct. 17-19. The meetings were held in the auditorium on the second floor of the Public Library. The first session was called to order by the president, Ward H. Edwards of William Jewell College, Liberty, at 3 p. m. on Wednesday, the 17th, and was devoted to organization, reports of committees, etc. At its close automobiles were in readiness and members were taken for an enjoyable tour of the city and surrounding hills.

In the evening the mayor of Jefferson City and the president of the Jefferson City library

board made brief addresses, welcoming the association to the city. Paul Blackwelder of St. Louis responded for the association. The members then adjourned to the Executive Mansion, to be guests at a very pleasant and informal reception by Governor and Mrs. Gardner.

The Thursday morning session was devoted to a discussion of "Missouri libraries and the war." Dr. Bostwick, of St. Louis, read a most interesting paper on "Libraries and national service," pointing out that the effort to provide books for soldiers, while most strongly appealing to our interests and enthusiasm, is but one of the ways in which libraries may render national service. It is the duty of the library, at all times, to watch for and preserve all records in any way relating to local activities; and this duty becomes especially great during war times. The necessity for this form of service must not be overlooked in the more popular task of providing books for soldiers.

Albert Diephuis of St. Louis described the work of the Library War Council, and outlined the purpose and plans of the camp libraries. Henry O. Severance of the University of Missouri told his experiences for several weeks in charge of the library service at Camp Funston, Kansas. Reports were made by various librarians on the success of the library war fund campaign in their several localities. Apropos of Dr. Bostwick's paper, Irene Blair of Sedalia described a method which her library is undertaking, of keeping a very full record of all Sedalia and Pettis county men who have entered the service. A card is sent to each man to be filled out and returned. The data includes place and date of birth, marriage, organization and date of enlistment, etc., and will be added to and kept up to date as the war goes on. From a volunteer committee of local residents, three persons are assigned to each soldier or sailor, to write him at regular intervals and keep in touch with his activities. At the close of the war these records will be used as a basis for a book of biographical records of Pettis county men in the war.

Floyd C. Shoemaker, of the State Historical Society, was to have spoken on "Missouri's centennial," but arrived so late that it seemed advisable to postpone his talk until afternoon. The meeting adjourned, and the members were taken for a tour of inspection of the new state capitol.

The Thursday afternoon session began with a program on "Library co-ordination for Missouri" arranged by Elizabeth B. Wales

of the State Library Commission. Mr. Glenn, of the Missouri Council of Defence, spoke briefly on food conservation, and Hon. Cornelius Roach of the Tax Commission outlined the theory of assessments, and told how the practice has arisen of assessing property below its actual value. He described the movement now under way to assess property at its actual value. This, in turn, will materially lower the tax rate of the state, and still leave a larger margin than heretofore for libraries and educational purposes. Miss Wales emphasized the importance of this subject to the librarians of the state, and pointed out that this is an opportune time to urge action for public libraries in those communities which offer ground at all promising.

There followed reports of the work and organization of a number of local library clubs, and a discussion on co-operation among neighboring libraries.

The second part of the afternoon's program was devoted to consideration of a county library law for Missouri. In the absence of Purd B. Wright, of Kansas City, a letter from him was read, stating that the bill introduced in the last session of the General Assembly had failed to come to a vote; and when it is again introduced it is imperative that all Missouri librarians give it energetic support. Mr. Harold L. Wheeler, of the School of Mines and Metallurgy at Rolla, read a paper on "Why a county library law," showing, from personal observation, that the people in rural communities want reading matter, but have no way of getting it. The county system was compared briefly with the local and state commission systems, emphasis being laid on the fact that the proposed law does not require a library in any community, but merely provides an opportunity which is lacking under the present law. In 27 South Central Missouri, or "Ozark" counties, embracing one-fourth the area of the state, more than 90% of the population are in communities of less than 1000 inhabitants, their only hope of library service being in the county system.

Miss Blair of Sedalia, and Miss MacLachlan of Hannibal described their efforts to extend the service of their libraries into the adjacent counties.

Mr. Shoemaker then gave an extremely interesting account of "Missouri's struggle for statehood, 1617-1821," and mentioned a few ways in which libraries could help celebrate the centennial.

The Thursday evening session was devoted to a description by Theodore Wesley Koch of

the Library of Congress of his experiences in London last winter, where he was sent by the Congressional Library to secure, if possible, the release of the thousands of sacks of German periodical mail consigned to American libraries but detained by the British censors. His talk was illustrated by lantern slides. Following Mr. Koch's lecture an informal reception was tendered to the members of the association by the staff of the Jefferson City Public Library.

At the last session, Friday morning, Mr. Koch read a paper on "The problem of commercial and technical libraries in Great Britain." Under the direction of Jesse Cunningham of St. Joseph there was a discussion on "Library publicity," Alice R. Gladden of Carthage telling of "The dear public" and methods of reaching it, Miss MacLachlan of Hannibal outlining her methods of "Extending the usefulness of the public library," and Miss Blair of Sedalia mentioning the advantage of "Advertising the library in the schools."

The following officers were elected for the ensuing year: President, Mary E. Baker, University of Missouri Library, Columbia; first vice-president, Agnes F. Greer, Public Library, Kansas City; second vice-president, Mary L. Reichert, Public Library St. Joseph; secretary, Harold L. Wheeler, School of Mines and Metallurgy, Rolla; treasurer, Irving R. Bundy, State Normal School, Kirksville.

It was unanimously voted to accept the invitation of the Kansas City Public Library to hold the 1918 meeting in Kansas City.

HAROLD L. WHEELER, *Secretary*.

NEBRASKA LIBRARY ASSOCIATION

The State Normal School and the City Library at Kearney were hosts to the Nebraska Library Association at its twenty-third annual meeting Oct. 17-19, with thirty-five librarians and trustees in attendance.

The first session was held Wednesday evening in the new Chapel at the Normal School, President George S. Dick giving the address of welcome and Kate Swartzlander, second vice-president, responding. The address of the evening, "Significance of the world war" by Dr. Fred Morrow Fling of the University of Nebraska, was enjoyed by a large audience. After the address a reception was held in the library rooms.

M. G. Wyer, the president, being engaged in organizing one of the cantonment libraries, Annie C. Kramph, first vice-president, presided Thursday morning. Dr. Fling again delighted his hearers with a most helpful talk

on the "Literature of the war" and all appreciated his suggestions and criticisms. Elva Rulon of the Peru Normal gave an interesting paper on "What the normal school can do for the teacher." The discussion was opened by Miss Jennings and many ideas were exchanged. Prof. Ralph Noyer gave many valuable suggestions on the "Use of library for debating." At the business session which followed, invitations for the 1918 convention were read from Hastings, Plattsmouth, Omaha and Lincoln.

At the afternoon session Miss Swartzlander gave a short talk on "Children's periodicals." Marion Smith, head of the art department, was most helpful and interesting in her discussion of "Art and the public," and Anna Caldwell in her very entertaining manner gave splendid illustrations on "Story telling in the library."

Thursday evening the members were the guests of the City Library at a musicale given in the Commercial Club rooms.

The papers read Friday morning by Prof. Anderson and Dean Wirt on "History books in the grades" and "Health books" were much appreciated, printed lists as well as the books themselves adding to the interest.

The afternoon session was devoted to the ever present topic, the war. Miss Templeton told what had been done thruout the state towards the A. L. A. war fund. Afterwards a roll call was taken, to which each responded by relating what had been done in their libraries for the soldiers. Some were giving instructions in knitting, several had charge of the distribution of yarn, several were keeping muster rolls of the soldiers from their communities, and all were sending books and magazines. Miss Bullock brought greetings from the Legislative Reference Bureau and the State Historical Society Library, and presented the subject of the "Co-ordination and unification of state-supported libraries."

The nominating committee presented the following names for the officers for the ensuing year: President, Annie C. Kramph, North Platte; first vice-president, Elva E. Rulon, Peru; second vice-president, Mrs. Ida Capps, Hastings; secretary-treasurer, Mary McQuaid, Fairbury.

As guests of the Commercial Club, the members then enjoyed a drive about the city.

"Americanizing America" was the subject of Miss Sarka Hrbkova's address Friday evening, after which an informal reception was held at the home of President Dick.

MARY KATHERINE RAY, *Secretary*.

MINNESOTA EDUCATIONAL ASSOCIATION—
DIVISION OF PUBLIC SCHOOL LIBRARIANS

The second annual meeting of the Division of Public School Librarians, Department of Professional Education of Teachers, of the Minnesota Educational Association, was held in Minneapolis, Nov. 1 and 2, 1917. The first of the year's meetings was held in the library of West High school Thursday afternoon, Nov. 1. The meeting was called to order by Martha Wilson, the president, who came back for the occasion from Cleveland, where she is spending a year, with leave of absence.

The first speaker was Mary E. Hall, of the Girls' high school, in Brooklyn, on the "Modern high school library." Miss Hall brought out vividly the difference between the old and the new types of school libraries, and then gave a short history of the N. E. A. library committee and its work. Native Minnesotans were made happy by her statement that Minnesota is the foremost state in the union in respect to requirements for trained school librarians and appropriations, rooms and library instruction of school children. Wisconsin is second, Miss Hall went on to say, and the Far West next. The South is fast awakening to its responsibilities.

Mr. Cray, of the history department of the University of Minnesota, next addressed the meeting on "The library and the teaching of history," and showed that librarians can be of service to history teachers in several ways, as: By teaching students to use the catalog, classification system, index, table of contents and prefaces of books; by substitution of material, if those items are not at hand for which he came; by acquiring new material, as government material; by introducing students to books other than those assigned; by co-operation with history teachers; by having a copy of the *History Teacher's Magazine* in the library; and by being careful not to help students too much—rather teach them how to help themselves.

Hester Pollock, of the Mechanic Arts High School, said that it has never been so easy to teach history as it is now, because of the vast quantity of source material at hand—children can be taught to judge the source. She strongly urged the use of scrap books, in history classes, and also said that nowhere was there a greater opportunity for educating parents, by educating children, than here in Minnesota, with its seventy-five per cent. of foreign population.

Alma Penrose, of West High School, Minneapolis, spoke next on "The importance of library equipment." The necessities as to equipment are adequate space for books,

enough seating capacity for users, and provision for handling books, charging, discharging and carrying around the room. The seating capacity should be one-tenth of the enrollment of the school. There is need of a well equipped loan desk, and a work room. Of prime importance is a noiseless floor covering. All devices pay which reduce wear and tear and noise.

Friday morning, Nov. 2, the following officers were elected: President, Elsie Barquist, South High School, Minneapolis; vice-president, Margaret Mahoney, Longfellow School, St. Paul; secretary, Ruth Tupper, Little Falls, Minn.

The program for the morning began with a symposium by teacher librarians as to "How I introduce my books," and this was followed by Ruth Ely's paper on the "Attractive element in mediocre books."

Miss Mary Hall next talked informally on working up an interest in standard books. First, said Miss Hall, we must get children to be perfectly frank as to what they do and don't like. Second, with these clues as to their tastes, have a reading hour. It is best with beginning pupils—an informal talk over books on the required reading list, which must be long, with plenty to choose from. Third, the outside history reading must and can be made very much more interesting. Clubs, talks, personal work are the most important of all, in guiding the reading of boys and girls.

The committee on instruction made its report, which showed that Mr. Keator had completed his outline for the study of dictionaries and encyclopedias, while Miss Ely contributed a detailed outline of instruction in handbooks of literary allusions. Miss Mahoney had progressed in her grade outline. All teacher librarians were asked by the committee to keep a detailed account of the work they do in instruction. It was voted that the present committee be continued and enlarged from the Minnesota Library Association, with a view to detailed work on a manual to be published.

The meeting adjourned and the following round tables were held:

High school round table, in charge of Margaret Greer, of Central high school, Minneapolis. Normal school round table, presided over by Miss Grant of Winona. The high school librarians discussed the vertical file, the wider education of *teachers* in the use of the library, and pass systems. The normal school librarians talked about privileges and restrictions of faculty members, means of interesting the faculty in the library, and binding.

BESSIE SCRIPTURE, *Secretary*.

KANSAS LIBRARY ASSOCIATION

The attendance at the annual meeting of the Kansas Library Association held at Emporia, Oct. 23-25, was the largest in its seventeen years of activity. On Tuesday the members were the guests of the Kansas State Normal School. The Wednesday morning and afternoon meetings were held at the College of Emporia, and the evening meeting in the High School auditorium. The Thursday meeting was held at the Public Library. Opportunity was thus given to inspect a variety of libraries and methods. The addresses of welcome at the opening session Tuesday afternoon by President Butcher of the Normal School and others considered the librarian in his relation to and as a part of the educational system. A conference on work with children, followed in the Normal Library led by Agnes King, school department librarian. Dr. Herbert G. Lull discussed the problem method of supervised study as practised in the Normal School work. After an inspection of the various departments of the library, dinner was served in the reading room by the domestic science department. At the evening session several musical numbers preceded the address by Dr. Bostwick of St. Louis on "Luck in the library." Finding in luck merely a term to cover a group of unconsidered causes, the speaker urged that we do not dismiss habitual success as merely "lucky" but probe till we find the real causes of it. He also pleaded for less following of beaten paths in library work and a willingness to keep on experimenting.

The meeting Wednesday morning began with a business session for the transaction of the usual routine business. Following this was a very stimulating address by Dr. Bostwick on "Libraries and the war." We must consider it our duty to collect and preserve with care material of an ephemeral nature relating to the war, especially such as reflects the local feelings and activities. Harmonious work is necessary in a community and the library should assist in the work of co-ordination. We must maintain points of contact with the press, industrial life and military activities as well as with the schools. We are still an oligarchy but our ultimate aim is to become a pantocracy, to achieve the rule of all. This must be the aim toward which the library bends its efforts. Ada McCarthy of Madison, Wis., followed with a practical talk on "Wasteful economy" in which she showed how much is lost by frequent purchases of small quantities. Mr. Kerr gave an interesting report of his work

among the soldiers at Camp Funston. The great need for books was emphasized, and the wide variety of tastes to be ministered to was noted. Each person was given one of the familiar merry jingles by Walt Mason, who is a resident of the city. After a program provided by the musical department of the college, the members were shown about the city in automobiles by the Chamber of Commerce. The evening session at the High School was addressed by Hon. Charles F. Scott, president of The College of Emporia, on "Why we are at war."

The session held Thursday morning was devoted to business. Pittsburg was selected as a meeting place for next year. The following officers were elected: President, Julius Lucht of Wichita; vice-presidents, Mildred Berrier of Emporia, Virginia Edwards of Lawrence, Carrie Parks of Hutchinson; secretary, Truman R. Temple of Leavenworth; treasurer, Lulu Price of Hays; member-at-large, Mrs. Theresa Randolph of Pittsburg.

TRUMAN R. TEMPLE, *Secretary*.

MICHIGAN STATE TEACHERS ASSOCIATION
—LIBRARY SECTION

The Library Section of the Michigan State Teachers' Association was held this year in the Ryerson Library building at Grand Rapids, Friday afternoon, Nov. 2. The following is the program of addresses:

"The needs of the country school libraries in Michigan," Maude E. Allen, State Library, Lansing, Mich.

"The high school libraries of the state," J. B. Edmondson, University of Michigan, Ann Arbor.

"School library equipment," C. C. Certain, Cass Technical High School, Detroit.

"Books and bombs," George H. Locke, librarian of the Public Library, Toronto, Canada.

The section voted to appoint a committee to prepare a bill requiring a minimum amount of instruction in library methods in the State University, normal colleges, and all denominational colleges granting certificates to teachers.

Preceding the section meeting a luncheon was held in the Park Congregational Church directly opposite the library, in honor of the officers of the section and those on the program. At this luncheon Dr. Geo. H. Locke, of Toronto, gave a very interesting talk on the effect of the war on education in Canada. This talk made such an impression that one of the newspapers in a double column editorial the next day stated that the United States ought to expend a million dollars in hiring a few men like Mr. Locke to go about the

country to deliver the message he gave to those present at the luncheon. In addition to the librarians and teachers interested in library affairs who were at the luncheon, the city government of Grand Rapids was represented by the mayor of the city, the president of the board of education, the president of the board of library commissioners, the superintendent of schools, etc.

The section elected the following officers for next year: Chairman: C. C. Certain, Cass Technical High School, Detroit; secretary: Anne V. Taggart, superintendent of branch libraries, Grand Rapids Public Library.

THE CHICAGO LIBRARY CLUB

The November meeting of the Chicago Library Club was held at the Chicago Public Library, Thursday, Nov. 8, the president, Rev. John F. Lyons, presiding.

A short business meeting preceded the regular program. The club voted to give \$200 to the Henry E. Legler ambulance fund, the amount to be raised by voluntary subscriptions, and the president was authorized to appoint a committee to have charge of the matter.

Mr. Norman, chairman of the membership committee reported the addition of 52 new members.

The club then adjourned to different rooms to carry out the program of the evening, which consisted of sectional round table meetings. The sections with their respective chairmen were as follows: Cataloging, J. C. M. Hanson of the University of Chicago Library; Reference, E. D. Tweedell of the John Crerar Library; Special libraries, Louise Krause of H. M. Bylesby & Co., Mary B. Day of the Portland Cement Co. presiding; Children's work, Adah Whitcomb of the Chicago Public Library; Junior assistants, J. F. Phelan, Chicago Public Library; and Administration and patrons, Dr. E. D. Burton, librarian, Chicago University Library.

The subject of the section on administration and patrons was "The work of libraries as relating to new situations created by the World War." The discussion included "Provision for the immediate needs of the public," "Provision for needs of future historians of the war," and "Measures necessary for the education of the American people during and after the war."

In the section on junior assistants the qualifications and requirements for junior assistants and their attitude to the public were discussed. There were speakers from each of the large libraries of Chicago.

The subject of the section on children's work was "Fiction and non-fiction books for adolescent boys and girls."

The special libraries' section discussed "Vertical files in business library work." This covered the mechanism of cases, material put in vertical files, methods used in classifying and indexing vertical file material, and subject headings.

The main topic of the section on reference work was "Co-operation between the reference departments of the various libraries of the city." A handbook of the libraries of Chicago, private as well as public, giving the scope of each library and the name of the librarian; and the difference between reference work in a public library and a university library, were among the subjects discussed. The value of the telephone in reference work was suggested, and the chairman told of the list of serials of the mid-west which is in course of preparation.

At the cataloging round-table some of the subjects discussed were "The cataloging of incunabula," "The catalog of the music collection of the Chicago Public Library," "A. L. A. analytical cards" and "Co-operation between the catalog and reference departments."

After the programs the different sections gathered in the rotunda where a social hour and light refreshments were enjoyed.

Many of the members expressed their pleasure and profit in the meeting and a wish that another of the same nature might be held.

JANET M. GREEN, *Secretary*.

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

The first fall meeting of the District of Columbia Library Association and also its annual meeting, was held Friday evening Nov. 2, at the Parish House of the Church of the New Jerusalem. The feature of the evening was an informal dinner, planned and prepared by Ethel Owen, one of the members of the association, assisted by some of the ladies of the church. Between sixty and seventy partook of the dinner, after which a brief business meeting was held at which officers for the ensuing year were elected as follows: President, W. J. Hamilton, assistant librarian, Public Library; first vice-president, Ethel Owen, Superintendent of Documents Office; second vice-president, Katherine H. Wootten, Smithsonian Institution Library; secretary, Alice C. Atwood, Department of Agriculture; treasurer, Anne G. Cross, librarian, Department of Commerce; members of the executive committee, C. C. Houghton, Federal Trade Commission; Dr. M. G. Motter, Hy-

gienic Laboratory; Dr. Theodore Koch, Library of Congress.

Following the business meeting, Mr. Utley, secretary of the American Library Association, spoke on camp libraries, reporting on the amount of subscriptions received and the progress made on buildings.

Mr. Dudgeon, director of camp libraries, gave further details of the work, and of its great expansion, as the needs of the situation became more apparent. Not only have the soldiers and sailors been provided for, but the marine corps, transports, and cruisers, and library service is being extended even to the Canal Zone, the Philippines and the Virgin Islands. The great problem will come, six months hence, when a million or more men shall have arrived "over there"; this necessitates great economy in present projects. If some scheme could be effected whereby gifts of books could be secured, practically from every home in the land, this would release larger sums for the purchase of technical and professional books which are in such demand. Of magazines there is a great plenty, save for current issues, which may be forwarded under a one cent stamp as provided for by the post office department.

Mr. Walter of the New York State Library School, enlarged still further on this theme, saying that if brains, not bayonets, are to win this war, the American Library Association has at last found its great opportunity to take part in a great movement and to a great purpose. He also referred to the change which has been wrought in the Washington atmosphere thru the spirit of indefatigable work and effective co-operation.

At 8:45 p. m. the meeting was adjourned and the consensus of opinion was that it was one of the pleasantest and most profitable meetings that the association had ever held.

Alice C. Atwood, *Secretary*.

RHODE ISLAND LIBRARY ASSOCIATION

The fall meeting of the Rhode Island Library Association was held Nov. 12 in Edge-wood, R. I., at the Church of the Transfiguration, the president, Bertha H. Lyman, presiding. Rev. Levi B. Edwards, chairman of the library committee of the Edgewood Public Library and rector of the church, opened the meeting. Mayor John W. Horton of Cranston, spoke on "The library as a civic asset." To sum it up in one word would be "administration." Mrs. William M. Congdon, library visitor, described the Summer Library School held at the Normal School in July of this year. She stated that there was

an enrollment of thirty-eight, which went beyond their expectations. Another year they hope to hold a similar institute. Mr. Foster, of the Providence Public Library, read a resolution expressing the satisfaction of the association at the beginning of a system of library training, in connection with the State Board of Education, and its earnest hope that this may become a regular annual institution.

Herbert O. Brigham spoke on the War Library Fund, stating that Rhode Island secured a higher per cent of her allotment than any other New England State (85.6%).

In the absence of Howard M. Chapin of the Rhode Island Historical Society, the recorder read his paper. He wishes all the libraries to co-operate with him in collecting letters from the Front, to borrow them and forward them to the Rhode Island Historical Society where extracts will be made from them, and returned. These letters are treated confidentially and only matters not of a private nature will be copied. People should know that it is their duty to preserve every bit of correspondence for the education of future generations.

Marion J. Emsley, chairman of the "library helps" committee, gave a very helpful talk for the small library on reference material. She explained how one could procure free material at any time, or information as to book selection, by application to Mrs. William M. Congdon; also that the services of a trained librarian may be had without cost to assist in matters of organization, cataloging, or in solving any library problems.

Helen M. Claffin, librarian of the Attleboro (Mass.) Public Library, spoke upon "Library advertising." She brought out the different ways to reach the community and the good results derived from it.

After luncheon, those wishing to do so took a short automobile ride to the Park Museum to see the Carpenter collection of minerals.

Rev. Asbury E. Krom, the first speaker of the afternoon, took for his topic, "The need for reading in war time." He spoke of "The pan-German plot unmasked" as an especially fine book which told what Germany is trying to do. He emphasized the need and moral responsibility for all people, and especially for librarians to read in order to understand the fundamental issues at stake in the war, so that as a people we shall have a united purpose to carry thru the war to a peace that shall be permanent.

Edith R. Blanchard of the John Hay Library gave a review of books to read in war time.

This was followed by an interesting talk, "How to get the books across," by E. Kathleen Jones, of McLean Hospital, Waverly, Massachusetts. She emphasized the fact that books, magazines and papers were greatly needed.

AMEY C. WILBUR, *Recorder.*

Library Schools

CARNEGIE LIBRARY SCHOOL

Mrs. Gudrun Thorne-Thomsen of Chicago, gave a course of ten lectures on "Story telling" Nov. 19-23.

The school closed for Christmas recess Dec. 17 and will reopen Jan. 2, 1918.

SARAH C. N. BOGLE, *Principal.*

LIBRARY SCHOOL OF THE UNIVERSITY OF WISCONSIN

Mrs. Thorne-Thomsen opened the course in children's work, and it will be continued by Mrs. Catherine Head Coleman, a graduate both of the University and of the Library School, who has also taken the course in the Cleveland Public Library and served as children's librarian in one of the Cleveland branches.

During the month special lectures were given by Dr. M. M. Quaife, Prof. F. L. Paxson, Prof. F. H. MacGregor, and Prof. C. R. Fish. The class also attended many lectures in the war course offered by the University, especially those given by Dr. Gunsaulus, Dr. Hillis, and Major Stanley Washburn of the Russian Commission. An exhibit of war posters in the Historical Museum was of an unusual interest to the Library School.

The Christmas vacation began at noon on Thursday, Dec. 20, and work will be resumed on Jan. 3, several days in advance of other departments of the University.

The class organized early in December, electing the following officers: President, Miriam E. Smith, Des Moines, Iowa; vice-president, Margaret A. Wade, Lafayette, Ind.; secretary, Jean M. Sharpe, Saginaw, Mich.; treasurer, Edla M. Laurson, Mitchell, S. Dak.

MARY EMOGENE HAZELTINE, *Preceptor.*

NEW YORK STATE LIBRARY SCHOOL

The school "service flag" now has twelve stars. The classes and students represented are as follows: 1894, Lt. Willis F. Sewall, Adjutant General's office; 1901, Capt. Drew B. Hall, Quartermaster Corps; 1904, Ethel B. Ketcham, Canteen Service, American Red Cross in France; Lt. Harold L. Leupp, and Lt. Edmund L. Pearson; 1910, Lt. Carlton B.

Joeckel; 1912, Paul N. Rice, private, Quartermaster Corps; 1915, Capt. Donald B. Gilchrist, Field Artillery; 1916, Earl H. Davis, private, Engineers Medical Corps, American Expeditionary Forces in France; and William Webb, Friends Reconstruction Unit, American Red Cross, Ornans, France; 1918, Corporal Herman O. Parkinson, Ambulance Corps; Malcolm O. Young, private, Camp Devens, Ayer, Mass.

Mr. Walter S. Biscoe has presented to the school, the collection of twelve brochures on the work of prominent American bookplate artists, issued by Goodspeed in a very limited edition a few years ago.

Cards have been received announcing the marriage of the following former students:

Arthur R. Blessing, B.L.S. 1917, to Marion L. Peckham, of Albany, N. Y., on Nov. 17. Mr. Blessing is reference librarian in the District of Columbia Public Library, Washington.

Arne Kildal, B.L.S. 1907, librarian of Bergens Offentlige Bibliothek, Norway, to Mrs. Helga Gjerlöv in August last.

Lulu A. Stronge, 1909-10, to Harry Tarbett of Pittsburgh, Pa., on Monday, Nov. 19.

F. K. WALTER.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

The advanced courses for December were devoted to advanced cataloging and to school library work. The former consisted of sixteen lectures by Henrietta Bartlett, the last of which was an illustrated talk on incunabula. In the school library course Mary E. Hall gave a series of six lectures on high school libraries, supplemented by discussions of other types of school libraries by Miss Newberry. Dr. Arthur E. Bostwick addressed the entire school on Nov. 26 upon the topic, "Libraries and national service," this being in connection with his visit to New York to address the New York Public Library Staff Association.

To help fill the vacancies on the staff of the New York Public Library occasioned by the numerous opportunities for war work it has been determined to start a new class in the Training Course early in 1918. As originally outlined the work of the Training Course proper covers an eight-month period. The emergency plan is to throw the new group with the class which began last fall for those lectures which remain of the regular course, and to repeat the instruction which has been offered since September. It is hoped that recruits will be found among the mid-year high school graduates.

The school is represented by former students in war time activities as follows:

Francis J. Dolezal, 1913-15, 106th Infantry, National Guard.
 Frederick Goodell, 1913-14, assisting in the library at Camp Wheeler.
 Ralph Gossage, 1914-15, with U. S. A. C. C. 557, Allentown, Pennsylvania.
 Perrie Jones, 1915-16, with Young Women's Christian Association, Paris.
 Mabel Howe, 1916-17, at A. L. A. Assorting Station, New York Public Library.
 Karl H. Koopman, 1916-17, with 8th Coast Defense Command.
 Elizabeth Stewart, 1916-17, in canteen work in France.
 ERNEST J. REECE, *Principal*.

LIBRARY SCHOOL OF THE LOS ANGELES PUBLIC LIBRARY

The first of the one-week periods of practical work, of which there are to be three during the school year, was finished on Dec. 1, and was followed by class discussion of the special problems encountered. Results of the week's experience were shown in an added interest in class work and a clearer comprehension of lectures. It is hoped that the concentration of practical work into full week periods instead of a few hours weekly will give students a better grasp of the work assigned and will eliminate waste in making the adjustments necessary with each short period.

Class elections were held the first week in December, resulting in the following officers for the class of 1918: President, Frank Hout (Corvallis, Ore.); vice-president, Geraldine Shipley (Long Beach, Calif.); secretary-treasurer, Florence Elsey (Palo Alto, Calif.).

THEODORA R. BREWITT, *Principal*.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

As a preliminary to practice work in the Brooklyn Public Library, Dr. Hill gave a talk on the history and organization of the Brooklyn Public Library. Other lecturers were Sarah B. Askew, who spoke on commission work in general and on the work that the New Jersey Commission is doing for the soldiers; Anna C. Tyler, who lectured on story-telling; and R. R. Bowker who, as he said, "covered forty years of library work in forty winks."

Ruth Hoyt of the present class, who was seriously injured by a fall from the stairs at Pratt Institute, is recovering in a way that is almost miraculous. After four days of unconsciousness she began to improve, and in a little over two weeks was able to leave the hospital. Miss Hoyt will not return to the school until next fall.

Notices of the following marriages have been received:

Gladys M. Dixon, 1912, to Major Richard

U. Nicholas, Corps of Engineers, U. S. A., Nov. 24.

Sarah P. Caldwell, 1913, to Dr. W. W. S. Butler, Jr., Dec. 5.

Ruth W. Dickinson, 1917, to Ernest J. Pfirman, Dec. 4.

Anne Page, 1917, to Claude E. Metzler, Dec. 1.

JOSEPHINE ADAMS RATHBONE, *Vice-Director*.

WESTERN RESERVE LIBRARY SCHOOL

During the past month, there have been a number of visiting lecturers. Dr. Charles J. Woodberry, who spent some of his youthful days in close association with Ralph Waldo Emerson, spoke to the students on Emerson's personal traits. Frederick Melcher of Indianapolis spoke on the inviting field of book-selling for women and the relation of the bookseller and the librarian. First hand information regarding a county library survey was given by Ernest I. Antrim of Van Wert, who also gave an address on "The new day" which will follow the World war. J. I. Wyer, Jr., stopped en route to Camp Sherman to talk informally regarding the work of the A. L. A. War Service Committee.

The Library School students and faculty doubled their quota of the Student Friendship fund of Y. M. C. A., contributing an average of about \$10 each.

The School catalog for the year 1917-18 has just been issued. The chief deviation from former catalogs is the arrangement of the graduate list by class instead of alphabetically.

Cards have been received announcing the marriage of Clara L. Angell, 1915, to Clarence M. Taylor of Cleveland.

ALICE S. TYLER, *Director*.

CALIFORNIA STATE LIBRARY SCHOOL

Joseph H. Quire, legislative reference librarian, and instructor in public speaking, is now in charge of the Camp Kearny Library at Linda Vista. His work with the Library School has been taken over by Miss Mumm. Arrangements have been made with Jean Ross, librarian of the Sacramento High School Library, whereby each student may spend the afternoons of one week of the second term in actual practice work in that library, following the course of lectures on high school library work to be given by Miss Ross.

The Circular of the California State Library School for 1918-1919 has been issued, and may be obtained from the State Librarian, California State Library, Sacramento, Calif.

MILTON J. FERGUSON.

BOSTON UNIVERSITY—LIBRARY COURSE

Lecturers during the past month include: Ethel M. Johnson, librarian of the Women's Educational and Industrial Union, Boston, who spoke on "The literature of women in industry"; Howard B. Meek, newly appointed chief clerk of the West India Oil Company, Port-au-Spain, Trinidad, B. W. I., who took as his subject "Popularizing the library"; Guy E. Marion, librarian of the Pilgrim Publicity Association on "The special library field"; and Herbert O. Brigham, state librarian of Rhode Island, who talked on "Government documents—their importance and use."

RALPH L. POWER.

ALUMNAE ASSOCIATION OF THE LOS ANGELES LIBRARY SCHOOL

On June 4, at the time of the California State Library Convention at Hollywood, a meeting was held of the graduates of the Los Angeles Public Library Training School in order to form an alumnae association and elect officers. The election resulted as follows: President, S. M. Jacobus, librarian of the Pomona Public Library; vice-president, Mabel W. Cory, librarian of the San Pedro High School Library; secretary, Elizabeth Connor, librarian at the Mount Wilson Solar Observatory, Pasadena; treasurer, Alma Scheuble, Los Angeles Public Library.

The activities of the association for the present year began on the 9th of October, when an informal reception was held in the Museum Building at Exposition Park, Los Angeles, with a special view of the fall exhibition of the California Art Club. The members of the class of 1918, who had entered the school only the week before, were guests of honor. An appreciative and delightful talk by Alma Cook, lecturer for the California Art Club, added greatly to the pleasure of the occasion, which brought together some sixty graduates.

ELIZABETH CONNOR, *Secretary*.

DREXEL INSTITUTE LIBRARY SCHOOL
ALUMNAE ASSOCIATION

The Drexel association was one of the first to buy a Liberty Bond, getting a bond for \$100 on June 13.

On account of the many patriotic activities of the members of the association the executive committee voted to discontinue the monthly luncheons for the duration of the war.

The annual business meeting and dinner was held at the College Club on Nov. 22.

KATHERINE M. TRIMBLE, *Secretary*.

Librarians

ANDERSON, Anna, resigned her position as children's librarian in the Public Library of Clinton, Iowa, Dec. 1, to go to the Public Library in Seattle.

ANDERSON, Edna, Library School of the Los Angeles Public Library 1915, has resigned her position in the branches department of the Los Angeles Public Library to take a position in the Long Beach (Calif.) Public Library.

BOSTWICK, Andrew Linn, formerly librarian of the Municipal Reference branch, St. Louis Public Library, and more recently secretary of the City Planning Commission in that city, is employed in the Statistics Division of the Council of National Defense, Washington.

BRUNOT, Eugenia, Carnegie 1914, has been appointed children's librarian of the Carnegie Free Library, Braddock, Pa.

BULLOCK, Edna D., B.L.S., New York State Library School 1895, is serving temporarily as indexer and cataloger in the office of the American Red Cross at Washington, D. C.

COFFIN, Jennie, librarian of the Olivia Raney Library in Raleigh, N. C., since its organization in 1901, died Aug. 18, 1917. Miss Coffin was one of the pioneer librarians of North Carolina, and the library progress made in the state has been due in no small measure to her unremitting efforts.

CUMMINGS, Thomas H., ex-curator of the Boston Public Library, has been appointed librarian of the Cambridge Public Library to succeed Matthew R. Copithorne. Mr. Cummings is well known as a lecturer and writer. He founded and was the first editor of the *American Journal of Photography*. He is a graduate of the Boston Latin School, University of Maryland, and studied at the School of Philosophy at Issy, near Paris. He also attended the Sorbonne and the University of Freiburg.

DAHL, Marion, has resigned her position as librarian of Two Harbors, Minn., to accept the librarianship of the Public Library of Boise, Idaho.

DUPREY, Addie (Syracuse University Library School), has been appointed cataloger in the U. S. Naval War College, Newport, R. I.

EAMES, Helen Georgia, Carnegie 1908, was married in November, 1917, to Carl Livesey Viets.

ENDICOTT, Edith, Carnegie 1914, is engaged in emergency war work in the War Department, Washington.

EVANS, Lawrence Boyd, of Medford, Massachusetts, has been appointed state librarian to succeed Foster W. Stearns, who resigned and is now serving with the army. Mr. Evans was identified with the work of the Constitutional Convention during its recent session, having been a member of the commission to compile information for the convention, and also serving as technical adviser to the convention committees. A native of Radnor, O., Mr. Evans graduated from the University of Michigan and received the degree of doctor of philosophy from the University of Chicago. For about 12 years he was professor of history at Tufts College, and is a member of the Massachusetts bar. He received his legal training at the Harvard Law School and is considered an international authority on constitutional government.

FITCHET, Mrs. Helen Gates, New York State Library School 1913-14, is filling a temporary appointment as cataloger at the Massachusetts Agricultural College Library, Amherst.

FURST, Mrs. Elizabeth Hardman, New York State Library School 1907-08, joined the staff of the Cleveland Public Library in November as librarian of the Superior branch.

GREER, Sarah, Pratt 1914, of the catalog department of the New York Public Library, has accepted a confidential position in one of the Federal offices in New York City.

HALLSTED, Sarah, B.L.S. New York State Library School 1915, resigned as cataloger at the Lincoln Library, Springfield, Ill., to become first assistant in the Library of the National Bank of Commerce, New York City.

HATHAWAY, Mary Anne, Simmons 1912, has resigned her position in the Milwaukee Public Library to accept the position of cataloger on the library staff of the Portland Cement Association, Chicago.

JOHNSON, Mary Wood, Pratt 1911, formerly first assistant in the catalog department of the Public Library at Portland, Ore., has been made head cataloger of the Public Library at Indianapolis.

MCCURDY, Robert M., B.L.S. New York State Library School 1903, is serving as assistant librarian at the Camp Greene Library, Charlotte, N. C.

MALTBIE, Mrs. Adelaide B., Pratt 1900, who

has been for some years past branch librarian at Tompkins Square, New York, has been made librarian-in-charge of the St. George, Staten Island, branch and of the traveling libraries department on Staten Island.

MAYNARD, Mrs. Katharine, Library School of the New York Public Library 1915, has been appointed assistant librarian of the National Industrial Conference Board, Boston.

MORSE, Marion S., Pratt 1901, has been appointed librarian of the Packer Institute Library in Brooklyn and began work Dec. 1.

RANSON, Helen M., Western Reserve 1915, has been appointed assistant in the Miami University Library, Oxford, O.

RIGGS, Alice W., New York State Library School 1902-03, resigned as first assistant in the East Cleveland, Ohio, Public Library to take charge of the catalog department of the Toledo Public Library.

STEBBINS, Mary F., Pratt 1912, who has been supervisor of school work in the Utica Public Library, has been appointed to the librarianship of the Utica Academy.

WALKER, Elizabeth, Library School of the Los Angeles Public Library 1916, has resigned her position in the Long Beach (Calif.) Public Library to accept a position as assistant in the North-East branch of the Los Angeles Public Library.

WIGGIN, Mary P., New York State Library School 1917, has gone to Delhi, N. Y., to organize the Cannon Free Library.

WHITE, H. Linwood, former librarian of the Massachusetts Board of Agriculture, is now librarian of the Federal Land Bank of Springfield, Mass.

WHITNEY, Solon F., who had been librarian of the Watertown (Mass.) Public Library since its inception in 1869, died Nov. 29 at his home in that city. He was born in Harvard, Aug. 22, 1831, and his early education was obtained in that town. When quite young, his parents moved West where they remained for some years. After returning East, the young man fitted for college at Lancaster Academy. He then entered Brown University and graduated in 1859. He went to Watertown in 1865, and had resided there ever since. With the late Dr. Hosmer, he started the agitation and collected the money to establish the public library. When the institution became a reality in 1869, he was named librarian. He leaves two daughters, Mrs. L. B. Tarlton and Mrs. Margaret Horne, both of Watertown.

THE LIBRARY WORLD

New England

MAINE

Portland P. L. Alice C. Furbish, lbn. (Rpt.—1916.) Accessions 2288; volumes withdrawn 288; total 74,480. Cards issued 3762; total registration 9094. Circulation 94,743. Income \$13,370.11; expenditures \$12,579.15, including \$7409.23 for salaries, \$1333.31 for books, \$561.20 for periodicals, and \$462.90 for binding.

MASSACHUSETTS

Boston. The plan of the trustees of the Boston Public Library to establish a downtown branch in the heart of the business section has been endorsed by the executive committee of the Chamber of Commerce, but the committee has taken no position on the question of the site for the proposed branch.

Granby. The dedication of the Granby Free Public Library took place in the library Nov. 23. The congested conditions of the old quarters led to a move at the annual town meeting in 1916 for more adequate accommodations. Communications with the Carnegie Corporation of New York city led to a contribution for a new building. A plot of ground bequeathed to the town by the late Dexter Taylor was chosen for a library site. The lot is situated at the south end of the Parish Common and contains about one acre of land. The building is of colonial design to correspond to the church, and is one story in height, facing the north. A basement contains the assembly room. The stack has an estimated capacity of shelf room for 13,000 volumes. Numerous gifts and bequests have been made to the library. The furnishing of the assembly room is being provided by the Granby Woman's Club.

Lynn. Thru the will of the late Joseph Faulkner the Lynn Public Library has recently received \$2000 as a fund for the purchase of books.

Springfield. In the art room of the City Library an exhibition of work done in the printing offices of the city was on view during November, being one of a series of exhibits designed to show the city's progress in arts and crafts.

Westfield. Plans for a new library building for Westfield, provided for in the will of the late M. N. Whitney, were discussed at a recent meeting of the library committee and

the matter of erecting the building will be taken up soon.

CONNECTICUT

New Haven. The Carnegie branch library in Fair Haven was dedicated Dec. 7. The new building, situated at the corner of Grand avenue and Ferry street, is of colonial design costing \$25,000, of which the Carnegie Corporation contributed \$20,000 and the city the balance. The architect of the building was Leoni W. Robinson.

Suffield. A fund of \$25,000, which was left the Kent Memorial Library of Suffield by the late Martin J. Sheldon as a memorial to his brother, Henry Spencer Sheldon, who died while a student at Yale College, was placed in the hands of the trustees of the library recently. By the terms of the gift the library will receive one-half the income of the fund each year, the other half going to an accumulative fund for a period of years, after which the entire income will be available for the work of the library.

Middle Atlantic

NEW YORK

Binghamton. A branch of the Public Library was opened to the public on Saturday evening, Nov. 24, in the Abraham Lincoln School on Vestal avenue, at the corner of New street. The collection of books which has been located in Stoddard's shoe store on De Russey street, and later in Merrihew's grocery on Vestal avenue, has been moved into the school building. The Mother's Club of the school will have the branch library under their auspices.

Brooklyn. Pratt Inst. F. L. Edward F. Stevens, lbn. (Rpt.—yr. ending June 30, 1917.) Volumes added 6694; withdrawn 4163; total 114,775. Circulation 216,944. New registration 4453; total 58,468. Expenditures included \$6232.71 for books, \$973.13 for periodicals, \$1391.61 for binding, and \$26,740 for salaries. The report gives many interesting and suggestive details of work in the Pratt Library under the records of individual departments.

Kenmore. December 3 saw the transfer of the library to the Kenmore Library Association by the Civic Association, which body has conducted the library for the past two years. The transfer provides that in the event of the Library Association's failing to maintain the

institution properly, it will revert to the Civic Association. The library opened on Dec. 4.

New York City. In his 1916-17 report, Frederick W. Jenkins states that the Russell Sage Foundation Library since the outbreak of the war has gathered, so far as possible, all material relating to social problems of the war, especially Red Cross work, family care and the re-education and rehabilitation of disabled soldiers and sailors, including reports showing the results of European experience. This material, much of it in duplicate, has been constantly and widely used, having been loaned on several occasions to other libraries. The circulation for the twelve months was 10,524 volumes, compared with 8958 volumes for the previous year, and 6911 for the year 1914-15. It is in reference use of the library however, that the increase was most gratifying. During the year the total number of those coming to the library for information was 18,378, compared with 16,170 for the year ending Sept. 30, 1916, and 14,033 for the year ending Sept. 30, 1915. The average number of readers per month for the past year was 1532, compared with 300 six years ago, or a gain of 400 per cent. in that time. The library now contains 15,695 bound volumes, 32,935 unbound and approximately 3000 clippings. During the past year 857 bound volumes were added, and about 25,000 reports and serial publications. Allowing for duplicates, discards and exchanges, 7732 such serial publications were added to the permanent collection. The library has perhaps the most complete files of serial publications relating to social work in existence, but until a catalog of these resources is printed many who would use such material are unaware of its existence. The request has come frequently, however, for a list of these serials, showing what reports of institutions, federal, state and municipal, are available, together with the publications of organizations, conference proceedings and the like. Such a check list is now being prepared and section by section submitted to the closest scrutiny by experts in the field. The library bulletin, now issued on a subscription basis of 25 cents for the calendar year, is sent regularly to about 1000 names. A new service has come as the result of advice asked by bookstores as to the best books on subjects of interest to socially minded people. Three hundred and fourteen type-written bibliographies were prepared during the year in addition to those previously made. Arrangements were completed so that all pamphlets issued by the various de-

partments, together with the books formerly distributed by the Survey Associates, may now be secured from one central office, the Publication Department, which is, for the present at least, under the direction of the librarian.

Randolph. The village of Randolph now has title to the property of the A. G. Dow Free Library, and a board of trustees appointed by village authority and all its effects. The title passed on Nov. 20, when Albert G. Dow, Jr., signed a deed in the terms of his proposition. Mr. Dow gives with the library about an acre of land located on lower Jamestown street, where it is easily accessible from all parts of the town. Besides the real estate the library proper is estimated to be worth at least \$5000, so that the gift is well in excess of \$10,000.

Richfield Springs. Mr. and Mrs. Thomas R. Proctor and Frederick T. Proctor are planning a memorial to Miss Lomy Proctor and Miss Anne Proctor. It is to take the form of a large room, 30 by 40 feet, which will be built on the south side of the Public Library, and connected with it by a corridor, 10 or 12 feet long, which will be opposite the main entrance of the building. It will contain many of the books, rugs, pictures and articles of furniture formerly belonging to the Misses Proctor. The room is to be for the use of the public and will be used at all times as a writing and reading room, while its size will also enable it to be of frequent use for committee meetings and social functions of all sorts. The walls will be lined with book cases, filling a want which the library has already felt, and two fireplaces will add to its cheer on cold or rainy days. The library was Mr. Proctor's gift to the village seven years ago.

Susquehanna. At a meeting at the home of Prof. A. A. Killian, early in December, it was decided to make the Susquehanna Library free to the public beginning with the New Year. Four hundred people are to be asked to pay \$1 each to the association and thus become voting members. After the first of the year every member of the family may take a book from the library at the same time without paying.

NEW JERSEY

Bradley Beach. It was announced at the December meeting of the Bradley Beach commissioners that James A. Bradley was ready to give a lot to the borough for library purposes. It is proposed to erect a new library building on the lot.

Newark. Fire was discovered in a rear room of the Business branch of the Free Public Library early in the morning of Nov. 16. The fire was confined to the ground floor landing of a rear stairway, directly opposite a rear door opening from Essex court. Apparently the fire started beneath the metal flooring of the landing in an accumulation of dust and sweepings, ignited possibly by a cigarette or cigar stub dropped beneath the landing. The flames spread along woodwork to a cabinet in which were stacked about 250 unbound reference magazines, mostly on technical and scientific subjects, and approximately fifty bound reference books. Almost all these books were destroyed. The cabinet was badly burned, as was a door leading from the rear room to the main room of the library. The metal flooring buckled as a result of the heat engendered by the fire.

PENNSYLVANIA

Schuylkill Haven. The High School Alumni, with nearly \$1000 in their treasury, are planning to contribute a sum of money toward the equipping of a library for the new high school building, on condition that the board of education contribute a like amount.

South Atlantic

MARYLAND

Baltimore. Provision for a new branch of the Enoch Pratt Library in the vicinity of Baltimore street and Central avenue, passed upon tentatively early in November, was stricken from the municipal budget for 1918 at a meeting of the Board of Estimates, Nov. 10. The members said they felt that the city could not stand the expense next year. The board allowed the trustees \$5000 for increases in the pay of employes at the Central Library and the various branches, but called for a full statement.

DISTRICT OF COLUMBIA

Washington. In submitting to Congress their budget estimates for the coming year, the District commissioners included a request for \$50,000 for another branch of the Public Library, to accommodate the thousands of strangers who have come to the city since the declaration of war.

GEORGIA

Atlanta. At the first meeting of the senior class in the Technical High School, it was decided to undertake, as the class gift to the school, the organization of a school library. C. P. McMurray, a member of the class, was put in charge of the work, and has already

secured from the boys the promise of 3000 volumes. Already over 500 volumes have been turned in. Only books used in the various courses of the school are being asked for. Mr. McMurray also has on hand about a hundred dollars' worth of material (lumber, stains, glass, etc.) and members of the class are working after school hours to make the necessary book cases.

FLORIDA

Bradentown. The contract has been awarded for the construction of a Carnegie library here. The new structure will be of Sibley Silver buff brick, with trimmings of granite, and will occupy a ground space of 58 by 34 feet.

East North Central

MICHIGAN

Detroit P. L. Adam Strohm, lbn. (Rpt.—yr. ending June 30, 1917.) Volumes added 129,396; pamphlets 1007; volumes lost or withdrawn 25,519; pamphlets 21; total, 454,369 volumes, 3459 pamphlets. New registration 48,353; total 122,701 (estimated population 914,896). Circulation, 1,680,799. Receipts \$429,828.83, including a bond issue of \$107,733.29 for the new Main Library; maintenance expenditures \$289,516.76, including \$54,901.86 for books, \$4121.33 for periodicals, \$16,101.99 for binding, and \$156,848.43 for staff salaries. Two new branches, the Divie B. Duffield and Bernard Ginsburg branches, were opened during the year. The Museum branch of the library was established in October, 1916, and its reorganization and cataloging was practically completed during the year. The staff numbered 147, exclusive of clerks, pages, janitors, etc. Many members resigned to go into government service and business positions, at increased salaries.

OHIO

Cleveland. Adelbert Coll., Western Reserve Univ. George F. Strong, lbn. (Ann. rpt.—yr. ending April 30, 1917.) Accessions 3961; total 91,153; books drawn for home use 11,000; loans to libraries not connected with the university 53. A notable collection of finely mounted book plates was presented to Western Reserve University by Mr. and Mrs. Paul Lemperly of Cleveland, and the entire collection placed in the custody of the Adelbert College Library. It consists of about 540 book plates and other engravings by Edwin Davis French and 82 book plates used by celebrated men and women.

East Liverpool. The new Carnegie Library was formally opened to the public Nov. 20,

with music and short addresses by several citizens of the town. A fine collection of some 2000 Indian relics, the result of forty years of search in different parts of the country, has been given to the library by the mayor, Dr. Hamlin Barnes.

ILLINOIS

Chicago. The Chicago Public Library has leased from Julius H. Isacowitz and Maurice Lewison a one-story building to be erected on 69 by 68 feet in the rear of the southwest corner Twelfth street and St. Louis avenue, for a term of ten years, at a rental of \$1800 a year. The building, which will be of the monumental type, will cost about \$15,000 and will be completed by Jan. 1. The structure will be used as a branch station of the Public Library.

WISCONSIN

De Pere. Fire that did considerable damage to books in the De Pere Public Library was discovered Nov. 14. The fire department was called out, and altho every care was used in order not to damage books by water, a number of encyclopedia sets and others books were damaged. The loss is estimated at about \$1500. The fire was in the southwest corner of the building and had crept from the partition in the first story to the second story before it was discovered. Defective wires are thought to have been the cause of the blaze.

Fond du Lac. A portrait of John Heath, for many years president of the Fond du Lac library board, has been presented to the library.

East South Central

KENTUCKY

Louisville. At the November meeting of the Public Library board of trustees increases from \$35 to \$50 a month were granted to about twenty members of the staff. This increase goes into effect Feb. 1. In the case of employes now receiving more than \$50 a month, the cases must be passed on individually.

Paducah. A branch of the Public Library has been installed in the Whittier school on North Twelfth street. The library is under the auspices of the Whittier School League, and will be open to the community one afternoon each week.

ALABAMA

Birmingham. Director Carl Milam of the Public Library, in response to the interest demonstrated by the board of directors of the Civic Association in getting a club library, has

suggested the possibility of establishing a branch of the City Library in the rooms of the association. It is probable that a branch of the library, containing technical and reference books, light fiction and periodicals will be established in the lounging room of the association at once. In case the Public Library acts on the suggestion, members of the Civic Association will add to the library, giving their books thru the association branch.

West North Central

NORTH DAKOTA

Bismarck. The first library club of North Dakota came into existence Friday evening, Nov. 23, at the home of the secretary of the State Library Commission, Mrs. Minnie Clarke Budlong, when a group of librarians met and organized as the "L. S." The purpose of the club is to further professional interests of librarians of Bismarck by means of reading and discussing library literature and by mutual exchange of methods and ideas helpful in the library profession. Meetings will be held informally at the invitation of individual members of the club. Any graduate of a library school residing in Bismarck is eligible to membership. There were present at the first meeting: Mrs. Minnie C. Budlong, Wisconsin 1910, librarian and secretary of the State Library Commission; Charlotte Matson, New York Public 1915, Legislative Reference Librarian; Helen Frances Carleton, Simmons 1914, head of the Traveling Library Department; Edna A. Rupp, Pratt 1906, librarian of the State Historical Library; Mrs. Charles Hagaman, Syracuse 1907, who preceded Miss Rupp in the Historical Library, and Mrs. Florence Harriet Davis, Wisconsin 1917, librarian of Bismarck City Library.

MISSOURI

St. Louis. The library in the East St. Louis High School will serve as a station for the East St. Louis Public Library, and will be open to the public from 9 a. m. to 9 p. m.

Mountain

MONTANA

Bozeman. The contract for the excavation for the new chemistry building at the Montana State College has been awarded. The unit being started with this building—57 by 110 feet—will be merely the wing of the main building when the same is completed. This is the first step in the building program proposed, thru which there will be erected several buildings of uniform style, including a

library. The arrangement of a uniform style of architecture for these buildings has been developed at the suggestion of Chancellor Elliott by Architect George Carsley of Helena in association with Cass Gilbert, an architect of New York. The working plans, however, the details of design and construction, together with the superintendence of the work, are to be in the hands of Architect Fred F. Willson of Bozeman.

Pacific

WASHINGTON

Tacoma. The Tacoma Public Library has been granted by the City Council for the year 1918 an appropriation of \$37,000 or .668 mills on the dollar. This is the largest appropriation that the library has received, and follows a year of serious retrenchment, as for 1917 the appropriation had been about 17 per cent. less than the former year, or .55 mills on the dollar. The chief problems before the library for 1918 are rehabilitation of the book collections at the main library and the branches, the gradual re-establishment of some of the stations discontinued during 1917, and the devising of ways and means to meet the increased demands which will come to the library as a result of the establishment of the largest cantonment, Camp Lewis, at Tacoma's door, and the consequent addition to the city of a large population. In addition the past year has seen the development of six shipyards in Tacoma, and other new industries, two of the shipyards being among the largest in the country.

CALIFORNIA

Callexico. The contract for the erection of the new Carnegie Library was awarded to the Darrell Condeley Company of Los Angeles.

Oakland. Contracts for two branch libraries that represent the last of four for which \$35,000 each was donated by the Carnegie Corporation, have been awarded to R. W. Littlefield, of this city.

Foreign

LABRADOR

Despite the ice and snow which make transportation almost impossible, there are libraries on the Labrador at last, as the result of persistent efforts of Miss Marian Cutter, formerly of the Brooklyn Public Library staff, and now a student in Pratt Institute Library School. Following up the survey of possibili-

ties and conditions made last season, Miss Angel, the trained librarian in charge, last summer established three circulating centers at the three principal fur trading posts. At the close of the short fishing season, before the cold weather sets in, the year round dwellers on the Labrador travel inland in order to escape the relentless cold of the coast. They go in their boats up the wide river mouths to the shelter of the woods, and it is about the heads of these deep bays that most of the winter settlements cluster. As the mail boats run but once a month, even when transportation is at its best, Miss Angel's visits at these outposts were either limited to thirty minutes or expanded to thirty days, and very diverse experiences resulted. However, at Northwest River there are now three hundred books located in the reading room of the hospital. Branches of the Hudson Bay Company, Revillon Frères, and other fur dealers are stationed here so that many trappers come and go and all are privileged to borrow books for themselves or their friends for the small fee of one cent a book for six months. At Cartwright, a second fur trading center, where "anything to read" has long been welcomed, two hundred books were placed under the care of the manager of the Hudson Bay Company post, while at Battle Harbor the settlement itself has taken charge of the collection. Books, used or unused, are appreciated, and each year offers opportunities with which it is hard to keep pace.

AUSTRALIA

Sydney. P. L. of New South Wales. W. H. Ifould, lbn. (Rpt.—yr. ended Dec. 31, 1916.) Accessions 12,708 volumes and 2585 pamphlets; total 295,342 volumes. In the two library buildings, attendance in the General Reference Library was 154,045, and in the Mitchell Library 16,764. Recataloging and reclassifying made less progress than was expected, due partly to the prolonged illness and ultimate death of the senior cataloger, and partly to the diverting of the catalogers to work in connection with the severe congestion in the General Reference Library. Slow but valuable work was done on the recataloging of 640 sets of periodicals 69,293 cards being added to the catalogs and 83,000 entries made for the card index of manuscripts. The need of a suitable National Library building was again urged, and the trustees asked that plans at least be prepared in the near future. The total receipts for the year were £12,878 7s. 10d.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature

BORROWERS—CARDS ABOLISHED

More than two years ago the Public Library at Sioux City, then under Miss Jeannette Drake's charge, abolished its readers' cards entirely, and the Spies Public Library, Menominee, Mich., followed suit. Both libraries have found the system practicable and pleasing both to the public and to the staff, besides effecting a considerable economy in time, money and materials.

In a leaflet issued by the Sioux City Library the method is clearly described.

"We loan one seven-day book, two fourteen-day fiction, as many non-fiction as a patron wishes, at one time," writes the librarian. "We recognize the possibility of a patron taking advantage of us by drawing out more fiction than the number allowed, but we consider this of minor importance when weighed against the advantages of the system.

<p style="text-align: center;">ioc.</p> <p>(Pencil in Fines)</p> <p style="text-align: center;">Guarantor's Pledge</p> <p style="text-align: center;">I, the undersigned, desire that</p> <p style="text-align: center;">.....</p> <p style="text-align: center;">should have the use of the library, and promise to be responsible for (his her) good conduct in the building, and to make good any charges against (him her) for loss, injury or over-detention of books.</p> <p style="text-align: center;">Name.....</p>	<p style="text-align: center;">You are cordially invited to visit the library.</p>

3904
ioc.

application blanks are arranged alphabetically in the file where the reader's cards used to be kept. When a book is charged the reader's name is looked up here, his number found, the charge is made on the book card, and the date stamped on the dating slip in the book. The cards are always here and there is no chance for loss as in the other system. They are never removed except to change an address, or to be withdrawn from use.

"When an overdue book is returned, if the fine is paid before the book is discharged, 'Pd.' is penciled under the date and erased when the book card is returned to the book pocket. If the fine is not paid when the book is discharged the reader's number and amount of fine is penciled on a small slip of paper as

and dropped in a small box for the purpose. The next morning the name belonging to 3904, for example, is looked up in the registration record and amount of fine is then penciled on the application blank in the file, as shown above.

"We use the same system in our branches. All applications are filed, as above explained, at the Main Library, whether these are signed at the main or at the branches. A duplicate card with reader's number, name, and address with plain space below is made and kept in alphabetical file at the branch where the reader borrows books. These cards are never removed except to change an address, or to be withdrawn from use. A reader may borrow books from a branch and the main library at the same time."

In the Spies Public Library at Menominee, the application blanks are filed alphabetically as before, but the form has been changed slightly. The parent's guarantee is on the same side with the child's signature and the reverse side of the card carries the number, name and address, while the lower part of the card is left for charging unpaid fines in pencil, which can be erased when paid. As all charging is done at one desk the applications for both adults and children are in one alphabet but the children's numbers have the usual + sign. This eliminates looking in two files

"The regular application blank is used with the printing on the 'Guarantor's Pledge' side so arranged as to give space at one end for the reader's number, name and address. These

when a young person is on the border line between eighth and ninth grades.

As all patrons are allowed to draw any reasonable number of books at one time it is very simple to look for the name of the reader and find the number quickly. The only disadvantage is to the librarian who cannot remember names, as she must then ask the borrower, and that is embarrassing at times—but why should any librarian be expected to remember 4000 names?

BUSINESS LIBRARIANS. See Librarians and assistants; Library schools

CATHOLIC SCHOOLS, CO-OPERATION WITH

An article in the *Baltimore Catholic Review* for Nov. 10, by Louise P. Latimer, supervisor of the library work done with schools by the Public Library of Washington, D. C., tells of the closer co-operation established between that library and the parochial schools of Washington. In the LIBRARY JOURNAL for September Miss Latimer described the inauguration of the plan whereby the library secured the services of representative Catholics to review the books in the school collections, with reference to their acceptability to Catholic children.

It was near the end of the school year when a hurry-up meeting was called in order to enlist as many Catholic teachers as possible before vacations took them out of the city. Later a very enthusiastic meeting was held at which about twenty-five Catholic sisters and lay teachers were present; the plan was approved and the teachers volunteered their services to the cause. The librarian welcomed the teachers and assured them of his interest in the work and his appreciation of their willingness to help. It was decided to review the books of the collection, each teacher making herself responsible for a certain number of volumes. These books, with cards for registering their opinions, were sent to the teachers by July 1. The cards read as follows:

	Catholic Review Committee
Author
Title
Name of reviewer
O. K.
Not desirable
Reasons

In all, the sisters of seven Catholic schools and about thirty-five Catholic Public school teachers and librarians lent a hand to the work of reviewing, which was completed early in October. Fifty-three titles were rejected. Letters were sent to the Catholic grade schools telling of the school work of the library, of the very careful work of the committee, and

offering the use of the collection. Printed catalogs of the titles to which additions are made once yearly, were sent to the schools. A permanent committee has been formed to review these yearly additions. A list of all vetoed books has been made and when sets are sent by the library to the Catholic schools, none of these books are included, tho their use in the public schools continues as before.

LECTURES

A series of lectures by officials of the city government is being given in various branches of the St. Louis Public Library in explanation of the work of their departments. The talks are planned especially for children in the public schools, but others, including adults, are also invited. On Nov. 8, at the Barr branch, the series was opened by C. M. Talbert, commissioner of streets and sewers, who explained how streets are paved and cleaned, sewers constructed and garbage collected, illustrating his account with lantern-slides. On Nov. 9, W. E. Roefe, of the Board of Public Service, spoke at the Cabanne branch on the general construction work of the city, dwelling especially on the Free Bridge, the Industrial Home, the new Detention Home for Children, and some of the park structures, such as hand-stands and swimming pools. On Friday, Nov. 16, at 4 p. m., Harland Bartholomew, engineer of the City Plan Commission, talked at the Carondelet branch on "How to make a greater and more beautiful St. Louis." Talks on the police, fire and park departments will follow in due course, and all the lectures will be repeated at the various branch libraries. The series was arranged by Lucius H. Cannon, librarian of the Municipal Reference Branch at the City Hall.

LIBRARIANS AND ASSISTANTS—BUSINESS TRAINING

Business education for business librarians. Ralph L. Power. *Spec. Libs.*, Nov., 1917. p. 135-139.

As business libraries grow in number and importance, their librarianship will approach the status of a separate profession. It seems evident that the training of a business librarian should include instruction in business subjects. To a certain extent, this can be given in library schools, especially those located in a university where electives in history, economics, etc., might be offered.

A business librarian must be a business man or woman and a librarian too. In training for business librarianship a good general insight is necessary, and the classroom contact with

students of business and practical business men is what is needed.

In a special library course it would be possible for the students to study the resources of the city in the special library field, choose two or three along the line they are particularly interested in, and then personally inspect just these two or three. In this way they would avoid the confusion of mind from seeing too many, and at the same time their viewpoint would not be limited to a knowledge of one type only.

The ordinary librarian does not grasp the business man's point of view. Special librarians must not only have a specialized knowledge but the assistants must also be carefully selected. All really "big" firms have an organized library department, as libraries are becoming recognized as an important factor in modern business, and their number is bound to increase. The person in charge must be both a specialist and a librarian, and the best training will be that in which both the business and library training are received at the same time.

In visiting about fifty special libraries in Boston, two facts were impressed on Mr. Power's mind:

"The first is that, if the librarian is a man, he usually makes friends for the firm and when occasion warrants he can fit into nearly any part of the business in an emergency. The second is that women business librarians with whom I came in contact were little more than file clerks. They seemed to lack initiative. Some of them could not loan a book to another library without seeing the president or some such arrangement. Balance of judgment, quickness of perception, discrimination, initiative, all the special knowledge possible, and last but not least, a sense of foresight are all indispensable."

LIBRARIANS AND ASSISTANTS—EVENING TRAINING CLASSES

The class in library training of the Bay Ridge Evening High School for Women, in Brooklyn, completed the two-year course in May, 1917, at the close of the evening high school sessions.

Out of a class of fifteen who passed the final examinations, nine have been acting as substitutes in various libraries in greater New York. Of these nine, one has received appointment as assistant in the Library of the Children's Museum (Brooklyn); one in the New York Public Library; two are under appointment in the New York Public Library; one is indexing and filing with a business

firm; and one is in charge of a small library in a business house.

The students of this evening class deserve credit for hard and conscientious work against great odds. Under difficulties and some opposition, with lack of equipment and facilities for careful work, these nine students have attained positions ranging from \$40 to \$75. In September, 1917, the Harlem Evening High School for Women (the Wadleigh High School) offered a similar course. The class numbers 25, 10 of whom are college, normal or training school graduates.

LIBRARIANS AND ASSISTANTS—QUALIFICATIONS

Personal qualifications of a business librarian. Mrs. Cora H. Farrar. *Spec. Libs.*, Nov., 1917. p. 139-140.

A broad background of general education to supplement the special training is the first requisite of the business librarian. The basis of a broad general culture is first and foremost, and home training, breeding and courtesy are essential. Every type of opportunity plays its part in making a well-balanced personality, for contact with people brings an enlarged knowledge of human nature and the ability to get the other person's point of view—indispensable in a business librarian. A varied experience outside of business hours tends to develop poise in meeting people, and the business librarian must be able to meet with equal tact the president of the company and the sixteen-year-old-typist. Business judgment and common sense are also essential.

It is of vital importance that the special worker accept the business policies of the company with which she is working and not try to impress her business opinions, no matter how valuable, upon her employers, if they are not asked for or gracefully received. In order to succeed, she should make it her business to have some general knowledge of business theory and practice, credit, merchandising, organization, and it is essential that she study the special lines in which her house deals so that she may develop critical judgment and imagination that would make it possible to recognize value of material for her specialty. If she equip herself to shoulder responsibility, she will have little trouble obtaining it.

Health is a necessity for successful careers, and a spirit of research is one of the qualities with which a business librarian must be endowed. She must be able to specialize highly and concentrate upon her special field. Enthusiasm for one's subject and aptitude for the work are likewise essential, and last of all

comes that most important and indefinite qualification, personality—the mark of what a man is, which shows itself on all occasions. Appearance, poise, ability to inspire confidence, and character, with its instructive qualities and its acquired mental habits of initiative, are all essential in the development of a self-reliant personality that will carry the business librarian thru any task.

LIBRARY SCHOOLS—FOR BUSINESS LIBRARIANS

Library school courses as training for business librarians. Josephine A. Rathbone. *Spec. Libs.*, Nov., 1917. p. 133-135.

In this paper Miss Rathbone speaks only for the library schools, leaving out of consideration other means of training—filing schools, summer courses, colleges or schools offering some library subjects, etc.

In so far as business libraries are libraries—organized collections of books and other printed material—the library school trains for the work of collecting and organizing such material. It does not aim to train for the work of a keeper of files, tho the study of cataloging and classification does help.

The work of the business library differs from that of the general library in that its field is narrower and more intensive. Most library schools have in view the needs of the general library, and in a one-year school it does not seem advisable to make many modifications of the course. Its purpose is to offer a broad foundation upon which specialization may be built after the student has tested and been tested in various departments of library work.

In any case, many subjects taught in the general library school curriculum are essential to the business librarian. Such are cataloging, classification, assignment of subject headings, seminar courses providing experience in preparing assigned topics, knowledge of printing processes, and reference work. In short, the library school imparts a technique, a method of work, and gives a kind of mental training that enables its students to assemble and organize and present information in usable form with a minimum loss of time and energy.

Specialization in preparation for the work of business libraries is not possible in existing one-year schools. In some the demand has been scarcely felt, and in all the call for general workers is greater than can be met by the schools. In schools offering a second-year course, however, specialization is possible, but outside of New York City the demand for business training has not been very pressing.

Albany, Illinois, and the school in the New York Public Library have noted a growing call for graduates in business houses, and in these schools some lectures, with substitution of other electives for certain of the regular library courses, are already provided, with a prospect of increasing attention in the future. New York in particular seems likely to make special effort to meet the increasing local demand for file organizers with library training.

MUSEUM MATERIAL

The work of lending material to teachers in the public schools was begun by the Newark Museum in the fall of 1913 with a small collection of charts of industrial processes and about a hundred single specimens of common minerals. This material, purchased for \$25, had formerly been owned and lent by The Newark Free Public Library. The plan was successful. In 1914, 292 objects were lent; in 1916, 4008; in 1917, about 5000, objects being lent for one month, with a fine of two cents a day for those not returned on time.

As the lending has increased, so has the collection of things to lend. These are chiefly industrial charts, geographic models, birds, mammals, costume dolls and models like the Santa Maria and the Log Cabin.

Many useful objects are given to the museum by people who say, "Here are a lot of things that I don't want any longer. Use them if you can, or throw them away." In this way, shells, corals, insects, minerals and curios of travel find their way into use again.

A printed list covering all sorts of objects from birds' nests and dolls to textiles and woods shows the present scope of the work, and has been made the occasion of a special plea to friends of the museum, for other gifts of similar character.

SCHOOLS, WORK WITH

At the meeting of the Minnesota school librarians in Minneapolis Nov. 1 and 2, 1917, one of the features of the program was a symposium on "How I introduce my book."

Miss Cottrell told how she introduced Hardy to her high school students—showing them how human the characters, how vivid the description, how naive the humor, is in "The return of the native."

Miss Olds, of Dawson, told how she got her children to enjoy the "Jungle book." She said that if one could get the leaders in a group to like a book all the others will like it too, as children greatly prefer each other's opinions of books to that of teachers or librarians. Suggestions and hints are more profitable than direct requests.

Ruth Tupper, of Little Falls, spoke next on introducing "The prince and the pauper." She has a bulletin board on which each few days appears a picture of a person, with the name covered. One day it was Mark Twain, who also was Samuel Clemens, to the children's great interest. Then came "The prince and the pauper."

Mrs. Nicolson, of Minnesota, discussed Meadowcroft's "Boys' life of Edison." She said that anything in a boy scout library binding will go out, any time. She reads the most interesting incidents aloud, and it usually creates a demand.

Miss Spence, Winona, discussed John Muir's "Story of my boyhood and youth." She reads or tells incidents, and tries to get her students to read "Stickeen" first. They nearly always are glad to read about the author.

Miss Stewart, of Northfield, told how to deal with inspirational books, like Marden's "Pushing to the front." She reads aloud the titles of the essays, and one of the best essays, as a specimen.

SPECIAL LIBRARIES

Presidential address of Dr. C. C. Williamson, Louisville, Ky., June 25, 1917. *Spec. Libs.*, Sept., 1917. p. 100-102.

In this survey of the work of special libraries during the past year, Dr. Williamson spoke of the conference of New England special librarians in New Haven in December, 1916, when steps were taken to form a local organization similar to that in New York city.

The New York Special Libraries Association, with a membership of about a hundred individuals, holds quarterly meetings, well attended, and usually accompanied by exhibits of special methods and activities, afterwards kept on file in a central place. The New York Association has a committee on employment which keeps a registration list of special library workers, and has other committees at work on a union list of serials and on a duplicate exchange system.

There was a great increase in special libraries, especially among business houses, one of the most significant being that of the United States Rubber Company, under Sarah B. Ball's direction. Another noteworthy event was the appointment of a committee on libraries by the American Electric Railway Association, with L. A. Armistead as chairman. The growth in interest in business libraries called attention to the great increase in business literature, and was responsible for the inauguration of the *Business Digest*, a week-

ly review and summary of a wide range of information of great assistance to business librarians and business men.

In this paper Dr. Williamson also presented certain suggestions for the broadening of the association's journal, *Special Libraries*, for the codification and printing of the association's past legislation and constitutional amendments, and for a more businesslike auditing and administration of its finances.

TRAVELING LIBRARIES

Interesting work with traveling libraries is summed up in the 1916 annual report of the Public Library of New South Wales, in Sydney. During the year 147 boxes containing 5830 volumes, were sent to 77 country centers; 63 boxes, containing 2493 volumes, to 27 different lighthouses; 58 boxes, containing 2426 volumes to 31 branches of the Public School Teachers' Association—a total of 268 boxes, containing 10,749 volumes, to 135 groups of readers. 1555 parcels, containing 2704 volumes, were sent from the country reference section to individual borrowers in the country.

The work of remodelling the traveling libraries was completed. This had occupied nearly two years, and necessarily during this period had interfered with the circulation. Notwithstanding the elimination of fiction from all traveling boxes except those for lighthouses the demand was greater than the supply. All metropolitan and many of the country institutes had to be denied entrance to the scheme until new boxes could be equipped.

The increase in the circulation of reference books to individual students in the country was also very satisfactory. Since the section was established the circulation has grown from 1137 volumes in 1913, 1437 volumes in 1914, 1848 volumes in 1915, to 2704 volumes in 1916. All of these books were sent by post in response to a specific request. The system is proving so valuable to country people that every effort is being made to make it more widely known, especially among the farmers.

The circulation of boxes of books amongst branches of the Agricultural Bureau did not come into operation during 1916, but 21 boxes containing about 1100 volumes were equipped and made ready for despatch in the new year. These were planned to circulate like the traveling libraries for Schools of Arts and branches of the Public School Teachers' Association. They contain the best books on all divisions of agriculture, chosen after consultation with the agricultural experts, as well as works on domestic economy and similar subjects.

Bibliographical Notes

"The President's flag day address, with evidence of Germany's plans" is one of the recent pamphlets issued by the Federal Committee on Public Information in the Red, White, and Blue series.

In "Department-store education" Helen Rich Norton has written for the Federal Bureau of Education (Bulletin, 1917, no. 9) an uncommonly interesting and instructive account of the training methods developed at the Boston School of Salesmanship under the direction of Lucinda Wyman Prince.

A new edition of the "Du Pont products" book has been issued. Under each of the various by-products produced, are listed the uses to which it may be put, and the classes of people who may find it of value. An index several pages long makes it possible to locate each item.

The Bureau of Commercial Economics, Washington, has been designated by the Belgian Government to distribute all of its official literature and information in relation to the world's war, and the same may be had for reference and for circulating libraries on application. The express charges are to be paid by those desiring the literature.

Martinus Nijhoff has published the second part of Conrado Haebler's "Bibliografía Ibérica del siglo XV," which supplements the volume printed in 1904. Together they form a valuable bibliography of all the books printed in Spain and in Portugal before the year 1501.

The first semi-annual report of the War Council of the American Red Cross was made public early in December. Its 144 pages are almost equally divided between the work in America and the work in Europe. The first half describes the building up of the greatly augmented organization, its increase of funds and membership, and the various lines of work projected or begun. Relief work in France, both military and civil, is described with considerable detail in the second half of the report, and this is followed by shorter accounts of the work in other countries.

The series of articles on "Boston's special libraries" which Ralph L. Power wrote for the *Boston University News* last winter, have been increased in number and printed in book form. The original articles were twenty-two in number, while the book now includes sixty-six, covering the entire field in the city of Boston. In general the book is

confined to business libraries and the more unusual types of specialized collections, but one law, one medical, and one theological library have been included. A reading list on library economy for business librarians is included, and the book will be very useful for ready reference to all special library workers.

Sarah Louise Arnold, dean of Simmons College, has written a brief account of the Sargent Industrial School, an experiment in home economics which has been successfully conducted by Mrs. Winthrop Sargent for the past twenty-five years in the town of Beacon, N. Y., and is worthy of the attention of home economics experts throuout the country. Thru this work the girls of an entire community for twenty-five years have been given thoughtful and definite instruction in home economics related to a normal and admirable home. The undertaking has many of the attributes of the finer social service, and at the same time has afforded the intimate instruction which the mother provides in a good home.

The Georgia State College of Agriculture at Athens has more than a hundred bulletins and circulars available for free distribution in the state. Among the recent publications are Cotton production under boll weevil conditions; Pecan growing in Georgia; Feeding garbage to hogs; Wheat and rye production; How to make good butter; Common parasites of farm animals; Spray calendar for Georgia; Growing sweet potatoes; Marketing farm woodland products; Every man's silo; Apple culture in Georgia; and Growing Irish potatoes. Plans together with bill of materials in each case may also be secured for hog houses, chicken houses, potato houses, meat-curing houses, barns, silos and other farm buildings from the department of engineering. Specifications can be given for an economical lighting system and home water-works system.

"A book of Carnegie libraries," by Theodore Wesley Koch, has been published by the H. W. Wilson Company of New York City. The illustrations are the same as those issued in his portfolio of Carnegie buildings in 1907. The text adheres to the original plan of the book, and does not touch on the library buildings more recently erected. The brief sketch of the organization and work of the Carnegie Corporation, which now has control of all questions involving the bestowal of Carnegie grants for building purposes, is the only later material introduced. As the first serious at-

tempt to gather together authoritative information on Mr. Carnegie's library benefactions, the book will be of distinct reference value to libraries, and it is to be hoped that a second volume may presently appear and record the many changes and improvements in library planning which have been a feature of the last decade.

Thru the courtesy of James A. Patten, president of the board of trustees, Northwestern University has published the "Mose-tino vocabulary and treatises" written by Benigno Bibolotti, a priest in one of the Franciscan missions in Bolivia. The manuscript was one of those acquired by Dr. Walter Lichtenstein on his trip to South America in 1913-15, and is especially valuable as it contains extensive materials on a relatively little studied Bolivian aboriginal idiom spoken by a tribe of Indians almost extinct. Besides a Spanish-Moseteno vocabulary it gives the elementary methods of calculation, the personal pronouns, conjugation of verbs, formation of plurals, short prayers and panegyrics. The work was not written for scientific purposes but simply as a guide for the young missionaries who in years to come might follow him, and it seems to have been quite adequate for that purpose.

THE STAFF NOW WORKING AT THE LIBRARY WAR SERVICE HEADQUARTERS IN THE LIBRARY OF CONGRESS

THE LIBRARY JOURNAL

Vol. 43

FEBRUARY, 1918

No. 2

LIBRARY war service will be the engrossing work of the library profession for some time to come, and initiated by a book week, there will be an intensive and continuing book campaign, nationally organized by Director General Putnam, to collect books on a large scale from the public. The original scheme "A million dollars for a million books for a million men" has already been more than covered by subscriptions now outreaching \$1,700,000, which will cover buildings, administration expenses and the large purchases of books from publishers already made or under way. These purchases have been liberally supplemented by gifts from the public, which have found their way to the camps thru the main dispatch office in the New York Public Library building or other channels; but many more volumes, possibly millions more, will still be required to supply the evergrowing demands which have already made themselves felt. Last month the stock of purchases and gifts at the main dispatch office was at one time practically exhausted by the demand. The public have responded generously, wherever asked, and have proved very ready to give of their best in books to the boys in camp. Specific plans for the book drive will presently be outlined by the Director General, and then all should lend a hand with a will. Booksellers as well as librarians are ready to help, and much should be accomplished thru this co-operation. The local librarian should be sure to get in touch with the local bookseller to this end. Library war service will be a chief topic at the Atlantic City meeting, which will take place this year in the middle of February, as well as at the A. L. A. Conference at Saratoga from July 1-6, and other meetings of the year.

UNCLE SAM requests us to state that he needs a great many good helpers in various fields of war work, particularly those

skilled in filing and other clerical work. Already the high salaries paid in Washington and elsewhere in Government service have depleted library staffs alarmingly, the Brooklyn Library, as an example, having had changes during the year equivalent to one-third of its whole staff. The movement toward Washington has been slowed down because of the lack of living facilities there; rents have doubled and in some cases trebled and quadrupled, while the expense for food has increased there more than elsewhere. The Government is endeavoring to solve this difficulty thru a welfare bureau, which promises to have a special care for young women, and it may even go so far, as in the shipbuilding localities, as to provide housing for employes. Ordinary salaries are on the \$1100 to \$1200 scale, which is a serious enticement, tho offset in some measure by the problem of employment after the war. Library assistants who wish to venture a change and thus serve their country may apply for information to the Civilian Personnel Division, Office of the Chief of Ordnance, U. S. Army, 1333 F Street, N. W., Washington, D. C., but it must be said on behalf of the libraries that those library assistants also serve their country who only "stand and wait" on readers or help in the provision for the boys at camp.

"THE movies" have of late years been considered the chief rival of the libraries for public attention, but it is now found that the two may act in concert, to their mutual benefit and the common good. This number of the LIBRARY JOURNAL is, therefore, specialized on this topic. Movies more and more find their subjects in great books, as "Quo Vadis" and "Les Miserables," and many managers are quite glad to preface or append to the film a word that the book may be borrowed for reading from the local library. Conversely, when a book

film is to be presented, the local library may well advertise that fact by displaying the movie poster and with it copies of the book in question or of cognate books and periodical articles. One library in Indiana has arranged with local managers to share in net returns where the library advertises the book films in this way. As a feature of this issue we print a list of recent book films approved by the National Board of Review, which will be supplemented from time to time, if libraries prove sufficiently interested. Where library auditoriums are equipped with movie apparatus, as is increasingly the case, book films may be purchased from the film companies or hired in a circuit, and made a feature of library entertainment, perhaps in connection with the story-telling hour. In turn a picture of the children's hour at the library might interestingly introduce at the movie theater the film story itself.

ANOTHER field for movie films is in direct library promotion. A local library may well procure films, which movie photographers are ready to supply at reasonable prices, showing the building in exterior, the busy rooms within, the course of the reader in taking out a book, the story-telling hour and other special features of the library's work. These presented in the local movie theater, with an effective invitation for the theater-goer to be a reader, too, may enlarge the clientele of the library. Even more may be done in extending the library where, as in North Carolina, there is a scheme on foot for peripatetic movies. In that state a traveling moving-picture show visits small communities or exhibits at a place central to outlying villages, and performs the double function of entertaining the populace and developing state knowledge and pride by showing its resources or its methods. A state official is sometimes assigned to accompany these movie shows and explain the sanitation and like work of the state, and as North Carolina has for its

motto "A library in every town by 1920," it would seem that the library organizer for the state might find this one of the best opportunities for spreading the library gospel.

INCREASING co-operation among the distributors of books in an endeavor to make this a nation of book readers as well as newspaper readers, is greatly to be desired. A generation ago the library school was unknown, and when it was suggested there was no little scepticism and much asking of questions as to who might come to it, what it could teach, and what good it could do. The answer is found in the scores of library schools and classes to which additions are made every year, and in the fact that the technical education of librarians has given them better standing in the community, enabling them to do the community better service, and secured for them better salaries than of old. And now it is the turn of the bookseller to be educated. A bookselling class was started in New York three years ago, and in Philadelphia Miss Bessie Graham, following the earlier work of Miss Wilson, has conducted for the last two years a very successful bookselling school with an attendance of a score of women and some men. She has now instituted a sort of "home correspondence school" for booksellers in the *Publishers' Weekly*, from which librarians may also learn something new as to the books on their shelves and the best way in which to present their attractions to readers as well as buyers. And now rightly enough there is talk of uniting the two interests at the beginning by establishing bookselling classes at library schools, Western Reserve University and other schools having the matter under consideration. The ideal development in every town should include both a good public library and a wide-awake bookstore and in this field as well as in others librarians and booksellers should co-operate from beginning to end.

MOTION PICTURES AND READING HABITS

BY ORRIN G. COCKS, *Advisory Secretary, National Board of Review of Motion Pictures*

THIS article is a study of the effects of motion pictures on the reading habits of the American people. It is based on questionnaires sent out to ninety-six librarians in all the states, to which fifty-six answers were received from the head librarians and children's departments, with their associates.

It is, of course, already recognized that in every community there are not only the adult readers of serious literature and of fiction as well as young people and children who are forming their reading habits, but a vast public who have little or nothing to do with libraries, own no books of their own, and have but little intimate knowledge of current events thru the reading of newspapers and periodicals. In any discussion of the effects of motion pictures on the public these two distinct groups must be borne in mind.

The motion picture is more vivid in its impressions than fiction. It not only presents the characters in strong relief, but it paints an actual picture of the surroundings and backgrounds which even a master of English would be unable to convey by the written word. Descriptions and settings are therefore ignored and the story rushed thru to its conclusion with a maximum of action and a minimum of written dialog. It is possible therefore in the course of an hour and a half to present all the human situations occurring in the book and with real people.

While it should be remembered that the motion picture now illustrates the actual news of the day and carries people with its scenic films on short journeys to various parts of the world, and while it presents superficial glimpses of history, scenery, science and industries, its main function is that of presenting dramatic ideas for entertainment. In their search

for themes which will be entertaining and thrilling oftentimes the directors of pictures have used melodrama and have presented situations which are too vivid, intimate, lurid, or shocking for cultured or literary people.

These more mature, intellectual people attend the motion pictures in large numbers and enjoy such stories as passing entertainment in the same way that they enjoy the short story, the illustrated weekly, or the spoken play. The permanent influence on this group is small. On the other hand, the effects produced upon that great mass of the public who are not patrons of the libraries, as well as upon the young and impressionable, are much more powerful. The motion picture has become for them something more than entertainment. Unconsciously great masses of persons not now patrons of the libraries are having their tastes developed and are receiving suggestions along social and ethical lines nightly. For such impressionable minds the influence is far-reaching and lasting.

One of the important questions to be considered by the libraries of the country is this: Can the masses of the people who do not now read be led to the libraries and the world literature from the motion picture houses? The answers to one of the questions would seem to imply that many of the librarians felt that this connection should be established. It is unquestionably true that people who have received a taste of literature, travel, science, and fiction thru the motion picture will follow here the same course which is manifested in all the rest of life. The problem, therefore, which confronts the librarian is to show these beginners that there are still finer things and still larger vistas behind the doors of libraries.

In response to the question: "Have the

motion pictures changed the reading habits of your townspeople?"—the majority seemed to feel that the influence upon library readers had not been appreciable, but that with the group of non-readers there was a decided change. Among those who frequented the libraries evenings there was a falling off of requests for books and also of readers within the buildings because of the attractiveness of the motion pictures. There was also an increased desire to read popular fiction, some of it not up to the standard of the books on the shelves of the libraries. Some few readers had been stimulated to request books of travel, and another small group to demand the standard works of fiction and the classics as a result of pictures discussing these themes in the commercial motion picture houses.

One direct result of the motion pictures exhibited in given centers is an increased demand for fiction dealing with the stories exhibited. In a majority of cases this was *after* the film had been shown; proving conclusively that people are not satisfied with the film story but desire to learn of the author's presentation and to sample the literary rendering of the theme.

In response to the inquiry: "Do new readers request books which have been made into motion pictures?"—twenty-six answered unqualifiedly in the affirmative. Nineteen stated that requests came to a limited extent and six answered in the negative. It is, of course, impossible to decide just what causes a new reader to request a certain book of fiction unless he makes a positive statement. There is apparently a drift on the part of motion picture habitués to the libraries without a very decided attempt being made by either the motion picture exhibitors or the librarians to accelerate it.

The answers given to the question: "Are the readers affected by motion pictures, adults or young boys and girls?" are interesting. Many of us supposed that the melodramatic character of the film stories would be primarily stimulating to the young people. Fully one-half

of those answering say that the groups are drawn from all ages. If one can judge also by the answers there would appear to be a larger number of women who are thus affected than young people, and more girls than boys.

It is difficult to express any satisfactory summary to the question: "What wholesome or unwholesome effects have you noticed since the general introduction of motion pictures?" The following are some of the answers: some replied that there was an abnormal craving for motion pictures on the part of readers. Eight said there was an increase in their communities of a desire for passive entertainment as over against the development of ingenuity. Seven felt that the influence was wholesome — depending upon the pictures shown. Five recognized an increased demand for stories dealing with problems of sex, sometimes in books which were not carried in the libraries. Thirteen answered that there was an increased demand for stories which emphasized action as against literary form, most often found in books which might be regarded as thrilling and melodramatic. On the other hand, seven stated that there was an increased call for classics, including such books as Dickens, Victor Hugo, Goldsmith, etc. Four replied that there was less interest in lectures, literary entertainments, stereopticon slides, etc. Here again it is to be recognized that the motion pictures are influential, but that the great variety of themes which are presented from night to night have the influence which one might expect from such a diverse program.

The practical questions which followed drew out some interesting answers. To the question: "Would it be valuable for you and your readers to have some monthly disinterested statement of the screen versions of fiction?"—thirty-nine were in the affirmative while nine answered with qualifications. It is entirely possible for such statements to be prepared if further investigations demonstrate that the demand is widespread.

Such statements could readily be utilized in the various departments of the libraries, if proper connections were made between the commercial exhibitor and the library acquainted in advance of the public showing of films dealing with literature.

The following suggestions were made in response to the question: "Can you suggest any methods by which motion pictures may stimulate a larger use of libraries?" Those which can be immediately used are as follows: Slides could be shown in the motion picture theaters calling attention to the fact that the books can be found in the neighboring library. Exhibitors could be encouraged to give advance information to librarians. Bulletins could be posted in the high schools to attract young motion picture patrons to the libraries. The other suggestions are more general and require action on the part of the producers of motion picture stories rather than the exhibitors. The suggestion is made that attractive subjects could be made illustrating the departments of the modern library and the methods of work. A larger number of educational subjects could be shown in the theaters. This suggestion would not be welcomed particularly by the producers of entertainment because they have already learned by bitter experience that the audiences in the theaters are not particularly interested in this class of film. It is also suggested by twenty or more that a larger number of the standard books of fiction be filmed. The steady trend of the motion picture business is toward a larger use of just this class of story. The requirements of the motion picture are such that some fiction of undoubted literary value is so devoid of incident and action that it does not lend itself readily to filming. The public seems to be little interested also in the classical tale and the costume story. Moreover, some fiction is built upon such broad lines that the cost of producing the story is prohibitive. On careful examination, however, of the total production of motion pictures thruout the year, there is revealed a surprising number of novels of

the first or second class. From the standpoint of the casual observer oftentimes these stories are missed in the mass of other material used by the producers of motion pictures. Sometimes also the technique displayed by the actors and the directors is not on a par with that used by the writer and dramatic license has been used to modify the story somewhat for the sake of accomplishing effects not originally intended by the writer.

An effort was also made to determine whether any attempt had been made to separate young people under fourteen from the general motion picture audiences. In twelve instances such children's entertainments had been started or were running regularly. In five cases they had been attempted but were abandoned. In eight cities there was some regulation regarding the admission of such children to the regular motion picture entertainments. In quite one-half of the cities represented by the answers apparently nothing had been done. This subject deserves the thoughtful attention of the librarians in charge of the children's departments.

Those of us who have studied this subject of the effects of motion pictures on young people are practically agreed on the following conclusions: (1) That the regular motion picture entertainment is unsatisfactory for little children under nine or ten. Their leisure time should be spent almost exclusively out-of-doors. (2) The problem is different for boys and girls between the ages of ten or eleven and fifteen. In this period of ever-increasing physical and mental activity, selected motion pictures have messages to deliver which are almost beyond expression by parents, teachers, or librarians. The films start discussions on life problems in a natural way and can easily be utilized by those who sincerely desire to guide young people. The same wisdom in selection, however, should be used which is characteristic of well-organized children's departments in libraries. (3) Few constructive results can be obtained until parents recognize that entertainment pic-

tures for adults are poor mental and emotional food for their young people. This requires the same slow process of general education which has been characteristic in our treatment of the spoken drama. Complaints will be general until these three propositions are enforced.

The motion picture for entertainment is here to stay. Its growth during the past fifteen years has been phenomenal. The time is too short for it to assume stable and settled forms. No one is now able to prophesy what will be accomplished during the next ten years.

The motion picture, moreover, is not an enemy of the library or of the school. To be sure it has a distinct place of its own, but it can be used as a handmaid of both institutions. Its function as an instrument in the development of knowledge and character is unquestioned. It adds to the sum of knowledge largely by indirection. In the course of the discussion of dramatic themes a great mass of facts flows into the mind on the crest of the tide of interest. Having the whole world as its background and setting, it inevitably will play a part in the culture of the American people.

It follows that the attitude of the librarian should not be destructively critical. Where there are undoubted evils, these should be recognized and done away with. Fortunately writers are awake to the potency of the motion picture; the producers now see that they have a large part to play in the cultural development of masses of people; the exhibitors are quick to note that they are more than professional entertainers, and both teachers and librarians are thinking seriously about methods of utilizing this great agency for the welfare of the people.

While the technical and educational development of the motion picture is inevitable, this must come outside the motion picture theater. Here the people come to be entertained during their leisure hours. They resent those things which are too openly instructional. Despite opposition, we may look for the extensive use of the proper kind of pictures

in churches, schools, and libraries. No one can stop it. But always there will be a demand on the part of the people for this cheap, artistic, and vivid entertainment. The slogan should be: "Intelligent Co-operation."

EDUCATIVE MOTION PICTURES

MANY libraries whose auditoriums are equipped with motion picture machines have found difficulty in getting anything except the regular commercial films for exhibition. The following short list of sources may be useful in helping them to secure a wider variety in their pictures by introducing these pictures of government and patriotic activities. Fuller information as to kinds of pictures available may be obtained from the National Board of Review of Motion Pictures at 70 Fifth avenue, New York City.

1. The Committee on Public Information, 10 Jackson place, Washington, D. C., maintains a Motion Picture Department under the direction of Mr. Mack. Pictures dealing with the activities of the government in the different departments can be obtained by correspondence with him.

2. The American Red Cross, Washington, D. C., has some motion pictures dealing with its activities. Information will be furnished on request.

3. The Commission on Food Administration, Washington, D. C., can give information about films dealing with its work.

4. Industrial and Economic Films—Henry Disston & Sons, Philadelphia, Pa., issue a list of manufacturers having motion picture films of educational value. Correspond with the Educational Department for this list. Some of the films are valuable for such entertainments.

5. The Bureau of Commercial Economics, Washington, D. C., has a list of industrial, economic and government films which are loaned directly from Washington or thru exchanges which they have established in other cities. Write the director for complete information.

THE man who says it can't be done is often interrupted by somebody doing it.

PUTTING YOUR LIBRARY IN THE MOVIES

BY ERNEST A. DENCH, *Author of "Advertising by Motion-Pictures," and "Motion-Picture Education"*

THE other day I received a letter from a librarian who wanted a result-producing photoplay scheme for advertising the local library and community house. I replied that there were several methods by which to stimulate the use of libraries by motion-pictures, and as the main difference between these plans was the expense, it was up to the library to adopt the method which came nearest to its appropriation.

The motion-picture, appealing as it does to the eye, presents an appeal that cannot be ignored. It comes on the screen with nothing else to detract one's attention, consequently it is more effective than other publicity channels, and the presentment is so subtle that the spectator is unconsciously aroused to action by the message which the film gives.

THE STOCK ADVERTISING FILM

Unless it is done on an extensive scale, motion-picture producing is costly. The more theaters a film can be shown in, the less is the cost of production. But the library is necessarily limited to the local theaters.

You want a film that will occupy the screen for the same duration as the slide, and from forty to sixty feet is just about right. To have a subject of this length produced to conform with your individual requirements would cost you about fifty cents a foot. The outlay is enough to scare you, but the stock advertising film has been made a practical possibility, bringing the advertising motion-picture within reach of every library, large or small.

Those motion-picture producing concerns which are making a specialty of this effective form of advertising have not confined themselves to one particular kind of production—they have taken their cues from the regular photoplay manufacturers, aiming at variety and novelty and adopting their method on a miniature scale. The average stock film costs between \$4 and \$5.

Perhaps the most popular and the least expensive kind is the animated cartoon. A subject employed by one library shows

an ocean liner which is chased by a submarine and finally torpedoed. The explosion sends letters scattering in all directions, after which they arrange themselves into the advertisement. Then the steamer disappears below the surface.

YOUR OWN "NEWS" FILM

The live photoplay exhibitor is deeply conscious of the fact that the national animated newspaper has its shortcomings, especially if he is located in a small town. Folks in Clayville are not as interested in seeing Van Troopen lay a foundation stone in New York City, as they are in John Brown's opening the Clayville Library. Maybe they saw the latter event performed, but that does not decrease their interest. Rather, it increases it, since the motion picture camera presents the event from a new viewpoint. Another thing—they are among the crowd, and who does not like seeing himself on the magic, white screen?

Maybe the dollars for your Soldiers' Book Fund are not coming in as freely as they should. Here you have an event with a legitimate news interest. Or, Mrs. Brown, the well-known local suffragist leader, sends you a letter in regard to the pains you took to secure her some important data. The first thing that would occur to you would be to have the letter flashed upon the screen. That is far too crude. Film an interview with your patron and introduce some intimate scenes, not forgetting the visualized testimonial. Blend entertainment and advertising.

All in all, it is action by which you have to tell your story. A whole mass of explanatory matter flashed on to the film hinders it instead of adding further enlightenment, as is intended. The fewer and shorter the sub-titles are, the better the picture will be. It is what the spectator sees, not what he reads, that leaves the lasting impression, the paramount point to be reached in advertising by motion-pictures. Moreover, each word consumes one foot of film.

The motion-picture photographer usually charges fifty cents a foot for producing

films along the foregoing lines. The exhibitor who is offered a news-event film will gladly snap it up as a special attraction. And such publicity as your library will receive will not be easily forgotten in a day.

WHY NOT A MINIATURE PHOToplay?

The advertising film writer has arrived, and none too soon. He brings with him the training acquired in writing photoplays for purely entertainment purposes. To this he has added the knack of injecting the right proportion of selling talk into an interesting story, a combination which ably equips him for his job.

Suppose you have a short photoplay written around your library. You either leave all the details in the hands of an industrial producer, paying him accordingly, or else hire a regular photoplay author. In the latter event you only pay for the story in synopsis form, because only the producer can prepare a perfect technical scenario, unless, of course, the writer is attached to the staff and is acquainted with the studio facilities.

Anyone who has had a scenario produced can tell of the liberties taken with it. Some of these alterations are justified; some are not. It depends entirely on the director. So whenever you have a local photoplay produced, agree on the story and then if it is necessary to alter it afterward, ask the director his reasons for so doing. If they are sound ones, he will be able to give them, in which event you may allow him to go ahead. I have seen the publicity properties of many a commercial film impaired because of unnecessary changes on the part of the director, so giving him a free hand without personal supervision is not to be recommended.

The cost of producing a photoplay varies from \$1.00 to \$3.00 a foot. Steer clear of interior scenes, as they are expensive. A photoplay may seem a costly article to produce, but it is a worth-while investment, in that it is at all times available and possesses exceptional business-pulling properties.

ARRANGING THE FILM DETAILS

To produce a good local library film means much more than merely arranging

for a series of explanatory photographs. The first step is to get in touch with a reputable motion-picture producer. I repeat reputable because there are some none too scrupulous, who make it a regular practice to charge for superfluous footage, which is designated as padding in the motion-picture industry. The extra cost of this is nothing compared with the harm it does to your film. Success depends on snappy action, and if the film is unduly drawn out the spectators are liable to lose interest. I have seen material for a one-reel subject extended to two reels, boring an audience for thirty minutes instead of entertaining it for fifteen minutes. But even the cleverest motion-picture producer cannot avoid some waste footage. Like many a story or article, it has to be trimmed before it leaves the producer's laboratory, so arrange for its projection beforehand and try to place yourself in the position of the spectator who is seeing the picture for the first time.

Your best plan would be to have the representative of a reputable industrial motion-picture producer, or a local cinematographer who knows his business, call on you. He will then draft out a scenario, in which he will allow one or more scenes for each detail, according to the area it covers. If it is only a minor detail, he will perhaps plan to "shoot" a five-foot flash, but to cover an important detail he may run up to fifty feet for a single scene. (A scene, by the way, is a portion of action which can be taken without moving the camera.) He then has to allow for sub-titles, for each detail must be tersely explained beforehand. Each word is reckoned as one foot of film. A competent camera man figures his time at from \$10 to \$20 a day, and somebody must pay for that time even if weather conditions should delay the work of production. The producer will probably make an allowance for this in his estimate.

Lighting conditions within the library may be unsuitable for photographic purposes, and the producer will probably have to figure on installing a portable lighting outfit, charging you fifty cents a film foot for the scenes in which it is used.

GETTING THE CIRCULATION

Motion-picture advertising has presented its crop of new problems and probably none so involved as that of circulation. Let us, first of all, compare the film with printer's ink. To my mind, a motion-picture is like a press agent's story syndicated to a chain of newspapers thruout the country, yet it is different in some respects. A write-up may be released for simultaneous circulation and published in several thousand newspapers on the same day, but this would not be practicable in the case of the motion-picture.

The regular photoplay producers have specified release dates for their productions, and altho several thousand exhibitors may book the same production, their dates will be spread over about six months. Each print supplied by the film manufacturer to the exchange costs at least \$100. The leading theaters are in a position to pay the high rental demanded for first-run, but the exchange has to keep the print working overtime in order to make a profit, so it is rented out to other exhibitors at proportionately reduced rates.

Now, suppose you have a one-reel motion-picture produced. The negative, we will say, costs \$500, but for every print you need the charge is \$100. If you are going to have your library film shown simultaneously at every theater, it means that you will have to supply a separate print for each theater. As the picture will only be retained for several days at the most, it is extremely doubtful whether the expense will be justified, so it is best to utilize but one print over a given territory. The life of a print depends on the care taken by the operator—it may only last three weeks in a serviceable condition, or it may be in excellent condition after six months of wear and tear. A motion film has to survive so much wear and tear at the hands of different theater operators, that, in order to preserve a perfect appearance as long as possible, it should be printed upon a reliable stock. Most of the regular producers use Eastman, so it is best to specify this particular kind.

Allowing an average audience of 1000 at each of the two evening performances,

and assuming the print takes six months to go the rounds of the local theaters, the film will be seen by possibly 312,000 people. There is more in these figures than appears on the surface, for altho a publication may guarantee such a circulation, you have to allow for those readers who skip the advertisements. In the motion-picture theater this cannot be done, as only one thing can be shown on the screen at a time, and in the darkened hall a spectator cannot turn his attention elsewhere.

The film must be charged to the copy writer's account, for an exhibitor charges from \$12.50 to \$50 per week for renting out his screen for advertising purposes.

If desired, the film manufacturer will undertake the circulation of your film. He will outline for you an advantageous circulation plan, arrange with a chain of theaters for the presentation of your film and obtain the best terms and dates. He will ship the film to the first theater on the circuit. When the theater is thru with it, the reel will be dispatched to the next theater, and so on, until the whole circuit is covered.

TRAVELING MOTION PICTURES IN MONTANA

THE University of Montana has purchased a complete motion picture equipment for use in the institution and for extension work thruout the state. Reels of educational value will be shown in the lumber camps with the double object of giving instruction in lumbering and logging methods in various sections of the country and of furnishing a pleasant break in the monotony of the camp life. The move is in accordance with the policy of the lumber companies which have installed recreation and reading rooms and showers in the camps. Pictures were exhibited for the first time before the Forestry Club of the University in December.

The chancellor of the university has authorized the showing of pictures of students at work in the different departments of the greater University of Montana: the University of Montana, the State College of Agriculture and Mechanic Arts, the State Normal School and the School of Mines. These films will be shown in high schools.

LIBRARY LEGISLATION DURING 1917

BY LEROY J. BURLINGAME

REGULAR sessions of the state legislatures were held in forty-two states of the United States in 1917. The states which did not hold any sessions were Alabama, Louisiana, Mississippi, and Virginia. Kentucky and Maryland had no regular sessions but both had special sessions. Georgia had both a regular and a special session. West Virginia had two extraordinary sessions besides her regular session. An examination of the session laws of the various states show that there was much library legislation during the past year. The material used in the following article was obtained directly from the session laws in most cases. It was not found possible to correspond with all the states to verify the facts. However, it is believed that the following review is practically complete. No effort was made to determine the number of bills introduced which failed of passage.

There was a general tendency to extend the scope of library work into new fields, and to provide more generously for the maintenance of such work. Legislatures continued to regulate minutely the affairs of libraries supported by state funds. There were a great many amendments to the existing library law. Not only did the states provide more liberally for the maintenance of libraries, but in many instances there were substantial increases in the salaries paid to librarians. County libraries, legislative reference bureaus, and co-ordination of the work of county and city libraries appeared to be the favorite subjects of legislation. Indiana enacted the most important and most complete county library law. Montana, North Carolina, Oregon, South Dakota, Michigan, and Texas also had important county library laws. Maine and Arkansas established Legislative Reference Bureaus. Indiana abolished her Bureau of Legislative Information. Pennsylvania rewrote her general library law. Massachusetts was the only state to provide for use of library books by soldiers within the state. Following is a minute survey of the legislation enacted in each state. It was thought best that the material for

each state be kept together. Subjects covered by the legislation in the various states include appropriations, general library laws; county, town, and state libraries; law and historical libraries, legislative bureaus; documents, establishment, maintenance, and functions of libraries. The states are listed in alphabetical order. Wherever the states have biennial sessions, the appropriations are for two years.

Alabama: No session.

Arizona: A total appropriation of \$14,085 was made for library purposes in Arizona. Of this amount, \$4335 was appropriated to pay the deficit of the State Law Library for the years 1913 to 1915 inclusive. In addition \$12,000 was appropriated for extension division work at the State University. The appropriation act provided that the claims of all creditors against the library fund must be verified by the law librarian and the legislative reference librarian.

Arkansas: Arkansas added to the work of the Historical Commission the work usually performed by a separate legislative reference bureau. A branch department of the Historical Commission will collect all data, documents, and other material useful to legislators in their work. However, when they made the appropriation for the Historical Commission, they omitted the appropriation for the legislative reference department and the law establishing this department did not go into effect.

Arkansas did not report as to library appropriations.

California: In California, \$250,000 was appropriated for the support and maintenance of the State Library. In addition \$10,000 was appropriated for the salary of the state librarian. This was a decided increase. The salary of county librarians of the thirty-third class was raised to \$1800 per annum.

The county boards of education were authorized to adopt a list of books and supplies for district school libraries. However, no pupil can be required to purchase any of the said books.

A new law provided that no librarian

shall be employed for more than two hours a day in any high school unless holding a certificate in library craft granted according to the provisions of the California code, and then such a librarian ranks as a teacher and is entitled to all the benefits of public school teachers.

The clerks of all precincts were instructed to prepare an index for all registration books and supply the state librarian with such index.

Colorado: Session laws not available.

Connecticut: Connecticut appropriated \$119,700 for her State Library, in addition to a deficiency appropriation of \$13,000. An appropriation of \$10,000 was made to improve the Capitol grounds and the State Library grounds.

Delaware: Delaware appropriated for library purposes a total of \$8700 of which \$3200 went to the State Library Commission. The librarian was allowed \$500 for current incidental expenses.

The publication of all public archives was put in the hands of the state librarian who is to be held responsible for them, and who has authority to sell them.

Florida: A Florida State Museum was established at the State University at Gainesville, with authority to undertake a survey, make collections, and maintain a library of the natural history and resources of the state. The library and exhibits of the museum are open to the public. The board of control is given authority to make duplicate specimens for use as traveling exhibits. Direct management of the museum is put in the hands of a director who also must make an annual report to the board of control, and publish the activities and findings of the museum. The state board of control has charge of the expenditures in behalf of the newly organized work.

Georgia: Twenty thousand, two hundred dollars was appropriated for library purposes in Georgia. Of this, \$18,000 went to the State Library. Georgia also provided for the compiling, publishing, and reporting of all early state records and reports. The State Library was put in charge of the distribution of Park's "Annotated code of Georgia."

The Georgia extra session enacted no library legislation.

Idaho: Idaho appropriated \$14,875 for library purposes.

A State Law Library at Pocatello, Bannock county, was created, and the Supreme Court was authorized to expend \$5000 out of the State Library fund for the establishment and maintenance of this new library. The clerk of the District Court was made librarian, and the county of Bannock was to provide for the housing of the library. It was also provided that all fees received by the state of Idaho from notary publics and attorneys-at-law in fourteen counties of southern Idaho should go toward the "South Idaho Library Fund," and be expended under the direction of the Supreme Court.

The librarian of the Traveling Library was instructed to make a report to the legislature.

Illinois: Illinois appropriated \$115,437 for library purposes, \$69,600 of which went to the Legislative Reference Bureau, and \$2000 was appropriated to make up a past deficit.

The legislature provided that commission governed cities could establish and maintain libraries according to the general legal provisions for all cities.

The authorities in a park district may permit the erection of a library building in a park if the library is for public purposes, and if the people of the district by referendum express approval of the proposal.

Indiana: Indiana appropriated \$49,300 for library purposes. The Library Commission received \$12,500, and the State Library \$23,100.

In an act providing for the constitutional convention, the Bureau of Legislative Information was instructed to collect, compile, and to prepare all information and data which might be useful to the delegates at the convention and to the public. It was also instructed to print the state constitution, and an Indiana Year Book, which should include reports, facts, data, and statistics of the state, its people, resources, and government. In Indiana we have the novel situation of the state legislature

burdening the Bureau of Legislative Information with many more duties, and then providing that it should be abolished from and after Oct. 1, 1917. It could not possibly have finished its work.

Indiana passed an important law in reference to town and township libraries and the organization of public library boards. The library board is to be made up in the following way: Three residents of the city or town shall be appointed by the judge of the circuit court—one for one year, one for two years, and one for three years from the date of their appointment. After the first appointment all tenures shall be for a period of two years. If any township advisory board shall levy and collect a tax for library purposes, the total amount of which is greater than the amount collected by the town or city, and turn it into the city or town treasury where a library is located, then the judge in making his appointments thereafter may appoint people who are residents of such city or town or such township outside the city. The common council or town board and the board of school trustees each shall appoint one member to the library board. The board of school trustees may appoint from its own body. These appointees must be residents of the city or town. If the township advisory board levies and collects for library purposes a tax of five-tenths of one mill on each dollar of all taxable property assessed in the township, exclusive of the property of the city or town taxed for library purposes, and pays the same to the treasurer of the city or town where the library is located, then the township trustee shall *ex-officio* become a member of the library board, and he shall appoint one person, a resident of the township, as a member of the public library board. Women are eligible for the board, and not less than three members of the board shall be women. Those appointed shall be persons of well known integrity and ability, they shall be fitted for the work, and must be twenty-five years of age. All shall serve without compensation.

Indiana's county library law was the most important one passed during 1917. It provided for the establishment and main-

tenance of county libraries in counties in which there are no free public tax supported libraries in any city or town: for aid to be granted by the county to the library of any city or town in return for which the residents of the county are entitled to the use of the library and to representation on the board; for a combination of city, town, or township, and county libraries in which case the county library board shall control the city, town, or township library as a branch of the county library. The tax levy for the support of a county library is limited to not less than five-tenths of a mill nor more than one mill on each dollar of taxable property. The main provisions of the law are as follows:

Maintenance and Control: The county commissioners of any county upon petition of twenty-five resident freeholders of each township in the county, not already taxed for library purposes, may establish a county public library open and free to all inhabitants of the county, and may levy a tax for this purpose. Within five days after such tax is levied or such petition is filed with the clerk of the circuit court, the following bodies shall be notified by the clerk, and within ten days they shall make appointments to the library board. The county commissioners shall appoint two members for a term of one year—one of whom shall be a woman. The county superintendent of schools shall appoint two members for terms of two years—one of whom shall be a woman. The circuit court judge shall appoint three members, one for one year, one for two years, and one for three years. One of his appointments also shall be a woman.

Organization, Powers, Duties: The county library board shall have the control and disbursement of all public funds for library use, the custody of all books and property of every description, power to purchase books, periodicals, all necessary equipment and supplies, and direct all the affairs of such county public library. They are empowered to receive donations, bequests, and hold and convey realty and personal property for and on behalf of such library. They may make and enforce rules and

regulations, employ the necessary aid, and establish branches at their discretion. All county library money is held by the county treasurer as a separate fund, and is paid out on warrant of the board president, countersigned by the secretary. In any county where there is now a library fund, it now becomes available for library purposes.

County Aid to City Libraries: If the city board gives to the county commissioners notice of willingness to allow their library to be freely used by residents of the county on the condition that the county aid in its support, the county commissioners upon petition of twenty-five residents of each township may vote a tax of between one-tenth of one mill to one mill on each dollar of taxable property, and turn the same into the city library fund—to be continued as long as ten per cent. of the county inhabitants outside the city use the library, or otherwise at the discretion of the county commissioners.

Appointments and Qualifications of Board: If the county takes advantage of a city offer, it shall be represented on the public library board. The county commissioners shall appoint two members, one a woman, for a two year term, and the county superintendent of schools shall appoint two members, one a woman, and one for a one year term and one for three years. These persons are to have the same qualifications and equal authority with the other members of the library board.

Combination of City and County Libraries: If both exist within the county, the city board with the consent of the county board may pay to the county fund its income, and thereupon the county library board shall maintain the city or town library as a branch of the county library. Such library shall remain part of the county library as long as ten per cent of the inhabitants of the city or town shall be users of the county library thru such branch.

This is the most important county library law passed during the year. Indiana leads in library legislation for 1917.

Iowa: Iowa had no library legislation during 1917. She appropriated for library

purposes \$100,840, of which \$51,560 went to the state historical department.

Kansas: The only 1917 legislation affecting libraries was a law authorizing the erection of library buildings by cities of the second and third class.

The total appropriations in Kansas for library purposes were \$33,450. Of this sum \$19,550 went to the State Library, and the remainder to the State Historical Society Library.

Kentucky: Kentucky held a special session, but enacted no library legislation.

Louisiana: No session of the legislature was held in 1917.

Maine: Maine appropriated \$62,500 for libraries.

The most important act in regard to libraries was that authorizing the establishment of a Legislative Reference Bureau. The state librarian was instructed to establish in the State Library a Legislative Reference Bureau which shall collect, arrange, and place on file books, pamphlets, documents and other material relating to legislation, and which shall prepare abstracts of laws of other states and present such other information as may be necessary for the legislature in the performance of its duties.

Library Instruction: On application to the state librarian or the State Library Commission, the librarian or trustee of any free library may have instruction at the State Library or at their home library in cataloging and any other matter pertaining to the maintenance and administration of libraries.

Town Libraries: If the legal voters at a regularly called town meeting appropriate not less than one hundred dollars for the purchase of books, and provide for the care, custody, and distribution of its books, and those donated to it by the state, it is entitled to the following benefits. The Maine Library Commission shall donate to any town having no free public library books purchased for that purpose, not exceeding in value fifty per cent. of the books and documents purchased for the said town to found a free public library therein. The donation in no case shall exceed \$100.

Use of Adjoining Town Libraries: Any town may appropriate a sum of money, not exceeding the legal limit for maintaining free libraries, to secure for its inhabitants the free use of a library located in an adjoining town, and it shall be entitled to state aid of not less than seven nor more than ten per cent. of the amount so raised annually; provided that no town shall receive more than \$500.

The stipulation as to the amount to be assessed for the establishment of free public libraries by village corporations was eliminated. Formerly it was two dollars for each ratable poll within the village limits. The law now provides for the assessment of a corporate tax and the appropriation therefrom for the maintenance and annual increase of libraries a sum not to exceed one dollar for each ratable poll within the village limits for the preceding year.

Maryland: Maryland held a special session, but enacted no library legislation.

Massachusetts: Massachusetts appropriated \$53,040 for libraries in 1917. Nineteen thousand eight hundred and fifty dollars went to the Library Commission, and the remainder to the State Library.

Books for Soldiers: Massachusetts took the lead among states in providing books for soldiers. The public library commissioners were authorized to expend one thousand dollars per year until the end of the war in supplying books for the use of the United States army, the navy, national or home guard which may be located within the commonwealth. The commission may place the books in charge of a military officer or any other person or corporation and provide for their distribution and collection as it deems proper.

Michigan: Michigan appropriated \$10,000 each for the State Library, the Travelling Library, and the Board of Library Commissioners. Besides this, they provided for an annual appropriation of \$15,000 for the Michigan Historical Commission.

An amendment provided for the appointment of an assistant law librarian at a salary of \$1500. A person to be qualified must be an attorney-at-law legally ad-

mitted to the bar of the state. The state librarian was given authority to appoint an assistant to be put in charge of the legislative reference work at a salary of \$2500.

In each school district of the third class (population between twelve thousand and seventy thousand) the board of education was authorized to establish and maintain a library or art museum for the schools of the district if it deems it advisable. They also have power to appoint a board of library commissioners to govern such libraries or museums.

County Libraries: The 1917 session at Michigan authorized the creation of county libraries. In any county the board of supervisors are given the power to establish a public library free for the use of its inhabitants of such county or to contract for the use of a public library already established within the county to furnish library privileges to the people of the county according to the terms of the contract agreed upon. For these purposes an annual tax of not more than one half mill on the dollar may be levied. In case the county library is established, there shall be a library board consisting of five members, the county commissioner of schools and four other members to be appointed by the board of supervisors, the commissioner to hold ex-officio during his term of office, the other members to be appointed for four year terms, except that the first members are to be appointed for one, two, three, and four years respectively. In case the county contracts with an existing library, the board having control of such library shall administer the library fund, but there shall be an advisory board, consisting of three members, the county superintendent of schools and two additional members to be appointed by the board of supervisors for two year terms. The duty of the advisory board shall be to consult with the board administering the library fund in regard to the purchase of books, the location of branches and any other matter pertaining to the proper management of the county library and its fund. This was one of the important library laws of 1917.

Minnesota: Minnesota appropriated \$51,150 for libraries, of which \$25,000 went to the State Historical Society. The State Library received \$14,150.

The school board of any independent school district of the first class was authorized to establish library stations, and maintain them along with any other social center activities. They are empowered to levy a tax within such district for this purpose. If possible, the library station is to be maintained in a school building.

Mississippi: Mississippi held no session in 1917.

Missouri: Missouri's library legislation in 1917 was limited to appropriations. Her total appropriations for libraries approximate \$46,935. The Library Commission received \$18,160 and the State Historical Society \$16,840. Small deficiency appropriations were made for both of these institutions.

Montana: Montana appropriated \$38,800 for libraries. She provided for the preservation, collection, and publication of all historical facts on the early settlement of Montana, and appropriated \$9000 to carry out the provisions of the act. This is included in the total appropriation quoted above. The salary of the state historian was fixed at \$3000 per year, and that of his secretary at \$125 per month.

A new law provided that all moneys of the attorney's license tax fund, not expended or disbursed in the ways specified, should be turned into the law library fund to be used for the purchase of books and other library supplies. All expenditures must be approved by at least one justice of the supreme court.

Montana freely amended her county library law so that the main provisions are as follows: The county free library is to be under the general supervision of the Board of County Commissioners who are to make the necessary rules and regulations. It is the duty of the county librarian to build up and manage the library, establish branches, buy books and equipment, and take proper care of the library building. The county commissioners are authorized to audit and allow the necessary expenses and compensation for the

performance of these duties. All employees must pass a graded examination to determine their qualifications for the work. The county librarian is appointed by the Board of County Commissioners, and must be a graduate of a library school or have two years' experience in a library of more than two thousand volumes. After the creation and organization of the state board of library examiners, no one shall be eligible unless he receives a certificate of qualification from such board. Upon petition of at least twenty per cent. of the resident tax payers, the county commissioners shall appoint a public hearing for such petition, and at their discretion they may establish at the county seat a county free library.

Nebraska: Nebraska appropriated \$69,230 for libraries. The largest sum, \$16,500 went to the legislative reference bureau.

Nebraska granted to all library boards the right of eminent domain.

Nevada: Nevada appropriated \$36,000 for libraries. Provision was made for the printing of the papers of the Nevada Historical Society.

A large extension in the use of the State Library was made by the state. A new law provided that residents of the state may borrow books by writing in to the library by mail and having books sent to them prepaid, to be returned prepaid within four weeks. If the book is kept longer, a fine of ten cents a day will be levied, and if kept twenty days over time the privileges of the delinquent will be forfeited. Any school district may borrow twelve books at a time, and if any penalty is incurred, it is against the library fund of the district. Two thousand five hundred dollars was appropriated to carry out the provisions of this law. The state librarian is also instructed to prepare an author and subject catalog, and send it to all the school districts with a copy of the state library rules.

New Hampshire: New Hampshire appropriated \$36,060 for her state library.

The New Hampshire general library law was considerably amended by the 1917 legislature. The organization and func-

tions of the State Library were outlined in detail. The library is maintained for the use of the members of departments of state government and as a reference library for the use of citizens of the state. It is to be governed and controlled by a board of three trustees appointed by the governor of the state. They shall serve without compensation and no more than two of the trustees shall be of the same political faith. The trustees shall appoint a state librarian for a term of three years and specify the duties of the librarian. Legislative reference service is to be maintained by the State Library. The law provides for the exchange of publications, and the delivery to the State Library of all documents of public interest. The trustees are made custodians of the State Library building and the library property.

A board, consisting of four residents of the state and the state librarian, *ex officio*, is established under the name of the Public Library Commission of New Hampshire. Two members of the commission shall be appointed from each of the two leading political parties. The purpose of the commission is to aid in providing library instruction to librarians throughout the state, and to provide financial aid (not exceeding one hundred dollars) to towns wishing to establish a library, and to free public libraries whenever they conform to the provisions specified. The commission may establish travelling libraries to be loaned to schools, libraries, and literary associations that obey the rules and regulations. The commission shall make a biennial report to the governor.

The selectmen in each town must maintain a tax for the support of a library, and if the town has no library, the money so raised shall be held by the library trustees and allowed to accumulate until such time as the town may vote to establish a library. Unless a town obtained its library by bequest, a board of library trustees shall be elected at a duly called town meeting to govern the library. The board may consist of any number of persons divisible by three which the town may decide to elect. Penalty is provided for violation of any parts of the act.

New Jersey: New Jersey appropriated \$37,200 for libraries. Outside of appropriations there was no library legislation of any kind in New Jersey. Two minor bills were introduced but failed of passage.

New Mexico: New Mexico appropriated \$3400 for her State Library. The sale and conveyance of land occupied by the library building of the Woman's Board of Trade and Library Association for the nominal sum of fifty dollars was authorized.

New York: New York appropriated \$109,170 for the State Library, \$102,160 for the State Museum, \$22,820 for the Superior Court Law Libraries, \$20,470 for the Judicial Libraries of the Court of Appeals, and \$5000 for the Legislative Library. Besides these large sums, about \$75,000 more was appropriated for school libraries, departmental libraries, and district court libraries.

The law libraries of the Superior Court of New York and of the Court of Common Pleas of the city and county of New York were consolidated to form the Law Library of the Superior Court of the First District. The Supreme Court Library at Buffalo was put in charge of trustees who are appointed by the justices.

The city of Glen Cove was incorporated and empowered to form a public library district. The library is under the control of a board of trustees of five members—three appointed by the city council and two by the board of education. All the rights, powers, privileges, and obligations of the library are vested in the board of trustees. The library is entitled to all the benefits of the public library laws of New York. The trustees shall prepare an annual budget, and submit it to the mayor. If he disapproves of it, it must be resubmitted by a four to one vote and a new one presented. When it is finally approved, it is filed with the commissioner of finance, and the council will provide for the same. The library funds are appropriated by the council or received from any source, and disbursed by the trustees.

North Carolina: North Carolina raised the appropriation for the Historical Commission from six to seven thousand dollars, that of the legislative reference library

from five to six thousand dollars, and that for the travelling library from four to eight thousand dollars.

The county commissioners and the county board of education were authorized and empowered to co-operate with the trustees of any public or town library in counties where such exist in extending library service to the rural communities, and to appropriate out of the funds in their control an amount sufficient to pay the expenses of such extension.

Any city or town is authorized to make continuing appropriations to any library associations or corporations whose books are available to the residents without charge and according to the regulations of the associations or corporation which have been approved by the city. Such appropriation shall not exceed one-fortieth of one per cent of the taxable value of the city or town.

North Dakota: North Dakota had no legislation affecting libraries. Appropriations for library purposes amounted to \$38,726.

Ohio: Ohio passed no library legislation in 1917, the Marker bill providing county district library service being unexpectedly vetoed by the governor after having passed the General Assembly. Total appropriations for library purposes were \$155,464. Of this sum \$33,000 was appropriated for the Archaeological and Historical Society.

Oklahoma: Approximately \$48,000 was appropriated for library interests in Oklahoma. There was no further library legislation.

Oregon: Oregon appropriated \$72,500 for libraries in 1917. The State Library received \$40,000 of this sum.

In counties of fifty thousand population or more the county court was authorized to contract with any law library association or corporation owning and maintaining a law library convenient to the court house for use by the judges, the city commissioners, the district attorney, and all other attorneys duly admitted to practice law in Oregon.

Pennsylvania: Pennsylvania appropriated \$222,640 for libraries. The largest

amount, \$98,340 went to the State Library. In addition \$15,000 was appropriated to enable the Legislative Reference Bureau to continue the work of codifying the general laws of Pennsylvania.

Pennsylvania enacted an important general library law. Its chief provisions are as follows: Any municipality (includes county, city, borough, town, or township) may make appropriations to establish and maintain a free, public, non-sectarian library for the use of the residents. Such appropriation shall not exceed two mills on each dollar of taxable property. The municipal authorities may submit the question to the voters voluntarily or upon petition of three per cent. of the voters. The question of establishing an annual tax shall be voted upon at the same time. If by popular subscription a sum equal to or more than the two mill tax is raised, it shall be accepted for library purposes, provided that not more than two per cent. of the said sum is subscribed by one person or firm. The library fund and the maintenance and control of the library is in the hands of the board of library directors (between five and seven members) which is appointed by the municipal authorities. Two or more municipalities may unite in joint written agreement in maintaining a free library. A municipality may contract with any existing non-sectarian library for the free use of such library by the residents.

Whenever any county commissioners take advantage of this act, and levy a tax for library purposes, they must exempt from such a tax all property already taxed for the purpose of maintaining a free library, unless the municipality may wish to join with the county in the library project. The board of directors may establish branches, deposit stations, or traveling libraries, and the right of eminent domain is granted for library interests. Where a free library exists in a municipality, no new library shall be established, but all the library aid provided by this act shall be given to the existing library. If five per cent. of the voters petition the municipal authorities, the latter must submit to the voters the question of creating a bonded indebtedness for the

purpose of purchasing grounds or erecting library buildings.

All library property is exempt from taxation.

Rhode Island: Ninety-five thousand, one hundred dollars was appropriated for libraries in Rhode Island in 1917. The salary of the law librarian was increased from \$1600 to \$2400, and that of the state librarian from \$1600 to \$1800. This was all the library legislation in Rhode Island.

South Carolina: Twenty thousand nine hundred dollars was appropriated by South Carolina.

A special law was enacted providing for the establishment and maintenance of a library in the Rock Hill school district.

South Dakota: South Dakota appropriated \$36,600 for the support of libraries.

An important county library law was enacted during 1917. Upon petition of at least twenty per cent of the legal voters of the county, and signed in at least a majority of the taxing districts, the board of county commissioners at their discretion may establish a free library in such county. In that event the provisions of the law become effective.

If there is no free public library in such county suitable or available for use as a central library of a county system, the county commissioners shall appoint a board of county library trustees of five members, two of whom are to be women, who shall establish, regulate, and maintain a free public library. By August the first of each year, the county library trustees shall certify to the county commissioners an amount necessary for the maintenance and extension of the library, and thereupon the county commissioners shall levy a tax not to exceed one-half of one mill on each dollar of taxable property. This shall constitute the library fund. Any district which is maintaining a free public library by taxation shall be omitted from this levy.

In any county where there are free libraries, the board of county commissioners is empowered to take over the care and control upon terms agreed upon with the trustees of such library or libraries, and to contract for free service to all the residents of the county. The first contract shall run

for five years, and thereafter, if agreed upon, the contract shall run for a period of between five and ten years. If a joint agreement is not possible, the county commissioners shall proceed as hereinbefore provided.

Tennessee: Tennessee appropriated \$29,500 for libraries. The Law Library received four thousand dollars, the department of History and Archives three thousand six hundred, and the remainder went to the State Library and the Library Commission.

Texas: Texas appropriated \$42,760 for libraries in 1917.

Texas passed an act rewriting their county library law. The county commissioners have the power to establish and maintain county free libraries or to establish in co-operation with other free libraries a joint library for the use of the co-operating counties. The library shall be established for that part of the county lying outside incorporated territory having free libraries. Upon their own initiative or upon petition of one hundred signers the question of whether or not one is to be established will be put to the people.

No person shall be eligible to be county librarian unless he has received a certificate from the state board of library examiners, which shall consist of the university librarian and three other librarians. Such county libraries are to be supported by a tax not to exceed five-tenths of a mill on each dollar of taxable property. The county may co-operate with a city library or with an adjacent county if it is more practicable. Instead of establishing a separate free library, the county commissioners shall order an election to determine whether library privileges shall be obtained from existing libraries. Upon petition of five hundred residents in that part of the county voting to have a county free library, the county commissioners shall call an election to see if it shall be disestablished.

Utah: Utah's appropriations for libraries amounted to \$6000. The legislature recognized the Historical Society of Utah as a state institution. The said society shall hold all of its present and future collections of property for the state, and shall

maintain them in suitable rooms to be provided by the secretary of state or the board of regents of the state university. The society shall be the custodian of all records, documents, relics, and other material of historic value.

Vermont: Vermont appropriated \$25,000 for libraries. Of this sum the State Library received \$13,000.

The state librarian was authorized to employ and pay assistants, subject to the approval of the trustees. The salary of the librarian is to be determined by the trustees.

Virginia: Virginia held no legislative session in 1917.

Washington: Washington appropriated \$58,605 for libraries. The largest amount, \$28,400, went to the State Law Library. Outside of this, there was no library legislation.

West Virginia: West Virginia had two extraordinary sessions of her legislature in 1917. During the second special session, the following appropriations were made. A total appropriation of \$30,700 was made for libraries, of which the State Library received \$9000, and the Department of Archives and History \$9100.

Wisconsin: In Wisconsin the appropriation to the State Historical Society for general operation was increased from \$50,000 to \$52,000 annually. The appropriation to the State Library for general operation was increased from \$7125 to \$9200 annually; appropriation for books was increased from three to four thousand dollars for each of the next two fiscal years. This latter is not made a continuing appropriation. An emergency appropriation of \$6000 was made for the Legislative Reference Library, available in preparing for the legislative sessions and during their continuance.

The appropriation for the Free Library Commission, formerly a single lump sum, was divided into a fund for general operation and a fund for capital expenditure. The total amount is not changed.

The librarian of any library in a town, village, or city shall be notified by the local health officer of the appearance of any dangerous communicable disease. Library

books shall not be taken into a home where such disease exists, and shall not be returned to the library from such a home unless disinfected. Infected books shall be burned unless thoroly disinfected under the direction of the health officer.

In any county having a county library under the provisions of chapter 296 of the laws of 1913, the cost to the county shall be divided in proportion to the expenditure in each town, village, or city, and each such town, village, or city shall raise by tax and pay back to the county the amount so expended.

Wyoming: Eighteen thousand nine hundred dollars was appropriated for libraries in Wyoming. All public libraries become exempt from taxation.

This completes the library legislation in the states in 1917.

LIAUTARD VETERINARY LIBRARY OPENED IN NEW YORK CITY

THE opening of the Alexander Liautard Library at the New York State Veterinary College of New York University, 338 East Twenty-sixth street, New York City, on Dec. 5, has given to the city the use of what is claimed to rank as the most valuable veterinary collection of books, journals, pathological and anatomical specimens in this country. Dr. Liautard, who is now in Paris, has spent a lifetime collecting the books and specimens. Of the books there are some 3000 volumes in practically every tongue, those in the English language comprising every work of any note written on the subject. There are complete sets of current journals in French and German. The pathological and anatomical collection comprises several thousand specimens, which Dr. Liautard hopes may become the nucleus for a veterinary museum.

The library is not be confined to members of the New York University but is open to any member of the profession or any one interested in the study of comparative medicines. Books may be borrowed for two weeks at a time with the privilege of renewal, on the same basis as from the public libraries. The library is located on the second floor of the main building.

THE RURAL LIBRARY IN PRACTICE

BY H. N. W. MAGILL, of *Pleasant Valley, N. Y.*

ANY review of the work of the Pleasant Valley Free Library must be made in relation to the conditions existing in the community in which the library was established.

The village has less than 500 inhabitants. This population is largely composed of farmers who have retired from active work. These people during their whole life have had to be self-dependent in every way, and consequently it was difficult to get them to see *why* the use of a library should be *free*. One of our initial difficulties was to persuade those who had not joined the association to take advantage of library privileges.

The township has a population of 1,500 and covers 32 square miles. When we organized in 1903, feeling ambitious, and being ignorant of conditions, we selected the township as our field of action, but in a few years we had learned to concentrate our work on the village, devoting most of our efforts to cultivating the "library habit" in the school children, and trying to make the library popular.

Most of the farmers of the township live in a radius of two to five miles away from the village. There was no means of reaching them by a book wagon, and it was difficult to interest them, as they had not the reading habit—except in the case of some who had more than a district school experience. They had, to a man, lost faith in "book farming," for the simple reason that up to twenty or twenty-five years ago the farmer was finding by experience that most books on agricultural topics were not to be relied upon. To-day, of course, conditions are quite different. Thanks to Cornell and similar institutions, "book farming" is coming into its own.

Three years ago a well known farm paper went out of business, and the editor presented our library with nearly 300 volumes on farm topics, all of recent issue and by writers of acknowledged ability.

In our neighborhood there are at least a dozen men who have been to some agricultural school, with the result that they make frequent demands on the library.

In 1907 we had a Corn Exhibition in the local hall, under the direction of L. H. Bailey, and supervised by Prof. Warren, of Cornell. This was in the days before Corn Clubs, and was the first Corn Exhibition held in the state. It was thus an excellent advertisement of our library. The campaign began in the spring and the exhibition was held in the fall. Pessimists and doubters were numerous, but notwithstanding we had seventy-five exhibits of corn and sixty-four of potatoes.

We began business with 297 volumes, in a building 12 feet by 15 feet. In October, 1909, we laid the cornerstone for a new building. There were present about 200 citizens and 125 school children. The principal speaker was Lieutenant Governor Chanler. The stone was laid by a thirty-third degree Master Mason. In 1910 we moved into our new quarters, 24 feet by 40 feet, with an extension, 12 feet by 20 feet.

The figures of our circulation during these years are of interest as showing the effect of publicity. Up to 1908, when the campaign for the building fund was started, the circulation was less than 6000. That year it was 6190. In 1909, when the cornerstone was laid, it was 7659. In 1910, when the building was occupied, it rose to 8019. In 1911, the novelty still lasting, there was a circulation of 7162; while in 1912, the novelty having somewhat worn off, the normal figure of 6408 was reached.

The building has exceptionally good furniture; two oak tables, desk and six corner chairs. There are also six dozen camp chairs for use at lectures, etc. We have a fine lantern with special lens, and also a radiopticon.

There are from six to eight lectures each season. Some of the subjects have been: "Glaciers," "West Indies," "Boxer uprising," "Russia," all by people who had

*Read before the New York Library Association at Roscoe, Sept. 21, 1917.

actually been on the scene of their lecture. There have also been illustrated readings from Cooper, Longfellow, Dickens and Shakespeare by home talent. All lectures are free, but we have to compete with card parties. The average attendance is from sixty to seventy-five. A peculiar fact about the lectures is that local talent draws better than the best professor from Vassar College.

Classes have been conducted by the library in ancient history, English literature, stenography, mathematics, French and domestic science.

The following societies have been organized in the library: Junior Y. M. C. A., Y. W. C. A., Equal Suffrage League, Village Improvement Society, and Community Christmas Tree. In 1914 we made an effort to form a local history club. At the third meeting several gentlemen from Poughkeepsie attended, among them J. C. Sickley, of the Memorial Library there. At their earnest solicitation we extended our organization into the "Dutchess County Historical Society" which now has some 250 members, has issued two "Year Books" and one "Monograph," and in August of this year had a "pilgrimage" to a few of the historical sites, of which the county has many, with an attendance exceeding 200.

The daily weather map comes to the library, and is posted in the post office. We also use picture bulletins for birthdays—Washington, Lincoln, etc., and also for Arbor Day, Decoration Day, Fourth of July, etc. On Flag Day we exhibited a flag made in 1850, in the Brooklyn Navy Yard.

We have frequently borrowed from Pratt Institute pictures, bulletins and photos of celebrated paintings.

We loan twenty-five or thirty books at a time to two rural schools about four or five miles from the village, for supplementary reading, also bulletins, the teachers coming into the library to make their selection. These loans are made with the understanding that the fact that they are made by the library shall be impressed upon the scholars.

For three years we had school contests in recitations, offering gold and silver prizes, the trustees naming the authors. Prizes were awarded for two years to the scholar who wrote the best sketch of books read from the library, the course being two books a month for five months.

Last season we had one "story hour" a month, and one lecture a month in the afternoon, for school children. The subjects were Franklin, Washington, Lincoln, Coal, Brushmaking. The average attendance at school was sixty, at lectures, forty-five.

We use the State Traveling Library, having during last year as many as seventy-five volumes at one time. We also borrowed twenty-five or thirty volumes from Poughkeepsie, several from the New York Public Library, and twenty-seven from the State Library.

Our expenses average \$225 a year. This includes heat, light, interest, insurance and janitor service; all other service is volunteer. Our fixed income is \$100 a year from the village for five years. Food sales, entertainments, etc., provide the rest.

There are now some 4350 volumes in the library, and for several years past the circulation has exceeded 6000. We make a strong point of supplying any patron with the book or books asked for, being able to procure them either from Albany or Poughkeepsie within four days.

For several years we have maintained a branch at a small hamlet four miles from the library. Here we keep 100 books in circulation at a farm house where the neighbors have access to them at any time thru the courtesy of the farmer's wife.

The trustees have recently taken over the care of two triangular plots where formerly nothing but rubbish collected. One of these plots is in front of the library, and is known now as "Library square."

At the Dutchess County Fair of 1912, we had an exhibit consisting of bulletins, photographs of the building, charter, and traveling library. Attendants distributed to visitors "Goop" book-markers and a leaflet, "Don't be a quitter." The space occupied was 8 x 16 x 8.

We keep posters in two of the local grocery stores, the post office and railway station. They are home-made affairs, and are frequently changed.

These are some of the means we have found effective in what is of vital importance—keeping the library in the minds of the people.

* * *

SOME RESULTS

"By their fruits, ye shall know them," declares the Word. This short statement concerning the work of the Pleasant Valley Library is not an appreciation, the rather, a declaration of accomplishment by a friend of the institution.

As to visible results, the building with its complete and up-to-date equipment for all departments of library work is remarkable for a village of the size of Pleasant Valley. Furnace-heated in winter, with its beautiful fire-place for added warmth in extreme weather; electrically lighted and equipped for stereopticon work, ample shelving for its increasing number of volumes; furnished with folding chairs for lectures and meetings; tastefully fitted with necessary furniture and its walls adorned with good pictures, it is a credit to the generosity and labor of those who have helped to make the "library" in this direction a material asset to the village, an asset whose real value cannot be estimated.

It has encouraged the reading of the best books by older readers. It has furnished reference works for those who have turned hither to help them in their labors with hand, heart or mind. It has taught the children, with its close and sympathetic touch with the schools, to turn toward the real things of life, by directing and encouraging their reading in right directions.

By the addresses, lectures, readings and various gatherings it has kept the little village in touch with the world. Its many "bulletins," illustrated and otherwise, have brought before those who visit the building, the living topics of the times.

Perhaps the most noted result of these years of work is seen in the community spirit, which it has fostered. While not so advertised, it has been the one real

thing at work in this village toward that very end. When the use of the building has been asked for by any organization or group of people whose object was right and true, it has always been freely granted. Y. M. C. A., Y. W. C. A., Woman's Suffrage, Camp-Fire Girls, Red Cross, and other organizations have made use of the building and this community spirit therein declared. It is *the community center* of the village. The strongest testimony to this statement was seen in the gathering on Christmas Eve, 1916, when hundreds of people from far and near gathered to sing the old songs of Christmas, and to see the lights of the beautiful tree, as they sparkled across the snow in the frosty air of the "night before Christmas."

Nor must we pass by a certain civic pride, which has been engendered, tho perhaps unconsciously, in many of the people. The building itself, the flower-beds in front and below the bridge, have only been a part of the truly large work, for which the institution and its friends have labored with unceasing diligence.

And last, but not least, is its deserved reputation, not at all confined to the locality in which it finds its tasks and accomplishes its results.

LIBRARY PROGRESS IN RUSSIA

In a letter to the New York State Library School dated August 15, 1917, Mme. L. Haffkin-Hamburger writes: "Our library movement is rapidly progressing. We now have a number of new libraries. All the restrictions are abolished. The library courses (at the Shaniawsky University) had 217 students this year and during the five years of their existence the whole number of students was 1252. Lectures on library economy are now given in several cities. I have just lectured for a fortnight at Kharkoff. . . . The Russian Library Association at the end of the first year numbered 500 members. The association already has four branches."

Shaniawsky University has just issued a revised and enlarged edition of Mme. Hamburger's handbook for small libraries.

RECENT MOTION PICTURES DRAWN FROM STANDARD OR CURRENT LITERATURE

WE are printing below a list of recent photoplays based on standard and current literature, with the hope that the information contained therein may serve as a connecting link between the library and the motion picture theater, and enable librarians to be of assistance to motion picture patrons. Those believing in the social value of the motion picture look upon it as a means of lifting the desires of persons whose reading is confined largely to newspapers into a closer acquaintance with the printed literature of the world. This list, which is supplied by the National Board of Review of Motion Pictures, may serve as a point of contact, and will probably be supplemented by other lists in later issues.

Aladdin and His Wonderful Lamp, 8 reels. Fox.

One of the Fox series of dramatic pictures based on the world's famous folk tales. The original story is found in the Arabian Nights.

Bab's Diary, Bab's Burglar, Bab's Matinee Idol, each 5 reels, Paramount. Star—Marguerite Clark. By Mary Roberts Rinehart. Adaptations of the well-known "Sub-Deb" tales which appeared in the *Saturday Evening Post*.

Cinderella and the Magic Slipper, 4 reels, Wholesome.

A fine picturization of the well-known fairy tale.

Hansel and Gretel, 7 reels, Fox.

One of a series of dramatizations of well-known folk tales. It is based on one of Grimm's fairy tales and has become more widely known in this country thru the opera of the same name.

Stories by O. Henry: Hiding of Black Bill, The count and the wedding guest, The clarion call, The fifth wheel, The thing's the play, The last leaf, The Fourth in Salvador, Whistling Dick's Christmas stocking, Two renegades, Law and order, The enchanted kiss (2 reels each), and The Renaissance at Charleroi, The skylight room (each 4 reels), General Film Co.

For the past six months this company has been running an excellent series of screen interpretations of O. Henry stories ranging from 2 to 4 reels in length. Practically all of them are worthy of mention as being filled with the same wholesomeness and clear-cut interpretation of life as are found in the original short stories.

"K.," 7 reels, Universal. Star—True Boardman. By Mary Roberts Rinehart.

The story of a doctor who won his way thru his fine acts to the hearts of a small community where he was living incognito. It is based on Mrs. Rinehart's book of the same name.

Les Miserables, 12 reels, Fox. Star—William Farnum. By Victor Hugo.

One of the most important photoplays of the year 1917. Great care was taken to reproduce the spirit of the famous book on which it is based. Its dramatic quality is fine.

Madame du Barry, 6 reels, Fox. Star—Theda Bara.

A picturization of incidents in the life of Mme. Du Barry, who played an important part in the creation of conditions in France which led to the outbreak of the French Revolution.

Mother, 6 reels, McClure's. Star—Elizabeth Risdon.

Based on Eden Phillpott's novel of the English moors, "The mother of the man," it is particularly worthy for it was made on its native heath and all the rugged beauty of the region and the quaint character types of the book have been reproduced.

Stella Maris, 6 reels, Paramount. Star—Mary Pickford. By William J. Locke.

In this picturization of the well-known story Mary Pickford plays the rôles of both Stella Maris and Unity.

Thais, 7 reel, Goldwyn. Star—Mary Garden. Novel by Anatole France, opera by Massenet.

This picturization of the famous opera, including as its star the equally well-known impersonator of the chief character in the opera, has been done in lavish style, and illustrates the great progress which has been made in the production of photoplays.

The Door Between, 5 reels, Universal. Star—Monroe Salisbury.

Adapted from Samuel Merwin's "Anthony the Absolute." An interesting picturization of this book, excellently directed and well acted.

The Judgment House, 6 reels, Paramount. Star—Violet Heming. By Sir Gilbert Parker. Based on the novel of the same name.

The Little Princess, 5 reels, Paramount. Star—Mary Pickford. By Frances H. Burnett. Based on Mrs. Burnett's story "A little princess," re-worked from the better story "Sara Crewe."

The Man Without a Country, 6 reels, Universal. Star—Florence La Badie. By Edward Everett Hale.

A particularly good representation of the famous story by Dr. Hale.

The Naulahka, 8 reels, Pathé. Star—Doralina. By Rudyard Kipling. The scenes are laid in America and in India.

The Seven Swans, 5 reels, Paramount. Star—Marguerite Clark.

From the fairy tale of the same name. A fine creation of fairyland and undoubtedly one of the best things of its kind in which Marguerite Clark has starred.

Tom Sawyer, 5 reels, Paramount. Star—Jack Pickford. By Mark Twain.

The care with which the scenes from this famous boy's story have been filmed goes far to recreate the atmosphere of the account of Tom Sawyer's adventures. It follows very faithfully the dramatic incidents of the book which forms the subject.

THERE is one voice in books, and yet they teach not all men equally.—THOMAS A KEMPIS.

REPORT OF THE LIBRARIAN OF CONGRESS

IN his annual report for the fiscal year ending June 30, 1917, Dr. Herbert Putnam, the Librarian of Congress, has incorporated little new matter, in view of the fact that the economic situation requires mere administrative reports of Government establishments to be kept at a minimum.

The call for military service and the demands of newly established bureaus and commissions have caused numerous withdrawals from the staff—no fewer than forty having joined the colors since the first of January.

The war has naturally continued to keep down the number of accessions received from abroad thru purchase and international exchange. In spite of this, the net accessions last year comprised 85,948 books, 4280 maps, 25,501 music (volumes and pieces), 5040 prints—making the total contents of the library 2,537,922 books, 158,480 maps and charts, 795,749 music (volumes and pieces), 397,945 prints.

The collection of Whistleriana presented by Mr. and Mrs. Joseph Pennell, the authorized biographers of James McNeil Whistler, was the most important gift of the year. It includes not only all the books by and about Whistler, but a very complete representation of books in which Whistler is mentioned or his art discussed, as well as several hundred unpublished letters and manuscripts, the press cuttings and magazine clippings alone filling some sixty folio volumes. This collection is contained in fourteen cases stored in London until less risk will be entailed in its transfer to this country.

Total appropriations for the library and copyright office for 1917, including both salaries and care of building and grounds, were \$682,157.68, and the expenditures were \$676,714.20. Appropriations for 1918 are \$696,765 for the same purpose.

A serious loss to the library was sustained in the resignation of O. G. Sonneck, chief of the music division, who left the service on Sept. 5 (1917) to accept a position with the music-publishing house of G. Schirmer, in New York City. In his parting estimate of the music collection, the

retiring chief says that tho in certain fields it is inferior to the British Museum and to the institutions at Berlin, Vienna, Munich, Paris, and Brussels, it is surpassed as a general international collection perhaps by Berlin alone. When he took charge, in 1902, the collection contained about 250,000 compositions and a few thousand books, largely obtained thru copyright. Sympathizing with the purpose of building up in the library a music collection that should advance the cause of music in America, he laid a systematic plan, emphasizing particular sections during five-year periods. As a result of this plan the division now has an organic and well-balanced collection, which includes 740,000 musical compositions, 35,000 items in the literature of music, and 20,000 in musical instruction.

In the documents division the total number of volumes and pamphlets handled was 45,918, as compared with 53,123 in 1915-16. In addition, 884 maps and charts were received by official donation. The demands for the official publications of the various belligerent countries have been so great that the division practically conducted a reading room for research work.

In the law library the accessions were 5048, making a total of 180,608. Dr. Borchard completed the manuscript of his "Guide to the law and legal literature of Argentina, Brazil, and Chile," before his resignation, Nov. 1, 1916. The index was prepared by Miss Love of the division, and the publication sent to press. A subject index to foreign law accessions has been made currently for some time, and the books having printed cards made before the beginning of this catalog, are now being included. The index of comparative legislation was considerably developed, and the compilations and digests of law prepared for legislative reference use now constitute an important file for quick reference work.

The periodical division received 7712 current periodicals, including second copies from the copyright office and 927 deposited by the Smithsonian Institution. The total number of pieces received was 108,528 (less than in recent years because of the cessation of receipts from the Central Pow-

ers). Of the 882 newspapers received 792 are American and 90 foreign.

A noteworthy accession to the Hebrew collections was a group of 2300 items, mainly Hebrew and Yiddish literature, brought together by Ephraim Deinard, which forms part of a larger collection still detained in Palestine.

It may safely be said that the Library of Congress Chinese collection is the largest, most readily accessible, best cataloged, and most used of any in America. A greatly increased use of this collection during the past year by Government bureaus and Chinese investigators is reported. Ten native Chinese students have studied in the library, some of them for several months—one from Columbia University at work on his doctorate thesis. The Bureau of Plant Industry has drawn heavily on the collection in the preparation of abstracts and the translation of Chinese authorities on the varieties, uses, and geographical distribution of Chinese food plants. The library added 106 Tibetan works, most of which were printed in Peking. These supplement the collection secured thru the late W. W. Rockhill, ambassador to China, and, together with the monumental "Kanjur," now constitute a good working library of books in the Tibetan language.

The number of volumes cataloged was 105,305, of which 80,277 were new accessions and 25,028 recataloged. Besides continuing the recataloging of English, German, and Italian literature, Scandinavian literature was taken up. Danish and Norwegian were completed and about half the Swedish literature done. Preparation of the Library of Congress contribution to the union list of incunabula in American libraries is in progress. The number of volumes classified was 100,325, and the number shelflisted 89,560.

The number of subscribers to the printed cards increased from 2370 to 2559. The cash sale of cards, including subscriptions to proofsheets, amounted to \$69,587.78. Cards for about 38,000 different titles were added to the stock during the year, the whole number represented being approximately 735,000.

A most successful publication was a man-

ual on "The United States at war," describing particularly the many organizations for war-time service national in scope.

Of the estimated 15,000 readers of raised type in the United States, the Library of Congress serves about four per cent. In June the American Association of Workers for the Blind unanimously voted to adopt a form of revised English Braille for universal use, and printing presses, schools and libraries are urged to adopt the type as soon as details are formulated.

The report of the legislative reference service is divided into three parts. The first relates to the work of the service as a whole, and contains comparative statistical tables for the past three years, showing the general disposition of inquiries received from members of Congress. The second part relates to the work done under the supervision of the administrative assistant, and gives a résumé under subject headings, alphabetically arranged, of the more important inquiries involving economic, statistical, and historical questions; the third part deals with legal inquiries, for which material was prepared under the direction of the law librarian.

The report of the copyright office shows receipts from fees amounting to \$110,077.40, while the total expenses, including \$4680 chargeable to arrears, were \$104,767.20. The total number of deposits received, including duplicates, was 195,627, and the total number of registrations 111,438. During the past twenty years the total number of entries was 2,162,979; of articles deposited 3,838,483; fees received and applied \$1,759,853.55; expenditure for service \$1,512,795.84; and net receipts above expenses for service \$245,998.40. In the 46 years of the existence of the copyright work as a function of the Library of Congress the total number of entries has been 3,043,835.

A TRADE journal exhibition, showing about a thousand different publications, is now in progress at the Newark Public Library. The collection is based on that prepared by Miss Hasse for the A. L. A. conference at Louisville last June. The exhibition closes Feb. 12.

A LIST OF BOOKS BY AMERICAN TWENTIETH-CENTURY POETS

THE annual list of twentieth century poets of America, selected by a committee of the Poetry Society of America, is herewith presented. The selection is by no means designed to be definitive but is intended to represent what the average reader should become acquainted with if he wishes to know what is happening in the world poetic. At the present time the papers and periodicals are the best touchstone for the poetic mood of the country—things fall out of date in so very short a time. Nevertheless, the volumes of the year contain many poems that have sprung out of the year's immediate necessity and these register the mind and heart of our people in the midst of the great crisis. The long range and the wider hope are, however, not pictured this year—we are occupied to the full with the present need. The poets are doing a glorious bit to keep the morale of the country up to the line.

The committee constantly meet the difficulty of the frequently obscure printing of volumes of value. They would be grateful therefore for suggestions from any source. Address the chairman of the committee, Mrs. Martha Foote Crow, 30 East 128th street, New York City.

Adams, Franklyn P. Weight and measures. Doubleday.
 Bradley, William Aspenwall. Garlands and wayfarings. Mosher.
 Brown, Alice. The road to Castalay. New and enlarged edition. Macmillan.

A GROUP OF ANTHOLOGIES

Braithwaite, W. S. Anthology of magazine verse for 1917. Gomme.
 Clarke, G. H. Treasury of war poetry. Houghton.
 Crow, Martha Foote. Christ in the poetry of to-day: an anthology from American poets. The Woman's Press (Y. W. C. A.).
 Cunliffe, J. W. Poems of the Great War. Macmillan.
 Hagedorn, Herman. Fifes and drums by the Vigilantes. Doran.
 Haynes, W., and Harrison, J. L. Campfire verse. Duffield.
 Some imagist poets: 1917. Houghton.
 Teasdale, Sara. The answering voice: an anthology of love poetry by women. Houghton.
 Wattles, Willard. Sunflowers: a book of Kansas verse. McClurg.
 Wilkinson, Marguerite. Golden songs of the Golden State. McClurg.

THE COLLECTION OF BOOKS FOR TROOPS IN INDIA

THE collection of books for the use of troops at the front and in hospital is not confined to Europe and America. Since the latter part of 1915 the Women's Branch of the Bombay Presidency War and Relief Fund, with its depot in Bombay, has been collecting reading material for the use of men in the army.

Up to the spring of 1917, when a report of work was prepared for printing in the *Library Miscellany*, about 11,000 books had been forwarded from this depot. Of these all except about 650 had been donated by the public. These were sent to hospital ships and transports and troop-trains.

English papers and magazines, especially illustrated papers, are also gladly received. Bundles of them are sent twice a week to five local hospitals and at regular intervals to posts up-country.

The depot also has a newspaper room, where papers published in India are made up into parcels and sent off every week to the front. This work has been so well organized that every unit at the front is pretty sure of getting a bundle of papers in every mail. In fourteen months 176,682 papers were so forwarded. The public is urged to save its papers, bringing them in regularly once a week, but the number so furnished is entirely inadequate, and the Women's Branch is spending 1200 rupees a month on papers alone.

LIBRARIES IN ALASKA

At the annual meeting of the Pacific Northwest Library Association, in Portland, Ore., in September, the committee on libraries for Alaska presented the following report:

This committee was appointed in April, 1917, by the president, Cornelia Marvin, acting under authority given at the last annual meeting. The personnel of the committee is as follows: Lucia Haley, librarian, Public Library, La Grande, Ore.; John B. Kaiser, librarian, Public Library, Tacoma, Wash.; J. T. Jennings, librarian, Seattle Public Library, chairman.

This report is merely a report of progress, as no definite results have been achieved. It seemed to your committee that the first thing to do was to gather information regarding the distribution of population and the present library facilities in Alaska.

Taking first the population, the 1910 Federal Census credits Alaska with a population of 64,356, of whom 36,400 were white, 25,331 were Indians, and the remaining 2635 were Chinese, Japanese, Negro, and other. The Federal Census Bureau estimate for 1916 gives the total as 64,834, showing a very slight increase.

There were in 1910 eleven incorporated towns as follows:

<i>Town</i>	<i>Population</i>
Cordova	1152
Douglas	1722
Fairbanks	3541
Juneau	1644
Ketchikan	1613
Nome	2600
Petersburg	585
Skagway	872
Treadwell	1222
Valdez	810
Wrangell	743
Total	16,504

Only one-fourth of the population then is in the eleven towns. Less than sixty per cent of the total population is white. Skagway shows a drop in population from 3177 in 1900 to 872 in 1910, while Nome dropped from 12,488 to 2600 in the same period.

Our next effort was to make a hasty

survey of the present library facilities in Alaska.

In a search thru the library literature the following item was discovered in the LIBRARY JOURNAL for January, 1906. This is from a report of a meeting of the League of Library Commissions at Indianapolis on Dec. 13, 1906:

The business transacted at the meeting included the passage of a resolution urging the library commissions represented in the League to ask their senators and congressmen to cooperate with the Governor of Alaska in taking the necessary steps to secure for Alaska a library commission whose first efforts should be directed toward establishing a system of traveling libraries.

Correspondence conducted by Miss Haley with Miss Alice Tyler and Mr. Henry Sanborn, officers of the League of Library Commissions, would indicate that nothing ever came of this resolution.

At the Portland Library conference in 1905, speaking of libraries in the Northwest, C. W. Smith said, "Alaska, I believe, has none."

From the Alaska Bureau of the Seattle Chamber of Commerce, from the Alaska-Yukon directory, and from other sources we have secured the following items:

Anchorage—A part of lot 5 seems to have been reserved by the government for library purposes.

Cordova—There is some kind of a library at the Red Dragon club house.

Douglas—The Treadwell club has a library.

Fairbanks—There is a Christian Science Reading Room; also the Geo. C. Thomas Memorial Library endowed by Episcopal Church, Mrs. J. A. Cambridge, librarian. Contributors are allowed books according to the amount of their subscriptions.

Juneau—Alaska Historical Library and Museum. As far as practical use is concerned the Alaska Historical Library and Museum is a name only for the reason that the collection of books, maps, pamphlets, and ethnological and other objects, the accumulations of many years, are not wholly available for public use. This library is first mentioned in a law of June 6, 1900, which states that fees for legal certificates collected by secretary of the dis-

tract shall be kept in a fund known as "district historical library fund" and shall be spent on order of the governor, to establish "district historical library and museum"; this institution shall embrace all laws, papers, etc., published in the district and all historical material in general as well as curios, native relics, etc. It is a designated depository for United States documents. The expenditures from this fund during the year 1914-15 were only \$689.05. On June 30, 1916, the fund had on hand \$10,205.94.

Ever since 1910 efforts have been made by Representative Wickersham and others to secure an appropriation for a federal building in Juneau. So far as we have been able to ascertain these efforts have not yet been successful. This building if secured would house the Alaska Historical Library and Museum and would enable them to make their collections available to the public.

In a letter to Miss Marvin Governor Strong says:

The Alaska Historical Library and Museum is a Territorial institution located at Juneau, the capital. This library contains a large and varied assortment of books, etc., but we have not as yet any library building such as is needed to make them available for public use. As you have noted in the report of the Secretary of the Interior, for 1915, the need of such building is pressing, inasmuch as, if we had such building, constant additions could be made to the library shelves. I am hopeful that a library building will be constructed in the near future.

At Juneau there is also a Public Library of which Margaret D. Green is librarian. This library was started by the Draper Club in 1914. It was taken over by the city in August, 1916. The city appropriation for 1917 was \$2100. There are 2600 volumes and the circulation in 1916 is reported as 70,906. This circulation seems almost incredible since it would mean according to the federal census 43 loans per inhabitant. However, the federal census credits Juneau with only 1644 persons while Miss Green, the librarian, claims 4000 souls. Even so the circulation would be more than 17 per inhabitant, a very remarkable record.

Ketchikan—There is a Public Library of 2000 volumes in addition to their reference books and government documents. This is maintained mostly by the ladies of Ketchikan, tho the city treasurer records disbursements of \$330. Mrs. Julia Thompson is librarian.

Nome—The Arctic Brotherhood has a library and there is also an institution called the St. Joseph's Library Club.

Seward—According to vol. 40 of the LIBRARY JOURNAL, page 289, Robert Ashland offered four lots for a site for the public library which Mrs. J. B. Harriman proposed to give to the city.

Valdez—There is some kind of a public library.

Wainwright—The LIBRARY JOURNAL for March, 1916, p. 211, gives a short article about a "school and village library" at Wainwright and "library books sent last summer" to school at Igloo, Seward Peninsula.

The Seattle Public Library has for several years been sending partly worn books to various places in Alaska. Miss Gracie, who has charge of this work, gives me the following list of places: Anchorage, Chichagof, Council, Nome (Arctic Brotherhood), Katalla, Petersburg, U. S. Educational Bureau (St. Paul, Pribilof Islands), Unalaska. Also many books were sent to U. S. Coast Guard and U. S. Revenue Cutter Service. These books are left at small places in Alaska on the return trip. We are unable to supply the demands that come from Alaska begging us to send them our worn-out books.

These brief notes are very incomplete and unsatisfactory, but they are sufficient to show that the present library facilities in Alaska are very inadequate.

Other evidences of that fact are numerous and strong. In a letter dated May 24, 1917, to the chairman of this committee, Miss Green of the Juneau Library says:

Mr. Thomas spoke of your plan for traveling libraries in Alaska. It does seem that something should be done in that respect. Many pathetic stories have been told me by prospectors who had no reading matter and no place accessible to which they could send for literature of any kind. One member of the Legislature told me of his difficulty in

getting anything to read when in camp, and how much he appreciated any scrap of paper with reading matter on it. The long winter nights here make reading more than a necessity, than a pleasure. It is a vocation. If I can help you in any way in this matter I hope you will call upon me.

In an earlier letter sent to Miss Martin, Miss Green said:

Our library's ability for extension work outside of Juneau is very limited at present. The best we can do is to send newspapers and magazines to camps in South Eastern Alaska. There is a wide field for this branch of library work here. As soon as we are able, it is our intention to establish a traveling library. Any suggestions or help you can give us will be appreciated.

There is a library in Ketchikan, one in Fairbanks, and a private one at Thane and Treadwell. In Juneau, aside from the Juneau Public Library there is a court library and the Historical Library connected with the Governor's office.

Miss Marvin states that "many teachers have gone to Alaska who have previously borrowed books from our State Library in Oregon, and we have occasionally sent them books after they have gone to Alaska, but we have heard from them of the great need."

I also wish to quote from a letter recently received from the superintendent of schools at Anchorage where we sent discarded books:

Mr. J. T. Jennings, Librarian,
Seattle, Washington.

Dear Sir: The boxes of books shipped by you have been received and placed on the shelves in the assembly room of the Anchorage High School. We desire to thank you in a few well-chosen words for your kindness but the trouble is we don't know what words to choose. Immediately after installing the books there was a general run on the librarian and now the cupboard is bare. Wish you could send us some more. We shall always think very kindly of the Seattle Public Library and its librarian. If it were permitted you to see the smile on the youngsters' faces as they get their books you would feel right glad about it I am sure. With all good wishes,

Yours very truly,
(Signed) C. H. SHEETS,
Supt. Anchorage Schools.

In the opinion of your committee, what Alaska needs first of all is legislation that

will firmly establish its present territorial library (at Juneau), place it in the hands of a competent librarian, and give it an appropriation sufficient to make its resources available to the public and to start a traveling library system in Alaska.

Whether such legislation should be secured thru the federal Congress or thru the territorial legislature is a point that we have endeavored to ascertain. We believe that the library maintenance appropriation and the library law would properly originate in and be passed by the territorial legislature while a federal building to house the library and other departments would be provided by an appropriation by Congress. In response to our request for information on this point the following letter was received from Hon. Charles A. Sulzer, Congressional delegate from Alaska:

Thank you for your letter of August 18, which has received my careful attention. I am in hearty sympathy with such a measure as you suggest, for the people of Alaska have too few library facilities as it is. Those that we have, have been carried out thru the public spirit of loyal citizens, and have been upheld largely thru private donations.

I think it would be advisable for this law to originate in the territorial legislature, for it is a matter affecting the people of the Territory and should originate in their own legislative body. The next session of the legislature meets in 1919, by which time matters could be pretty well organized for pushing such a law thru.

Thanking you for your interest in this matter and with best wishes for its success, I beg to remain,

Sincerely,
(Signed) CHAS. A. SULZER,
Delegate from Alaska.

Governor Strong does not seem to think that the traveling library is feasible in Alaska. In a letter to Miss Marvin, dated May 16, 1917, Governor Strong says:

In view of the vast extent of this territory and the great distances between the various towns and settlements, together with the lack of adequate transportation facilities in many instances, I do not believe that traveling libraries, such as are found in a number of the States, would be practicable. The expense entailed, in my opinion, would render the maintenance of such a system impossible.

We think that Governor Strong probably does not understand how traveling

libraries are operated. It seems to us that where men can go and supplies can be transported, books may be taken. The libraries would necessarily be small, and the cases light, and changes infrequent. The population of the territory is unduly scattered, its towns are few and small, and three-fourths of the people live outside of these small towns.

How are they to have access to books unless thru traveling libraries? The ordinary system of traveling libraries might need changing to fit Alaska's needs. Small package libraries sent by book post might be the solution and all postmasters might be drafted into the service to act as branch librarians. Some plan could certainly be devised.

Regarding Governor Strong's objection to the traveling library as not feasible, Herbert Killam, head of Traveling Libraries, British Columbia, writes:

I can quite understand Governor Strong's doubts regarding the feasibility of a traveling library system in Alaska, but think that in spite of the great distances and inadequate transportation facilities something might be done. In this province we have the same obstacles, but overcome them to some extent. When the distance is great, and transportation expenses heavy, I have made the packing boxes as light as possible consistent with strength, and as small as possible. Then, sometimes, we find that individuals or companies will carry boxes some distance without any charge. This happens up-country when the big ranchers send down-country semi-annually or quarterly for their supplies. Then again, there are places, such as Atlin, where we ship only once a year. To tell the truth, I sometimes grudge the large amounts for freight which come out of my appropriation. But I am certain that Alaska could, with a Territorial Library as headquarters, do a great deal toward a satisfactory system of traveling libraries.

We would recommend that a new committee be appointed to carry on this work. Miss Marvin and Mr. Killam, who are familiar with present conditions, should be members, and the committee should include in its membership some man or woman who has traveled extensively in Alaska and who is familiar with its geography and its postal and transportation facilities.

EASTERN COLLEGE LIBRARIANS

THE annual meeting of the Eastern College Librarians held at Columbia University Saturday, Dec. 1, was opened by Provost Carpenter, the acting librarian, who spoke of his ever increasing realization of library problems, commenting that those of each large library are to some extent its own. Touching on the problems created by the war he told of the restrictions which Columbia had thought best to put upon the lending of books likely to be impossible of replacement, citing particularly German chemical and engineering works, and Belgian and Polish books, the latter probably to a large extent wiped out by the devastation of their respective countries.

Frederick C. Hicks, secretary of the association, then took the chair and introduced Professor Shotwell, who gave an account of the war work of historians. At first there was apparently no need for their special training, then began desultory writing of letters to the papers, next came a call thru the Carnegie Institution for co-ordination and organized work, followed by a conference in Washington, of which the National Board of Historical Service, formed in May, was the outcome. Over and above the presentation of historical background for a study of the war, Prof. Shotwell attributed the creation of the board to the need for collection of material for the future. The first move in this direction has been the compilation of a manual bearing upon the problem, which is nearly ready for publication. Professor Shotwell invited librarians to urge the board to finish this work, to show their interest in the problems of collecting, and to help co-ordinate the efforts to collect. He thought it time for colleges to realize that they should be centers of social forces, and that they should collect material for the student of local history. In this connection he mentioned the invaluable contemporary material of the French Revolution which had seemed of so little value when it could be obtained. He urged that pressure be brought to bear to secure some way for rendering permanent transitory materials, by photography and other methods that could be worked out. Guides and bulletins

have largely failed to reach the student and perhaps also the casual reader, and here he suggested a field for co-operation between the librarian and the specialist to get out lists with comments, sorting them out, and shortening the lists. The History Board has already prepared one or more lists of the sort. A bibliography submitted to the Bureau of Education has been declined because it seemed to favor certain publishers, but its publication is being considered by the Library of Congress. Guides to current material in the magazines are important, as some of the most significant contributions have appeared there, and the board has arranged a topical guide which will soon appear, a mimeographed copy being already obtainable from the Library of Congress.

Dr. Richardson, in opening the discussion, stated his opinion that it might happen that the setting right of historical questions might easily be the determining factor in the whole future of the world, of greater significance than all the armies. He also noted the progress of photographic processes, and the possibility of inter-library lending as opposed to too extensive collecting, and suggested that the librarians digest the information from out-of-the-way periodicals, etc., so that it would be at the service of the historian, and suggested also that the board make recommendations to the librarians.

Professor Shotwell in responding acknowledged the importance of having material gathered in strategic centers, and added that a college might perhaps specialize in some "line of work that is of rather peculiar interest, not justified on logical grounds." He emphasized again his protest against the idea that the study of social data should cease with the war.

Mr. Tyson, the alumni secretary of Columbia, told of the work of his office in attempting to follow the war work of Columbia graduates, and Dr. Koopman mentioned that of Brown University, where especial emphasis is being put upon service other than military, a phase which was entirely ignored in the compilation of the Civil War records. Local history, he said, was being left entirely to the Rhode Island

Historical Society, which was making a very exhaustive collection.

Miss Greenhalgh opened the discussion of matters financial with a detailed description of the accounting system of Columbia University Library. In the discussion of the budget which followed, Princeton was the only library which reported an actual reduction of funds, tho the increased costs had somewhat the same effect on all the others reported. Mr. Keogh said that the library at Yale had borrowed to make up in part for the great reduction in the tuition fees, a stated per cent. of which go to the library budget. Provost Carpenter reported some extra funds at Columbia, for Chinese literature, International law, etc. He also noted that the library had in the case of the members of its staff who had enlisted, made up to them the difference between their pay and their library salary, as had the university in the cases of all employes.

Mr. Barr opened the afternoon session with a report on the vacation and sick leave regulations at Yale; 26 working days vacation for all who had been in the employ of the library for a year, proportionally for those who had been there over six months but less than a year. Sick leave of two weeks was granted, more extended leave given on the merits of the individual case. The question of increased vacations, without pay, was discussed, with the very obvious conclusion that the library usually paid indirectly for them, in eleven months' pay for ten months work, the employment of outside people who were less familiar with work, etc. Dr. Estes of Colgate allows fifty-two days a year, two weeks at Christmas, and one at Easter, with occasional days off, and the remainder as a summer vacation. Mr. Raney spoke of a scheme which seemed to be working itself out at Johns Hopkins of giving double vacation in sabbatical years. He also mentioned half-day work during the months of July and August. The question of Jewish holidays was referred to by Mr. Bowker as being a problem peculiar to New York.

The cost of binding was discussed by Mr. Green who quoted comparisons of costs: thread \$2 a pound instead of \$1.30; glue advanced from 13 to 25 cents. paper from

4¾ to 10 cents a pound, and other materials in proportion. This has led the Massachusetts Agricultural College Library to bind two or three volumes of a periodical in one cover, and to the substitution of "stabbed" for complete binding in the case of thinner books. Princeton reported newspapers sewed and temporarily covered with red cloth, minus boards, at a cost of 50 cents each. Mr. Bliss urged the greater economy of flexibly bound books, and the advantage of a careful opening of new books.

In his report as secretary of the A. L. A. committee on the importation of books, Mr. Raney had a tale of official red tape that was far more entertaining in the telling than it could have been in actual experience. The full report was printed in the LIBRARY JOURNAL for January (p. 30-31). In answer to questions, Mr. Raney said that the dealings of the agent will be with the government, which transmits the order to Germany, the agent to be paid upon delivery of the material.

A resolution, copied from that of the Association of American Universities, was passed, declaring, on the part of the Eastern College Librarians, their support of efforts to secure license for the importation of publications from enemy countries or countries allied with the enemy, only so far as such action assists important work of research and is consistent with the safety of the United States or the successful prosecution of the war.

Miss Reed of Vassar discussed the special training of staff members for university and college libraries, with a view also to their ranking in the institution where the library is "not an administrative office but an organic teaching unit." A university demands at A.B. of all instructors, and she felt that it was only right that the library should do likewise with its staff. The college library teaches by means of its collection and selection of books, by classification and by its catalog, as well as by the teaching of the reference librarian. It can do little without the co-operation of the professors, therefore there is the need of common educational background. Library schools, she felt, fail in too exclusive attention to technical methods, apart from

general ideas: *e. g.* book selection needs adequate critical theory. Library workers should be specialists in order to be an integral part of the university life; they must deal with specialists and need to know their point of view. She suggested the possibility of a year of graduate work rather than the second year of the library schools, or the substitution of graduate courses for technical.

Miss Borden, also of Vassar, took up the question whether a knowledge of books and libraries should be required for entrance to college. She felt that college catalogs might offer suggestions as to desirable preparation of students in the use of catalogs and bibliographical tools, before entering college.

Dr. Koopman considered that Miss Reed's paper opened the most important subject ever brought before this group, and urged that it be the principal one for the next meeting.

Mr. Reece of the New York Public Library School spoke of the tendency of the schools at Albany and at Wisconsin to specialize in the social sciences. Advanced courses, he said, were accepted by some of the schools in lieu of the technical work, but he felt that until the library offered opportunities commensurate with other branches of specialization there would be little likelihood of getting specialists to go into it. Positions have not seemed sure enough for the specialist. Mr. Stevens of Pratt Institute said that their school was a starting point only, and could not attempt to give university work.

Dr. Koopman suggested the requirement of college courses for library school students fitting for college positions.

Mr. Keogh felt that the technical training was a question for library schools, and that the library should have specialists for classification and assigning of subject headings. This brought up a discussion of the provision for advanced study offered to library assistants. Columbia and Yale each give half the time spent in the classroom for one course. Columbia requires no tuition, and Yale, since the University has required it, pays it for the assistant.

VIEWS FROM CAMP
LEWIS LIBRARY, AMER-
ICAN LAKE, WASH.

A TOUCH OF HOME BY
THE OPEN FIRE

WASTEFUL DUPLICATION IN CATALOGING

WITH the Library of Congress ready to supply analytical cards for over 3000 series and collections and the A. L. A. Publishing Board attempting to cover nearly 250 more, it would seem that the most pressing demands for such catalog entries, not only by American, but also by foreign libraries using standard sized cards, have been met. Nevertheless, the large libraries, particularly those engaged in recataloging their collections, and also small institutions desiring to analyze quite closely, are still occasionally confronted by important series of monographs and other composite collections not yet touched by any agency.

The undersigned ventures in this connection to address a plea to institutions which print, multigraph, or otherwise manifold their catalog entries so as to permit of their distribution to other libraries, that on analyzing a set, series, or other publication likely to be of general interest, they advertise this fact, either by sending out circulars or by inserting notices in the A. L. A. *Bulletin* and the library periodicals. The notice should contain the necessary information in regard to the publication or publications covered, the number of entries and an estimate of the cost of a full set of cards. It is perhaps unnecessary to point out that care should be taken not to duplicate entries already available, or in process of preparation by institutions engaged in distribution of catalog cards, particularly the Library of Congress, the A. L. A. Publishing Board, and the John Crerar Library.

Should a library decide to make its analytical entries available after the manner here indicated and see its way clear to provide, in addition to the number of entries required for its own use and to fill orders received up to the time of printing, a small stock in anticipation of future orders, so much the better.

There is not likely to be any financial profit to speak of in the sale of these cards. The saving to any given institution would be an indirect one, resulting from the increased number of analytical entries obtainable thru extension of the present co-operative system.

To continue, especially under present conditions, the wasteful duplication of cataloging which still persists in spite of years of missionary effort on the part of the A. L. A. and the Library of Congress, when a little good-will and foresight, with perhaps a slight initial expense for administration, would eliminate a large part of the waste, seems almost criminal. One might almost be justified in labeling it as sabotage.

It goes without saying that one condition of successful and efficient participation in the co-operation here referred to, would be an ability to follow and abide by standard cataloging practice as accepted by most of the leading libraries of America and the British Empire, and as laid down in the Cataloging Rules of 1908, the A. L. A. and the Library of Congress lists of subject headings.

J. C. M. HANSON.

* * *

To Mr. Hanson's practical suggestion we append the following letter of endorsement from Mr. Bishop of the University of Michigan Library:

Mr. Hanson has kindly shown me his note about analytical cards. I trust this may meet with a favorable and immediate response. There are in every library of any size certain important sets which have not been analyzed by means of printed or multigraphed cards. If each of the libraries not printing cards at present would analyze one of these sets and multigraph the entries so that they could be sold and used in the catalogs of other libraries, we should at once have available an extremely valuable contribution to practical bibliography.

It seems almost incredible that any library which undertakes to analyze a set of any length at the present time should not be willing to place its product in the way of analytical cards at the disposal of other libraries. A mere notice that such a set had been analyzed and that cards could be had at a given price, would at once result in a large number of orders. The University of Michigan General Library will buy without hesitation such analytical cards for any set in its possession, or which it is likely to acquire in the near future. I presume that there are numerous other libraries which will do the same thing. I suppose that every one of the library papers, and certainly the *Bulletin* of the American Library Association, will be glad to give publicity to the announcement of analytical cards for sale or exchange.

LIBRARY WAR SERVICE

INTENSIVE BOOK CAMPAIGN PLANNED

Books, books, books! The steady, continuing appeal for books and the collection of them must go on and not await the intensive book campaign which will take place probably about the last week of March. It cannot well come earlier without conflicting with other national campaigns, which would be unfortunate. The need for books for immediate use remains.

They Signal “SEND BOOKS”

Good Books left at The Public Library will be sent “Over There” and to Our Men in Camp Everywhere

Every camp in the country has made extensive and urgent requests for books on military science, engineering, electricity, mechanical books, history, travel, poetry, war narratives, aviation, and other topics connected with the war itself. Most of these have had to be purchased, as gift books have been largely fiction. If the giving of these books, as well as good up-to-date textbooks in science, English, and mathematics, could be stimulated, the work in the camps would be greatly benefited.

There is also an increasing demand for

books on transports and on ships in the navy, and the stock at some of the dispatch offices is often exhausted before the desired number of volumes can be supplied, and the ship sails away but half provided with reading matter. It seems a pity that the men who risk so much for us should be denied the use of the volumes lying idle in our homes. The poster reproduced here has been displayed both outside and inside the New York Public Library, and has been successful in attracting many volumes for the use of our boys “over there.”

The *War Library Bulletin* no. 4, issued as we go to press, prepares the way for the intensive book campaign, and no. 5, to follow in February, will be practically devoted to it. Thru the influence of the artists' subcommittee of the Committee on Public Information, Charles Fall is designing a book campaign poster which will be distributed to all the libraries of the country. A Washington newspaper correspondent is helping the A. L. A. to get a record of its accomplishments into the newspapers of the country, and John K. Allen, of Boston, is helping plan the book campaign. A large part of the magazine publicity work is being handled by Burton E. Stevenson, of Chillicothe.

MAGAZINES

In the coming campaign for books it will be desirable to work for magazine subscriptions also. These may be either popular magazines or technical. If the latter they should be given only after consulting either the Library War Service Headquarters at Washington or the camp librarian of the camp to which it is desired to have the periodicals go. A vote was recently taken at Camp Sherman as to the most popular magazine. Of the thirty-one receiving more than 25 votes, *Life* led all the rest with 120 points. Of the first ten, the *Saturday Evening Post* came next, with 97; *Judge*, 88; *American*, 69; *Literary Digest*, 68; *Puck*, 63; *Collier's Weekly*, 60; *Scientific American*, 59; *Physical Culture*, 58; and *Metropolitan*, 57.

The so-called “Burlison” magazines furnish much of the reading matter supplied without formality to barracks, hospitals,

and other buildings, and are also put on troop-trains and transports in large quantities.

The publishers of *Forest and Stream*, *Field and Stream*, *Collier's* and *Baseball* are sending the copies returned from the newsstands each month, often as many as a thousand issues, to the dispatch office in New York, to be put on the transports and sent abroad. Fifteen copies of *Baseball* are also sent direct to each camp monthly.

CAMP LIBRARY BUILDINGS COMPLETED AND OPENED

All the National Army (Cantonment) library buildings are completed and occupied except Jackson, which will be ready for occupancy about the second week of February. Of the National Guard buildings the following are completed: Greene, Bowie, Sheridan, Kearny, MacArthur, Cody and Shelby. Of the others the following will probably be completed by the time this reaches our readers: Hancock, Wheeler, Sevier, Logan and McClellan. Wadsworth, Doniphan and Frémont will be finished some time in February. Beauregard is still in quarantine and all work there necessarily in abeyance. Library buildings at Camp Johnston and Fort Oglethorpe are in progress and will also be finished some time in February.

The new library at Camp Devens, in Ayer, Mass., was informally opened Dec. 28. J. Randolph Coolidge of Boston, a member of the national Library War Council, was present for the opening.

At Camp Sherman the new building was formally opened on the evening of Jan. 4, with a notable company present. Burton E. Stevenson, the camp librarian, presided. He said that the A. L. A., like every other organization represented in camp, was working for the sole purpose of helping to win the war, and pointed on the three ways in which the library could do this: by supplying interesting reading matter to tide over the inevitable moments of loneliness; by instructing the men in the causes and purposes of the war; and by providing the latest and best technical and military books, thus helping them to become better soldiers. John R. Prosser, secretary of the Y. M. C. A., told of the close co-operation exist-

ing between his men and the library staff, till circulation from the nine Y branches was now about 7000 volumes a month. C. B. Galbreath, state librarian, responded to Mr. Stevenson's tribute to Ohio libraries for their unselfish and ungrudging help; and Division Chaplain Howell commented on the great work of the librarians in introducing the men to their "friends on the shelf." In accepting the building General Glenn spoke most warmly of the library work which had been accomplished at the camp in the face of many obstacles and discouragements, and said that from the first he had realized the importance of this work in maintaining the morale of the men.

The central library building at Camp Zachary Taylor was to be opened Wednesday evening, Jan. 16, at 7:30 o'clock, with ceremonies in charge of Camp Librarian George T. Settle. Brig. Gen. Wilber E. Wilder and other officers and men at the camp were invited, and the program called for speeches by Gen. Wilder, representing the soldiers, Gov. A. O. Stanley, representing Kentucky, Mayor George Weissinger Smith, representing Louisville; Gen. Bennett H. Young, representing the Louisville Free Public Library; General Secretary Philo C. Dix, representing the Y. M. C. A., and former Lieut. Gov. E. J. McDermott, representing the Knights of Columbus. Because of a blizzard of several days' duration, the public exercises had to be deferred till Jan. 22. The Governor, who had been in the city on the 16th, could not attend on the 22nd, and the mayor also was unable to be present. Otherwise the original program was followed. A special opening for the enlisted men, with some of the same speakers, will be held within a few days.

At Camp Gordon the building was opened Jan. 17, without formal exercises. The library is open weekdays from 8:30 a. m. to 9:30 p. m., and on Sundays from 1 to 9:30 p. m.

The opening of the library at Camp Funston Jan. 5 was very successful. There was an attendance of 150 officers and men, including 30 librarians from different cities. Purd B. Wright, librarian of the Kansas City Public Library, spoke on behalf of the

A. L. A., and turned the key of the building over to Lieut. Richard B. Foster, chief of the department of camp activities and amusements. William Allen White of Emporia who had planned to be present and who is much interested in the library, was prevented from attending. Tea was served, and many expressed the hope that this might be made a custom on the first Saturday and Sunday of each month (the monthly "visiting days" for women). Mrs. Willis Kerr and other ladies of Emporia gave generous assistance in preparations for the opening.

The Puget Sound Library Club met at Camp Lewis Dec. 28. A talk was given by Judson T. Jennings on the work of organizing the library, and the librarians had an opportunity to inspect the library and make a tour of the camp.

PERSONNEL

In addition to George B. Utley, as executive secretary, the staff at headquarters

has been further augmented by the addition of Carl H. Milam, of the Birmingham (Ala.) Public Library, Joseph L. Wheeler, of the Reuben McMillan Library of Youngstown, Ohio, Phineas L. Windsor, director of the University of Illinois Library School, William A. Slade, of the Library of Congress, and Caroline F. Webster, library organizer in New York state.

M. L. Raney, librarian of Johns Hopkins University, has been sent abroad to supervise the forwarding to American soldiers at the front of the books now going over on the transports under charge of the Y. M. C. A.

In the library soon to be installed at Camp Merritt, at Tenafly, N. J., Lewis B. Trauer will take charge.

Asa Don Dickinson, of Doubleday Page's, has been put in charge of the new dispatch station at Hoboken.

Recent appointments for camp library work, not hitherto recorded in the LIBRARY JOURNAL, are the following:

National Guard Camps

Camp Bowie, Fort Worth, Tex.	Herbert E. Richie, librarian
Camp Fremont, Palo Alto, Calif.	W. E. Henry, librarian
Camp Hancock, Augusta, Ga.	C. F. Cochran, assistant
Camp MacArthur, Waco, Tex.	I. A. Pace, assistant
Camp Shelby, Hattiesburg, Miss.	{ G. F. Griffin, acting librarian
	{ C. R. Bickham, assistant
Camp Sheridan Montgomery, Ala.	{ Louis J. Bailey, librarian
	{ D. J. Ambrose, assistant
Camp Wadsworth, Spartanburg, S. C.	T. A. Gallagher, assistant
Camp Wheeler, Macon, Ga.	T. L. Holman, assistant

National Army

Camp Dodge, Des Moines, Ia.	{ Carl A. Klumb, assistant
	{ J. A. Hayes, assistant
Camp Gordon, Atlanta, Ga.	Basil B. Wood, assistant
Camp Grant, Rockford, Ill.	J. C. Barbee, Jr., assistant
Camp Jackson, Columbia, S. C.	Wharton Miller, librarian
Camp Lee, Petersburg, Va.	J. M. Karper, assistant
Camp Pike, Little Rock, Ark.	Winthrop H. Chenery, librarian
Camp Sherman, Chillicothe, Ohio	{ Carl P. P. Vitz, assistant for January
	{ Charles G. Matthews, assistant for January
Camp Taylor, Louisville, Ky.	Paul Rusch, assistant
Camp Upton, Yaphank, L. I., N. Y.	{ Raymond, N. Brown, assistant
	{ E. C. Harper, assistant

Naval Station

Great Lakes Naval Training Station, Great Lakes, Ill.	{ H. E. Roelke, librarian
	{ Morris M. Smith, assistant

Other Camps

Fort Oglethorpe, Chickamauga, Ga.	{ Charles D. Johnston, organizer
	{ W. B. Johnson, assistant
Camp Johnston, Jacksonville, Fla.	Lloyd W. Josselyn, organizer
Camp Merritt, Tenafly, N. J.	Lewis B. Trauer

WAR SERVICE COMMITTEE HOLDS MEETING

A meeting of the War Service Committee of the American Library Association was held at the New York Public Library, at 10 a. m., Dec. 29, 1917, with the following members present, being a quorum of the committee: J. I. Wyer, Jr., E. H. Anderson, F. P. Hill, Gratia A. Countryman, C. F. D. Belden and W. H. Brett; also Herbert Putnam, general director of the Library War Service and G. B. Utley, executive secretary.

The General Director submitted an informal statement on the progress of the library war work.

On the recommendation of the Library War Council it was voted that, subject to the approval of the A. L. A. Executive Board, \$500,000 from the funds deposited with the American Security and Trust Company be invested in 4 per cent. U. S. Treasury certificates at par with interest.

The employment of a high grade publicity man or a publicity bureau was discussed and without taking formal action it was the unanimous feeling of the committee that a capable publicity man should be employed at headquarters. The general director emphasized his conviction of the need for expert and prompt publicity and expressed his satisfaction that the committee favored the employment of adequate service.

Dr. Hill, chairman, presented a statement of receipts and expenditures in connection with the Library War Fund to Dec. 28, 1917, in which it appeared that the total cash receipts aggregated \$1,666,799.93.

The subject of a book campaign, discussed at the Chillicothe meeting on Nov. 17, was taken under consideration and treated at some length and from various viewpoints, and with several proposals made. It was at length voted that the general director be asked to undertake an intensive but continuing campaign for books. (Dr. Hill wished to be recorded in the negative.)

LETTERS FROM THE CAMPS

Camp Travis

At the request of J. F. Marron, camp librarian, E. W. Winkler, reference librarian

in the University of Texas, has written a story of the work as he found it during a week's visit in December. Camp Travis adjoins Fort Sam Houston at San Antonio, Texas, and is a National Army Camp.

The librarian had been on the ground one month. When he arrived, the library building was not complete, and large shipments of books were at the depots piling up storage charges. Soon after the completion of the building, a "norther" ripped off the ventilating ridge, and deposited large quantities of dust in the building. Repairs were made before any rain fell; and the ventilating ridge was eliminated. The location of the building on Sixth street appears to be satisfactory; the K. C. Hall, postoffice, and a large Y. M. C. A. are on one side, and a large theater is being constructed on the other side. The lighting system is good.

The shelving was placed during the first two days of my visit. It consists of thirty-nine sections of double faced L. B. wood shelving; each section contains seven shelves, three feet long. About 12,000 books and a large quantity of magazines had to be piled on the floor temporarily. The books were mostly gifts, tho some shipments of purchased books had arrived. The gift books are from ninety to ninety-five per cent fiction.

The authorities at Camp Travis have cooperated cheerfully with the camp librarian in everything necessary to facilitate the work of the library. Four men were detailed to assist in the library, but while I was there only two had reported. The work first undertaken was to alphabetize the fiction and to plate, stamp, pocket, and place a book card in each volume to prepare it for circulation. Non-fiction is to receive in addition a brief class number and a catalog card. With the help at his command, it will take the librarian a good while to prepare all the books for circulation.

The library building was constantly being visited by men and officers, and wherever the librarian went he was asked about the progress of his work. Books have begun to circulate from the library building, and collections of books have been placed at several points in the camp. It is the plan of the librarian to increase the number of deposit stations so as to include every place where soldiers congregate during leisure or enforced idle hours. To facilitate this extra-mural work, A. L. A. Headquarters authorized the purchase of an automobile. I was commissioned to make this purchase, and gave the librarian his first lesson in its operation.

Fifteen miles distant from Camp Travis is Kelly Field with about 40,000 men. About thirty miles distant is Camp Stanley, where the reserve officers are trained. Experience will have to determine whether it will be

practicable to serve these camps from the Camp Travis library.

For this enormous task the Camp Librarian is to have one assistant. No one had been appointed when I was there. Clearly it is of the very greatest importance that proper men be secured for these places. The Camp Librarian provides the library organization of the United States with an opportunity such as has never occurred before, to introduce the young men of America to modern library service. The use made of this opportunity lies in the hands of the librarian in charge and his assistant. These men deserve every assistance from the profession in general that can be given them in the prosecution of their tremendous task.

Camps Beauregard and Bowie

In a long letter George F. Strong describes his work in Camps Beauregard and Bowie. Going to the first-named camp Oct. 1, he found about 5000 men and 2000 books, mainly from the New Orleans Public Library. A company mess-hall was assigned as the library's temporary headquarters, and proved easily adapted to the work. In the next six weeks the camp increased to 20,000 men, and 8000 donated books and many thousand donated magazines were received. The work of sorting and distributing these books and magazines among the library's stations was well organized, and a beginning had been made toward a reference collection at the main library, when on Nov. 12 the camp was quarantined for measles and pneumonia. On the division surgeon's order, the books were recalled to the main library and stations, except those deposited in hospitals and soldiers' clubs, and the library was ordered closed. The medical department consented to the non-returnable distribution of magazines among infected organizations, and this was handled by the Y. M. C. A.

On Nov. 20 Mr. Strong was transferred to Camp Bowie, where the library work had been started in July under the direction of Mrs. Charles Scheuber, librarian of the Carnegie Public Library at Fort Worth. Here again, on Nov. 28, quarantine orders were issued confining enlisted men to camp, owing to the spread of measles and pneumonia, and the quarantine lasted until Dec. 17. The library co-operated with the Y. M. C. A. and the

post office in collecting and distributing all the magazines available, and here, as in Camp Beauregard, the demand under quarantine far exceeded the supply, no matter how undesirable these back numbers might have seemed in other days.

The library at Camp Bowie has about 12,000 books, distributed between the main collection, and nine stations, including an aviation camp ten miles away and two soldiers' clubs in the city. Libraries for the base hospital and Y. M. C. A. headquarters are being organized and 200 books on the war and military science have been bought for a station at Division Headquarters.

Mr. Strong's experience in two camps under quarantine leads to the suggestion that a general policy be outlined, to be approved by the Surgeon General, with respect to the circulation of reading matter during quarantine and also with respect to the destruction, storage, or disinfection of reading matter used after quarantine is established.

Camp Funston, Kansas

From the library at Camp Funston Willis H. Kerr sends the following answer to the unceasing question, Do soldiers read?

On the evening of January 2, two men in the Engineers' Camp had, between them, Hall's "Kitchener's mob" and Victor Chapman's Letters, both books from the Camp Library. Each man read his book thru, then exchanged with his friend. They read in the barracks till lights were out, then went to the company bath-house, where lights burn all night, and read till 11:30 p. m. and 1:00 a. m., respectively. Both men read both books thru.

Ian Hay Beith's "First hundred thousand" was read at one sitting by a man comfortably tipped back in a Windsor arm-chair against the book shelves. He read right thru the formal speeches at the library "opening."

The six copies of Mr. Gerard's book, "My four years in Germany," are in constant use. Empey's "Over the top" (14 copies) is always "out." At least 20 additional copies are needed for the branch libraries in Y. M. C. A. and Knights of Columbus buildings.

These requests, received within one week, could not be supplied because nothing was on hand. Wireless telegraphy (repeated requests), explosives, veterinary medicine and surgery, Oscar Wilde, geography (especially maps and atlases for circulation), cipher codes and de-ciphering manuals, equitation, steam engines, how to make and read maps, trigonometry, calculus.

On January 10, 11, and 12, Camp Funston

was visited by a Kansas "blizzard," with intense cold. The library was kept quite comfortably warm both days, and had an average attendance of readers, including many officers. Following are a few notes from those days:

Maeterlinck's "Wisdom and destiny" was asked for and searched for in vain (since then, received from A. L. A. headquarters). The man had read it in part at home, and wanted to finish it in camp. He is being notified that the book is now available.

A dozen or fifteen pages of concise, up-to-date (1917) information on meningitis in its various forms was furnished another inquirer, thanks to a good lady of Manhattan, Kansas, who had given us a relative's medical library.

Another man, a drafting designer in civil life, wanted something on his specialty, because "a fellow forgets all he knows." Thanks to someone in Kansas City, the library furnished him with a book from the I. C. S. series, exactly on his subject. He had never seen it before, and went away happy.

The educational secretary from Y. M. C. A. no. 5 came in on one of these days to get all possible textbooks in grammar, spelling, arithmetic, algebra, geometry, trigonometry, physical geography, civics, and history. The library was able to give him something on every subject. He has classes in many of these, but rather more individual students pursuing their own studies. He has thirty barracks-classes in current history; the officers of his vicinity are very much interested and co-operating; the library furnishes him several copies each of magazines like *World's Work*, *Current History*, *Review of Reviews*, *Collier's Weekly*, *Scientific American*; he clips out important articles, binds them, and circulates them à la Chautauqua circuit from company to company for intensive class study; at the "Y" he has a series of bulletin boards, with cleverly drawn headings, for current pictures and charts on aviation, military events, the navy, prominent men, inventions, etc. The library furnishes most of the material.

Another Y. M. C. A. educational secretary was in during the blizzard, asking for help in organizing a class in Decimal filing of government correspondence, for the Quartermaster and other departments.

Another 15° below zero visitor brought a friend with him, seeking a Pitman or Graham shorthand instruction book. "He can pick it up right off with a little help from me and a book." But the library didn't have Pitman or Graham. It had Eclectic and Gregg.

Robert Service's poems were the quest of the educational secretary of "Y" no. 7 on this cold day, for some of his men. He has had a steady demand for poetry. He carried the books back with him.

On the morning of January 12, with the thermometer at 20° below, the camp was further frozen with horror at the bank robbery and murder of four men the night be-

fore. One of the first visitors at the library was an officer, a member of the investigating commission. He wanted a book to read, "not too heavy, but something to occupy my mind." He took away a Rex Beach.

On one of these mornings the librarian prepared and served coffee to the six soldier assistants. "Say, boy! this sure ruins what they call coffee at our mess!" was one reward.

The new building was completed by the contractors on Wednesday, December 19. Work at the former library headquarters (in the Y. M. C. A. Headquarters store-room) had been suspended since Dec. 1, all magazines and books being delivered to the library building. By December 20 there was an accumulation of more than sixty cases of books and twenty tons of magazines. Between December 20 and January 4, the librarian and assistant (Messrs. Kerr and Clayton), assisted by Floyd McNeil and Glenn McPherson, student assistants from Emporia Normal Library, and several soldiers "detailed" by the camp authorities for library, opened and sorted the books, sorted and bundled and distributed or stored the magazines, installed the living room equipment, received and put into daily use the library's Ford truck, received and unpacked the building equipment of chairs and office desks, washed the windows, and put up the window draperies. Misses Irene Gentry and Helen Read and Mrs. Gentry, of the Kansas City Public Library, gave prompt and generous help in making up the eighty yards of cretonne for the windows. The draperies add an attractive bit of color (rose and tan) and a reminder of home very much appreciated.

The building has been in hourly use by officers and men, and books and magazines issued, since December 19. The attendance grows daily, being especially good on Wednesday and Saturday afternoons and evenings and all day Sunday. Hours of opening have been fixed from nine a. m. to nine-thirty p. m., daily.

Approximately 20,000 volumes are on hand at the central building and branches. Probably 3000 of these are either worn out or otherwise useless. The remainder is a strong collection of good all-round non-fiction and fiction, including a remarkable number of late publications in all lines. The purchases from the A. L. A. War Library fund are arriving almost daily, and go into immediate circulation, as the selection is exactly what is needed.

Further donations of books from citizens, thru their public libraries, are needed. Any sound, clean book is useful. Text-books of all grades, from primers and spellers up to university texts, are in great demand, so long as they are whole and clean and fairly recent in publication. Old religious books cannot be used. Magazines of date before 1918 cannot be used, except certain sets.

Twenty-one branches are now in operation,

each with from 200 to 1500 books. These branches are in the 12 Y. M. C. A. buildings, 4 Y. W. C. A. hostess houses, 3 Knights of Columbus buildings, Kansas regimental (353rd Infantry) building, and the Junction City Community building. There will be additional branches and distributing stations soon, served from the central building by the library automobile truck. Magazines and newspapers are delivered several times each week to branches and to the hospitals, infirmaries, and detention camp.

Willis H. Kerr, camp librarian, is loaned to this work for part of each week by the Kansas State Normal School, Emporia, where he is librarian. Herbert V. Clayton, assistant camp librarian, is loaned for part of his time by the Kansas State Library, Topeka, where he is the law librarian. Floyd McNeil, of Emporia, will be the permanent paid assistant, beginning January 28 (Messrs. Kerr and Clayton receiving only traveling expense and subsistence). Other valued help is being given by soldiers detailed to the library, including two men of long experience in the St. Louis Public Library (Ferdinand Henke, Co. D, 314th Engineers, and Clifford Keller, Co. K, 354th Infantry).

An occasional hour of reading aloud is being tried. The first of these hours was on Sunday afternoon, January 6, by Mrs. Willis Kerr, of Emporia. No effort was made to advertise the reading, a group of men voluntarily gathering at one corner of the reading room upon announcement. Mrs. Kerr read from Coningsby Dawson's "Carry on," Robert Service's "Rhymes of a Red Cross man," and some of Vachel Lindsay. One testimony was, "Mrs. Kerr, that was just like home."

REFERENCE WORK AT CAMP SHERMAN

With the main library at Camp Sherman actually open more intensive reference work has been made possible and Carl P. P. Vitz, the assistant librarian, wrote as follows regarding it, under date of Jan. 17:

Work with the men of Camp Sherman thru the Camp Sherman Library began on December 31. We have had now a little over two weeks' experience and are beginning to get an idea of the nature of the demands made upon us. With this I am sending a record of books issued. This is complete for January 13, a Sunday. . . . It should be noted that Sunday is our busiest day, both for the withdrawal of books and for reading-room use.

As these records show, over one-half of the withdrawals are of non-fiction, tho the collection from which they are taken is much over one-half fiction. As was anticipated, the fiction in favor is chiefly stories of adventure, such as come from the pens of Zane Grey, Rex Beach, Jack London, Bower and McCutcheon. Zane Grey is so far easily our best

seller. Harold Bell Wright is also very popular. For recent fiction as such there is no call. It is interesting to see how well this collection of fiction, given out of the homes of Ohio, meets the wants of the men from these same homes.

In regard to non-fiction, there is first of all the very considerable demand for war books. "Over the top," "Private Peat," Gerard's "My four years in Germany," and other books of this type are in great demand. Likewise books having to do with the business of war are wanted. Our books on aeronautics, trench warfare, the bayonet, artillery, sanitation, motors, as well as on telephony, telegraphy and wireless for the Signal Corps and Telegraph Battalion have been entirely inadequate. It has been necessary to send in orders for additional books to help meet this demand. The calls for books that have no relation to the war have been most varied. Almost the very first call was for the Discourses of Epictetus. Poetry, history and natural science are wanted probably in the order named. That many soldiers are taking this opportunity for study is shown by the steady demand for books on algebra, geometry, physics, chemistry, shorthand, law, business, grammar, etc. There is also a fair demand for French books.

A gratifying development is the increasing amount of reference work. This is chiefly with officers. In fact the use of the library is in proportion to their number, greatest on the part of officers, while of the enlisted men almost one-half are non-commissioned officers. The reference work is chiefly in connection with the preparation of talks to the men or of lectures in the Officers Training Corps or other classes for officers. Requests taken care of, have been for material on the state of the war at the beginning of each calendar year, comparisons of the Lee-Enfield and Springfield rifles, the origin and history of uniforms, the relation of discipline to patriotism, incidents and information on artillery warfare to make lectures on this subject of greater interest to the men, explosives and the like. Y. M. C. A. men have used the collection in the preparation of religious and other talks. Quotations have been identified, poems located and wagers settled. Much of the interest of the work comes from seeing what can be done with the meager and haphazard collection at our disposal. Our present equipment consists of the New International Encyclopedia, the Britannica, ninth edition, the World Almanac, Statesman's Yearbook, a few handbooks of various kinds, some wall maps, a good atlas and most important the Reader's Guide, 1914 to date. Files of Reader's Guide and of technical periodicals, tho as yet very incomplete, are proving useful. Some thirty indexed titles are represented and also many aeronautical, automobile, engineering and other technical magazines. These have been secured as gifts from libraries or have come to

us from individuals. Recent magazines, dropped into the mails after a one cent stamp had been affixed, are turned over to us by the Post Office and have been a fruitful source for the filling in of recent issues. The addition of the *International Military Digest* and the journals devoted to the various branches of the service should do much in the improvement of our reference service.

A CHILD'S ESSAY ON SOLDIERS' LIBRARIES

During the campaign for the soldiers' library fund last fall, the pupils in one of the public schools in Kelleys Island, Ohio, wrote essays on the topic. The following, written by a pupil in the sixth grade, is selected for reprinting here:

The subject which I am going to write about has already been done in other schools and our school is "next." That is the "Soldiers' Library."

Mr. White told us about it a few days ago, and all the children in our room were willing to do as asked.

So Mr. White appointed three children in our grade, and three from the seventh grade to go around to the houses on the Island to collect money for the Soldiers' Library, and also at school there is a can for each grade and the children that have money for the Soldiers' Library put it into the cans, and that money also goes to the Soldiers' Library.

The reason we are doing this is because when the soldiers come from a long journey they want to sit down and have a rest, when they do this they have only a few magazines to read, but after this I think they will have some good books to read, so I think every boy or girl ought to be glad to put a nickel or a dime into the can for the Soldiers' Library, and also the people whom the collectors ask ought to give some too. Because the soldiers are going to lick the kaiser for us, and I think after a bit the kaiser will be willing to say, "Uncle Sam is a friend of mine."

ALFIE MARTIN.

IN THE DISPATCH OFFICES

An additional dispatch office has been opened at 119 Hudson street, Hoboken, under the supervision of Asa Don Dickinson. He will receive, sort, prepare for use, and ship to France both gift books and purchased books. It is expected that he will draw largely upon the libraries for such quantities of books as he will need.

At the New York dispatch office R. W. G. Vail, of the New York Public Library, has succeeded Mr. Hodgson, and he is to be further assisted by H. N. W. Magill,

for many years the enthusiastic promoter of library interests and community welfare in Pleasant Valley, N. Y. From this latter station it is estimated that 200,000 volumes have been plated and dispatched to the soldiers in camp and post, on the seas and in the overseas forces.

INSTRUCTION FOR ILLITERATE SOLDIERS

With the organization of the National Army, when the United States entered the World War, the usual condition of "no illiterate soldiers" was suspended. This was a signal to Mrs. Cora Wilson Stewart, whose "moonlight schools" in Kentucky have achieved such marvelous results, to extend to soldiers the work of the Kentucky Illiteracy Commission, of which she is president. Beginning at once with the work of giving instruction in reading and writing to all illiterate soldiers in Kentucky camps, the work is being extended to camps the country over. Mrs. Stewart is to prepare a "Soldier's first book," in which each sentence will be adapted to camp life. One-half the book is to be devoted to patriotic songs.

GAYLORD BROS.' CO-OPERATION

Acknowledgment should be made of the work of Gaylord Bros., Syracuse, N. Y., in behalf of the War Service campaign. At the request of the A. L. A. committee on library publicity, who provided the copy, book lists on subjects made timely by the war were printed by the above mentioned firm for circulation thru local libraries. That the original plans of the A. L. A. War Service Committee were changed, should not prevent hearty thanks to the publishers for their co-operation. The only regret of Gaylord Bros. in this undertaking is that they could not always live up to their ideal of prompt service, by filling all orders on the day received. It is to be hoped that library customers will not count this lapse against them.

OTHER FORMS OF LIBRARY WAR SERVICE

Having emphasized the work of the camp libraries for several months in this department, we are giving some space this month to the other forms of war service to which the public libraries of the country have been giving equal attention. In response to

a special query a number of libraries have sent us most interesting summaries of these other phases of their many-sided work.

The City Library Association, Springfield, Mass.

More than \$8000 was raised for the camp library fund. Appeals for books for the soldiers' libraries have already resulted in 2000 volumes. The use of the hall and rooms of the Library Association has been granted for patriotic and war-work organizations. Successful entertainments have been held for soldiers from the local camps. Books and periodicals have been sent to the Hostess House near the U. S. Arsenal and to neighboring camps and guard stations. Library cards have been issued to soldiers stationed in the vicinity, and the library is constantly used by them. Large numbers of drill manuals, works on military art and science, etc., have been procured for them, and especially for officers. Much information and many technological books have been furnished to munition makers. To the public, printed lists on thrift and food conservation, gardening, war books, foreign trade, explosives, and Red Cross work, and manuals and guides for soldiers have been distributed. Thousands of hand bills advertising the Liberty Loan were sent out in library books. An opportunity was given a solicitor to address the staff, who subscribed to the utmost limit of their resources. A booth was installed at the library to collect funds for the Red Triangle work. The library hall is soon to house an exhibition to raise money for Red Cross purposes. The librarian and other members of the staff have taken part in numerous campaigns to raise money for war work purposes. The staff contributed \$125 for Belgian relief, \$80 for Red Triangle work, \$160 for the camp library fund, some \$85 to other relief funds, and more than \$150 for Red Cross work, including 100% membership. The members of the staff have outside of hours prepared scrap books for the entertainment of the wounded and have conducted this work among the public; have organized among themselves a group for Red Cross sewing; and the librarian and various members have

served as representatives of the library in organizations connected with the war. The library has co-operated with the food and fuel conservation committees, the council of national defense, and similar bodies; and has brought their publications to the attention of the public. Hundreds of leaflets on food conservation, diet, canning, gardening, thrift, etc., have been distributed; numbers of pamphlets on the war issued by the British publicity committee have been given away; and exhibitions on the screens, with posters, notices, pictures, lists, etc., displayed on the bulletin boards, have constantly been used to stimulate food conservation, war saving, and similar measures.

Providence Public Library

For the first few months after the declaration of war, there was a steady demand, from men who were about to enter war service, for such publications as would aid them in preparing for their specific duties, and this of course led to a decided strengthening of the library's resources in those fields. It is one of the pleasures of these later months, that some of these same men are occasionally heard from, either beyond seas, or in some one of the training camps.

A little later books about the war were in exceptional demand. These "war books" were brought together, in one place, where they could be seen and handled by the readers. As the interest of readers in the causes of the war has deepened, and especially as it relates to the United States, another phase of the library's work is about to be undertaken. This plan is to make up a number of "sets" of books, for deposit, to be sent around to clubs, schools, etc., each set being selected with a view to making plain the position of the United States in this conflict. The President's War Message, and his "Flag Day" address, and other similar publications, have been utilized in this way.

In the camp library movement of last autumn, this library took an active part; and later placed the services of the assistant librarian, Albert R. Nichols, at the disposal of the A. L. A. War Service Committee, who appointed Mr. Nichols camp

librarian at Camp Gordon, Georgia. Up to the end of 1917, the total number of books shipped to the camps was 2613, with more than twice as many periodicals. These books were sent to Camp Devens, in Massachusetts, Camp Gordon, in Georgia, Camp Greene, in North Carolina, and to the various forts, camps, and stations here in Rhode Island. Following the appeal of Miss Jones, a nurse of exceptional experience, who made plain the needs of the men in the hospitals on the other side, and of the physicians and nurses there, as well, the library followed the admirable example of the New York Public Library, and a notice was put up near the entrance, reading as follows: "Leave your books here for over there." The appeal met with an instant response; and a part of the constant stream of books will henceforward flow to Europe, as well as to the camps in this country.

It was early seen that the library's bulletin-boards were quite inadequate, and a 15-foot space in the Main Hall, on the ground floor, was set apart for that purpose. It has done good service in securing the attention of the visitors to all the various appeals whether for books for the camps, the Liberty Loan, food conservation, fuel conservation, the Red Cross, and all the other forms of war activities. Various lectures, including those on food conservation, have been given in the building.

The Red Cross has a peculiarly warm place in the affections of those who are in charge of the library; and one of its organizations, made up from the membership of the day force at the library, meets once a week, in the evening, for the preparation of surgical dressings. A sewing-machine has been brought into one of the second-story rooms, which, until now had had no concern with anything but books.

The Buffalo Public Library

The Public Library is doing considerable war work in addition to what it is able to do in helping the camp libraries, and in addition to much which is being done by the members of the staff outside of the library.

Before the war, it was the policy of the Buffalo Public Library to permit no adver-

tising of any kind within the library or any of its branches. Solicitation of funds and of memberships, the posting of advertising bulletins and the distribution of handbills within the library, were all forbidden. This policy has been forgotten, and it now takes an active part in advertising and in otherwise helping all movements of the Government and of all organizations affiliated with the Government for the advancement of war measures.

For food conservation it has co-operated in many ways with the Food Administrator and his staff. It is displaying food bulletins; distributing advertising matter and pamphlets issued by the Government; it has an open shelf collection of books upon food conservation, which is being constantly renewed; and it has issued special book lists to help the movement.

The full force of all advertising possibilities of the library has also been put to use in helping the Liberty Bond sale, the Red Cross drives and the sale of Thrift Stamps. The library had a booth for the sale of Liberty Bonds; it received subscriptions for the Red Cross, and it is now soliciting Red Cross memberships. The library is also taking part in the sale of Thrift Stamps.

Practically every book now leaving any of the library agencies contains some advertising matter for a patriotic cause.

As important as any of this new work, however, is the supplying of the needed books to furnish the knowledge which makes the war work effective. There certainly is proof that there is real need in the extension of regular library work in the fact that the usual slump of circulation which we look for in times of industrial activity has not only failed to take place, but there is a marked increase in the circulation of books, and a still greater increase in the number of library book borrowers. Another increase in the use of the library has come with the greatly enlarged force of night workers, many of whom use the library by day.

The New York Public Library

Surgical dressings instructions were begun in April, 1917, and 604 dressings completed and sent to the Red Cross.

The American Fund for French Wounded, Overseas Division, appointed Tuesday evenings as "library night" for cutting out and making of garments. From May to December, 1917, 1725 garments were assembled, 644 garments sewed, 136 garments knitted and 5274 surgical dressings made.

A Red Cross Auxiliary was formed in the New York Public Library on Oct. 30, 1917, being Auxiliary No. 256 of the New York County Chapter. Sixty-six knitted garments have been made and returned to the Red Cross Headquarters. Aside from this 58 knitted garments were made by members of the staff and distributed among the library's men in the service and knitting is being done continuously. Red Cross Auxiliary No. 234 was started in October, 1917, in the Library School and 63 knitted garments have been made and returned. Red Cross Auxiliaries have also been started in the 135th Street and Washington Heights branches.

The staff worked on the State Military Registration and took an active part in the work of the Liberty Loan and U. S. Food Administration. Each branch is a sales agent for War Savings Stamps. The Draft Boards have a number of permanent offices in the branch libraries as well as the Legal Advisory Board. For the national government we have distributed an enormous amount of literature. In one case over 100,000 circulars were distributed to adults with books.

A Christmas sale and tea under the auspices of the New York Public Library Staff Association, Welfare Committee, was held on Dec. 15, 1917, at the Staff Rooms, 26 West 40th street. Generous contributions of materials were made by the staff, and all help needed for preparation and for assistance at the sale and tea was freely offered. Over \$375 was cleared, to be devoted to war service work, and particularly for the benefit of the members in active service from the library.

Thirty Christmas boxes were sent to the members of the staff in the camps of this country and "over seas."

There are thirty-one members of the staff, who have either received commissions, enlisted, been drafted or volunteered

for service with the armed forces of the U. S.

The men of the library held weekly drills as members of the Home Defense League, during the spring, summer and fall of 1917, in the library court. A number of the members enlisted in war service. Drills will be resumed in the spring of 1918.

Many staff members have given generously of their time in working on books for the camp libraries.

The National Surgical Dressings Committee have opened a station in the lobby of the Fifth avenue entrance of the Central Building and the staff have the privilege of working there also.

The Free Library of Philadelphia

The Main Library and all its branches have been distributing for some time both Liberty Loan and U. S. Government War-Saving Stamps literature.

The entire bulletin board space at the Main Library is devoted to giving publicity to war projects. In addition to the regular recruiting posters, from all branches of the Government service, posters calling for war relief, food conservation, control of transportation facilities, the increase of industrial output, etc., are exhibited.

Men in any branch of the Government service are permitted to borrow books without the necessity of securing a guarantor.

The Library League clubs for girls, managed by the department for children, are engaged in knitting and other Red Cross work, and in addition are assisting the Patriotic League to extend its work.

The Haddington branch, on Christmas Eve, celebrated a Community Christmas, in honor of the men in the service. A large Christmas tree, illuminated with colored lights, was decorated with metal tags, each bearing the name of one of the five hundred and forty-seven young men of Haddington now in the service of the United States. The president of the Haddington Citizens' Association presided, and choirs from the neighboring churches and children from the schools of the neighborhood took part in singing carols and patri-

otic songs. Music was furnished by the Overbrook Military Band.

The Public Library of the District of Columbia

The Public Library of Washington, as is the case with the Library of Congress and the libraries of the various federal bureaus, is being constantly used by the government departments and especially by the new war service commissions for the obtaining of information along every line that affects the prosecution of the war. The pamphlet and clippings collections of the reference department have repeatedly afforded data not readily obtainable elsewhere. This use is, however, incidental to the library's location in the nation's capital.

Aside from service to the government the library has a number of war activities. Two classes of young women on the staff have taken a Red Cross training course. The Red Cross membership campaign was vigorously carried on both among the staff members and from a booth in the lobby where visitors were enrolled. The children's department has aimed at being a clearing house for all information in regard to patriotic service for children, and it has been active in encouraging such service among its young readers. Reading lists and suggestion slips of possible war service have been issued. Scrapbooks and picture puzzles have been made by the children. Knitting classes with instruction and wool distribution appealed to the older girls. The boys have been interested in home gardening projects, and the "Working Boys Reserve."

The librarian obtained the aid of a section of one of the strongest of Washington's women's clubs to co-operate with the U. S. Food Administration and to install and take charge of exhibits on food conservation. These have been very well planned and well attended. Pamphlets and recipes are distributed. A special case of war recipes is kept for consultation, and in the industrial division an effort is made to meet all demands for help and information concerning cookery problems relating to the present crisis.

The latest activity has been the conver-

sion of the library's lecture hall into a recreation room for men in uniform. Writing materials, billiard tables, a victrola, live story books and French study texts, friendly club women as hostesses and occasionally tea, have made the room inviting and it is becoming steadily more popular with the soldiers and sailors, of whom there are many thousands in camps in and about Washington.

Detroit Public Library

The Red Cross campaign in April, 1917, netted \$2292.74, representing contributions and memberships, while the Christmas campaign, in December, brought in \$839.50, representing 747 memberships. Continued assistance is given to Red Cross work by staff members at headquarters and branch libraries are used as workrooms and for classes in the making of surgical dressings.

For the first Liberty Loan 163 subscriptions amounting to \$11,700 were secured, and in the second 77 subscriptions for \$7600. For the Y. M. C. A. fund \$442.89 was raised.

In the food pledge campaign, 6900 cards were secured in a house to house canvass by staff members. For the cause of food conservation, exhibits of books and pamphlets were prepared in the various library agencies, an article on "Detroit's food problem" was published in *Library Service*, and "Thrift" book marks were distributed.

In conducting the selective draft the library contributed clerical work, regular assistance being given by staff members on library time and as volunteer work, to Local Draft Board Division No. 1, in addressing and mailing questionnaires and other forms. For a period of two weeks, staff members averaging in number twenty-five per day, helped with this work and are continuing. Advice was given in library agencies, to registrants.

Scrapbooks for soldiers have been made by staff members, assisted by the Association of Collegiate Alumnae, Y. W. C. A., and high school classes of art and design.

Distribution has been made thru library agencies of circulars such as those on War Savings Stamps, and also civil service circulars about government positions.

St. Louis Public Library

The library has received about 24,000 books for camp libraries, of which 23,000 have been sent to libraries of eight different camps. It has also handled 60,000 magazines and has either sent these or sold them for the benefit of the War Library Fund. Scrap-books are sold at 5c. each, to be filled and returned for distribution. The library has also done some work on its own account with nearby camps and detachments and at Jefferson Barracks, especially in furnishing magazines for use on departing recruit trains.

The assistant librarian, Mr. Blackwelder, has been lent by the board for the organization of a library at Camp Pike, Little Rock, Ark., for two months.

An effort has been made to meet the demands for literature on military organization and instruction.

The library has assisted in collections for the War Library Fund, for which the sum raised in St. Louis to date is \$12,-896.30. About \$3000 of this was raised directly by the Library. The Carondelet branch alone collected over \$1000.

Work connected with conscription is being carried on at three different branch libraries. In the Crunden branch the Exemption Board with Legal Advisory for Division No. 4, is occupying a large part of the ground floor of the building.

Publicity was freely given by the library to the Liberty Bond sale and at present Thrift Stamps are for sale at all libraries, the board having authorized the investment of a sum for this purpose. A member of the library staff has been detailed to superintend an educational campaign thru the library.

During the Red Cross membership campaign, the library and its branches served as stations for the registration of new members.

The library calls attention by bulletins, posters and exhibits to Government and other literature on Food Conservation. Stations for the signing of the Hoover pledge were installed in the libraries and in some of the branches there has been systematic instruction in canning and allied subjects. In addition, the library is making large col-

lections of books on all phases of the war and of foreign war posters.

A service flag with ten stars hangs over the front entrance to the Central Building.

Denver Public Library

In addition to acting as the book collecting and distributing center for this Rocky Mountain region, the Denver Public Library prepared the specifications for soldiers' scrap books which have been widely adopted elsewhere. It supervised the preparation of these books until this work was turned over to the Junior Red Cross. It is the central bureau in Denver for the patriotic story campaign which is being conducted in schools, foreign settlements, etc. It is providing quarters and facilities for eight free French classes of large membership, which meet at the library eight times a week. It is the library representative in Colorado of the publicity committee of the State Council of Defense; it is also the official library headquarters in Colorado for library co-operation with the U. S. Food Administration. It has prepared various special lists of books for use in the Thrift and Red Cross campaigns, and has printed for public distribution two short lists, "Ladders of interesting books on the war." It has a special bulletin board of twelve hinged leaves containing official government bulletins and publications on food conservation, etc. It has furnished reports, under instructions from the U. S. Department of Justice, of the investigations of designated library readers as shown by their use of library material.

The Library Association of Portland, Oregon

The war has added greatly to the Library's responsibilities during the past few months. All sorts of patriotic meetings have been held, and sewing machines and cutting tables are in active use several times a week in the branch auditoriums. The library assistants, with all the other women of the land, have been sewing, knitting, gardening, and attending first aid classes. An effective knitting campaign was conducted in the playgrounds last summer by the children's librarian, and as a result 150 Serbian squares were made.

Knitting clubs are bulletined at the Central Library building and at several of the branches, affording opportunity for reading aloud. Library assistants gave effective aid in the Red Cross and the Soldiers' Library fund campaigns and also secured names for the National Registration of Women. Their sympathies were aroused by some letters written by a young lieutenant in France to his mother in Portland, so, in addition to a contribution to the general fund, sixty Christmas boxes were gathered together and shipped.

From the beginning of the war every soldier on guard duty in Multnomah County has been supplied with books and magazines from the Multnomah County Library. The first of August, as soon as there were shelves to put them on, books were sent to the Y. M. C. A. houses at Vancouver Barracks, and following hard upon these volumes, Bremerton, Forts Stevens, Columbia, Canby, Worden, Casey, Flagler, George Wright, and Whitman have all been provided for, as well as many thousands of volumes sent to American Lake.

Not the least valuable bit of war service was the foresight shown by the technical department in purchasing every modern book on shipbuilding that the market has offered, and many copies of the most important are in constant use by the new workers in this new industry. The library is now promoting the food conservation campaign with books, bulletins, receipts, etc., etc.

A most attractive war exhibit has been in place in the East Portland branch library during the last few weeks. Posters from the various recruiting offices in Portland and on Food Conservation, the Liberty Loan, etc., decorate the walls. Tables are filled with books and pamphlets on the conservation of food and receipts are posted with space underneath for the signatures of those who have tried them and found them satisfactory. The insignia of the different ranks in the United States, French and British armies are displayed in a glass case with the flags and colors of the nations. In this same case are some most interesting rings and mats made by French and British soldiers during idle

moments in the trenches. Another interesting feature of this exhibit is the maps showing the positions of allied and German lines, and the gain made yearly since the beginning of the war.

Children's essays on "What I can do to help win the war" have also attracted much attention.

Last, but not by any means least, is the division showing the work of grade school girls in the knitting line. A meeting of the "Red, White and Blue Club" is held every week at the library and the result is that numerous bright colored squares, wristlets, mufflers and wash cloths are sent to the Red Cross headquarters.

Los Angeles Public Library

In addition to carrying on camp library work, this Library is co-operating with the Red Cross and with the United States Food Conservation. An auxiliary of the Los Angeles Chapter of the Red Cross was formed on Nov. 1, and now numbers 88 members. For the past two months the members have been busy knitting socks, sweaters and mufflers for the soldiers. In December the staff held a food sale for the purpose of raising money for the purchase of more yarn. This was quite successful, about \$35 being realized. This amount was contributed entirely by members of the staff. Recently this auxiliary was allowed \$100 by the Los Angeles Chapter of the Red Cross.

Mrs. Frances M. Harmon, a member of the library board, has been appointed library publicity director for California by the U. S. Food Conservation Commission. This library is assisting her by giving her stenographic assistance in the compiling of mailing lists and sending out literature from Washington. The library is also holding food exhibits at the central building and branches, and distributing receipts, of which it has had some 50,000 copies printed.

For more than six months the library has been assisting the State Council of Defense in its work, gathering literature, indexing it for the use of the members of the Council, and making lists as needed.

Sedalia (Mo.) Public Library

The Sedalia Public Library is co-operat-

ing in a plan to keep on file records of all the soldiers called to the colors from that city. The plan includes sending a circular letter and an enrollment blank to each man, asking him to fill and return the blank. Date and place of birth are requested, name of parents, married or single, and if married number of children. When the blanks are returned a large committee will be formed and each member given three of the boys as an especial charge. He will be expected to correspond with them, learn of transfers and promotions, and make a record of them with other events of interest, to be kept on file at the library with photographs of the boy wherever obtainable.

Rosenberg Library, Galveston, Texas

The Rosenberg Library of Galveston, Texas, began its first aggressive war work with the home gardens campaign last spring, following it up with home canning, and made use of the Flower and Vegetable Show to distribute gardening lists. A planting chart for Galveston Island, prepared by the county agent of the Department of Agriculture, is kept posted in the library, as the gardening season is continuous.

In the fall Food Conservation became the absorbing subject. Bulletin board, bulletin shelf, book lists, newspapers and moving pictures all invite the use of the library's resources. Leila H. Seward, head of the lending department, assisted the local emergency home demonstration agent in setting up a Food Conservation Exhibit after the plan of the Food Administration. This was one of a series of exhibits to be held. Placed in the main corridor of the library, it compelled and obtained the attention of everyone entering. The demonstrators working in the different school districts under the direction of the emergency home demonstration agent all direct the women to the library. This is the most effective means of publicity possible. Photographs obtained from the State Library Publicity Director, the posters of the Food Administration, the Department of Agriculture, the Bureau of Fisheries are displayed.

Of the Food Conservation leaflets, published by the University of Texas, about

400 have been distributed. Copies of these sent to the Colored branch of Rosenberg Library are being used by the domestic science teacher for her cooking classes, and in preparing the daily school lunch.

Other important bulletins published for free distribution are obtained in quantity, and given out upon request; such as "How the war came to America," published by the Committee on Public Information; "Home gardens in the south," "Home canning of fruits and vegetables," issued by the Department of Agriculture; and the Food Conservation leaflets already mentioned.

A special display is made from the collection of war pamphlets. Every two weeks a different set of pamphlets, of which the library has duplicates, is displayed on the lending counter under glass. Notices in the papers call attention to it outside the library.

The Free Public Library of Newark, New Jersey

The Newark Library was instrumental in securing 800 French books, buying them partly with money raised from the sale of magazines contributed for the soldiers and partly thru the State Library Commission. They went to Camp Dix.

The library is getting up for the state of New Jersey a set of posters on food conservation, at the request of the Food Conservation Commission for the state. This includes 11 posters of the U. S. Food Administration; 10 large charts and graphs showing comparative costs of the same amount of nourishment in different foods and the composition of certain food materials; and 18 pictures, cartoons and magazine covers which tell the story. The library also prepared and supervised the printing of the poster for the Home Defense League of Newark and gave for it the use of the library's war poster design.

A letter to the clergy of Newark was sent from the library to be read on Educational Sunday, offering special service to persons wishing to study problems brought forward by the war.

The most successful thing about the books the library sent to New Jersey camps

is reported to be the bookplate of "Army Publications," described in the *LIBRARY JOURNAL* for December (page 961). Miss Askew reports that over 500 requests had been received a month ago from soldiers, for books and pamphlets mentioned on this list.

An "After the War" conference was held by the members of the staff at a luncheon, to consider the steps which the library might take to acquaint business men, manufacturers, etc., with the resources of the library, and the preparation for the business situation after the war. The accomplishment of the plans laid out, unfortunately, is depending upon a natural increase in the library appropriation, which may not be granted this year. The trade journal exhibit now in progress is the first step in this plan.

The library has assembled a traveling exhibit of war posters at the request of the Committee on Public Information, described in the January *JOURNAL* (page 30). It has now begun a campaign for the collection of publications issued by soldiers, as well as pictures, souvenirs, etc. Last summer the library was able to send to a Lieutenant Boulas, a wounded French officer interned in Switzerland, some books and pamphlets for use in connection with his work as professor of modern commercial organization of the High School of Commerce at Neuchatel, in the section devoted to wounded soldiers. In exchange, the library asked Lieutenant Boulas if he could secure material suitable for this collection, and altho he, being forbidden all communication with his comrades, is unable to collect such items, he has forwarded the request to a Mme. Yvonne Sarcey on the staff of *Les Annales* at Paris, from whom it is hoped many interesting additions to the collection may be received.

Seattle Public Library

Several thousand bulletins on food conservation have been distributed from the central and branch libraries, the chief trouble being to secure a sufficient number. Food shows demonstrating war economies have been held in two branches at which time there were also exhibits of various

articles made by school children for the soldiers and sailors.

By buying freely and duplicating when necessary the library has tried to meet the demand for books on military and allied subjects, such as aeronautics, wireless telegraphy, and shipbuilding. With the growth, during the last two years, of the shipbuilding industry in Seattle, from a mere infant to a veritable giant, the demand for books on shipbuilding is something tremendous. For example, with 21 copies of Holms' *Shipbuilding* (price \$17.50), there are 36 reserves waiting at the present time.

The auditoriums in a number of branches are being used for Red Cross work in sewing and preparing surgical dressings. Women of the neighborhood come day after day and often spend a full 8 hours. Motors have been attached to the sewing machines to expedite the work. Various patriotic societies, such as the Minute Men and the Junior Patriotic League, are constantly making use of the auditoriums for meetings.

Mrs. W. A. Burleigh, one of the members of the Library Board, managed a very successful campaign in which over 40,000 Red Cross seals were sold. Several hundred school children came to the Green-Lake Branch Library and under Mrs. Burleigh's direction canvassed the district thoroly. Nearly, if not all, of the members of the staff are members of the Red Cross, and many have been active in its work. A booth was maintained for the sale of memberships during the December drive.

Various members of the staff subscribed \$2750 to the Second Liberty Loan and sixty of them, since last April, have been contributing one-half of one per cent. of their salaries to the Belgian and Armenian relief funds.

Tacoma Public Library

The war activities of the Tacoma Public Library include exhibits of special collections of military and naval service manuals of all sorts in the circulation department, as well as the maintenance of a complete file of all publications of the War and Navy Departments in the refer-

ence division of the library. Other special collections of books and exhibits have covered travels in the warring countries and several large sized maps giving the battle lines up-to-date. Liberty Loan and Red Cross posters were displayed freely thru-out the library and at present a special exhibit on food preparation and conservation is in progress accompanied by a series of posters sent out by the U. S. Food Administration. The rapid development of shipbuilding as a war time industry in Tacoma has made great demands on the library for shipbuilding material, which has been purchased in quantity.

Since June 18, members of the military or naval forces of the United States stationed in and around Tacoma, including the 40,000 soldiers at Camp Lewis, have been granted full privileges at the library. Miss Lytle, assistant librarian, is chairman of the war history division of the Pierce County Council for National Defense. In connection with the organizing of the library at Camp Lewis (exactly 17 miles from the Tacoma Public Library) the catalog department prepared 6500 books for use on the shelves of the camp library. Practically every member of the staff has gone out to the camp and served in the library in some capacity, and the catalog department has devoted weeks at a time to this work. Interlibrary loans are now made to this library and individual requests from soldiers are met directly in many cases.

One or two suggestions have been made to the Committee on Public Information in Washington, D. C., which were turned over to the War Department and acknowledged with thanks. It is possible that libraries generally will hear of these thru other channels later.

THE library committee of the American Electric Railway Association, of which Lewis A. Armstead was appointed chairman and which was intended to act as a clearing house for material of use to electric railways, has discontinued its activities on account of the war.

MOTION PICTURE CIRCUITS IN NORTH CAROLINA

ONE of the needs of rural communities is a form of entertainment which will bring closer the life of the world. The motion picture offers the best solution of this problem. Unfortunately the difficulty of obtaining suitable films, the cost of the equipment and of exhibiting the films, and the legal requirements regarding fire-proof booths and licensed operators have made it almost impossible heretofore to maintain regular motion picture entertainments in the country neighborhoods.

The state of North Carolina has taken the bull by the horns. At the last legislative session an appropriation of \$25,000 was made to assist rural communities in arranging for motion picture entertainments. The State Superintendent of Public Instruction was directed to provide for such entertainments where communities desired them. The plan for putting this act into operation has been worked out and a circuit has been organized in Sampson county. Under this plan the motion picture service is combined with the community organization work done by the State Bureau of Community Service. The act provides for a series of entertainments varying in number and cost, two-thirds of the cost being paid by the communities served, and one-third by the state. A unit consisting of one complete picture outfit, photoplays and operator and everything necessary for one year's service, it has been found, costs about \$3000. The county's share is \$2000, the state providing the balance. The plan involves the organization of a circuit of ten community centers, each guaranteeing its proportionate part of the cost to the county Board of Education. The entertainments are held twice a month. The type of man chosen for operator is one who can organize community leagues in the different communities. Each program consists of not less than six reels, occupying about one and one-half hours. The remaining half hour of the meeting is made available for holding a community meeting and discussing community problems. At this meeting may appear some state official interested in community development work,

such as farm demonstrations, and present the subject in which he is interested. Other officials accompanying the operator in his rounds may be the county superintendent or the county health officer.

Ten communities in Sampson county asked for the service for a full year beginning Nov. 20. Each of these communities guaranteed to the Sampson county Board of Education a sum not to exceed \$225 to pay for the service, each being allowed the privilege of choosing its method of raising the money. In every case the communities decided to charge an admission fee of ten cents. This is proving a decided financial success. Some of the communities have taken in at a single meeting more than three times as much as the cost of the service. The program included two health reels on tuberculosis furnished by the State Board of Health. The county health officer made the rounds with the operator, talking a few minutes at each meeting on the subject of tuberculosis and Red Cross seals in connection with the films.

"But, after all," says W. C. Crosby, who is organizing the work, "the finest thing, perhaps, in the whole big idea is the wholesome and regular recreation for the whole community furnished thru these pictures, and the fine community spirit that grows out of the meetings."

This plan can be carried out without the assistance of state funds. A group of granges in a given region can appoint committees to take charge of such entertainments and arrange their halls for the exhibition of pictures. Thru co-operation they can establish a circuit and procure a program of pictures for circulation in the region for a given period of time. A licensed operator can be hired by the week by the co-operating societies. He will carry the films from place to place in order of exhibition. The rental of films by the week is less than by the day, and makes it easier at the same time to secure what is wanted. Portable machines can now be purchased at a reasonable price. They can be run by electric power, small motors or a belt from an automobile, as well as by gas tanks. The cost of the machine which

ranges from \$150 to \$300 can be apportioned over a period of two or three years.

The National Board of Review of Motion Pictures, 70 Fifth avenue, New York City, issues lists of films reviewed by its committees and declared by them to be especially suitable for family entertainments. These lists may be had on application. They are part of the program of the Better Films Movement. In North Carolina the circuit is covered by means of an automobile which carries about a motion picture machine and an electric light plant. Insurance regulations are met thru the use of an incandescent lamp. This type of lamp also solves the question of licensed operators. The average cost of the performance has been found to be about \$12.

H. F. SHERWOOD, *Assistant Secretary,*
National Board of Review of
Motion Pictures.

REPORT OF THE BRITISH MUSEUM

ACCORDING to the 1916 report of Frederic G. Kenyon, director and principal librarian of the British Museum, the Exhibition Galleries, in the absolute interests of economy, have been wholly closed to the public, while students' hours in the Reading, Newspaper and Manuscript Students' Rooms have been shortened. The Reading Room is open from 9 a. m. to 5 p. m., the Newspaper and Manuscript Students' Rooms are open from 10 a. m. to 5 p. m. on every weekday except good Friday, Christmas Day, and the first four weekdays in March and September.

Mr. Kenyon also stated that the staff of the Museum had been much depleted, only those members actually necessary for the conservation of the collections being retained. The Museum at Bloomsbury has lost 115 members of its staff to the government for military service during the year, and the Natural History Museum 59. No fit member of the staff below the age of 26 and very few below the age of 35 remained in either of these Museums.

Rearrangement of the Museum's collections was slight, for besides lacking the assistance of the absent members, some of the required materials were practically unobtainable.

Hearty assistance has been given by the military authorities to the effort to obtain a representative collection of war posters, trench literature, trench maps and aerial photographs for the Museum.

The report for the year of G. F. Barwick, keeper of printed books, showed that 20,697 complete volumes and pamphlets, 54,415 parts of volumes of serial publications and of works in progress, 39 atlases, 28 parts of atlases, 1167 maps, 9905 musical publications, numbers of 3038 newspapers and 3400 miscellaneous articles were accessioned.

During the year 29,856 titles were written for the General Catalog and for the catalogs of maps and music; 28,441 titles and index-slips for the General Catalog, 2450 for the map catalog and 12,200 for the music catalog were printed. Into each of the three copies of the General Catalog 28,163 title-slips and index-slips were incorporated, making it necessary to rearrange 48,609 title-slips and index-slips in each copy and to add to each copy 649 new leaves. Part IV of the "Catalogue of books printed in the XVth century," which was mentioned in the last report as having been passed thru the press, was published. No work was done on the catalog during 1916.

The 13,805 volumes including 3719 newspaper volumes and sets of pamphlets which were sent to be bound were returned in 10,612 volumes. In addition, 600 volumes were repaired in binders' shops, 5073 volumes were repaired in the library, 7409 were cleaned and polished and 5933 volumes of reports, parts of periodicals, etc., were put in a light style of binding.

The number of volumes exclusive of those on open shelves which were supplied to readers during the 303 days in which the Reading and Newspaper Rooms were open was 1,071,010, and the number of readers 143,962, making an average of 475 daily, or a reduction in the daily attendance of 113 since 1915.

"OFFICER, if I stay on this street will it take me to the Public Library?"

"Yis, mum. But not unless ye kape movin', mum."—*Birmingham Age-Herald*.

SUMMARY REPORT OF THE BROOKLYN PUBLIC LIBRARY

As a part of his report to the trustees on the work of the Brooklyn Public Library during the year 1917, Dr. Frank P. Hill sums up the work of the library profession in financing and organizing the work of supplying reading matter to soldiers and sailors both here and abroad. He also indicates the various other forms of patriotic service in which the staff of the library took active part.

The total circulation for the year was the largest in the history of the library, 5,944,792 volumes having been drawn for home use, an increase of 595,410 over 1916. Reference use by adults decreased greatly, both at Montague street and in the other branches, thru the withdrawal for military purposes of many men who were habitués of the library, but the use by children constantly increased.

An innovation during the year was the establishment of a branch library in two rooms of Public School 89, one of the experimental Gary schools. Thirteen classes, numbering about 500 children, were assigned to the library each month for a 50-minute period on alternate days. Of the total of 1380 pupils in the school old enough to be assigned to the library, 1306 voluntarily obtained readers' cards, on which one book a week could be issued, on Thursday or Friday. During ten months of circulation, between sixteen and seventeen thousand books were so issued, with 22 per cent. non-fiction. The branch was open four hours in the afternoon five days a week during vacation, with an average attendance of 103.

In the book order department 84,164 books were bought during the year at a cost of \$80,851. The average cost of books so purchased increased a little more than 4 per cent. due to increased cost of labor and material. This increase is greater than appears, as 8984 volumes were purchased at second-hand bookstores at an average cost of only 37c. The cost of binding increased 1½c. per volume. Because of a smaller appropriation the number of books purchased was 11,000 less than in 1916.

As a result of the number of resignations during the year the library faces a serious situation. From a staff of 394 the library lost 134 by resignation and five by death. Changes in the heads of eleven branches and one station were made within the year, and in at least one branch no one on the present staff was connected with that particular branch one year ago. While transfers and promotions may be stimulating and helpful to a certain extent, changes of this sort carried to this extreme are decidedly detrimental to the smooth conduct of any library system.

In many instances those who resigned were replaced by untrained workers because of the dearth of candidates with library training or experience. This not only meant that the routine work suffered in quality and quantity, but that these conditions drew heavily on the time of the branch librarians who were obliged to teach and train constantly. As a war measure Dr. Hill suggests that a distinction be made between professional and clerical workers, and that the courses offered in the Training Class be modified accordingly. It is now proposed to try the experiment of giving a month's drill in clerical work to candidates who will make acceptable assistants in this grade but who would not be eligible for promotion without further training. It is also suggested that the training course be extended so as to place it more nearly on a plane with the training given by the accredited library schools in their one year courses. This would entail higher entrance requirements, and graduates of this course should be eligible for entrance to the second grade of service.

For several years the library has tried to get an increase in the schedule of salaries for the staff, and conferences were held by the representatives of the three library systems of Greater New York early in 1917, when a uniform salary schedule for the graded service was agreed upon. This scheme was afterward considered with representatives of the City's Bureau of Personal Service and a schedule drafted covering requirements for entrance, salaries and specifications for the several grades. So far as the schedule concerned the regular graded service it was satisfactory to

the library representatives and to those of the city. The conferences were discontinued on account of work on the budget, and as no agreement had been reached in relation to the positions in the non-graded service the schedule as a whole was not formally acted upon either by the library or by the city.

Because of the large number of resignations on account of low salaries, the situation had become so acute that the Administration Committee recommended that that part of the scheme which had been agreed upon in conference be put into effect. This recommendation was adopted by the board, and at the December meeting the trustees voted that salary increases in accord with the proposed schedule so far as they relate to the graded service should take effect Jan. 1, 1918.

VIGILANTES OBJECT TO BOOKS IN NEWARK PUBLIC LIBRARY

FROM time to time some zealous patriot discovers that the public library of this or that city is "circulating seditious literature" or otherwise aiding the German cause. Los Angeles, Indianapolis, and Louisville have all had a taste of this sort of attack, and now the Newark Public Library, whose aggressive loyalty to America is widely known, has been made the subject of criticism, on the score of its retention of eight books believed to contain enemy propaganda. The Vigilantes, representing more than 200 authors, artists and others interested in a vigorous Americanism, have filed a protest thru Marion Couthoy Smith, of East Orange, against the retention of these books.

Miss Smith's interest was first aroused by the discovery, in the libraries at Orange and East Orange, of certain German pamphlets, which were promptly withdrawn from circulation when the librarian's attention was called to them. Encouraged by the success of her first protest, she went into the Newark Library and made an investigation of the war books displayed there. Having made a memorandum of certain titles, she wrote the librarian a letter asking him to withdraw them from circulation.

In her letter she said:

My protest is not against such works as explain the psychology of the German people, or the underlying causes of the war—as Bernhardt's book for example—but against the distorted facts and misleading moral interpretations which we find in many documents printed during the war, which tend to misrepresent history and deceive the young and ignorant.

It is true that we should diagnose Germany's case, and understand just what we are fighting against, but this study cannot be founded upon lying statements and false abuse of our Allies. . . .

To this Mr. Dana replied as follows:

I have yours of December 4 in regard to what you call enemy books on the library shelves. In reply I would say that I came to the conclusion (which I still hold) many years ago that liberty of thought is a very desirable thing for the world and that liberty of thought can only be maintained by those who have free access to opinion.

Not satisfied with this reply, Miss Smith carried the matter before the trustees, submitting the correspondence and extracts from the books to which she took exception. The trustees, after considering her complaint, refused to take her protest seriously.

The books to which Miss Smith objected were the following:

Germany's fighting machine, by Ernest F. Henderson.

England or Germany, by Frank Harris.

Germany's point of view, and what Germany wants, by Edmund von Mach.

The King, the Kaiser and Irish freedom, by James K. McGuire.

England: her political organization and development, and the war against Germany, by Edward Meyer.

England and Germany in the war, by Robert J. Thompson.

The European war, by Anthony Arnoux.

Understanding Germany, by Max Eastman.

THE LIBRARY AND BETTER HOMES

FROM November 28 to December 8 there was held in Grand Rapids a Better Homes Exposition, the purpose of which was to show concretely how better homes may be had, better from the artistic and sanitary point of view as well as for convenience, etc. Nearly every line of business or industry that has to do with the building, fitting and furnishing of a home was represented, from the landscape architect, who supplies designs with plants and shrubs for

decorating the exterior of the home, to the potter, the silversmith, and the furniture maker who makes both cheap and expensive furniture. Many of the department stores fitted up rooms to show their ideas of good taste in that line, the name of the store going with it. This was in the advertising section of the exposition.

The most interesting rooms, however, were these fitted up complete by a committee of the furniture designers of Grand Rapids. Some twenty rooms were thus fitted, designed to show good taste for the various rooms of the home suitable for all purses. With these rooms there was no advertising whatever. They were purely educational. The Grand Rapids Public Library's exhibition of books was a part of this section of the exposition. The management of the exposition had invited the library to show its work with special reference as to how it touched the home.

Most of the furniture factories had special exhibits, each showing its own line of work as it related to the home. In this way the people of the city had a chance for the first time in the city's history to see under one roof the variety and excellence of the products of its factories. Educational lectures in a "little theatre" were a regular feature every afternoon and evening. The exposition occupied nearly two acres of floor space in one of the great furniture exhibition buildings and the attendance ran over 7000 in a single day, most of it in the evening.

The whole exposition was gotten up in a relatively short time, so that everything was more or less experimental. However, the results achieved demonstrated the great possibilities in an educational way, of an exposition of this kind. It is planned to give similar expositions in various cities of the country (the same management having already arranged for one in New York City in the spring). The purpose of the exposition is to educate the public in the best things that enter into the building and making of a home, and to do for the home and the industries that minister to it what the automobile shows do for the automobile industry. The book trade might well use such an exposition to advantage.

The library exhibit was in two parts, and one member of the staff was always in attendance; in the evening usually two. One was a series of poster panels advertising the library, decorated by the School of Art and Industry, which is connected with the public school system. These panels were shown in the section with the educational work of the schools. Some of these posters were as follows:

SOME ONLY STARE UP THESE STAIRS

Success	(Decorated by stair-
Position	way to the entrance of
Power	the Ryerson Library
Knowledge	building with people go-
Ability	ing up and down.)
Thoroughness	
Concentration

YOU CAN STEP UP THE STAIRS OF SUCCESS BY USING THE ASSISTANCE WHICH YOUR LIBRARY OFFERS

BETTER HOMES MAKE BETTER BABIES

(Pictures of Grand Rapids babies whose mothers used the books of the Library on babies)

THESE BETTER BABIES WERE BROUGHT UP ON THE BETTER BABIES BOOKS FROM THE LIBRARY

THE GRAND RAPIDS PUBLIC LIBRARY IS THE PROPERTY OF ALL THE PEOPLE OF THE CITY (Front view of Ryerson Library Building)

*Over 225,000 books and pamphlets
Over 1000 current magazines*

are kept for the special use of the 1,200,000 people (over 10 times the population of the city) who enter its doors every year for profitable study and recreation

THRU ITS MANY BRANCHES THE LIBRARY ENTERS MORE HOMES THAN ANY OTHER PUBLIC INSTITUTION EXCEPT THE WATER WORKS

The library had on exhibition three collections of books—"Books for a Better Home Library," "Books and Periodicals that Will Help to Build a Better Home," and one of the memorial libraries—a box of attractive books to be sent to the homes of sick and crippled children.

The purpose of the Better Home Library was to show what might be accomplished in the purchase of a more or less general collection of books to serve as the foundation of a library in the average home, the total list price of the whole collection being less than \$100. Great interest was manifested in this collection and 5000 copies of the list of them, giving publisher and price, were printed for distribution. The books on this list (all new copies) together with the bookcase and the poster designs, will

be exhibited in various parts of the city during the year.

With the collection of books helpful to the home builder there was a printed list of these books for distribution. The library also printed for this exposition a new edition of the pamphlet, "What the Grand Rapids Public Library Can Do for You," many thousands of which were distributed.

The library featured along with the poster on Better Babies its list of books on "Better Babies."

The possibilities of such an exhibit on the part of the library in any city in which such an exposition is held are very great, and I believe that every librarian should take advantage of the opportunities presented. With more time to develop the exhibition a very much better showing might be made than at this initial one in Grand Rapids.

SAMUEL H. RANCK.

TARIFF COMMISSION TO ESTABLISH LIBRARY

The United States Tariff Commission, which was organized for work April 1, 1917, has submitted to Congress its first annual report. Among its other activities the commission has undertaken the task of drafting a revision and codification of the administrative laws relating to the customs, in order to remove the existing duplications, contradictions and antiquated provisions. It has also undertaken to establish a catalog of tariff information, somewhat in the nature of an encyclopaedia, which shall contain as far as possible data for each important article affected by the tariff. The data will include statistics on imports, exports, production, prices and cost of production, processes of manufacture and competitive conditions. This catalog is to be kept continuously up-to-date. A part of the general plan will be the establishment of a tariff library in which will be kept books, pamphlets, letters from producers and importers, etc., classified and arranged for ready consultation in connection with the catalog.

The National Education Association will meet in Pittsburgh, Pa., June 30 to July 6.

American Library Association

The new A. L. A. committee on work with the foreign born, created "to collect from libraries and to supply to them information on desirable methods of assisting in the education of the foreign born, in American ideals and customs and the English language," has been organized with the following members: Arthur L. Bailey, librarian, Wilmington Institute Free Library; Annie P. Dingman, in charge of the foreign department, Cleveland Public Library; Anna A. MacDonald, consulting librarian, Pennsylvania Free Library Commission; Mrs. A. B. Maltby, librarian St. George branch, New York Public Library, and John Foster Carr, director of the Immigrant Publication Society, chairman.

EXECUTIVE BOARD MEETING

The Executive Board met in Washington Jan. 2. Only routine business was transacted. It was voted to hold the next conference of the association at Saratoga Springs, July 1-6. Mr. Wyer is anxious to have one day set apart as "New York State Library Day," with appropriate exercises and a program in Albany, and this will be done if feasible.

The board appropriated \$1000 from its balances in the hands of the treasurer of the association to be devoted to the general Library War Work of the Association.

Dr. Putnam, in view of his having taken over the general direction of the Library War Service, presented his resignation as a member of the Executive Board, which was accepted with very marked and unanimously expressed regret. Dr. Frank P. Hill was unanimously elected to fill the unexpired term of Dr. Putnam as a member of the Executive Board.

W. N. C. Carlton of the Newberry Library was elected a member of the A. L. A. Publication Board, to fill the unexpired term of the late Henry E. Legler.

Mrs. H. L. Elmendorf was named chairman of a committee, with power to appoint such as she may wish to associate with her, to draft a memorial for Henry E. Legler, for presentation to the association at its next conference. Everett R. Perry of Los Angeles, was appointed in a similar capacity, to draft a suitable memorial for the late James L. Gillis, State Librarian of California.

The nominating committee to nominate officers, members of Executive Board and Council, and Trustee of Endowment Fund, was named as follows: Walter L. Brown, chair-

man; Charles E. Rush, Mary L. Titcomb, Gratia A. Countryman, and George H. Tripp.

TREASURER'S REPORT

The treasurer, C. B. Roden, presented the following report for the fiscal and calendar year 1917, which was received and adopted:

JAN.-DEC., 1917

Receipts

Balance, Union Trust Co., Chicago, Jan. 1, 1917		
G. B. Utley, Secretary, Membership dues..	8,553.40	\$ 4,254.27
G. B. Utley, Secretary, Life memberships.	175.00	
Trustees Carnegie Fund, income.....	4,500.00	
Trustees Endowment Fund, income	400.00	
A. L. A. Publishing Board	2,000.00

GEORGE B. UTLEY, *Secretary.*

Library Organizations

ATLANTIC CITY MEETING

The joint meeting of the Pennsylvania Library Club and the New Jersey Library Association will be held earlier than usual this year, the dates chosen being Feb. 15-16. As usual the meeting will be held in the Chelsea.

The first joint session will be held Friday evening at 8.30, with John F. Lewis, president of the Pennsylvania Library Club, presiding. After the usual address of welcome by the mayor, Wilfried M. Voynich will tell "How to study and how to know 15th century books." A. Edward Newton, who is always delightful, will give "A Macaroni parson."

At the second session, presided over by Mrs. James Webb, Jr., president of the New Jersey Library Association, Rev. Allan Mac-Rossie, D.D., commissioner of the war council in France, will give "Observations in France," and a speaker, to be announced later, will talk on "War loans."

Dr. F. P. Hill will preside over the third session, and Hon. T. L. Montgomery, president of the American Library Association, will be one of the speakers. Dr. John Duncan Spaeth, of Princeton University, will talk on "Literature and journalism" at this same session.

The regular New Jersey Library Association meeting Friday afternoon is to be devoted to camp activities—Y. M. C. A., Y. W. C. A., and camp libraries.

The American Library Institute will have two meetings on Saturday, when "Training of assistants for libraries of learning," and "War service for libraries of learning" will be discussed.

The Free Public Library of Atlantic City will have a tea for the two associations on Saturday afternoon from four to six.

TEXAS LIBRARY ASSOCIATION

The Texas Library Association held its annual meeting in Houston, Nov. 19-21, with a good attendance, altho some librarians were prevented from attending by their extra work in relation to the army libraries.

Monday evening after an address of welcome delivered by Rev. P. G. Sears, president of the Houston Public Library Board, J. E. Goodwin, president of the association, made a very interesting talk on the growth and organization of a library as compared to that of a nation. Malcolm G. Wyer of the University of Nebraska Library, who had just come to Houston to take charge of the library in the cantonment there, spoke on "Libraries in the army camps." The program of the evening closed with a talk on "The library and the school" by P. W. Horn, superintendent of the Houston schools.

The theme of Tuesday morning's session was the relation of the libraries to the war. Some of the important suggestions made at the Louisville Conference in regard to ways in which libraries might aid the A. L. A. in providing books for the armies were brought out by Miss Elizabeth H. West of San Antonio. Leila H. Seward, of the Rosenberg Library in Galveston, read a helpful paper about the collection and utilization of war literature. E. W. Winkler, of the University

of Texas Library, told of England's experiences in supplying books to her soldiers. A preliminary report was read of what had been accomplished in the state towards raising funds for war libraries. A full report could not be given as the campaign was to last until Dec. 15. The largest amount to date, \$5000, had been raised by Houston, where the campaign had been put in the hands of the Chamber of Commerce.

There was no afternoon session. Instead, the members of the association were given a very enjoyable boat ride, including a visit to the historic San Jacinto battlefield and an oyster supper.

On Wednesday morning the program was devoted to Texas libraries. W. N. Daniells, librarian of the Agricultural and Mechanical College, made a talk on the "Rehabilitation of the Agricultural and Mechanical College," telling of the changes that had been made since he became librarian several years ago. Miss Le Noir Dimmitt, librarian of the Extension Loan Library, University of Texas, after telling something of the package library movement, told of the organization and work of the package library, called the Extension Loan Library, in Texas. C. Klaerner, state librarian, gave a report on the Carnegie situation in Texas.

In the afternoon Mrs. E. S. Carter, of Port Arthur, read an interesting paper about the new Gates Memorial Library of which she is librarian. There was a children's work round table conducted by Gladys Allison, both librarians and representatives from the Houston schools taking part in the discussions. The meeting ended with an auto ride to Rice Institute where the librarians were received and entertained by some of the college authorities.

The most important business matters decided during the meeting were: that \$50 from the treasury of the association should be given to the war library fund; that the Texas Library Association should apply for affiliation with the American Library Association; that the association go on record as favoring the raising of the standard of high school librarians. The means recommended to accomplish this were the requirement of library training in addition to the academic training required of high school teachers, and the placing of librarians on equal basis as to faculty standing and salary. It was also voted that the association should request the University of Texas to require of all candidates for state teacher's certificates a course in library administration, children's literature and reference books

equal to that provided in Fay and Eaton's "Instruction in the use of books and libraries"; the normal schools of Texas to require the same amount of instruction for a teacher's certificate or a teacher's diploma.

An invitation to hold the next meeting of the association in Brownwood was accepted.

The following officers for 1917-1918 were elected: president, Octavia F. Rogan, legislative reference librarian of the State Library; first vice-president, Mrs. Nora K. Weems, librarian, Sherman Public Library; second vice-president, Mrs. Maud D. Sullivan, librarian, El Paso Public Library; secretary, Pink V. Noel, librarian, Brownwood Public Library; treasurer, Gladys Allison, children's librarian, Houston Public Library.

LENOIR DIMMITT, *Secretary.*

PUGET SOUND LIBRARY CLUB

The Puget Sound Library Club held its third meeting on Dec. 28, 1917 at Camp Lewis, that place being chosen because for the past several months the center of interest to library people of the vicinity has been the collection of books and the organizing of the library at the camp.

Professor Coleman of Reed College, who is in charge of the educational work of the Y. M. C. A. at the camp, was to have given a talk on "The library and the soldier." Owing to a severe cold he was unable to be present and sent as his substitute, Mr. Harlan of the Y. M. C. A. staff.

The library at Camp Lewis was the first one to be finished and open for use, a matter of considerable pride to the Northwest, and due to the knowledge and skill brought to the task by J. T. Jennings of the Seattle Public Library, who was appointed A. L. A. organizer for Camp Lewis. All welcomed an opportunity of hearing from him an account of this work. He was followed by Edward E. Ruby of Whitman College, now in charge of the camp library. Thru his very enthusiastic story of his month's experience all had a glimpse of the pleasures and problems of the work and above all of its immense possibilities. After luncheon at the delightful Hostess House just across from the library, those who wished, took a sight seeing trip about the camp.

At the afternoon session the club enjoyed a paper on "War poetry" with illustrative readings by John Ridington of the University of British Columbia Library, Vancouver, B. C. The concluding address was on "Dangers to democracy" by Major B. L. Cadwalader of the 363rd Infantry.

Elizabeth Topping, librarian of the Everett Public library, was elected president of the club for its next meeting.

MARY LYTLE, *President*.

CHICAGO LIBRARY CLUB

The club held its meeting Dec. 13, in the Ryerson Library of the Art Institute. Rev. John F. Lyons, who presided, called for a report from the committee on the raising of a \$200 fund pledged by the club for the Henry E. Legler Ambulance Fund. The chairman, Mr. Tweedell reported \$233.26 turned over to *The Chicago Tribune*, which has been receiving contributions for the fund. A vote of thanks was extended by the club to the members of this committee for their good work in collecting such an amount. Mr. Norman, chairman of the membership committee, reported several new members. Mr. Tweedell presented a suggestion from a committee appointed by the president that a handbook of the Library Club members be compiled, and it was voted that the committee be empowered to act as compilers of such a list.

Mr. Skarstedt, who is a member of the publicity committee of the Food Administration Committee of Illinois, talked for a few minutes on food conservation and outlined the work which this committee wished to undertake: to see that all libraries in the state are informed on what the Food Administration wants done in the state, and that librarians are instructed by the publications issued by the Government. The state committee will probably issue a monthly bulletin and will attempt to centralize the distribution of government publications. Mr. Skarstedt spoke of the Food Show to be held at the Coliseum, Jan. 4 to 13, under the direction of the State Council of Defense, at which the libraries expected to be asked to exhibit, and it was voted that the president appoint a committee of from five to seven members to prepare such an exhibit.

Miss Clara E. Laughlin, the speaker of the evening, addressed the club on "Reminiscences of James Whitcomb Riley." She spoke interestingly and charmingly of her early acquaintance with Mr. Riley, and characterized him as a very human person. To have missed knowing Charles Lamb, she said, was equalized by knowing Riley. Miss Laughlin invited the members to ask questions that had come up in library work. She was asked about his personal life, his religious life, and his love of children, all of which she answered, leaving a very lasting and pleasing recollection with those who had not been for-

tunate enough to have known him personally. J. Christian Bay exhibited his Rileyana and spoke a few words on his acquaintance with the Hoosier poet.

JANET M. GREEN, *Secretary*.

SPECIAL LIBRARIES ASSOCIATION — EASTERN DIVISION

A special war-time convention of the eastern division of the Special Libraries Association will be held in Boston, Feb. 8, at 7.30 p. m. Thru the courtesy of the College of Business Administration of Boston University, it will convene in an assembly hall in the Walker Building, 525 Boylston Street.

The program for the meeting as arranged at the present time is as follows. One or two other features may be added later: "War-time education," by T. L. Davis, secretary of the College of Business Administration, Boston University. "Foreign trade in war-time" by Ansel Clark, commercial agent in charge of the Boston office, U. S. Bureau of Foreign and Domestic Commerce. "War-time industries," by Ernest L. Little, secretary of the Textile Department, Merchants National Bank. "Journalism in war-time," speaker to be announced later. "Library service in war-time," by Ralph L. Power, editor of *Special Libraries*. There will be time devoted to a discussion of the program and for questions on each topic.

R. L. POWER, *Secretary*.

WYOMING STATE LIBRARY ASSOCIATION

The following officers were elected at the annual meeting of the Wyoming State Library Association: President, Mrs. Bertha K. Van Devender, Basin; vice-president, Marguerite Cameron, Evanston; secretary-treasurer, Agnes R. Wright, Cheyenne.

Library Schools

NEW YORK STATE LIBRARY SCHOOL

Mary L. Davis, librarian of the Troy (N. Y.) Public Library, has invited the senior class to make a library survey of Troy with special reference to the advantageous locating of prospective branch libraries. Miss Davis gave an introductory talk on the topography and social life of Troy. The students will visit Troy in groups and make first-hand reports on special phases of the problem.

The following visiting lecturers have been heard: Dec. 13-14, Dr. Theodore Koch of the Library of Congress, on "An American librarian in London in war-time," and "The commercial and technical library problem in

Great Britain"; Jan. 12, Sarah B. Ball, on "The library of the United States Rubber Co."

An alumnus who prefers for the present to remain anonymous has offered a prize of twenty-five dollars to the student who presents the best essay on "The importance of location in the work of a public library." The prize will be awarded subject to certain conditions imposed by the donor.

ALUMNI PUBLICATIONS

The publications of former students have increased in number this past year. Forty-eight signed articles by them appear in the *A. L. A. Proceedings*, *LIBRARY JOURNAL*, *Public Libraries* and *New York Libraries*, alone. Many other articles by alumni appear in commission bulletins or general periodicals.

Twenty-seven books or pamphlets (exclusive of bibliographies) are on the list: These include two 1916 publications not noted last year: The "League of Library Commissions handbook," compiled by Henry N. Sanborn and "Institutional libraries" (A. L. A. Pub. Bd.) by Carrie E. Scott. The 1917 publications (nearly all of which have been added to the alumni collection); Bacon, Corinne, "Prison reform" (H. W. Wilson Co.); Bailey, L. J., "Story of the founding of Gary, Ind." (Issued by the history department of the Gary public schools); Brown, Edna A., "The Spanish chest" (Lothrop), a juvenile story; Bullock, Edna D., "Selected articles on trade unions," new ed., (H. W. Wilson Co.); Cole, G. W., "Bibliographical problems with a few solutions" (reprinted from the papers of the Bibliographical Society of America); Dickinson, Asa D., "Wild flowers worth knowing" (Doubleday), an adaptation of Neltje Blanchan's "Nature's garden"; (Mr. Dickinson has also compiled with Mrs. Dickinson as joint author, the "Children's book of patriotic stories" (Doubleday); Goodrich, F. L. D., "Planning a library building," (In Planning the library. Art Metal Cons. Co.); Harrison, Joseph L. (joint ed.), "Campfire verse"; Hazeltine, Alice I. ed., "Library work with children" (H. W. Wilson Co.); Judson, Katharine B., "Myths and legends of British North America" (McClurg), and "Old Crow stories" (Little); Kaiser, John B., "The mountain" and "Report on the . . . library activities of the state of Washington"; Kent, Henry W. (joint editor with J. C. Dana), F. A. Eberts' "The training of the librarian" (Elm Tree Press); Mudge, Isadore G., ed., Kroeger's "Guide to the study and use of reference books" 3d ed. (A. L.

A.); Nelson, Peter (joint author with Jennie D. Fellows, Florence Woodworth and J. I. Wyer, Jr.), "Pamphlets and minor library material" (A. L. A. Manual, Chap. 25); Olcott, Frances J., "Red Indian fairy tales" (Houghton), and "Tales of the Persian genii" (Houghton); Parsons, Mary P., "Select articles on non-resistance" (H. W. Wilson Co.); Pearson, Edmund L., "Book reviews," (Reprinted from the *Bulletin* of the N. Y. Public Library); Quigley, Margery C., "Where neighbors meet" (reprinted from the report of the St. Louis Public Library); Rose, Ernestine, "Bridging the gulf; work with the Russian Jews and other newcomers" (Immigrant Pub. Soc.); Wire, G. E., "Rebacking books" (reprinted from the report of the Worcester County Law Library); Wyer, J. I., Jr., "Later French settlements in New York State" (Reprinted from the proceedings of the New York State Historical Society, 1916).

Separate bibliographies are numerous and those included in periodicals or as parts of books are still more numerous. The following list of those published separately is doubtless very incomplete: Bacon, Corinne, "Books for Christmas for children" (Wilson); Bascom, Elva L. (with Mrs. Dorothy M. Mendenhall), "List of books and pamphlets on child welfare" (Wis. Lib. Comm.); Bullock, Edna D., "Subject index of . . . bills, Nebraska legislature . . . 1916"; Davis, Earl H., "Zoning" (St. Louis Public Library); Dearborn, James M. (with C. N. Baxter), "List of books and newspapers, maps, music and miscellaneous matter printed in the South during the Confederacy and now in the Boston Athenaeum"; Eastwood, Mary Edna, "Best books of 1916" (N. Y. State Lib.); Fowler, Mary, "Catalogue of the Petrarch collection . . . Cornell University" (Oxford Univ. Press); Gamble, William B., "Stage scenery" (reprinted from the *Bulletin* of the New York Public Library); Jewett, Alice L., "Official publications of the State of New York relating to its history" (N. Y. State Lib. Bib. bull. 59); Josephson, A. G. S., "List of books on the history of science"; Lawson, Mildred H., "Annotated list of books on the arts for teachers and students" (rev. by R. B. Farnum); Macmillen, James A., "The Gary system."

FRANK K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

Reading of the stars on the service flags of other library schools reminds us that while the activities of individual students have been

mentioned we have not yet made up the roster of our graduates who have gone into war work. The Director of the School, Mr. Stevens, is under orders for overseas service and is awaiting definite instructions to start.

H. H. Eddy, 1895, is in the library at Camp Devens, Ayer, Mass. Mary Frances Isom, 1900, has been released by the Portland (Ore.) Library board in order to give half-time service to camp library work. Edwina F. Glenn, 1916 (now Mrs. James A. Garfield), organized the technical work of preparing the books at the Chillicothe Library for the library at Camp Sherman. She was assisted by Mrs. Reuben A. Holden, Jr. (formerly Grace Morgan, 1915). Sarah Greer, 1914, has a confidential position under the Federal Government in New York City. Mary T. Atwater, 1915, and Claire N. Atwater, 1917, are in the Ordnance Office in Washington. Evelyn Brooke, 1916, has a position with the Belgian Commission in New York. Helen McCracken, 1917, is cataloging and filing blue prints and drawings at the Naval Aircraft Factory in Philadelphia.

A Red Cross work-room has been opened in the Household Science and Arts Department, and a good many of the present class signed up to work there regularly.

Notices have been received of the following marriages: Della M. Wilsey, 1913, librarian of the Public Library at Richmond, Calif., to James A. McVittie on Dec. 25. Edwina F. Glenn, 1916, to Captain James A. Garfield Dec. 31.

JOSEPHINE ADAMS RATHBONE,
Vice-Director.

SIMMONS COLLEGE SCHOOL OF LIBRARY SCIENCE

The college reopened Jan. 3, after the Christmas holidays.

The elective, "High school libraries," offered this year, has been expanded into a three-hour-a-week course, from Jan. 3 to March 21, in charge of Miss Donnelly, assisted by visiting lecturers. The class was addressed, Jan. 4, by Alice Charlton, librarian of the Minneapolis Board of Education, and Jan. 15, by Clarence D. Kingsley, agent for high schools, Massachusetts State board of education. Dr. Wolcott, of the United States Bureau of Education, loaned his collection of lantern slides of high school library rooms for an illustrated lecture. An interesting piece of practice, the reorganizing of the library of the Charlestown High School, has been begun, and will be carried on as rapidly as the coal situation permits.

Thruout the year students have been assigned to practice work in the libraries of Norfolk House Centre, where the experience is chiefly with children, and the Women's Educational and Industrial Union, as well as the affiliated Social Service Library.

Miss Maud J. Campbell, of the Massachusetts Free Library commission spoke on "Work with foreigners" on January 15.

Visits were made Nov. 26 to the Brookline Public Library; Dec. 10, Perkins Institute for the Blind; Jan. 8, North End branch, Boston Public Library; Jan. 21, Widener Library, Harvard University.

The following marriages are announced: Marian Cross, 1915, to Henry Lucas Curtis, Dec. 27, 1917. Ruth Eaton, 1915, to John Hancock Gillis, Nov. 17, 1917. Christine Hargrave, 1910, to George G. Crowell, April 4, 1917. Mary Pinkham, 1915, to Dr. Edward Bates Peck, Dec. 12, 1917.

JUNE RICHARDSON DONNELLY, *Director.*

CALIFORNIA STATE LIBRARY SCHOOL

B. B. Futernick, of Foster and Futernick, library bookbinders of San Francisco, gave two lectures in December on bookbinding for libraries, illustrated with samples of leather, and with books in the various stages of binding. Each student was given a booklet of samples of the different kinds of cloth and leather used in bookbinding.

To complete the course in library law under Miss Eddy, a mock meeting of a board of supervisors in the act of establishing a county free library was presented by the members of the class. The characters taken by the students were the chairman of the board of supervisors, and the four members—the county superintendent of schools, the county farm advisor, the president of the woman's club of the county seat, a trustee of the local public library, the secretary of the chamber of commerce, the district attorney and the county library organizer from the State Library. The part of the objecting citizen was taken by Miss Eddy. Arguments for and against the county free library were offered and difficult points of the law explained. Needless to say, at the close of the meeting the board of supervisors voted unanimously to establish a county free library in their supposititious county. So clear an idea was given of the work of the county library organizer, and the method of establishing a county free library, that the mock meeting will be repeated in January at the regular monthly staff meeting.

Just before school was dismissed for the Christmas holidays, the following subjects

were chosen for the bibliographies which will be prepared during the second term. Compulsory health insurance; Gary school system; Modern short story writers; Child welfare; Life and works of Rodin; New theater; County libraries; Short story writing; Life and works of Fabre; Russia, its political and social aspects since the outbreak of the war; Red Cross.

Dorothea Davis, 1917, has resigned her position as assistant in the Fresno County Free Library, to accept the position of librarian in the Fresno High School Library.

Margaret Girdner, 1917, has begun work in the California State Library.

MILTON J. FERGUSON.

WESTERN RESERVE LIBRARY SCHOOL

The students heard Mrs. Gudrun Thorne Thomsen, Dec. 14, when she spoke before the Children's Training Class of the Cleveland Public Library on "Robin Hood," illustrated by stories. The course in children's literature given each year by Mrs. Edna Lyman Scott began Jan. 14. Introductory to the course, the Director spoke on "History of children's work" and Miss Caroline Burnite, director of children's work in the Cleveland Public Library, lectured on "Management of children's rooms."

The Christmas holiday of two weeks ended Jan. 3. At a Christmas party given by the students before the holidays, a pantomime based on a Christmas scene from "Pickwick papers" was given; and the singing by students of Christmas carols outside the lecture room windows added to the pleasure of the evening.

Cards have been received announcing the following marriages: Evelyn C. Hess, 1913, to Herbert D. Allen of St. Joseph, Michigan, and Helen L. Shearer, 1916, to David B. Shaw of Youngstown, Ohio.

ALICE S. TYLER, *Director*.

LIBRARY SCHOOL OF THE LOS ANGELES PUBLIC LIBRARY

The only outside lecturer of the month was Mrs. Harriet Mackey, dean of women of the University of Southern California, who addressed the school Dec. 13 on "The development of types of literature."

The school attended the meeting of the School Library Section of the California Teachers Association in Los Angeles the last week before the holidays. A large part of the program was devoted to methods of relating the library to the school curriculum. The hour preceding the program was devoted to the inspection of an exhibit of school li-

brary methods prepared by the school librarians of Los Angeles. As some time will be given later in the course to lectures and practice in the preparation of exhibits, special attention was given to the arrangement of the material displayed and the accompanying posters and placards.

THEODORA R. BREWITT, *Principal*.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

According to reports recently received, Forrest B. Spaulding, 1912-14, is librarian at Camp Dodge, Iowa, and is spending five days each week at the cantonment. Frederick Goodell, 1912-14, formerly reported as assisting at Camp Wheeler, Georgia, is library organizer and librarian there. E. J. Roswell Hawley, 1913-15, returned lately to the United States after working for six months with a private ambulance corps in France.

Recent changes by advanced students include the transfer of Laura M. J. Bertemy from Traveling Libraries to the Tremont Branch of the New York Public Library; the resignation of Helen Louise Crowe (Pratt Institute of Library Science 1915-16) from the Arts and Prints division of the New York Public Library to accept a position in the Brooklyn Institute of Arts and Sciences; and the appointment of Jeanie M. Reid to a place in the library of Columbia University.

ERNEST J. REECE, *Principal*.

LIBRARY SCHOOL, CARNEGIE LIBRARY OF ATLANTA

The School had the privilege of having a lecture on "Patriotism" from Adam Strohm on Dec. 7. Mr. Strohm was at Camp Wheeler in Macon, Georgia, for several weeks organizing the camp library there.

George A. Deveneau, librarian of the Agricultural College of the University of Illinois and library publicity director for the Food Administration for Illinois, spoke to the school on Jan. 4 on the "Part of the library in food conservation."

TOMMIE DORA BARKER, *Director*.

ST. LOUIS LIBRARY SCHOOL

On Dec. 12 the school had an extremely interesting lecture entitled "Forty years of publishing" by Wm. W. Ellsworth, formerly president of the Century Company.

After a ten days' vacation the second term of work opened Jan. 3. One of the first appointments was a lecture by Winthrop Holt Chenery, librarian of Washington University, on the "Literature of architecture." The following week, Mrs. Harry January, secretary

of the Consumers' League of Missouri, talked on the "Responsibility of the citizen for industrial conditions."

Marie Jones, 1917, has just been appointed assistant in the Washington University Medical Library.

RIVERSIDE LIBRARY SERVICE SCHOOL

The Riverside Library Service School has now three stars in its service flag. Hilda Smeal, Riverside 1915, is driving an ambulance in France, Alvan W. Clark is assistant librarian at Camp Sevier, and Ralph A. Beals is assistant librarian at Camp Cody.

JOSEPH F. DANIELS.

UNIVERSITY OF WASHINGTON LIBRARY SCHOOL

All present and former students of the Library school are regretting the resignation of Miss Mary Hubbard, who was recently appointed head of the reference department of the Spokane Public Library. She took the new position on Jan. 1. Miss Hubbard came to us from the University of Illinois Library School, class of 1913, and since that time has held the position of instructor in cataloging and assistant reference librarian. The senior class gave a dinner at the University Commons, Dec. 10, in honor of Miss Hubbard.

Miss Evelyn Blodgett, Vassar 1909, Pratt 1911, has been appointed instructor in cataloging to succeed Miss Hubbard. Miss Blodgett has been head cataloger of the University of Washington Library since 1916.

Mary Ferguson, 1917, is a student in the New York Public Library School.

Margaret Schumacher, 1917, has been appointed assistant in the reference and cataloging departments at the University of Washington Library.

Flora Morgan, 1917, was married Nov. 4, 1917, to William J. Shaffer.

W. E. HENRY.

BOSTON UNIVERSITY—LIBRARY COURSE

Recent lecturers have been Charles R. Green, librarian of the Massachusetts Agricultural College, on "Agricultural literature"; Edward D. Greenman, librarian of Arthur D. Little, Inc., on "Technical literature"; Ernest L. Little, assistant manager, industrial service department, Merchants National Bank, on "Literature of the textile industry." From the college faculty: Prof. Roy Davis on "Business letter writing." War libraries and literature have been discussed.

A new course in library economy begins the second term and will include the usual subjects with special emphasis on digesting of business information, specialization, co-

ordination, etc. Two sections have been formed, one in the day and one in the evening division.

Julia L. Crocker, librarian at Stoneham, and a special student in library work here, leaves in February to go to the Minneapolis library system.

RALPH L. POWER.

DREXEL INSTITUTE LIBRARY SCHOOL ALUMNI ASSOCIATION

The annual meeting of the Drexel Institute Library School Alumni Association was held at the College Club Philadelphia, Pa. Miss Dougherty presided, and sixteen were present at the dinner. Miss Perkins, the treasurer, reported \$90 of interest money from the Kroeger Memorial Fund in the bank. It was voted to give \$75 of this to the War Book Fund.

Miss Shoemaker gave a very interesting report of the Drexel dinner at the A. L. A. meeting in Louisville, where thirteen were present, four of whom were members of the class of 1912.

The officers elected for the following year are: President, Miss Stanger; vice-president, Miss Dougherty; treasurer, Miss Perkins; secretary, Miss Trimble; executive committee, Miss Hunter, Miss Snyder, and Miss Coplin.

KATHERINE M. TRIMBLE, *Secretary.*

WASHINGTON PUBLIC LIBRARY—SPECIAL TRAINING COURSE

As the staff of the Washington Public Library is being seriously depleted by the drafts made upon it by the offices of the United States Government for war workers, the library is about to start a one month course to prepare young women between the ages of 18 and 25 years to fill its junior clerical positions. During the month's training there will be no remuneration. At the completion of the course, vacancies will be filled from those who complete this course at basic salaries beginning at \$45 per month, that is, with 10 per cent war increment, \$49.50.

The course will train candidates mainly for the record work of the library involved in the circulation of hundreds of thousands of books annually, and will include typewriting and other record writing, classification, filing and the routine of the circulation departments.

The class is intended for persons seeking positions in the library and requires that those who complete the course shall accept positions if offered within two months, and shall remain in the service of the library at least six months. The library would be able to recommend for positions elsewhere any persons in

the class whom it will be unable to appoint to its own service within a reasonable time. However, resignations from the library service are so numerous that it seems likely that the library will need any class of reasonable size that may be conducted.

This course for junior clerical workers should not be confused with the eight months' training class conducted annually by the library for its more advanced and professional positions.

Reviews

KROEGER, ALICE BUTLER. *Guide to the study and use of reference books*. Third edition, revised throughout and much enlarged by Isadore Gilbert Mudge, reference librarian, Columbia University. Chicago: A. L. A. Publishing Board, 1917. \$2.50.

Nine years after the second edition of Miss Kroeger's *Guide* comes the third edition (the first since the author's death), under the able editorship of Miss Mudge. The general plan and arrangement of the work have been retained and also the introductions to Miss Kroeger's two editions, but the work has undergone a thoro revision, all out-of-date editions and titles having been eliminated and a large number of titles added, the majority of these being books in foreign languages. Many of the former lists have been greatly augmented, noticeably these: periodicals, foreign dictionaries, authors' dictionaries, concordances, gazetteers and statistics. In addition, many new lists have been added, such as constitutional and international law, romances, historical source books and English public documents. The result of these additions has been to increase the size of the book about fifty per cent.

The work is to all intents and purposes a new work so far as concerns annotations upon books discussed. The annotations also have been written from the view point of reference work in a much greater degree than in previous editions. Information has been brought down to the end of 1916 (in some instances to 1917), altho necessarily the European war has caused uncertainty in the case of many German and Austrian titles. The compiler has abandoned the paragraph system used in earlier editions, and has given to each work treated, an individual title entry and when necessary, a descriptive note.

The extent of the enlargement of the book can be best realized by taking a single example. Under "periodicals" in the second

edition there were given 75 entries: general indexes, 12; general lists, 5; union lists, 10; special indexes, 20; technical lists, 6; newspapers, 12. The corresponding section in the new edition shows: general indexes, 30; special indexes, 41; bibliographies, 19; union lists, 17; technical lists, 5; newspapers, 17. Total, 129. It will be noted also that the classification of titles has been bettered and made more strictly scientific.

The annotations give decidedly more information than did the annotations of earlier editions. A good illustration of this may be noted by examining the entry concerning Poole's index in the two editions. Aside from some historical matter as to the origin of the index the entry in earlier editions adds only the information that the list of periodicals indexed may be found in the front of each volume and that the volume numbers in the index do not always correspond to the volume number used in the periodical. The corresponding note in the new edition points out in addition that the index is a subject index only, describes the plan of the indexing, the extent to which the indexing of the various volumes has been carried, and the method by which the date of any given article may be determined. It also tells where lists of Errata have been published. It will be seen from these examples how thoroly the body of the text has been re-written and how full and complete is the information given.

Such a work as this can of course be criticized from a variety of standpoints. Viewed as an aid to the purchase of reference books in the small or moderate sized public library it might be criticized both as being too full and as containing too many books not suited for the general public. Partly to meet this criticism there is given at the end (as in earlier editions) a suggestive list of the 100 reference books most suited to the small library. The book, however, is not made solely for the small libraries, but as well for the large reference libraries. For these the new edition is undoubtedly far superior to the second edition. The selection of titles has been made out of a rich reference experience, supplemented by the opinions of reference librarians in the special fields of law, technology, music, et cetera. Opinions as to the merits of reference books will always differ, and one might raise a question as to individual titles included, but in the main the selection has been a very severe one and it would be showing little appreciation of the high standard maintained to try to pick flaws here and there. Possibly a little fuller evalua-

tion, as between titles to some extent competing with each other, might have been introduced with profit, altho here there is a great improvement upon the earlier editions.

The greatest users of the book, however, are likely to be students in the library schools, for almost universally this has become the text-book for library school courses in reference work. For such users, the book seems to me well-nigh ideal. The titles are exact, with annotations which give a clear idea of the contents of the work. The especial characteristics of each work are well set forth; in short, there is given just the information which the student needs in order to understand the service which the work can bring to the user.

The titles given are of course far too numerous to be studied in any one course on reference work, and if the work were published solely for this class of users, criticism might be made at this point. Considering the other uses to which the book will be put, such criticism would have little justice in it. Moreover, from the point of view of reference study, it is not a bad thing for the student to realize that she has only begun the study of reference tools and that there are many other titles about which she must inform herself by private study.

To the college and university librarian this edition will be most welcome. The author's experience as reference librarian in one of our largest universities has led her to include in this new edition many more books of a scholarly character than have appeared in earlier editions. This is especially noticeable in the case of books in languages other than English. The work will prove, therefore, of the greatest service to librarians of educational institutions in bringing their reference collections up to date by the purchase of the latest editions and by the purchase of works hitherto over-looked.

While the smaller and medium-sized public library may criticize such generous inclusion of works in foreign tongues, the large public libraries, the large reference libraries and the libraries of educational institutions generally will find the work of the greatest possible service and will be deeply grateful to the compiler for the greatly enhanced scholarly worth of the books included.

AZARIAH S. ROOT.

KOCH, THEODORE WESLEY. *A book of Carnegie libraries.* H. W. Wilson Co., 1917. x, 226, v-viii p. O. \$2.50.

It is said that Edison, when he intends to

address himself to the solution of a difficult problem, familiarizes himself fully with the progress and the failures of others who have attempted to solve the same problem, thus taking advantage of all existing knowledge upon the subject and avoiding a repetition of mistakes. We suspect that the average American community, in addressing itself to the problem of erecting a public library building that will be an effective educational instrumentality, has seldom taken this obviously wise preliminary step. In fact, it has not been altogether easy for either librarian or layman to inform himself as to previous adventures in library architecture, for there has been all too little literature available.

Theodore Wesley Koch, in preparing for publication "*A book of Carnegie libraries,*" has again made a definite contribution to the literature of librarianship. In 1907 he undertook to collect into a portfolio plans and illustrations of typical or notable Carnegie buildings. He has now prepared appropriate descriptive text to accompany these plans and illustrations, and thru the Wilson Company has presented to the public a handsome volume containing two hundred twenty pages of text and over two hundred cuts illustrative of library buildings, library plans, and library work. Included in the volume will also be found a character sketch of Andrew Carnegie by Hamilton W. Mabie, and a chapter on "*Carnegie libraries and good reading,*" by Dr. Arthur E. Bostwick. Mr. R. R. Bowker contributes the introduction.

In both his cuts and descriptive matter, Mr. Koch covers almost the entire country, devoting chapters to the Manhattan branches, to the Brooklyn branches, to Pittsburg libraries, and to the libraries of the south, of Ohio and Michigan, of Wisconsin and the middle west, of Iowa and the farther west, of the southwest, of the Rocky Mountain region, and of California.

Possibly the most interesting chapter in the book is that upon the "*Method of giving,*" which constitutes an excellent presentation of the principle back of Mr. Carnegie's requirement that the community receiving a gift must agree to provide an annual fund for maintenance and operation equal to at least ten per cent. of the gift. "To the fact that the communities are expected to maintain and develop the many free libraries which are scattered over Great Britain, Mr. Carnegie attributes most of their usefulness." . . . "I do not want to be known for what I give," said Mr. Carnegie on one occasion, "but for what I induce others to give."

In the chapter on "Library planning" Mr. Koch makes many valuable suggestions and presents clearly the considerations that enter into the planning of a library, quoting at some length from an editorial in the *LIBRARY JOURNAL*, and from several library architects of experience.

Mr. Koch has selected the plans and illustrations of buildings erected prior to 1907, and has made no effort to cover the succeeding ten years. During this decade it is of course true that the Carnegie Corporation and the members of the library and architectural professions have worked out improved standards of architecture which have possibly rendered some of the more recent buildings more beautiful and more effective from an administrative standpoint than are some of those depicted in this volume. The volume has a definite historical value, however, and presents adequately the claims of the various types of buildings. Certainly no committee or board charged with the responsibility of producing a library building for a community can afford to ignore the background presented by the material contained. If mistakes have been made in the construction of these earlier buildings here depicted (and these do not seem to be many or serious), a repetition of them will be prevented by the supervision which proposed plans receive from Mr. James Bertram, secretary of the Carnegie Corporation. Libraries should secure this volume even though they realize that the library building development of the last decade is not therein presented; we hope it is later to be presented in a supplementary volume, preferably by Mr. Koch.

M. S. DUDGEON.

BIBLIOTHEQUES MUNICIPALES DE PARIS. Liste de nouvelles acquisitions, année 1917; rédigée par Mmes. Béru et Darricaud, avec introduction par Ernest Coyecque. Paris: Plon-Nourrit, 1917. 95 p.

Each year the director of the municipal libraries of Paris is required to publish a list of the works appearing during the preceding year and which by their nature are suited to the work of these libraries. The list is intended as an aid to the librarians of the 83 municipal libraries, in their annual selection and purchase of books.

In his introduction to the 1917 "Liste de nouvelles acquisitions" to the municipal libraries in Paris, M. Ernest Coyecque, the inspector of libraries for the city of Paris and the department of the Seine, touches upon the part these libraries can play in the great

work of national upbuilding which will follow the close of the Great War. With the purpose of making the libraries of Paris increasingly effective in their relation to the daily life of the people, inspired, as he puts it, "by the conviction that Paris has as much need of learning to read, of knowing how to read, and of being able to read, as Glasgow, New York, or Chicago," the city's municipal libraries are now being renovated and reorganized in conformity with the principles of library practice which have been found effective in England and America.

One step in this reorganization is exemplified in the 1917 "Liste." Prior to 1914 this list of additions had been prepared in tabulated form, and its chief value when printed was as a record of current book prices and expenditures. Beginning with 1914, the lists have been improved each year, until they now form a real library tool, of constant usefulness both to the librarian and to the public. The 1914 list for the first time printed, in addition to its record of books, a list of 61 desirable periodicals, thus calling to the attention of the librarians the necessity of developing in each library greater appreciation for this class of publications.

In 1915 further innovations were introduced thru the increase of analytical notes, the closer sub-divisions of the scheme of classification, and the printing of the notes on one side of the page only, permitting them to be clipped and pasted.

The 1916 List was further distinguished by three additions: a list of publications on the Great War, a list of works on Paris and its environs, and a list of the reference works which should be found in every properly organized library.

In the 1917 List the record of works on the Great War or inspired by it is divided into two parts, the foreign ones being separately grouped. In each group the fifteen sections of the regular scheme of classification are represented. This year each book entered is made the subject of an analytical note which gives an idea both of its contents and of its inspiration. For the first time an alphabetical list of authors is appended to the List; and finally (and this is considered worthy of special comment in the introduction), the List is the work of two women, Mmes. Béru and Darricaud, whom the war has brought into the "service municipal de la lecture."

The List is illustrated with views of the old quarters occupied by the Bibliothèque rue Didot, 57, and of the new and more spacious

rooms it now uses. The article on the St. Louis book-wagon, printed in the *LIBRARY JOURNAL* for September, 1916, is also reprinted with illustration, for the inspiration of those librarians of France who are concerned with the extension of library facilities throuth their land.

F. A. H.

Librarians

ALEXANDER, Ruth, Simmons Summer Class 1909, is working with the Red Cross in Washington, D. C.

ALLEN, Anita, Simmons 1915 (on leave from Simmons College Library), is organizing the North Jay (Maine) Library.

ARCHER, Frances Randolph, Atlanta 1910, has been appointed head of the reference department of the Carnegie Library of Atlanta.

BALDWIN, Rachel, Pratt 1908, who has been for the past two years first assistant in the children's department of the Carnegie Library at Pittsburgh, has been made librarian of the Allegheny High School in Pittsburgh.

BATCHELLER, Margaret, Simmons 1915, has been appointed index and filing clerk in the Ordnance Department, Washington, D. C.

BEAL, Helen Marjorie, Carnegie 1914, has been appointed children's librarian at the Hazelwood branch, Carnegie Library of Pittsburgh.

BEATTY, M. Irene, New York State Library School 1914-15, has resigned as assistant in the Lawrenceville branch of the Carnegie Library of Pittsburgh, to become head of the circulation department of the St. Joseph (Mo.) Public Library.

BEMIS, Dorothy, Pratt 1916, has accepted a position in the Guaranty Trust Company of New York.

BROWN, Edith, Simmons 1914, has been appointed index and filing clerk in the Ordnance Department, Washington, D. C.

CARSON, Helen, University of Washington 1914, is taking the training course for children's librarians at the Carnegie Library School, Pittsburgh.

CLARK, Martha, of the catalog department of the St. Louis Public Library, has accepted a position as branch librarian in Superior, Wisconsin. She begins her work Feb. 1.

COBB, Lucille, Atlanta 1914, has received an appointment as catalog clerk in the Ordnance Department, Washington, D. C.

COBB, Mrs. Dorothy Moss, Riverside Library Service School, long course 1915-16, died Jan. 5, at Palo Alto, Calif.

COLDREN, Fanny, Riverside 1916, is now a student at the University of Illinois.

CLARK, Helen M., Simmons 1917, has been appointed desk assistant in the South Bend (Ind.) Public Library.

COLLINS, Ethel, Riverside 1917, now with the Indexers of Chicago, has been appointed assistant librarian of the Southwest Texas State Normal School at San Marcos, Tex.

COSTON, Eunice, Atlanta 1912, has received an appointment in the Civilian Personnel Division of the War Department at Washington, D. C.

CRISWELL, Clare, returned to the Tacoma Public Library, Jan. 1, 1918, after eleven months absence, and has become a member of the loan department staff.

CROCKER, Julia, Simmons 1905-08, is an assistant in the Minneapolis Public Library.

CROWELL, Edith Hall, Library School of the New York Public Library 1911-13, has resigned as librarian of the Bernardsville (N. J.) Public Library. She has accepted a position in the New York Division of the Ordnance Department of the United States Army.

DAVIS, Frances A., former state librarian of Wyoming, was married to Martin A. Tisdale of Mayoworth, Wyo., at Trinity Cathedral, Omaha, on Dec. 13. Miss Davis was president of the Wyoming State Library Association for two years, and vice-president of the State Library Association for one year.

DIESCHER, Irma Endres, Carnegie 1916, has resigned her position on the staff of the Carnegie Library of Pittsburgh.

DUPREY, Addie, a graduate of Syracuse University Library School, has been appointed assistant librarian in the U. S. Naval War College, Newport, R. I.

EBERLIN, Laura, Library School of the New York Public Library 1915-17, has been transferred from the 96th Street branch of the New York Public Library to the Staten Island office.

FARR, Mary P., Drexel 1895, is re-cataloging the Lenox Library, Lenox, Mass.

FENNELL, Annie, Simmons 1915, is a cataloger in the Massachusetts State Library.

FRICK, Eleanor H., for many years librarian for the American Society of Civil En-

gineers, before its union with the library of the United Engineering Society, has compiled a proposed classification for an engineering library. In this work Miss Frick was assisted by Esther Raymond, an assistant in the same library. The classification is printed in the Proceedings of the Society (Vol. XLIII, no. 10), as an appendix to a paper by Dr. Chas. Warren Hunt on "The activities of the American Society of Civil Engineers for the past twenty-five years."

GOODFELLOW, Mary E., Riverside 1917, is on the staff of the Long Beach Public Library.

HAIGHT, Rachel Webb, Drexel 1911, was married Aug. 7, 1917, to Charles Stockton Brewster and will make her home in West La Fayette, Ind.

HAMMOND, Esther, who had been a member of the lending department staff of the Tacoma Public Library for only four months, was obliged to give up her work Jan. 1, owing to ill health. Miss Hammond graduated from the University of Washington Library School in June, 1917.

HANSON, J. C. M., secretary of the committee appointed in November, 1914, to investigate the relations of departmental libraries in the University of Chicago, has edited and had printed the report of the committee.

HARRIS, Rachel R., New York State Library School 1917, is assisting temporarily in the children's department of the Syracuse Public Library.

HATCH, Alice K., St. Louis 1915, assistant in the Central children's room of the St. Louis Public Library, has become children's librarian of the Public Library at Clinton, Iowa.

HAUGHENBERRY, Chloe, Simmons 1915-16, has been appointed index and filing clerk in the Ordnance Department, Washington, D. C.

HERRON, W. W., of St. Louis, has been elected assistant state librarian of Missouri to succeed Oscar Johnson, resigned.

HOWE, Ellen, University of Washington 1915, Carnegie Library School 1917, is now superintendent of children's work and director of work with schools at Calgary, Canada.

HUBBARD, Mary, former assistant reference librarian at the University of Washington, assumed the duties of head reference librarian in the Spokane Public Library, beginning Jan. 1. Miss Hubbard went to the university

four years ago, following her completion of the library course at the University of Illinois.

HUGHES, Esther, Syracuse 1916, has resigned as assistant librarian of Union College, Schenectady, N. Y., to accept a position as index and catalog clerk in the Ordnance Department, Washington, D. C.

HUNT, David Hopkins, of White Plains, N. Y., librarian of the Supreme Court of the Ninth Judicial District, died at his home on the New York Post Road, Jan. 3. He was sixty-two years old. He had complained greatly of the cold just before a paralytic stroke overcame him. Mr. Hunt, a brilliant criminal lawyer, came of an old American family. He was graduated from the University of Fordham, which conferred three honorary degrees on him. He wrote the revised edition of "Waite's Practise" and was a member of the Authors' League of America.

HURT, James, librarian of the Lyceum Library in Liverpool, England, and president of the North-Western Branch of the Library Assistants' Association, has been appointed chief librarian at Portsmouth, England.

HYDE, Sara Gardner, of the Yale Library staff, died of pneumonia at Ware, Mass., on Jan. 3, after a brief illness. Miss Hyde was a graduate of Mount Holyoke in the class of 1892, took honors in her first year of the New York State Library School in 1900, and later received the degree of B.L.S. She became an assistant in the New York State Library, working in the study clubs division and later in the catalog division. She assisted in the re-organization of the Library of the United States Geological Society, having charge of the cataloging, the making of schemes of classification, and the printing of cards. In November 1917 she became senior catalog reviser of Yale University Library, and held that post until her death. She had in a high degree the professional qualities of accuracy and thoroughness, with the implied patience and perseverance; to her scholarly outlook she added distinct business ability. She had in addition a friendly fairness, and a warm and ready sympathy, which won for her the esteem and loyalty of her co-workers.

JACOB, William F., E.E., formerly of the Engineering Societies' Library of New York City, is now librarian of the Main Library of the General Electric Company at Schenectady, New York.

JAMISON, Alma, Atlanta 1915, has received an appointment as catalog clerk in the Ordinance Department, Washington, D. C.

JOECKEL, C. B., librarian of the Berkeley Public Library, who was granted an indefinite leave of absence to join the first Reserve Officers Training Camp at the Presidio of San Francisco, received a lieutenant's commission and was sent to Camp Lewis in August, where he is still stationed, training drafted men. Miss C. A. Hayward is acting librarian during his absence.

JOHNSON, Oscar, assistant state librarian of Missouri, has resigned his position.

JONES, Mary Helen, Drexel 1913, has resigned her position at the University of Pennsylvania, Phila., Pa.

KILBOURN, Katharine, Simmons 1916-17, is a cataloger in the University of California Library.

KIMBALL, Florence B., New York State Library School 1906-07, has resigned as cataloger at the Providence, R. I., Athenaeum Library to organize a library at Central Falls, R. I.

KIMBLEY, Gertrude, Riverside 1916, has been employed as librarian of the Medical College of the University of Southern California, Los Angeles.

KOHLER, Pearl, Riverside 1916, recently at the Beaumont (Calif.) Public Library, is now on the staff of the Riverside Public Library.

LEIPZIGER, PAULINE, for fifteen years librarian of the 58th Street branch of the New York Public Library, retired from active service on January first of this year. Miss Leipziger became connected with the New York Public Library through the consolidation with that institution in 1903 of the Aguilar Free Library, with which she was identified for about twelve years, during practically all of which period she was the chief librarian of the system with its four branches. Much of Miss Leipziger's work in the old Aguilar Free Library was of a pioneer nature. This library was noted for the value of its book collections from a literary standpoint, both in the circulation and reference departments. It was one of the libraries to recognize early the importance of opening the libraries as widely as possible to the public; adopting the open shelf system; co-operating by the means of travelling libraries with the public schools, etc.; establishing special children's rooms; circulating per-

iodicals as well as books; and adopting what is known as the "two' book system." As librarian of the 58th Street branch of the New York Public Library, Miss Leipziger retained fully her interest in the development of the resources of the library in every way; and she retires from library work with a distinct record of accomplishment which will be long remembered by those who were intimately associated with her.

LONGSHORE, Alice, Atlanta 1916, has been appointed an assistant in the Library of the University of Montana, Missoula, Montana.

MCCLURE, Agnes Aitken, Library School of the New York Public Library 1911-12, is now in the reference cataloging department of the New York Public Library, having left the staff of the H. W. Wilson Company.

MACKENZIE, Vivien C., Western Reserve 1911, has recently been appointed a branch librarian of the Portland (Ore.) Public Library.

MICHELbacher, Aimee, Riverside 1913, has been appointed statistician of California State Board of Charities and Corrections, Sacramento.

MYER, Caroline, of Winona College, Winona, Ill., has been appointed librarian of Westminster College in North Wilmington, Pa.

NISBET, Lillian, Simmons 1914, has been appointed head cataloger for the Providence Athenaeum Library.

NIXON, Elizabeth, Carnegie 1913, is substituting in the children's department, Carnegie Library of Pittsburgh.

O'CONNOR, Alice Keats, Library School of the New York Public Library 1911-13, has been granted a year's leave of absence from the New York Public Library to go to France with the Young Men's Christian Association for canteen service.

OLSCHEWSKY, Johanna, Library School of the New York Public Library 1914-16, has been transferred from the Yorkville branch to the 96th Street branch of the New York Public Library, as first assistant.

RANSOM, Mrs. Stella, resigned from the Buffalo Public Library, Jan. 1. On Nov. 30 she completed 33 years of service in the library, having become a member of the staff in 1884, when the library belongs to the Young Men's Association. When it became a public institution she was placed in charge of the periodical room.

RICHARDS, Elizabeth M., Western Reserve 1911, has entered upon her duties as librarian of the Birchard Library of Fremont, O., succeeding Miss Eva M. Morris, '12.

ROBERTS, Flora B., for several years librarian of the Pottsville (Pa.) Public Library, has resigned to take charge of the Public Library in Kalamazoo, Mich., beginning Feb. 1.

ROBERTS, Katharine Olcott, Carnegie 1917, has resigned her position on the staff of the Cincinnati Public Library to accept a position in the Children's Department of the Carnegie Library of Pittsburgh.

RUPP, Alice Frederika, Library School of the New York Public Library 1913-15, has given up her position in the Tremont branch of the New York Public Library and is now with the Library of the United Engineering Societies.

SANBORN, Henry N., has resigned his position as secretary of the Public Library Commission of Indiana to become librarian of the Public Library at Bridgeport, Conn., assuming his new duties Feb. 15.

SAXER, Elsie M., leaves the catalog department of the St. Louis Public Library to take up work as general assistant in the public library of Superior, Wisconsin, on Feb. 1.

SCARF, Joice, Simmons 1915-16, is now reference librarian for the Iowa State Agricultural College.

SCHUMACHER, Margaret, on the staff of the Seattle Public Library since her graduation from the University of Washington Library School in 1916, succeeds Miss Hubbard as assistant reference librarian in the University of Washington Library.

SHAW, Maude Imogene, Carnegie 1916, has been appointed in the Public Library of Sandusky, Ohio.

SHAW, Natalie (Howe), Simmons 1911, is temporarily assisting in the Eveleth (Minn.) Public Library.

SMITH, Louise, University of Washington 1913, was married Dec. 8, 1917, to Lieut. Asa Baldwin, who is stationed at Camp Lewis, Washington.

STAFFORD, Alice, graduate of Pomona College, and Riverside 1915, was married to Freeman Morgan Eakin, and is living at Claremont, Calif.

Word has been received of the marriage of Miss Elizabeth C. Stevens, Pratt 1898, to Mr.

William B. Forrest. Mr. and Mrs. Forrest are living in Pittsfield, Mass.

STEVENS, Grace A., of Butte, Mont., has been elected librarian of the Public Library at Virginia, Minn., taking up her duties about Feb. 1.

SUBERS, Helen D., Drexel 1903, is reorganizing the Public Library, Kalamazoo, Mich.

TALBOT, Mary, Simmons 1912, is assistant librarian for the New Jersey Zinc Co., New York.

TERRY, Helen Harsh, Western Reserve 1915, has been assisting in the Camp Sheridan Library at Montgomery, Ala., while her husband, Lieutenant Terry, is in camp there.

THOMAS, Gezina, University of Washington 1916, was married Oct. 20, 1917, to Ewart Steele Upper.

THOMSON, Grace F., Library School of the New York Public Library 1914-16, who has been serving in the American history division of the New York Public Library has taken a position in the Library of the American Numismatic Society.

TRACEY, Catharine S., has joined the staff of the H. W. Wilson Company as editor of the Cumulative Book Digest.

WALKER, Catherine, Atlanta 1913, has resigned her position as head of the reference department, Carnegie Library of Atlanta.

WELLS, Edna, Simmons 1912, has been appointed cataloger for the National Industrial Conference Board, Boston.

WHITE, Frances, Riverside 1917, has leave from the Monroe (Wis.) Public Library and is at present with the Indexers of Chicago.

WILSON, Dorothy, Carnegie 1917, married Lieutenant Robert Mortimer Yates, in December, 1917.

WILSON, Eunice, who organized the Fort Washington branch of the New York Public Library and has been its librarian since, has been transferred to the 58th Street branch to succeed Miss Leipziger, resigned.

WILSON, Gertrude Hurst, Library School of the New York Public Library 1912-13, was married on Dec. 6 to Lieutenant Frank Lawrence Beattys.

WRIGHT, Agnes R., has been appointed state librarian in Wyoming, with Martha Post as assistant.

THE LIBRARY WORLD

New England

MASSACHUSETTS

Beverly. The new library building at Beverly Farms, donated by the Misses Loring and opened last fall, is fully described and illustrated in an article by Meyric R. Rogers in the *Architectural Record* for December, 1917 (p. 529-539).

North Adams. The Public Library has received from George D. Stiles of Claremont, N. H., whose family was among the pioneers of North Adams, a copy of an address of appreciation and welcome from the Greek nation to Admiral Farragut on the occasion of the visit of the latter with his frigate *Franklin* at Constantinople in 1868. The address is printed in two columns, in English and in Greek on a sheet about 8 x 13 inches, and has been framed by the donor. The paper was found among the effects of Mr. Stiles' uncle, Augustus Nelson Stiles, who served under Farragut in the Civil War and was one of the crew of the *Franklin*. This visit of the *Franklin* to Constantinople caused a considerable flurry of diplomatic correspondence. According to existing treaties, no vessel of the *Franklin's* size could be permitted to enter the Bosphorus; so Farragut visited the great city of the Sultan in the *Frolic*, a smaller vessel of his fleet. In the mean time, the American minister, Hon. Lovejoy Morris, was anxious that the flag ship should be allowed to visit the city and after strenuous efforts to obtain that privilege, finally triumphed. It seems that shortly before this time, an exception had been made in favor of the Grand Duke Alexis, of Russia. Mr. Morris insisted before the ambassadors of the five great powers, to whom his application had been referred, that "the Admiral was one of the most distinguished members of the republic's household, and that if exceptions were confined exclusively to princes of the blood, as recognized in Europe, persons of eminence in the United States would be by such interpretation, excluded entirely from privileges accorded to others." In consequence the *Franklin* was granted the special permission to pass thru the straits and come to anchor in the harbor of the city itself, where the Greek populace presented this address to all on board. All this gives an added value to this interesting "scrap of paper" which has been given a place of honor on the library walls.

Holyoke. The Young Men's Hebrew Association is planning a campaign to raise \$1000 for the installation of a library in its rooms in the Meany building on High street.

Lynn, P. L. Elizabeth E. Rule, acting lbn. (Rpt., 1916). Accessions, 5,331; lost or withdrawn, 1914; total, 105,719 volumes. New registration, 3,301; total 20,667 (estimated population, 102,425). Circulation, 251,985. Income, \$29,064.40; expenditures, \$29,064.40, including \$4,243.93 for books; \$776.43 for periodicals, \$1,631.56 for binding and \$12,781.78 for salaries. The library has sent regularly to the schools a library visitor selected from the staff. "Good Book Week" was observed early in December. Tickets to various entertainments were presented to blind readers as in former years.

Saugus. The Carnegie Library Corporation will give \$17,000 for the erection of a new library in Saugus. The corporation offered the town \$14,000 some months ago, but when plans for new library were submitted to the officials of the corporation in New York it became apparent that about \$3000 more was necessary to erect a suitable building with room for expansion, and the additional amount was voted.

CONNECTICUT

Hartford. A striking bronze bust of Mark Twain, taken from life by the late Louis Potter, is now the property of the Wadsworth Athenaeum, and is in the Tapestry Hall of the Morgan Memorial.

Waterbury. Silas Bronson L. Helen Sperry, lbn. (Rpt. 1916.) Accessions, 7,620; volumes withdrawn, 5,549; total, 100,345, plus 20,882 pamphlets (estimated). New registration, 5115; total, 10,080 (population according to the military census, estimated 1917, 100,000). Circulation, 257,575. Receipts, \$26,914.63. Expenditures, \$25,476.36, including \$11,228.77 for salaries, \$5,236.78 for books, \$597.38 for periodicals and \$1,632.94 for binding. The annual exhibition of children's books was held in conjunction with the "Safety First Juvenile Book Week," beginning Nov. 28. Several mothers made lists of books for their children to read during the year.

Middle Atlantic

NEW YORK

Geneva. The new administration building of the State Agricultural Experiment Station,

which has been under construction for several months, is not yet completed. This building will contain a library space which will accommodate upward of fifty thousand volumes, but stacks for only half this number will be installed at the present time. The library now numbers somewhat less than fifteen thousand volumes, chiefly scientific literature, most of it relating to agricultural science or science fundamental to agricultural investigation. The war has had a very material effect on the growth of the library, by cutting off a large number of foreign journals no longer available.

New York City. Owing to the scarcity of coal and inability to heat the building, the New York Society Library will not be open to the public at present. Deliveries of books will be made, as usual and business conducted by correspondence and the telephone.

New York City. The Surveyor's Customs Welfare Association Library, located in the Barge Office at Bowling Green and intended for the use of all in the federal customs service, has opened its doors to the army nurses waiting at Ellis Island to be sent abroad, and they find its quiet room a welcome retreat for reading and letter-writing.

New York City. A special library dealing primarily with the publishing business and the effect of publishing on business is being established by the International Magazine Company at 119 West 40th St. The data being collected includes material, in whatever form, bearing on publishing, printing, advertising, journalism, paper, the graphic and printing arts, the mechanics, make-up and marketing of magazines, and a few works on general business and statistics.

New York City. The library of the Rockefeller Foundation is primarily a special reference and working library for hookworm disease. In addition to a collection of nearly all existing treatises and special articles on this disease the library contains a large amount of excerpted material bearing on the subject in health reports and scientific journals. This material is not only indispensable to the work of the International Health Board but is held at the service of individuals, governments, mining companies and other industrial organizations for which hookworm disease is a factor of large economic as well as humanitarian significance.

NEW JERSEY

Navesink. The new \$20,000 building of the Navesink Library Association was opened

late in December. Community singing, addresses by men and women widely known thruout the state and various kinds of programs were given, and Mrs. Herman B. Duryea, widow of the widely-known sportsman, who gave the building as a memorial to him, was the guest of honor. In the absence of Mrs. W. Barclay Parsons, of New York, president of the Library Association, who is engaged in war work in France, her sister, Mrs. Wile, of Boston, Mass., read a message from Mrs. Parsons and one from Colonel Parsons, who is engaged in railroad reconstruction work in France.

New Brunswick. The Rutgers College Library has recently acquired written and printed documents relative to the Rutgers Medical College, an institution which had its existence during three different periods from 1792 until 1827. The material gathered includes many letters from members of the medical faculty, catalogs containing lists of officers and students of the medical school and several printed descriptions of the college building, which was situated in Duane street, near Broadway, New York. The establishment of this college was due to the efforts of Dr. Nicholas M. Romayne, lecturer and teacher, who is known as the founder of Union College. Unfortunately, in 1827, the New York Legislature passed a law invalidating the diplomas granted by a medical school attached to any college not within New York State. The faculty was then forced to abandon the project and the school ceased to exist. Subsequently the Rutgers Medical College became part of Geneva College, and was known as the Rutgers Medical Faculty of Geneva College until this organization was suspended November 1, 1830, and has not since been revived.

Princeton. According to newspaper reports, the library at Princeton University is feeling the effects of the war even more than the other departments of the college. Since the opening of the war the library has lost eighteen of its forty-seven regular staff members and practically all of its student helpers. Of the latter, five have received R. O. T. C. commissions, and others are in some form of service. Of the regular staff members, more than half have gone into some direct form of war service, and these are about equally divided between men and women assistants. At the very beginning, and even before this country entered the war, some special effort was made to collect the literature on the war, but this has been disturbed by the difficulty of getting books from abroad.

The library has made some effort to get the practical technical books for military instruction, and is now attempting to gather as a specialty the books on aeronautics and references to the periodical literature on the same subject, made especially timely and necessary by the location of a school for aviators at Princeton.

Roselle. At the meeting of members, officers and trustees of the Public Library Association, held Dec. 27, it was voted to turn over the library in its entirety to the borough, to be governed by a board of trustees appointed by the mayor.

PENNSYLVANIA

Allentown. The pressing need of a larger building for the Allentown Free Library, especially with the advent in this city of an army camp, was discussed at length at the last regular meeting of the library board. It has been long known that the library building must grow with the increased enrollment and since the soldiers have come 755 cards are in use by them, in addition to 11,533 active cards by local users of the library, which exclusive of the ambulance men, has an enrollment of 14,902. The second floor has already been transformed into a reading and writing room for the soldiers, and it is no uncommon thing to see them occupying the steps leading to this floor and the doctors' meeting place above, reading their favorite volume. It is expected that as the winter months drag on their number will be greatly augmented.

Oil City. Carnegie P. L. Emily S. Glezen, lbn. (14th ann. rpt.—1917). Accessions, 714; withdrawals, 351; total, 15,878. Circulation, 79,531, largest in library's history. New borrowers, 1,016; total enrollment, 9,670 (pop. 21,000). Receipts, \$4,945.03; expenditures, \$4,494.09, including \$575.79 for books, \$79 for binding, and \$2,719.89 for salaries. Reading room attendance, 24,206; Sunday reading room attendance, 1,456 (for 28 Sundays).

Philadelphia. Thru the generosity of James H. Penniman, a brother of Vice Provost Penniman, the University of Pennsylvania has acquired a valuable library which is part of the equipment of the School of Education. The library is given in memory of their mother, Maria Hosmer Penniman. The original gift was about 3000 volumes and recently the donor has added about 2000 more, which range thru the entire field of educational literature. The library now touches on all departments of the subject of education

and includes books of many ages and countries. Many foreign languages are represented and the dates run from the late middle ages to modern times. Mrs. Penniman, for whom the library is named, and in whose memory it has been given, died in this city in 1914. A memorial tablet has been placed in the library designating its purpose.

East North Central

MICHIGAN

Hastings. The city council has authorized Mayor Horton to appoint a board of nine commissioners who will have charge of the city library which will be established in the new high school building. The books in the school reading room and a small collection owned by the Hastings Women's Club will be used as a nucleus for the city library.

INDIANA

Indianapolis. It is planned to recatalog the 300,000 volumes of the Public Library during the next three years, and an appropriation for the beginning of the work has already been made. It is estimated that it will cost about \$5,400 each year to complete the work.

West North Central

SOUTH DAKOTA

Tyndall. The Carnegie library building, erected at a cost of \$10,000, was dedicated Friday evening, Nov. 9. A program of music and addresses was followed by a reception. The community rooms in the basement are kept open daily by the Women's Improvement Association. The library is to be open six days a week, one of these days being Sunday. Elizabeth Barber is librarian.

KANSAS

Topeka. The late Scott Hopkins bequeathed \$2,000 to the Topeka Public Library, as a memorial to his wife. The income is to be spent annually for children's books, and each book is to bear a book plate with the name of the wife, Cora Pierson Hopkins, "which shall be a fitting memorial for her constant desire to furnish children with sound and wholesome reading."

The Pacific Coast

WASHINGTON

Tacoma. The Public Library, at the request of the U. S. Food Administration, has been conducting an exhibit of charts, bulletins, documents, books, pamphlets, etc., relative to food conservation and preparation.

Tacoma. The Scandinavian societies of Tacoma have joined with the Public Library in

purchasing for the reference room the "Nordisk Familjebok," the 30-volume encyclopedia of the Scandinavian peoples in Swedish. The local Scandinavian societies are contributing \$100 to this purchase, the balance to be paid by the library.

CALIFORNIA

Berkeley P. L. Celia A. Hayward, acting lbn. (Rpt.—yr. ending June 30, 1907.) Volumes added 7,732; withdrawn, 1,002; total, 67,200. New registration, 8,044; total, 20,283 (estimated populations, 67,500). Circulation, 379,545. Receipts, \$38,538.15. Expenditures, \$33,359.56, including \$6,253.34 for books, \$1,187.56 for periodicals and newspapers, \$1,989.37 for binding and \$16,291.06 for salaries. The report states that the librarian, C. B. Joeckel, was granted a leave of absence, May 10, 1917, to enter the Reserve Officers' Training Camp at the Presidio of San Francisco. Recommendations were again made for the extension of the Main Library building, its branches and working force. In January, 1917, the library began publishing a monthly bulletin instead of the quarterly book lists formerly issued. The librarians, by means of membership in the Rotary and other clubs, was able to keep in touch with various civic activities, and a committee from the Rotary club made special investigation and report on the library's work. The library was able to add a larger number of books with the expenditure of less money than heretofore by ordering books from the East, rather than from local firms. Much larger discounts were obtained on general literature and many school and technical books, though the saving was somewhat reduced by express and freight charges and the books in some cases were not so promptly received. A house to house survey of the residents was made by the librarian of one of the branches between October, 1916, and March, 1917. Information was given regarding hours and privileges of the library and 270 applications were left at the homes if wanted. Sixty-two applications were filed by May 1, 1917, as a direct result.

Sacramento. The new State Library building, approved a year ago by the Capitol Extension Commission, has not yet taken visible form. The site on which it is to be located, however, has been entirely cleared and leveled. The commission has decided to hold a nation-wide competition for the selection of an architect and the program was issued last December. The competition, which is of the Class A character, will not end until the middle of September, when the architect will finally be selected.

San Francisco. By a new regulation, patrons of the Public Library will not receive postals for one day's delinquency, but will be notified only when books are five days overdue. A branch of the Public Library has been established in the Y. M. C. A. building at the Presidio for the benefit of the enlisted men.

San Francisco. When the Sutro Branch was opened to the public in San Francisco on January 2, 1917, its resources were the valuable Sutro Library of about 70,000 rare books, manuscripts, etc., which had been presented to the California State Library by the heirs of the late Adolph Sutro. During the first year, by gift and deposit, have been added about 12,000 items, as follows: The California Genealogical Society Library and additions; the Astronomical Society of the Pacific Library and additions; a part of the library of the California Society Sons of the American Revolution; the private library of the late Mrs. Walter Damon Mansfield; the library of the State Water Commission; the publications of California publishers, and California publications of other publishers; gifts and deposits from California city and county libraries of such material as is not active in their local service; and gifts from institutions and individuals. The Sutro Branch is temporarily located on the top floor of the Lane Medical Library Building, southeast corner Sacramento and Webster streets. The hours are 9 a.m. to 4 p.m. daily except Sundays.

Stanford University. Work on the new library building for Leland Stanford Junior University lagged during the summer and fall owing to the tardy delivery of the structural steel. It is now all on the ground, however, and the erection was actually commenced on Dec. 20. The contractor anticipates no further delays, and gives assurance that the building will be completed in about a year. The contract for the steel stack has been awarded, and bids are now being received on the other equipment necessary.

Yolo. A new Carnegie library is to be erected at Yolo, \$3000 having been granted by the Carnegie Corporation for this purpose.

Canada

ONTARIO

Ottawa. A new branch library was opened in November in the old Ottawa East Town Hall. The new branch contains some five hundred volumes and will be open from 7.30 to 8.30 o'clock on Tuesday, Thursday and Saturday evenings.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature

CATHOLIC SCHOOLS, CO-OPERATION WITH

Public library books for the children of Catholic schools. Louise P. Latimer. *Cath. Educ. Rev.*, Jan., 1918. p. 45-49.

A statement of the need for both constructive and preventive work in the provision of children's reading, and of the special effort being made by the Public Library in the District of Columbia to meet the wishes of the Catholic schools in the books supplied them by the library. The method of co-operation between the schools and the library already described in the LIBRARY JOURNAL for September, 1917, is again described in this article.

CHILDREN, WORK WITH. See Guessing contests

CHILDREN, WORK WITH

A note in *Library Service*, the news-sheet of the Detroit Public Library, tells how in 1905, Mr. and Mrs. Frederick W. Stevens furnished to the library the "Hoyt Henshaw Stevens Library for Sick Children," in memory of their son who died Feb. 2, 1904, aged 13. There are about two hundred and fifty volumes from which selections may be made.

Any sick child may have the benefit of this library by applying to Miss Mary Conover, head of the children's division of the Main library.

The library is not available in the case of contagious diseases.

Mr. and Mrs. Stevens added eight books to this library on their son's birthday anniversary, Nov. 21, 1917.

EXHIBITS—OF LIBRARY WORK

Many suggestions for use in a campaign to arouse interest in a library, are found in the following description of an exhibit prepared by May V. Crenshaw, of Charlottesville, Va.

The public library exhibit was included in the Albemarle County (Virginia) Survey Exhibit for the purpose of drawing attention to the need of a public library in the community.

The 11 x 15 foot booth was covered with dark green paper, with a shelf on three sides. It contained two book-cases, a table, magazine and newspaper rack, bulletin board and a few small chairs. A banner stated that "Charlottesville needs a Public Library." Charts showed Virginia, with her two tax-

supported libraries, Norfolk and Waynesboro, lamentably behind even many Southern states. Statistics were given for Southern libraries, as well as for those in seventy-five towns of Charlottesville's size. On a state map, appropriately labeled, were marked the sixteen towns having public libraries, whether supported by tax, endowment, or gifts, while a sketch appealed to this section to beat Richmond in getting a Free City Library. Initial expenses were shown, while a poster, and cards for distribution, read: "A PUBLIC LIBRARY, FREE FOR EVERYONE. THERE ARE 30,000 people in Albemarle County. The cost of only one PACKAGE of CIGARETTES a year from each of these would mean \$2400 for LIBRARY support. The cost of only one MOVIE a year from each of these would mean \$3300 for LIBRARY support." A chart demonstrated the proper division of a library appropriation and plans and costs of buildings were presented.

Some two hundred books, together with signs, and a short list of good reference books, suggested the various classes a public library would contain. A placard, "How to Find a Book," explained the Decimal Classification. Its value was emphasized by two posters, each depicting a row of books, one arranged alphabetically by author, the other, classified by subject. A large key called attention to the fact that "What the Index is to the Book, the Card Catalog is to the Library, the key to all it contains," while the advantage of good cataloging was graphically brought out by a new book with an author card only, and a well-worn one surrounded by twenty-four cards. Books and pamphlets suggested other fields of library work.

Pictures illustrated changes in library methods from old chained books to present-day book-wagons.

A wheel showed the library as the hub, from which the spokes extended to the many classes whom the library serves, while signs suggested that "Every Librarian has been to School. Does every Teacher go to the Public Library?" etc. Newspapers and magazines were in evidence, together with a sample collection of pictures for circulation, and the statement that progressive libraries circulate music. A pamphlet file suggested free material, and a simple way of caring for it. A book for the blind attracted much interest.

Attention was called to library war work, with a reminder that the town and county has the same need.

The children's collection included many illustrated books, and a shelf of non-fiction was labeled "What one library did," and described an exhibit of things made by children from library books. Historical picture posters hinted at questions to be answered in the library, while attractive picture bulletins gave lists of books on "American Indians," "Everyday Heroes," etc. Photographs showed charming children's rooms, including a roof reading room, while co-operation between school and library was represented by pictures, bulletins and readings lists. Local deficiencies were forcibly brought home by a poster showing the small number of school libraries in Albe-marle, while the public was urged to "Make the Library a Continuation School" for those who every year drop out of High School. The care of books by the children was amusingly told in rhyme.

One of the chief attractions was the story-hour, held in an adjoining room and in the Strand Theatre, by Julia W. Williamson, supervisor of story-telling in the Philadelphia Free Library, which brought many to the booth for further questions.

A guest-book, and leaflets and reading lists for distribution, added to the interest.

FINES AND POST CARD NOTICES

At the meeting of the trustees of the Tacoma Public Library Dec. 21, 1917, it was decided to continue at two cents the daily fine on overdue books from the adult department, which had formerly been one cent but had been made two cents as a partial offset to enforced retrenchment in 1917. In addition delinquent borrowers will be charged the two cents postage for the postal card notice of books overdue sent them after five days' delinquency, and the postage on the second notice sent them at the end of twelve days' delinquency. Patrons will also be charged two cents for the postal card notice on all reserved books. Heretofore fiction has been reserved for one cent and non-fiction without charge.

FOREIGNERS, WORK WITH

For the promotion of educational work among the alien population of Massachusetts, the Free Public Library Commission, Charles F. Belden, chairman, has requested from the Legislature an appropriation of \$6,000. This sum would be expended in aiding free public libraries in their work among aliens, includ-

ing the selection of books and obtaining assistance from representatives of non-English speaking races in different localities in giving lectures and addresses, etc. The commissioners believe there exists a special opportunity for the libraries to interest and instruct newcomers to the United States in all that pertains to good citizenship.

FUMIGATING MACHINE

A machine for fumigating or disinfecting books or the like is illustrated and described in the *Official Gazette* of the United States Patent Office for Nov. 27, 1917, vol. 244, p. 999.

GUESSING CONTESTS

A successful guessing contest, which did much last year to increase the interest of St. Paul children in the birds and flowers of their vicinity, was carried on by the Public Library and might be advantageously copied by others.

"During the month of April, 1917, twenty-four pictures of common birds were mounted and displayed in sets of eight per week in the Children's Room of the St. Paul Public Library," writes Della MacGregor, a member of the staff.

"In order that children might have an opportunity to familiarize themselves with the correct bird-names of the specimens exhibited fourteen of the best bird books were made into table reference books and all children entering the contest were urged to look up and verify their identifications in the bird-books before handing in their papers. To stimulate interest in the contest the St. Paul Humane Society gave five dollars for the purchase of books to be awarded as prizes.

"One hundred and thirty children entered the contest, only twenty-two of whom dropped out before the contest closed. Only one, a girl of fourteen, identified all of the birds correctly. Five identified all but one, four all but two, thirteen all but three.

"Books were awarded all of those who named all but two correctly by the Humane Society; thru the courtesy of the Department of Entomology of the University of Minnesota pamphlets entitled "Some useful birds to be found in Minnesota," were awarded those who identified all but three correctly.

"The children all worked hard and earnestly, some of them spending as much as ten or twelve hours in the identification of the pictures. The day the prizes were awarded more than one hundred and seventy children came to witness the results of the contest.

"Mr. Lange, who is one of our best authorities on bird study gave a short talk on 'The calls and homes of our common birds,' illustrating his talk with colored slides of many of the birds that had appeared in the contest.

"This contest was succeeded during May by a flower contest. When this contest closed there had been twenty-seven pictures of the common wild flowers for identification.

"In order that children living in the downtown districts who have little or no opportunity for gathering flowers might see the flowers themselves, all children living in the suburbs were urged to bring flowers to the library and whenever they did so, correctly identifying the flowers they brought, their names were entered on the roll of honor. Even boys and girls of twelve and fourteen entered the contest.

When this contest closed, five dollars' worth of books were awarded as prizes, the money for the books having been donated by the Women's Home Garden Club. In addition to these prizes every child who entered the contest received a package of flower seeds.

LIBRARIANS AND ASSISTANTS—TRAINING OF

In the *Athenaeum* for October, 1917 (pages 512-514), B. G. Curtis Collier, gives a constructive criticism on the public library in England, and especially the training for library work in that country. All of Mr. Collier's remarks are of no less interest to librarians in the United States. He believes that the aim of the Educational Committee of the Library Association should be to "give the student an attitude, a keen, critical, and original outlook." He believes that the fundamental defect of library administration in England is "not the limited rate, but the limited outlook, the academic pose," and being bound down by the bonds of tradition.

The following is the opening paragraph of the article, which indicates its general drift:

"The public library is not generally popular, and it is not thus popular because it is inefficient. If anyone dispute this let him go into almost any library with some serious inquiries, and what will he find? Junior assistants quite capable of charging up the novel he has chosen; but should he want to trace the influence of the Elizabethan drama upon the work of contemporary playwrights; or a lucid description of modern Socialism; or advice concerning Bordeaux mixture and his potato crop; or—anything but Mrs. Humphry Ward or Madame Albanesi, he is told to look in the catalog; he will find all he

wants there. Will he? It will be a wonderful catalog.

"The cause of the unpopularity lies in indifference."

Women in libraries. Adelaide R. Hasse. *Jour. of the Assn. of Collegiate Alumnae*, Oct. 1917. p. 73-80.

"That it is expected of every one to-day and especially of the working woman to be efficient goes without saying. Just what the preparation should be that speeds up to this efficiency in library work is the subject about which many of my colleagues and I differ. They say there is nothing like training and I agree with them, but we differ as to the kind of training. The graduates of the library schools to-day, I maintain, stop learning when they leave school. I am speaking of the average of course. Many below the average have never begun to learn. To attend lectures, even to pass an examination does not necessarily imply the possession of the learning mind. A learning mind is not necessarily a learned mind, but a learning mind is what every library worker should have.

"There is not in the library school curriculum of to-day sufficient specialization. A student may be utterly unfitted by temperament and taste to become a cataloger, yet to secure her diploma she must give full time to this technical discipline. There is no discrimination on the part of the schools between the technical and the professional part of library work. It is the technical to which most weight is attached, but it is the professional work which makes the greatest demands upon the equipment of the worker and which requires qualifications far more unusual than does the technical work. Individuals responsible for the library school curriculum seem not to realize that any careful person with ordinary natural faculties can be trained into a cataloger. A reference or professional worker, on the other hand, is born, not made. This statement will not be admitted readily by librarians in general. But reference work is the one great undeveloped part of library work. It is that part having the most far reaching and worth-while possibilities.

"The failure to appreciate the possibilities of professional library work has without doubt been one of the prime causes in keeping library salaries for the rank and file as low as they are. Bulletin 25, 1915, of the United States Bureau of Education, shows the salaries paid to librarians. One or two positions there are which run into five figures. Of the four-figure salaries \$8000 is conspicuous, even

the five-thousand-dollar salaries make a small group. The maximum for women is, I believe, \$3000. The salary group from \$2000 to \$4000 represents the group that does real work, the higher salaries being secured as often thru favoritism as thru any inherent ability.

"The training to be obtained in the library schools as they are at present arranged is perhaps sufficient for those library activities with which the public does not come in direct contact. But . . . if specialization were practiced and encouraged not only would the incentive for individual effort be greater, but by raising the level of the specialties thru this pressure from below, the level of the mass would be raised. The situation as it exists today presents a dead level of mediocrity. The inspirational reaction is almost entirely absent. With one or two exceptions I do not remember any unusual work being done by library school graduates. But it is difficult to see how an occupation, sought by the great majority of those engaged in it as a refuge rather than as a career, could be other than the grave it is."

Miss Hasse then compares the expenditures of the New York Public Library, as the largest American public library, with those of the United States Geological Survey and the Weather Bureau, in an effort to discover "why the same amount of money which produces such tremendous results in the government bureaus produces such pitifully negligible results when spent for public libraries." She concludes that with the sweeping changes to come in the political and economic life of nations and the growth of the idea that anything worth maintaining must be of use, "it is a matter of grave doubt whether [the libraries] as at present conditioned, a large proportion of them still struggling in the coils of arbitrary technique and tentative administration, will be able to respond effectively, let alone efficiently, to the new demand. They are a dead weight on the spirit of progress. Not one of them is thoroly qualified to-day for giving the information service required by this new public attitude even in its present incipient development."

After quoting extensively from the definition of "the so-called librarian's real duties" as set forth by Matthew C. Brush at the Louisville conference, Miss Hasse closes by indicating an opening for college women in the re-working of library resources to meet public requirements for an information service which she maintains the public libraries as at present organized, are unable to provide.

SALARIES

The trustees of the Tacoma Public Library have raised slightly the salary schedule for 1918, so that general assistants (mainly apprentice class graduates) will have a minimum-maximum schedule of \$40 to \$60 per month; first assistants, heads of divisions and branch librarians from \$65 to \$80 per month, and heads of departments \$90 minimum to \$105, present maximum. It is generally understood that if the service warrants it and the budget permits it the annual increase will be \$60 per year from the minimum to the maximum in all grades.

SCHOOL LIBRARIES

Included in an article on rural education in Great Britain in the *Athenaeum* for November, 1917, the following paragraph (p. 571) gives interesting information on the traveling libraries being established in several counties:

"The need for books other than textbooks has been admirably met in several counties, both in England and Scotland, by means of circulating libraries. Some of these have been largely financed by the Carnegie United Kingdom Trust. The management of them varies in detail, but, following the American village-library plan, a box of books is generally sent to certain chosen village schools and kept there for a period of about three months. The books are read by the school children and their parents and friends, as the circulation is not limited to the children. Many schemes for village libraries have proved bitter failures, but a library managed by the Local Education Authority, able to buy a good variety of books and sure of a permanent secretary in the local school master, and of at least a small reading public in the school children, is certain of success. It is only fair to say that the Carnegie libraries were not the first set up by local authorities. Other permanent collections of books for the use of teachers and other villagers have prospered and done good. These circulating libraries are not luxuries, they are indispensable. Every county should have one, and every village school should share it. It seems most probable that the village schools will remain the most economical means of supplying small communities with the largest possible variety of books. All the sciences and arts can be represented in them, and one of their special functions should be to satisfy and train the children's love for pictures by means of beautifully illustrated books and portfolios of good prints."

Bibliographical Notes

A bibliography on illegitimacy is being compiled by the Massachusetts Society for Social Hygiene, at 30 Beacon Street, Boston.

"Books for housewives in war time" is the title of the Massachusetts Agricultural College's library leaflet no. 28, a short suggestive list of the most practical publications available.

As the first of a series of "intimate interviews" the Macmillan Company has prepared a little biographical sketch of John Masefield, which will be mailed gratis on application.

Two important reports published by the city of Chicago in December are the "Report on the public licensing, regulation and control of the liquor traffic in Boston and New York City" and a "Report on the more economic distribution and delivery of milk in the city of Chicago," the latter being Municipal Reference Bulletin no. 8.

The new Federal Board for Vocational Education, established at Washington under the Smith-Hughes Act, has issued its first annual report and also its first bulletin, which is confined to a "Statement of policies." The board has also published a circular of information for use in training conscripted men as radio and buzzer operators.

It is expected that the list of Scandinavian books which Greta Linder, a graduate of the Library School of the New York Public Library, is preparing for the American-Scandinavian Foundation, will be finished next June. Miss Linder has secured excellent collaborators in Norway and Denmark, and the list which will be printed during the summer, should be very valuable.

A new quarterly publication called *Periodicals* has been started by the International Magazine Company of Elizabeth, N. J., the first number being dated Oct.-Dec., 1917. Its main object is to place at the disposal of librarians the information about American periodicals and their many vagaries in title and collation, acquired by the company in its twelve years of experience with this class of publications.

The *Cleveland Women* devoted its issue for Dec. 1 to the work of the Cleveland Public Library. A splendid portrait of William H. Brett, for thirty-three years the library's chief, was on the front cover, and all the many departments and activities are described by their chiefs or by those members of the

staff in closest touch with the work described. Pictures of the library and its branches were freely used to illustrate the contributed articles, and the number as a whole is a pleasant testimonial of the cordial relations that exist between the library and the women's organizations of the city.

With the granting of the ballot to women in New York state last November, a new department of instruction for the woman voter has been instituted in many of the metropolitan newspapers. In the *New York Evening Post* for Jan. 5 and 10 John Cotton Dana contributes a short list of "Books for the woman voter" which supplements a group described in the same paper on Nov. 17. Mr. Dana's introductory paragraphs are straightforward and pithy, and his annotations of the books mentioned are clear and helpful.

A very valuable "Report on a survey of state supported library activities in the state of Washington" has been made by the state library advisory board for the Washington State Library Commission. The field to be covered by the survey was divided into sections, and different committees took charge. The present report gives the findings and recommendations of these committees as regards the State Library, library extension, county libraries and rural school library work, state educational institutions, library training, libraries in the state charitable, penal and reformatory institutions, work with foreigners, and legislation. The recommendations made are summarized, and those which can be made effective without a change in existing law are separated from those requiring legislation to make them effective.

Open Round Table

MATERIAL RELATING TO BERNARD ROMANS

Editor *Library Journal*:

I am endeavoring to trace the manuscripts to Bernard Romans' diary and to the second volume of his Concise natural history of Florida, 1775, or any of his works. This is preliminary to my writing a descriptive book on his works, and accompanying it by a reproduction of his rare map of Florida, 1774, which was made to accompany the book above mentioned. If you can trace thru your journal any material relating to Romans, I will be under many obligations. He was born in 1720, and died about 1784.

P. LEE PHILLIPS.

Library of Congress, Division of Maps and Charts.

INSIDE THE A. L. A. LIBRARY AT CAMP SHERMAN, A WELL LIGHTED AND WELL EQUIPPED BUILDING, AND ALREADY DUPLICATED IN THIRTY-FOUR OTHER CAMPS

THE long-looked-for book campaign, to solicit comprehensively donations from the public of books for the camps, will begin with an intensive "book week" drive, March 18-23. The public have already given generously in books as well as money for this purpose, but it is believed that a million or more books in addition can be obtained by national and systematic effort thru local libraries. It is not intended that the "book week" shall be the beginning and end of the whole matter, but that it shall be made the start of a persistent campaign, which will continue to bring in books as long as they are needed. Books have already been supplied in considerable measure, both by purchases and from gifts, to the camps and cantonments, and for transport abroad, but the demand will be insistent and increasing. It has been the policy of the General Director to mature plans carefully and fully in advance, rather than to rush thru plans not fully and painstakingly developed, and altho this method may have provoked criticism at the start, it is pretty sure to get better results in the end. Books have been supplied to the camp libraries about as fast as they could be handled there, as Mr. Hughes stated at the Atlantic City meeting with respect to Camp Dix. But the camp library there, to take a specific instance, now amounting to about 6000 volumes, can utilize by help of Y. M. C. A. huts something like 25,000 volumes, if supplied not too fast for the proper treatment of them by the receiving library. The General Director has prepared a careful statement of the proposed campaign in *War Service Bulletin* 5, which should be carefully read by every librarian thruout the country, and every local library should be prepared to do its share in the book campaign, so that as fast as books can obtain transportation and as fast as they can be properly handled at the camps, they may be put at the service of the boys in training or in the field.

THE treatment by libraries of seditious or propagandist publications has two phases—of historical record and of public circulation. Underlying both these is a question of fact as to what are seditious or propagandist publications, and whether this or that publication comes rightly under this class. The "Vigilantes," who have undertaken some supervision of public libraries as well as other fields, have perhaps been overzealous in unduly including books and pamphlets harmless in themselves and fair presentations of "the other side." In war, it may be said, there is only one side, but this is true only in an extreme sense. The *Wisconsin Bulletin* for January states reasonably the argument for caution in public libraries on this matter, while Mr. Dana's defense of the practice of the New-ark Public Library presents reasonably the broader view. For purposes of historical record, the leading libraries, which are practically record offices, need be more comprehensive in purchases and collections, and should include books which after the war will be of historical value, but may not then be obtainable. Books of this character may fairly be withheld from the public and kept only for the present service of students and for future use. This question of historical record does not present itself to the great number of libraries. But all are concerned with the problem of popular books for public circulation, and here a careful line may wisely be drawn in the interest of the cause which our country is maintaining. The ban should scarcely be extended to cover pacifist literature, at least those books which treat of the general subject of peace, but only propagandist literature in the direct or indirect interest of enemy countries. Here the rule should be similar to that applied to sectarian books in general, as those of a religious nature. Many libraries do not permit themselves to circulate polemic books for or against a religious doctrine or a church denomination, and

common sense application of this rule should be the solution of the present problem before libraries. This view in general was that taken by Dr. Richardson in his presidential address before the American Library Institute at Atlantic City, which met with general approval, and which is reprinted elsewhere.

THE discussions at the Institute meeting brought out the desirability of a graduate school for the higher training in librarianship, but otherwise converged on the development of a national collection of books and pamphlets on the war, in the widest sense, with an historical museum in possible relation therewith. In Berlin, Lyons and London such collections of books and objects have been shaping for many months past under governmental auspices, and in Paris the Government has accepted charge of the remarkable collection begun by a private individual which he has turned over to France. In this country, the most considerable collection so far attempted has been that at Clark University, Worcester, Mass., started at the initiative of President G. Stanley Hall, as an exhibit on war psychology and carried thru in a remarkable manner by Dr. L. N. Wilson, university librarian. The New York Public Library has given much attention to obtaining such material from abroad, and there is rumor that special efforts will be made at Albany to collect such a library exhibit and museum on behalf of New York State. To be adequate, however, the enterprise should be a national and governmental one, possibly based on one of the existing collections, and its organization should not be longer deferred, lest the earlier material of the war should be later impossible of collection. A good deal of attention is being given also to the bibliography of the war, which is already reaching enormous proportions, and the joint list described by President Richardson, of which photostat examples were

shown at the Institute meeting, suggest how large is the field, large indeed beyond the possibility of handling in any except the largest and most comprehensive libraries. The comprehensive war bibliography of Lange & Berry issuing in London is already reaching a fifth volume, and Mr. A. J. Phillip has announced that he has made substantial progress on a bibliography covering an even wider field.

THE meetings of the American Library Institute at Atlantic City did the double service of calling together leaders of the profession from outside the two states responsible for the general meeting, and affording opportunity for direct discussion, which the general meeting did not afford. President Richardson's plans have made the Institute a really live and useful institution, with a field of its own. While the membership of the Institute is selective and while its problems are chiefly those of "libraries of learning," its meetings are usually open to all, and it is a pity that this was not fully made clear at Atlantic City. In the general meetings, Mr. George made the point that New Jersey librarians needed in their state meetings better opportunity for direct discussion of library problems than were afforded by set programs, in which the time was chiefly if not wholly occupied by outside speakers. This is a point well taken, not only in respect to New Jersey, but as to library meetings in general. At Atlantic City the addresses on war service were admirable and timely, but other features might well have given way to a discussion from the floor, introduced by an adequate professional paper, in the old library fashion. This method has the additional advantage of inducing librarians to speak out in meeting and of introducing librarians to each other in a way not otherwise to be accomplished, and we think that Mr. George's suggestion will be generally seconded by those who attend library meetings.

THE LIBRARY AND THE BOOK IN RUSSIA'S REVOLUTIONARY MOVEMENT*

By VICTOR S. YARROS

RUSSIA is still largely illiterate, of course. The latest official figures indicate that only one person in ten can read or write. The national Duma has been wrestling with the question of universal and free elementary education for all the Russias, but the opposition of the reactionary ministers and bureaucrats has forced it to postpone again and again the realization of this great reform. Such primary schools as Russia has are poor, and the schools controlled by the Church are naturally even poorer than those controlled—or half-controlled—by the zemstvos. The higher education is a privilege which only the few have been able to enjoy in Russia. The same may be said of secondary and technical education. Thousands of Russian boys and girls have had to seek educational opportunities in western Europe.

Yet the library and the book have played their wonderful part in the Russian revolutionary struggle.

The zemstvos have not neglected the public library as a means of elevating and liberalizing Russia. Even thirty years ago many cities and large towns had surprisingly adequate public libraries with free circulation departments. Of course, these libraries could not circulate "illegal books"—that is, books put by the government, or its local satraps, on the "Index." In the '80s of the last century nearly all the "good" books—progressive, radical, reform books—were on this index. But there were thousands of novels, plays, histories, biographies and works on science, economics and philosophy that the censors failed to place on the index. Such books were eagerly read by students, high school pupils, and others. Their revolutionary effect was indirect, but potent. They made critics and opponents of the autocratic-bureaucratic régime.

Even in the '80s, let me say again, the book and the library were very important

factors in promoting profound discontent and revolution. The intelligent Russian was as a rule a radical or revolutionist. Many were revolutionary in thought rather than in deed; only a minority were ready to risk and sacrifice everything—career, freedom, life itself—to the cause of liberty and justice. But this minority knew it had the moral support and sympathy of the majority. The "liberals" and the intellectual "radicals" were helping, financing and shielding the active revolutionists.

In addition to the public and other "legal" libraries, there were in those days many "underground" libraries—libraries that circulated the forbidden books among the insurgent and semi-insurgent youth of the country, or among such workmen and peasants as were able to read, or to understand revolutionary pamphlets, circulars and papers when read to them. I was fortunate enough at the age of eighteen and nineteen to be intrusted with one of these illegal libraries. My circle of friends, mostly students of the local (and very excellent) Real-School, made me librarian of our precious collection of prohibited books and pamphlets. There were perhaps thirty-five persons in our circle, and we were all "socialist-revolutionists." There were no Maximalists (Bolsheviki) then. Practically every revolutionist regarded himself as a Marx socialist, but only in a vague, general way, for very little was known among the revolutionary youth concerning the doubtful elements in Marxian economics and their applicability to Russian conditions—or to ancient institutions like the Mir, the Artiel, etc.

The reading, and particularly the circulation, of forbidden and underground books and journals was a heinous offence. The profession of underground librarian was therefore extra-hazardous. Siberia, or even something worse, would have been my lot, had the police or the secret service discovered my treasures and my relation to them. However, nothing happened in the two years during which I served as

* Condensed report of remarks made before the State Library Associations of Ohio and Illinois.

librarian—chiefly because the police and the spies were stupid and ignorant. When our organization was at last raided and several were arrested, the library was in charge of another man. I trust it never fell into the hands of the government. At any rate, my own escape from Russia was necessitated by an even more hazardous business than that of underground librarian, for we also published a crude but violent revolutionary sheet and circulated it among students, workmen and others.

This allusion, by the way, suggests some mention of the way in which the young revolutionists sought to educate the illiterate or half-illiterate workmen and peasants. Reading circles were established wherever that was possible. Only some of these were "underground" or secret. Many were conducted in the light of day, with the reluctant sanction of the bureaucratic and military agents of the autocracy. Zemstvo leaders encouraged such reading circles. Tolstoy, Gogol, Nekrasoff, Pushkine, and other Russian authors, less known abroad, were read and interpreted to the auditors. It must be confessed that they understood little and cared less for this glorious literature. "Realism" was lost on them. What they knew themselves, what they saw and felt daily, they utterly failed to appreciate as art. Why, they wondered, write about such sordid, mean, familiar things? They wanted romance, beauty, thrills. They liked Dickens and other foreign humorists more than they did Russian humorists. They were deeply interested in heroes and heroic deeds. History and foreign government were, of course, "safe" subjects; how could even the worst reactionary minister object to such reading? Thus was education slowly spread at a time when illiteracy was the rule and the principal obstacle to effective progressive propaganda.

However, my real theme is the influence of books on the insurgent minority, and to that I must now address myself.

It should be understood that this minority eagerly "read everything"—everything available. The magazines of that day, in spite of censors and restrictions, were excellent. Nothing important in political science, sociology, science, religion, history,

philosophy, art was neglected by them. Every European school of sociology, of politics, had its adherents in Russia. Spencer and Comte were interpreted and widely studied. Spencer's "Progress: its law and cause" started a remarkable controversy all over Russia. The question, What is Progress? was taken up by our leading and revered teachers, and they gave their own answer. P. Lavroff, then in exile, framed a famous formula that "became the rage." Progress, he said, was the process of applying to life the highest conceptions of truth and justice. How could any self-respecting person fail to play his own part in that noble process? We anticipated Prof. John Dewey. We saw then that "progress is a retail job," and that to make sure of progress we have to contrive, plan, will, progress.

Let me mention some of the distinguished names that will always be gratefully remembered in connection with the great movement for the liberation of Russia. They are the names, not of heroic revolutionists, not of exiles, but of men of letters, of professors, of philosophers, of sociologists, of editors, of essayists and critics—the true educators of Russia.

Prof. Granovsky of Moscow, did wonderful work in the forties of the last century. His lectures were fascinating—altho Tolstoy sneers at them in his diary. He gave Russia new ideas of politics, of history, of the application of science to social and political life. Bielinsky, the first of the great critics, founded a school and influenced a whole generation. He was a westerner of westerners, an interpreter of Hegel and other European philosophers. His work was continued by Dobroliuboff, another gifted critic and ardent progressive, who in turn had brilliant associates and disciples. He interpreted Russia to herself, and elevated literary criticism to a science. Pisareff, the audacious iconoclast, the Bazaroff of letters, succeeded Dobroliuboff and became the idol of the progressive youth of the land. He was a Nihilist in opinion, a worshipper of the natural sciences; he believed that in science and intellectual culture alone lay the salvation of Russia. He expounded Comte and, among other things, wrote a "revolutionary" essay

in the guise of a treatise on the life of bees.

Herzen, the editor of *The Bell*; Tchernishovsky, the author of that epoch-making novel, "What is to be done?" and a sociologist and economist withal; Saltikoff, the great humorist—who, alas, can never be appreciated in the West, for his work was so national, so Russian, so deliberately didactic, artist as he was—and editor of *The Annals of the Fatherland*, the best of all Russian periodicals; Tourgenieff, Gogol, Gontcharoff, Pisemsky, Ostrovsky, Dostoievsky, Tolstoy, Michailowsky—sociologist, critic, essayist, editor—Korolenko, Krestovsky (pseudonym), Uspiensky, Zlatovratski, Pomialovsky, Engelhardt—what a galaxy!

The contributors to the underground papers said simply, explicitly what these great "legal" writers had to say, largely between the lines, or thru the mouths of fictional characters. The "legal" writers, of course, had their troubles with the censors and the government. Some died of worry and strain; some were driven to commit suicide; some were sent to Siberia; some saw their books banished from the libraries and bookstores; some had to become more and more obscure and indirect.* But only a few became reactionary apologists for autocracy and church tyranny and obscurantism. The majority courageously continued the work of destruction and construction. The revolution of to-day is the result of the labors of a century of such heroic work in books, magazines, daily and weekly papers.

In Russia words have indeed been deeds. Words and ideas have directly and indi-

rectly led to deeds—to sacrifice, to toil, to faithful and patient effort against danger and cruel suffering and terror.

In Russia the author, the journalist, the editor and the lecturer have regarded themselves, and been regarded, as missionaries, as apostles, as instruments of a sacred cause. Not even in France in revolutionary or pre-revolutionary times were literature and art so powerful, so influential, as they have been in Russia since the forties of the last century. The charm, the potency, the beauty of Russian fiction and Russian drama and music are universally recognized. It is the spirit of devotion, of consecration, of service, of idealism that largely accounts for these qualities. A literature and art of struggle, of protest, of aspiration—given, of course, beauty and form—cannot fail to attract and hold thoughtful men and women. The Russians love beauty, truth and nobility, and their literature reflects this love and is dedicated to the ideal. The Russians are realists because they are conscientious and truthful. They must paint the things they see, and an artistic lie is to them the unpardonable sin. Tolstoy can out-Zola Zola, but he does this because he is too honest and upright to gloss over the evil and painful sides of reality. The Russians are sometimes cruel, remorseless in their art, but they are remorseless to their own natures first. They torture themselves before they torture others. They—that is the true, the great ones—have not written to sell, to please the public, to amuse the "tired business man."

Russian history explains the sharp contrasts that mark off the several classes found in the great empire. At any rate, each class had to have its own interpreters and analysts. What Tourgenieff, Tolstoy, Gontcharoff, Pisemsky and others did for the nobility and aristocracy, a powerful group of novelists and story-tellers, led by Uspiensky and Zlatovratsky, did for the great peasant mass. It is a pity that the work of these artists is absolutely unknown in the West. Their sketches and studies of the simple, illiterate peasant man or woman, of the life of the Mir, of the influence of the "soil" on the peasant, have psychological as well as literary and esthe-

* Here is an incident that illustrates the absurd incongruities and contradictions of the Russian censorship. In the early nineties a monument was erected to the memory of the radical and popular poet, Nekrasoff. All the literary notables of Russia took part in this function, which, of course, assumed a political and moral aspect. The government could not well forbid the erection of a monument to a dead poet whose work had been passed by censors of another period. So the festivities took place and everything went off splendidly. The poet was lauded by several eminent speakers. One of the workmen who was a spectator and auditor at this function later bethought himself of the desirability of making the acquaintance of the to him unknown poet. He went to the public library and asked for one of the poet's works. He was informed that none of them were among the books circulated or even suffered to be read on the premises. Of course, the secret and illegal libraries would have been glad to accommodate him, had he applied to any one of them.

tic value. Zlatovratsky was disposed to idealize the peasant, to hold him up as an exemplar to the intellectual and sophisticated Russian; Uspiensky, on the other hand, was a rigorous realist, and his sketches are more vital and more significant. Both are worth translating.

The middle class is rather weak and relatively unimportant in Russia, for industrially and commercially the country is incredibly backward, thanks to autocracy and its corrupt and inefficient agent, bureaucracy. Still, there are the merchants, the manufacturers, the usurers, the contractors that constitute the nucleus of the future middle class. What is the intellectual and moral status of these elements? Gorky and Tchekhoff have dealt with them in several of their respective books, but the master portrayer of this class is Ostrovsky, the leading Russian dramatist. Four of his plays have just been brought out in an English translation. One, "The storm," has been available in English for many years. Those who are perplexed by the impotence and insignificance of the Russian middle class in the present struggle—and their name is legion—will find light on the puzzle in these remarkable dramas and comedies. Dobrolyuboff, the critic, greeted Ostrovsky's plays as a "ray of light on a dark kingdom."

The village priests, the students in the theological seminaries, the teachers and heads of these strange institutions have been portrayed by another group of very gifted story tellers and novelists.

Those who are interested in Russian life and letters—in letters as the mirror of life and the inspiration of generations of bold radicals and revolutionists—will be surprised and gratified to learn that, with the guidance of one competent historical work—say Kropotkin's "Russian literature"—they can form a fairly adequate conception of the whole course of the Russian struggle for freedom and justice by carefully reading a dozen of Russian classical novels. Such is the fact. For two generations or more Russian novelists and dramatists have sympathetically watched and faithfully recorded the several stages and phases of the revolutionary movement. The appearance of a "new type," of men and women of new

ideas and aspirations, of new currents in thought and action, almost immediately brought forth a novel or drama in which these types and tendencies were accurately depicted and interpreted. Tourgenieff was the most sensitive of artists and interpreters in this line. He is the painter—not the creator—of several distinct types; he took them from life. Lesser lights did the same thing. By presenting the new types, they powerfully aided in the diffusion and development of the characteristics of such types. Men and women imitated them, tried to be as like them as possible, became personifications of certain general ideas. Events and vital facts would, of course, gradually modify the type, and the artist, noting the modifications, would produce a new type.

The novels and dramas I have particularly in mind in making these remarks are these: Tourgenieff's "Fathers and sons," in which the hero, Bazaroff, the atheist and materialist, the first Nihilist, represented a definitive phase of the Russian revolution. Bazaroff was widely imitated. He "made history." In Tchernishevsky's "What is to be done?" several types were depicted. One of them, Rakhmetoff, became the idol of the terrorists and revolutionists of the seventies and eighties. Mordovtseff's "Signs of the times," second rate novel as it is, pictures interestingly a whole decade of Russian life, with several new figures. It deserves translation into English as a human and social document. Tourgenieff's "Virgin soil" is a splendid and large canvas, on which several new types are painted. Tolstoy's "Resurrection," in which the revolution is only casually glanced at, presents charming figures, while outlining a new view of the land question and the difficulties facing the radical and regenerated aristocrat.

To these books I may add several others—namely, Herzen's "Who is to blame?"; Tourgenieff's "Notes of a sportsman," a picture of the régime of serfdom; Gogol's "Dead souls," another epic; the same author's tragic comedy, "The inspector general," an appalling picture of corruption and bureaucratic laziness and inefficiency; Gontcharoff's "Oblomov," said to be the most Russian of Russian novels, because it

mercilessly chastises the indolence, the inertia, the fatalism, the futility of the decadent Russian noble; Tourgenieff's "Roudin," "Smoke," and "A nest of nobles"; Saltikoff's "The Golovlieff family," of which a fair translation in German is to be had; and Tchekhoff's "The cherry orchard," and "Uncle Vania."

To read these novels and plays in their chronological and historical order, with, I repeat, the guidance of a well-informed interpreter and chronicler like Kropotkine, is to acquire a liberal education in Russian realities and evolutionary processes. It is also, by the way, to give one's self much artistic pleasure and joy.

The long oppressed people that has produced these masterpieces, this literature, is a great, gifted and noble people. It has a great future. It will express itself nobly and beautifully in its literature and art even under a régime of freedom, self-government and justice. We cannot understand Russia and the Russians without a proper introduction to them thru their truly national and wonderful imaginative literature.

A SCHEME OF READING

The following are characteristic works of fiction dealing with successive phases of Russian history:

Evils of the Old Régime of Slavery, Corruption and Ignorance.

"Notes of a sportsman," by Tourgenieff.

"Dead souls," by Gogol.

"The inspector general," by Gogol.

"Oblomov," by Gontcharoff.

Revolutionary Movement—First Phase.

"Who is to blame?" by Herzen.

"What is to be done?" by Tchernishevsky.

"Signs of the times," by Mordovtseff.

"Fathers and sons," "On the eve," "Smoke,"

"Roudin," by Tourgenieff.

Revolutionary Movement—Second Phase.

"Virgin soil," by Tourgenieff.

"Underground Russia," by Stepniak.

"Resurrection," by Tolstoy.

"Memoirs of a revolutionist," by Kropotkin.

The novels may be supplemented by these more comprehensive works:

"Empire of the tsars and Russians," by Anatole Leroy-Beaulieu.

"History of modern Russia," by Prof. A. Kornilov.

"Self-government in Russia," by Prof. Paul Vinogradoff.

"Russian literature," by Prince P. Kropotkin.

"The Russian crisis," by Prof. Paul Milyukoff.

[To this last group might be added, for a better understanding of the problems of Russia to-day, the recent "catechism" on "Political parties in Russia" by Nicholas Lenine, and Leon Trotzky's book on "The Bolsheviki and world peace." Publishers' announcement is also made of an American edition of the book by Trotzky on "Our Revolution," first published in Russia in 1906 and at once suppressed, and of his new book on "The Russian revolution of 1917."—EDITOR LIBRARY JOURNAL.]

LECTURES ON FRENCH TOPICS OFFERED

AN opportunity to stimulate interest in French literature, and at the same time enlarge the French collections on their shelves, is offered to librarians of schools and public libraries by Mlle. Marguérite Clément, representative in this country of the French *Société d'Exportation des Editions Françaises*, who will leave about March 1 on a tour thru the Middle West and South.

Mlle. Clément offers, in the cities which she visits, to give lectures before clubs, schools, or general assemblies, in French or in English, as preferred, on the various forms of French literature or on the writers of the day. She gives her own services without charge, but requires that an admission fee be charged in all cases, the proceeds being used to strengthen the French collection in the library benefitted. Mlle. Clément is a graduate of the University of Paris, a teacher of French literature, and has lectured thruout France on subjects ranging from French literature to woman suffrage.

The society which Mlle. Clément represents includes some thirty prominent French houses, which have organized to promote export business. It is one of the conditions laid down by Mlle. Clément, however, in accepting the position, that she should not be restricted to their publications in making her selective lists of recommended titles.

Mlle. Clément has been sending letters of inquiry to many public and school libraries regarding their present French collections, and scantiness of equipment and meagerness of appropriations for French books have been almost universally reported. She may be addressed care of the American Express Co., 65 Broadway, New York City.

THE QUESTION OF CENSORSHIP IN LIBRARIES*

BY ERNEST C. RICHARDSON, *Librarian of Princeton University*

It is an interesting fact, and one stimulating to research effort, that the first and fundamental element of making the world safe for democracy is one which belongs to the book sciences and, therefore, to our own field of learning or expertness. The freedom of assembly, the freedom of public address, and the freedom of the press, are three aspects of the one fundamental fact that the free exchange of ideas, critical or constructive, is, by the nature of the universe and of the human mind, the basis of freedom. Freedom, or liberty, is defined in international law as the absence of external control, but this negative definition implies a better one—the presence of self-control, or self-determination.

The mere absence of foreign control does not produce freedom in a state or freedom in the individual. A state may be free from foreign control and yet be an arrant despotism or in a state of anarchism. Anarchism is farther from freedom than despotism, for despotism is a poor form of national self-control, but yet self-control, whereas anarchism is the absence of political self-control and the true antithesis to freedom. The highest form of national self-control is where the right of self-determination or self-control is vested in each individual as sovereign. This is democracy—a state in which every normal man is equal to every other as to his right of self-control or self-determination as distinguished from control by anyone else. The point is, that since freedom belongs to every man, and every man, therefore, has the right of self-determination—the right to act according to his own judgment without interference by anyone else—freedom is limited, altho only limited by freedom. Each man's freedom is limited by the freedom of others, and liberty, therefore, implies not only the right to act according to one's own discretion, but the duty of refraining from interfering with other men's action according to their discretion.

This means, of course, that there can be only one free person in the universe in the absolute sense. One man on a desert island comes near absolute freedom, but if there are two men, they must come to an agreement as to the field within which each may exercise his discretion. These fields or spheres within which a man may freely act are his rights. The records of agreements as to rights are laws. Freedom thus implies that every man may act at his own discretion within his rights as defined by law. This leads to the simple proposition that the one essential of self-control or self-determination, freedom or liberty or whatever it may be called, is the right of every man to a direct share in the making and execution of laws—the democratic ideal. This right in small communities is exercised by the town meeting; in larger communities it is exercised thru printed information and discussion and representative assemblies. In every case the same fundamental principle of the right of a man to share in limiting his own sphere of uncontrolled action is implied. It comes to pass, therefore, that, as has been said, the first and greatest step in making the world safe for democracy is to make it absolutely safe for the freest expression of ideas, whether critical or constructive.

In the great epochs, where the principles of liberty themselves have been most freely and fully discussed, this essential and simple principle has stood out boldly. So it was from the time of the Boston massacre to 1789; and it was for this reason that the framers of the Constitution introduced it into the Constitution. For democracy to be safe the political freedom of the press must be unlimited.

The principle is, however, nevertheless subject to the principle of non-interference with the freedom of others. The principle of libel limits freedom of speech certainly to truth, and perhaps, if in non-essentials, to what is not injurious to one's neighbor. In time of war it must obviously be limited to what will not aid the enemy, hence cen-

* Extracts from presidential address before the American Library Institute at Atlantic City, Feb. 16, 1918.

sorship comes in, and librarians are more by way of understanding the need of this than most. Every library has practical experience in the forming of lists of books prohibited as injurious to morals. Most large libraries have been urged to prohibit classes of books which are contrary to the opinion of the majority of users on economic or political or religious subjects. Many have been asked to exclude books on Christian Science, books against Christianity, or against the Roman Catholic Church, or for the Roman Catholic Church.

No librarian, therefore, doubts that there is a limit, and hence a proper field for censorship. There are multitudes of books which encourage the murder of King's English or the depraving of innocent literary tastes, which should be excluded from the free circulating library. There are others of the most admirable English style to which the immature reader should not be exposed. There is no difference of opinion in this matter. The same thing is unquestionably true at the present time as to positively seditious literature, and the whole question becomes a very practical one for librarians at the present moment as the several pre-printed contributions to this discussion show.

The practical problem is not a simple one. The problems of the circulating library and the research library are very clearly distinguished at this point. The free circulation of really seditious literature is properly a matter of prosecution. Every patriotic librarian would take precautions not to do it anyway. A librarian is, however, not held responsible for having or even furnishing to readers such literature, unless he is aware of its seditious character or it has been pronounced seditious by a competent tribunal. The principle was brought out in the British Museum case, where Martin sued the British Museum for libel for having certain books containing alleged libel. Even if a book has been called to a librarian's attention as alleged to be seditious, this does not necessarily mean withholding, for every librarian gets a most extraordinary list of alleged sedition and irreligion from the most extraordinary variety of incompetent

critics. With the case of the research library, the collection even of seditious literature for the use of the future historian seems to be agreed to be desirable, but, by the very same token, he is, in the recognition of it as seditious literature, bound to keep it from general circulation.

When it comes to the matter of the border line literature, the question is a harder one. It is right and fair that doubtful literature should be withheld for qualified use, but the whole history of book censorship shows that this is one of the most dangerous discretions which can be exercised. The fundamental right and the absolute need of democracy is the right to know all that can be said for or against any question. There is no right, and rightly no right, of which we are so sensitive as this right of knowing both sides and of the right to know the truth. The matter is very greatly complicated by the fact of the free intercourse of this democratic nation with foreign nations which are not democratic. Even a nation of which it can be said that the spirit of its institutions are democratic, but which is in form and habit monarchical, is widely separated from our principles. Great Britain is the most democratic of monarchies, but an unsophisticated American visitor to England has his breath quite taken away by the open recognition of class and the acceptance of special privilege as established right under law. Under a system where there are subjects, information may be withheld which cannot be withheld from sovereigns. It is hard for an American to realize that British subjects take themselves seriously as subjects, and ten times more so for the young American in Germany or Austria to understand the acceptance of aristocracy. On the other hand, it is hard for a Briton to take seriously the American's idea that he really is a sovereign—they think it a mere form of words. He is as absurd to them as those who accept the idea of being a "subject" are to him. There is a wide gulf fixed between any democracy and any government which recognizes the principle of subject, of aristocracy, or of monarchy. This was no matter of theory with the founders of America or the framers of the

Constitution. In America the people are sovereign, they have the right to know, and information cannot be withheld from them which could be kept from subjects.

Altogether the problem of library censor-

ship is not a simple one, and it involves the whole question of free discussion. The records of human experience in this matter are many. It is a rich field for special research appropriate to libraries.

THE RELATION OF THE PUBLIC LIBRARY TO THE PRIVATE BUSINESS LIBRARIES

BY PAUL H. NYSTROM, *Ph.D.*

THE development and application of the library idea seems always to have been characterized by growth in details, one by one, rather than as a whole. At one time, we had a rapid spread of Carnegie libraries, at another of school libraries, at another of children's rooms and story hours, at another of traveling libraries and library extension. Having established themselves these detail movements go on with the general library movement constantly making it more significant and useful to the public.

Just now the most rapidly developing phase of the library idea, it seems to me, is the establishment of private business libraries. A large number of concerns already have their libraries or information and data departments organized and operating. Still larger numbers have begun collections of materials similar to those brought together by libraries. The use of business literature is so clear that other hundreds, if not thousands, of concerns need only to have the idea and suggestion of how to carry it out brought to their attention in order to cause them to establish similar departments or libraries.

The business library movement is largely a tribute to the public libraries. If I mistake not, the service of the public library has suggested the possibilities of the special business library. The systems of the public library have been drawn upon for the business library. Not a few business libraries have come from the ranks of the public libraries. One may truthfully speak of the business library as a direct offshoot of the public library.

To make clear the actual and possible relations the public library can work out with the business library we must first con-

sider the peculiar functions of the business librarian and of the business library.

From such study as I have been able to give to the matter, it seems to me that the real purpose of the business librarian in a business concern is to bring to the attention of the officers and employes whatever has appeared in print that they should know and in such form as to induce them to use the material. The business librarian should be the concern's specialist on the lines of literature of interest to that concern. The business librarian should both sift and interpret business literature for his concern's use.

The library in a business concern, quite unlike the Carnegiean concept, is merely the office in which the business librarian works. It is equipped with supplies which the librarian may need in his work for the company. Its equipment is long on literary tools but short on collections of books and pamphlets. In fact you may have an excellent business library service without any collection of books in the etymological and customary sense of the word "library." The business librarian exercises his profession thru knowledge of where information, such as his concern wants, can be found. One business librarian that I have met had no books at all in his office, but did utilize books and periodicals in eight public and professional libraries located in his city. The ideal business library contains the books, periodicals, documents, and reference works of fairly constant and current use, and particularly the guides, handbooks and directories to the large collections within reach.

The business librarian's work, when compared with that of the public librarian, is

highly specialized. He must classify and sub-classify in planes which never can concern the public library, or at any rate which would not be practicable for the public library. The work that he does must often be done within very definite and very limited time. An idea, say some news item, may be of great value if used to-day, but of no use to-morrow. The business librarian must study the personalities of the people whom he serves in a way that no public librarian can successfully do for the general public. The business librarian, in this respect, must adopt the tactics of the skilful teacher and determine individual methods of getting the attention and interest of the right parties within the concern to the points discovered in his reading of business literature.

The business library function came into existence with the development of business literature, and I mean by business literature, literature that can be put to use in any way by a concern. The function is growing. The need for the business library is greater to-day than ever before. It will become greater and greater. The business library in one form or another has come to stay. Concerns that are large enough to permit of the necessary division of labor will provide business library organization. Smaller concerns will go as far as their means will permit. There will be such a development as this because the business library, properly conducted, pays.

What shall be the attitude for the public library to take towards business libraries springing up about it? I cannot answer this question by saying what their attitude ought to be. I can only point out what their attitude actually seems to be and then make a suggestion or two on how I think greater progress can be made.

Most public librarians that I know of treat business libraries and librarians just as they treat individual patrons of the library. Not much attention is given to the business library as such. The business librarian merely comes to the public library and receives the public library service under the same rules as other library users. I have known of cases where he thought himself lucky to be permitted even this.

There are still other libraries that look upon the business libraries as avenues thru which to expand the public library service and accordingly co-operate in numerous ways with business librarians. Such public libraries are to the business libraries much the same as wholesale houses are to retail establishments in other lines of business.

In a few cases the public library is going to the opposite extreme and is attempting to perform business library service for the business men and business concerns in the community and who patronize the library.

There is nothing to discuss about the first method. I take it for granted that no well managed, live public library would restrict its ordinary services to the business librarians in its vicinity.

The second plan, wholesaling the services of the public library to the business library, deserves more attention. The public library must, of course, consider its means before extending such service. But where practicable the usefulness of the public library can no doubt be greatly enhanced by application of this method. To illustrate, no matter how much service a public library already renders to its community, there are certain to be some unworked possibilities. The library may even already reach the great majority of people in a community with certain classes of services and still leave other possible highly valuable services undone. This is especially likely to be true of stimulating the reading of business literature.

In a concern with which I was acquainted, employing in the neighborhood of three hundred people, there was established a public library branch specializing on business books. By investigation it was found that scarcely any of these 300 had ever patronized the general public library in the city for this type of reading. By proper encouragement from a live business librarian, a large number of these were induced to take up reading along business lines, resulting in considerable gain to themselves and to the business.

The public library had been established in the community for years. Practically all of the employes knew of the public library and many of them had used it in

various ways, but it required the special business library located in their own concern to call their attention to the new values.

In other words, among these employes reading for business was an idea not formerly taught them by the general public library. The establishment of the business library indirectly extended the service of the general library in a very specific and valuable line to nearly three hundred additional residents of the city. Was it not well worth while for this general library to establish its business branch in this concern?

There is no question but that the public libraries can in many communities expand their services to business interests. They can collect business books, business periodicals and make abstracts of important articles in the periodical literature for the benefit of industries in the community. The public library can promote interest in business literature to a marked degree, without doubt, but it is impossible for the public library to render the intimate special service for the particular concern that the business library performs without sacrificing something of the general public library values.

The establishment of business branches and business departments in libraries is to be highly commended, but this does not take the place of business libraries. On the contrary it will help promote the business library idea.

There is a service which the general library can perform for the business library movement that would be extremely valuable to the business public as well as highly appropriate for the public library. The public library with business departments or business branches could serve as a clearing house for the business libraries, help to organize them, advise the purchasers of business library supplies and material, serve as an employment bureau for business librarians, co-operate with the business libraries after establishment, and thus align themselves with the business library movement. There are many details in this type of service which I have not mentioned but which will occur to you as you think the matter over. It is also possible that I have

not presented the suggestion in just the way it can be practically carried out. But I am confident that such a service as this would be highly appreciated by business interests and business people. It would help gain the strong confidence and co-operation in public libraries that is so much needed in this country. It would pay the libraries. And the business libraries, at least those I know of, would welcome the establishment of this line of service and would contribute everything within their power to the movement.

In conclusion, the business library is a permanent institution that will continue to grow. The public library has been the source of their inspiration and of many suggestions on how to conduct their work. The public library has in the business library field a splendid opportunity to enter upon a new line of library extension by taking part in the movement and by helping it to take efficient form.

The business library movement needs the help of the public libraries. It needs to profit from the public library experience. It needs the service that only the public library can give.

The public library, I shall venture to say, needs the business library for its freshness of contact with specific problems in a certain sector of life, for the inspiration to secure concrete results, and for the opportunity to reach large classes of people in a new plane of service, that it would be difficult if not impossible for the public library to render directly.

That business libraries are private institutions and serve limited clientele is not an objection for opening up relations with public libraries. The public served by the public libraries is entirely made up of private individuals. The noteworthy difference between a business library and the ordinary private individual served by the public library is that the business library is organized to help itself while the private individual usually is not. The business library serves a group of people with almost identical interests while the private individual represents only himself. The business library stands in position to multiply the service of the library while each indi-

vidual served by a library merely adds one to its patrons.

I have purposely refrained from discussing in detail the kinds of service that a public library may render the business libraries. This is a matter that can be much better discussed after we have fully agreed

upon the relationship desired between the two. What is uppermost in my mind is that it is very necessary in the interests of efficiency of both that they should get together, and I trust that these brief remarks may have assisted in making clear why.

MOTION PICTURES AND THE LIBRARY IN CLEVELAND

BY MRS. ELMER G. DERR, *President, Cleveland Cinema Club*

THE Cleveland Cinema Club was organized on Mar. 30, 1917. Its purpose is to study the art of the motion picture and encourage its best development. The club is organized for service and may be consulted by any organization or individual interested in motion pictures. It is prepared to furnish speakers on various phases of motion pictures; it is prepared to aid in choosing pictures for special showings and to assist in securing programs more suitable for the family group who usually attend theaters at the end of the week.

The club is composed of regular and associate members. Any person interested in the work of the club and willing to take active service is eligible for regular membership. Those not desiring an active part but who are in sympathy with the ideals of the club are eligible for associate membership and may share the bulletin and the program meetings. The annual dues are one dollar. Eight evening monthly program meetings are held in the year beginning in October. The club is a member of the Affiliated Committees for Better Films of the National Committee for Better Films, in New York City.

The standards of art governing the National Board of Review are the basis for the local work of the Cleveland Cinema Club. The club edits a bulletin page, weekly, in the *Cleveland Women* wherein it gives the names of the new worth-while pictures, reports the work of other Better Film Committees, gives items of interest concerning the industry, notices of the evening program meetings of the club, lists

of books on motion pictures available at the Public Library, etc.

The club works only on the positive or approbation side of the motion picture question. All pictures mentioned in the lists of "Current Releases" on the bulletin page have met the standards of the club. The October meeting was an acquaintance meeting; a demonstration was made of a portable suit-case sized motion picture machine, using 60 foot and 100 foot projection; the work of the producing companies in Florida and California was described by a member who spends her winters south. At the November meeting the classic "Les Miserables" was screened and greatly enjoyed by all present. At the December meeting an evening of comedy was given, using films to represent polite, slap-stick, cartoon, juvenile, satire, and drama-comedy, after which an open discussion was held, led by Prof. W. O. Little, professor of English in Glenville High School, an active member of the club. At the January meeting a very interesting address was given by J. M. Johnson, manager of a large motion picture exchange in the city. These evening meetings are held at the Central Y. M. C. A.

The club, or rather the group from which the club sprung, has been studying pictures for a number of years, and for over two years has been making the selection of picture-programs given by the different charitable institutions and community settlements in Cleveland and vicinity. This work is increasing greatly as the majority of public institutions, colleges, schools and

clubs are installing motion picture machines. The opening of community centers in the public schools brings a further demand upon the Cinema Club for aid in choosing their films for the "movie" nights.

The club has prepared a card catalog of recommended films that extends back for a year and a half. We are at work now on a clipping department that we believe will be helpful to clubs and schools as they follow our suggestion to include in their programs the study of the art of the moving picture. The fine arts department of the Public Library is the custodian of card system, clippings, files of motion picture magazines, and other data. We hope to have a motion picture department in the library later on.

We believe there is a fine opportunity for the libraries of the country to co-operate with the film-producing companies and the exchanges, especially when standard books are dramatized and prepared for the screen. Advance notices could be given the library, by the producing companies, and the local exchanges could invite a librarian to private screenings and give the date and theaters where the films are to be shown; the library could arrange their books on the subject, posting lists of books and theaters where the story is to be screened upon the bulletin boards of the library. Going further than this in service to the public, the library may subscribe for the approved lists of pictures published by the National Committee for Better Films, 70 Fifth avenue, New York City, using their weekly or monthly lists. The national committee stands ready to make up a special Library List, giving in three or four lines a condensed story of the best pictures as they are released by the producer, standing back of the standards of art used in judging the picture. The library may join the Affiliated Committees for Better Films, or work in conjunction with a local group or club, such as the Cleveland Cinema Club, the club to assume all responsibility for the work done by the library.

The educational value of motion pictures is being recognized and one may expect to see their general use in teaching in the

higher elementary grades and high schools and colleges very soon. The introduction of the department of visual education will revolutionize the system of education and greatly shorten the time of school and college courses.

The business world has been quick to adopt the use of films in selling and teaching salesmanship to their forces, and to supply this commercial need several makes of small portable motion picture machines are on the market. The possibilities of motion pictures make for efficiency, direct method and conservation of effort. As an art there has been a steady advance and no time, expense or detail is withheld in making pictures that shall satisfy the artistic sense. New processes of photography, coloring, projection, etc., are under constant study and experiment and when perfected and in general use will add much to that which to-day seems nearly perfect. When a time-defying film has been invented we can have "film libraries" where copies of the best pictures may be preserved. Civic and national history may then be visualized!

LANGUAGE-MAKING IN ALASKA

In the report of the work of the Bureau of Education for the natives of Alaska in 1915-16, are two items of interest to students of philology. In the village of Eek, in the Tundra district, a very bright native has compiled a written Eskimo language, with characters similar to the Runic symbols of the thirteenth century. He has about a dozen pupils and they are able to carry on a correspondence on any subject.

In a school in the village of Gambell, on St. Lawrence island, the making of an Eskimo-English dictionary was introduced into the language work. Pupils and teacher worked on the dictionary together, each having his own copy. This work was most helpful to all, and tended to remove the natural hesitation of the pupils to speak English. As an exercise in translation, the members of one class would go to the blackboard and write their English interpretation of the sentences prepared by the teacher and spoken to them in Eskimo by a member of another class. Physiology and sanitation were given special emphasis.

"ALL IN THE DAY'S WORK"

A Report by GEORGIANA AMES, *of the Minneapolis Public Library.* *Contributed by*
RAYMOND L. WALKLEY, *Assistant Librarian*

IN 1913 the branch librarians of the Minneapolis Public Library were asked to make community studies of the territory surrounding their branches. The city was divided and a certain portion assigned to each branch. When the surveys were completed, they resulted in definite information about schools, churches, clubs, improvement associations, hospitals, factories, trades, nationalities and other conditions or work affecting the social life of the community. They brought out many surprising facts in regard to the people of the district, and helped the librarians to be more observant of the needs of the people about them as affected by their interests. When a new branch librarian is appointed, one of her first duties is to begin to get acquainted with her environment by making some such systematic study of the conditions she will meet and the organizations she can help, or upon which she can rely for co-operation in her work.

The value of such studies to the branch librarian are very evident in the written reports which they are required to send to the chief librarian at the end of each year. So many required reports are full of figures and statistics which can easily be ascertained by an inspection of the circulation and other records, that it is refreshing to read a report like that written by the librarian of our Logan Park branch.

This branch occupies one room on the ground floor of a large field house which was built jointly by the park and library boards. The building is located in a park as large as two city blocks; there are tennis courts, skating rinks and playground facilities for all outdoor sports, and the field house contains a swimming pool, club and assembly rooms for winter use.

The branch serves a district populated largely by Poles and Russians. The temper of the people is so well shown by the report of Miss Georgiana Ames, the branch librarian, that we wish to put it into print. It seems best to take out those parts which

mention the assistants by name, and parts which for other reasons are not of general interest, believing this will not detract from the spirit of the report. How much more such a report is worth than statistics or plain statements of facts can be judged only by reading the report itself.

Miss Ames wrote as follows:

Alighting from the street car on Broadway, a shrill cry is heard: "Here goes the lib'ry lady.—Say, I got all my spelling correct.—My teacher won't let me read my book in school; gee, it's a peach of a book." A pull at her coat reminds the librarian of a small tot who is trying to whisper that she has been waiting for her—"I earned a penny and I want a penny doll. Do you know where I can buy one? My mama says you can go with me." But attention is turned to a woman whose shyness is overcome by a ready greeting of "How are you?" With eagerness she asks if there are any books in the library on medicine. She has had a fever, she thinks, for several days. A hurried scribbled note and she is directed to the nurse, going on her way rejoicing, with one of the children to guide her, to Webster School.

A gaunt, deserted-looking stranger crossing the park is drawn to speak of himself. He has lost his job. Yes, he will come up to the library to read awhile; he doesn't care much where he goes. A few suggestions as to places of employment or a telephone inquiry will often send a man happily to work, making him a staunch interested library patron ever after.

The librarian is glad she started for the library branch an hour ahead of time, or all these opportunities for personal contact would have been lost. Wouldn't it be nice to have time for everything?

It is hoped that from one o'clock until two will be a quiet hour in which to make out the daily records; often such hopes are shattered. One awaits with joy the banging of the door which admits the tiny toddlers, some to look at pictures and use

the "spies" (stereoscopes), while other members of the cradle-roll crawl happily on the clean floor. They are learning already that the library folk like you to be good; it means clean hands, and to say "please" when you ask for things.

It is an indignant woman who enters now with a shawl thrown hastily over her head, fists doubled up, and accosts one with the demand, "Do you run this Public Libr'y? Why is my boy kept out?" It is hard to make a mother understand that her darling boy is guilty of questionable behavior, and the librarian is secretly glad that the trustworthy policeman is on the premises. Here is the mother that puts her boy out on the street, swears at him, has not mother-love enough to take the responsibility of guiding and directing him, and is ready to pick a quarrel with anyone who dares cross him. Such a boy hangs around our pool-rooms and public places, and is a menace to us. The woman may leave the library with a curse. It is no easy matter for such a mother to see her duty. Some have come back sheepishly, while others before they leave beg to be guided or given something to read to help them see what they can do and how they can talk intelligently to a growing boy as only a mother can.

When there is an afternoon assistant at the branch the librarian is free to do some neighborhood work. The mornings do not seem a wise time to disturb the school work or the home work.

Four large public grade schools were visited during the year. Talking in every room, stopping in the younger grades to tell a story, leaving graded lists of books everywhere, going back another day to attend the Parents and Teachers' Association, where we talked over warm coffee and doughnuts about all our problems—oh, how much it helped even with the discipline at the branch. After one of these meetings this remark was heard: "My ma got acquainted with the libr'y lady. Ma and pa's coming up here soon some day because she asked them especially. Aw, come on! I cut out yelling in the window. Can't you be decent once in a while?"

Four Catholic schools were visited in the fall with the same results, leaving the

Polish school—the least cordial—to be visited by a Polish assistant. The St. Boniface (German) Sisters could hardly believe that the library was anything but a reading room and the librarian a book agent. The pupils had to be called on to substantiate the statements. This is the first year opportunity has been heartily given in all these schools for the librarian to go into each room and take all the time she wished. Extemporaneous talks were given on the use of debate material, a field in which these schools can create the most unthought-of subjects. There were talks on how to read, what to read, why to read, about vocations and many subjects suggested by the questions of the Sisters. Patiently and persistently was repeated the advice that father and mother at home would like to hear what they had heard about the branch and the books in foreign languages. Lists of requests from the Catholic Sisters have been increasing, which is very gratifying. Advice has been asked about many of their plays and entertainments, and urgent invitations sent to attend their amateur productions. Books of recitations are always in great demand among their pupils.

Polish Sisters may be seen at the branch two days a week; they come for books on history, literature, etc., and stop to read the newspapers. No, they did not come at first—they did not need the library; they had enough material in their school. They would come willingly to go over the Polish books and give the librarian some idea what lay between their covers. This would help in her selection, when a child asks for a good book for her father. The Polish Church is very strict; they cannot do much to help the children procure cards. At catechism the priest will caution his pupils against reading.

At half past two come straggling groups of high school students, with their required reading lists and reference questions. Some stop to study, others to wait for a chance meeting with the opposite sex. A shrill whistle from outside will cause a mad rush for the door, with a minute's hesitation at the drinking fountain in the outer hall to squirt water.

A club program comes up for discussion.

Best books on South America are gotten together and suggestions made for the yearly program.

A quiet Bohemian woman waits to say that she has read all the Bohemian books. "Will you send for more?" With her life darkened by the sorrowful losses in her family, she has found a great comfort in the library; it is the only place she will go. Bohemian is the only language she can read, altho she speaks good English. Word came in December that she was confined to the house with rheumatism. Her one expressed regret was that the librarians would miss her, she could not get anything to read, and there was no one with whom she could talk about her daughter.

A mother hurries in. She left a neighbor with her bedridden charge. Yes, there are some books being saved for her. There are always numerous little convalescent folk to be planned for. The "How to do" books have interested many a restless child, and relieved a tired mother. Boxes of doll dresses, crocheted yokes, paper box furniture, etc., have been sent to the library, with the scrawled note "When are you coming to see me? What shall I do next?"

The postman brings a note from a fourteen year old girl who has received an overdue notice:

"Dear Madam:—Yours received, saying I had a library book overdue. You are much mistaken; it's my baby sister. What should I be doing with libraries? I have graduated from eighth grade. I have outgrown your library, altho you were nice to me and I liked it at one time. Don't bother me with any more notices please."

A clatter of footsteps—yes, school is out. It is truly the "Children's Hour." In they come, in harum-scarum fashion, breathless and boisterous. This voluntary, spontaneous attendance, which is at times at the point of combustion, has a charm and stimulation, altho it leaves the attendants feeling very much like rags. Two or three little friends will voice in unison the wants of a speechless one, who is all eagerness to "belong." A girl likes boarding-school stories—"I have read all these." A boy with savage instincts tries to raise a rough-house, and is told to leave, to his sorrow. "I didn't do nothing. You'd think this was an Old Ladies' Home." Someone wants

the "book teacher asked for." "Where is the Panama Canal?—Do bananas grow up or down?—Where are the play books? We're going to have a play in our barn.—Say, we are off to play Schiller School ball team. I'll come to tell you the score before I go home.—Have you another good book for me, and one for my mother? She likes the kind that makes her cry." The victrola starts up in the next room. Some child is having a party. They will play their most popular game, "Farmer in the dell," then they will come rushing in for a game book or for some suggestions as to what to play next. In comes a boy with two fluttering butterflies.—"The boys said you paid two cents apiece for these, and I want to pay the fine off my card." Thus the library assistants continue to give wholesale direction and advice, cautioning Tom, Dick and Harriet not to talk out loud, answering as many questions as possible, hastily directing and hurriedly selecting with such non-time-consuming forms of recognition as a nod or a word.

Whenever the opportunity has presented itself, either with the individual or the group, effort has been made to explain thoroly the care of books, how to use the index, and the arrangement of the books themselves. Many boys and girls have become proud of their ability to find their material. Some thoughtless mistreatment of the books has been overcome, but not all, by far. In the "easy books" have been pasted requests like this—"Please wash your hands before reading this book." It is common to hear one small child say to another, "No, don't put that book that way, it's upside down"; or, "You mustn't drop books on the floor; don't you know how to take care of your libr'y?"

There are the teachers; they come for their art study club which they have with a Convent Sister. They need books for their extension course, or stories to tell.

There are telephone inquiries—"What kind of a sport skirt would I look good in? Do you think I can get a pattern and make my own coat at home?—Have they cleaned off the skating rink yet?—How shall we decorate our booth at the church fair?—

What is Bahaism?—Will you get me a book about the wives of Napoleon?"—This last from a fireman who has read everything on Napoleon in the whole system. Our firemen do everything from making baby limousines to knitting shawls.

Five o'clock brings the evening assistant and a chance to pick up in readiness for the evening.

Going out the door to eat her lunch in the park, the librarian meets a woman red of eye, with unkempt hair. Her husband has been drinking again, and her own breath gives away the fact that fault lies on both sides. The librarian, not possessing a husband, cannot advise her from past experience how to handle the situation.

Sitting on a bench in the park is a girl evidently sad of heart and tired of head. "What is the matter, Mary? Why don't you take that man home with you sometimes, that you meet in the park?" "Oh, I can't. Father swears, sits with his shoes off, goes to sleep snoring, mother finds fault, and everybody hangs around." Something within her rebelling, and lured by the world without, she may go to destruction. Why do not the mothers do their part? There is a gym class to get her into at Holland School, and maybe some woman of the church will call on her mother. Some astounding results may be attained, if some one will take an interest in these girls. Many over fifteen are so far out of reach that such feeble efforts to turn the tide are all but hopeless; in many cases the fault lies in the home.

Around the park bench children are apt to gather. "Oh, is that all you're going to eat? My ma lets me have two slices of rye bread at night, maybe she'll give me one to bring you.—Want part of my stick of candy? (from a chubby dirty fist).—Naw, I don't want any of your lunch, you don't have enough anyway.—We never go home for supper, just have some bread when we go to bed. Ma don't like to work.—No, we haven't been home since morning.—Is God here? Ma said you would know.—Tell us a story. Will it begin 'Once-upon-a-time?'" If lunch is eaten in one of the club rooms, some one is sure

to see the light and come over out of friendliness to keep the librarian company. "I just wanted to talk to you, I got a raise"; or, "I am so worried about my job."

Where is that quiet hour?

"When you meet a friend in woe, say hello." Extraordinary work for a library, whose chief reason for existence is to supply the people with books and information. In the Logan Park neighborhood many books would never be issued except for some previous personal experience, some sad, some pleasant.

Delightfully satisfying encouragement is received when one evening a young woman, not recognized at first, comes in. "Hello, you don't know me, won't you come out the door? I got something to show you—my husband, he's too shy to come in. We have a farm in Dakota. Yes, I used to hang around with that gang that was so much trouble. We called you our 'Gold Lady' but you never knew it. We formed a club to stop chewing gum, frizzing our hair, and painting our cheeks: you said we would get more brains in our head if we did. Some job, I tell you! We were too silly to let you know of it one day when you told us we were doing better and you hoped to be proud of us some day. Say, I have read Davie Copperfield until I like it. What other shall we buy?"

The night school was visited, where four hundred men and a hundred women were talked to, and library cards made out for the majority. The night before the librarian's visit the teachers gave a written lesson on the Public Library so the pupils would understand the librarian more readily. When the cards were made out some teachers brought their classes to the library to get them.

Readers in all nationalities were reached by the collection of easy books, books of civics, and children's stories of biography, history and fiction. The newcomer has been helped to obtain citizen's papers, as well as aided in many difficult cases with the public authorities. When they find that they will be trusted they are delighted; as one Russian put it, "You belief me—no,

not in Russia." Once started, their zeal for reading grows.

Do not think this an entirely poor district. There are a large number of home-loving, thrifty people, trying to do their best by their families while living side by side with the unruly boarding-house. The Poles will own their own homes, but will keep numerous boarders in one room to pay for it. They are irresponsible, dishes are not washed from one day to another, numerous dance halls are in constant use. Beer being too mild, they drink largely sweet spirits of niter, which makes them the more dangerous. Thus large numbers are helping to demoralize the community's ideals; but not all, for here and there can be pointed out splendidly developing specimens of young womanhood and young manhood. Rents and land are getting cheaper here because of the growing numbers of Poles and Russians. To the west of Logan Park the Poles are gradually spreading south and east. German elements are fast disappearing. French and Irish are to the southwest. On the north are the Scandinavians living in the district now with many protests, for here we have our strong anti-Catholics.

It is a very cosmopolitan group that pass before the library desk during the evening hours; it embraces all ages and degrees of intelligence. An effort has been made by all assistants at the branch to make it a friendly center. To strike a balance between what makes it a friendly center and what makes it a loafing center is at times one of the hardest questions to meet.

Evening brings the gymnastic classes in the basement, while the club rooms are full of boys—the Panther Club, Buffalo Club, etc., and the orchestra tunes up for a dance in the assembly hall. A Russian sits at the table, utterly oblivious, studying out some new theory of socialism; a child is coloring paper dolls; a man nods over his paper; a woman looks for new recipes in the *Ladies' Home Journal*; a group of girls in the corner giggle over a love story, while the boys sit and whirl their caps waiting for the girls to go. Children stop at the desk or gather around the assistants, to tell of the day's happenings, ask a ques-

tion, or wait to have a book picked out to suit their particular tastes. A Scandinavian man waits for a boy's adventure story. There is a woman who comes only when telephoned that there is a religious story in. Some one asks help with a crochet pattern, and remarks, "You pick out so easy, why don't you crochet a bed-spread while you are sitting here? It wouldn't take long."

At eight o'clock a cry, "Oh, is it time to go?" and all the children under the eighth grade shuffle out, with occasional protests of "I've passed, I'm in the eighth grade now." Some will take books, others will place a book back of the desk, for they can read only at the library.

After eight o'clock is the only time the adults have the library room to themselves. One mother says it is the only bit of quiet she has in the whole day. An Irish woman who takes a month to read a book thinks her library card is the most joyous thing she has had in her life. The little English tailoress who reads a few chapters in a book and returns it because it is due, will come and take it another week to read the next few chapters until she has finished the whole book; she says we do things too fast in America.

How interested one grows in all these people, presenting them with a book of Myrtle Reed's or LeBlanc's as if it were one's own choice, and hoping that it will serve as a rest from drudgery. Certain books are read to pieces; there are never enough of their kind, while others remain untouched on the shelves.

Nine o'clock, and soon the lights are out. Going thru the park where numerous groups are dispersing, one is apt to meet a Pole, with a case of beer on his shoulder. "Can't keep that up, Joe, too many weddings not good for your job." "Oh, yes, missus," from the ever polite foreigner. On the car are girls just starting down town alone; some bold enough to want to be seen, others bashful, carefully looking out thru the windows to hide their painted faces. As the car passes the "last chance" saloon two men roll over and over on the sidewalk in a brawl, while the children clutch each other in terror, and the mothers clutch their hands in despair.

LITERATURE AND SCIENCE IN RUSSIA

"I know cases where seven students had only four pairs of shoes among them and three or four overcoats, and they would go to the university by turn—one day one would put on shoes and overcoat and another day another student—and so they would live in the winter, studying and studying hard, and in the summer they would go to the village and work as laborers, to gather again just enough money to take them to the university, buy some books, and continue their education."

Thus writes Lieutenant Zinovi Pechkoff in the *National Geographic Magazine* for September. In "A few glimpses into Russia" Lieutenant Pechkoff has given a clear and most sympathetic interpretation of the Russian people to-day, their democratic nature, their love of freedom, and their great yearning for education.

Of the writers popular among Russians, as well as the leading scientific men he writes:

"Many of the foreign authors are just as well known in Russia as in their native country. It would take too long to relate all the translations, so I will confine myself, as it may interest the American people, to a few American authors who are known to the Russian people as well as to the Americans. Mark Twain is, of course, as much a Russian author as an American author. Everything that he has written has been translated into Russian and therefore has been widely read.

"Longfellow is just as well known, perhaps, as Mark Twain. His poems have been translated into Russian, not in prose but in the same form as written, even the rhyme and the rhythm of the verses having been preserved.

"A well-known Russian poet, Ivan Bounin, translated 'The song of Hiawatha,' and if one reads a stanza in English and then in Russian, he will see that the rhyme and rhythm have not been changed by the translation, but are the same. This is true also of Edgar Allan Poe's writings. His poems were translated by another famous Russian poet, Constantine Balmont, and not only

his poems but all his short stories also have been translated into Russian, and his works are very much appreciated and loved.

"Walt Whitman's complete works have been translated; William Dean Howells is as well known in Russia as in America. In 1907 Jack London's complete works were translated; they appear in twelve volumes in Russian and have had a tremendous success, the edition having been repeated six times in one year. The essays of Emerson are widely read; the books of William James, especially his 'Principles of psychology,' are known to every intelligent Russian.

"The lives of many presidents of the United States have been translated into Russian and their histories are familiar to the mass of the Russian people. The 'Life of Washington,' the 'Life of Garfield,' 'From log cabin to White House,' etc., are known by everybody in Russia who reads, and I need not add that 'Uncle Tom's cabin' is known to all Russians, not only those who read.

"In Russia books are published in editions not of one thousand or five thousand copies, but in editions of ten and twenty thousand, and if an edition is repeated, a book often has a sale of about 80,000 copies a year.

"The Russian youth begins to read very early. I remember that when I was fourteen years of age we had circles for the purpose of self-education, and we studied economic questions—sociology; and when I was fifteen and sixteen we studied in our circles philosophy—Kant, Schopenhauer, Fichte, Hegel, and the French Humanists.

"It sounds rather 'abnormal' for 'persons' of that age to be occupied with such questions, and some may have doubts as to the seriousness of our readings, but I have never felt myself so grown up and so able to understand things clearly as then. . . . It may be that the Russian youth in those days—fifteen or twenty years ago—felt intuitively that he had a great responsibility toward his country and that upon the youth of twenty years ago would fall the great task of reorganizing his country and bringing her institutions to the level of other democratic nations. . . .

"The co-operative societies have opened

many schools, not only elementary schools in the villages, but they have in many Russian towns established professional schools—agronomical schools for teaching the peasants intensive farming. They also helped to establish schools of technology, libraries, etc.

"During the last fifteen or twenty years there has been a growth of so-called popular, or free, universities, with evening courses for those who work during the day. A popular university of this nature was endowed by a rich man in Moscow, Scheniavsky, about ten years ago. It started in a small building and had a limited program of study.

"A few years later the influx of those who desired to attend the university was so great that the Moscow people decided to extend the activities of the institution, and later a magnificent building was specially constructed for the purpose. Now the institution is attended by more than 7000 students at the day and evening courses, with more and more branches being added to its course of study.

"Russia has given to the world great men in every branch of human thought. In literature our folklore is one of the richest in the world. Our modern literature dates from the eighteenth century. Lomonosov by his work on the Russian language paved the way for style and composition. He was a fisherman's son, from a northern district of Kholmogory, of the province of Arkhangelsk.

"His father often took him to far-off towns, and from his early boyhood he had access to books and had a great desire for knowledge which he could not satisfy in his native town, and when seventeen years of age he stole away with a caravan of peasants going to Moscow, and there he started his new life. He was a man of great learning, and the University of Moscow, in 1755, was founded under his influence. He is called the father of Russian literature.

"The names of Pushkin, of Lermontov, Gogol, Turgueniev, Dostoyevsky, Gorky, and Tolstoi are known to the whole world.

"From the second half of the nineteenth century Russian music has had world prominence. Glinka, Dargomijski, Tschaikovsky,

Moussorgsky, Borodin, Rimsky-Korsakov, Rachmaninov, Glazunov, Stravinsky, and Skryabin are known to every lover of music in the whole world.

"Our painters are not so well known to the world, but a few of them have world-wide fame, such as Repin, Serov, Vasnetzov, Vereshtchagin, and Aivazovsky.

"In science, mathematics, the two names which stand highest are those of Lobachevsky and Minkovsky. These two investigators illustrate the type of bold originality which marks the Russian intellect. The former was the discoverer of the new non-Euclidean geometry, which has revolutionized science. Besides these important names, among many others in the science of mathematics is that of Imsheretsky, who did work on differential equations in regions previously untouched in western Europe.

"In physical science Lebedev is a physicist of the first rank to whom we owe the detection, by means of most difficult and ingenious experiments, of the minute pressure exerted by light upon a reflecting surface.

"The works of Egorov on spectroscopy, the works of Umov on light—to mention but two of the names of Russian workers—show with what vigor the science of physics is being pursued.

"In astronomy Russia has taken an important place ever since Peter the Great built the observatory at Petrograd. The most famous Russian men in astronomical science and research were Glasenapp and Kovalsky on double stars and Belopolsky in spectroscopic analysis.

"Geographical explorations and research have been pursued actively in Russia since the seventeenth century. The Russian Imperial Geographical Society was founded in 1845, and has established branches in all of the outlying parts of the Empire.

"Among chemists one of the greatest names in modern times is Mendeléjeff. By the publication of his well-known periodic law of the elements he changed the whole current of thought in the chemical world.

"In biological science the Russians have acquired a leading position in many branches; among zoologists Kovalevsky's work, with that of Metchnikoff, Salensky,

Korotnev, and others, find their places in every zoological text-book.

"In physiology Russia has one of the greatest living authorities — Pavlov — who was one of the earliest to receive the Nobel prize.

"In branches of philosophy and sociology the Russians have made very important contributions. In psychology the researches of Bekhterev, among others, have received wide recognition. The Russian names which stand highest in this field are Solovyev, Lavrov, and Mikhailovsky.

"Plechanov has a European reputation as a writer on sociology. Chuprov, Struve, and Tugan-Baranovsky are among the names familiar to every economic student; and there are others and many of them."

NEW YORK LIBRARIANS AT PLAY

OWING to the fact that there were no facilities for staging a play in the library the winter entertainment of the Staff Association of the New York Public Library was given in the attractive little theater of Greenwich House, on the evenings of Jan. 30 and 31.

It was indeed a happy thought to give this entertainment at the settlement because it afforded the librarians an opportunity to see this artistically arranged new house and also gave the other guests an idea of the talent librarians possess for play as well as work.

The entertainment consisted of vocal and instrumental music and two plays, "The faraway princess," by Rostand, and "The turtle dove," a Chinese play. The piano solos were rendered by J. Mattfeld, those on the violin by Simon Jaeger. Two songs by Helen Coombes completed the musical program.

The first play, "The faraway princess," with the following cast of characters, chiefly drawn from the circulation department, was well staged and very well acted:

- The Princess LointaineMiss B. Roth
- Lady Brook, her maid of honor, Miss M. A. Ayres
- Lady HallMiss M. T. Haugh
- Liddy, her daughters Miss E. M. Parker
- Milly, Miss H. White
- Bertrand, a student.....Charles Wandres

- Mistress Flurrie.....Miss M. C. Barry
- Rosa, a waitressMiss R. Potasch
- A lackeyR. W. Henderson

The second play, "The turtle dove," given by members from the reference department, was far above the average amateur performance. The cast was as follows:

- ChorusH. G. Grumpelt
- MandarinR. R. Finster
- Kwen-lin, his daughter.....Miss Mary Lucas
- Chang-sut-yen, son of Shang-wong-yin, F. F. Hopper
- The God-of-FateW. B. Gamble
- Property ManMiss I. M. Cooper
- Cymbals and DrumR. W. Henderson

Had Mr. Grumpelt been a professional the audience would have declared that this part had been specially created for him. Not only his acting but his pleasure in depicting the character delighted his hearers. Mr. Hopper as the lover captivated every one with his singing and dancing. In fact, he could very easily pose as an exponent of an institution teaching aesthetic dancing. Miss Cooper truly merited the compliment paid in likening her to the famous "Property Man" in "The yellow jacket." Mr. Gamble as the awe-inspiring God-of-Fate, Mr. Finster as the Mandarin, Mr. Henderson as Cymbals and Drum and Miss Lucas as the dainty little princess were unusually good in their parts.

The audience was most enthusiastic and appreciative, and this impression was conveyed to one standing outside in the foyer who exclaimed, "I had no idea there were so many librarians. What an interesting jolly lot they are!"

Every one agreed that the entertainment was so excellent that it should be given again in the near future as a benefit performance. The pleasure of the evening was enhanced by the cordial welcome with which Mrs. Simkhovitch, the charming head of Greenwich House, greeted the guests.

MARY A. LEONARD.

A RESOLUTION FOR THE
NEW YEAR

By the DETROIT PUBLIC LIBRARY

*To serve the city with increased
intelligence, wider consideration and
more enthusiasm than ever before.*

LIBRARY WAR SERVICE

A MEETING of the camp librarians in the southeastern group of camps is to be held at Atlanta Feb. 28 under conduct of Mr. Milam, assistant to the General Director. This will be continued into a meeting of representatives of various camp agencies called by the Commission on Camp Activities for the day following.

The Chairman of the War Service Committee in company with the General Director is to make a round of a number of these camps and the former will visit others in the mid-west early in March.

Any library having any books ready for shipment which have not been ordered out is asked to report to headquarters *immediately*, as the need at present is very great at several points. There is a special demand for Baedekers of the western countries of Europe.

INTENSIVE BOOK CAMPAIGN

The week of March 18-25 has been chosen to inaugurate an intensive book campaign to secure the books which are needed in ever-increasing numbers if the A. L. A. is to make good its promise of book-service to our fighting men in every branch of the service. In *War Library Bulletin* no. 5, sent out by the headquarters of the A. L. A. Library War Service in Washington, full directions for carrying on the campaign, with much suggested publicity material, are given. It should be carefully read by every librarian and assistant.

In each state the state librarian, the secretary of the state library commission, or some other prominent librarian will be in charge of the campaign in the state. His part in the campaign is to stimulate state-wide publicity, to organize the campaign in towns not on the A. L. A. mailing list, to appoint district directors within the state and co-operate generally in the local campaigns. Reports of the results in each community are to be made to the state agency.

The provisional list of these agencies is as follows:

Alabama, Thomas M. Owen, Division of Library Extension, Montgomery.

Arizona, Estelle Lutrell, University of Arizona Library, Tucson.
Arkansas, Dorothy D. Lyon, Public Library, Little Rock.
California, M. J. Ferguson, State Library, Sacramento.
Colorado, Charlotte A. Baker, Secretary State Library Commission, Fort Collins.
Connecticut, Caroline M. Hewins, Secretary Free Library Committee, Hartford.
Delaware, Thomas W. Wilson, Secretary Free Library Commission, Dover.
Florida, Lloyd W. Josselyn, Public Library, Jacksonville.
Georgia, Susie Lee Crumley, Carnegie Library, Atlanta.
Idaho, Margaret Roberts, Secretary State Library Commission, Boise.
Illinois, Anna May Price, Secretary Library Extension Commission, Springfield.
Indiana, Secretary Public Library Commission, Indianapolis.
Iowa, Julia A. Robinson, Secretary Library Commission, Des Moines.
Kansas, Mrs. Adrian Greene, Secretary Traveling Libraries Committee, Topeka.
Kentucky, Fannie C. Rawson, Secretary Library Commission, Frankfort.
Louisiana, Henry M. Gill, Public Library, New Orleans.
Maine, Henry E. Dunnack, State Library, Augusta.
Maryland, L. H. Dielman, Peabody Institute, Baltimore.
Massachusetts, C. F. D. Belden, Public Library, Boston.
Michigan, Mrs. M. C. Spencer, State Library, Lansing.
Minnesota, Clara F. Baldwin, Secretary Public Library Commission, St. Paul.
Mississippi, Mrs. A. K. Hamm, Librarian Public Library, Meridian.
Missouri, Elizabeth B. Wales, Secretary Library Commission, Jefferson City.
Montana, M. Gertrude Buckhous, University Montana Library, Missoula.
Nebraska, Charlotte Templeton, Secretary Public Library Commission, Lincoln.
Nevada, Joseph D. Layman, University of Nevada Library, Reno.
New Hampshire, A. H. Chase, State Library, Concord.
New Jersey, Sarah B. Askew, Public Library Commission, Trenton.
New Mexico, Evelyn Shuler, Librarian Public Library, Raton.
New York, W. R. Watson, State Library, Albany.
North Carolina, Mary Faison Devane, Librarian Public Library, Goldsboro.
North Dakota, Mrs. Minnie C. Budlong, Secretary State Library Commission, Bismarck.

Ohio, C. B. Galbreath, State Library, Columbus.
 Oklahoma, Mrs. J. A. Thompson, Librarian High School, Chickasha.
 Oregon, Cornelia Marvin, State Librarian, Salem.
 Pennsylvania, Secretary, Free Library Commission, Harrisburg.
 Rhode Island, Walter E. Ranger, State House, Providence.
 South Carolina, Robert M. Kennedy, University Library, Columbia.
 South Dakota, Julia Stockett, Free Library Commission, Pierre.
 Tennessee, Mrs. Pearl W. Kelley, State Capitol, Nashville.
 Texas, C. Klaerner, State Library, Austin.
 Utah, Mary E. Downey, Library Secretary, Salt Lake City.
 Vermont, Ruth L. Brown, Secretary Free Library Commission, Montpelier.
 Virginia, H. R. McIlwaine, State Librarian, Richmond.
 Washington, J. M. Hitt, Secretary State Library Commission, Olympia.
 West Virginia, State Librarian, Charleston.
 Wisconsin, M. S. Dudgeon, State Capitol, Madison.
 Wyoming, Agnes R. Wright, State Library, Cheyenne.

In each community a campaign director, usually the librarian of the public library, will be in charge, with headquarters in the library or other central location. The library board will act as an advisory board. The campaign director, after a meeting for general discussion of the campaign, should make, on or before Mar. 6, appointments of a captain of publicity, captains for solicitation from commercial organizations, patriotic societies, churches, women's clubs, Red Cross and other war work organizations, Boy Scouts, children's organizations, high schools, colleges, Y. M. C. A., K. of C., Y. M. H. A., Y. W. C. A., fraternal organizations, grangers and other farmers' associations, and a captain of collection representing various transfer mediums in the town. Street boxes, closed at the top to keep out rain and snow, should be provided at much-frequented places.

The campaign director should have a conference with all his captains on or before Mar. 14, when the need for books will be explained, the methods of the campaign carefully set forth, and all publicity material—newspaper stories, posters, and the four-page leaflets for general distribution—should be given out.

After this preliminary meeting the campaign director will keep in daily touch with all captains to see that all the lines of publicity are being used and that the machinery of the campaign is working smoothly in every part. On Mar. 25 the number of books collected will be reported to the state agency, and instructions for their preparation and shipment will be given later.

The collection of books must not stop with this intensive drive. Books will wear out rapidly and with the increase in number of men in the army and the increase in interest among them in the opportunities for entertainment and education to be found in books, the stream of books flowing from the public to the fighting forces must be kept moving.

There is a special demand right now for Baedekers on Western Europe, which are wanted in many camps by the intelligence officers.

LIBRARY WAR FUND CONTRIBUTIONS AND EXPENSES

The following statement gives the contributions to the Library War Fund together with campaign expenses to Feb 1, 1918, arranged by states:

State.	Total Contributions.	Total Expenses.
Alabama	\$11,830.34	430.02
Arizona	2,257.85	56.60
Arkansas	7,766.81	
California	44,211.09	24.76
Colorado	19,305.18	148.05
Connecticut	59,136.53	242.52
Delaware	13,172.58	
District of Columbia...	10,596.07	
Florida	2,978.97	
Georgia	6,311.70	208.40
Idaho	849.50	
Illinois	112,580.00	2,263.53
Indiana	47,696.14	1,488.79
Iowa	34,936.75	
Kansas	7,034.56	19.38
Kentucky	4,304.83	282.32
Louisiana	7,651.02	49.00
Maine	3,463.18	
Maryland	15,335.54	43.18
Massachusetts	190,752.70	10,266.10
Michigan	32,856.93	120.72
Minnesota	38,993.05	35.53
Mississippi	4,392.72	142.87
Missouri	20,976.36	654.74
Montana	802.66	
Nebraska	11,263.80	
Nevada	140.00	
New Hampshire	15,113.11	

New Jersey	42,171.03	65.01
New Mexico	30.45	
New York	210,596.48	3,109.10
North Carolina	4,811.77	
North Dakota	5,539.01	100.45
Ohio	102,872.23	1,655.83
Oklahoma	1,208.91	
Oregon	18,577.63	1,028.20
Pennsylvania	84,654.08	517.45
Rhode Island	25,870.88	789.09
South Carolina	5,798.78	
South Dakota	9,332.18	219.21
Tennessee	13,346.68	374.00
Texas	13,552.43	23.48
Utah	6,027.00	
Vermont	13,561.52	
Virginia	12,560.12	352.88
Washington	20,541.35	541.60
West Virginia	1,767.23	
Wisconsin	41,376.59	801.39
Wyoming	4,442.97	
Hawaii	18.00	
New Zealand	1.00	
Carnegie Fund	207,700.00	
Anonymous	2.00	
Misc., no address	83.50	
General, Nat. Head- quarters		47,034.65

\$1,573,153.79* \$73,178.85

* This total includes the \$2767.35 raised by the Dollar-a-month pledges.

The Public Library of Washington, D. C., provided also for the National Campaign Director and his staff quarters which could not have been rented elsewhere for less than \$600. The value of these quarters should therefore be considered as an additional contribution of this library to the campaign.

In addition, Indiana libraries raised \$1430.48 for the work at Fort Benjamin Harrison.

In addition, \$400 was raised in Portland for special books for Camp Lewis(?).

In Tacoma \$52 was donated with the stipulation that this should go to Camp Lewis. This money did not pass thru the committee's hands and is therefore not credited in this report.

COLLECTING WAR LIBRARY FUNDS IN CORVALLIS

The interesting manner in which the War Library Fund was collected in Corvallis, Ore., last fall, has just come to our attention thru a letter from Mrs. Ida A. Kidder of the Oregon State Agricultural College Library.

"The amount assigned to the city of Corvallis, apportioned in proportion to population, was \$250," she writes. "One of the editors of our daily paper, *The Gazette Times*, was appointed by the state chairman as chairman of a committee to raise the fund. He thought that it would be an interesting experiment to see if the amount could not be collected without individual solicitation.

"The plan, as outlined in the daily paper, was that in order that as many as possible might have a share in the enterprise, no one should give over five dollars, and that the contributions should be sent to the newspaper office or the bank.

"Within the time allotted by the state chairman, \$320.50 was sent in without a single personal, individual solicitation, so far as known, by anyone. This was gratifying evidence of the interest the people of Corvallis felt in providing good reading for our boys."

MORE CAMP LIBRARY OPENINGS

In chronicling the "opening" of the camp library buildings it is to be understood that the date mentioned is the day of formal dedication, tho library service may have been rendered for many weeks.

The library building at Camp Bowie was opened Jan. 25, with Herbert E. Richie of the Denver Public Library as the new camp librarian. The library has fifteen thousand books, of which 7600 circulate from fourteen stations and 3800 are ready for use in the main library. A fireplace adds attractiveness to the interior, and a store-room is a feature that will be appreciated by the librarian.

Former-President Taft was the principal speaker at the dedication of the Camp Library at Camp Lee, Jan. 26. Camp Librarian Henry S. Green presided. After announcing that the building was complete and ready for the use of the 80th Division and pronouncing it formally open, he introduced Brig. Gen. Lloyd M. Brett, the commanding officer, who in turn introduced Mr. Taft.

Mr. Taft referred pleasantly to his college friendship with Camp Librarian Henry S. Green, Yale '79. He said that when the campaign was put on last fall to raise a

million dollars to provide libraries for the soldiers and sailors he questioned the wisdom of going into the project on such an extensive scale, but that after hearing what had been accomplished and how welcome the books were to the boys, and after seeing the type of building provided for the camp library, he had become fully convinced that the work was very desirable and thoroly worth while.

In going about to the different training camps, he said, one was deeply impressed by the many things which the people at home were doing for the comfort, entertainment, and benefit of the boys in the camps. The loving care and thoughtfulness of the folk back home were being shown by such things as the Y. M. C. A. and K. of C. buildings, the hostess houses, the theaters of the Commission on Training Camp Activities, and the camp libraries of the American Library Association. He was particularly gratified to learn that the books were following the boys to France, for over there the appreciation of a good book would be even keener than in an American training camp. He said he was more interested in the privates and what was being provided for them than he was in the men with bars on their shoulders; that that was but human and perhaps justifiable, as he had a son who was a private in the army, and who landed in France "last Saturday."

Following Mr. Taft, George B. Utley was introduced as the official representative of the A. L. A., and gave a short talk outlining the work so far accomplished by the association and the plans made for its further development.

MILITARY PICTURES AT CAMP DEVENS LIBRARY

The serious work which is being done at the library at Camp Devens, has been somewhat of an amazement to the persons in charge. Books of a technical nature have been greatly in demand, and military books have received careful attention. A reference collection has been made to meet the demand for study purposes in the building. Officers have assigned to other officers and to men in their companies definite, required readings. Officers, who are instructors at the Officers' Training School, come in to

ask for pictures showing the use of flame projectors and of attacks made behind curtains of smoke clouds. Incidentally the idea of a collection of such illustrative material for use in class rooms occurred to the librarian, who sent letters to half a dozen librarians asking them for proper pictures clipped from all kinds of magazines, mounted, and sent as soon as possible to the library. In less than a week a collection of over 1000 mounts was available and doing service. The pictures were from magazines, domestic and foreign, on some of the following subjects. Artillery, aviation, camouflage, communication (balloons, pigeons, signalling, telephone, wireless), field hospitals and kitchens, map drawing, range finding, transportation, tunnels, etc. In lieu of a proper filing cabinet, these have been filed in wooden packing boxes. The subject is indicated at the top of each mount.

Green burlap has been stretched across one end of the main library room, and here the pictures have been exhibited. Everyone who comes into the library goes immediately to look at the pictures and the books directly under them. Two privates spent their Saturday afternoon holiday (or two hours of the four granted them) in looking over the picture collection. On Sunday, a man who had enjoyed them brought his wife in to look at them with him. Many of the officers have spent several hours in going over the collection and making notes on how they might use the different pictures. The largest loan has been 81 pictures on trench warfare, wire entanglements, obstacles and kindred subjects, to be used in illustrating a lecture given before the colonels and other officers of the regiment, and to be repeated, in part, to the men of several companies of the regiment. Diagrams seem to be as interesting as actual pictures, and maps are especially sought.

The librarian has been asked for postal cards illustrative of the country on the different war fronts, which may be used in radiosopes, etc., and for talks of a similar nature.

Thru the courtesy of Miss Deary, secretary of the librarian of the Boston Public

Library, one wall of the library is decorated with a complete set, in color, of the Abbey "Holy Grail" pictures of the Boston Public Library. These have been framed by the Massachusetts Free Public Library Commission. John G. Moulton, librarian of the Public Library at Haverhill, Mass., has loaned two large steel engravings of Abraham Lincoln and George Washington; also large Elson prints, beautifully framed, of the following subjects: Poets' corner, Westminster Abbey; Van Dyke's "Children of Charles I"; Van Ruysdael's "The windmill"; Turner's "Fighting Temeraire"; Hobbema's "The avenue"; Stratford-on-Avon. Charles F. D. Belden, librarian of the Boston Public Library, has presented framed portraits of the following: Julian Grenfell, Francis Ledwidge, Rupert Brooke, Dixon Scott, Edward Thomas, and Donald Hankey.

NEWS FROM THE CAMPS
Camp Kearny, California

Down in the southernmost, westernmost training camp in the United States, at Camp Kearny, California, over 12,000 books, made available by the American Library Association War Service Committee and the libraries of southern California, are being used by the men of the service.

During the month of January, an average of 573 books per day were borrowed from the central A. L. A. Camp Library building and its thirteen branches. At the main building, the daily average attendance for January was over 800.

The main library is housed in the regulation 40 by 93 camp library building. Its distinctive feature is a commodious outdoor reading porch ten feet wide and extending the full front of the building. Because of the moderate southern California climate, the porch has become one of the popular gathering places of the camp. Six reading lamps make the porch available for night use. During January, from ten to fifty men used this porch in the evenings. The library building is centrally located in the community center, between the camp postoffice and the division post exchange.

Service began in the new building on Christmas night, twenty working days after the foundation had been placed. Previous

to the inauguration of A. L. A. service, libraries of southern California had forwarded nearly 5000 books to the camp. These had been received by the Y. M. C. A. and were equally distributed among the five buildings in use at that time. Althea H. Warren, librarian of the San Diego Public Library, pioneered in the camp library service work until the arrival on Nov. 22 of Joseph H. Quire, the camp librarian, from the California State Library at Sacramento. A union shelf-list for these books was maintained at the Los Angeles Public Library, to which all forwarding libraries sent cards for copy numbers. This list has since been transferred to the camp.

Books in the camp library and its branches on Jan. 27 had been supplied thru the following channels:

Gift shipments, collected and prepared by southern California libraries	7,317
Gifts directly to camp	2,010
A. L. A. purchased books	1,797
Loan from San Diego County Free Library	1,047
U. S. War Dept. docs.	184
	12,355

Of this number 1289 were awaiting preparation at the camp library. The 11,066 in circulation consisted of 7155 fiction and 3911 non-fiction.

The regular library staff of two was given valuable aid by assistants from the San Diego Public and San Diego County Free Libraries when over a thousand A. L. A. purchased books arrived unprepared soon after the opening of the building. On several occasions, three or four staff members made the round trip of thirty miles to the camp to aid in the elementary processing necessary.

Accidents of locality have given great popularity to certain books in the fiction collection. The national guardsmen of California, Utah, Colorado, Arizona and New Mexico are in the camp. Western stories, such as Zane Grey's "Riders of the purple sage," which are laid in country familiar to the men, are demanded far in excess of the library's supply. In addition to this reason, Harold Bell Wright's "When a man's a man" has a heavy circulation because the hero is a popular corporal of

field artillery. The presence of Major Stewart Edward White and Captain Peter B. Kyne in the camp has brought an increasing interest in the writings of these authors.

Books on gas engines and their use in aeroplanes and automobiles have been the more popular of the books of non-fiction. Shakespeare has been in unusual demand. The books in the "war" classification, headed by Empey's "Over the top" have been widely used.

Thirty-five newspapers are supplied the library gratis by publishers in the states represented by men at the camp.

About 16,000 "Burleson" magazines were received by the library during January. These were delivered at the library by the postoffice trucks and there sorted and sacked daily for delivery to the branches.

Camp Johnston, Florida

There is no doubt about the appreciation with which the library here is being received. The new building was formally opened Jan. 24, and in the first three hours 260 books were issued for "home" use. On another evening there were over 130 readers in the building—considerably more readers than chairs. The possibilities for reference work in this quarter-masters' camp are probably greater than in most, for all the thousands of men in camp are going to some kind of school. The office workers, for example, will do extra reading on bookkeeping and accounting, the storekeepers on scientific management, the truck drivers on gasoline engines, etc. There seems to be infinite variety in the care and transportation of an army.

The library is under the supervision of Lloyd W. Josselyn, librarian of the Jacksonville Public Library, twelve miles distant, and Mr. Josselyn and his staff have been indefatigable in pushing the camp library to its completion. The contract for the building was let Dec. 26, and on Jan. 30 over 500 books were circulated.

At the dedication and opening exercises J. W. Archibald, president of the board of trustees of the Jacksonville Public Library, presided. A short address was made by Giles Wilson, president

of the Jacksonville Rotary Club, representing the citizens of the country who contributed to the million dollar fund. The library was turned over to the camp authorities by Mr. Josselyn, and accepted by Lieut. Col. Fred L. Munson. He was followed by Capt. J. C. Duncan, educational director of the camp, and by Private Paul N. Rice, formerly of the New York Public Library, who spoke in appreciation of the library facilities offered the enlisted men. An original poem was written for the occasion by Nixon Waterman of Boston, and was read by the author, who has a winter home in Orange Park, Fla.

Camp Lee, Virginia

Good progress is being made in Camp Lee, according to the report made by Henry S. Green in his second letter for publication. His first letter was published in the January JOURNAL:

When I wrote you last November that I hoped soon to have a library building under roof and nearing completion, I had little idea what a long, long way to the Tipperary of a finished structure was really before me. But why talk about unpleasant things that are of the past and difficulties which have been successfully met? The south wind has been blowing for two days. The glacial ice-cap which had covered the camp for weeks has yielded to those two days of bright sunshine, our sandy soil has absorbed the rivers of water into which the snow and ice had been transformed, and there is already a hint of spring in the woods about Camp Lee.

And yes, our library building is actually finished. The equipment and books went in as the carpenters' work-benches were crowded out, and the building was formally declared "open" Jan. 26, when Ex-President Taft visited the camp and made an address at the opening, the occasion being graced by the presence of the general commanding the 80th division, his chief of staff and many other officers of high rank. The A. L. A. was represented by Mr. Utley, who came down from Washington.

Previous to this formal opening, however, actual library work had been going on in the building for nearly a month preparing the books for circulation, and during this time we had loaned many books to borrowers, besides supplying the needs of our 20 branches.

It was about the end of the first week of the new year that Miss Ethel Green, librarian of the Department of Archives and History of Charleston, W. Va., obtained from her library a ten days' leave and came to

Camp Lee to help us organize the work. Under her leadership a little group of volunteer workers was recruited in Petersburg, nearly all of them ladies whose husbands are "with the colors," and this force has worked faithfully at the big job of getting nearly 15,000 books ready for circulation and placing them properly on the shelves. Among these volunteer workers, fortunately, we found two trained librarians, one of them the wife of Major Nicholas of our officers' training school "faculty," the lady who before her marriage was Gladys Dixon of the Pittsburgh Public Library, and the other Mrs. Montgomery, who before her marriage was in the library service at Scranton, Pa. We have also had the good fortune to retain the official help of Private C. W. Hull, formerly of the Duquesne Public Library, who has been with us on detail from the 319th Inf. Co. A. In addition to these volunteer workers I had with me for a few weeks Herbert E. Richie of the Denver Public Library, who is now in charge at Camp Bowie, and since his departure his place has been ably filled by J. Miller Karper of the Pennsylvania State Library.

Actual count of our books one day last week showed a total of 12,306 at the central library, with nearly 3000 at the branches. The charge cards in the trays at the main building now number well over 1000, and some of our branches report a circulation of 180 to 200. The count of our books was made previous to the arrival of several large shipments which have come in during the week. Six boxes containing 611 volumes from the New York Dispatch Office of the A. L. A. are now on the tables waiting to be pocketed and carded by our able volunteer force. Eight cases from the Wheeling Public Library are also here, and Miss Roberts, the librarian, writes me that she and her force of helpers have pasted labels, pockets, etc., and have written cards for all the books in this shipment—truly a most commendable example for all libraries who are sending books to camp libraries.

Our Ford runabout, unofficially named the "Nancy Lee," is one of the busy members of the Camp Lee library family. She has had a hard time of it this winter, for our roads about the camp have been well nigh impassable, but the delivery service is an indispensable part of the equipment for a large cantonment like this.

Just a word about the "Burleson mail," the magazines and periodicals which come to camp thru the post offices with a one cent stamp on the cover. Some days we get as many as 20 sacks of this material, each sack weighing well over 100 lbs. We do what we can to get it to the men for whom it is intended, but there are altogether too many copies of some of the popular weeklies for us to handle. The numbers are necessarily

rather old when we get them, and soldiers in camp have no more use for a copy of a paper they saw last week than the same men would have in civil life. I found, for instance, in one barracks that 30 men of the company were regular subscribers to one of the most widely circulated weeklies; as many more of the same company received this magazine directly from the folks at home and quite promptly. Many of these 60 copies were sure to be passed around to three or four readers, so it was the traditional trick of carrying coals to Newcastle to take month-old copies of that particular weekly to that particular company house. The magazines are on sale at the post exchanges, and most of the men who buy and read them in civil life also buy them in camp when they are current numbers on the news stands. As for those worthy persons who suppose that the soldiers are going to read the magazines of the vintage of some years ago, rummaged out of some attic corner, they are proceeding on a most violent hypothesis. The LIBRARY JOURNAL should discourage the sending to camp of any old magazines, and the number of the more popular periodicals that come to Camp Lee by the "Burleson route" might well be reduced by four-fifths from present figures.

We are keeping some classified circulation records, but the work has not been going on long enough to yield very definite results. Next time I may be able to give some interesting figures showing what the men in camp really like to read. It has at least been well demonstrated at Camp Lee that they do like to read, that they have time to read and that it is worth while to put plenty of good reading matter before them. That is what the American people are doing thru the agency of the American Library Association, and it is a pleasure to have even a small part in this most unusual kind of library work.

Camp MacArthur, Texas

From Camp MacArthur, Texas, Joy E. Morgan, the present librarian, wrote on Feb. 9:

Much of our time during January had to be given to the construction of the new building, the contract for which Willard Lewis of Baylor University had just closed before turning the work over to me on Jan. 1. We moved into the building on Jan. 25 and opened it to the men for a reading room on Jan. 30.

We had the entire inside of the building, including the ceiling, lined with beaver board and the joints covered with strips of wood, stained golden oak, giving a neat panel effect. We got this idea from the Y. W. C. A. Hostess House in this camp. Following a suggestion given by Librarian Wright at Kansas City we had a row of stacks installed to connect the corner of the office with the wall

of the living rooms. This arrangement gives us a workroom about 13 feet by 26 feet, which we find indispensable. Our furniture and book stacks were bought locally.

About 2000 books are on our shelves at Main and the collection is being increased as fast as books can be wisely ordered and help secured to prepare them. We have many most interesting and intelligent requests for books. (A West Point professor, now a colonel, has interrupted the writing of these notes to talk over books on psychology with me.) We are recalling the 8000 books from the branch libraries to equip them with cards and pockets. On account of the scarcity of help these had to be issued at first with very little preparation. We prepare a collection of 1000 books equipped with cards and pockets. We make quadruple typewritten lists of these books and exchange them for one of the branch collections and then proceed to take over another branch in like manner. Because the men in our camp are widely scattered traveling libraries will form an important part of our work.

The Waco High School shop under the direction of L. R. Stanfield is making boxes for these collections similar to the boxes used by the state library commissions. We put ten books of non-fiction and forty books of fiction in each collection. When this system is in full operation men can get books without leaving their company streets. We adopted a system of book boxes in lieu of shelves, on the advice of camp officers, most of our collections being kept in tents.

Good help is still our darkest problem. Fortunately for us we moved into our building just as the 32nd Division was leaving. There were a few days to catch up with the work before the new men began to come in. We hear daily many expressions like these: "This is surely home." "This is the nearest home I've been for a long while." "I've seen a lot of collections of books but nothing to beat this." "These magazines (taken to the train) 'll sure stop a lot of crap games on the trip."

Camp Greene, North Carolina

From Camp Greene F. L. D. Goodrich sends us the following report of progress from his library, in a letter dated Feb. 15:

No dedicatory service marked the opening of the A. L. A. Library building in Camp Greene. The librarian moved into his quarters on Jan. 7 and the doors were opened to the public on the day following. About four thousand volumes were on the shelves but there had been no opportunity to separate fiction from non-fiction. The chairs had arrived a week before the opening of the building but the tables are still lost in the freight congestion.

For many days the classed books remained unclassified until one muddy Saturday when

Miss Palmer, librarian of the Charlotte Public Library, and one of her assistants, Miss Ladd, spent the day in the camp library and made a fine start on the classification. Only about a fourth of the non-fiction is marked with the Dewey numbers and the catalog is still limited to the memory of the librarian.

For the most part the volunteer assistants from among the soldiers have been failures but one has proved most efficient and another is developing nicely. A professional chauffeur appeared one day who drove the library car and took good care of it until he was transferred. It has seemed wise to pay a small fee for such services.

The attendance in the library has been fair when the almost impassable mud is considered. For the first half of February the average circulation has been 201 volumes per day.

Camp Wheeler, Georgia

From Camp Wheeler Frederick Goodell, camp librarian, writes:

After a period of tent dwelling on the part of the Camp Librarian with books scattered thru a tent, a garage and the incomplete library building the Camp Library was opened on Feb. 13. It has already become a much appreciated port of call on the Camp Wheeler recreational four corners.

If the first book drawn is any indication of the reading tastes of the officers and men in Camp Wheeler one can readily see that soldiers will not stay put in their proper and orderly classifications any more than will the civilian library patrons back home. This first book circulated was the "Oxford book of English verse" and it was drawn by a lieutenant in the Ordnance Corps. The foolish man should have been reading works on artillery and motor trucks instead of dabbling in the poets.

Every day brings its evidence of the great work the Camp Library can and will do both for the men in the camps and for the furtherance of libraries in general. This is especially true of the Southern camps, where many of the men have never seen a public library and have had no opportunity to test the worth of such an institution. When the war is over these soldiers are not likely to forget the association which made possible these splendid libraries. The Camp Library is doing more for the soldier than merely amusing him. For one thing it is giving hundreds of thousands of men an opportunity they never had before to study and learn. It is taking a leading part in converting an experience which might have meant the loss of the most valuable years in the lives of our young men into a great opportunity for self-advancement. These young soldiers who are using the camp libraries to such good advantage will hold the fate of American institutions in their hands to-morrow.

All the camp librarians seem to be finding a much stronger demand for serious reading than was expected. This has been the experience at Camp Wheeler. Our reference work has been most gratifying for it has been so immediately practical. A mess sergeant, for example, who had been appointed canteen steward, rushed over to the library to secure some books on bookkeeping and accounts, one of the camp cooks wanted some recipes to help him in getting up the "meatless" breakfasts just ordered, a band leader asked for the lives of the great musicians, a chaplain wanted to identify a quotation for his Sunday talk in one of the Y. M. C. A. huts, a Signal Corps officer went off smiling with a long sought for book on telephony, and a blushing country boy led the librarian into a corner and asked if there were any books that would "learn" him how to read so all the other fellows in his tent wouldn't hear his wife's letters. A class in English for Americans was formed on the spot for that chap.

And we should not be surprised at all these varied requests that are pouring into the Camp Libraries. Soldiers ask for all kinds of books because they are all kinds of men. Very few of them are only soldiers. One must remember that an army division embraces not only infantry, artillery and cavalry but the Signal Corps, the Sanitary Train, the Medical Corps, the Dental Corps, a great hospital full of doctors and nurses, the Motor Truck Companies, the Quartermasters Corps with its experts in accounts, supplies and transportation, the Aviation Corps, the Remount Depot with its experts in the care and purchase of the horse, the Ammunition Train, the Ordnance Corps with its machine shops full of mechanics, the Machine-gun Battalion, the Engineers' Corps and added to all these hundreds of bakers, cooks, musicians, electricians, pharmacists and men required to keep themselves at the top of efficiency in every trade and profession imaginable.

As the camp library work is organized the two librarians provided for not only will prove inadequate but eight, ten or a dozen library assistants will be needed to carry on the work. In Camp Wheeler we are planning to provide twenty branches and upward of two hundred deposit stations. With the library open only three days we have already seen the necessity for the formation of special collections in simple English for our three thousand illiterates and one in American history, industry and literature for the newly arrived French officers. A picture collection has been started both to aid the class work in the Y. M. C. A. and K. of C. buildings and to decorate the library sections in the branches. These pictures will all be marked with the A. L. A. Camp Library stamp of ownership and will be changed from time to time to suit

special need and occasions. Such things are especially needed in the National Guard camps where the men live in tents. The Camp Librarian knows from experience how cheerless those four windowless canvas walls become after a time.

We would welcome gifts of usable pictures (both the New York Public Library and the Detroit Public Library have responded very generously to a personal appeal), late textbooks, especially those in grammar school studies, and books of European travel.

We offer for the approval of the readers of the LIBRARY JOURNAL the remark of one of the soldiers who had been detailed to assist with the book preparation: "Aw, this stickin' plasters on picture books is worse than diggin' trenches."

PERSONNEL

Among those who have recently joined the War Service Staff at the Library of Congress headquarters are Caroline F. Webster, of the New York State Library; Laura Smith, of the Cincinnati Public Library; and Burton E. Stevenson, of the Chillicothe Public Library. Mr. Stevenson is in charge of magazine publicity work, and Miss Webster gives special attention to the opportunities for women in the service. An interesting possibility of such service is in the Red Cross and base hospital libraries, whose establishment under A. L. A. auspices is now under consideration. In the English hospitals such libraries have been organized by women volunteers, and it is work for which women librarians would be especially well suited.

W. H. Brett, of the Cleveland Public Library, will spend a month or five weeks, beginning about Feb. 15, at Norfolk and Newport News, developing the library work for the thousands of soldiers and sailors stationed in the vicinity, and arranging for overseas shipments.

Alice S. Tyler, director of the Western Reserve Library School, began service in the dispatch office in Hoboken, with Mr. Dickinson, Feb. 25.

A cable from Dr. Raney Feb. 2, announced his arrival in England, and one received a few days later reported that he was about to start for France.

Recent appointments for camp library work, not hitherto recorded, are the following:

National Guard Camps

Camp Bowie, Forth Worth, Tex.....	Lois W. Henderson, assistant
Camp Cody, Deming, N. Mex.....	Earl N. Manchester, librarian
	Edward Day, assistant
Camp Fremont, Palo Alto, Cal.....	John Richards, librarian
	Sterling Talbot, assistant
Camp Hancock, Augusta, Ga.....	Anna M. Neuhauser, assistant
Camp Logan, Houston, Tex.....	Louis Horne, assistant
Camp Wadsworth, Spartanburg, S. C.....	Wm. F. Yust, librarian

National Army Camps

Camp Custer, Battle Creek, Mich.....	Max Meisel, assistant
Camp Devens, Ayer, Mass.....	Raymond L. Crowell, assistant
Camp Gordon, Atlanta, Ga.	Adam Strohm, librarian
Camp Jackson, Columbia, S. C.....	John G. Moulton, librarian
Camp Meade, Admiral, Md.	Edward M. Cameron, assistant
Camp Taylor, Louisville, Ky.....	George L. Lewis, assistant

Other Camps

Camp Johnston, Jacksonville, Fla.....	Walter C. Pierce, assistant
Camp Merritt, Tenafly, N. J.....	Edward F. Stevens, librarian

Naval Station

Camp Perry, Great Lakes, Ill.....	Geo. L. Burtis, assistant
-----------------------------------	---------------------------

Service Overseas

Paris, France	M. L. Rancy, of Johns Hopkins University Library
---------------------	--

OTHER FORMS OF SERVICE

Space was lacking last month to print all the replies sent in response to our request for information on library war service aside from the camp libraries. We print additional notes this month.

Grand Rapids Public Library

The war library work of the Grand Rapids Public Library has been devoted chiefly to the collection of reading matter for the men in the army and navy, the exhibitions of posters, books, pamphlets, etc., on food conservation and food production, many exhibitions of pictures and posters illustrating all kinds of war activities, both civil and military, the featuring of books on all phases of the war, for the purpose of giving people a better understanding of it, the systematic collection and preservation of all local material used in connection with the enlistment and drafting of men, the various "drives" for funds, such as the Red Cross, Liberty loans, etc., and lectures on the causes and meaning of the war, on the countries at war, and on how the war is being fought, all of which are designed to give persons a better understanding of the significance of the war, and how it is being conducted.

The library also took part in the campaign for the Library War Fund. About one tenth of the total collected in the city for this fund (\$4000) was given by members of the Library staff or directly to them, mostly at the Library.

Nearly 27,000 pieces of printed material have been collected from people of this city, and some 6000 books as well as many magazines, have already been sent to the training camps. To how great an extent the library's work in food conservation and food production has been effective it is difficult to say. However, books on this subject have been more widely used than ever before.

The most interesting work the library has done is in connection with its lectures. In November and December a series of five lectures were given by speakers connected with the educational work of the National Security League, on the causes and meaning of the war. All of these except one drew audiences of standing room only. A regular feature of all such lectures is the asking of questions on the part of the audience at the close of the speaker's regular address and his answering of them. Other popular lectures on phases of the war have also been given, and many more are planned

THE LIBRARY'S SHARE IN THE FIRST FOOD EXHIBIT IN THIS COUNTRY, HELD IN CHICAGO, JANUARY 5 TO 13

for the balance of this season. Most of these draw S. R. O. audiences and they stimulate reading on these subjects.

At the present time members of the staff are planning to use their vacations, or at least part of them, next summer for food conservation to help harvest the many fruit crops in western Michigan, particularly cherries, grapes, bush fruits, etc. If there is a good crop of these fruits there is always a great demand for labor, and the library has taken the matter up with the county agents for placing library people for this purpose. Several members of the library staff are food producers on their own account, either as farmers or gardeners or both, on plots of ground varying in size from a piece of a backyard to five acres, with one of 35 acres.

Carnegie Library of Atlanta

The Carnegie Library of Atlanta is co-operating with the Food Administration in trying to make available to the public all printed matter on the subject of food conservation both as to the necessity and the means. In doing this, bulletin displays are made, using the posters of the Food Administration, and a special collection of books and pamphlets have been prepared for circulation.

The library has a special bulletin board that it uses for displaying government material and on this is posted material relating to the Liberty Bonds, Thrift Saving Stamps, appeals for government workers, etc. In connection with the Liberty Bond campaign the library distributed circulars thru the books circulated. The Civil Service Commission has placed in the main reading room of the library two full sets of announcements relating to civil service positions bound in loose leaf binders. New material is sent to the library weekly so that the books can be kept up-to-date.

Kansas City (Mo.) Public Library

The following memorandum, sent by the librarian, Purd B. Wright, gives an idea of the variety and scope of the war service performed by the library staff in the Main Library and branches:

First Liberty Bond campaign, bonds sold, \$33,000. Second Liberty Bond campaign,

bonds sold, \$11,000. Red Cross campaign, booths and subscriptions in all libraries, reported thru precinct managers. Library collection, 1915, Belgian children's relief fund. French children's fund, booth two days before Christmas, 1050 cards sold. Surgical dressings, staff and bindery force cut cotton for 10,000 of 65,000 pads allotted to the Red Cross of this city. Curtains made for the library building at Camp Funston. Food conservation, bulletins, reading lists, etc. War lists, army service, citizenship, etc.

In addition, the staff handled subscription lists for War Service fund, and is caring for book service, this being a distributing station for five states. On receipt of supplies, book labeling, pocketing and book card writing will be done here for all books handled.

With Y. M. C. A. aid at Camp Funston, three huts were supplied with books in July, 1917. These were organized and made ready on arrival of the first draft by H. O. Severance, librarian of Missouri University. The books were the gift of Kansas City people.

Little Rock Public Library

The list of war activities of the Little Rock Public Library included the publication of lists and circulation of books on foods, cookery, canning, etc.; display of bulletins and books on gardening and agriculture; special bulletin boards and exhibits continually devoted to food conservation and distribution of bulletins of U. S. Food Administration; circulation of military books and war maps; new books added on Red Cross work and over 500 books on war subjects; enlargement of collection of pictures and clippings; loan of books to Fort Logan H. Roots and 7 Y. M. C. A. huts before the establishment of the Camp Library; loan of members of staff to assist in preparation of camp books for circulation; 700 Kipling scrapbooks issued to patrons for filling (a large number of these were sent as a Christmas gift to men at the base hospital at Camp Pike); and enlarged subscription to military periodicals. In co-operation with the D. A. R. the library has engaged Major Ian Hay Beith for his lecture "Carrying on" Jan. 30.

In co-operation with the College Club 1300 volumes and thousands of magazines have been collected and sent to Camp Pike. The library was headquarters for the Arkansas War Library Fund Campaign in which it raised \$8211.

Pasadena Public Library

Miss N. M. Russ, the librarian in the Pasadena Library writes:

"We are in close touch with all war activities. Our Library War Fund was oversubscribed. We have recently sent about one hundred technical books from our shelves for immediate use at Camp Kearny in study classes; this is in addition to the books donated by the public which we are continually sending. We are also handling the books received by the Red Cross, pocketing, listing and shipping for them. We are working with the Woman's Committee of the National and State Council of Defense in listing and segregating books on Food Conservation, and have created a deposit station at the Red Cross headquarters for books required in their Home Service Department."

Chicago Public Library

At its first meeting following the Declaration of War the Board of Directors by resolution made a formal tender of the building, resources and equipment of the Library to the United States government "for any purpose or use deemed necessary and proper in the present crisis . . . conformable to and not unduly interfering with its own public activities, to contribute toward the general organization of the national forces." It was further ordered that \$2500 be set aside from the book fund for the purchase of drill manuals and other books on military organization and instruction in such quantities as might be found necessary, and that the War Department be requested to recommend books which should be made available to the citizens to fit them for military or other national duty in this emergency.

Red Cross registration desks were installed in the Main Library and all branches in charge of members of the library staff for the week of May 7 to 12.

Contributions were received at the Main

Library and all branches for the million dollar Library War Fund.

Scrap books were offered to the public to be filled with suitable matter for sick and wounded soldiers in hospitals at home or abroad. All the scrap books have now been given out and have been returned. This service has been discontinued.

At the request of the American Library Association War Service Committee the acting librarian has assumed general supervision of the erection of library buildings and the organization of thoroly equipped libraries at Camp Grant and Great Lakes.

By order of the board the services of John F. Phelan, chief of branches, have been placed at the disposal of the Library War Service Committee for the installation and general management of the Great Lakes Library.

Special efforts have been made by means of bulletins, posters and exhibits to call attention to the numerous publications of the U. S. government relating to matters of urgent public interest. The fullest co-operation has been arranged with the Food Administration, Council of National Defense and other similar agencies. Literature issued by them has been promptly made available and, where possible, has been secured in sufficient quantities for free distribution. Thirty thousand copies of the valuable bulletins of the National Emergency Food Garden commission have been so distributed. Jessie Woodford, head of the document section, has been assigned to attend and address meetings of clubs and other bodies interested in food conservation and similar topics, and is a member of the Publicity Committee of the Illinois Food Administration.

Space has been granted in the Main Library and various branches for the registration of women, for the work of the draft exemption boards, and for the display of official posters or proclamations.

The Collegiate Periodical League was invited to make the Public Library the headquarters for its activities in the collection and distribution of current periodicals for soldiers and sailors in Camp Grant and Great Lakes.

A Red Cross Chapter with a membership

of 45 was organized among the women of the staff, with weekly sessions, after service hours, in the Library building.

Opportunity was given to official solicitors to address assemblies of the staff in behalf of both the first and second Liberty Loan.

Three hundred thousand printed slips, issued by the Woman's Liberty Loan Committee, appealing for subscriptions to the second loan, were distributed in library books to borrowers during the month of October.

Space has been granted in the north corridor of the Library building for a rest room and canteen for soldiers and sailors on furlough in the city, under the management of a committee of the Chicago Woman's Club.

A service flag with fifteen stars was purchased by the Board and hangs in the rotunda of the Circulation Department.

Brooklyn Public Library

In the line of patriotic duty members of the staff took part in the \$1,000,000 campaign to provide money for books for soldiers and sailors. This endeavor was not only successful as a war measure, but by means of it the library was brought into closer touch with its neighborhood, and with many local organizations and individual workers in the community. Brooklyn's contribution was \$36,000. A Red Cross auxiliary was organized and has made sweaters, helmets, socks and many other useful articles for the boys at the front. Sixty-three assistants subscribed to the first issue of Liberty Bonds—not so many to the second.

Most of the auditoriums were used by the State Census Board in the spring, many of the library staff volunteering to assist in this work in their free time; and later the Exemption and Legal Advisory Boards had their headquarters in library buildings. The Red Cross also placed booths in some of the branches during its recent drive for members.

Posters of city, state and national character were displayed in the branches, and several excellent booklists on shipbuilding, thrift, and other topics made timely by the war, were prepared and distributed.

Louisville Public Library

The library staff has been called on for many forms of war work. The librarian, George T. Settle, in addition to his regular duties, is camp librarian at Camp Zachary Taylor. The 12,000 volumes in the camp library were cataloged by the staff.

The head of the catalog department, Miss May Wood Wigginton, organized and supervised the making of a card list of men at Camp Zachary Taylor belonging to each denomination and religious sect, of men belonging to each lodge, union or other association; also a list of alumnae of various universities. This was done for the War Recreation Board. Members of the Library Training Class have volunteered to help in arranging an alphabetical list of all men at Camp Zachary Taylor for the War Recreation Board.

Carolyn E. Adelberg, librarian's secretary, is library publicity director for Kentucky under the United States Food Administration. She has secured the approval of Superintendent Reid and the aid of Miss Lena Hillerich, supervisor of drawing, and 500 posters will be made in the Louisville public schools under Miss Hillerich's direction. Two hundred of these posters will be exhibited at the main library in April, fifty at each of the colored branch libraries, and 200 will be a state traveling exhibit.

Thomas F. Blue, in charge of the colored branches of the Public Library, has been given leave of absence for army camp Y. M. C. A. work, and has been assigned to Camp Sherman as religious secretary. Mr. Blue did similar work during the Spanish-American War.

A. L. A. AMBULANCE FUND

The chairman in charge of this fund, realizing that the concentration of library support for the national camp library movement made the full execution of her plan impossible, has decided to close the matter. She has therefore sent to the American Red Cross at Washington, D. C., \$750 to provide a kitchen trailer as the gift of the American Library Association, with a request that a statement to that effect and the receipt for the money be sent to the Secretary of the American Library Association.

THE LIBRARY'S PART IN THE FIRST FOOD EXHIBIT

THE general public may entertain for some time yet misconceptions of the nature of the work done in and by libraries, but it can not accuse libraries of failure to grasp opportunities. For since libraries have opened their doors wide, more opportunities for service have entered at times than can be properly taken care of; the most important one brought by the war is that of convincing the public that the outcome of this conflict depends very much upon the extent of the co-operation given the government at home, for in reality the war has created among us a "triple alliance": a government dedicated to the principle of making the "world safe for democracy"; an armed force to ensure that end; and a home-line to back up the other two.

That libraries are equipped, capable, and willing to assist the three partners in this war to fulfill their respective duties to each other was demonstrated at the Patriotic Food Show held in the Coliseum at Chicago, on Jan. 5 to 13 inclusive, under the auspices of the Illinois State Council of Defense and the U. S. Food Administration.

The purpose of the exhibit was strictly educational. Food firms exhibited their products but did not solicit business; the Agriculture Departments of the State of Illinois and of the United States urged food economy thru conservation and substitution; four domestic science departments taught it by actual demonstration; and the Library Section of the Illinois Division of U. S. Food Administration showed how libraries thruout the country had interpreted Mr. Hoover's appeal to the American people as a tocsin to mobilize their resources for immediate and concerted war on waste and extravagance.

The Library Section got its quota of customers in direct competition with other exhibitors by creating an atmosphere of human interest. The passerby's attention was first gripped by some striking sign, such as "Read to Know; Know to Act; Act to Win"; by a colored poster suggesting economy and made by some patriotic

school-girl or altruistic librarian; by an epigrammatic slogan or tabloid sermon, such as, "They also serve, who save and substitute." Besides these attention getters there were speakers on each day's program who reminded the visitors that their public library is always at their service and advised them to visit the Library Section and there learn what kind of information was obtainable for the asking. Miss Guerrier of the Food Administration at Washington, Mr. Roden and Miss Woodford of the Chicago Public Library, and the library publicity directors for the states of Illinois, Kentucky, Michigan and Ohio, also explained that libraries were ready to furnish assistance in food conservation and production. Part of the program for Friday evening was reserved for talks by librarians. Miss Ahern presided over this special meeting.

The interest of the visitor was aroused and held by small exhibits in glass cases, pictures, charts and thru the efforts of library workers who had volunteered their services as attendants.

The "bread and butter" advertised consisted of a selection of two hundred and fifty books on home economics, family budgets, marketing, food values and nutrition; and a collection of pamphlets on similar subjects issued by and obtainable free or at a nominal price from the various state and federal governments.

To prove that a library can be of service, the first thing done at the booth was to get the names of exhibitors and samples of their literature, and then to index both exhibitors and literature in anticipation of questions from the public. The public did ask for such information, and when the managers of the show also found it out they requested the Library Section to act as the official Information Bureau for the entire exhibit. After that the booth was, of course, busier than ever. And business also brought business.

The exhibit was prepared and managed by the Library Publicity Committee of Illinois with the help of a committee from the Chicago Library Club. Its success was made possible by the splendid co-operation

of school children and libraries in Illinois and Michigan. Battle Creek, Chicago, Decatur, Geneva, Jacksonville, Moline, and Springfield lent attractive posters for displays, which enabled the committee to make a complete change whenever desired. In spite of the short time for preparation the section was highly complimented on its effective work. It seemed to have convinced the housewife, the club-woman, the teacher, and even the business man that a library after all has "ammunition" that will help to win the war. O. E. NORMAN.

ARMS AND THE MAN

[Written by Nixon Waterman for the dedicatory exercises of the A. L. A. Library at Camp Johnston, Florida, and read by the author at the dedication.]

Men, with War's challenge before you,

You who must win in the fight,
You who shall bring the glad morning
After War's terrible night;
Here find the way and the wisdom
To match and to master the Hun,
Translating the book and its message
Into the speech of the gun.

Here find the counsel to stay you
Down thru the riot and ruck,
Here find the zeal that shall lift you
Out of the mire and muck.
Here are the words of your seniors,
Your masterly skill to increase,
And type's many tongues to direct you
On toward the daybreak of peace.

Make the will firm and exultant,
Make the way certain and sure
For meeting the blindness and terror
That only grim terror can cure.
Whether we fight in the trenches
Or help to pass on to the ones
Who serve there, the shot for the foemen,
We are all of us manning the guns.

Make the arm mighty and agile,
Make the brain piercing and keen;
Make—may the good God forefend us—
Make us a fighting machine!
A machine that will crush and will conquer
The wolf-men who seek to enthrone
The blood-lusting forces of evil,
Who would crucify Truth and God's own.

Let each one vow, "I will be faithful!"
Let each pray, "Oh, may I be strong
With the strength of a Heaven-born justice,
To battle and conquer the wrong.
And if it so be, in His mercy,
Let me come to my people again
With the thought that I gave all God gave me
For Truth's and for His sake. Amen!"

RECENT MOTION PICTURES DRAWN FROM STANDARD OR CURRENT LITERATURE

BELOW is given a second list of recent photo plays based on well-known books, supplied, as was the list last month, by the National Board of Review of Motion Pictures:

Heart of a Lion, 5 reels, Fox. Star—William Farnum.

Based on Ralph Connor's novel, "The Doctor."

Huck and Tom, 5 reels, Paramount. Star—Jack Pickford.

Further adventures of Tom Sawyer and Huckleberry Finn, the heroes of Mark Twain's "Tom Sawyer," including the killing of the doctor in the cemetery, the trial, the picnic in the cave and the finding of the treasure.

Keith of the Border, 5 reels, Triangle. Star—Roy Stewart.

The adventures of a Texas ranger made from Randall Parrish's book of the same name.

Little Red Riding Hood, 4 reels, Wholesome. Star—Mary Burton.

An up-to-date version of the well-known fairy tale. Practically the entire cast of 350 persons is composed of children. The production is considered to be particularly well done.

Morok, 7 reels, Hesperia Film Co.

The play, which was made in France, is adapted from a part of Eugene Sue's book, "The wandering Jew." Its chief merit lies in the fact that in selected locations and settings it is successful in bringing out the atmosphere of the original work.

My Own United States, 8 reels, Frohman Amusement Co. Star—Arnold Daly.

Covers the period in American history between the Hamilton-Burr political feud and the Civil War. It includes a picturization of the chief character of Edward Everett Hale's "Man without a country."

A Petticoat Pilot, 5 reels, Paramount. Star—Vivian Martin.

A picturization of the simple little Cape Cod tale contained in Joseph Lincoln's book, "Mary 'Gusta."

Stories by O. Henry: Compliments of the season, The moment of victory, Schools and schools, By injunction, A Madison Square Arabian knight, The trimmed lamp, 2 reels each, General Film Co.

Tarzan of the Apes, 8 reels, National Film Corporation. Star—Elmo Lincoln.

From the book of the same name by Edgar Rice Burroughs. The jungle scenes were photographed in South America.

The Grain of Dust, 6 reels, Crest Pictures. Star—Lillian Walker.

Based on the story of the late David Graham Phillips, which originally ran in the *Saturday Evening Post*.

The Hopper, 5 reels, Triangle. Star—Olive Thomas.

A particularly satisfactory comedy drama based on Meredith Nicholson's story of the same name.

The Weaver of Dreams, 5 reels, Metro. Star—Viola Dana.

A fine picturization of Myrtle Reed's novel of the same name.

The World for Sale, 6 reels, Paramount. Star—Ann Little.
The second of the representations of Sir Gilbert Parker's stories.

Treasure Island, 6 reels, Fox. Stars—Francis Carpenter and Virginia Lee Corbin.
An adaptation of the book by Robert Louis Stevenson. The cast is composed exclusively of juveniles.

Woman and Wife, 6 reels, Select Pictures Corporation. Star—Alice Brady.
Based on Charlotte Brontë's novel, "Jane Eyre." Great attention has been given to the reproduction of the atmosphere of the book.

FOREIGN MAGAZINES IN THE BODLEIAN LIBRARY

"IN the earlier stages of the war the utility of the Bodleian was hampered by the difficulty of continuing the foreign periodicals issued in enemy countries," say a note in the *Bodleian Quarterly Record* for October, 1917. "Even prepayment, when permissible, was not satisfactory, for some periodicals were greatly diminished in size and importance, and, according to a statement quoted in the *Publisher's Circular* of January 6, 1917, it appears that as early as the spring of 1916 'about 3000 German journals, reviews, etc.,' had 'stopped publication owing to the war.' Now, however, thru the instrumentality of H. M. Stationery Office and under a license from the Board of Trade, the library is able to acquire the current parts of some hundreds of periodicals, as well as any continuations and substantive works which it wishes to order. Readers will greatly appreciate this concession on the part of the Government to help the larger libraries to carry on their legitimate work in difficult times."

THE POWER OF THE PEN

THE influence of the library is felt in very many different ways. The following note received at a city branch recently shows one possible way of using the library's good influence:

Dear Lady

Would you kindly give Bearer a Book what is a sad story about a man thatt drinks and abuses his wife or any thing like that and oblige Mrs. —.

Thanking you in advance

As I cant come my self not well

LIBRARY LEGISLATION IN 1917: CORRECTIONS

OUR attention has been called to certain inaccuracies in the article printed under this caption last month. In describing the Indiana county law. (p. 76) the article reads that "the county commissioners upon petition . . . may levy a tax," etc. The provisions of the law are that they *may* levy a tax without a petition, but with a petition "shall" levy a tax, and this compulsory tax upon petition has been a particularly helpful feature of the Indiana law. In the next paragraph, giving the organization, powers, and duties of the board, the very important fact should be noted that the library board, and not the county commissioners or county council, determines the rate of the tax.

Under Tennessee (p. 82) the appropriation figures might be stated with a little more detail, as follows: The Legislature of 1917 gave to the State Library a biennial appropriation of \$25,900. These figures include salaries plus a small per cent of the General Education Fund, which per cent averages about \$3500 biennially and is used for the purchase and maintenance of traveling libraries. The Law Library is a department of the State Library, and the special appropriation for this department is spent under the direction of the Supreme Court and the State Attorney General. \$500 is expended by the State Librarian for the purchase of books for the State Prison Library. The Prison Library is under the direct supervision of the State Library. \$10,000 was appropriated for the purchase of steel shelving for the State Library. This appropriation and all other appropriations except those previously mentioned are expended under the direction of the State Library Commission. The Chief Justice, Governor and State Attorney General compose the Commission.

The Department of History and Archives is a separate department of state, and is in no way connected with the State Library.

EMPLOY your time in improving yourselves by other men's documents: so shall you come easily by what others have labored hard for.—SOCRATES.

ATLANTIC CITY MEETING

THE twenty-second bi-state meeting of the New Jersey and Pennsylvania associations was held at Atlantic City at the usual pleasant headquarters at the Hotel Chelsea Feb. 15-16, a fortnight ahead of the usual time, to obtain the benefit of the better weather, for which Miss Graffen had made special arrangements with the Clerk of the Weather. About 175 members of the two library associations, with many visitors from other states, especially New York, and an unusual proportion of the membership of the American Library Institute, were present.

The first meeting, that of Friday afternoon, Feb. 15, was that of the New Jersey State Association, over which Mrs. James A. Webb, Jr., president of that association for the current year, presided with admirable tact and full parliamentary knowledge. This meeting was devoted entirely to war service, chiefly to that within the state, the first speaker being Joseph Alling, who has generously given his personal services and business experience to the men of Camp Dix at Wrightstown, N. J., as general secretary of the Y. M. C. A. organization there. He gave an excellent conspectus of the systematized methods of the Y. M. C. A. as illustrated at this cantonment, but pointed out also the flexibility of the Y. M. C. A. arrangements, as illustrated during the twenty days of enforced quarantine at this camp. At twenty-four hours' notice, the arrangements for entertainments and services within the Y. M. C. A. huts were transformed into a plan for visiting the several barracks and other buildings, where by the help of portable cabinet organs and small moving-picture outfits, over 2200 separate entertainments and services were given during the time when the men were not allowed to congregate in any of the general buildings. Caroline Dow, secretary of the Secretarial School of the Y. W. C. A. of New York, gave a more generalized statement of the activities of that body, not only with respect to the hostess houses, of which each camp now has one or more, but with reference also to the work among women near the camps and in the industrial centers, where women were suddenly gathered for gov-

ernmental work. In one instance, the local Y. W. C. A. had word from the government authorities that six or seven hundred women were to reach the locality the next day, and the Y. W. C. A. was expected to provide for them, which it succeeded in doing by arranging sleeping accommodations in automobiles within garages when house accommodations were exhausted. Howard L. Hughes, Trenton's public librarian, who has done excellent work at Camp Dix, gave detailed descriptions of the work there, where about 6000 books were doing service, about as many as could so far be handled, altho ultimately 25,000 books may prove desirable. Gifts as well as purchases had been, as a rule, of excellent quality, tho in some few instances, as a Worcester, Mass., poll tax list and a local town report, the selective principle had not worked. Asa Don Dickinson, assigned to the Transport Dispatch Office at Hoboken, described the work there, whence 15,000 books had already been dispatched on transports, which were offering good facilities for getting books to France.

Friday evening was given to the first joint session of the New Jersey Library Association and the Pennsylvania Library Club, Dr. Morris Jastrow, Jr., vice-president of the Pennsylvania association in the chair. Mayor Bacharach, unable to be present, sent his regrets thru another Atlantic City official, who properly welcomed the delegates and presented the usual key symbolizing the freedom of the city. Wilfrid M. Voynich, the London expert on early printed books, a Polish patriot of Lithuanian birth who has had a remarkable political career, addressed the meeting on "How to study and how to hunt 15th century books," to the edification of the "small librarian" who wished rather to know how to find the wherewithal therefor. A. Edward Newton followed with a paper on "A macaroni parson," the remarkable William Dodd, who cut such a swath in English society a century or so ago until he was hanged for forgery. This finished the meeting.

Saturday morning, Feb. 16, at eleven o'clock, there was a second joint session of the two associations, presided over by Mrs. Webb, at the start of which Mr. New-

ton completed the history of Rev. Mr. Dodd by reading one of his letters. The place of Rev. Allan MacRossie was taken by Capt. Arthur Rudd, who appeared in Russian uniform, with side arms and spurs, and gave (after the ladies by his request had ceased knitting) an interesting and thrilling account of his experiences in Russia while assigned by the State Department for service there in relation with the care by the American Embassy of prisoners of war. He described especially what he had seen at Nizhni-Novgorod and in Siberia, giving the Russian people credit for good nature and hospitality even exceeding that in America. His immediate appeal was for the work of the Red Cross, in America, and he made very clear how large a proportion of the suffering could be obviated by the preventative measures of that wonderfully foresighted organization.

Following Capt. Rudd, Edith Guerrier, the Massachusetts director of library publicity for food conservation, who had general charge during the summer of organizing the system of library publicity thruout the country for the Food Administration, spoke on the various ways in which libraries can help in this work of food conservation. It has been the policy of the Food Administration to avoid, wherever possible, creating new agencies to carry on its work, and in the library world it has found enthusiastic and efficient co-operation. The Food Administration is supplying to libraries leaflets for distribution, and posters, bulletins and publicity stories for use within the library or in the library publications.

It was expected that Mr. Dwight Morrow, the state director for New Jersey for war savings and thrift stamps, would speak on what the libraries can do to assist in the war saving and thrift stamp campaign, but at the last moment he found it impossible to attend and his place was taken by Mr. LaMonte of Bound Brook, who spoke briefly on the same subject.

At the close of this joint session a short business meeting of the New Jersey Library Association was held in the same room for the election of officers and the following were chosen to carry on the work of the club for the coming year: Presi-

dent, Edna B. Pratt, Passaic; first vice-president, Julia Schneider, South Orange; second vice-president, Charles M. Lum, president of the board of trustees of the Chatham Public Library; secretary, Irene Hackett, Englewood; treasurer, Mary P. Parsons, Morristown. The question was raised at this meeting by Mr. George of Elizabeth, as to the desirability of reviving the custom of holding an independent meeting in October, and the matter was referred to the executive committee.

The third general session was held Saturday evening with Dr. Frank P. Hill of Brooklyn presiding. Before taking up the regular program, Dr. Hill introduced Mlle. Marguerite Clément who is representing the Société d'Exportation des Editions Françaises in this country. Mlle Clément spoke briefly of her purpose in coming to America and offered to give any help possible in the selection of French books thru the preparation of lists or by discussion of specific titles. With the increasing interest in the study of the French language and literature in the schools in this country, the opportunity of securing this assistance will be welcomed by many librarians who must meet this increased interest with a better stock of French books.

The work of "The A. L. A. in war time" was described by Thomas L. Montgomery, president of the A. L. A. and state librarian in Pennsylvania. Mr. Montgomery summed up the history of the library war service movement from its inception at Louisville last June to the present time when 37 camp libraries are in operation with trained librarians in charge and a system of book supply for the smaller posts and for the navy and forces overseas is being rapidly developed.

Dr. John Duncan Spaeth of the Department of English at Princeton University was the next speaker. He took for his subject the message of Whitman, as being one of special importance to us to-day. Dr. Spaeth maintains that we have had no great poets of liberty in America, but the individual liberty and the social solidarity which shines thru Whitman's poetry and prose alike make him a special source of inspiration in the present crisis. Dr. Spaeth

is going at once to Camp Wheeler, Georgia, where he will be educational secretary for the camp.

No Atlantic City meeting would be complete without an announcement from Mr. Faxon of the travel plans for the A. L. A. summer conference, but these were made very brief this year. The A. L. A. will meet in Saratoga Springs, July 1-6, but in the present unsettled condition of railroad transportation it has been found impossible to arrange for special trains or indeed for any special travel parties, and there will be no pre-conference or post-conference trip.

The usual delightful tea was held in the Atlantic City Public Library on Saturday afternoon from 4 to 6 when Miss Abbott and Mrs. Endicott and members of the library staff welcomed the visiting librarians to their very homelike and attractive building.

AMERICAN LIBRARY INSTITUTE

The American Library Institute held two sessions in connection with the bi-state meetings at Atlantic City, one on Saturday morning, preceding the general session, and one occupying Saturday afternoon. Altho it was planned that these meetings were to be open to all, announcement to that effect was not sufficiently general and effective to bring together many who afterward expressed regret that they had not known of the general invitation. The sessions were, nevertheless, attended by representative librarians from many states, members of the Institute, and by a few others in attendance at the bi-state meetings.

President Richardson, whose presidential address on Saturday afternoon is printed in this issue, had planned a careful program for the discussion of details, especially in connection with war service, relating distinctively to "libraries of learning," and had provided preprints of several of the papers and brief contributions to their subject from others.

The morning was devoted to the discussion of the higher training of library assistants, especially those for university and reference libraries, thru post-graduate courses in connection with library schools or universities. Amy Reed, librarian of

Vassar College, presented a compact and effective study of this field in the paper which she read on "A graduate school of librarianship." Frederick C. Hicks, Columbia's law librarian and executive secretary of the Eastern College Librarians' organization, presented an admirable summary of suggestions for post-graduate courses in universities and other means toward the end in question. The proposal was brought out that such post-graduate education need not necessarily be confined to one university, but that the graduate student might pass from one institution to another, obtaining practice in the university library, tho it was also pointed out that the best location for a graduate school would be in one of the universities in the great cities, where public library facilities also would give opportunities for practice.

The afternoon session was devoted chiefly to questions of war service, as detailed and arranged in a careful series of program headings. These subjects brought out excellent specific suggestions and particularly centered on the suggestion that this country should follow the example of England, France and Germany in developing, before it was too late, a war library and historical museum. Dr. Wilson, librarian of Clark University, led this discussion, describing the collection at Clark University, initiated thru president G. Stanley Hall's interest in war psychology, which collection is proving to be the most important in this country. A resolution was unanimously passed urging our Government to give early attention to this matter. Mr. Dana presented his plan for the arranging of pamphlets, as illustrated in his treatment of those on the war, by means of his scheme of color bands, which will be described in detail in a forthcoming monograph by Mr. Dana to be issued from the Elm Tree Press.

AN extreme case of anti-Germanism was noted recently in the Cleveland Public Library. A woman who asked for a book on the Reformation, refused to take the one handed to her, saying, "It has too much in it about the Germans."

NATIONAL SCHOOL FOR LIBRARIANS AND ARCHIVISTS IN MEXICO CITY

THE entry of this school upon its second year on July 2, 1917 is recorded in the *Boletín de la Biblioteca Nacional de México* for August-October, 1917. Up to the time the report was made, 103 students had been enrolled. As a result of the first year's experience, radical changes in method were introduced, the most noteworthy being the extension of the course to cover two years instead of one. The classes in paleography and Latin were amplified, and practice classes in cataloging and bibliography were added.

The curriculum now stands as follows: *First year*: Bibliography, library economy, cataloging, first-year Latin, French; *Second year*: Conferences in bibliography, practice classes in cataloging and bibliography, paleography, second-year Latin, English.

There is a teaching staff of eight, of whom the only feminine member is the teacher of French. The director of the school is Prof. Agustín Loeray Chávez.

FRENCH ARMY CHAPLAINS VISIT UNITED STATES

CHAPLAIN Alfred Ernest Victor Monod and Chaplain Georges Lauga, both military chaplains with the rank of captain in the French Army, are now in this country as official delegates from the Federation of French Protestant Churches to the Federal Council of the Churches of Christ in America. They will make a three-months' tour of the country from coast to coast staying two or three days in each city, meeting the various social, civic, and religious bodies. Both men have seen active service and Chaplain Lauga has been awarded the *croix de guerre*.

American Library Association

PUBLISHING BOARD

W. N. C. Carlton, who was recently elected a member of the A. L. A. Publishing Board, has declined to serve, pleading inability to devote the time to the work which his conscientious nature demands as *sine qua non* of service.

CONFERENCE PLANS

The fortieth conference of the American Library Association will be held at Saratoga Springs, New York, from Monday to Saturday, July 1-6, 1918. Headquarters will be at the Grand Union Hotel (1200 rooms, rates \$5, \$6, and \$7 per day, American plan). Numerous other smaller and less expensive hotels will be available; names and rates in later announcements. Full particulars regarding rates and directions for making reservations will be issued about May 1 in the library periodicals and the *Bulletin* of the A. L. A.

Travel arrangements are being made by the travel committee and the information gathered will be shortly published, altho owing to the abnormal traffic conditions it is difficult for the committee to make definite statements this far in advance. Special trains will not be attempted, and it is possible that the usual summer reduced rates to Saratoga may not be offered. There will be no post-conference trip.

The president is at work on the program. The principal theme very naturally will be the War and what libraries are doing and can do to help win it. Five general sessions will be held, the first Monday evening, July 1. The affiliated societies, sections and round tables will hold their accustomed meetings. Their chief topic also will be the War. The general sessions will be held in the Convention auditorium, a few steps from the headquarters hotel and the group meetings in suitable rooms at the Grand Union.

Saturday, July 6, will be observed as "New York State Library Day" and we shall be the guests of the New York State Library at Albany, stopping off there for the day on our way home. A morning program commemorating the one hundredth anniversary of the founding of the library, a luncheon, tendered by the library, and tours of the Education Building in the afternoon will be features of the day, concluding in ample time for evening trains and the New York boat.

GEORGE B. UTLEY, *Secretary*.

Library Organizations

MASSACHUSETTS LIBRARY CLUB

The sessions of the winter meeting of the Massachusetts Library Club were held in Goddard Chapel, at Tufts College, Medford, on Thursday, Jan. 24, 1918. The club was cordially welcomed by the president of the college, Dr. Hermon Carey Bumpus.

Edith Guerrier, chairman of the library section of the Public Information Division,

United States Food Administration, spoke on the subject "The libraries' opportunity to help win the war."

Dr. Herbert Putnam, Librarian of Congress, spoke briefly on "National war library work," and Carl H. Milam spoke specifically of the progress of this work, summing up the information as reported in the JOURNAL from month to month.

In opening the afternoon session President Loring urged every member to join an organization which she described as a club for the preservation of the purity of the English language. There are no dues and Miss Loring thought that a member would avoid instinctively the use of such words as "suicided," and the improper use of "loan" and "donate."

In speaking on the topic "Camp Devens Library," Mr. John A. Lowe, Librarian, gave an interesting description of the location of the library, the place it occupied in the camp life, and an outline of the library work. The working day begins at 6.30 in the morning and continues until 10.30 in the evening. Every effort is made to make the men feel welcome. Smoking is allowed in the building. The men may take for a two weeks' period as many books as they can reasonably use. The date when the book is due is stamped on the dating slip of each volume. There is no registration and no borrower's cards are in use. The library makes use of a reserve system, which is much appreciated. The librarian has found a good spirit of co-operation and friendliness among the men and there has been no attempt made to separate the officers and the enlisted men. There has been no friction and the men mingle without restraint and easily with the officers. Officers and men have both declared their warm appreciation of the library service.

Mr. Charles F. D. Belden, chairman of the Free Public Library Commission, spoke briefly on the matter of closing libraries during the coal shortage. Mr. Belden thought that every effort should be made to keep libraries open.

In the campaign for contributions to the War Library Fund in Massachusetts 133 cities and towns equaled or exceeded their quotas, 15 towns and one city (Newton) doubled their quota, 6 towns (Belmont, Dalton, Duxbury, Hopedale, Lincoln and Nahant) tripled their quota, 4 towns (Brookline, Lancaster, Milton and Petersham) collected four times their quota and one town (Dover) collected eight times its quota.

Mr. Belden summarized the library war activities of recent months by showing that since the beginning of the organized work to

supply soldiers and sailors with carefully selected books and magazines there have been given by residents of the state, largely thru public libraries, 65,798 books. This includes 15,038 volumes sent to Camp Devens, 28,290 volumes to nine camps outside of Massachusetts, 5369 to 19 forts along the New England coast, 9177 to ships touching Charlestown navy yard, New London, Halifax and Hoboken, 4330 to five radio stations and the remaining 3594 volumes to hospitals and other military establishments. In New England 195 towns are contributing books for use in the camp libraries and the number of volumes contributed by people outside of Boston has amounted to 50,932.

The topic "Latin ideals in contrast to German culture," was discussed in a forceful and stirring way by Amy Bernardy, special commissioner of the Italian Board of Immigration. Miss Bernardy began by pointing out that while all war brings horrors many wonderful things have grown out of the present struggle. It has made all people more thoughtful. It has even filled them with a feeling of loneliness when among other people. She compared this feeling very aptly to the sensation of sailors who often have about them, for long periods, only the immensity of sea and sky. The elemental things under such conditions receive a new emphasis. Miss Bernardy pointed this out as one of the great lessons of the war. The quality of reading along the Italian front is superior to what it would have been within the families in peace times. Miss Bernardy showed how Italy was animated by a common purpose which is being carried out in a truly democratic environment.

FRANK H. WHITMORE, *Recorder*.

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

The regular meeting of the District of Columbia Library Association was held Jan. 22 at the Y. M. C. A. assembly hall, with President W. J. Hamilton in the chair. Twenty new members had been added since the October meeting.

The program committee introduced an innovation in a scheme for making the association a clearing house for library information for members, described more in detail in Library Work in this issue.

Mr. Hamilton spoke of the success of the A. L. A. war fund campaign. The work however has so expanded that the need of books is greater than the supply and a new campaign for gift books is to be inaugurated in the near future. A committee of three to co-operate

with the A. L. A. was appointed by the chairman having powers to enlarge itself and being given authority to draw upon the treasury of the association to a limited extent for necessary expenses for postage, etc.

The president then called on Miss Dickey, assistant in the Food Administration, who spoke briefly upon the work of the Administration. The work of the Food Administration is extremely flexible in character, changing with changing conditions; divisions arise in answer to a special need and then disappear when the need was passed. The Administration is organized according to commodities, there being a director and staff for each, as wheat, sugar, etc., and others concerned in the handling of the commodity. All necessary advertising has been furnished by the newspapers free of charge, mainly as news items, and there has been an immense amount of material released for publication. Each state as well as many of the larger cities has its Food Administrator with his staff and after a general policy has been mapped out these state and city administrators are permitted to adapt the policy to their own varying needs. As to results, among other things Miss Dickey mentioned the high price of sugar at the time of the Civil war, when there was no world shortage, and the present price of 9 cents per pound in face of a serious world shortage. This holds good with many other commodities.

Mr. Blessing of the Public Library reviewed Roy C. Andrew's "Whale hunting with gun and camera," which he recommended on various counts. Miss Wootten spoke appreciatively of Dr. Charles Smith's "O. Henry biography."

The speaker of the evening was the Hon. C. C. Dill, of the House of Representatives, who gave a wonderfully interesting account of his recent visit to the battle front in France and Belgium. By means of a map, which was a copy of that prepared by Maj. Parker, military observer for the United States, he gave a most vivid picture of the relations of the belligerent countries and of the path of the German invasion. He sketched the battle of the Marne and that of Verdun, the two crucial battles of the war, and pictured something of the sombreness of the battle front and the contrast between the troops, alert and ready, going into the front line accompanied with all manner of equipment, and the weary, dirty, wounded men coming back from the front line, attended by their battered and wrecked equipment, the very débris of the battle. He dwelt upon the wonderful spirit shown by the French, whom he characterized as the finest fighting men in the world. He

spoke also of some of the traits that make for charm in the French, among them the custom of saluting the graves of their fallen comrades, a custom which so impressed the party of Americans that unconsciously they found themselves joining in the salute. Mr. Dill gave a picture of our own men, determined, serious, bent upon accomplishing the task before them and said further that he found them with wants well supplied save that they had been unable to get their mail, which was indeed a deprivation. A visit to the Belgium front was both exciting and dangerous as the party was there practically under fire. Mr. Dill paid high tribute to the splendid work of the Red Cross both in the hospitals and in civilian relief work and to that of the Y. M. C. A. A glimpse of the English hospitals and the work they are doing in making the cripples whole and in teaching the blind to help themselves made one feel that the age of miracle is not past.

The District of Columbia Library Association has just been going thru the process of reorganization, with the purpose of putting life and interest into the association. If other associations have hints or suggestions which would be of benefit to us we would be very glad to receive them.

Alice C. Atwood, *Secretary.*

NEW YORK LIBRARY CLUB

The January meeting of the New York Library Club was held Thursday, Jan. 10, at 3 p. m. in the Merchants' Association in the Woolworth Building.

The speaker of the afternoon was Dr. Paul N. Nystrom, Director of the Bureau of Merchandising Research of the International Magazine Company, who read a paper on "The relation of the public library to the private business library." He felt that the public library can promote interest in business literature to a marked degree, but that it is impossible for the public library to render the intimate special service for the particular concern that the business library performs without sacrificing something of the general public library values.

In the discussion which followed it was suggested that the public library act as a clearing house for the special library, and to make this effective more privileges were requested for the special librarian, such as access to stacks and extended telephone service. From the public library side it was suggested that a representative from each type of special library be located at the Central Public Library to take charge of this work, the expense to be borne by the special libraries.

Another suggestion was for the organiza-

tion of a catalog of the library resources of the city, so that the special librarian, by use of the telephone, could know at a moment's notice the material on her subject that the city contained and where it was located.

At the close of the discussion Mr. Lydenberg read two letters, one from the Mayor's Committee of Women on National Defense notifying the club of a course of lectures to be given in connection with Columbia University on training in war work, the other from the National War Savings Committee suggesting the formation of war savings societies.

The next meeting will be held March 14 at 3 p. m. in the United Engineering Societies Building with Harrison W. Craver and Alfred D. Flinn for the speakers.

ELEANOR ROPER, *Secretary*.

NEW YORK LIBRARY ASSOCIATION

The New York Library Association will hold its annual meeting this year at Lake Placid Club, Sept. 23-28. Rates for members will be \$3.50 a day or with private bath \$4 in the smallest rooms. For larger rooms there is 50c. increase for each larger size, or one-half the regular increase. Detailed floor plans and rates can be had from the club. No charge will be made for such means of recreation as boats, bath cabins, golf, tennis, etc. These will at once be recognized as much below usual rates and are made possible only thru the personal interest of Melvil Dewey, president of Lake Placid Club.

Mr. Dewey as the first president of the New York Library Association served for three years and is at present one of its seven honorary members.

Lake Placid Club is famous not only for its natural beauties but also as a gathering place for librarians. Our association has held seven of its annual meetings there. It is the place where "Library Week" had its beginning seventeen years ago. Librarians not only of this state but thruout the United States and Canada know of its charms and will welcome this opportunity to see it again or come for the first time.

Future announcements will give more details regarding rooming plans. This will be the largest meeting in the history of the association. Make your plans now to attend.

WILLIAM F. YUST, *President*.

SPECIAL LIBRARIES ASSOCIATION—EASTERN DIVISION

The meeting of the eastern division of the Special Libraries Association, held in Boston the evening of Feb. 8, was called to order by

the secretary-treasurer of the association, in the College of Business Administration building, Boston.

The first speaker was William U. Swan, for 25 years with the Associated Press. "News gathering in war-time" was his topic and he told his audience of the excellent work of the Associated Press and of the army of correspondents scattered thruout the field of war. His address in full is in *Special Libraries* for March.

Prof. Harry B. Center, head of the journalism department at Boston University and formerly night editor of the *Boston Post*, with which he was associated for 15 years, spoke of the tremendous change in the reading of the American public since the beginning of war. He also spoke of the fact that the coming generation will be unable to read the accounts of this war in the newspapers for, if what chemists say is true, the papers cannot be preserved longer than fifteen years.

Ansel B. Clark, in charge of the Boston office of the Bureau of Foreign and Domestic Commerce, spoke on "Foreign trade in war-time" and especially emphasized the merchant marine of America, which he predicts will soon be second to none.

"Industries in war-time" was the theme of Ernest L. Little, of the industrial service department, Merchants National Bank, in which he traced the position of industries at the present day. The addresses of both Mr. Little and Mr. Clark are to appear in full in the *Alpha Kappa Psi Diary* for March.

The speaker on "Education in war-time" was unable to be present but sent word that he would have an outline of his lecture mimeographed and sent to those who requested it.

G. W. Lee made brief mention of the sponsorship scheme now being tried out in the Commonwealth.

The editor of *Special Libraries*, who was to talk on "Library service in war-time," said a few words on the subject but did not take the topic up in detail owing to the lateness of the hour.

The attendance was excellent, the speakers interesting, and those present voted it one of the best meetings ever held.

RALPH L. POWER.

KANSAS DISTRICT CONFERENCE

A conference of librarians and trustees from Central and Southwestern Kansas was held at Hutchinson, Jan. 25.

No officers were elected. Meetings were very informal and much time was devoted to discussion of individual library problems.

Mrs. F. D. Wolcott, president of the Hutchinson Library board, conducted the meetings.

Mrs. W. Y. Morgan, of the Hutchinson Library board, opened the first session with a brief address of welcome, to which Julius Lucht, librarian of the Wichita Public Library, responded. Mrs. L. S. Trotter of the Wichita Public Library board delivered an inspirational address on "The duties and responsibilities of the library trustee." This was followed by a lively discussion by trustees and librarians.

Luncheon was served in the High School dining room by the girls of the domestic science classes.

An afternoon session was held in the High School Library. This is one of the largest high school libraries in the state, and contains many valuable reference works, which librarians were glad to have an opportunity to examine. Superintendent Hall told of "Reference books most valuable in the high school library," and Mr. Lucht followed with a talk on "Reference books most valuable in the public library."

The library at the State Reformatory was visited. Mr. Coffin, superintendent of schools at the reformatory, is in charge of the library work. Under his direction the boys have made book cases and tables and fitted up a large, attractive reading room. The work of the boys in resewing and rebinding books was watched with much interest. Magazines and books are rebound and made to give the utmost service.

The conference was concluded by an address on "Library work in army camps" by W. H. Kerr, who has charge of the library work at Camp Funston. Many questions concerning the book needs of the men were answered. A continuation of the work of collecting books along technical lines was urged.

Many of the librarians and trustees remained for the concert by Mme. Schumann-Heink in the evening.

IDA DAY.

NEW YORK HIGH SCHOOL LIBRARIANS ASSOCIATION

The December meeting of New York High School Librarians Association was held on the twelfth at Washington Irving High School. Dr. Allan Abbott of Columbia University addressed the association on the subject of Americanization. Dr. Abbott spoke of the opportunity and duty of English teachers and librarians to present patriotism to their students. Various methods of arousing patriotism were suggested and helpful literature was discussed.

ELIZABETH B. McKNIGHT, *Secy.*

NEW YORK HIGH SCHOOL LIBRARIANS ASSOCIATION

The regular meeting of the New York High School Librarians' Association, was held at Washington Irving High School on Feb. 13.

The following officers were elected for the ensuing year: President: Sarah Annett, Washington Irving High School; vice president: S. Ridley Parker, Boys High School; secretary and treasurer: Katharine M. Christopher, Julia Richman High School.

Mary Frank, of the New York Travelling Library, gave an interesting talk on the various phases of the work of her department.

KATHARINE M. CHRISTOPHER, *Secretary.*

CHICAGO LIBRARY CLUB

The Chicago Library Club entertained its members and their friends on Jan. 10th at a delightfully informal affair, called a "birthday party" in honor of its twenty-fifth anniversary. The company gathered in the gallery of the Old Masters at the Art Institute. Entertainment and amusement sufficient for the entire evening were found in looking at the highly original costumes and emblems that were worn, and in trying to guess what books were being represented thereby. Mr. Skarstedt and Mr. Deveneau, of the library publicity committee of the Food Administration, spoke briefly in behalf of the Food Conservation Show in progress at the Coliseum. At the close of the evening a short tour of some of the new galleries was made.

The club assembled for its February meeting on Thursday evening, the seventh, in the club room of the Art Institute, where a brief talk was made by Burrige Butler, who has charge of the reserve war work among boys, especially on farms. As the capacity of the club room was not sufficient for the large audience which had gathered, adjournment was made to Fullerton Hall, where Prof. William Lyon Phelps, of Yale, gave an account of some of his literary pilgrimages in England. Prof. Phelps said that his journeys had none of the adventures of the pioneer about them, but were undertaken with the idea of going to places made interesting by human associations. Starting from Plymouth, he visited many famous localities in Devonshire, including Robert Herrick's Priory and the Lorna Doone country. This was only the beginning of his delightful pilgrimages, which he recounted and made vivid and long-to-be-remembered by anecdotes and illustrations. In closing his lecture, Mr. Phelps told about seeing and talking with some of the famous literary people now living in England.

JANET M. GREEN, *Secretary.*

Library Schools

NEW YORK STATE LIBRARY SCHOOL

Field practice will begin March 4 and continue thruout nearly the entire month. Regular school exercises will be suspended until after the library trip in the first week of April. Most of the students will go into libraries of New York state, but the range of practice this year extends from Brookline to Ann Arbor and as far south as Washington. Five or six will get practice in special libraries or technical departments; four will do organizing, under the general direction of the Educational Extension Division, at Oneonta, N. Y., Delaware Academy (Delhi, N. Y.) and Washington Academy (Salem, N. Y.).

Visits have been paid to the Rensselaer Polytechnic Institute Library and the general and research libraries of the General Electric Co. at Schenectady, N. Y. These visits were a part of the course in "Business Libraries." The study of correspondence files which forms part of the course will mainly come in April.

Miss Sanderson has been assisting Miss Webster in reorganizing the Delmar (N. Y.) Free Public Library.

SUMMER SESSION

The summer session will, as is usual in even years, be divided into two parts of three weeks each. The first part will again be devoted to reference work in its broad sense, with Mr. Wyer, Mr. Biscoe and Mr. Walter as chief instructors. Miss Hawkins and Miss Fellows will conduct the second part of the course, which will deal with classification and dictionary cataloging in its various phases.

An opportunity will be given to spend one or two days at the conference of the American Library Association which will meet at Saratoga, July 1-6. The opening date of the first part of the course will be June 5. The second part of the course will begin June 26 and will close either on July 17 or July 19.

Tuition is free for librarians or library assistants in New York state. The charges to librarians from other states are \$10 for each half of the course.

More detailed information may be obtained by addressing The Registrar, New York State Library School, Albany, N. Y.

FRANK K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

Out of deference to Mr. Hoover, the annual mid-winter entertainment of the Graduates' Association took the form this year of

a tea instead of the customary luncheon. This was held on Thursday afternoon, January 31st, at the Cosmopolitan Club in New York. It was preceded by a business meeting at which the following officers for the ensuing year were elected: President, Harriet B. Gooch of the Library School faculty; vice-president, Julia F. Carter; secretary, Mr. Frank Place, Jr.; treasurer, Genevieve O. Reilly. The association voted to accept a gift of \$35 from the class of 1895 as the nucleus for a fund to be loaned to the students of the school to enable them to take advantage of the educative and recreative opportunities of New York, or to supplement their resources in any way that would be to their advantage. Several personal pledges were at once made to increase the fund, and members of various classes, while unable to pledge their own class organization, promised to bring the matter up and hoped that action would follow. Prof. Frank Aydelotte, of the Massachusetts Institute of Technology, gave an address on professional ideals, and was followed by the Vice-Director, who spoke briefly on the war service rendered by libraries and library school graduates. There were about 80 present and the innovation was voted a success.

The class of 1918 gave a party at the Women's Club on Saturday evening, Feb. 2. A comical catalog of the class and staff furnished much amusement and the evening ended with a candy pull, the product of which was sent to Mary Martin, the Women's Club representative in France.

The director of the school, Mr. Stevens, has been in charge of the library at Camp Merritt during February.

The coal famine in New York has affected the school in several ways. The library has been closed every morning by way of conserving fuel, and the school recitations have been held in a class room on the ground floor of the Household Science and Arts Building, a situation to which all involved have adjusted themselves with a minimum of friction. It has been the practice for some years for the students to work in the branches of the Brooklyn Public Library on alternate Friday afternoons and evenings during the second term, but the closing of many of the branch libraries and the use of others as class rooms by the public schools has very much curtailed this opportunity. Another deprivation is that of the opportunity of visiting Washington this year, a trip up the Hudson and thru Central New York being planned instead.

The visiting lecturers during January took up various phases of children's work. The administration of the children's room and the children's department was given by Clara W. Hunt, story-telling by Anna C. Tyler, and the history of the movement of children's libraries and the selection of children's books by Annie Carroll Moore. This was followed in February by the presentation of the administration of branch libraries (in two lectures) by Mary Casamajor, librarian of the Bedford branch of the Brooklyn Public Library. W. O. Carson, Inspector of Public Libraries of Ontario, spoke on Feb. 26 on the administrative problems of the small library. Mary L. Titcomb, librarian of the Washington County Free Library at Hagerstown, Md., was in town on Jan. 29 and very kindly stayed over a train in order to talk to the class about what the public library can do to stimulate patriotism and an understanding of the problems of the war.

JOSEPHINE A. RATHBONE, *Vice-Director*.

LIBRARY SCHOOL OF THE UNIVERSITY OF WISCONSIN

Class work was resumed after the holiday vacation on Jan. 3, when a war tea was given by the faculty in the foyer of the school. As many of the students had visited libraries, bookstores, publishing houses, printing plants, or art galleries during their vacation, informal accounts of these visits added to the interest of the afternoon.

In connection with the work in publicity, Prof. W. G. Bleyer of the School of Journalism gave two lectures on "Newspaper publicity for libraries." Miss Bascom assigned as the last book selection problem of the semester a choice of several groups of books requiring each student to present copy (including head lines) for a newspaper article. The books in groups so treated were Modern poetry, Literary lives, Personal war narratives, Lives of leaders from the Middle West and Americans by adoption. Prof. O. J. Campbell of the Department of English gave an illuminating lecture on "Foreign fiction" in the book selection course.

The lectures and discussions in current events emphasized war service in various phases, as follows: "Civilian relief of the Red Cross" by Prof. J. L. Gillin, of the Department of Sociology, who has been granted leave of absence for the second semester to assist in the organization of civilian relief in the Chicago district. "Camp libraries" were described by Dr. Dudgeon, and "Food conservation" by Miss Marlatt.

Final examinations marked the last formal

class appointments for the semester. Instructions for the field work, and general preparations for it received due consideration, in order that it should become an integral part of the course. Field practice began Feb. 4, a day that gave the students a taste of pioneer life, as it proved to be the stormiest day in a winter unprecedented for its cold and snow. The members of the faculty spend much of February and March in their annual visits among the libraries of the state, supervising also the work of the students in their various appointments. Thirty-six libraries are receiving students for the two months.

MARY EMOGENE HAZELTINE, *Preceptor*.

SIMMONS COLLEGE—SCHOOL OF LIBRARY SCIENCE

An important change has been authorized by the Corporation in the conditions for the graduation of the group of those from other colleges who carry our one year course in the Library school.

Heretofore our B.S. degree has not been granted to them until a year of practical experience has followed their year of study in residence; but, beginning with June, 1918, the degree will be conferred at the end of the year in residence, provided all other conditions of graduation shall have been met.

This has been made possible, as henceforth the one year curriculum will be identical with the technical portion of the four year program.

To co-operate with the fuel administration the college substituted Saturday classes for those of Mondays, thus saving half a day's heating a week, but actual coal shortage compelled further closing Feb. 7-11 inclusive. At the time of writing it is hoped no further interruption will occur, but adjustments are being planned to minimize any loss of time, if such is unavoidable.

JUNE RICHARDSON DONNELLY.

CARNEGIE LIBRARY SCHOOL

The school opened for the winter term, January 2, 1918. Outside lecturers have been Dr. William M. Davidson, superintendent of schools, Pittsburgh, Pa., who spoke to the class upon "The correlation between libraries and public schools." "State supervision of school libraries," "Instruction of rural school teachers," "Book selection," and "Book lists" were the subjects of four lectures by Martha Wilson, librarian of the Woodland branch of the Cleveland Public Library. Mrs. Edna Lyman Scott lectured upon "The state supervision of children's work in the Iowa Library

Commission," and upon "The inspirational influences of reading."

SARAH C. N. BOGLE, *Principal*.

CALIFORNIA STATE LIBRARY SCHOOL

The work of the second term of the class of 1917-1918 began Jan. 7. Several new courses have been taken up as regular second term work: Book selection; Subject heading work; Law reference work; High school libraries; School library service; and Indexing. In connection with the lectures on indexing, each student devotes two hours a week during the term to indexing a periodical of local interest not listed in the published periodical indexes. In the course on school library service the point emphasized is the co-operation between rural schools and county libraries, working under the California county free library law.

On Jan. 23, Robert Rea, librarian of the San Francisco Public Library, gave two talks before the class on "Book selection," and "Choice of editions."

At the January meeting of the State Board of Education a resolution was passed whereby the California State Library School was accredited by the State Board of Education to recommend to county, or city and county, boards of education individuals for secondary special certificates in library craft, technique and use. According to an amendment to the state law, passed by the 1917 legislature, a librarian employed for more than two hours each day, in any high school, must hold a high school teachers' certificate, or the special certificate mentioned above. Thus the accreditation of the Library School ensures for each graduate the credential which renders her eligible to a position as high school librarian in California.

MILTON J. FERGUSON.

UNIVERSITY OF WASHINGTON LIBRARY SCHOOL

W. E. Henry, Director of the Library School, is at Camp Fremont, Palo Alto, California, having been appointed by the War Service Committee of the A. L. A. to supervise the construction and organization of the Camp Library. The course of lectures on library work with children given by Gertrude E. Andrus and the series of general lectures on library subjects by various librarians, which are regularly scheduled for the third quarter, have been moved forward into the second quarter to take the place of Mr. Henry's classes which will be resumed next quarter.

A large delegation from the library school

attended the mid-winter meeting of the Puget Sound Library Club at Camp Lewis, American Lake, Wash., Dec. 28. A great deal of enthusiasm was aroused over a paper by Judson T. Jenning on the construction of the Camp Library, which was erected under his supervision. An equally inspiring talk was given by the librarian in charge, Edward E. Ruby, on the wonderful opportunities in library work with soldiers.

Mabel Zoe Wilson of the Bellingham State Normal School Library gave a stimulating talk, Feb. 7, on the opportunities and possibilities of library work in normal schools.

CHARLES W. SMITH.

LOS ANGELES LIBRARY SCHOOL

A number of special lectures varied the routine of January class work. The event of the month was an address by Dr. Bostwick on "Some lost arts of librarianship." Invitations to hear Dr. Bostwick were extended to librarians in and around Los Angeles and the lecture room was filled. Following the talk coffee was served and the visitors were given an all too brief opportunity to chat with Dr. Bostwick before he was whisked away to visit branches and catch an early train. As an introduction to a series of lectures on social betterment activities Katherine Woodhead talked to the school on the work of the International Institute and the foreign problem in Los Angeles. Miss Haines' course in publishing houses was concluded by Albert Read in an interesting informal talk on the university presses of England and America. The school attended a very helpful lecture on girls' clubs and methods of conducting them, given by Miss Alice Moore under the auspices of the Y. W. C. A.

Arnie McPherron, 1917, was married in New York City on Dec. 24 to Glenn Leaf just before his departure for Europe in the American Ambulance Service. Mrs. Leaf has returned to her position in the Los Angeles Public Library.

THEODORA R. BREWITT, *Principal*.

BOSTON UNIVERSITY—LIBRARY COURSE

The second term began Jan. 28, and special lecturers since that time have been: J. Morton De Wolfe of De Wolfe and Fiske, The Archway Bookstore, on "Book selection"; Charles F. D. Belden, librarian of Boston Public Library and chairman of the Massachusetts Public Library Commission, on "State libraries," in which he traced the development of state libraries and legislative reference work; George Parker Winship, Widener li-

brarian, Harvard University, on "The library and the collector." G. W. Lee, librarian of Stone and Webster, conducted a round table on special library problems. From the college faculty: Prof. Harold Whitehead, author of "Principles of salesmanship," gave a talk on "Selling your services in the library."

The classes attended the meeting of the Special Libraries Association, eastern section, on Feb. 8.

RALPH L. POWER.

Librarians

AYER, Thomas P., Illinois 1913-14, has resigned from the staff of the Reading Room of the Library of Congress, and has accepted the position of assistant librarian of the Federal Trade Commission, Washington, D. C.

BADGER, Evelyn J., Pratt 1916, assistant in the Public Library at Cedar Rapids, Iowa, has accepted a position in the order department of the Public Library at Portland, Ore.

BOMGARDNER, Esther, California State Library School 1915, has accepted the position of librarian in the National City (Calif.) High School Library.

CLOUDSLEY, W. F., librarian emeritus of the Stockton Free Public Library, died Nov. 17, 1917, in Stockton, California. In his death the library has suffered a great loss. Formal resolutions on his death were adopted by the board of trustees at its last monthly meeting Jan. 9. Mr. Cloudsley was a pioneer in library work, having been appointed librarian in 1883 when the library was a small institution of 4698 volumes. It now contains 80,000 volumes and has an annual circulation of 200,000. Due to his unceasing efforts the library has extended its services to the entire county of Stockton, branches having been opened in every section with small supplies on hand and the resources of the large library as their reserve. Except from 1885 to 1887 Mr. Cloudsley continued in service from his appointment in 1883 until last July, when he was made librarian emeritus.

DEXTER, Elizabeth H., Carnegie 1913, has been made high school assistant, schools division, Carnegie Library of Pittsburgh.

DOTY, George L., Illinois 1917-18, is camp librarian at Camp McClellan, Ala.

DUTCHER, Harriet S., Pratt 1913, has been made reference librarian of the Public Library at Duluth, Minn.

DYE, Eleanor M., New York State Library School 1911-12, has resigned as children's librarian of the Sandusky, Ohio, Public Library to accept a similar position at the Bowen branch of the Detroit Public Library.

FENSOM, Vena, Riverside Library Service School Long course 1915-16, is employed at the Los Angeles Retail Merchants' Credit Association, Los Angeles, Calif.

FINNEY, Berenice Jean, Carnegie 1914, has resigned her position as assistant to the supervisor of work with schools, Public Library of the District of Columbia, Washington, to accept a position in the Signal Corps of the War Bureau, Washington, D. C.

GJELSNESS, Rudolph, Illinois, 1917-18, has enlisted and been assigned to the School of Aviation at Jefferson Barracks, Mo.

GLASS, Jessie J., Illinois 1916-17, has resigned her position on the staff of the University of Nebraska Library to accept the librarianship of the Omaha (Neb.) High School of Commerce.

GRIFFIN, Glenn F., Illinois 1917-18, is camp librarian at Camp Shelby, Miss.

HART, Mrs. Gertrude L., librarian of the Durham (Ct.) Public Library since 1894, died on Jan. 16 of this year. She built up the library from a group of two hundred volumes to a well-balanced collection of over 6200 volumes. Of her Miss Hewins writes: "A country librarian, working for nearly a quarter of a century without training, but alive to the best interests of her community and most of the time without salary, but declining half of what was at last allotted her, she belonged to a type that is fast disappearing and is worthy of notice."

KAERCHER, Frances, New York Public Library School 1913-1915, has been elected librarian of the Pottsville (Pa.) Free Public Library to succeed Flora B. Roberts. She has declined the election because of home responsibilities.

KAYSER, Vera W., Riverside Library Service School Winter school 1917, has been employed at the Cheyenne (Wy.) Carnegie Library.

KLAERNER, Charles, state librarian of Texas, has resigned, his resignation to take effect Aug. 1.

LIDLAW, Elizabeth, Illinois 1904-1906, formerly librarian at Bradley Polytechnic Insti-

tute of Peoria, has accepted a position in the catalog department of the University of Illinois Library.

McELROY, Mildred, Illinois 1914-17, has resigned her position in the catalog department of the University of Illinois Library to accept one in the Ohio State Library at Columbus.

MEISEL, Max, B.L.S. New York State Library School 1916, has gone to Camp Custer, Battle Creek, Mich., as assistant camp librarian.

MORGAN, Helen H., Pratt 1915, who resigned her position in the Public Library of Cincinnati some months ago, has accepted a position as cataloger at the Hispanic Museum.

NEWTON, Lesley, Carnegie 1913, has been made children's librarian of the Lawrenceville branch, Carnegie Library of Pittsburgh.

NICHOLS, Gladys, Illinois 1914-15, has accepted the librarianship of the Dover (Ohio) Public Library.

NIXON, Elizabeth, Carnegie 1913, formerly in charge of the book department, Y. W. C. A., New York City, has been appointed head worker in the Pottsville Mission, Pottsville, Pa.

NOEL, Jacqueline, Pratt 1913, reference assistant in the Public Library at Tacoma, Wash., has gone as first assistant in the circulation department of the Portland (Ore.) Public Library.

PENDELTON, Amena, Carnegie 1904, has accepted the position of head of the children's department of the Rosenberg Library, Galveston, Texas.

PHILLIPS, Richard, for thirty-five years on the staff of the Public Libraries of Birmingham, Eng., and for a number of years in charge of the Central Lending Library, died Oct. 29, 1917.

PRICE, Phyllis, Carnegie 1913, has resigned her position as cataloger of the Library of the Academy of the New Church, Bryn Athyn, Pa., to become index and catalog clerk, Signal Corps, Washington, D. C.

RICHARDS, John, Washington 1916, has been appointed librarian of the Camp Fremont library at Palo Alto, California.

SAMPSON, Francis Asbury, secretary of the State Historical Society of Missouri from 1901 to 1915 and bibliographer of the society from 1916 until his death, passed away Feb. 4, 1918, of pneumonia, in Parker Memorial Hos-

pital, Columbia, Mo. He was 76 years of age. He spent 46 years all told collecting Missouriiana. His private collection, which he gave to the society in 1901 when he became its secretary, consisted of 1886 volumes and 14,280 pamphlets. With this collection as a nucleus, he accumulated a library of 60,000 titles for the society. It is the best collection of Missouriiana in existence and contains many items which cannot be found anywhere else. Mr. Sampson was interested also in natural history, especially in crinoids. The Sampson collection of crinoids in the Museum of the University of Chicago was made by him. He was influential in founding the Public Library at Sedalia, Mo., where he lived from 1869 to 1901. He was editor of the *Missouri Historical Review*, 1906 to 1915, and was a frequent contributor to its pages. His published writings are largely bibliographical compilations. He was a member of the American Historical Association and of the Mississippi Valley Historical Association.

SAYER, Helen, Pratt 1911, has been appointed assistant in the library of the Rockefeller Foundation.

STARKEY, Grace M., Carnegie 1911, has resigned her position as assistant in the children's department of the Carnegie Library, Pittsburgh, to become clerk in the Sterret School, Pittsburgh, Pa.

TILTON, Asa C., has just been appointed librarian of the war collections of the University of Wisconsin and the Wisconsin Historical Society.

VOGE, A. Law, reference librarian of the Mechanics' Institute, San Francisco, has received a commission as captain with a regiment of engineers and expects within a month to be serving at the front in France.

WARD, Annette P., Pratt 1904, reference librarian at Oberlin College, is in charge of the preparation of books for use at Camp Sherman, Chillicothe, Ohio.

WESTON, Jessie B., Illinois B. L. S. 1917, has resigned from the University of Illinois Library staff to take charge of the apprentice class in the Milwaukee Public Library.

WRAY, Elizabeth, Pratt 1903, who has been for some years in charge of the circulation department of the Montague branch of the Brooklyn Public Library, has accepted a position as librarian with Ivy Lee, who is in charge of the publicity work for the Rockefeller Foundation.

THE LIBRARY WORLD

New England

NEW HAMPSHIRE

Concord. William M. Chase, associate justice of the New Hampshire Supreme Court from 1891 to 1907, died in his home here Feb. 3. He was eighty years old. His son, Arthur H. Chase, is state librarian. Justice Chase had figured prominently in public activities aside from his work as a jurist. He was a member of the State Senate from 1909 to 1911, and was a trustee of Dartmouth College for many years. He was graduated from Dartmouth in 1858.

MASSACHUSETTS

Amherst. Mass. Agric. Coll. L. Charles R. Green, lbn. (Rpt.—yr. ending Nov. 30, 1917.) Accessions 3162; total 56,090. Circulation 8918, which takes no count of reserve shelf books lent over night. Receipts \$7363.50; expenditures \$7363.50, including \$1781.76 for books, \$2074.42 for periodicals, and \$1699.46 for binding.

Boston. In the annual report of the trustees of the Boston Public Library, recently presented to Mayor Peters, an appeal is made for an increased appropriation for the coming year, so that underpaid employes may be given wages necessary to meet the high cost of living. The trustees urge the need of giving to the library department at least three per cent of the total appropriable income of the city, in order that the income from certain trust funds created under the will of the late Josiah H. Benton may be made available for use. Unless at least three per cent. is given to the library this income cannot be touched. It is announced that a general survey of the library system is to be made. The librarians chosen are Edwin H. Anderson, director of the New York Public Library, and Arthur E. Bostwick, librarian of the St. Louis Public Library. These two will select a third member of the survey commission. Work will be started very soon.

Dalton. This town, which gave three times its quota to the library war fund and supports its library in every undertaking, is now planning to install a rather elaborate food exhibition in the Public Library. This exhibition will be illustrated in a practical way. A speaker from Boston has been secured and will bring breads made from the various flours and recipes. Recipes issued by the free Public Library Commission as well as some of

local origin will be distributed and thru the kindness of Mrs. Herbert Johnson, who purchased recipes in Boston, packets of these are to be for sale for the benefit of the Red Cross. Special bulletins will call attention to the different exhibits, and all books and magazines will be specially displayed.

Haverhill P. L. John G. Moulton, lbn. (Rpt.—1916.) Accessions 5215; volumes lost or withdrawn 853; total 108,000. New registration 1795; total 26,948 (estimated population July 1, 1916, 50,739). Circulation 202,059 volumes. Receipts \$24,262.66. Expenditures \$23,875.20, including \$9728.79 for salaries, \$4130 for books, \$878.09 for periodicals and \$1133.96 for binding. Recommendations for a new building or a fireproof addition were again made and plans for an addition roughly estimated to cost about \$80,000 were discussed. The library has a radiopticon and stereopticon and these with lantern slides which are supplied may be lent or used in the building. The library also has a valuable collection of books, pamphlets, maps and pictures about Haverhill and its people. Everything in print about the city is saved and arranged and cataloged for public use. Thru publicity the library is enabled to secure this material. About 65 notices regarding the library appeared in the newspaper, including weekly lists of new books, notices of exhibitions and general news. Postal notices on special topics were sent to those who might be interested. The printed bulletin of new books was distributed free at the library, schools and by mail. As a result of this advertising, 1795 new borrowers registered. A book fund of \$4750 was received by the bequest of Jonathan Eastman Pecker of Concord, N. H., in appreciation of the city's retaining the name of Pecker given to one of its streets and to a section known as Pecker Hill. The best books for helping foreigners learn English and become citizens were bought and efforts were made during the year to reach particularly the Italians and Greeks, who, next to the French Canadians, form the largest foreign element. The library has become the accepted meeting place for clubs and societies of a literary, educational, and public welfare nature. During the year 113 meetings were held by organizations of diverse natures.

West Medway. The Public Library has been moved to new quarters in the building

on Main street presented to the town by the heirs of Lydia Thayer. A thousand dollars was raised to repair and remodel the building for library purposes.

Westfield. Fifty years have witnessed many changes in the history of the Westfield Atheneum, for it was fifty years ago last January that a modest little stone building known as the Westfield Atheneum was opened on Main street. The Atheneum was incorporated in March, 1864, erected in 1867 and thrown open to the public January 1, 1868. Thru the good will of the late Samuel Mather and Hiram Harrison the establishment of the institution was made possible. By a deed of Jan. 9, 1867, Mr. Harrison presented the land and building on Main Street to the Atheneum. Shortly before 1864 Mr. Mather made it known that he intended laying aside \$10,000 for a library, and this contribution led to the formal incorporation of the Westfield Atheneum. The first meeting of the incorporators, who were Samuel Mather, Hiram Harrison and Cutler Laffin, was held December 15, 1866. The next meeting was held December 18, and at these meetings officers with William G. Bates as first president were elected. Mr. Mather then delivered the \$10,000 in the form of United States bonds to the treasurer, Charles A. Jesup. In March, 1885, the town began voting the library the dog tax. In addition special appropriations were made yearly and last spring the sum was \$5500 in addition to the dog tax. In December of the same year a committee with the late Samuel Fowler as chairman began to solicit money for books and \$10,000 was obtained. Originally a fee of \$2 a year was required by the directors for full privileges of the library. Members were permitted to take two books at a time to be kept for two weeks. In May, 1895, the library was made free and the library committee, which is still in existence, was given complete authority in the matter of books and periodical purchasing. The old building was used until March, 1899, when the present structure at the corner of Court and Elm Streets was dedicated. This building was erected about eighty years ago and was the residence of Squire James Fowler. Settled in these quarters only nineteen years the directors of the library are already outlining plans for a new and spacious building to be erected thru the interest of the late Milton B. Whitney, who left \$80,000 to the library two years ago to be held in trust for five years, at the expiration of which time

the fund is to be used for a new building. By 1920 the \$80,000 will probably have reached \$100,000. J. C. Greenough and H. N. Kingsbury, president and secretary of the library board of the Westfield Atheneum, have been appointed a committee to secure from the legislature a new charter which will make it possible to follow the conditions of Whitney's will providing a new home for the library. A similar committee is arranging for the adjustment of certain details with the town. Beyond the preparation of plans, specifications, and general data, no start will be made on the building this year.

CONNECTICUT

Durham. The death of Mrs. Gertrude Hart, public librarian since 1896, recalls the early history of the library, which was established in November, 1894. Mary J. Camp was chosen first librarian, with Mrs. Hart and Mary L. Jackson as assistants. The books were kept in a small book-case in the Town Hall for three years, when the growth of the library made necessary a removal to the upper room of the Durham Centre school-house, then the Lodge Room of the Knights of Homer. During the celebration of the Bicentennial of the town of Durham, in 1899, the need of a library building was emphasized. The gift of a plot of ground by Mrs. Charles Green Rockwood, and subscriptions, large and small, from the people of the town, former residents and friends, made possible the erection of a substantial and convenient building. The corner-stone was laid in the fall of 1901, and the completed building was accepted by the town in August, 1902. In July, 1913, Charles Green Rockwood, a summer resident, bequeathed \$5000 to the library, the income to be used for the payment of a salary to the librarian, the first compensation ever offered. The board fixed the salary of the librarian at \$200, and Mrs. Hart, with her usual disregard of self, assigned one half of the salary to be divided among her assistants. It is interesting to note that the first circulating library in the colony was organized here in 1731, with the title of The Book Company of Durham.

Middle Atlantic

NEW YORK

Albany. The New York State Library has been co-operating with those in charge of the campaign to increase the membership of the Chamber of Commerce to 1500. A "Chamber of Commerce Library" was established at the State Library in January, which was of con-

venience to many citizens interested in the development of cities, as it can be done thru a bigger Chamber of Commerce. Many persons were surprised to find so much literature on modern civics. The books were grouped for display in a bookcase opposite the door of the general reading room of the State Library.

Buffalo. The trustees of the Grosvenor Library have received from the Cathedral chapter of the diocese of Western New York as a permanent loan the library of the late Bishop Coxe, formerly Episcopal bishop of this diocese. The collection has been kept intact and will be at all times available for use by the public, as soon as it has been cataloged.

Buffalo. The Public Library will open a library depository in the vicinity of the junction of Genesee and Parade. Thru the generosity of the Columbia Turn Verein, the Public Library has been given the use of a store at 1261 Genesee street, in the new building of that association, rent free until July 1 next. The library will install temporary furniture and cases and make a deposit of several hundred books for general circulation in this neighborhood. The Columbia Turn Verein has agreed to supply volunteer workers. It is planned to keep this library open three evenings a week, and possibly one or more afternoons.

New York City. The Board of Education has passed upon the erection of two new school buildings, one in Brooklyn and the other in The Bronx. Special provision for a library is made in each.

Sayville. The Public Library has been presented with the deed to a building lot, 75 x 125 feet in size, on Gillette avenue, as a site for a building, and is given five years in which to erect "a substantial structure."

Syracuse. The new West Genesee branch of the Syracuse Public Library has been opened within a few days in the parish house of St. Mark's Church, St. Mark's square, and will remain there until the new Porter School building is completed, when it is expected the branch will be transferred to quarters provided in the new building. The branch will be conducted by Ellen Buckley, who had charge of the branch in the school building burned two years ago.

West Winfield. The Public Library has been reorganized under the direction of Anna R. Phelps, state library organizer, and a simpler classification adopted.

PENNSYLVANIA

Philadelphia F. L. John Ashhurst, lbn. (Rpt.—1916.) Accessions 53,995; discarded 33,062; total 515,925 volumes. New registration 58,212; total 167,652; population according to census of 1910, 1,549,008. Circulation 2,767,310. Income \$354,747.41. Expenditures \$306,838.98, including \$48,496.21 for books and periodicals, \$17,802.83 for binding and \$189,711.37 for salaries. Plans for the new main building were adopted, the contract let, and ground broken for its erection, but actual construction was delayed. As a memorial to her father, Thomas B. Shriver, Mrs. George Frederick Klemm presented to the library the sum of \$2000, the interest of which is to be used for embossed books for the blind. Special bookplates will be used in all books purchased from this fund. The children's department commenced during the year to co-operate with the schools in order that children may use the library more intelligently. With the co-operation of teachers of continuation classes in elementary schools, members of the staff of the children's department delivered to boys and girls already in business, short talks on books as a means of self-help and advancement. A model children's room was part of the Free Library's exhibit at the "Philadelphia To-day and To-morrow Civic Exposition" held at the Philadelphia Museums May 15 to June 10, 1916. The department is now preparing a classified index list of all the social and municipal agencies dealing with children in Philadelphia. Two new branch buildings were opened to the public, the McPherson Square branch and the Nicetown branch, and the Logan branch building was begun. Plans for the Kingessing branch, the twenty-second Carnegie branch, were also drawn during the year.

South Atlantic

DISTRICT COLUMBIA

Washington P. L. George F. Bowerman, lbn. (Rpt.—yr. ending June 30, 1917.) Accessions 20,300; withdrawn 9018; total 196,418 volumes. New registration 16,870; total 51,115 (estimated population 380,000). Circulation 888,053. Income \$87,548.04. Expenditures \$86,542.63, including \$12,309.39 for books, \$1254.85 for periodicals, \$4548 for binding and \$50,243 for salaries. The report gives an account of the proposed plans for the construction of six branch libraries in the more thickly settled parts of the District, and the proposal that in 34 schools small branches should be installed, where the present population would not justify the erection

of a separate building. The report also includes a table showing municipal library expenditures and circulation per capita, for 1916 and 1917, in 33 American cities.

East North Central

OHIO

Chillicothe P. L. Burton E. Stevenson, lbn. (Rpt.—1917.) Accessions 3355 volumes. Circulation 94,019 volumes. Receipts \$4812.86. Expenditures \$5312.83, a deficit of \$499.97, include \$2724.10 for salaries, \$119.96 for binding, \$1675.91 for books, and \$251.04 for magazines. The library was in the main occupied with the establishment of the proper library service at Camp Sherman. Much hearty co-operation was rendered by the members of the library staff and the Board of Education. As a result the camp library now has by far the most complete and well-developed library system of any of the national cantonments. Nearly 18,000 books have been thus far prepared for the shelves, and magazines by the ton have already been delivered. Three new county branches were opened, in Green Township, Richmondale and Adelphi, now making a total of nine for the county.

Marietta. The Public Library has been moved from the Marietta High School building to the new library building on Capitolium Square, corner Fifth and Washington streets.

Chicago. The Chicago Theological Seminary, affiliated with the University of Chicago, has completed plans for a new group of buildings. These will house the offices, social center, dormitory, library, assembly hall and president's home.

WISCONSIN

Madison F. L. Mary A. Smith, lbn. (Rpt.—yr. ending June 30, 1917.) Accessions 4723; volumes withdrawn 2410; total 38,802. New registration 2682; total 16,073 (population according to census of 1910, 25,531.) Circulation 195,018 volumes. Receipts \$17,474.57. Expenditures \$17,474.57, including \$2004.43 for books, \$773.17 for periodicals, \$7468.05 for salaries. The librarian gave talks on the library to night classes in English at the high school resulting in a number of new registrations at the library. The largest use of the building ever made for meeting purposes was during this year when 256 meetings of various organizations were held in the assembly rooms.

East South Central

TENNESSEE

Memphis. Cossitt L. The 1917 report of Charles D. Johnston, the librarian, shows that 560,577 books were issued for home use from the library, its nine branches and thru the schools of the city, a gain of 55,794 volumes over 1916, or an increase of nine per cent. The report shows also a classroom use of 137,856 volumes in the city schools. Additions to the library during 1917 were 10,278 volumes, making a total of 141,232 volumes in the library system. There are 21,532 registered borrowers from the library, and many others not registered, who are using library books thru the schools and other agencies.

West South Central

LOUISIANA

Shreveport. Teachers, students, and friends of the Negro High School here are working to build up a suitable library for the school and are soliciting donations of suitable volumes.

Pacific

CALIFORNIA

Berkeley. The library of George Holmes Howison, the late philosopher, has been presented to the University of California by his widow, Mrs. Lois T. Howison. The gift is in memory of Professor Howison's quarter of a century of service as Mills professor of intellectual and moral philosophy and civil polity in the University of California. The twelve hundred volumes of the collection have been installed in a room in the new library building.

Fresno. No work further than the completion of plans, will be started on Fresno's proposed civic center, east of the court house, until after the war. The proposed new library building would be one feature of this civic center.

Long Beach P. L. Zaidee Brown, lbn. (Rpt.—yr. ending June, 1917.) Accessions, 5437 volumes; withdrawn, 859; total 45,397. Circulation, 340,824 volumes. Receipts, \$29,678.49. Expenditures, \$25,745.69 including \$4206.98 for books, \$799.23 for periodicals, \$1343.75 for binding and \$14,285.97 for salaries. The Burnett branch and the Zaferia branch were opened during the year. Both are open but two afternoons a week. A series of lectures on gardening was given in the spring by two members of the high school faculty. Once a fortnight in the club-

room of the library Miss Kate Foley of the State Library teaches reading with the fingers to the blind and to those who cannot read ordinary print. If a person is unable to come to the library, Miss Foley goes to the house. During the last two years, twenty-four people in the city have been taught by Miss Foley to read print for the blind. Many interesting art and historical exhibits were given in the art gallery during the year. Many pictures and relics for a historical exhibit with cases for their display were loaned by the Los Angeles Public Library, but perhaps the most interesting part of the exhibit was the collection of papers and pictures connected with early days in Long Beach. These papers and pictures were secured from pioneer settlers by means of circular letters. The exhibits of old-fashioned quilts and antiques held in August proved a very popular one.

Yolo. A new Carnegie library is to be erected at Yolo, \$3000 having been granted by the Carnegie Corporation for this purpose.

Canada

ONTARIO

Ottawa. For the third time, a site for the branch library it is proposed to erect in Hintonburg has been selected by the Public Library Board, which voted in November to exchange the property previously selected for that at the corner of Parkdale and Tyndale avenues, owned by the West End Glee Club. There was much discussion concerning the selection of a site, and deputations representing both the West End Glee Club and the Rosemount Avenue Methodist Church were heard. The opinion of W. J. Sykes, librarian, who had been requested to make a report, was that the property offered the board some time ago by the church people was the best, as it was advantageously located. He thought the old town hall site was less suitable, being too far out, while that owned by the Glee Club, he said, was still more unsuitable, being out of the region of shops, churches, and schools, on the south-west corner of the built-up part of the suburb. It remains to be seen whether the Board of Control and the City Council will ratify the transfer, which has chiefly resulted because of the action of these bodies in refusing the site first selected by the Library Board.

Toronto. A specially valuable collection of steel engravings collected by the late Thomas Grainger Wilson of the Wilson Munroe Company has been presented to the Toronto Pub-

lic Library Board in accordance with his will and thru the kindness of Mrs. Wilson. Except for Mr. Robertson's great collection of prints this is the most valuable gift the Public Library has received. They will be hung as a collection bearing the name "Grainger-Wilson" in accordance with Mr. Wilson's desire.

BRITISH COLUMBIA

Victoria. The Rotary Club recently had as the speaker Miss Helen Stewart, librarian of the Victoria Public Library. Her subject was "The value of the library to the community." Miss Stewart established a precedent in respect to the Victoria Rotary Club, in being the first woman to address one of their meetings. The big ambition of the library, she said, was to establish a university extension course; to become a recreational centre for old and young alike; and to be the workshop and laboratory of the city of Victoria. She reviewed the various departments of the institution, laying particular stress on the present usefulness of the children's department, and assuring her hearers that as business men they would probably be amazed at the amount of information in reference to their own activities that might be found in the library. The library, to be fully efficient in that way, however, needed a special business section, and she launched a veiled suggestion that, in that respect, there was scope for the service of the Rotary Club in providing for such a section.

MANITOBA

Winnipeg. Arrangements have been made by the Manitoba Provincial Library for the space to be occupied in the new parliament buildings into which the library is moving. The section immediately to the south of the legislative chamber on the second floor has been set apart for the main library, with adjacent rooms on each side for reading room and other rooms necessary for the staff. The main stack will be placed in the room underneath the chamber on the first floor, and there will also be room in the basement for the big files of bound newspapers and duplicate stock. The archives section and the office of the librarian will be across the hall from the main library. The library may be able to move to its new quarters before the end of the year. For reference purposes at least, the library is considered one of the best in Canada. In the reading room, which is second in importance to the library proper, all Manitoba newspapers, the leading magazines, reviews and periodicals of the world are kept

on file and are later bound and kept for reference. All Manitoba newspapers have also been bound from the first one, *The Nor' Wester*, published in 1859.

Foreign

ENGLAND

Coventry P. L. Ernest A. Savage, lbn. (Rpt.—yr. ending March 31, 1917.) Circulation 320,270. Income £4278 8s. 9d. Expenditures £4278 8s. 9d., including £1206 11s. 2d. for salaries, £264 16s. 10d. for newspapers and periodicals, £664 16s. 8d. for books and magazines and £190 14s. 5d. for binding. By an arrangement with the Coventry Chamber of Commerce the literature which is received by the Chamber from all over the world is handed over to the Reference Library, where it is filed for the use of the public. A system of interlibrary loans has been arranged with the Birmingham Library Committee by which any books, excepting those which are very valuable and those which are impossible to replace can be borrowed by the Coventry Library.

Croydon. According to a note in the *Reader's Index*, the work of the libraries, which declined during the opening days of the war, has now resumed its normal aspect. During the months of October and November 95,632 books were borrowed, the record number since the corresponding months in the year 1913. During the first year of the war the reading declined slightly, and declined still further in the second year, but since the third year there has been a continuous upward tendency to the present total, which is an increase of 19,649 upon the corresponding months of 1916. Moreover, the number of borrowers has increased from 18,941 in 1916 to 23,891 in 1917, which is the largest increase ever accorded. A further interesting fact is that after an upward tendency the percentage of the use of fiction has again fallen and is now 45 per cent. of the entire issue; that is to say, during these months 50,922 works which are commonly called "serious" were issued.

Liverpool. It is reported that the new commercial library established last year has proved a success. The average number of readers who have used the library for reference work has been 120 daily. Special visits of inspection have been paid by the chief librarian of Manchester, Glasgow, Newcastle, and Leeds, in which cities similar libraries

have also been started, and many inquiries have been received from all parts of the country for detailed information on the library's establishment and administration.

SCOTLAND

Aberdeen P. Ls. G. M. Fraser, lbn. (Rpt.—yr. ending Sept., 1917.) Accessions 2743 volumes and 236 pamphlets; withdrawn and lost 2438; total 83,124 volumes and 10,627 pamphlets. New registration 8788. Circulation 240,457. Income £3653 15s. 5d. Expenditure £4016 15s. 3d., a deficit of £363 19s. 10d. A glass case capable of accommodating four columns of print was placed in the lending department marked "Books of the month." Titles of noteworthy books (not all new ones), with annotations of rather more intimate character than is possible in a formal catalog entry, were shown, directing the attention of readers to helpful books that might otherwise have escaped notice. The arrangement proved most successful. The practice of having a short course of four lectures by the librarian on local history subjects was continued with marked success in the juvenile department. The arrangement of selecting 10 pupils from each of the 30 odd schools for each lecture worked admirably, and the library committee's essay competition on the subject of each lecture brought excellent results.

INDIA

A letter recently received from Madan Gopal Ahluwalia, one of the library students in the University at Lahore under Asa Don Dickinson and now assistant librarian in the Government of India Secretariat Library in Simla, gives some interesting information on Indian library matters. This Secretariat Library contains some 60,000 volumes, with 40,000 more at Delhi, and is said to be the richest in official publications in India. The library has its own system of classification, but is having separate subject and author card catalogs made to supplement its printed catalog. An "All India" library conference was planned to be held in January of this year in Lahore, where the opportunity to study a well-organized library was expected to be fruitful in results in other Indian libraries. Other students in the classes conducted by Mr. Dickinson are now working in the Punjab Public Library, Mission College, and D. A. V. College, which has gotten its new library building as planned by Mr. Dickinson.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature

Boys' BOOKS

The school and the boy's books and reading. Walter Barnes. *Wilson Bull.*, Jan., 1918. p. 251-256.

For the purpose of this article, it is the average boy between the ages of twelve and sixteen, within whose own personality and experience the widely different characteristics of the boy-class are completely summed up, who is particularly considered here. All the preceding periods of boyhood's reading are but a preparation for the period under discussion. The boy to be prepared must have acquired such mastery of the mechanics of reading that reading is mechanically easy. He must have had some wide reading experience in and out of school in the children's classics of poetry, folk-tales, proverbs, fables, myths and legends and oriental wonder-stories—all the literary matter which is invaluable as a basis for the more complex and mature literature which the boy is now to assimilate. Third, out of the reading and study of the above types, a love for reading and the habit of reading for pleasure must have been acquired.

A well-equipped home library with an assortment of the choicest boys' books and the world's classics is the best place for the boy to read. It is more serviceable than a school library, and is an invaluable supplement to it. Here the books maintain an air of permanence and the reader feels at ease with them because they are his own. He can take them up and browse among them whenever he pleases.

In the matter of independent, out-of-school reading, plenty of the action to be found in history, fiction, epics and ballads is what the boy seeks in his books. He cares little if at all for descriptive matter. The characters of the books must be athletic, full of vim and vigor, not anemic. The style must be energetic. The setting of time and place must suggest stirring movement, heroic endeavor and physical prowess.

The tangling and untangling of plots is vexatious to the boy. He wants a simple, one-group plot. "The boy does not care to have his story a cross-section of human life; he wants it a length. It should not be a team; it should be a tandem." The story should be strong in its power to arouse the boy's emotions. It must be full of incident; of

danger, hair-breadth escapes, cunning feats of stealth and strategy. "The difference between the legitimate adventure story and the trashy nickel novel is that the exciting events of the first are fewer and are the natural actions of the known characters moving consistently in the given situation, while the exciting events of the second are more numerous and more highly spiced and are lugged in regardless of time and place, of characters and circumstances."

The characters should be plainly marked. The hero should be heroic—physically brave and morally courageous, yet kind-hearted and chivalrous; cunning, yet honest, loyal, truthful and frank. He should maintain these qualities thruout the story. The villain should be villainous not half but all the time. In general, the boy likes a boy-hero or a man. If there is any love making to be transacted, he wants it transacted off the stage and taken all for granted.

The style must be of the rapid-fire, picturesque sort. The story should be narrated simply and directly in the first person. The boy relishes broad jokes, ludicrous situations and ridiculous characters, and ignores any delicate or subtle humor. He likes stories of soldiers, sailors, detectives, pirates, Indians, travel, history stories, and stories of school life because they lend themselves to these qualities. The best specimen stories on these subjects should be found in every school library. If the boy cannot find them there, he will seek them in the dime novel which is sure to meet his desires.

The only good points about the dime novel are that it is cheap, frequently deals with the same characters from week to week, and can be outgrown.

If the boy is provided with the best of what he likes to read in his home or school library, he will not read the five or ten-cent trashy, paper back novel. If the teacher and parent can craftily substitute the good for the trifling, the problem of the five-cent novel is solved, so far as the average boy is concerned.

Prose fiction should make up the bulk of the boy's reading. It will not over-develop the boy's naturally romantic, idealistic nature and teach him false ideas of life, for he has enough of the prosaic, unromantic and the realistic in his life. Solving arithmetic problems is enough to keep him down, and if he is not allowed to feed on some healthful ro-

manticism, he will develop into an unimaginative man.

History and poetry, like fiction, also supply good reading matter for the boy. The two kinds of history-literature that he cares for most are biography and the historical novel or romance. Biographies should be of explorers, hunters, soldiers, pioneers and Indian fighters. There are very few first-class biographies for boys, but there are many good historical novels and romances. Works of Scott and Cooper, some of Dumas, Stevenson, Charles Lever and Conan Doyle are of more than common value.

As for poetry, the boy cares very little for it. Poetry is too elaborate and roundabout in expressing a thought and contains too many unusual words. Simplicity is what the boy desires. Ballads, some humorous verse and patriotic lyrics are his favorite types, but in very few cases will be read even these unless compelled to by the teacher.

The boy's reading need not be all literature. He is often interested in a book on electricity, or Boy Scouts, or farming, which will give him as much informational reading matter as he pleases along the line of his interests. He should, moreover, have his periodicals where he can find suggestions and information about handicraft work.

The teacher should always direct the boy in reading and should create and inspire a love for books where none exists. He can suggest points that have been overlooked in one book and refer to other books of the same sort. He can read aloud passages from interesting books and thus lead the boys to those particular books. Above all he should create or encourage the impression that reading is fun. The motive for reading should be the desire to have a good time. To lose one's self in a story, to lose consciousness of the natural surroundings of time and place and be alive only to the persons and events created by the author is the only real satisfactory reading and anything short of this is a mere imitation. If the boy does not read boys' books, he will miss much that properly belongs to his boyhood and will never be able fully to enjoy men's books.

CATALOGING. *See* Periodicals—Cataloging.

CIRCULATION. *See* Fiction—Circulation of; Overdue book week.

EXHIBITS

At the great Industrial and Agricultural Exhibition held in Baroda, India, early in 1917, the Central Library had a prominent part. The "library court" of the exhibi-

tion, which was 52 by 20 feet, contained nine sections. The place of honor was given to Baroda library progress, where the growth of the system in the four districts of the state was shown on several maps. The other sections were devoted to work with children, library architecture, library furniture, library appliances, book binding, rarities in the book-world, and technical literature and visual instruction apparatus. Librarians from district libraries were specially invited to this exhibit, and arrangements were made to give them practical information on library matters every afternoon. Visitors from their parts of India were so much impressed by the exhibit that they took certain sections back to their own localities after the exhibit was closed.

FICTION—CIRCULATION OF

Last spring the circulation department of the Grand Rapids Public Library made a survey of the fiction in the Ryerson building, to discover to what extent the books in the fiction collection were not being used. The results of the survey are given in the annual report for 1916-17.

At the time of the survey there were in round numbers 11,700 volumes of fiction in this building, by 2035 authors. Of this number 4500 books did not go into circulation a single time in a full year. These 11,700 books are in the stacks, and on the open shelves, except about 500 duplicates.

Of the 2035 authors 629, or 30 per cent, were not represented by a single book circulated during the year. The library had 913 books by these 629 authors. Of the 1406 authors of the books that did circulate, or 70 per cent of the authors of fiction represented in the Ryerson building, 3602 of their books did not circulate a single time during the year. 7208 books by these same authors went into circulation, and they represented a total home use of 34,144 issues. These figures indicate that about 62 per cent of the collection of fiction in the Ryerson Library building is alive. The other 38 per cent, so far as the use of the circulating department of the Library was concerned, was largely dead stock.

Of the books of fiction that were placed on the open shelves in the library's plan of rotating every few years all the older books on these shelves, nearly all went into circulation, and some of them as a result took on a new lease of life, indicating that one may never be sure when a book that has been seemingly inactive may become active again for any number of reasons.

The 12 authors whose works of fiction in the Ryerson Library building had an issue of 300 or more during the year, together with the number of copies of their books on the shelves in this building, were as follows:

Author	Circulation Books	
A. C. Doyle	482	75
Joseph C. Lincoln	402	26
Gene Stratton-Porter	371	27
Stewart Edward White	362	29
Charles Dickens	340	108
Eleanor Porter	332	23
Jack London	329	35
Harold Bell Wright	328	33
Alexander Dumas	321	140
Florence Barclay	307	25
Winston Churchill	306	43
E. P. Oppenheim	300	21

Among the older writers the older editions of their books are no longer active, and most of their books are represented by new and more attractive editions.

The following table is of interest in showing the ten authors with the largest number of works of fiction on the shelves of the Ryerson building, together with the number of circulations of fiction represented by these authors from that building:

Author	Books	Circulation
Walter Scott	165	295
Alexander Dumas	140	321
J. F. Cooper	112	171
G. R. P. James	110	20
Charles Dickens	108	340
Anthony Trollope	98	28
Isabella M. Alden	92	184
F. M. Crawford	85	130
W. D. Howells	76	58
A. C. Doyle	75	482

LANTERN SLIDES

Library use of lantern slides. Louis J. Bailey. *Lib. Occurrent*, Jan., 1918. p. 12-15.

One of the greatest aids to the lecturer or to the formal teacher in supplementing regular instruction is the use of the lantern slide. To help one form a vivid picture of a thing in all its details, visual instruction is required. The lantern slide has several advantages over the moving picture film in that it is more easily used, more flexible to illustrate variety and wide change of scene, more accurate in photographic likeness and affords less distraction from a speaker's address.

Slides are used in libraries principally for lecture work or for loaning to institutions, and the size of a collection is to be decided by the library itself. Almost every library ought to have some photographs from which slides of local scenic or historic interest could be made.

A single agency for the undertaking of a complete and thoro service is a desirable thing. In Indiana the extension division of Indiana University has made a beginning, but its col-

lection is thus far limited to some gifts and slides used in professional teaching. The sources for borrowing, purchasing or renting slides are many. A number of railroads loan sets free, while some art institutions and museums often rent slides dealing with their particular specialties. A list of dealers with their special kinds of slides is given at the end of this article. Some of them make slides to order from their own photographs or those given by the purchaser; others rent slides in sets (ofttimes with written lectures) or from miscellaneous collections. Sets usually cover some industry, some scientific subject or a country. The Keystone View Co. have a "600" set made up in stereographs or lantern slides which provide scenes from all countries and also illustrate other subjects. An index volume to all subjects covered is published. Underwood and Underwood sell a "1000" set and also a "600" set. These sets are very valuable for educational purposes.

Slides in America are $3\frac{1}{4}$ by 4 inches. Foreign slides are square. Plain slides cost from twenty to fifty cents and colored forty cents to one dollar, but whereas colored slides are more interesting, plain slides usually give a clearer image and are better for details. Home making of slides is practicable but not desirable for libraries. The positive plate, cover glass, mat and binding are the parts of a slide.

There are several companies engaged in the making of cases for the care of slides. The Library Bureau makes a horizontal unit file; Underwood & Underwood a vertical file, and the Keystone Co. a cabinet. These are on the principle of trays holding slides. The Moler lantern slide cabinet supplied by Geography Bureau of Ithaca holds twenty compartments each containing space for sixty slides. Carrying cases made for sets of sixty to one thousand slides should be used for loaning. Collections classification of slides usually follows the D. C. country divisions. Very few special classes need be brought out as the catalog itself brings out all special subjects. Subjects as machinery, biography, astronomy need to be brought out. Each slide receives numbers in sequence under each class, so that the call number is composed of class and sequence numeral with a dash between them. Some good subjects for slides for a library are sacred and patriotic songs, maps and local scenes.

Slides are sometimes charged on a special colored card with the following notations: class and number in each class, name of bor-

rower, date due and condition of the slides if necessary.

There are several good lanterns on the market. For large halls a stationary lantern is advisable; one using carbons and high amperage for lighting. A portable lamp is useful for branches or for loaning; it uses ordinary lighting circuits and a nitrogen lamp. The nitrogen lamp is quieter in operation, makes little heat and is simple to operate. It requires a darker room than an arc light for successful operation. A good screen is essential and this should be opaque, dead white and on a roller for quick operation. The roller should be about 8 by 8 feet.

MOTION PICTURE THEATERS—CO-OPERATION FROM

In the editorial column last month was a reference to a library in Indiana which shared the returns from certain performances in the motion picture theaters, where the library advertised the books represented in the films shown. To prevent a misinterpretation of this statement, the arrangement is described here in more detail.

In Pendleton, Ind., a small town with but one moving picture theater, then showing films of a very poor order, the librarian, Margaret A. Wade, first undertook the scheme for the sake of bringing better films to the town. She wrote to one of the best film companies in Chicago, selected her films from their list, and had them sent to the library. The local manager agreed to allow the library the use of the theater on certain nights, and to operate the machine on a 50-50 basis. Miss Wade selected a corps of special assistants to help sell tickets, usher, and advertise. Posters and advertising slides were ordered from the film company. The library assumed all responsibility and did all of the work except that of operating the machine.

Each time the library cleared enough money for its book fund to make it worth the trouble, and at the same time gave the people better films, tho it was not always possible to get just the films desired. If the library had given the entertainments oftener it would probably have had less difficulty in getting films.

Miss Wade is in the Wisconsin Library School this year, and her successor has not continued the moving picture work, but there seems no reason why many a small library should not adopt a similar scheme, and, with the exercise of a little thought, so relate the work of library and motion picture theater that both the institutions and the public may be benefitted.

Bibliographical Notes

An official report of the summer school of library service held at the National Library of Wales at Aberystwyth last summer, has been printed, together with the inaugural address by Sir William Osler.

A paper on "Later French settlements in New York state, 1783-1800" by J. I. Wyer, Jr., has been separately reprinted from the Proceedings of the New York State Historical Association for 1916.

In a pamphlet of 16 pages there is reprinted from the November-December, 1917 issue of *The Class Struggle* an outline of the "Political parties in Russia" by Nicholas Lenin. The pamphlet is published by the Socialist Publication Society, 119 Lafayette street, New York City, at 5 cents.

The photographs of scenes on the different war fronts, released from time to time by the Committee on Public Information, may be secured for private collections at ten cents each, from the committee's division of pictures, 10 Jackson Place, Washington, D. C. A complete list of all photographs may be had on application.

A limited supply of "Diplomatic correspondence respecting the war published by the French government" (English text) has been put at the disposal of the Committee on Public Information. Until the supply is exhausted, libraries not having the volume may receive it on request addressed to C. D. Lee, Committee on Public Information, 8 Jackson Place, Washington, D. C.

By far the most interesting presentation of the A. L. A. war service so far made is contained in the pamphlet entitled "War service of the American Library Association," by Theodore Wesley Koch. All phases of the work, both actual and potential, are taken up, the subject matter being divided to cover administration and personnel, the duties of the camp librarian, buildings, the call for books and their supply, gifts good and bad, educational opportunities, magazines and newspapers, popular authors, relation to affiliated organizations, the work overseas, books for prisoners of war, and the books needed in military hospitals. Many photographs from the different camps increase the attractiveness of the booklet.

SCHOOL AND LIBRARY

SUPPLEMENT TO

THE LIBRARY JOURNAL

MARCH, 1918

THE school and the library are the field of two professions, each growing in importance in succeeding years. The school librarian is in the happy position of being a member of both professions, of combining in herself two noble callings. One of these deals with the youth, the other with the child as father or mother of the man or woman of the future. This combination of opportunity and usefulness is rare indeed and has yet to be appreciated by those who enter this special field, whether from the side of the teacher or of the librarian. Before long that school will be behind the times which has not a school librarian. The librarian is no longer a luxury, but a necessity in education. Thru the school librarian, the pupil is not only put in touch with reading auxiliary to the school courses and with general literature, but is trained to take up to best advantage the processes of education outside and beyond the schools, in the years of adult life. And into the school field are coming other helps for school work, as they are coming into the public library field. Motion pictures and phonograph records bring to the eye and the ear of the pupil information and culture in supplemental relation to the printed page, and may well come within the domain of the school librarian.

It should be peculiarly the province of the school librarian to study what boys and girls like to read and to better their reading by the process of substituting better books, real literature, for the trash of dime novels and like stuff. Mr. Charters' studies in this field, summarized in this issue, are significant in this direction. Mark Twain, Stevenson and other writers, for whom all boys have a liking, and will continue thru many generations of school

boys to have a liking, build a bridge into the realm of literature which should be made easy of access to every boy, and there should be an increasing class of literature of like sort for girls, suggested by the names of Miss Alcott, Mrs. Whitney, and Kate Douglas Wiggin.

ONE field in which school libraries should enrich themselves and thus enrich school pupils, made especially important thru our war alliances, is that of French books. Mlle. Clément, who is in America in the interest of promoting American acquaintance with French books, pointed out at the Atlantic City meeting how mistaken is the impression, too current in this country, that the large proportion of French literature is improper reading. No literature, in fact, contains sweeter and sounder and more delightful books for young people than that of France. Mlle. Clément herself, speaking in English or French as may be desired, is prepared, as a part of her mission in America, to talk before schools on French books especially suited to American reading, and to co-operate with school librarians in making selection of such books.

IN our School and Library supplement and in the regular issues of the LIBRARY JOURNAL also, we are proposing to include a question box for school librarians, thru which they may ask questions and obtain answers on practical points of school library administration and the selection of books for school libraries. This will be under the direction of Miss Martha Wilson and Miss Mary E. Hall, than whom there can be no more competent authorities in this special field. Our school friends are invited to make use of this helpful feature.

SOME EXPERIMENTS IN WORK WITH ELEMENTARY SCHOOL CHILDREN*

BY AGNES COWING, *Children's Librarian, Pratt Institute Free Library, Brooklyn*

A GENERAL impression seems to prevail that the subject of the elementary school and its relation to the library has been somewhat pushed into the background of late thru our concern about the high school. Yet even a casual searching of the files of the LIBRARY JOURNAL, *Public Libraries*, and the *American Library Association Bulletin* shows that there has been no real indifference to this phase of work with children—that on the contrary, in various ways, everybody seems to be “doing it,” if one may use the popular phrase, and to have been “doing it” ever since Miss Hewins began such work in Hartford in 1878. There is accordingly no necessity to enlarge upon the theory or the advantages of such co-operation. We shall all agree with Miss Power’s statement that our aim is “to train to an appreciation of good books and an intelligent use of public library resources.” It only remains to consider how we shall attain these ends.

But when it comes to this way of “doing it,” there is room for more or less diversity, since “appreciation of literature” can never be reduced to a “method” but must always admit of a generous bit of the personal element in the would-be teacher of “appreciation.” There’s no danger of missing the personal element in those under instruction! Elementary school children will always provide sufficient “personal element,” even if they aren’t equipped with appreciation. So I’m planning to take my allotted time this afternoon to tell you of “my way” as I’ve worked it out during the past two years with children of the seventh and eighth grades of one of our neighboring schools, and hope you will be lenient to a very personal talk.

First of all, however, I want to say that you must not think that we only realized our responsibility to the schools two years ago. Our Children’s Room came of age this

year, and in looking back over our past as we naturally did at this important date in our history, I found that from the very beginning we too have been “doing it”! Among our archives are two note-books labelled “Visits to schools,” kept by Miss Moore in 1897 and 1898. If she were present I should ask her to tell something of those days when a Children’s Library was an entirely new and untried institution, and co-operation with schools an unheard-of proposition. At that time relations were established with the Training School for Teachers, then a near neighbor, and also with certain individual grade teachers who welcomed the help our room offered, and sent their children regularly to look up reference questions. Opportunity was given to tell the children about the library by talks in class-room or assembly, and these talks or announcements were carried on with some regularity from year to year, and always brought new applications for membership, as well as a return of old members who had either forgotten the library, or had allowed their cards to lapse for fines or other reasons. I remember my surprise one afternoon after one such visit when a boy, followed by a group of a dozen or more children appeared with about a dollar in small change to pay *all* the fines for the boys and girls in his class. Their teacher had made it a point of class honor to pay up their library fines, and the children had brought their pennies to school, and had handed them over to this special business manager appointed by the teacher. He had a list of the names and amounts, varying from one to ten cents and he managed the affair very capably. That particular experience has never been repeated but I have always found school visits worth while for the interest they awaken in both teacher and children. “I saw you at my school,” seems to establish a bond with the library teacher which merely seeing her at the library fails to establish; while “My

* Read at the meeting of the New York Library Association at Roscoe, Sept. 21, 1917.

teacher knows you and says so-and-so" is another guarantee of your connection with real life.

While these school visits were carried on after a fashion from year to year, a very busy room and a rather small staff made them somewhat desultory and intermittent, and I had had a growing feeling for some time that something more ought to be done, which was crystallized into action by two things. The first was some notes in the *School Library Bulletin* about the use of the weekly library period in the schools for reading aloud. By the way, if you don't know the *School Library Bulletin* published by the Board of Education of New York City under the thoughtful editorship of Claude G. Leland, let me recommend it as a source of inspiration and suggestion. The second motive force was Mrs. Edna Lyman Scott's article on "Inspirational influence of books in the life of children" read at the A. L. A. in 1915. I too had known the kind of home of which she spoke where books were read and talked about, not library books, but real "home books," so that Andersen's "Tinder-box" and "Heidi," Miss Alcott, Tom Sawyer, Scott and Dickens and Thackeray and many others all have the background of a home scene and an interest doubled because it was shared. Was it possible to give any far-away suggestion of that kind of book association to children in the class room, I wondered, by reading aloud and talking informally of book friends, and was it for the teacher or for the children's librarian to make the attempt?

Knowing something of the many subjects which a teacher in the grade schools must attempt, I felt pretty sure that most of them would be willing to share the library period with an outsider, if the principal assented to the plan, so a call on the principal of the school which seemed to offer the best field for a start was the first step. My plan was to take the seventh and eighth grades and go to each class once a month, taking boys and girls separately but grouping the two divisions of the grade, A and B. Neither the principal nor the grade teachers altogether understood what I had in mind but that was hardly

to be expected, for I wasn't quite sure myself, but they took me on trial as it were, with varying degrees of responsiveness, from resignation to real interest and helpful co-operation. The work started in February, and I began by distributing the lists "What shall we read now" which we had compiled two or three years earlier for each grade, talking a little about the books in each group, "Famous old stories," "Poetry," "Biography," etc., and then leaving the lists for the children to check for books they had read. The results of the checking were rather discouraging. The number of books they hadn't read which even we children's librarians take for granted all children read was somewhat of a surprise. Moreover there were some who seemingly never read at all. I should have said previously that the school is attended by children in fairly good circumstances, their parents being chiefly small shop-keepers or mechanics, probably American-born, tho one would work back in two generations, I imagine, to a foreign-born grandparent.

I paid three visits to each grade during that term, and I talked about many books in my experimental eagerness, altogether too many, I think, as I look back on it now. Often, I'm sure, I crowded so much into those thirty minute periods that the children carried away only a muddle of words, but they were responsive, and my welcome from both class and teacher was a little more cordial each time. I tried a poetry period on each grade, and found "Sir Launfal" and "Lochinvar" liked by the girls, and I tried "The highwayman" on the seventh grade boys after hearing Alfred Noyes read it himself, and made a doubtful success of it. I struck a responsive note in the teacher of the eighth grade girls by an afternoon of "Famous girlhoods," an idea which I borrowed from Miss Hewins "Books for boys and girls," for in work of this kind I feel one is free to appropriate other people's ideas wherever found in a spirit of professional freemasonry. I read that afternoon from Mary Antin's "Promised land," and found that this grade teacher had a special admiration for Mary Antin, and that she also made a practice of

having her girls give two-minute talks once a week about famous women. So, ever since, I've been providing lives of famous women for that grade. The teacher of the seventh grade boys proved to be a woman with an enthusiasm for the heroes of romance, Siegfried, Roland, and others, and as I was fresh that year from a summer in the Pyrenees, I had a glorious period with her boys telling the story of the Pass of Roncesvalles. There were bad days too. I tried Hector and the walls of Troy on the eighth grade boys and got nothing but apparent boredom. Yet it was one of these boys who at the end of the term said, "I like those stories all right when you read 'em, but I don't like to read myself." On the whole I closed the work in June with the feeling that the library periods had waked me up to many things, and that I had at least made sure of my welcome another year.

And so it proved, and these library periods have gone on for the last two years until they are now, I think, an established part of the schedule. I have confined the work to the seventh and eighth grades, not because it would not be equally interesting and worth while with the lower grades, but because the library schedule will not permit of many hours for this work. By this plan, one has the same children for two consecutive years while each successive promotion brings in a new group. Last year I started the periods in a second school, which means giving the hour from 2 to 3 on two afternoons each week to these visits, besides the necessary preliminary preparation. If the work must be limited I think the seventh and eighth grades need it most.

Our library story hour does somewhat the same thing for the younger children but by the time the boys and girls reach the seventh grade they are outgrowing the story hour. They have reached the mental state which George Macdonald describes in "The princess and Curdie" when he says, "At all events, as Curdie grew older he began to grow coarser and commoner, more like a stupid miner and less like the manly boy he had been. On his way to and from the mine he took less and less

notice of the bees and butterflies, moths and dragon-flies, the flowers and the brooks and the clouds. . . . In fact, he began to make up his mind that the only things that were true were such things as he could see and touch and handle for himself. He began to feel that he did not want to hear anything about what his father or his mother knew or believed. That was simply old people's talk and of no use at all. As for the things which had been gathered together from what all the people of the world had believed for thousands and thousands of years—why, that was just tiresome stuff which could not interest anyone." It is at this age, if I may quote Macdonald again, that we want to help the children to understand that "it is what the whole world has found out to be true during thousands of years—the world's experience, as we say—which makes it possible to do new and beautiful things to-day," and that of "all these true things the best is something which you cannot see, nor hear, nor touch, but only believe in."

In the last two years I have learned to do more reading and less talking, letting the books talk for themselves by taking some one story which I can read in its entirety, or some part of a book, telling just enough to give the introduction and the connecting links, and leaving it to the children to get the book later if they want it. You will be interested, perhaps, in some of the books I have read and I'm going to speak of both successes and failures. Someone said to me last spring that she thought a round-table on "our failures" would be distinctly encouraging to some of the younger members of the profession and I'm inclined to agree with her. We've all had them and individually we've all learned from them, but perhaps we're a little selfish about sharing them, while we love to tell of our successes.

I read Dickens' "Christmas Carol" to all the groups for a Christmas story, and it proved once more its universal appeal. "Master Skylark" is a favorite with the seventh grade girls and was particularly useful during the Shakespeare tercentenary. By the way, each class took part in the school celebration of that anniversary and

came as a class during school hours to look up costumes and to see our Shakespeare exhibit, and to find songs and other material for their program. I had great fun one afternoon introducing Thomas Bailey Aldrich's "Bad boy" and his adventures of the Fourth to the seventh grade boys; and I shall never forget the day I told the eighth grade boys the story of Scott's last voyage—an afternoon which began with a pervasive atmosphere of restlessness, changing to interest as the spirit of that hero tale caught them, and when I finished reading Scott's last message with, I'm afraid, a none too steady voice, for it's one of the things which grips one's throat, there was absolute silence, and I even caught the glint of moisture in the eye of two or three of those would-be-hardened young fourteen-year-olds.

"The winged hats" from "Puck of Pook's Hill" was a divided success, going unexpectedly well with the eighth grade boys of one school and unexpectedly badly with the same grade of the other school. "The perfect tribute" is another story which has been alternately very successful and quite ineffectual. In these cases, it was failure I should say, to create the right atmosphere, a thing for which the storyteller is primarily responsible, but which is also easily affected by local conditions and interruptions sometimes beyond one's control. "Undine" is liked by the girls. I usually introduce it thru "Little women." They like the recommendation of an old favorite. I remember one interesting afternoon on books Rebecca talks about and another on Hildegard's favorites. One girl quaintly remarked that she always supposed that they just made up the names of all the books they talked about!

After war was declared last spring and the neutral silence preserved by the schools as to European affairs since 1914 was broken, I tried one or two afternoons of European history and current topics with some very funny results as to both knowledge and ignorance. As an instance, out of a class of fifty boys, not one knew Garibaldi by name, much less what he stands for in the liberation of modern Italy, tho his adventures proved exciting

enough to hold them, and the book about "that man who wore the shirt" was much asked for afterwards. The visit of the French Commission in May was a fine opportunity for arousing this kind of interest, for the children all saw Marshal Joffre on the occasion of the unveiling of the Lafayette Monument in Brooklyn, and recognized the pictures of him and were interested in the books and magazines we had at the library. To the girls that month, I read Daudet's "Last lesson," and altho they were hardly old enough to appreciate its full significance or its exquisite pathos, they were interested and I think they will recall their first hearing of it when they meet the story again later. That kind of memory is what I most want to give the children, not so much the completed pleasure of a story which is just on a level with their power of enjoyment, tho that too has its place, but the pleasure which cannot be given back in words of one syllable, the something which a child can feel but cannot express or altogether understand but which unconsciously broadens his sympathies and his human interest. For it seems to me that one road, and perhaps the surest, to World Peace is World Knowledge, and that no time could be more propitious than the present when "over there" is becoming a vital reality to us all, to break down the traditional isolation in which United States history has been taught and to learn that the men who have given us our national ideals and hopes are members of the greater world fellowship of those who have given their lives for freedom, truth and justice in every age and in every land. In this connection, let me mention the reading list on Patriotism just published by the New York Public Library, as a most timely and welcome source of inspiration and help.

I could go on telling of other experiences of these library periods, but I have said enough to give you an idea of them. I claim no monopoly of the idea, for I know how many others have done similar work, but for those who want to attempt something of the kind I have two words of warning. First, beware of following a course, especially one made out by some

one else. You must have an idea, a plan in your own mind of what you want to do, and you may borrow ideas quite shamelessly from other people (in fact you must always be on the lookout for ideas), but don't lay out your whole year's work so carefully that you cannot bear to change it when a new idea comes in, especially if it's one which depends for its success on being developed at once. In other words, be adaptable, and have an alternative up your sleeve in case of need, for you won't always find your class in just the mood for your program as you had planned it. And don't try to use books or stories, no matter how well recommended, which make no appeal to you, yourself. Your own interest in the story you read or the thing you talk about is vital. Otherwise your own boredom or indifference will come thru and take possession of your whole audience. Adaptability, spontaneity, interest, enthusiasm are essential, and perhaps most essential of all, preparation. You cannot read aloud successfully unless you know what you want the children to get from your reading—that is, you must know the points of your story, and you must cut skillfully to bring out those points in their proper sequence and importance, and needless to say, you must know how to use your voice. An unintelligible reader is an unforgivable offender. Perhaps this emphasis on preparation seems unnecessary, but I have heard so many people say, "Oh, I couldn't do story telling, but reading aloud, that's a different matter." It is a different matter and in some respects an easier one, but it cannot be done offhand without risk of failure.

There is one difficulty in this work, the same one which follows in the wake of all recommendations of special books, the creation of an artificial demand which the library cannot supply. Three or four copies of Billy Topsail will answer our normal demand well enough, but after I read the fight with the devil-fish, Billy Topsail disappeared so completely from the shelves that it seemed as if he had never been there. The same thing was true of "The prince and the pauper" after I read Tom's

first royal dinner, and one day, when for some reason, I suddenly altered my program, I brought Baron Munchausen into a light of popular favor by telling his adventure with the wolf, which gave him the most active winter he has ever known. If we could only live up to our ideal and always have the right book at the right time for every boy and girl, since a child's interest and enthusiasm will not always survive the ordeal of a two weeks' wait!

A variation on library periods was tried last year when a lesson in the use of the catalog was given at the library itself to each grade. For this the principal granted permission to the classes to come to the Children's Room during the last school period. The simple method which has been used in the Queens Borough Library was adopted. This teaches each pupil to look up books by author, title and subject, and to locate them by number on the shelves. The children's interest in the lessons and the appreciation of the teachers were both very satisfactory.

The establishment of Gary schools and the longer school day opens up an interesting situation for the public library. Just what part we shall be called upon to play as one of the social activities of the school neighborhood is not yet clear. So far none of the schools in our district have been Garyized, but the time is coming quickly when all the schools will realize that to spend a school period in the library is a legitimate use of school time. For us this means a new responsibility since we must prove that what we can give the children in such a period is of real value in the development of character, initiative and individuality.

EXCEPT a living man, there is nothing more wonderful than a book!—a message to us from the dead,—from human souls whom we never saw, who lived perhaps thousands of miles away; and yet these, on those little sheets of paper, speak to us, amuse us, vivify us, teach us, comfort us, open their hearts to us as brothers. We ought to reverence books, to look at them as useful and mighty things.—CHARLES KINGSLEY.

CHANGING FASHIONS IN DIME NOVEL SUBSTITUTES

By W. W. CHARTERS, *School of Education, University of Illinois*

IN 1907 the writer had occasion to ask the librarians of twenty-four of the large cities of the United States to give him a list of twelve books which boys of the dime novel age found to be as interesting as the dime novel. These lists were duly received, compiled, and put to the use for which they had been obtained.

Ten years later the writer chanced upon the study and the idea occurred to him of comparing the fashions in boys' literature in 1907 and 1917. Thereupon the same question was sent to the same libraries, and answers having been received from all, summarizing lists were compiled.

The results are presented to the readers of the LIBRARY JOURNAL as merely an interesting adventure into the romantic field of boy literature rather than as a serious attempt to make a weighty contribution to knowledge. The 1907 study was made for a simple, practical purpose which the results fulfilled and the 1917 request was necessarily identical with the other.

The following facts are summarized from the study:

I. In 1907, the five books mentioned by at least six cities were, in order of popularity, as follows:

Kaler's "Toby Tyler"; "Treasure Island"; "Adventures of Tom Sawyer"; "Mr. Stubbs's Brother," the sequel to "Toby Tyler; and Drysdale's "Fast Mail."

Ten years later four of these remained, one had disappeared from the lists submitted and three had been added. The seven mentioned in 1917 by at least six cities were, in the order of their popularity, as follows:

"Treasure Island"; "Adventures of Tom Sawyer"; "Toby Tyler"; "Twenty Thousand Leagues Under the Sea"; Altsheeler's "The Young Trailers"; "Fast Mail"; and "Adventures of Huckleberry Finn."

TABLE I

Dime novel substitutes arranged in order of popularity in 1907

	1907	1917
Kaler, Toby Tyler	11	10
Stevenson, R. L., Treasure Island..	10	17
Clemens, Adventures of Tom Sawyer	7	13

Kaler, Mr. Stubbs's Brother.....	7	0
Drysdale, Fast Mail	6	8
Brooks, Master of Strong Hearts..	5	2
Grinnell, Jack the Young Ranchman	5	5
Hill, Fighting a Fire	5	1
Janvier, Aztec Treasure House ...	5	1
Munroe, Derrick Sterling	5	0
Stevenson, B. E., Young Section Hand	5	1
Stoddard, Little Smoke	5	2
Stoddard, Red Mustang	5	0
Aldrich, The Story of a Bad Boy..	4	1
Barbour, Half Back	4	0
Clemens, Adventures of Huckleberry Finn	4	6
Moffet, Careers of Danger and Daring	4	3
Munroe, Cab and Caboose	4	4
Barbour, For the Honor of the School	3	1
Drysdale, Young Reporter	3	0
Goss, Jed	3	2
Grinnell, Jack Among the Indians..	3	3
Henty, Redskin and Cowboy	3	0
Munroe, For the Mikado	3	0
Munroe, Rick Dale	3	0
Pyle, Story of Jack Ballister's Fortunes	3	2
Stoddard, Two Arrows	3	0

II. About sixty per cent. of the books mentioned by three or more cities in 1907 have declined very markedly in popularity since then and of these, eight titles received no mention by librarians in 1917.

(This may be seen by reference to Table I which gives the author, title, and the number of cities mentioning each title in 1907 and 1917, and arranges the books in the order of frequency of mention in 1907.)

TABLE II

Dime novel substitutes arranged in order of popularity in 1917

	1907	1917
Stevenson, Treasure Island	10	17
Clemens, Adventures of Tom Sawyer	7	13
Kaler, Toby Tyler	11	10
Verne, 20,000 Leagues Under the Sea	2	9
Altsheeler, The Young Trailers ...	0	8
Drysdale, Fast Mail	6	8
Clemens, Adventures of Huckleberry Finn	4	6
Carruth, Track's End	0	5
Grinnell, Jack the Young Ranchman	5	5
Masefield, Jim David	0	5
Altsheeler, Last of the Chiefs.....	0	4
Barbour, Crimson Sweater	0	4

Burton, Boys of Bob's Hill	0	4	G. A. Henty	11	(20)	0
Cody, Adventures of Buffalo Bill..	1	4	C. T. Hill	1	(5)	2 (2)
Defoe, Robinson Crusoe	2	4	T. A. Janvier	1	(5)	1 (1)
London, Call of the Wold	0	4	J. O. Kaler	6	(30)	3 (13)
Munroe, Cab and Caboose	4	4	Jack London	1	(1)	3 (6)
Quirk, Boy Scouts of the Black Eagle Patrol	0	4	John Masefield	0		2 (6)
Schultz, With the Indians in the Rockies	0	4	A. B. Mason	0		2 (4)
Altsheler, Horsemen of the Plains.	0	3	Cleveland Moffet	1	(4)	1 (3)
Brown, Two Boys in a Gyro Car..	0	3	Kirk Munroe	14	(40)	2 (4)
Grinnell, Jack Among the Indians.	3	3	Howard Pyle	2	(4)	4 (5)
Malone, Winning His Way to West Point	1	3	L. W. Quirk	1	(1)	3 (6)
Mason, Tom Strong	0	3	E. L. Sabin	0		3 (7)
Moffet, Careers of Danger and Daring	4	3	J. W. Schulz	0		3 (7)
Sabin, Bar B Boys	0	3	B. E. Stevenson	4	(8)	2 (4)
Sabin, Buffalo Bill and the Over- land Trail	0	3	R. L. Stevenson	1	(10)	1 (17)
Stevenson, Young Train Dispatcher	0	3	W. O. Stoddard	9	(30)	1 (2)
Wallace, Wilderness Castaways....	0	3	E. Stratemeyer	7	(7)	0
			E. T. Tomlinson	8	(9)	3 (3)
			J. T. Trowbridge	8	(8)	1 (1)
			Jules Verne	1	(2)	1 (9)
			Dillon Wallace	0		3 (5)

III. Table II, which corresponds in form to Table I except that the most popular books in 1917 are listed in order of popularity, shows the following facts:

(a) Only two of the 1917 list are less popular than they were in 1907.

(b) Three are represented by identical numbers.

(c) Sixteen are not included at all in the list of ten years ago.

(d) Only nine books of the 1907 list are found in the list of 1917. (The reader may find these by noting in Table II the titles which have the number 3 or a larger number opposite them in the 1907 column.)

TABLE III

Relative popularity of authors of dime novel substitutes in 1907 and 1917

	1907	1917
W. L. Alden	5 (6)	0
T. B. Aldrich	1 (4)	1 (1)
Horatio Alger	5 (5)	0
J. A. Altsheler	0	9 (30)
C. P. Burton	0	2 (6)
E. S. Brooks	1 (5)	1 (2)
C. P. Burton	0	2 (6)
Hayden Carruth	0	1 (5)
S. L. Clemens	3 (13)	2 (19)
W. F. Cody	1 (1)	1 (4)
Daniel Defoe	1 (2)	1 (4)
Conan Doyle	3 (4)	2 (3)
William Drysdale	5 (12)	3 (8)
B. A. Dunn	5 (6)	0
Edward Eggleston	3 (4)	0
E. S. Ellis	6 (9)	1 (1)
W. L. Goss	3 (6)	1 (2)
G. B. Grinnell	4 (10)	3 (9)

(Table III needs a word of explanation.

It is composed of two lists: one of twenty-six authors who were mentioned four or more times in connection with one or more titles in 1907 with the number of times each was mentioned in 1917; and the other of twenty-two authors who were mentioned four or more times in 1917 with the corresponding number of times each was mentioned in 1907. The number in parenthesis in each column indicates the number of times the author was mentioned and the figure to the right of this indicates the number of his books mentioned in the respective years. For instance, Alden in 1907 had five titles mentioned a total of six times and in 1917 had no mention.)

IV. The following facts are of interest in Table III:

(a) The 1917 list includes seven new authors not mentioned in 1907. These may be found by noting the ciphers in the 1907 column of Table III. Altsheler is conspicuous.

(b) The large proportion of seventeen out of twenty-six authors included in the list on a four-times-mentioned basis in 1907 are not mentioned as often as four times in 1917. Most conspicuous in waning popularity are Ellis, Henty, Stoddard, Stratemeyer, and Trowbridge.

(c) Six authors in the 1907 list received no mention in the 1917 returns. These may be found by noting the ciphers in the 1917 column.

(d) Nine authors are mentioned four or more times in both 1907 and 1917. These are Barbour, Clemens, Drysdale, Grinnell, Kaler, Munroe, Pyle, B. E. Stevenson, and R. L. Stevenson.

(e) The 1917 readers seem to concentrate on fewer books. In 1907, of the twenty-six authors mentioned four or more times, thirteen each had more than four books listed while in 1917 only two out of twenty-two had more than four titles listed. And in 1907 the twenty-six writers had a total of 124 titles while in 1917 the twenty-two writers had only sixty-one titles mentioned. Also, 203 titles were mentioned in 1907 and only 153 in 1917.

CONCLUSIONS

It is obvious, of course, that no scientific conclusions can be drawn from these data but they do raise a number of interesting questions such as the following:

(a) What are the differences between the nine permanent and popular books and those of the six authors that disappeared from the 1917 returns?

(b) Do these nine books indicate that good literary form is an important element of popularity among boys?

(c) What causes the rapid shifting of interest disclosed in the data?

(d) Is this shifting among boys as great as among adult users of the libraries?

(e) What characteristics of boy psychology would an analysis of these best sellers indirectly reveal to the psychologist and the teacher? A study of this particular problem might be of unusual educational value.

UNDER the auspices of the Public Service division of the University of Montana a series of lectures on the nations of the Great War is being given at the University and in various cities of the state, the proceeds from the lectures being devoted to the Red Cross. Each lecture is first given at the university and then in the following cities: Deer Lodge, Philipsburg, Butte, Anaconda and Dillon. The subjects of the lectures are: Germany, Belgium, Russia, England, France, Turkey, Italy, Balkans and Scandinavia.

SCHOOL AND LIBRARY RELATIONS IN NEW YORK STATE

THE school libraries division of the New York State Department of Education has sent out a pamphlet prepared by Dr. Sherman Williams and addressed to librarians and principals of public secondary schools, embodying the results of an investigation made by the division as to the relations that exist, or should exist, between school libraries and public libraries.

In studying this question the following facts are worth serious consideration:

The number of secondary public schools in the state is	749
The number of these located in cities or villages in which there is no public library is.	201
The number of public libraries in the state is.	548
The number of branch libraries is.....	105
The number of public libraries that are open every day and have paid librarians is only	197
The number of libraries that are not open every day but that have paid librarians is	117
The number of libraries that are not open every day and that pay their librarians \$25 a year or less is	32
The number of libraries that are not open every day and do not pay their librarians any salary at all is	70

The questionnaire sent out to libraries sought to find out to what extent the libraries had established definite relations with the schools as such, not with individual pupils. To secure this data, the following questions were asked:

- 1 Do you lend books to the schools in your vicinity; that is, to the schools as institutions, distinct from the individual pupils?
- 2 If you do, to what extent and under what conditions?
- 3 Do you in any way aid the teachers in their use of the school library? If so, in what way and to what extent?
- 4 Do you ever visit the schools in your place or vicinity and talk to the children about their reading, and their use of the school library and the public library?
- 5 Do the principals or teachers ever ask you to do this? If so, to what extent?
- 6 Do you ever invite the pupils to come to your library so that you may talk to them about the use of the public library? If so, about how many come?
- 7 About what proportion of the pupils in

the public schools draw books from your library regularly?

- 8 State what you think it is feasible for your library to do to make the use of the school library of greater value.

Only 136 of the 548 libraries in the state reported, and many of those that reported answered only a part of the questions asked. A summary of replies with some comments will be of interest.

To question 1 there were 63 affirmative answers and 73 negative—an unfortunate majority on the wrong side. Question 2 brought out very varied responses, and it was evident that no general plan had been worked out acceptably. Seventy-six answered question 3 in the negative; 47 help in one way or another. To the fourth question 97 reported that they do nothing; 31 attempt to help. Answers to question 5 disclosed the fact that 106 libraries had never been invited by principals or teachers to speak to the children on library matters; only 20 libraries reported that they had ever been so invited. From question 6 developed the fact, on the other hand, that 84 librarians have never given special invitation to pupils in schools to come to their libraries for instruction in its use; 47 have given such invitations, with varying results. In response to question 7 the following figures came out: 25% or fewer, 18 libraries; 25% to 50%, 37; 50% to 75%, 24; 75% to 90%, 7. Answers to question 8 were too varied to be summarized, but the need of closer co-operation was felt by all.

The questions sent to principals of high schools were:

- 1 About what proportion of your pupils regularly draw books from the public library?
- 2 Has the librarian of the public library in your place shown any interest in your school library? If so, how?
- 3 Have you ever asked her assistance?
- 4 Does the librarian of the public library ever meet your pupils either at school or at the public library, and discuss library matters with them? If either has been done, to what extent have the pupils responded? Have you ever invited the librarian to do either?
- 5 Have you a satisfactory high school librarian?
- 6 State what you think it is feasible for

you, your school authorities, or the librarian of the public library to do to make the library work in your school of greater value.

Only 466 of the 749 principals addressed made any reports on question 1. From 1% to 25% was reported by 46; from 25% to 50%, 77; and from 50% to 92 1/6%, 75. The others made indefinite replies or had no knowledge. To question 2 141 replied in the affirmative; 81 in the negative, but in many of the smaller libraries, where the librarian is little more than a clerk, it can hardly be expected that they will take on any extra burden. To question 3 there were 109 affirmative answers, and 99 negative, and question 4 had 138 negative and 60 affirmative replies—two painful evidences of lack of co-operation.

On question 5, 8 reported that there were no high school librarians in their schools, 6 that their librarians were fairly satisfactory, 73 that they were not satisfactory, and 197 that they had satisfactory high school librarians, which may indicate that they were easily satisfied. A few had the grace to say that there was need of having more time given to library work. The fact that the majority of the high school principals were satisfied with the library work done is considered by Dr. Williams the most discouraging feature of the reports that have come from either the principals or the librarians. The last question, as in the questionnaire sent to the libraries, brought answers almost as varied as they were numerous, and put stress on changes that are desirable rather than those which are immediately feasible.

THE MOVIE VERSUS THE BOOK

How much children's knowledge is colored by the motion pictures they see was recently shown by a conversation between two boys at the book truck in a Cleveland branch. One boy spied a copy of "Rebecca of Sunnybrook Farm," and said to the other, "Oh, that's a good story. Do you know it?" "Sure," was the answer, given in a very superior tone of voice. "Sure! I know it. That's all about Mary Pickford."

GRADE LIBRARIES IN ROCHESTER, N. Y.

THE grade libraries of Rochester have some features which are common to such libraries in other cities and some which are unusual, if not unique. The success of these libraries anywhere depends in large measure on the nature and extent of the co-operation between the public library and the public schools.

The Board of Education early recognized the need of carefully selected books of general reading for the pupils of the graded schools and outlined a plan for supplying them. In order to distribute the expense and labor of providing a sufficient number of books, it was decided to spread their introduction over several years. Accordingly each year all the class rooms of one grade thruout the city were supplied.

In 1912, when the Rochester Public Library was organized, the Board of Education at once recognized its peculiar fitness to administer these grade libraries. Profiting by the experiences of other cities, they made an agreement according to which the Board of Education retains ownership of the libraries and meets the expense of re-binding and replacing volumes while the library manages and operates them for the benefit of the schools.

During the first summer all the books were assembled at the library and thoroly overhauled, regraded and redistributed. A simple system was introduced for keeping record of circulation and of the exact books sent to each school. Each A and B division of a grade was sent twenty-five books which later were supplemented until the average number now is thirty-five books in grades below the fifth and thirty books in grades above the fifth.

Every class has practically the same titles in its collection that every other class of the same grade has. Thus the books are so graded that a child entering the Third B grade anywhere in the city, has access to the same books that every other Third B grade pupil has in any school in the city. A grade library is a fixed unit to which the pupil is introduced as he passes thru that grade. As he is promoted to higher grades he finds awaiting him a new set of books,

each of a higher mental level to suit his constantly unfolding intelligence.

If the pupil reads one book a week during the forty weeks of the school year, he has the choice of forty out of seventy books each year.

One report blank is sent at the end of every month to each of the forty schools. After each teacher has recorded the circulation of books in her grade the report is returned to the library by the principal. Once a year an inventory is taken at each school. At that time books are also examined for repairs, new cards are provided where necessary and all minor adjustments are made.

The books receive hard usage and many are worn out every year. In order to replace these discarded copies and gradually improve the general selection by adding new titles, a list of books needed is prepared annually by the library. The purchase of these new books, together with the amount needed for re-binding and repairing is approved by the school authorities, who order the books delivered to the library, where they are received and prepared for circulation.

The head of the Children's Department of the Public Library attends principals' meetings, teachers' associations and institutes and frequently brings the matter of pupils' reading before the teachers at these meetings and also at the faculty meetings of individual schools. She also gives every year a course in children's literature and the use of grade libraries to the members of the senior class at the City Normal School, thus enlisting the interest and co-operation of the coming teachers in the use of these libraries.

This course consists of twelve lectures on such topics as, relation between libraries and schools; problems of children's reading; history of children's literature; evaluation of books; methods employed in the care, use and management of the grade libraries, and ways of interesting children in the books. With these lectures assigned reading and problems are given. The course closes with a written test. Next year this course is to be supplemented by a course of ten lessons on "The use of

books in the school library" and is to be given by the librarian of the Normal School. These combined courses should lead to a credit in the Normal School curriculum.

There are at present 478 grade libraries, each in charge of a teacher. The total number of books in use during the last year was 14,842, and the total circulation for the year ending Dec. 31, 1916, was 175,297. There has been an average increase in the use of the grade libraries of about 20,000 volumes per year since 1912.

One of the special features of the grade libraries in Rochester is the ownership of the books by the schools, which begets a more thoro-going co-operation than when the books are supplied by and at the initiative of an outside agency. These books are now regarded as a regular and essential part of the school equipment. Official instructions regarding their use are issued thru the office of the Superintendent of Schools and every one connected with the schools has a deeper sense of responsibility for their full and effective use.

The other distinguishing feature is that of a fixed collection for each class room and grade. Instead of moving books back and forth between library and school and between different class rooms, the books remain stationary while the procession of readers goes by from term to term. This rotation of readers instead of books is more simple and economical from the standpoint of both school and library, so far as management is concerned, and practical educational results are very satisfactory.

ADELINE B. ZACHERT.

IN Great Britain there has been, since the beginning of the war, a great revival of interest in the study of Russian. Over 55 per cent of the universities and colleges of England have established courses in Russian, and in Scotland four higher institutions and 18 continuation centers have courses in Russian attended by 560 students.

THE National Education Association will hold its annual conference in Pittsburgh, Pa., June 30 to July 6.

MIDDAY MOVIES AND THE HIGH SCHOOL

THE use of "movies" at East Technical High School, Cleveland, has been so beneficial in its results that it is now considered an established feature of school life.

For three years one of our progressive teachers has assumed the entire responsibility of selecting and procuring the films shown. He voluntarily renders this service in addition to his regular school activities and, by daily trips down town, keeps in close touch with films being exhibited at various play-houses. He allows no film to be shown at the school until he has first seen it or knows it to be absolutely suitable.

At first there was little uniformity among the film exchanges in their methods of dealing with each other and this lack of organization among themselves made it difficult for an outside organization to have satisfactory dealings with them. After three years' experience with these exchanges our representative has succeeded in developing a certain policy to govern the school dealings with them, and better organization among the exchanges themselves has made it possible to secure better co-operation and a more favorable attitude in general towards school movies. This has resulted in securing many fine films at a much lower rate than is possible for the ordinary moving-picture houses.

The aim is education tho there are many films shown which are purely recreational. These recreational films are usually shown in connection with films of a strictly serious nature and are usually of the nature of animated cartoons.

The following will serve as examples of the films shown:

- 20,000 leagues under the seas (8 reels).
- Pudd'nhead Wilson (5 reels).
- Vicar of Wakefield (8 reels).
- Molly-make-believe (5 reels)—Marguerite Clark.
- Cinderella (5 reels)—Mary Pickford.
- Silas Marner (7 reels)—Frederick Warde.
- Last days of Pompeii (9 reels).

Those of a more serious nature have included the Burton Holmes travelogs, the Living Book of Nature, Travels in South America, The Pathé News and many films

of current war interest such as the use of aeroplanes in France. The large railroads of the country have voluntarily loaned many beautiful colored slides to use in connection with their travel films. Many government films have also been shown to illustrate the development of various sections of our country but, on account of their highly technical tendency, they are not as popular as we wish they were. They are sent to us at irregular intervals and are often scheduled elsewhere within a limited time so that the regular film often has to be suspended temporarily.

The movies are shown at noon in the auditorium and it is estimated that 90 per cent of the entire student body of over 2000 voluntarily attend each day. The three lunch periods are lengthened a few minutes making it possible to show one reel at the end of each lunch period, and these fifteen minutes spent in noon-day movies has, in many cases, proved the only source of entertainment in which pupils can afford to indulge. The interest manifested at each assembly has made the matter of discipline very simple, tho there is careful supervision by one of the teachers.

The financial end is met by a voluntary contribution once each year, the small sum of five cents being solicited from the pupils of each home-room wishing to contribute.

In these days when there is such a wide spread enthusiasm for the moving-picture it is interesting to note the reaction on the reading of our school movie-fans.

In our high school library it has been most interesting to follow the influence which the pictures have exerted because we have had advance notice of the film to be shown and have prepared our available book material to meet the demand. A slide was made which called attention to books in East Technical Library on the subject of the film to be shown and this slide is run on daily before the reel. This has stimulated an interest in many standard books which high school pupils too often consider dull and has brought to the library many who wish to read only after seeing the story in picture form.

EDITH L. COOK, *Librarian,*
East Technical High School.

THE MOTION PICTURE AS A SUBJECT FOR DISCUSSION IN SCHOOLS

"Has not the time arrived for including the motion picture as a subject for discussion in the upper grades of grammar schools and in high schools?" asks H. F. Sherwood in a letter to the *Journal of Education* for Dec 27. "The drama and various other forms of art are not considered unsuitable for such purposes. The motion picture touches the lives of more people than any other art form. It is becoming more and more a family entertainment. Why should not young people learn something about the good qualities of motion pictures thru discussion, in order that their tastes may be developed in the support of the better types of photo-plays? One of the valuable things about special performances of suitable films for young people is the re-action upon the production of good motion pictures. We are not going to be able to prevent people from going to see motion pictures. Therefore it is important that constructive means be devised and adopted of stimulating support of the better types.

"Last fall a series of posters prepared for the National Committee for Better Films (a committee of the National Board of Review of Motion Pictures) was put on exhibition at the Hebrew Technical School for Girls, Second avenue and 15th street, New York City. The girls were taken by classes to look at the posters and voted upon their merits from their points of view. The teachers also conducted discussions of the question of motion pictures and the kinds of pictures which they liked. The exhibition was closed on Oct. 19, when, upon invitation of the principal, a member of the staff of the National Board of Review of Motion Pictures addressed several hundred of the students ranging from thirteen to fifteen years of age in the auditorium on the subject of motion pictures. A larger part of the half-hour occupied was given up to the asking of questions which would lead the girls to express their views regarding pictures—the kind which chiefly interested them. The reasons for their interest were brought out as a basis for discussion of the question of what constituted good motion pictures. The answers to the

questions as to why certain films were liked were very much to the point and while the exact term was not always used the idea was clearly expressed. Following the stimulating discussion, the speaker talked about the constructive attitude toward photo-plays and answered questions. A markedly wholesome and sane attitude toward motion pictures had been developed by their month's discussion of the subject. The students seemed to be very keen in their interest and enthusiasm."

A VIRGINIA HIGH SCHOOL LIBRARY

We have recently received an interesting letter from Miss Julia Graham Aunspaugh, for several years an enthusiastic teacher-librarian in the Maury High School of Norfolk, Va. School libraries in the South are few and far between, and Miss Aunspaugh has worked unceasingly and unselfishly for the best interest of the one in her own high school—even to the recommendation of a trained librarian to supplant her in her position! She says in her letter:

During the session of 1911-1912, a literary society in the city gave to the New High School a small collection of novels which they had collected. This became the nucleus of the library. In the new \$250,000 building, a room had been planned for a library furnished with Wernicke cases, large tables, and chairs for about 37 students. In 1912 a teacher was appointed by the school board to keep the library open before school, after school, and at recess, with a small remuneration of \$15 a month. Later two teachers were appointed to share the work at \$10 extra a month.

The books first bought were those on the list recommended for High Schools by the National Council of Teachers of English. Later we secured those on the list of the Education Board of the United States and Canada, which comprises many excellent stories of adventure on the frontier and in foreign lands by our missionaries. With these were also many books asked for by the teachers and heads of departments. The School Board always allowed \$35 or more for magazines and the Reader's Guide.

In 1913-14 we bought about \$300 worth of books; in 1914-15 we were allowed \$200 a year for books. In 1916-17, due to certain changes in administration, we were unable to purchase more than \$5 worth of books, instead of \$200 that the board allowed. It is to be hoped that we will be able to make that up this year.

The School Board sent one of the librarians to New York to attend the Library Exhibit for Schools held in connection with the National Council of Teachers of English. She arranged for this exhibit to be sent to the Norfolk Maury High School in January, and it was an eye-opener to many of the teachers who studied it—they spent hours and hours taking valuable notes from it.

In her report the teacher-librarian recommended that a regular librarian be employed to give all her time to the work of the High School Library. This recommendation was acted on and a librarian who had been in the Norfolk City Library for about 20 years was employed this year with a salary of a regular teacher. The library grew in about three years to nearly 1300 books.

We have arranged a card catalog and the books are being gradually arranged by the Dewey system. Unfortunately this system was not begun by the first teacher-librarian.

The number of pupils who used the library one month this session was 5067. The number of books taken out by them in one month was 1298. The library is far too small to accommodate the pupils who flock in there every period, and the librarian is kept busy helping them find references. Some library lessons are given in the library. The library is far from ideal but last December I was proud to see that it was the only school library on the National Council map of high school libraries from Baltimore to Texas. I do not mean that I was proud of the South in her lack of library work but that I was proud to claim recognition for our library.

We have in the city of Norfolk a Carnegie Library, and a beautiful branch library of that just across from the High School, but it is not anything like so complete as our high school library, nor is it used so much as ours with our 1700 pupils.

Among the teachers who attended the High School Library Exhibit in November was one from Hampton who has charge of the school library here. Several of our Grammar School Principals have also made good beginnings for libraries in their schools and were keen to get all the information possible. You see, therefore, that Norfolk is in the lead in regard to Libraries in High Schools.

A NUMBER of centennials occurring in 1918 deserve notice. The U. S. flag was adopted by Congress on April 4, 1918; the adopted by Congress on April 4, 1818; the ruple alliance between Great Britain, France, Austria, and Holland was formed in 1718; Richard Lovelace and Abraham Cowley were born in 1618; and Paul Revere died May 10, 1818.

CHILDREN'S ROOM AT GENESEO NORMAL SCHOOL

THE new children's room was formally opened on Thursday afternoon, November 1, and altho the equipment was not yet complete, the room was decidedly attractive, with a bright fire burning in the fireplace, lighted candles in brass candlesticks on the mantel, and with the window seats, ingle nook and even the floor filled with groups of eager children.

The room has attractive oak woodwork with a dull finish; the walls are a deep cream, almost yellow, and with delft blue hangings at the windows, a charming color scheme has been worked out. The pictures have been chosen primarily for their appeal to the children, but the deep blue of "The vision" and the same shade in the Volland prints carry out this same color harmony. Low book shelves, filled with favorites, and a special case of the lovely illustrated editions, really furnish the room.

The opening day was made one long-to-be-remembered by the presence of Miss Zachert of Rochester. Three groups of children, including the entire practice school, were entertained during the afternoon by stories, told as only Miss Zachert knows how to tell them. The fifth grade have shown their appreciation of the stories and their new room by some very interesting letters written during their English period. The grades were given a welcome by Miss Richardson and made to feel that the room is their very own. They have shown that they appreciated this welcome by the joy they have taken in the room during their library hours.

Here is one of the letters written by a fifth grade child the day following the opening of the room.

The children's new library is a lovely success. It has a lovely fireplace in the front of the room—it makes the room so homelike. I'm sure the children will enjoy it. I know I will. Thursday afternoon, Miss Zachert told the children stories. One was "Robin Good-fellow," second "St. Anthony," and the third story was "The three sillies." They were all very, very good.

There are pretty blue curtains up at the windows. In the center of the room there are two poles and little seats are attached to the poles. There are lovely benches or window seats for the children to sit on. On the mantel there are two white candles. The electric lights are like moonbeams. I thank all those who helped make and plan the children's library.

In the evening of the opening day, the faculty and town people were invited to the same room to become acquainted with it and to hear Miss Zachert, who talked about the selection of children's books and told more delightful stories.

The day helped greatly in making the children and teachers as well feel at home in the new room, and in establishing the right atmosphere for the work that it is hoped can be accomplished thru library hours and similar periods.

THE NEED FOR ADEQUATE LIBRARIES

TESTIMONY to the value of libraries and reading was given by the scholar Edward Everett many years ago:

"We provide our children with the elements of learning and science, and put it in their power by independent study and research to make further acquisition of useful knowledge from books, but where are they to find the books in which it is contained? Here the noble principle of equality sadly fails. The sons of the wealthy alone have access to well-stored libraries, while those whose means do not allow them to purchase books are too often debarred from them at the moment when they would be most useful. We give them an elementary education, impart to them a taste and inspire them with an earnest desire for further attainment—which unite in making books a necessary of intellectual life—and then make no provision for supplying them. I would not overrate the importance of book-learning. It is of little value without original inquiry and original thought. But good books are the record of the original inquiry and thought of able men, which surely do not lose their value by being put upon paper for the benefit of others. Everyone regards an opportunity of personal intercourse with men eminent for

talent and learning as a great privilege and source of improvement—to study their works is most effectually to cultivate this intercourse. It is generally impossible, from the nature of the case, to have personal intercourse with any persons of eminence, except a very few of our own countrymen and contemporaries. By books we get access to the great men of every country and every age.”

School Library Question Box

How many war books would you buy for a high school library?

Answering for the small town high school which has normally a limited book fund, one would say that the selection should be carefully made with some reference to permanence of interest, and that much of the demand should be cared for thru bulletins, periodicals and pamphlets.

The list given in the *Wisconsin Library Bulletin* for June, 1917, gives a good foundation for school as well as public library use. For further material books may be borrowed from the public library or from the state library commission.

The following list is suggested as a minimum:

Benezet, Story of the map of Europe.
Bingham, Handbook of the European war, v. 2.
Hazen, Europe since 1815.
Hazen, Modern European history.
Hazen, Political and social history of modern Europe.
Sheip, Handbook of the European war, v. 1.

Statesman's year book.
World almanac.

Boardman, Under the Red Cross flag.
Clarke, Treasury of war poetry.
Garey & Ellis, Junior Plattsburg manual.
Wells, Mr. Britling sees it through.
Wilson, President Wilson's great speeches.

Personal Accounts

Aldrich, Hilltop on the Marne.
Empy, Over the top.
Peat, Private Peat.

Magazines

Current History Magazine.
Literary Digest.
Red Cross Magazine.
World's Work.

WAR BOOKS FOR HIGH SCHOOLS

THE following list of war books for high school use was prepared by Bessie Sargeant Smith, supervisor of high school libraries and smaller branches for the Public Library of Cleveland:

Aldrich, Hilltop on the Marne.
Ayscough, French windows.
Beith, All in it.
Beith, The first hundred thousand.
Bell, First Canadians in France.
Benjamin, Private Gaspard.
Boyd, With a field ambulance at Ypres.
Brooks, The fighting men.
Buchan, Battle of the Somme.
Buswell, Ambulance No. 10.
Cheradame, Pan-German plot unmasked.
Cobb, "Speaking of Prussians."
Cohen, The Ruhleben prison camp.
Davis, With the French in France.
Dawson, Carry on.
Empy, "Over the top."
Fitzgerald, "Mademoiselle Miss."
French, At Plattsburg.
Gallishaw, Trenching at Gallipoli.
Gerald, The war, Madame.
Gerard, My four years in Germany.
Gibson, Journal from our legation in Belgium.
Hankey, Student in arms.
Huard, My home in the field of honour.
Hunt, War bread.
Irwin, The Latin at war.
Joffre, General Joffre and his battles.
MacQuarrie, How to live at the front.
Masfield, Gallipoli.
Mortimer, A green tent in Flanders.
Peat, Private Peat.
Pier, The Plattsburgers.
Powell, Italy at war.
Seeger, Letters and diary.
Sheahan, A volunteer Poilu.
Sheahan, Soldier of France.
Stevenson, At the front in a flivver.
Stobard, Flaming sword in Serbia.
Turcynowicz, When the Prussians came to Poland.
Ward, Mr. Poilu.
Wells, Mr. Britling sees it through.
Wilson, Why we are at war.
Wood, Note-book of an intelligence officer.

THE Bureau of Occupation established by Hunter College in New York City is attempting to supply college women, both graduates and undergraduates, for both full and part-time positions. In the long list of occupations given on their circular of information, indexing, library work and filing are all included. A registration card is kept for each graduate wishing to make use of the bureau.

2020

Opening the campaign for books in front of the New York Public Library. John Foster Carr, who directed the publicity end of the campaign, is telling the crowd that has gathered of the necessity for sending large quantities of books to the men in the army and navy

THE LIBRARY JOURNAL

Vol. 43

APRIL, 1918

No. 4

THE book drive was duly inaugurated with book week, March 18-23, of which the results have not yet been reported and tabulated; but it should not be forgotten that the campaign is to be a continuous one, of which that effort was only the initial push. The facilities arranged by General Pershing for book space on transports emphasize both the need and the opportunity for a supply of books to our troops already abroad in large numbers, and the new draft makes it evident that there will be an increasing demand at home as well. Many books will be worn out and many will be lost, and the public will have to be repeatedly urged to pass on their books as fast as read. The campaign ends only with the war.

THE great need within our home camps at this writing is for librarians of the higher grades who will succeed and supplement the librarians who have been in charge of the organizing work. The camp requirements call for the best qualities of library service; service at the top. For problems of human nature as well as of books are very insistent in what are now great centers of library population. Many library boards have been very liberal in permitting leaves of absence of their most important people for the early work at the camps, but we must have more and more of those who are used to dealing with large library problems, and it is to be hoped that the supply can be continued by further liberality on the part of trustees. It was at first understood that women would be debarred from the camps, but their experience and usefulness could not be overlooked, and some of the best women in the profession are already at work at the camps, in the dispatch offices and in base hospitals. Particularly in this latter field the services of women will be peculiarly valuable, far superior to what men can do.

It is gratifying that the relation of women in the American library field is now to be fully recognized by the war authorities. The mistake should not be made of relegating superior women to inferior work on the supposition that the work of women is inferior to that of men, in face of the reputation won by so many women in A. L. A. circles for the highest type of efficiency.

THE value of civil service examinations for higher positions has again been demonstrated in Chicago, which has thus been saved from spoils domination of its library system. Henry E. Legler came to the front thru this method and now his chief associate, Carl B. Roden, has won first rank in the recent examination for the post left vacant by Mr. Legler's too-early death. Mr. Roden had, of course, the great advantage of long local experience, which rightly counts for much in such an examination. The significant thing is that Everett R. Perry of Los Angeles, and Chalmers Hadley of Denver, men of large experience and of high place in these two cities of the next rank, announced themselves as candidates in the competition for what is one of the greatest library posts in the country, and made a good second and third to Mr. Roden's first. There could not be better testimony of the value of a system which is often decried on the ground that it does well enough for minor posts, but that it repels men of large ability and experience from applying for opportunities, however great, in this way. Incidentally, the danger that there might be appointed a local political editor, a favorite of Chicago's mayor, who had resigned from his former position to become a candidate for the post, tho without library qualifications, seems quite to have vanished. This is all as it should be, and both Chicago and the library pro-

profession are to be congratulated that this good method has produced so good a result.

THE vexed question of how books and pamphlets should be differentiated and counted will perhaps remain an open question so long as there are books and pamphlets and libraries. The A. L. A. rule on this subject has been challenged for various reasons, and several methods are in use by different classes of libraries, as summarized by Mr. Currier in his paper. It is generally recognized that a pamphlet is a publication without cloth binding and below a stated number of pages, which may be fifty or a hundred, or other. But now Harvard proposes to minimize the distinction between books and pamphlets in its statistics. It is quite true that a minor pamphlet may be of as much use to a scholar as a great big book, and sometimes in questions of minute research, of much more use. Nevertheless, some distinction between a book and a pamphlet seems natural, and on the whole advisable. Librarians will read, therefore, with much interest the statement by Mr. Currier of the new Harvard rules, even tho the new method may not commend itself to librarians in general.

THE founding of library schools emphasized the view that librarianship is properly a learned profession, and the development of that profession has called for a higher evolution in professional education. This has led to the suggestion of graduate library schools or graduate courses in library work in universities, a suggestion which received emphatic approval at the Institute meeting at Atlantic City. Miss Plummer's original plan of organization for the New York Public Library School had this higher education in mind, but the present suggestion carries her thought a step further on. It may rightly take shape either in post-graduate courses in library schools proper or in post-graduate work in the library field in our universities and colleges.

The suggestion is in itself interesting evidence of the closer interlocking of universities and libraries, and the view that this work should be done thru the universities in the great cities where there are also large public libraries and that post-graduate students may properly go from one such university to another for wider experience, is thoroly in harmony with modern ideas in professional education. The discussion of the project is only in its first stages, but doubtless it will work out to good results and make the calling of the librarian in its higher reaches another example of a highly specialized profession. In this connection Mr. Jennings' plea for larger opportunities for library assistants in colleges and universities has special relation. The concomitant suggestion from Doctor Lichtenstein that a special librarian should follow the books in his special department thru their several stages of ordering and cataloging, instead of relying upon the more mechanical work of order and catalog departments, opens a question of no little practical importance, well worthy of discussion.

THE public library system has done splendid service in informing and inspiring the new citizenry which it receives from abroad, and Mr. Carr's Immigrant Publication Society has been of the greatest helpfulness in furnishing material for this work. Its latest pamphlet on "Winning friends and citizens for America" by Mrs. Eleanor E. Ledbetter of the Cleveland Public Library, is especially useful in its uplift and practical character, and nowadays, as one state after another adopts woman suffrage, it should be the function of the library to supply the woman voter, new to citizenship, with the books which will acquaint her with the principles of civics and the practices of politics. Library purchases should be generous in this direction, supplementing fully the work which women's clubs and political organizations are undertaking.

LIBRARIANSHIP AS A PROFESSION IN COLLEGE AND UNIVERSITY LIBRARIES

BY J. T. JENNINGS, *Reference Librarian, Iowa State College*

A PROFESSION is defined in our dictionaries as "a calling that involves a liberal education," "an occupation involving special discipline," "a calling in which one professes to have acquired some special knowledge to be used in instructing, guiding or advising others, or of serving them in some art." All of these definitions of a profession show that it involves standards of attainment which determine one's fitness to enter the ranks, as was the case even when theology, law and medicine were the only recognized professions.

That librarianship be recognized as a profession, with standards that put it on a level with related professions, is a goal which every earnest librarian hopes to see reached. How far we now are from such a goal is shown by the meaningless title, "librarian." This word may be used as a general term including all persons engaged in library work, or it may mean the head of a great organization; it may connote high scholarship and great service to a community or even to the whole nation; but it may also be applied to a person with very limited education whose chief recommendation to a place in library work was the need of a genteel job. This lack of definite standards is the most serious obstacle to a recognized library profession.

In college and university libraries, however, there is a standard by which we may measure ourselves, and here we should expect to see the library staff solving the professional problem. Working side by side with college teachers, whose status has slowly crystallized into a certain recognized order, we realize the shortcomings and the disadvantages of our standing—or lack of standing.

In the older universities and the larger colleges very few new men receive appointments to professorships who have not already the degree of Doctor of Philosophy. In some universities practically no instructors are appointed who do not already have a doctor's degree, or who are not well on

the way toward that degree. This is not an iron clad rule, or should not be, as it would be a calamity if the men of special genius who have not received the stamp of the educational mill should therefore be lost to the service of higher education. It should always be remembered that the degree is but the stamp and not the coin—"the man's the gold for a' that." But, in general, the degree marks a standard of scholarship and endeavor which, in connection with teaching ability, sets this man above his fellow of equal ability minus the higher training which the degree denotes.

In the smaller colleges and in some universities the higher degrees are not demanded for entering the ranks of college teachers. Many instructors have the master's degree, some only the bachelor's degree. Of these latter the larger number are in professional schools, of law, medicine, home economics, etc., for which special technical training is required beyond, or in connection with, that of the usual course leading to the bachelor's degree.

There is one great factor, however, that is noted in every rank of the college and university teaching force: every one is expected to be alive and growing, every one is encouraged to advance in his line. If he does not progress he is soon a "back number" in his profession. The young instructor who has not his advanced degree is urged to work toward it. "We shall tell him that if he expects to be really valuable, he must not stop with the bachelor's degree, but he must do much in addition and do it so well that he will inevitably and in good time achieve the doctorate."* Summer school courses are planned to meet his needs. Most universities which hold summer sessions definitely offer certain credits toward advanced degrees for work done in the summer school. And the long vacation granted to the teacher gives him the coveted opportunity for

* Eugene Davenport: The outlook for agricultural science. *Science*: v. 45, p. 149, Feb. 16, 1917.

higher study. Thus the incentive of advancement in position and salary, the allowance of time for undisturbed study, and the opportunity afforded by summer schools are a trinity of inspiration to achievement.

If the higher degrees have already been earned the professor is expected, by scholarly research and original investigation, to keep on growing. He is expected to publish the results of such work, a tangible witness to his activity. For this purpose the hours of teaching are limited and long vacations are granted, with the sabbatical year as a special occasion for the renewal of vigor and a special opportunity for advanced study.

This is the spirit of the organization of the teaching profession. The staff of the library of such an institution should be the equal of the public it serves, both in obligation and opportunity—indeed it must be, if it also is to rank as a profession equally worthy and dignified.

But what is the professional standing of the library staff in the college and university community? In the past forty years the librarian's position has advanced in dignity, in importance, in salary. In place of the custodian of books with his mind buried in the dusty dimness of the past, the present librarian is recognized as the head of one of the most important college departments, an administrator, an executive. He is responsible for the use of large sums of money for books and salaries, and for the organization of a worthy staff. He is justly on a par with heads of departments and recognized as their equal in faculty and committees. Therefore he must be a scholar, a man of wide culture. He attends the meetings of the national, state and local societies of his profession, and is expected to contribute something to its literature.

Such should be, and in many cases is the status of the librarian, measured by the same standards as his teaching colleagues. But what about the remainder of the library staff? With the exception of a possible assistant librarian they are usually considered "mere clerks," as is shown by their salaries, their hours of work, and

the attitude of their superiors toward granting them opportunities for advancement.

Why is this?

These assistants in college and university libraries are almost invariably college graduates with one or two years of training in library schools, or with some years of service in libraries. This training might put them on a level of scholarship with most of the young instructors in the small colleges. It could hardly be claimed that one year in a library school is equivalent to the year's study for the master's degree, since the library school work is not the continuation of a special line of study already well developed. Perhaps we might fairly assume that a two-year course in a library school, highly technical tho it is, adds as much to one's attainment as the usual one year of graduate study required for the master's degree.

These enthusiastic young workers start out in the service of the college brimming over with library spirit and zeal, feeling themselves, both in their preparation and in the service they render to the institution, fairly on a level with the young teachers starting at the same time and in the same college in the instructor's ranks.

At the end of, say, seven years the young instructor may be well on the way toward his doctorate, having worked toward that end in summer schools; and now the sabbatical leave gives golden leisure to attain the coveted degree. Equipped with the majesty of the Ph.D. and supposing him to be a successful teacher, he will then stand a fair chance of being called to a position of higher rank and salary either in the institution which he has been serving or in another.

At the end of seven years the library assistant is usually not far advanced in scholarship, in rank, or in salary from where he began. Perhaps by good fortune he may have reached the head of order, of cataloging, or of reference department. But the salary received is very meager, generally a third less than that of his teaching colleague.

Why has not the library assistant advanced? Why is he not ready to take even

a master's degree? (We are considering now the average, not the exceptional, type of either instructor or library worker.) The chief reasons are lack of opportunity, lack of incentive, lack of encouragement from the "man higher up."

The lack of opportunity for advance in scholarship is one of the greatest drawbacks to entering the library profession as now organized. The long day, the short vacation, and no sabbatical opportunity limit the young librarian at a time when his mind should be most active—when daily work shows most clearly his weak points and the need of strengthening his armor if he is to win in the battle.

But it may be objected that there is no need of advanced scholarship for catalogers, classifiers, or reference librarians. Only absolute ignorance of what such work demands in training, knowledge, and judgment could allow such an objection to be considered.

The conscientious reference librarian knows that every particle of knowledge is an asset in his service. He knows that to be thoroly acquainted with one subject in all its branches would be a background which would help in searching out knowledge in many lines for his public. In under-graduate work it is almost impossible to get such a grasp of any one subject. Along with the day's work of a busy reference librarian these attainments are impossible. The nature of the work is such that one leads others to fountains of which one may not stop to drink. What reference librarian does not constantly feel himself skating over the thin ice of his own knowledge, often feeling it crack beneath him and sometimes giving way to plunge him into the chilly waters of ignorance below? And with what longing he looks for an opportunity to broaden and strengthen the foundations of his knowledge, especially along the economic and historic lines.

And the cataloger and classifier! How many regard them as mere copyists daintily handling clean, fresh books, leisurely absorbing their thrilling contents, and then handing them on to the waiting throng,

after typing a simple name and title on a fair white card. "I should think anybody could catalog any book in ten minutes," remarked one shocked trustee when the services of an extra cataloger were asked for. Let anyone who has tried it answer. What a feeling of utter helplessness comes over one when confronted with piles of books in unknown tongues, with pamphlets on all the ramifications of modern science, with treatises on the subtleties of philosophy, or a thesis on some untraceable medieval poet. Like the sight-seers on the rim of a canyon who cling to the branches of the stunted trees, lest a gust of wind dash them down into the chasm, so the conscientious classifier and cataloger cling to the branches of their frail tree of knowledge, dreading in each new arrival of books the blow that may plunge them into the depths of the unknown. And was there ever a professor or librarian who was not shocked beyond—well, *not* beyond words, to express his amazement at finding a mistake in the catalog! He has never learned by experience the sorrowful truth here misquoted, "If any man hath a conceit of accuracy, and would have it completely taken out of him, let him print a catalogue!"

We do not advocate that library workers should attempt to become superficially omniscient. Superficiality is the bane of the library world. The superficial smattering of several languages, for example, is a necessity to be deplored. To study one or two subjects thoroly, as must be done to attain the higher academic degrees, is to have at least one secure and well stored "base of operations," and adds immeasurably to one's power and efficiency in many lines. One foreign language well mastered furnishes a key to others; one science whose principles are thoroly familiar gives a foundation for intelligent judgment in others. Every line of study and investigation followed out into all its branches leads the student into understanding contact with many other subjects in the wide field of knowledge.

We do not for a moment forget the splendid work which has been done in the

library world by men and women who have not had advanced college training. Their earnest work makes our own progress not only possible but imperative. Each generation of workers must be better equipped to enable them to meet the higher demands which will be made upon them. They cannot advance unless they are better prepared than were their predecessors.

For this reason the workers in the college library need more thoro knowledge; they need advanced work in special lines, and they will be better workers for it. Why can they not have vacations long enough to allow the pursuit of some needed subject in the summer school? In addition to the wealth of studies offered for advanced work, the demand would lead to the establishment of courses especially designed for librarians. For example, courses in the bibliography of great epochs in history and in the history and bibliography of the various sciences, are now given during the regular year's work of the best universities. Such courses, by men who are authorities in these subjects, might be given in the summer schools. This intensive work in the bibliographies of important subjects is one of the great needs in progressive library work. This need is not met by the technical library school, possibly because only the experienced worker is prepared to profit by such instruction.

There are also many cases where more thoro knowledge in special lines is imperative if the best work is to be done. Perhaps the cataloger needs, on account of the awakening interest in our southern neighbors, a better knowledge of Spanish than could be squeezed into her undergraduate course; or she needs to add to her classics a course in medieval Latin as a help toward cataloging a collection of manuscripts; the classifier is called upon to work with a valuable collection in some science of special interest in her college days: why not an advanced course at the best summer school in the country? The reference librarian who has been snatching a few crumbs while serving others all the college year, needs and deserves a chance to sit down to the feast himself—

to get at the foundations of the great economic and political changes. Why can't they do it? "Because libraries can't afford it," is the answer. "It is absolutely impossible. It would bankrupt the institution."

It does not bankrupt the institution to allow the teachers the summer vacations. Why shouldn't provision be made for those of the library staff who are eager to study?

One reason is that books keep coming all summer and students do not. But the situation could be met exactly as it is in most summer schools—by providing extra help during that period. Certainly it would cost money, but that money would be repaid with interest in brain power, in ambition, in incentive to higher endeavor, in more efficient service to the library. Allowing time in the summer for those who wish seriously to study in some line which will benefit their work is only to the self-interest of the library.

Why do not librarians advocate this opportunity for their assistants who show desire for improvement? There are three reasons: First of all, the librarian is under constant pressure to keep down the cost of the library service. Trustees and executive committees can see the force of arguments for buying books. Books are permanent, valuable; they last. But, having books, why do you need anything else? The service necessary to make the books usable is intangible. Its value is not physically self-evident as is the book itself. The service is not once rendered and done; it must be repeated day after day, year after year. "Isn't the catalog done yet?" is the perennial demand of the trustee who knows nothing of the routine of a library. Now, the librarian's success is largely measured by how much he can get for his small appropriation, and he may be more influenced by this than he is himself aware. He may crowd his workers with more than they can do well and thus reduce their efficiency. If more work is demanded than the force at hand can do properly, either the work or the force suffers, or both suffer.

The librarian's position is a hard one. He dreads the mortification of having his recommendations "turned down." He

wishes to avoid the loss of prestige with his board that would follow if they should get into the habit of slighting his requests—as they surely will if they suspect him of exceeding his necessary budget. He must be able to convince the finance committee that every penny asked for will be a “paying” investment. However much he may have the welfare of the library at heart, it takes courage to say frankly to the board of trustees or an executive committee, “I can not run the library on the money you allow me and do it well.” Even if he has excellent reasons to support his contention, some board members may not understand the need. There is always the possibility of the reply, “Well, if you can’t do it, we’ll get some one that can.”

On the other hand the trustees, who are the guardians of the college treasury, must be constantly on the watch against extravagant demands from every department of the institution. “The *lack* of money is the root of all evil,” must be the sentiment of many a harassed college trustee.

But all this does not relieve the librarian of his responsibility. By accepting that position he assumes its responsibilities, and one of the greatest of these is to fight for fair play for those beneath him in rank. The man higher up always, by that very position, has a power over and a duty toward his subordinates. He should try to make their standard high and then give them a chance to advance to it. “To employ anybody without offering him a chance and training for promotion is a biological blunder, a financial waste and a moral crime.”* It is just as much a duty to give the man lower down a chance as it is to see that the funds of the university are wisely used. In fact, to give the man lower down a chance to improve *is* to see that part of the university funds are wisely used.

A second reason why the librarian does not ask for more opportunity for his assistants is that he has a rather poor opinion of them, simply because he has seen their faulty beginnings. He knows so well their failings and mistakes that he gets to feel that they are really not of the same mental caliber as himself—forgetting (as who does

not!) what manner of man he was at the same stage in his career.

How many librarians are inspirers of their assistants? How many are there who watch for opportunities for their assistants to work ahead? Who encourage a faltering ambition? Who urge them to perfect and publish the paper or bibliography which might be made worthy? One unusually successful young librarian said, “When I was working in the University library I had a call to a better paying position in a small place. The librarian advised me against it; he urged the advantage of contact with a great collection of books, which we had; he urged me to work on bibliographies; to publish even small articles; and to do this I must have access to the best books. His advice and his inspiration saved me from years of labor in a small library, where all my strength would have been used up in mere routine, where there would have been neither incentive nor opportunity for study.” Happy is the assistant who is associated with such a chief.

On the other hand, how many young library assistants lose their first fresh enthusiasm and settle down to work along contentedly, happily occupied with activities which lead to no high goal, utterly unconscious that the opportunities open only to youth are fast slipping by. If the awakening comes too late, many are the bitter, if silent, reproaches against those in authority, older and experienced, who must have seen and understood, but who were too indifferent, too selfish, or too timid to warn the satisfied workers of their danger. Fate weaves no tragedies more bitter than those wrought by the happy ignorance of youth, because none could more easily have been avoided and none are so absolutely irreparable. The librarian who allows the members of his staff to become satisfied with themselves is doing them a great injury.

Not every assistant will answer the call to “come up higher” in the profession. In spite of the best efforts of the best librarian, some member of the staff may be too indifferent, too lazy, too much interested in

* E. E. Purinton: What makes a factory great? *Independent*: Feb. 19, 1917.

outside affairs, too incompetent, or too complacently conceited to respond. The fire of enthusiasm can not kindle a responsive flame in the petrified wood among the library staff, if such be there. But the live and vigorous members should not therefore be dwarfed and stunted. They should be given chance and encouragement to grow.

The third reason for lack of opportunity for advancement is that probably ninety per cent of the library assistants are women, and women are still at a great economic disadvantage when compared with men. Probably the librarian would say that their lack of professional stability is reason enough for lack of encouragement to higher attainment. This is (or was) an undoubted drawback, but it is one which is growing steadily less. Women are taking a deeper interest in, and a more serious attitude toward, their industrial position. Indeed, that position is becoming more vital every year as industrial competition becomes keener. Therefore this objection is a factor of diminishing value. But even when long and distinguished service would seem to entitle the woman library worker to equal consideration with her male colleague she is almost invariably assigned to a lower rank and salary than a man of even smaller ability would have in doing the same work. The injustice of this is manifest to every fair mind—at least, to every fair feminine mind.

The classifiers and the catalogers are not mere artisans. If they live up to their profession, they are creative workers, they are artists. Witness the catalogs which we have inherited from bibliographers of the past, who had *time*; witness also such work as the catalogs of the Dante and Petrarch collections of Cornell University Library. Not that ceaseless drudgery can be eliminated; but for this very reason the breathing spell, the time for renewal of energy, the opportunity for refreshing the brain are so vitally necessary. Otherwise the power of originality will be crushed by the weight of routine, the artist will be sunk in the artisan. We have already seen how widespread, even among educators and librarians, is the belief that thoro scholarship is not needed for this part of library

work. All a cataloger needs to know of a foreign language is enough to use the grammar and the dictionary. All a reference librarian needs to know is where to find certain books, and he can grind out knowledge as the organ grinder plays his tunes.

A young instructor in mathematics once wrote to a well-known professor, an unusually successful teacher, asking, "What are the three fundamental pedagogical principles in the teaching of geometry?"

The answer was, "First: Know your subject."

"Second: Know your subject."

"Third: Know your subject."

And in library work scholarship, thoro scholarship, is needed. The whole trend of the day's work is toward superficiality. The cataloger and classifier learn to skim thru books; the reference librarian is forever prospecting for knowledge, but the other party digs out the gold.

For this reason we advocate, as the next step toward the professional goal, the opportunity to attend summer schools of high standing in addition to at least a part of vacation, and without loss of pay. It will pay the library in the quickened brain and habit of thoroness. And if anyone of the staff is anxious to use his vacation for this purpose, the allowance of extra time will not be a hardship to those who do not so desire to study. It would be an incentive to all the staff. The library could easily protect itself from exploitation by granting this privilege only when the course of study to be taken should be of a quantity and quality to meet the approval of the library authorities. A certificate of good work would determine whether the favor was to be granted again.

The advance toward a recognized professional standing for librarians must first be attained in the highest of its ranks; then only can we hope to extend such recognition. This highest rank of scholarship, together with a standard for measurement, is generally found in the college and university libraries. There the librarian, and his staff, may be roughly compared with heads of departments, professors, assistant professors and instructors. In order to

attain equal rank, the members of the library force must equal their teaching colleagues in scholarship and in productivity along their special lines. For such attainments opportunities should be open to them, giving the library workers a chance at least partly commensurate with that of the teaching force. They should be given the incentive of a salary in keeping with their attainments.

Upon whom then chiefly depends the next step toward the recognition of librarianship as a profession? Upon the present college or university librarian who has "arrived" at the head of a scholarly call-

ing, whose power as mediator before the board of trustees or library committee may be used to convince them of the needs of his human equipment as well as the needs of his material equipment. He may urge upon his board that investment in living brain power is just as necessary as the investment in brain power stored between the covers of a book; and that money so invested returns a high interest in efficiency. For no factor in efficiency can equal that of the consciousness of power to advance, with the assurance of the opportunity for such advancement and the hope of a fair reward.

THE QUESTION OF A GRADUATE LIBRARY SCHOOL

BY DR. WALTER LICHTENSTEIN, *Librarian, Northwestern University*

At the recent meeting of the American Library Institute at Atlantic City the question of the desirability of establishing a graduate school for librarians was discussed. The idea involved is, of course, not a novel one, and there is much to be said for such a plan, especially if intended to train assistants for university and reference libraries. No one who has seriously considered the question will deny that the work required by librarians in university and reference libraries is in many respects very different from what is needed in most public libraries. Also it is not incorrect to say that in general our present library schools train library assistants rather for public libraries than for university and reference libraries. This is as it should be, for after all the demand of the public libraries for assistants far exceeds that of all other classes.

While certain fundamental and elementary knowledge which ought to be the common property of all librarians is well taught in many of our present library schools, nevertheless, more and more, certain libraries find that graduation from library school does not of necessity qualify for the higher grades of library work. An amount of specialized knowledge in some field or other, linguistic, technical, or the like, is needed, and this want the library schools obviously do not supply. The same

criticism made by college professors against the technical pedagogical courses might be made against the library schools, namely, too much stress is placed upon method as opposed to concrete knowledge, and more and more, university and reference libraries will need people with definite and extensive training in some field of human knowledge, even at the expense of a preliminary ignorance of cataloging rules and the like. In Europe such training is more or less provided by schools like the *Ecole des Chartes* in France, and the *Institut für österreichische Geschichtsforschung* in Austria. These institutions intended primarily for the training of archivists have also turned out men unusually well equipped to act as librarians. In this country many of our university graduate schools offer almost similar courses, and the question may well be considered whether a Ph.D. in English literature, history, or the like is not all that is needed, especially if there could be combined with such a course some work in cataloging and other technical library activities, or better still, if such a course were taken by a student who has already had a year in some regular library school.

The question, however, that the writer raised at Atlantic City and wishes to discuss here is not whether a graduate library school is desirable, and what form it should

take, but given such a school will it prove sufficiently attractive to induce pupils to enroll for a course of the length of time needed? If not, must libraries be content, in the future as in the past, to train their own assistants for the more special work required, and hence often employ men and women with a good general education, but little or no library school training? Or is it perhaps possible to make changes in our methods of library administration so as to induce the students to prepare themselves for work in university and reference libraries?

In answering these questions it is necessary to face some unpleasant facts, especially in considering the position of the library assistants—and to some extent the librarians themselves—in a university or college community. In general, it is not an exaggeration to say that very few library assistants in a university library occupy in reality, whatever it may be on paper, a position at all comparable to that of even the lowest ranks of university teachers. In every way they are made to feel the difference. They are tied down to fixed hours, they have shorter vacations, often they do not receive complimentary tickets to university functions as do the university teachers, etc. In short, the library assistants are regarded in the same light as are the stenographers, bookkeepers, etc., employed by the university, tho the academic training required of the former is far in excess of that required of the usual office employe. The reason for this is not hard to discover. The university teacher is, or wishes to be regarded, as a specialist and as an expert in some field of human knowledge, and he does not regard highly those who have merely a general knowledge and training to offer. Specialization in mechanical and administrative work will not be accepted as a substitute. This may not be right, but we are not concerned with the question of right or wrong, but with the actual state of affairs, whether right or wrong. The result then is that those who have the necessary qualifications as specialists will seek for those positions which will place them on a pedestal in their communities,

and where they will have long vacations, easy hours, title and rank, and compared to the salaries in libraries, a good salary. In his Report for 1908-1909 Mr. Lane of Harvard wrote:

Specialists of . . . type would be desirable on some accounts—men, that is, who have devoted some years to the study of their chosen field, who could be useful as experts in their subjects, and whose help would be sought even by professors. Such men, however, command larger salaries than the Library has been in the habit of paying, and in general are likely to be discontented if all their time is given to the routine of library work, since, having been accustomed to research on their own account, they are apt to feel that they are falling behind if all their labor is given to the service of others. I anticipate that only occasionally shall we find a man of this stamp well fitted for our work. We may, however, sometimes find a man who will be ready to give a certain part of his time to library work of this kind, keeping the rest of his time free; but for the most part, I think we must be content with "specialists" of a humbler kind—men or women, well educated and intelligent, who have attained or may attain to a general familiarity with a subject or group of subjects, and who should be expected to fall back on professors for occasional help or guidance. In almost every department, men are to be found in the teaching staff who are able and willing to give help of this kind, and it is one of the peculiar advantages of a college library that it has assistance of this kind available—an advantage which should not be neglected.

In general, as will be seen from this quotation, the writer agrees entirely with Mr. Lane, but perhaps it may not be necessary to "be content with 'specialists' of a humbler kind" if the whole division of work in our university and reference libraries were altered. What the writer had in mind at Atlantic City was a division of work in libraries by departments of knowledge instead of by processes. A specialist will find an interest in his work if he has full charge of collections on subjects in his chosen field. Moreover, since he will handle all books relating to the field or fields in question to an extent not likely to be true of the individual professor, his bibliographical knowledge of the subject will be or ought to be greater than that of the teacher. This will tend to win him the respect of his teaching colleagues, especially if he can continue productive in the field of scholarship.

Of course, the objection will be raised at once on the score of expense, that "such men command larger salaries than the library has been in the habit of paying." It is true that such men or women will command higher pay than most library assistants do at present, but it is not clear that the total expense will be greater. It is too often forgotten that four times five is just the same as two times ten, or, in other words, if it takes four people of lower grade the same length of time to do a piece of work as it does two people of higher training, obviously the latter group can be paid more than the former without increasing the total expense.

A division of work by processes means endless duplication. The person selecting the book to be ordered must have learned much about the books; the person looking up the title in the catalog for purpose of avoiding duplication goes thru the same process. Then after the book is received: those collating the book, the catalogers, and the classifiers—all more or less must repeat each other's work, and not being specialists must do much which a man or woman trained in the subject does not need to do at all, or can do with the expenditure of much less time and effort.

The experiment of having a specialist in charge of certain collections was actually tried at Harvard, and if it was discontinued, it was chiefly due to the fact that the general arrangements of Library and University allowed of no provision for the exceptional position needed to retain the services of the specialist. But financially, and, perhaps even more important, from a scholastic point of view the experiment was a success: great collections were built up and well arranged at a very low cost, and tho this was by no means due solely because a specialist was in charge, still his presence was probably a contributory factor. Anyone interested need only read Mr. Lane's reports covering the years 1903 to 1909.

It was not the intention of the writer in discussing this question at Atlantic City, and it is not the object of this article to do more than merely suggest that if, as was proposed, the American Library Institute appoint a committee to investigate the possibility of a graduate library school

that the aspects of the question here presented be taken into consideration. There is no idea that the plan here put forth is a solution of the problem.

To recapitulate:

1. No one will pursue a lengthy course of academic training equivalent to that required of university teachers, unless the position to be attained is on a par with that of university teachers.

2. A position in a university or reference library will not be regarded as highly as a teaching position, unless the incumbents of such positions have had a training which will cause them to be regarded by university teachers as equals.

3. The training required would not need to differ materially from that given in our better graduate schools, supplemented by some technical library courses.*

4. Assistants who are specialists of Ph.D. grade could take complete charge of collections within their respective fields of learning, and with slight assistance attend to all library processes. The joy of building up and having complete control of collections would be of interest to highly trained specialists. Their greater knowledge of the books would win them the respect of specialists engaged in teaching, and the question of position and title would tend to disappear.

5. The question of salary could be adjusted satisfactorily, because an arrangement of library work, such as indicated, would prevent much duplication of work, and make possible a material reduction in size of library staffs.

In conclusion it may be stated that the writer is not very sanguine that plans as here outlined can be carried out, but is convinced that most men and women given a Ph.D. training or its equivalent will not enter library work as library assistants, but only as librarians. In European countries where the library assistants are usually doctors of philosophy or the equivalent the existence of an "intellectual proletariat" brings about conditions so different from those prevalent in this country that no parallels can be drawn.

* In the larger libraries a certain amount of routine work would probably be done by a lower rank of assistants (Mr. Lane's class B in Report for 1908-1909).

SUGGESTIONS TO LIBRARIANS FOR A MORE LITERARY FORM OF REPORT

WITH EXAMPLES OF HOW VARIOUS AUTHORS MIGHT HAVE WRITTEN

LIBRARY work in Poughkeepsie must be very pleasant, when staff meetings for the discussion of library technique are enlivened by skits like the "Suggestions for reports" recently prepared by the librarian, J. C. Sickley, for the diversion of the staff.

"It has been recommended, or at least suggested in certain quarters," he writes in his preface, "that library reports should be made in a more literary form in order to attract and interest those who usually do not give them much attention. The statement is made that reports are merely made for library trustees, interested officials, or for other librarians, and that they are deadly dull, except to those above mentioned (and they certainly are), and to put in them a literary touch or give them a literary flavor would lead to their being read to some extent by the general public, and this would arouse an interest in the library that does not now exist. To meet this possible requirement, examples of what some recent popular authors might have done in the way of reports is given.

"It is possible that some readers may not fully catch the library idea, which is undoubtedly latent in the examples given by the *vers libre* poets, but surely those engaged in the work, and possessing the true library spirit, will catch on. It would also seem that a real free verser would perceive the unexpressed thoughts and be able to interpret them."

As the Spoon River Poet Might Have Written
Old Huldah Simpkins
Gave out books
For forty-seven years at the library
In Fork River.
Boys and girls hated her,
And older people found her grumpy
And disagreeable:
But she did not care.
She was appointed librarian in 1870,
Because she was the widow of old Bill
Simpkins,
Who was killed in the Civil War,
At the battle of Ball's Bluff.

Huldah died last July,
And the library is now closed
For repairs.
To be opened when the Trustees
Think best.

As the High Priestess of Vers Libre
Might Have Reported

Ah, sweet!
Books, books, books, books.
How the heart cheers
With their very ~~Jooks~~* appearance.
Ennoble us? They do!
Libraries do lots of good;
Their reports show this.
Mamie Melton loaned
More books in 1917 from her library
Than ever before.
People read
More and are elevated thereby.
Something should be learned each day,
Something that will stick fast,
While the sun shines, make the ~~hay~~* dried
grass
Do your work to ~~last~~* endure.
Let us exalt libraries!
A. Carnegie has spent
Much money for buildings to hold books;
His name is on many buildings.
His motto is, "Do good with wealth,
But never do your good by ~~stealth~~* ~~secre-~~
tiveness.
Let your right hand, and left one too,
Show to the world what you can ~~do~~* per-
form."
I love libraries
And hope they will increase
In usefulness.

As Walt Mason Might Have Written

I asked the lady for report of what the library had done. Her answer came both quick and short, "We keep our books, sir, on the run. 'Over the Top' some eighty times has circulated thru the town, and Alan Seeger's book of rhymes has reached almost as much renown. And other books

* The author sometimes inadvertently drops into rhyme (as did Mr. Wegg into poetry) but at once makes the correction.

of various kinds, History, Science, Travel, Art; the many works of master minds, each one has use to fill its part. And children's books are read galore, from old time ones to very last, some books of play,—in and out door,—books of the present and the past. And thus our books as doth appear, help keep our library alive. Our circulation for the year, one hundred thousand, ninety-five."

As Mr. Dooley Might Have Reported

"Say, Hennessey, do ye mind that now? The libry dealt out 89,476 books to folks what reads 'em," said Mr. Dooley in tones of admiration.

"And what kinds of books wuz they?" asked Mr. Hennessey. "Is it all stories they do be radin'?"

"Stories now, not at all," replied Mr. Dooley. "There wuz 47,843 of thim stories, and the rest is what the libry ladies call 'improvin' books,' such as the Histry of the Eskee mows, or the life of that Good Impiror Willum two, of the Dutch, or Do Mars be inhabited by inhabitants? Why Hennessey, there do be loads of such books and books in the arts and sciences, and some in religin,—but nobody reads none of thim."

"Well," said Hennessey, reflectively, "I niver read a book in me life and niver expect to, but I spose it don't harm enny of them what duz."

"Is it ye can't read, Hennessey, ye don't read no books?"

"Sure I can read. I reads me newspaper ivery night, and that is all the time I hev fur readin', as the tired bizness min say."

"Did ye iver go into a libry, Hennessey?" asked Mr. Dooley.

"I did that, but I'll niver go agin," replied Mr. Hennessey.

"Did they thrun ye out, or wuz ye scared at the place?" asked Mr. Dooley.

"They didn't thrun me out, nor wuz I scared, but I couldn't find what I wanted."

"Well, why didn't ye ask sum of the nice girls there? They could tell ye in a minute what ye wanted, even if ye didn't know yerself," said Mr. Dooley, with a touch of sarcasm.

"Well, ye see Dooley, 'twas like this. I wanted to find out about these flyin' machines they do have now days; so I ast one

of the young wimmin to giv me a book about 'em. Sez she, 'Plaze look in the card catalog,' pintin' to a cupboard full of little drawers. So I pulled out the drawers till I found Flyin' Machines, writ on a card; but below was writ, See Ary naughticks, See Also, Ary planes, Avy ation and Dregibles. Divil a word about flying machines, so I put on me hat and wint out."

"But you should have asked the young girl to show you,"—began Mr. Dooley.

"Ah, to the divil with the librys," interrupted Mr. Hennessey. "But say, Dooley, is this a Carnaygy libry ye 've bin tellin' about?"

"Divil a Carnaygy is it," replied Mr. Dooley, "'Twas giv be the cityzins of the town. Andy hed nothin' to do with it."

"Wil, I'm glad there is one place which respected itself enuf to bild its own libry."

"But Hennessey, Mr. Carnaygy has giv away millions for libry houses. He's done lots of good with his money."

"Yes, he puts up for libry buildings, and for herow funs, and for collige profsors, and for Carnaygy foundations,—whatever the divil that is,—but divil a sint for libryans. He has giv more money for libry buildings and less for libryans than enny ten philanthropists."

"Well, perhaps ye're not wrong," said Mr. Dooley, reflectively.

As The Japanese Schoolboy Might Have Written

Mr. Sir of Hon. Library that has books which is never in when wanted:

I ask female lady in library how much Hon. Library is useful, and tell Japanese boy what library has done for its peoples who takes out its books.

Lady say, "Hashimura, I will give you brief and condensed sin nopsis of the are du ous literary labor executed at the library during the year."

I say, "Yes mam, I guess so, if you say same once times more, and not two immediately."

She say, "Excuse Hashimura, I use 2 big words, but perhaps if you ask question, I make endeavor to reply."

So I enquire to ask, firstly, "How old is lady?"

She make much red blush on face, and say such question is impertinent to library stistics."

I excuse lady and ask if she has read all books in library.

She say I ask foolishness questions, and tell me to require what library has done for lift up of peoples who make of its use.

I speak then thus, "Will please lady tell Japanese boy, herself alone, without boy to inquire and make foolish questions?"

"Well, Togo," she make statement, "The motto of librarians is, 'Best readings, for biggest crowds, at low price.'"

"How much is cost of library?" I obstruct, "How much pay does lady get?"

Lady again make blush of angry and say, "Togo, you probably don't know you have impudence, but you must not ask questions of such personal. Librarians are not paid nearly as much as they are worth. Every time librarian makes her report, she makes statement similar like that, till it is now ax him."

"Is all librarians female women?" I require, "Does no mens work there? Is only 'she' and no 'he' used by reports made from library stistics?"

"Well Togo," lady declaim, "more women than mens is in libraries, and owing to this preponderance," (I disrupt by making exclaim of admiration for such word), "Owing to this preponderance," lady renew, "the pronoun 'she' has about elimberated 'he.'"

"Will name of female ladys in libraries be libraryettes," I snecretly impart, "like female lady voter is sufferingette?"

"Togo," said lady with great hot of anger, "I refuse to further disgust library stistics with you"; and she turn and make leave without say how do.

Hoping you are the same,
HASHIMURA TOGO.

LIBRARY WORK IN JUNEAU, ALASKA

FROM Juneau, Alaska, Margaret D. Green writes concerning her work there, à propos of our recent report on Alaskan libraries. The report commends the fine record made in Juneau—a record which was unfortunately made to exceed the facts

thru a regrettable clerical error in the original transcript of the report.

"In the February issue of LIBRARY JOURNAL," writes Miss Green, "in the article entitled 'Libraries in Alaska,' a paragraph is devoted to the Juneau Public Library. There it is stated that our circulation was reported to have been 70,906. Our circulation record for that year shows the circulation to have been 17,096. After going carefully over our records and reports, etc., for that year I find that the mistake was made in making out a general statement from the yearly record. In copying these figures a typographical error was made. In the year 1915 our circulation was 19,889. In 1916 it was 17,096 and in 1917 it was 11,230. It is obvious that the larger figure is a mistake, as it would be unreasonable to suppose that the circulation would increase to that extent in any one year.

"In regard to the population of Juneau, I believe that I estimated very conservatively when I gave it as 4000 in 1916. The last Federal Census was taken in 1910. Then the population was given as 1644. That was before the completion of the Alaska-Gassineau mine and the Alaska-Juneau mine. In connection with these mines the towns of Thane and Perseverance were built in the vicinity of Juneau and naturally there was a boom on here and the population rapidly increased. The Juneau Public Library is opened to and patronized by the residents of these towns as well as by those of Treadwell and Douglas, two towns just across the Channel from Juneau and easily reached by ferry in a few minutes. The Federal Census, 1910, gives Treadwell a population of 1222 and Douglas a population of 1722, thereby making a total of 4588 in the incorporated towns on Gastineau Channel in 1910.

"That there has been a falling off in our circulation here in the past year is undoubtedly due to the fact that so many people have gone away on account of labor conditions and general depression in the gold mining industry here, as in all such camps. Then, too, the cave-in at the Treadwell mine last spring was a great disaster to this part of the Territory and had a most depressing effect locally. It is estimated that fully 2000 persons left here in the last year."

THE GREAT SPRING DRIVE FOR BOOKS IN NEW YORK CITY

"RUMMAGE, rummage, rummage! Go home and look in your book shelves and pick out the volumes you can spare for our soldiers! Give all the books you have read and are done with! Then give the ones you prize most! The new books! The best books! Rummage, rummage! Strip your bookshelves! Make next Sunday your bookless day! Remember *your* boys are lonely on the sea and in the trenches. Get out your books and send them across! Rummage, rummage, rummage! How many will bring us books tomorrow?" And the hands shot up in the air all over the plaza in front of the New York Public Library, where the Fifth Avenue strollers had stopped to wonder at the unusual activity in front of the library building.

The book drive was on in New York City.

Under F. F. Hopper the campaign was organized for Greater New York, and patriotic societies and other organizations worked in co-operation with the branch libraries to canvass the several districts of the city.

The Bryn Mawr Club did splendid service, placarding the large apartment houses on Park avenue in the vicinity of their clubhouse, and taking the entire responsibility for the collection and forwarding of books to the library. Indeed, all the big women's clubs did valuable and enthusiastic service in stirring up interest as well as in actual contributions. Thru the Federation of Churches a letter was sent to each pastor (about 700 churches were reached in this manner), and this letter was followed up in many cases by personal visits from branch librarians or their representatives. As a result Mar. 17 or Mar. 24 was "book Sunday" in a large number of churches. The Mayor's Committee of Women on National Defense, the Junior League, of which Mrs. Willard Straight is president, the Junior Book Committee organized by Mrs. Helen S. Woodruff, the Patriotic Service League, the Jewish Welfare Board and Association of Jewish Ministers, and

the Association of Foreign Language Newspapers, are only a few of the many co-operating organizations.

John Foster Carr, director of the Immigrant Publication Society and firm friend of all libraries, volunteered all his time for three weeks in March to look after the publicity work of the drive. Indefatigable, he worked early and late at the library. In the first week of the drive, March 18-23, scarcely a half hour passed that his "Rummage" call did not roll across the avenue, to be greeted by waving hands from the bus-riders as well as the people in the street.

Mr. Carr was by no means the only worker. Effective speeches were made each day by Mr. Gaillard, Mr. Gamble, Mr. Paltsits, and Mr. Grumpelt of the library staff, and Robert Underwood Johnson, editor and author, and Helen Christene Hoerle were friends from the outside who volunteered for frequent speeches.

A group of sailors and marines who came each day took their turn with the megaphone while others wig-wagged from opposite ends of the marble balustrade, "Send books! Send books! Send books!" A squad of soldiers detailed to help in the campaign erected their field wireless near the street where it sputtered and flashed the message thru the air. The presence of these two groups was a great asset in the campaign, for their earnest faces proved the strength of the library's plea. A group of women from the library staff prepared a substantial lunch in the library staff room every day for this score of men in uniform.

Besides these regular workers and speakers, friends of the library volunteered to help in various ways, and each call of the bugle was the signal for a new crowd to gather for a new attraction. One day it was Ernest Davis, of the Boston Grand Opera Company, who came to sing; another time an unknown young woman delighted the crowds with her violin; the Catholic Boys' Brigade of St. Raphael's

sent their band; a naval recruiting band of seventy pieces played one noon; Simon Jaeger, of the library staff, came out frequently with his violin and never failed to draw a large group together; and Dr. Weitenkampf of the art division and a soldier artist by the name of Rankin did lightning sketches on big blackboards near the street.

The movie men spent much time on the scene, and various newspapers also sent their camera men for pictures of the crowds. In a hundred and fifty of the principal moving picture theaters slides were run showing the signal posters or specially prepared appeals for books, and the films taken at the library were also shown on many screens. In the photograph used as frontispiece, taken the first Monday morning, Mr. Carr is making his opening speech. Behind him can be seen the mammoth copy of the official poster, which Charles Falls, the artist, was good enough to come and paint, and the two big bins set out between the lions to receive the books.

Did the books come? Well, rather! By ones and twos and tens and hundreds they came—by hand, by pushcart, and by limousine. New York had rummaged her bookshelves indeed. By noon each day the bins were filled to capacity, and by five o'clock the steps were solidly banked around. The first day there were 1076, the second 2900, and Saturday the daily record had grown to 10,716. These figures are for books collected at the main building only. On Mar. 25 the number collected at the various branches was approximately 30,500, with returns from Brooklyn and Queens still to come. No adequate figures on the results of the drive as a whole are yet available. The books brought to the branches were gathered up each morning and taken directly to the dispatch office in Hoboken, where they were prepared for shipment overseas. In Brooklyn the dry goods firm of A. I. Namm & Son gave the use of their trucks to gather books in any part of the city, and many individuals lent machines and delivery wagons to bring the books to the central building and branches.

Of course, there were some books that were unsuitable. It is hard to follow the mental processes of the person who will send for such a cause the Social register for 1915, a history of the Anchor Line, an auction catalog of oriental rugs, a family album from which the portraits have been removed, or fifty copies of the *New York Herald* of 1881! But offsetting these a hundred-fold were the excellent volumes of fiction—both standard works and new books just off the press—which came in such abundance. Fully ninety per cent of all the books received were fiction, seeming to prove that it will still be necessary to purchase most of the technical books needed for serious study, but for recreational purposes the public can be relied upon to supply as many volumes as will be wanted.

F. A. H.

THE HOUSEWIFE'S GLEE

A boon the soldiers are to me,
With joy to them I send
Old magazines and books, you see,
And papers without end.

This "Care of Children" I can spare,
And just as well as not
They can have that old Bible there—
That fine-print polygot.

Then here is "Hints for Losing Weight";
And now—just let me see—
Yes, I'll send "Bridge Rules Up-to-date";
The date is '93.

Oh, here's a row of funny books.
Well, I won't touch that shelf;
They're full of stories, by their looks,
I'd like to read myself.

Here are some records, old, I know,
But they'll like any song;
And these nice games must surely go—
Tiddledy-winks, ping-pong.

These playing-cards will make them glad!
They're sticky, I'm afraid—
But in our club we've always had
Caramels while we played.

There! I've worked hard those boys to
please.

You see, I hate to knit,
And so I send such things as these,
And feel I've done my bit!

CAROLYN WELLS, in *Life*.

THE OFFICIAL CAMPAIGN POSTER USED BY THE AMERICAN LIBRARY ASSOCIATION IN ITS NATION-WIDE DRIVE FOR BOOKS IN MARCH

HARVARD RULES FOR COUNTING VOLUMES AND PAMPHLETS

BY T. FRANKLIN CURRIER, *Assistant Librarian, Harvard College Library*

DISSATISFACTION with past methods has led to the introduction of new rules for obtaining and presenting statistics of size and growth of the Harvard Library. The notable differences between the new rules and the old are in the provisions for counting the pamphlet as distinguished from the volume, and in the substitution of a new source from which the annual statistical report of volumes and pamphlets in the library will be compiled.

RULES

1. The total statistics of size of the library, when given for general purposes, should combine the count of volumes and pamphlets in one figure stated as so many "volumes and pamphlets."

2. A separate record shall be kept for each class of the library's shelf classification, this separate record to be, as a matter of interest, itemized by volumes and pamphlets.

3. A pamphlet is to be defined as a small piece of printed matter, ordinarily containing eight or more pages, not treated as part of a serial publication, and not originally intended to be separately bound. But for the purposes of the record called for in Section 2, a pamphlet which is treated like a volume—by being bound—is counted as a volume; and an unbound volume which is treated like a pamphlet—by being bound up with others, tied up in a bundle with others, or sent to so-called "Pamphlet files"—is counted as a pamphlet.

4. A collection of several pamphlets bound together in one volume shall be counted as so many pamphlets, and a record of such volumes shall be kept.

5. Unbound volumes or pamphlets issued in continuation (such as annual reports and catalogs, almanacs, manuals, etc.) are not counted separately, but according as they are brought together in volumes, boxes or bundles, each volume, box or bundle being counted as one volume. Similarly, if two or more volumes of a set or of a periodical series are bound together, they count as one volume, following their physical, not their bibliographical status.

6. The item "serials," tho it might appear in the figures for accessions, does not appear in the total count of the library. When a serial is received currently, the first number placed on the shelves counts as one volume; later numbers do not appear in the shelf statistics until the volumes (or bundles) of which they form a part are counted.

7. Broadsides, single sheets, maps, photo-

graphs, prints, sheet music, unimportant advertising matter, programs, time-tables, tickets and similar publications are not to be included as individual pieces in the count of volumes and pamphlets, tho, when volumes and scrap books are made up of such material, the resulting volumes are to be added to the volume count. They may be separately stated with as much or as little detail as is thought advisable.

8. Cuttings from newspapers and periodicals are to be treated by the provisions of Rule 7, but reprints from journals and other publications are counted as pamphlets.

9. The basis of the official statement of volumes in the library shall be the "shelf-list" count, as this is corrected periodically when the shelves are read.

10. The basis of the official statement of pamphlets in the library shall be the recount and estimate of 1917 plus the annual permanent accessions as recorded by the forwarding clerk. To facilitate recounts at long periods the number of pamphlets contained in each pamphlet volume added shall be recorded in a column set aside for that purpose in the shelf-lists.

In recent years our statistics of total volumes and pamphlets have been based on a recount made from the shelf-lists in 1901, and an estimate of pamphlets then in boxes on the shelves and in bundles in the pamphlet files. To the result so obtained has been added annually a figure for net accessions based on the gross accessions kept from day to day, from which certain sums, in part estimated, have been deducted to account for losses, duplicates disposed of, and increase and decrease due to binding. This method has proved unsatisfactory and rule 9 provides that hereafter the figures shall be compiled from the shelf-lists. To the sum thus obtained is added the number, by actual count, of volumes and pamphlets on hand and waiting for record at the beginning of each year. Material not to be retained permanently in the library has already been winnowed from this mass of books and pamphlets waiting for record. The advantage of the shelf-list count is evident in view of the fact that hitherto it has, with few exceptions, been corrected annually by a routine comparison of shelf-lists with the books on the shelves.

An investigation of the practices of

counting and handling pamphlets in other libraries has led us to endorse the conclusion stated in a letter from Dr. Putnam of the Library of Congress in which he says: "The disadvantages of the arbitrary distinction between volumes and pamphlets based merely on the number of pages are of course apparent to us, so much so that . . . we discard the distinction entirely in our annual reports." Following this precedent (Rule 1) we refrain from making a distinction between volumes and pamphlets in figures for general purposes. In the tables of our annual report for the year just passed it has been found necessary to continue in separate columns the itemized statement of volumes and pamphlets; in the future, it is expected that these columns will be amalgamated. So long as there continues to be difference of opinion as to the exact definition of pamphlet as distinguished from volume, it is of little use, when comparing collections, to employ figures which attempt to make a line of demarcation between these two classes of printed literature. A strong reason for maintaining a distinction would be that one class possesses an inherent superiority over the other. For the larger book collections this is not necessarily true. For the purposes of one investigator the collection of a thousand pamphlets may be much less valuable than a collection of a thousand old textbooks, while his neighbor in the adjoining stack considers the pamphlets gold and the textbooks trash. The difficulty of intelligibly assigning publications to one or the other class and difference of opinion as to the relative values of the two lead to one conclusion—to combine the two in one figure.

One problem arising in the investigation has been the treatment of a collection of, say twenty, pamphlets bound in one volume. Our previous line of argument leads to one solution, namely, to take the separately published piece as the unit, because it is unchanging, and to count the collection as twenty rather than as one. Is not a library which possesses a collection of twenty political pamphlets bound in one volume as rich in its resources as a library which has the same pieces bound sepa-

rately? There is, of course, an advantage to the latter in having the collection in more usable form when several readers wish to consult it at one time, but it is not more valuable to the single student.

Our rules provide then that, for general statistics, we shall add volumes and pamphlets together, expressing the result as so many "volumes and pamphlets," and that a collection of twenty pamphlets bound together shall be counted as twenty rather than as one. We realize, however, that when describing certain portions of our library, notably our historical collections, the term "pamphlet" still retains its value as denoting a more or less ephemeral piece of writing intended to influence contemporary thought and, in general, preserved only by the collector or by accident, the volume, on the other hand, being ordinarily a more pretentious work, usually intended to be bound and preserved on the book shelves, tho, alas, to the student of the future often possessing less value than its humble cousin, the pamphlet. Consequently, for our own needs, we keep a separate statistical record of volumes and pamphlets for the component parts of the library, and as this record is largely for private use, we need not be strictly accountable as to just how we apply the terms in specific cases. In fact, our own usage, as expressed in the rules printed above, has sometimes been forced on us less by the theoretical consideration of what is logically good than by the practical consideration of dollars and cents in making our records. Thus by rule 3, we follow, for ordinary purposes, the more general dictionary definitions of pamphlet, but we decide, with some regret, that for certain records a pamphlet bound separately shall be called a volume. We admit that it is still a pamphlet; we should like to follow the Newberry practice and count it so, but we cannot afford to go thru our stacks hunting for these "bound pamphlets," and, after all, in the final total each passes as one "volume-or-pamphlet," so there is no great loss by this divergence from theoretical perfection for practical ends. Again, in the second clause of rule 5, we

decree that two volumes of a set bound in one count as one. Theoretically, the Newberry rule may be better, but we could not conform without useless expense. There is still difference of opinion as to whether the successive thin issues of an annual report shall count individually or whether the bound volumes into which they are gathered shall form the units. We have not seriously discussed the matter, as the second alternative was the only practical method for us.

Another troublesome class of publication is the continued series composed of thin unbound monograph parts which are sometimes gathered together, when each collected volume is counted by us as one, and sometimes scattered thruout the library, when each part is separately counted. In spite of inconsistency we can adopt no other plan without entailing useless expenditure. In compiling the statistics of gross annual accessions, however, a different rule is followed and each successive thin issue counts as one, for the count is taken when the parts first come into the library and the assistant does not know whether the separate numbers will be collected together in one place or scattered. In similar fashion, when recording gross annual accessions the thin parts of regularly continued reports are each counted as one, for here again it is not practicable for the assistant to forecast the resulting volumes. This presents a slight discrepancy between the method for obtaining gross accessions and the method for obtaining net accessions and total size, but it is not practicable absolutely to harmonize these figures. Statistics for the first mentioned item are based on a day to day count and without the knowledge of how the single piece will be treated; the figures for total size are taken after each piece has been permanently located, and the figures for net accessions are obtained by taking the difference between the figures of total size for two successive years.

There is, I believe, no great difference of opinion about rule 7; the items named, if counted, should be enumerated separately in the report.

It is useful to summarize here the replies received in response to our questionnaire in order to show to what extent the Harvard Library agrees with or diverges from current practices. A few large reference libraries were selected, somewhat haphazard, for the investigation, and no attempt was made to discuss the problem as applied to the small library or to the moderate sized public library. It should be remembered also that the investigation has no direct bearing on the compilation of statistics for cataloging work.

1. "In the Library of Congress totals, twenty pamphlets bound together count as one rather than twenty. But the practice of binding together miscellaneous pamphlets was abandoned years ago. Volumes of specially rare pamphlets are being broken up, and the constituent pamphlets separately bound and counted. When forced to use the term pamphlet, the Library of Congress defines it as an unbound book of less than 80 pages." Sequents bound several in a volume count as one for the volume.

2. The New York Public Library makes a practice of collecting its pamphlets in pamphlet volumes and a volume composed of several pamphlets counts "one." Sequents bound several in a volume count "one" for the volume.

3. The Boston Public Library does not use the term "pamphlet" in its figures. Twenty pamphlets bound together count as one volume, but as an offset to this the tract volumes are being slowly but steadily broken up and each pamphlet covered separately and counted as one. Unbound pamphlets are seldom or never put on the shelves.

4. Yale has been obliged to estimate its figures and has a mass of uncounted pamphlets. Pamphlet volumes are being slowly broken up. At present an unbound volume of collected pamphlets (that is, pamphlets in boxes, folders, etc.) counts as one. A bound volume is counted as ten.

5. The University of Chicago counts "everything in one binding as one volume." The practice of collecting pamphlets into bound volumes is restricted to very minute subjects.

6. The John Crerar Library follows the A. L. A. definition of volume and pamphlet, itemizes the two in its reports and counts twenty pamphlets bound together as one volume. It avoids collecting pamphlets into volumes. Sequents bound together count as one for the volume.

7. The Newberry Library (see also LIBRARY JOURNAL, May 1912, pp. 262-263) uses the collective term "volumes and pamphlets" always in its statistics, without reporting a separate count for each. Twenty pamphlets bound together count as twenty. Sequents, if they are

leaflets, count as bound, but annuals without volume designation count one to each year regardless of binding.

8. Mr. Madan of the Bodleian has recently published (*Bodleian Quarterly Record*, vol. 1, no. 9; see also *LIBRARY JOURNAL*, Nov. 1916, p. 808) an interesting memorandum on statistics of size of the Library. "It is essential to any accurate estimate of the size of a library to distinguish the number of volumes as bound and standing on the shelves from the number of pieces or 'title-pages,' each title-page indicating a separate literary piece." And again "The most satisfactory basis of calculation and comparison where actual counting cannot be undertaken appears to be shelving, distinguished where possible into folio, quarto and octavo divisions." The results of Mr. Madan's estimates on this basis give for the Bodleian three different totals, the units of one total being included in the higher totals. They are 1,000,000 volumes; 2,000,000 pieces; 3,000,000 items. The definitions of his terms are: "(a) volumes mean books as they stand on the shelves; (b) pieces, separate works or parts, usually with a separate title-page; (c) items, all possible separate literary entities, including broadsides, cards, fly-sheets, etc. Thus 50 Civil War tracts bound in one volume with 20 broadsides at end would count as (a) 1 vol. (b) 50 pieces (c) 70 items, and a dictionary in 20 volumes counts as 20 volumes, pieces, and items."

A glance at the summaries shows that the Library of Congress and the Newberry Library use the collective term "volumes and pamphlets" in their statistics without reporting a separate count for each, the Newberry Library counting each pamphlet separately regardless of binding, while the Library of Congress has long avoided binding collections of pamphlets; the Boston Public Library and Yale are slowly breaking up pamphlet volumes, thus arriving gradually at the result of counting each item separately; the John Crerar Library and the University of Chicago avoid forming pamphlet volumes, but count as one a bound collection of pamphlets; the New York Public Library is committed to a policy of making pamphlet volumes and takes the collection so formed as the unit. Harvard follows the Library of Congress and Newberry in not attempting to distinguish between volumes and pamphlets when giving figures for general purposes, the results thus obtained corresponding to Mr. Madan's count of "pieces"; as to counting pamphlets collected in volumes, Harvard feels that there is

sufficient precedent to justify its action in taking the piece rather than the collection as the unit; this unit is unchanging regardless of its physical treatment and so forms a more correct basis of comparison.

The recount of pamphlet volumes, boxes and envelopes, made necessary at Harvard by this rule cost \$150, and the effect on its totals has been to deduct 5000 tract volumes from the count of books in the stacks and to add 196,000 for the pamphlets contained in them and in boxes and envelopes. This gain was more than offset by a loss consequent upon a new estimate of the pamphlet files, and by a cumulative and unforeseen inflation of figures for accessions since the last recount.

In the matter of the treatment of sequents, the replies to our questionnaire show that all the reporting libraries, except Newberry, take the collective volume as the unit rather than the individual piece. In this matter Harvard, as explained earlier in this memorandum, uses different methods in its record, on the one hand, of net accessions and total count and, on the other, of gross accessions, following the Newberry method in the latter record.

Returning once more to the definition of "pamphlet," Harvard, when describing in detail portions of its collections still uses the term, but has not accepted the A. L. A. limitation of 100 pages the more generalized definitions of the dictionaries, representing common usage, being sufficient for our purposes. Limiting the words further for library usage* adds a bit more to our professional jargon and makes our shop talk a bit more unintelligible to the public. The term "pamphlet" has grown old in associations and implies ordinarily an ephemeral bit of printed matter. Are we violently to remove "An Answer to a Booke Entituled an Humble Remonstrance. London, 1641" from the category of pamphlets because it contains 104 pages, while the pamphlet which it answers, J. Hall's "An Humble Remonstrance to the High Court of Parliament, by a Dutifull Sonne of the Church. London, 1640," is called a pamphlet because it contains but 43 pages?

* The A. L. A. rule, if retained, should be recorded, for it is ambiguous at present.

Whenever, in a given collection, it is advisable to attempt a distinction between volumes and pamphlets it is a far less intelligible process to the layman to go thru hunting for such as are over one hundred pages in order to count them as volumes than to set aside those that former owners of our own needs have caused to be bound separately regardless of size. The latter process conforms much more closely to the normal conceptions of pamphlet and volume, and what are our figures for if not for the normal person? It is true that a given piece will be bound separately by one library and kept unbound or put in a tract volume by another so that it will count as a volume by the former and a pamphlet by the latter but, to repeat, when the two figures are added the discrepancy disappears and as for interpreting the itemized figures absolute uniformity is hopelessly impossible.

To sum up in a few words the Harvard rules: 1. A collection of twenty pamphlets bound together counts twenty; 2. In totals no distinction is made between volume and pamphlet, each counting as one; 3. When, for special purposes, it is desirable to use the term pamphlet the A. L. A. definition of 100 pages is rejected and the ordinary dictionary definition is used except that bound pamphlets may be called volumes; 4. Sequents are counted as bound.

NOTE

It may be convenient to print here the A. L. A. definition of the word "pamphlet" and several of the dictionary definitions.

A. L. A. A pamphlet is a printed work consisting of one or more sheets of paper fastened together, but not bound. Unbound serials and sequents which as issued are intended to form component parts of a larger volume are not to be considered as pamphlets.

A volume is any printed work bound in stiff covers so as to stand on a shelf; also unbound books of over 100 pages.

Murray's New English Dictionary. 1. A small treatise occupying fewer pages or sheets than would make a book, composed and (a) written, or (b, since c. 1500) printed, and issued as a separate work; always (at least in later use) unbound, with or without paper covers. . . . Not now usually [applied] to anything of a purely literary character, or of

religious nature, even tho issued in pamphlet form. 2. More specifically, a treatise of the size and form above described on some subject or question of current or temporary interest, personal, social, political, ecclesiastical, or controversial, on which the writer desires appeal to the public. This is merely a consequential specialization, arising from the fact that works of this kind are those for which the pamphlet form is now mainly employed.

Century. 2. A printed work consisting of a few sheets of paper stitched together but not bound; now in a restricted technical sense, eight or more pages of printed matter (not exceeding five sheets) stitched or sewed, with or without a thin paper wrapper or cover. 4. A short treatise or essay generally controversial, etc., etc.

Standard Dictionary. 1. A printed work consisting of sheets, generally few, stitched but not permanently bound. 2. A brief treatise or essay, usually forensic and on a subject of current interest: greatly in vogue in England during the 16th, 17th, and 18th centuries, and often bitter in tone.

Webster. A book of a few sheets of printed matter, or formerly of a manuscript, commonly with a paper cover; specif. sometimes, any such work not exceeding five sheets (80 pp.), and not bound.

Encyclopaedia Britannica. . . . Not till the 18th century did pamphlet begin to assume its modern meaning of a prose controversial tract. . . . The experts are also undecided as to what is actually understood by a pamphlet. . .

CHICAGO'S NEW LIBRARIAN

CARL B. RODEN has been appointed librarian of the Chicago Public Library, succeeding the late Henry E. Legler. Mr. Roden, who entered the Chicago Public Library some thirty-two years ago as a page, and has been assistant librarian for several years, stood at the head of the civil service test list in the recent examinations with a mark of 92.50. E. R. Perry of Los Angeles was second and Chalmers Hadley of Denver third on the list.

The examining board were Hebert Putnam, librarian of the Congressional Library at Washington; Samuel Gessler, member of the board of directors of the Chicago Public Library, and Joseph B. Geary, a member of the local Civil Service Commission.

The policy inaugurated by Mr. Legler, for five large regional libraries as centers for groups of smaller branches, will be adopted and carried forward by Mr. Roden.

A PLEA FOR THE SPECIAL LIBRARY*

BY MRS. GEORGENE L. MILLER, *District Librarian, U. S. Forest Service, Portland, Ore.*

THERE appeared in a recent issue of an industrial magazine an article which expressed the idea, largely by inference, that the special library is superfluous. The writer of this very able article made a vigorous plea for a wider use of the public library by the business man, claiming that the public library, if properly supported and equipped, could handle this special work; and declared that the existence of both public and special library is a duplication of work and expense.

Of course, there is ample room for expansion in the work of the general library. Few of us will question that. And we will all gladly second any motion that will help make the public library better known, better equipped, and better supported by the community. Without doubt, too, the public library is fully qualified to handle this special work, but a study of the situation, I think, will soon convince any fair-minded person that it is a physical impossibility for the general library to cover this special ground with the celerity demanded, and that under our present industrial and social conditions, the special library is really a pronounced necessity. As a matter of fact, "the special library begins where the general library leaves off." The public library can hardly take its place at present, altho there can and should be hearty co-operation between the two.

Now let us consider the subject a little more in detail. It is obvious that in small cities and towns the public library may easily serve the needs of the industries of such towns. As an illustration, take Joliet, Illinois, a city of 40,000, where the Illinois Steel Company plant represents the chief industry. The public library could easily handle the needs of this industry without interfering in any way with library service to the rest of the community. But suppose this plant were located at 210th street, New York

City. Several new elements now enter into the situation. With the congested traffic of New York, think of the *time* consumed in going from 210th street to a library, say at 72d street! Furthermore, there would be hundreds, nay thousands of other industries in that city making demands upon the public library. To be sure, the work of the public library is supposed to cover the whole ten branches of human knowledge. Pick up the latest edition of the Dewey classification and note the long list of subjects given in the Index. The average general library covers at least eighty-five per cent. of these subjects. On this basis the library is certainly qualified to handle any work, but can we expect it to give an equally broad attention to every one of these subjects, or to every specific industry? Can it go into details, so to speak, for every kind of business that is carried on in cities like New York or Chicago? Should the general library attempt it, methinks we would then have an organization as ponderous as the federal government, and one as slow in its movements—not exactly a "consummation devoutly to be wished," especially by a business man!

In big cities the time consumed in going to and from a library is quite an item. Even if the telephone is used, time is not always saved, and the strenuous business gentleman is apt to chafe considerably over "Central's" oft repeated "Line is busy." Or if he succeeds in getting the library quickly, it still takes some time to get the needed material from the library, even with the most expeditious messenger service. And all this time the man is waiting! He may want to go to the library himself, but even here he is handicapped, for he discovers important matters pending which require his presence at his desk. So he has to wait with what grace he may.

Few of us like to wait for anything, but in the business man this seeming impatience is emphatic because to him

* Read Mar. 10, 1917, to a group of special librarians in Portland, Ore.

waiting often means dollars and cents slipping away from him. He cannot afford to wait three days, or sometimes even three hours, for the information he needs. As Francis Bacon has tersely expressed it in one of his "Essays," "To choose time is to save time," and when the business man is able to "choose" the time for his needs, it may save him thousands of dollars—it may mean the winning of a law suit, the final word that brings in a large order, or any one of a dozen other things that are vital to the success of his business. There may come a time when business will be conducted in a less strenuous way, and mankind will no longer be laboring under the fetish of time limitations; but there is no doubt that at present time means money in the business world. In fact, the efficiency experts of to-day are bending their efforts toward saving time, toward the more profitable use of time, for the business man.

Now the special library is designed to give the business man what he wants when he wants it—not two or three hours or two or three days hence. It has been said that the special library is one that serves people who are *doing* things, in contrast to the reference library which serves people who are *thinking* things. For the benefit of people who are doing things, the special library concentrates its efforts toward accumulating specific information and has that information at its finger ends, so to speak. It is what might be called intensive library work. The man who uses a special library is not looking for general information on any subject; he wants something specific, the very latest information in that particular line. He has a definite reason for seeking information, a definite point of view, and he expects a definite and speedy answer. It should be the aim of the special library to meet the needs of its clients immediately, and also to anticipate those needs. In fact, too much emphasis cannot be placed upon efficiency of service as demonstrated in rapidity of service.

To quote John A. Lapp: "Mere books do not constitute the specialized library.

In fact, in a good special library there will be few books. Instead there will be chapters of books, pamphlets, figures, maps, type-written reports, clippings, tables, cost sheets, drawings, forms, catalogs, etc., and all classified and arranged, not for display, but for constant and efficient use. There will be tabulated information drawn off from the mass. The busy man must have his facts *boiled down and right up to the minute.*"

Much of the material, too, results from the analytical indexing of magazines, the making and filing of digests of important addresses at trade conventions and conferences, and the filing of information which has originated within the business itself but which is useless unless cared for in a way to make it easily available.

Arthur D. Little of Boston has defined the special library as one whose business it is to collect and classify every scrap of information bearing upon the industry concerned in a way to make it instantly available. From a perusal of the articles that have appeared from time to time in our magazine, it is quite apparent that all special librarians realize the importance of the time element in the conduct of a special library, and also that they agree as to the character of the material which it should contain. There is another matter which seems to me important in the conduct of such a library, and that is the elimination at intervals of all material which has served its purpose, material more or less ephemeral in character, which should give place to more up to date matter.

Let me say a word in regard to co-operation between the general and the special library. St. Elmo Lewis, advertising manager for the Burroughs Adding Machine Co., says: "No man has ever known too much about anything, and the only safe way is to bring to bear upon the minutest problem of the day all of the concrete knowledge of the world." This is the statement of a progressive business man. If we take his idea as a guide in the solution of our library problem, we will soon see the need for co-operation. No one library has a monopoly on all

the "concrete knowledge of the world." Each possesses a goodly share of it, and co-operation among libraries will make this knowledge available to the clients of all libraries. At a recent meeting of the North Central Library Association of England, L. Stanley Jast of Manchester warned special libraries against the danger of becoming exclusive libraries. Among other things, he said that it was "foolish and bad business not to pool the general information" for the benefit of all those interested in the subject.

In conclusion, let me say just a word on the tax side of the question. The average business man is perfectly willing to pay taxes to support the public library for the benefit of his children, just as he is willing to pay taxes for the privilege of having city water in his house. But if he wants hot water, he must put in a hot water heater at his own expense—he does not expect the city to do it for him; if he wants ice water, he must buy his own ice. In other words, if he wants some specific service different from that required by the community at large, he must provide it himself. He willingly supports the public library for the benefit of his family, but so long as time is a factor in his business success, the man with a big business feels that he needs his own library. With his own library on his own plant, and a "house" system of telephones, he is losing little or no time in getting the information he needs. The convenience and the time saved, converted into a money value, more than offset the actual expense.

* * *

DISCUSSION OF THE PRECEDING PAPER

BY KATHERINE KIEMLE, *Portland Public Library*

As a worker in a special collection within the Public Library, it occurs to me that there is much to be said upon these two admirable papers—one setting forth the value of the Public Library and the other the value of the Special Library.

The old symbol of the torch of learning still holds for the modern public

library, tho now it may be likened to a high-powered tungsten lamp, shedding its light upon every activity of the city and bringing greater intelligence to every individual and every organization. This is the aim and ideal of the public library. It is a public utility whose purpose is education toward better thinking, better methods of living and better methods of business and government.

Now there are certain places in the city which need special illumination, flood lighting perhaps. These places are on the firing line, so to speak, of the world's advance, and in our day this firing line is in the commercial, industrial and scientific world.

The special business library had its origin in the efficiency movement, in the organization of business in a scientific way. Many business firms found that they had books and reports and statistics scattered in various places. In the new organization, these were brought together in one room, usually in connection with the statistical department, or often combined with it, to form the intelligence department of the company. In Schulze's "American office," one of the best books of its kind yet published, plans for the arrangement of business offices are given. In all of them the library has a place—a central place. It has been found a necessary part of the modern business equipment.

To-day a wider scope of information is demanded of every one. Not only is a library a necessity to the executive, but reading and a wider intelligence is necessary to the employe in our competitive world. The advantage of a library in the same building over that of one a mile away is obvious. During the noon hour, or after office hours, in a few minutes time, a man may receive an idea thru reading, which will be invaluable to him and the business, and moreover he will establish that good habit of reading and thinking outside of his own routine. And when the reading and thinking habit is formed these men will seek a wider field and begin to use the public library, even at some inconvenience.

For this reason, I believe the public library, keeping in mind its ideals of service and desire to reach all of the community, should encourage rather than discourage the establishment of special libraries of every kind.

Very often in the technical room when I have offered a man a standard book in the subject he has asked for, he will say "We have that at the office" or "I have that in my own library." You see, they buy the important book of the year and then come to the library for others less valuable but interesting to them. These men are abreast of the times and know the value of libraries, both special and public. Those who do not come are those who have not yet found out what the library can do for them. Often the small special collection teaches them this.

A recent article by a mechanic in the *American Machinist* describes the library which has been established in connection with his shop, in such a happy appreciative way I wish you might all read it. He thinks such a library would be a good investment for any fair-sized shop. I venture to say that, from the use of this small collection, these mechanics will be led to use the public library when they find out how they can be helped.

Not long ago a man asked for books on machine design. After I had given him two and asked if they were satisfactory, he said, "I'll tell you what I really want" (how often do we hear this after the first general request). "I want to look thru all your books on machine design for new ideas. Back East, a man and I made some machines and we worked on them for three months and couldn't get them right. We went to the library one day and just happened to get the idea we wanted and in three weeks we had the machines finished and running. And now I want some new ideas again." This man had found out that the library was his business partner.

The special collection is limited in scope, highly specialized and invaluable because so near at hand, but its narrow limits constitute at once its strength and

its weakness. Sooner or later the business man, scientist, engineer, student and mechanic will find the use of a larger library imperative. All knowledge is so interrelated you cannot separate one section and say "This library shall contain all we need to know!" It does contain the information you need to use constantly and so should be close at hand, but there will be times when the public library with its greater resources *must* be consulted. And this is the opportunity of the general library—to have the special reports of the United States and foreign governments, the reports of scientific societies and universities, the bound magazines and indexes, and also to have assistants who have been allowed to specialize and who know the collections with which they are working. The public library must learn that it cannot schedule an assistant in five departments and expect her to do good work in all. She should be encouraged and helped to specialize.

It has been said this evening that the element of time limits the usefulness of the public library. This is true, yet I recall a number of instances when the time element was important and yet good results were achieved. Late one afternoon, a member of a Portland legal firm came with the request that we gather information on the subject "The tendency toward modern municipal ownership, including ice plants and all industries in which cities were engaging." He wished to use it the next day, as his brief must be in the hands of the printer the next day. We immediately set to work. The municipal reference, the reference and technical rooms contributed articles which numbered a dozen. The material was used and the brief in the hands of the printer on time. Had he wanted the information that evening and had telephoned, we could have had it for him. Here was a case when the special law library had not been wide enough in scope. That is the glory of the large public library. It is the intelligence department of the city and is becoming the great force in modern cities which it should be.

On the other hand, I would not lose one special library—not one. I believe the public library should encourage their establishment. Only good can come from the duplication of collections in the localities where they are needed and from the employment of a special librarian, who, besides making useful the special collection in her charge, uses the public library as a laboratory and brings the attention of her company to the greater resources there, makes abstracts of books and articles, borrows books for them, and in all acts as a connecting link between the city's great intelligence department and that of her own organization. Money spent for such books and such service is a good investment.

In Portland, a city of 270,000, there are about fifteen special libraries. We of the general staff have found them good allies and they have found us so, to judge from experience. Our printed indexes are valuable to them and our greater collection, while we have had occasion to use special information which they have compiled.

I recall that the Forest Service Library answered for us the question as to the names of the presidents of the Oregon granges, the Chamber of Commerce Statistical Bureau has helped us with statistics of Oregon industries, Reed College has some special scientific works which are included in our catalog, the Polk Directory Company allows free consultation of its directories, etc.

We have worked together and we can extend this work. The purpose of this meeting is to bring us into closer relationship in accomplishing our common aim—better thinking, better methods of living, better methods of government and business.

MEMBERS of the staff of the Washington Public Library who have not succumbed to the allurements of positions with the Federal Government have adopted an original decoration. Their insignia is a badge bearing the inscription "V. C. I will not resign." This badge is worn as an emblem of the loyalty of those who refused to seek positions at a salary increase.

INTERNATIONAL MIND ALCOVES FOR LIBRARIES

DR. NICHOLAS MURRAY BUTLER has defined the International Mind as "nothing else than that habit of thinking of foreign relations and business, and that habit of dealing with them, which regard the several nations of the civilized world as friendly and co-operating equals in aiding the progress of civilization, in developing commerce and industry, and in spreading enlightenment and culture thruout the world."

Thinking along the lines of this definition, J. W. Hamilton, of St. Paul, Minn., suggests the appropriateness in every library of an "international mind alcove" in which would be gathered books and papers and pamphlets on the subject of the International Mind and Internationalism, everything in fact which tends to bring nations closer together, each section having a sign in display type "The International Mind Alcove." "This," he says, "would arouse attention and create interest and to this section would be gathered an increasing number of citizens interested in International Good Will, who would become acquainted with each other and possibly found local societies to help make the thing itself possible."

Dr. Butler says: "Such a plan as you suggest for libraries would be very practical and doubtless contribute with some speed to the accomplishment of the end which you have in mind.

"Were such alcoves established in libraries both the Division of Intercourse and Education of the Carnegie Endowment and the American Association for International Conciliation would be only too happy to supply them regularly with material of interest to readers." Some forty sets of books and pamphlets have already been sent by the Carnegie Endowment for International Peace to as many different libraries.

The New Hampshire Peace Society has already sent a circular to every librarian in that state outlining the advantages of these alcoves.

You cannot perform your patriotic duties by proxy.—COL. C. A. SIMMONS.

THE RELATIONS OF DEPARTMENTAL LIBRARIES IN THE UNIVERSITY OF CHICAGO

THE question of co-ordination of departmental libraries with each other and with the General Library has been more acute in the University of Chicago, perhaps, than in any other large university library. The establishment in 1892 of a considerable number of departmental libraries and their subsequent development without adequate co-ordination or central control of purchases, catalogs, classification systems, and rules had by 1914 led to a confusion that demanded attention. After some discussion of the difficulties and problems involved, a committee of nine was appointed by the Board of Libraries to study the existing conditions and tendencies and decide on certain principles which should be laid down for all alike. The findings of this committee and its subsequent investigations are contained in a report recently published under the editorial supervision of J. C. M. Hanson, secretary of the committee.

At the committee's first meeting, on Nov. 21, 1914, Dr. Burton, director of the libraries, occupied the chair. A report on conditions in the libraries was read which aimed to point out some of the more serious shortcomings of the present system.

It called attention, among other things, to the fact that the strong interest of the university from the beginning in research work, accompanied as it was by insufficient funds for the development of the libraries, and inadequate general supervision, had led to a disproportionate emphasis on purchase of books as compared with cataloging, binding, arrangement, and preservation, to a disproportionate development of the Departmental Libraries as compared with the General Library, and to inadequate co-ordination of the former with one another and with the General Library. In particular some of the Departmental Libraries had acquired and were acquiring books outside their proper fields, books on the same subjects were found in several different libraries,

sets of books remained incomplete, fragments of the same sets or series were found in different libraries, and books, especially serials or collections, of interest to several departments were often found, not in the General Library, but in some one Departmental Library. Some Departmental Libraries had already reached the limit of their space and it was evident that the time was ripe for some modification of the practice hitherto followed in respect to the purchase and distribution of books.

It was voted to send a list of questions to a short, selected list of libraries, with a view to drawing out their experience and judgment. The following letter was accordingly drafted by a committee of three, and sent to each of twenty-four university libraries:

The undersigned, having been appointed a subcommittee of the Library Board of the University of Chicago to make some investigations with respect to the practice of universities in dealing with books in Departmental Libraries, beg to submit herewith a list of questions.

In explanation of our inclusion of certain points on which there should be little difference of opinion among American university librarians, we beg to state that the University of Chicago has since its organization in 1892 followed a plan somewhat different from that adhered to in most other universities. It has, for instance, assigned to Departmental Libraries nearly twenty-four twenty-fifths of the annual appropriations for books. Moreover, the books purchased on the appropriation of a given department have almost invariably been located in the library of that department regardless of subject, and, at any rate until the last year or so, with no other central record than the order card retained and filed in the General Library.

QUESTIONS

1. How many Departmental Libraries have you, and what is the approximate number of volumes in each of these libraries?
2. Is the allotment of books to Departmental Libraries under the control of the General Library or a Library Committee?
3. Are the book funds divided among departments, or kept under the control of the Central Library, or a Library Committee, and if under central control is a division of books by subjects or classes made each year?
4. What rules have been adopted to govern the following points:
 - (a) Withdrawal of books already on the shelves of the General Library for the use of a Departmental Library.

(b) Transfer of publications from one Departmental Library to another.

If no rules have been adopted, state if possible how these matters are regulated.

5. Are the books placed in Departmental Libraries considered as a permanent deposit, or is it the practice to return them to the General Library at stated periods, or when they have presumably ceased to be of much use to the department, and is this a matter of General Library control, department control, or is it arranged by mutual agreement between the departments and the General Library?

6. In case a student or instructor in one department recommends a book which would properly be classified in some other department, is it customary for the department which recommends the book to pay for it out of its allotments, or is it charged against the allotment of the department to which the book falls by reason of its subject-matter or classification; and, if the latter holds, must the librarian secure the permission of the department against whose allotment the book is charged before purchase can be made?

7. If the allotment is controlled by a department, are the books purchased on recommendation of that department placed in the Departmental Library, even tho by their subject-matter they may belong more properly in another Departmental Library or in the Central Library?

8. Do you permit different editions of the same book, or different books on exactly the same subject, or the same phase of the same subject, to be placed in different libraries? Similarly, are different volumes of the same work, e.g., of regular periodicals, or the reports of some learned society, separated and placed in different libraries?

9. Is there any arbitrary limit to the size of a given Departmental Library, or is it a matter regulated by space and funds available; and does the authority for such regulation rest with the department itself, the Library Board, or the General Library?

10. How far are students of one department, particularly undergraduates, allowed to consult the library of another department?

11. Are the books in Departmental Libraries represented in the catalogs of the Central Library, and, if so, how far, e.g., in the author catalog, subject catalog, shelf-lists?

12. Are books in the various Departmental Libraries classified on a uniform system, and does that system conform to the one adopted for the General Library?

13. Are Departmental Libraries officered by regular trained assistants or by student help?

14. Are your regulations governing purchase of books and organization of Departmental Libraries available for distribution? The Committee would in that case respectfully request that a copy be returned with this questionnaire.

Of the libraries addressed, only one, the University of Wisconsin Library, failed to answer. This institution has so far not been seriously hampered by departmental library problems. Its book resources are, with a few well-defined exceptions, kept together in the Central Library. For this reason the library authorities may have deemed it unnecessary to make a statement.

Many of the answers received indicated that the term "Departmental Libraries" was by no means given the same interpretation in all institutions. In some cases it was made to include large professional libraries, such as those of the Law School and the Divinity and Medical Schools, as well as minor collections of fifty to one hundred volumes kept in laboratories or seminars. Most of the answers, however, attempted to differentiate between large and permanent collections installed for use of schools, departments, or groups of departments, and minor collections of more or less temporary character kept in laboratories and seminar rooms.

At the University of Chicago the term "Departmental Libraries" has been used to cover collections of books and pamphlets purchased or otherwise acquired by the University but assigned to a Departmental Library. At present it holds more particularly for the departments whose libraries are not housed in the Central Library building, i.e., Psychology, Physics, Chemistry, Astronomy and Mathematics, Biology, Geology and Geography, Classics, Divinity, Law, Education.

The books of the Departmental Libraries of Philosophy, History, Sociology, Political Economy, Political Science, Modern Languages and Literatures, and the old General Library, are now gradually being merged into one central collection. This, in spite of the fact that Departmental Reading-Rooms, each with its own attendant, reference collection, and author catalog, are still kept up, tends to reduce materially the difficulties and expense of administration as far as these departments are concerned. The

report applies, therefore, more specially to the first group of Departmental Libraries mentioned above.

Some of the responses received were accompanied by suggestive explanations of special conditions existing in particular universities, and copies of the rules and regulations so far adopted for the control of the Departmental Libraries. Extracts from these communications are included in the report, together with a summary of the answers, question by question.

SUMMARY OF ANSWERS

1. Of 24 libraries responding, the great majority hold the bulk of their books in the General Library, only small, selected collections being kept in departments. In addition to the University of Chicago, Johns Hopkins, Illinois, Indiana, and Texas seem to have the major part of their book resources in Departmental Libraries. While Columbia and Harvard house in Departmental or Professional Libraries 200,000 and 350,000 volumes, respectively, more than two-thirds of their collections remain in the General Library.

2. In the majority of libraries the assignment of books to Departmental Libraries is under control of the librarian, working in connection with the library committee or library council. Some libraries report that the matter is controlled by the university librarian or the General Library.

3. The division and allotment of book funds is usually under central control—in most cases, of a library committee of which the librarian may be the chairman or the secretary. The funds are allotted by subjects rather than by departments. In some universities, e.g., Iowa and Nebraska, there is no division either by subjects or by departments, the understanding being that each department submits orders for all books wanted, purchases being made as fast as the funds permit, care always being taken that the expenditure for any one department does not reach an unreasonable amount. In addition to Chicago, Indiana and Texas seem to be the universities in which distribution by departments is still favored.

4. Withdrawal of books from General Library for use of departments and transfers from one department to another are usually arranged by the librarian in consultation with the department concerned, the library committee being called upon to settle difficult cases.

5. Books are usually returned to the General Library when not much used, the matter being arranged by the librarian in consultation with the department. There seems to be no definite rule as to the time for return of books lent to departments. Presumably, if not called for by other departments or individuals, they are allowed to remain in the Departmental Library for an indefinite period. In a few instances books are returned to the General Library once a year.

6. The cost of a book is usually charged against the department which orders it or against the subject covered by the book unless there is a special fund for the subject or department. Most answers indicate that the department which orders, pays, provided always that there is a departmental book fund.

7. The fact that a book is purchased on the recommendation of a department and paid for out of its appropriation does not in a majority of libraries decide the location of the book. Such books are, when of general interest, usually shelved in the General Library.

8. Different editions of the same book and different books on exactly the same subject or the same phase of the same subject are usually kept together in one library, exceptions being few and the separation in those cases usually temporary. Sets of the same periodical or of the proceedings and transactions of the same society are not separated.

9. Space and funds available usually determine the size of the Departmental Library. In one case the limit is reported as 200 volumes; in others there is a general regulation that the collections in Departmental Libraries shall be limited strictly to working books; in still others the size is regulated by the library committee, the librarian, and the president.

10. Access to Departmental Libraries

is usually free to all students without distinction. In some cases, it is granted only to graduate students; in others, to graduate students of the department and to all members of the faculty. In some cases the librarian issues cards to individuals; again, the matter may be arranged with the department concerned.

11-12. The aim is in general to have all books in Departmental Libraries represented in all catalogs of the General Library and to have a uniform system of classification for all libraries.

13. The largest and most important Departmental Libraries have for the most part trained assistants. The others are looked after by members of the faculty, the secretary of the head of the department, or by student help, as the case may be.

From the detailed reports furnished it appeared that:

(a) Assignment of books to Departmental Libraries is under the charge of the librarian at Clark, Columbia, Cornell, Harvard, Illinois (for the most part), Iowa, Leland Stanford Junior, Missouri, Northwestern, Nebraska, Pennsylvania, Princeton, Washington, and Yale.

It is under departments at Indiana and Texas (in part).

It is arranged by a General Library Committee working with the Librarian at Brown, California, Johns Hopkins, McGill, Michigan, Minnesota, and Ohio.

(b) Book funds are apportioned by subjects, not by departments, at Brown, Columbia, Cornell, Harvard, Johns Hopkins, Leland Stanford Junior, McGill, Michigan, Missouri, Ohio, Pennsylvania, Princeton, and Toronto.

Book funds are not apportioned to departments, but assigned to the General Library, which usually keeps a record of the expenditures for books in any particular subject at Clark, Iowa, Nebraska, Northwestern (with the exception of one or two departments), and Yale.

Book funds are apportioned to departments at California (in part, the larger share being assigned to the General Library), Indiana, Minnesota (with large assignment to the General Library),

Texas (little over one-half to departments, rest to General Library), and Washington (larger part to departments).

(c) The allotment of books to Departmental Libraries as permanent deposits or their return to the General Library at stated periods is usually regulated by mutual agreement between the Librarian, or in some cases the Library Committee, and the department.

The libraries in which the General Library seems to have more control over the matter than in most institutions are Cornell, Leland Stanford Junior, Michigan, McGill, and Yale.

(d) To the question, Does the department which orders a book pay for it when by subject-matter it belongs to another department or the General Library? the majority of libraries answer that the department which orders, pays. This, however, does not necessarily mean that the book is placed in that department. Missouri, for instance, places the book in the General Library; McGill and Cornell may buy it from general or discretionary funds, or arrange with a second department to share the cost; Pennsylvania and Toronto charge the cost against the department to which the book naturally belongs, provided always that the head of that department is willing to pay; at Princeton the department which pays is usually favored in the classification of the book when that is possible.

(e) As regards the location of a book bought on recommendation of a department when by its subject-matter it belongs more properly in another Departmental Library or the Central Library, the department which orders usually receives the book. At Brown and Illinois the book may, in case of conflict, be placed in the General Library. The General Library is also given preference in such cases at Columbia, Cornell, Harvard, Indiana, Iowa, Leland Stanford Junior, McGill, Minnesota, Missouri, Toronto, and Yale. At Indiana, however, the department may request the transfer of the book.

The Library which orders is given preference at Johns Hopkins, Ohio, Pennsylvania and Texas.

The first proposals of the subcommittee, after it had completed its study of the material and evidence at hand, had contemplated rather sweeping changes in some of the existing rules and practices, the most important, perhaps, being distribution of book funds by subjects rather than by departments, and the assignment of books of general character to the General Library, even when ordered by a department, the Departmental Library concerned being in all such cases entitled to borrow the book for an indefinite period. However, the opinion of the full committee that such measures might prove too radical, finally prevailed.

Accordingly, in June, 1915, at a final meeting of the committee, certain general principles and specific recommendations were adopted. The University Libraries include the General Library, the Departmental Libraries, and the House Libraries, all under the general administration of the director. The Departmental Libraries are to be confined to the special subjects determined upon, and to the most used reference books. All new books are to be located where they will be of most service, whether in the General Library or in a Departmental Library, assignment to be made by the director. The department recommending the purchase is notified of the book's location, and a card is supplied for the department catalog. The first or only set of a given periodical or serial is not to be divided among libraries, but to be assigned where it will be of most service. Appeal from the director's decision may be made to the Board of Libraries. Books of general character ordered by departments are now, with few exceptions, classified and cataloged as part of the General Library, and charged to the department which has placed the order, obviating laborious and expensive changes in cataloging records required under the old order. While the changes made may seem only confirmation of library practice already well established and long accepted by the best authorities, for the University of Chicago it has been a distinct step in advance, and the report will be of value to other libraries.

LIBRARIES IN NEWFOUNDLAND

THE only storehouse for books in Northern Newfoundland or Labrador is in Dr. Grenfell's headquarters at St. Anthony, and the library work initiated by Marian Cutter of Brooklyn operates from here.

Dr. Grenfell is constantly soliciting for all branches of his work, and Miss Cutter's share has been the collecting of about 1200 books out of a total useable collection of about 2500. All books donated to the Grenfell Association in New York are inspected by Miss Cutter.

Miss Cutter began her work in 1914, when she visited Newfoundland, and ever since then her absorbing interest has been to place this collection on a systematic working basis, with a model village library at St. Anthony and a distribution of traveling libraries among the outports. Dr. Grenfell still continues in a lesser degree a practically unrecorded depositing of books wherever he finds need during his trips on his hospital ship.

Financially, Miss Cutter has borne the brunt of the library venture, altho she was a guest at St. Anthony for some weeks in the summer of 1916, when, with Caroline Ulrich, also of the Brooklyn Public Library, she visited the Grenfell mission and further organized the library work. Miss Cutter and Miss Ulrich were returning from this summer's work on the *Stephano* when it was torpedoed off the Nantucket lightship in October.

Following this visit, Miss Cutter secured the services of a trained librarian, a native of Newfoundland and graduate of the Syracuse Library School, to take charge of the library. Her salary was met in large part from Miss Cutter's private purse, tho Dr. Grenfell did assist somewhat toward her support last winter. This aid, however, hardly covered the intensive social, industrial and library work done by the librarian right in St. Anthony, which is Dr. Grenfell's "model city." She has been succeeded by Helen Curtis, who expects to remain permanently in the position.

Miss Cutter believes that if this carefully planned library system can be nursed thru its infancy, it will eventually be sustained by the government.

TWO ATTRACTIVE SMALL LIBRARY BUILDINGS

THE two small libraries shown on the opposite page are excellent proof that even in these days of high prices a very attractive library building can be erected for

\$10,000. The one at Caldwell, N. J., cost \$10,000, complete and ready for use, including indispensable furniture and fixtures and architect's fee. Its interior arrangement, shown by the accompanying plans, is simple and easily supervised, the book-

FLOOR PLANS FOR THE PUBLIC LIBRARY AT CALDWELL, N. J.

CALDWELL, N. J., PUBLIC LIBRARY

CLEAR LAKE, IOWA, PUBLIC LIBRARY

TWO ATTRACTIVE SMALL LIBRARY BUILDINGS THAT WERE ERECTED FOR \$10,000 EACH

stacks being ranged against the walls between the windows. The reading room is 26 x 46 feet, and the lecture room in the basement 27 x 27.

The second building has just been finished in Clear Lake, Iowa. So far it has cost \$10,000, but some furniture, yet to be obtained, will probably make the total about \$11,000. In this building, which is a little larger, being about 45 x 59 feet, low bookshelves partly divide the interior into reading rooms for children and adults, a reference room, and workroom and office for the librarian. In the basement a lecture room about 27 x 41 feet and a staff room 14 x 16, are special features.

MOTION PICTURE ACTIVITIES AT THE BROOKLYN MUSEUM

EARLY in the spring of 1916, in response to repeated requests of parents and teachers, the museum undertook to provide in a series of "balanced programs" motion picture entertainments suitable for children and young people in general. At first these programs, which were and still are given on Monday afternoons at 3:30 in the museum auditorium, were arranged in two series; one designed for young children in the elementary grades, and the other, on alternate afternoons, designed for intermediate and high school students. This plan was abandoned last fall, however, and programs have been arranged and are offered for "children and young people." The present plan is believed to be more satisfactory to the majority of the audiences.

All pictures shown at the museum—this means each and every reel—no matter how favorably recommended, are passed upon by the docent, Mrs. Mary B. Morris, who is in charge of the work, or by a committee composed of mothers and teachers.

Six reels constitute the usual program which lasts about one hour and a half, one reel of travel, one reel of nature study and about four reels which are purely entertaining. An admission fee of ten cents is charged, except for children or guests of museum members, who are admitted free.

The program included here is considered one of the best arrangements for children

from about nine to twelve years of age—the average age here.

Your Obedient Servant (3 reels)

(Adapted from Anna Sewell's story of Black Beauty in which Black Beauty tells his own story of his happy youth on a Kentucky blue grass farm with his beloved master, his master's mother and his sweetheart. When the war between the States comes, hard times and ill treatment follow. When Black Beauty is beginning to despair, his former master finds him and takes him home to Kentucky, to a luxurious box stall, good food, green grass, and kindness and affection.

A Duke for a Day

The experiences and sensations of a plain young American who for a day believes himself heir to a ducal title and estates.

America's Greatest Wonder

A beautiful scenic of Niagara Falls.

Raising Ostriches in South Africa

A film showing the habits and methods of raising the "elephant of birds."

Angling for Trout

The absorbing and thrilling sport of catching this elusive and crafty fish.

The Pied Piper of Hamelin

A fanciful and delightful illustration of the old folk tale in which the Pied Piper lures first the rats and then the children of Hamelin town into the side of the mountains. The captions are from Robert Browning's poem of that name.

The museum has not yet definitely planned these programs in accordance with work being carried on either in libraries or high schools beyond complying with the requests of individual teachers and students for special reels, some of which were associated with work in the schools, as, for example, "The Return of Ulysses" which was requested by a group of teachers in the evening high schools in connection with the Odyssey. The average attendance on days which are not particularly stormy is from one hundred and fifty to two hundred, and, as said before, the average age is somewhere between nine and twelve. They are tremendously interested in this work at the museum and have been pleased with the response from Brooklyn teachers and parents.

FROM the February *Bulletin* of the Evanston (Ill.) Public Library: After having been closed four Sundays and four Wednesdays, the library is again observing its regular weekly schedule. We are glad of it. Heatless days are as unwelcome as meatless books.

LIBRARY WAR SERVICE

THE announcement that General Pershing had authorized shipping space to the amount of fifty tons to be set aside each month by the United States army and navy transport service for the shipment of A. L. A. books to our soldiers in France, brought home to many people as nothing else had done, that there is indisputable need of reading matter among our men on the other side. Fifty tons is estimated to be about 100,000 volumes, and the A. L. A. has undertaken to see that they are provided.

OPENING THE BOOK DRIVE

The nation-wide book drive, which began March 18 and will end only with the war, must be kept constantly before the public, so that this "first hundred thousand" may grow into "millions for defence" against homesickness and worse.

No days are bookless days!
Poughkeepsie asks you to do your part
and part with your books for our boys.

The campaign in New York, organized by F. F. Hopper, of the New York Public Library, is described elsewhere in this issue. At the time of going to press, few notes had been received from other places. In

Poughkeepsie a special poster was designed by Frances Rollinson Booth, a daughter of one of the library trustees and a student in the Art League in New York City.

The drive for books in St. Louis was conducted in conjunction with drives made by the Red Cross, Y. M. C. A., and other organizations, for phonograph records, boxing gloves, and other recreational material. All publicity and solicitation work was done jointly, and the organizations concerned opened a joint headquarters and reception room in a large building formerly used as a garage, on the corner of Twelfth and Locust streets. Here all material was received and after the drive was over it was sorted and delivered to the organizations that can use it. All books, of course, went to the St. Louis Public Library for distribution to camps.

SCOUTING FOR BOOKS

Ho Scouts! Your big brothers, the soldiers in khaki, are calling to you. They are asking you to send them some of your books for their Camp Libraries. Of course, they don't want the "kid" books or the trashy ones that present up-to-the-minute boy heroes doing impossible things. But those favorite boys' books full of perilous adventures and noble daring and heroic action, with their exciting suspense, their thrilling surprise and the big bang at the end, these are the boys' books the soldiers want, and that you must give.

During the week of March 18-25 a National Campaign to collect books for the soldiers' libraries will be promoted by the American Library Association, and a special invitation has been extended to Boy Scouts everywhere to contribute their *choicest* and *newest* books, as described above and, if possible, by the authors listed on the other side of this leaflet.

Each scout should secure or give at least one book, and each troop a hundred, which means that some of you will have to give more than one book or appeal to chums and boy friends for the balance.

The books should be taken personally to the Public Library during the week of the general Book Campaign, and report made to the Scoutmaster of the number contributed.

In communities where there are no libraries, let the books be brought to Troop Headquarters and forwarded from there to the nearest town having a Public Library.

This is the message sent out by the library department of the Boy Scouts of

America to scouts all over the country, and of the one hundred and fifty authors listed in the leaflet nearly all have been represented in donations received. The finest kind of co-operation has been given by the Boy Scouts everywhere, not only in the solicitation of volumes by troops, but in individual offers of service of many sorts.

NEW BOOKPLATE FOR WAR SERVICE BOOKS

A new bookplate will be used henceforth in the war service libraries. It is $2\frac{5}{8} \times 3\frac{1}{2}$ inches in size, and printed in color, reproducing Mr. Falls' poster. The wording has been changed to read: "War Service Library. This book is provided by the people of the United States through the American Library Association for the use of the soldiers and sailors."

DISTRICT MEETINGS

The camp librarians of the southeastern group of camps held a round-table conference in Atlanta, Feb. 28-Mar. 1. Carl H. Milam, from the Washington headquarters office of the Library War Service, presided. The following camp librarians were present: Adam Strohm, Camp Gordon; John G. Moulton, Camp Jackson; F. L. D. Goodrich, Camp Greene; Robert P. Bliss, Camp Hancock; George L. Doty, Camp McClellan; Ralf P. Emerson, Camp Sevier; Glenn F. Griffin, Camp Shelby; Louis J. Bailey, Camp Sheridan; William F. Yust, Camp Wadsworth; Frederick Goodell, Camp Wheeler; Lloyd W. Josselyn, Camp Johnston; Charles D. Johnston, Fort Oglethorpe; also C. Seymour Thompson, librarian of the Savannah Public Library, who has assisted the War Service by visiting and reporting the library needs of a number of the Southern Naval Stations.

All agreed that the Camp Library Service is big enough to warrant the biggest men in the profession entering it, and that continuous service and responsibility are essential.

A meeting of the camp librarians of the southwestern group was to be held at Waco, Texas, Mar. 21 in the Waco Public Library, Pauline McCauley, librarian. Mr. Wyer, chairman of the War Service Committee, was expected to be present.

OVERSEAS LIBRARY SERVICE

A full report by letter as to the situation in England and at the Naval Bases has been received from Dr. Raney, and one as to the situation and opportunities in France is expected within a few days. Meantime cablegrams give assurance that he has initiated the necessary general relations, is already in close touch with the military and naval authorities, and also with the representatives of the Y. M. C. A. and other welfare agencies, and has reached an understanding with them as to the nature and method of the co-operation necessary. As to the Y. M. C. A., these are confirmed by reports from its chief representative in Paris to its headquarters in New York. They indicate that books sent from this side will be properly cared for at the ports of debarkation, and disseminated from there.

Dr. Raney has had conferences with both Admiral Sims and General Pershing. The latter resulted in the decision of General Pershing to assign fifty tons of cargo space monthly to the transportation of reading matter.

Meantime, thousands of books have already been shipped—ten thousand the week of Mar. 11 and eleven thousand the week preceding.

Burton E. Stevenson is soon going abroad to assist in the conduct of the overseas service.

NEWS OF THE CAMP LIBRARIES

Camp Devens, Massachusetts

The A. L. A. building at Camp Devens, which has been in use for some time, was formally opened on Mar. 6. Maj.-Gen. Harry F. Hodges, the commanding officer of the 76th Division, and Governor Samuel W. McCall of the Commonwealth, were the central figures. The ceremonies made the afternoon one of the fête occasions of the 76th Division. The Governor arrived at the main gate by automobile, accompanied by members of the Library Commission and followed by his staff. Major-General Hodges, accompanied by mounted troops, met him at the gate and rode with him to the library thru a line formed by soldiers extending from the main gate to the library building, several thousand in

number. Bands and stands of colors added to the military dignity, but late visiting librarians were somewhat embarrassed by being obliged to pass almost in review thru this entire military line.

The ceremonies were arranged by and in charge of the Free Public Library Commission of Massachusetts, under whose direction the Library Association work has been conducted. Charles F. D. Belden, chairman of the commission, presided, and other members of the commission attended, with the local secretaries of the commission and a few librarians from adjoining towns. Wives of the officers assisted E. Louise Jones, general secretary of the commission, in serving refreshments.

The exercises were held before the fireplace in the library. In presenting the building to General Hodges, Mr. Belden outlined the campaign of the American Library Association, which made the building and the library available, and indicated somewhat the work which has been done in developing the library, which started at the camp in September, when the camp was first opened. He told of the work which the A. L. A., with the co-operation of the commission, has accomplished thruout the Commonwealth in placing the 70,000 volumes which have passed thru the Boston Public Library, in camps, naval stations, on transports, torpedo boat destroyers, etc.

In accepting the building and its books, Major-General Hodges expressed the hope that this cantonment might become a permanent camp, following its military process for years after this war is over. "The government takes good care of the men here, clothes them well and gives them more than they can eat," he said, "but on the physical side the government begins and ends. This library building is one of the means of meeting their other needs, and perhaps it is best that the government should leave that work to citizens and bodies they organize. It draws men nearer to the citizens, and I think you will agree with me that never in the history of the country have the people and the government been closer together than now."

After the General had graciously thanked the American Library Association for the

use of the library, J. Randolph Coolidge, Jr., of Boston, a member of the War Library Council Board, brought greetings from the Council and read a letter from Director Dr. Herbert Putnam, and also from Mr. Montgomery, President of the American Library Association. Mr. Coolidge paid a very courteous tribute to the women all over the Commonwealth, who had given so freely of their time and services to make the library such a success.

Mr. Belden then presented His Excellency, Governor Samuel W. McCall, who said in part:

"This is the only library in Massachusetts dedicated to the work of soldiers. There may seem incongruity between libraries and war. War is very practical, but there is no incompatibility between the two." He cited contributions to literature by great officers, Caesar, Napoleon and Grant, but advised poetasters in the ranks to choose other models than the verses of Frederick the Great. "The beauty about books is that you can choose your own company," he continued. "In the republic of letters there is pure democracy. Officers and men, whatever their rank, can meet great minds in books and they will be their companions."

At the conclusion of the address, the Governor touched a match to the fire on the hearth as a dedicatory mark.

John A. Lowe, agent of the Free Public Library Commission, and camp library organizer, explained the arrangement of the building, pointing out the chief features, such as the "special editions alcove," the "French book and magazine alcove," the collection of military war pictures in the filing cabinet and on the walls, and a special exhibit of photographs showing French civilization thru examples of its architecture from its crude stone monuments to the present buildings. He pointed out various phases of the extension work to the officers present and urged them to visit the library with their men even in squads and platoons as they were on hikes and passing the building.

After the singing of "America" the exercises were brought to a close with a reception and a visit about the camp by the Governor, his staff and guests.

Camp Upton, New York

The library building at Camp Upton was open for service on Feb. 8. No special exercises of dedication have been held, but the library is being well used. Located on a low hill, within a stone's throw of the officers' club, Y. M. C. A. headquarters, and other administrative buildings along Upton boulevard, the "civic center" of the camp, the library has every advantage of position. Inside, with its fireplace, its flood of sunshine in the day time, its rows of books in gay bindings, its maps and pictures on the walls, and its comfortable Windsor chairs, it is a most inviting spot. The library has about 8000 volumes in its central collection, and twice as many in its branches. Eight Y. M. C. A. buildings, three K. of C. huts, two Y. W. C. A. buildings, one Fosdick Commission building, the base hospital and the remount station, have from 600 to 1000 books each, a small collection is in the Union Church, and in over two hundred barracks, where library shelves are an integral part of the building, small collections of from 75 to 100 books have been installed. Figures of circulation are hard to get, but Mr. Tolman reports that these small collections show evidences of wear, and that the books in the main building are likewise much appreciated. As in every camp, the demand for military and technical books far exceeds the supply.

Camp Dodge, Iowa

The library in Camp Dodge now has about 15,000 volumes, part of them in the main building and part at the Y. M. C. A. branches. A traveling library has also been sent to each regiment in charge of the regimental chaplains. Besides books in English the library has sections of Yiddish, Italian, French, Polish, and Scandinavian, together with a number of French magazines.

Up to the end of February there had not been more than 19,000 men at Camp Dodge, but at that time the new quota was beginning to arrive and ultimately 45,000 will be cared for. *The Camp Dodger* for Feb. 22 gave about three-quarters of a column to a description of the work of the camp library.

The men from camp also have a "soldier's corner" in the Public Library at Des Moines, where there are always from ten to twenty-five boys reading and studying, and somebody is usually sitting at the little desk in the corner writing home.

Camp Grant, Illinois

Our first report from Camp Grant comes from Raymond L. Walkley, who was sent there in November to help in opening the camp and who remained for several weeks. Mr. Walkley writes:

The first posts for the library building were set the day before I met Mr. Roden at Camp Grant to look over the prospects. That was on Nov. 7, and the contractor said the work would probably be finished in a week or ten days. With that estimate in mind, I kept one eye on the construction of the building and the other on the six Y. M. C. A. units which were distributing books, until J. C. Barbee came on Nov. 19, to help me play the game of watchful waiting.

Since the Camp opened the Y. M. C. A. had been receiving books from the Chicago Public Library. These were labeled "Collected by the Chicago Public Library. Distributed by the Y. M. C. A.," and this wording of the label made the Y. M. C. A. consider the books as their property. . . . The users charged the books to themselves by the following honor system: Two blank-books were tied by strings to the shelves, one marked "Books taken out," the other "Books returned." A man who took a book from the building would write his name, the date, and (often) the title of his book in the first blank book, and when he brought the book back, he made a similar entry in blank book number two. Apparently no systematic attempt was made to check up the two blank books to make accounts balance, and the scheme gave absolutely no clue to lost books. Before I left camp they had installed a card-charging system, and at last reports four Y. M. C. A. units and three K. of C. buildings had their libraries under A. L. A. direction.

We didn't get into our quarters in the A. L. A. building until the first week in December, as the stoves were lost somewhere between Detroit and Rockford. We made the place look like a library by arranging on the shelves about 6000 books which had been sent from the Chicago Public Library, even tho it was so cold that our hands were chapped, cracked and bleeding. If a soldier came in and could stay in the cold long enough to find a book he liked, we made a card, pasted in a pocket, and let him take it to a warmer place for reading.

Finally the runaway stoves were discovered, and Mr. Barbee and I began to shovel in coal, but we found that a ton would last less than two days in a building in which the ventilators leaked at the peak of the roof. We were attacked by gales of wind and a temperature of fourteen below, so that we could stand a foot from the large heaters and see our breath. We got carpenters to stop the leaks overhead, put in a small stove to keep our quarters warm enough to sleep in, and began to loan books.

In January we had three blizzards which cut off the camp from all outside communication. No mails, no trains to Rockford or Chicago, a forty-mile gale and weather below zero most of the time. Yet we had men stopping in continually to thaw out frozen parts, and broke all ordinary circulation records. One man encouraged us by saying that he came to the library because the Y. M. C. A. was too cold.

To prepare all our own books for circulation, we had offers of volunteer help from women in Rockford, but the military authorities would allow no women to work in camp, so we had to do all the library work ourselves, classifying books and writing cards while we were not sweeping and carrying cans of coal. At times the guard-houses are so full we can get some prisoners to relieve us of a part of the janitor work, but they are not very thoro. To get our floor oiled to our own satisfaction we had to scrub it clean ourselves, and then hire some one to apply the oil. Volunteer help from soldiers is scarce and cannot be depended upon. One appeal for men with library experience brought a young fellow who four years ago had worked as page for five weeks in the Chicago Public Library. Miss Hubbell of the Rockford Public Library has helped us a great deal by writing cards for the books we could check up on one or two lists we had, and we were able to get a couple of high school boys to label and pocket books during the Christmas vacation.

Before we came one of the educational secretaries had begun to place small collections of books in the company barracks; we encouraged this practice among the other Y. M. C. A. men, and sent a good many sets from our building. Some of our tons of magazines were placed on departing troop trains, and many were sent to hospital wards. When we brought a bundle of magazines to one of the quarantined barracks, the men would lean out of the windows and wave at us as if we were saving them from certain death. We have supplied a regiment of engineers with about 400 books to be taken to France, and some of the chaplains have made similar requests which we have been able to fill. We can get our books much better distributed now that we have a new Ford—blizzards permitting. One of the few

demands we haven't been able to meet was that of a man who came in with a large bundle tied in an old newspaper, asking if this was the Camp Laundry. He probably thought A. L. A. meant American Laundry Association.

We have one of the best locations in camp, close to the Post Office, Division Headquarters, Y. M. C. A. Headquarters and Auditorium, K. of C. Headquarters and the fire station.

Saturday and Sunday are by far the busiest days, and we are open on those days as well as on all others from 7:30 a. m. to 10 p. m. An average of over 12 hours a day seven days a week gets rather monotonous, especially when you sleep in the same building, and so can't get away from the job even at night. On some days we loan more non-fiction than fiction, but on the average, fiction makes up about 60 per cent of the circulation. An actual count of the circulation of novels places the authors in the following order of popularity: Zane Grey, Rex Beach, Oppenheim, Rinehart, London, O. Henry, Bower, Wright, MacGrath, Tarkington, R. H. Davis, Chambers, White, Doyle and Ralph Connor. Books on the war are the most popular of the non-fiction, and these are followed in order by literature, useful arts, history and travel, and sociology (including class 355—military books). In requesting donations of books, librarians cannot insist too strongly upon the need of engineering and technical books which are nearly up to date. If we had twice as many books as we have on gasoline engines, motors, automobiles, aeroplanes and wireless, we could not begin to supply the demand in this camp.

Camp Logan, Texas

In a good long letter Malcolm G. Wyer, librarian for the University of Nebraska, tells us about the work of organizing and administering the A. L. A. library in Camp Logan. He writes:

I do not want Camp Logan to go entirely unmentioned in your accounts of camp libraries. While I was at work in the camp I was so fully occupied in the actual work of developing the camp library system and bringing it to the attention of those for whom it was established that I could not find time to write for the library periodicals. And now the work at so many libraries has been described that I imagine interest is not so keen. But I will send a few notes of our experience.

Camp Logan is a tent camp, the home of the Illinois National Guard, and is a city of about 33,000 men. It is located in the midst of a beautiful pine forest about five miles from Houston, Texas. During the winter the government made extensive improvements in the camp and it was evident that the location

and health conditions were so satisfactory that the camp was to be made permanent.

I reached the camp about Nov. 20, and found approximately 4000 books in use in the various Y. M. C. A. buildings, mostly A. L. A. books. About half of these books had been collected and sent out by the Houston Public Library. Miss Julia Ideson, librarian at Houston, had supervision of the books and with Miss Schnitzer, her assistant librarian, had given the Y. M. C. A. officials many suggestions in regard to their care and use. I saw at once that more books were needed and Mr. Dudgeon promptly ordered more sent from Denver and St. Louis. The Y. M. C. A. provided me with lodgings in one of their huts and I spent the first two weeks in getting acquainted with the camp and in familiarizing myself with camp life—routine, geography, personnel, etc. I spent my evenings conversing with the men as they came to the Y. M. C. A. building for books, finding out what books they liked, what they asked for and all sorts of information as to their reading interests. I ate my meals at the enlisted men's mess also. During my last few weeks in camp I saw the other side of camp life by taking my meals with the officers of Division Headquarters.

Then I began the work of organizing the collections in the Y. M. C. A. huts and installed a uniform charging system in each building, using supplies made and printed locally. We made an accession list for each collection, both as a record of books supplied and to provide a numerical record to simplify the loan file. The Y. M. C. A. secretaries could not keep the book card charges filed alphabetically by author and it was much simpler and quicker to file the cards numerically. The book number was on the A. L. A. label on the outside of the book and on the book card. We followed the accession number with the number of the Y. M. C. A. hut—for instance 97-46 was Book 97 Y. M. C. A. hut 46. This system was warmly welcomed by the secretaries, as it was much simpler and quicker than the ones they had devised. In two instances where the secretaries preferred their own system and did not wish to change, I let them have their way, but in a short time they came of their own accord and asked me to install the A. L. A. system, as they heard it was so successful in the other buildings.

Books were now arriving in great numbers from Kansas City, St. Louis, Denver and A. L. A. headquarters. Thru the personnel office I found the names of some men with library experience, but the authorities would not spare them from military training. I finally arranged to get eight "alien enemies" and put them to work labeling, stamping, pocketing, etc. They could not write the cards, as invariably they put as the author the words on the title page in the largest

type, but they were making good headway when a school for gas instruction was assigned to the building I was using. The English officers giving the lectures objected to the presence of my aliens and I was forced to send them home. After several days' experience with "details" of prisoners working for me under armed guards and with volunteers I hired some high school boys to work during Christmas vacation. Later I secured permission to use an officer's mess shack as a work room and here again I put some aliens to work. We were thus able to double the Y. M. C. A. collections, establish one in the K. of C. building and send over 800 books to Ellington Field, a nearby aviation camp. And by the time our library building was ready we had prepared for circulation all of the books on hand. I arranged for three "aliens" to be assigned for janitorial work in the building and they did the necessary labeling, etc., also. In our building collection we stamped each book and card with an automatic numbering machine, thus giving each book an individual number to avoid confusion over duplicate copies, etc. It was a very successful arrangement.

Our building was finished Jan. 26 and we at once moved in our books, installed the furniture, maps, exhibits, etc., and were officially inspected by General Bell at noon on Jan. 27. We were allowed a fireplace and a fine screened porch for summer use. We got some old hickory arm and rocking chairs for use about the fireplace and on the porch and did all we could to give the room the appearance of a men's club. The fiction, newspapers and magazines are all at the end of the room near the fireplace and the reference books, class books, and wall maps are at the other end. Our show windows are kept filled with books and make an attractive advertising feature to catch the eye of the passers-by. Our opening was not a social function, with music, etc., but a military and business affair planned to impress the officers that the library was for service and not display and to show them that it is equipped with the books necessary to make it an important factor in military training as well as for recreational purposes. General Bell accepted my invitation to himself and staff and to the commanding officers of the camp to visit the library, and issued an order which resulted in the attendance of practically all the leading officers in camp. I briefly explained the purpose of the A. L. A. and the aims for which the camp library was established and General Bell urged all present to use every means possible to call the attention of their officers and men to the library.

I made a number of changes in the plans, such as making a door opening directly outdoors from the living rooms, readjusting the back door, etc. I stained the interior window and door frames, wainscoting, loan desk, ends

of bookcases and edges of shelves and the posts to the height of the book cases, and this made a great improvement in the appearance.

The library was crowded from the opening day. At eight o'clock in the morning of the first day, we heard a pounding on the door and an officer was demanding entrance, altho a notice stated that we opened at nine. We let him in and he explained that Gen. Bell had just made effective in Camp Logan the order from Gen. Pershing that all map drawing instruction in the U. S. army be based on the metric system. He said he was scheduled for a lecture on map drawing at nine o'clock and his ideas on the metric system were too hazy to face a class. Of course he got the information. Our A. L. A. books proved equal to the test of use and we were able to supply books on magic, shorthand, carrier pigeons, veterinary medicine, law, wireless telegraphy, map reading, and a demand from a mule driver for something late on automobiles. During the first few days the number of classed books taken out exceeded the fiction.

The American Library Association is already well known in Camp Logan. Placards in the Y. M. C. A. and K. of C. buildings announce that those books are branches of the A. L. A. camp library. The building is well marked with A. L. A. signs and our delivery truck constantly calls attention to the camp library of the A. L. A. One officer who as a library board member in Manila had studied the A. L. A. catalog said to me, "The American Library Association always does things well." Everyone spoke most favorably of the building and of the manner in which both building, books and service were so quickly provided. One man in close touch with the camp said "I take off my hat to the American Library Association for the high grade of books supplied."

Altogether it was a great privilege to have had this opportunity for camp library service.

CATALOGING AND CLASSIFYING AT CAMP TAYLOR

Invaluable aid to the Camp Library at Camp Zachary Taylor has been rendered from the beginning by the members of the staff of the Louisville Free Public Library, who have prepared all the books for the shelves, including the making of an author and title catalog. A number of attractive posters around the room calling attention to books of various classes have also been prepared by the ladies of the library, who have taken a great deal of pride and interest in the growth of the work at the camp. One feature of the cataloging may prove of more than local interest. Every book and every book card have been

stamped with a consecutive numbering machine, registering in duplicate. No further accession record is kept, but this not only enables one to tell in an instant how many books have been put into the library, but renders the identification of any particular copy of a book certain at a glance.

A somewhat more extensive scheme of classification of military subjects worked out by Miss Wigginton, head cataloger of the Louisville library, is appended. This has made the task of finding books on these topics much easier than it was before. Almost every day connection is made with the city library and from seventy-five to a hundred volumes a month are borrowed as interlibrary loans in answer to special requests from men at the camp. The use of the city library itself is also free to every man in uniform. This special service, by which any book in the large collection at Louisville is available at the camp at a few hours' notice is greatly appreciated by the men, especially the officers.

Classification for Military Science

- | | |
|---------|--|
| 344 | Martial law. Court martial. Judge advocate general. |
| 355 | Military science. General regulations. National defense. |
| 355.3 | Organization of military forces. |
| 355.4 | Tactics and strategy. |
| 355.5 | Service. |
| 355.8 | Equipment and supplies. Quartermaster. Provisioning. |
| 355.81 | Clothing. Camp outfit. |
| 355.83 | Wagons. Transport. |
| 356 | Infantry. |
| 357 | Cavalry. |
| 357.2 | Remount and training service. Care of horses. |
| 358 | Artillery. |
| 358.4 | Field artillery. |
| 358.5 | Machine guns. |
| 358.6 | Coast artillery. |
| 610 | Medical department. |
| 613 | Hygiene. Physical training. |
| 614 | Sanitary troops. Sanitation in the army. |
| 617 | First aid. Surgery. |
| 619 | Veterinary science. |
| 623 | Military engineering. Engineers' manual. |
| 623.3 | Defensive operations. Trench warfare. |
| 623.4 | Firearms. Ordnance. Guns. |
| 623.41 | Artillery matériel. |
| 623.44 | Small arms. Musketry. |
| 623.444 | Side arms. Sabers. Bayonets. |
| 623.49 | Hand grenades. |

- 623.5 Gunnery. Ballistics.
- 623.6 Military roads, bridges and buildings.
- 623.63 Military railways.
- 623.65 Military bridges.
- 623.71 Military topography. Maps.
- 623.73 Signaling. Military telegraphy.
- 623.8 Ship building. Submarines.
- 629 Aviation.
- 641 Cooking and baking.

Camp Custer, Michigan

J. S. Cleavinger writes from the A. L. A. library in Camp Custer:

Despite the fact that the transfer of a large number of men from Camp Custer has reduced the population quite materially, the work of the library has grown steadily as it becomes better known in camp, and the figures for February show a marked increase over those for January. A total recorded circulation of 8231 volumes is shown as compared with 5034 for the previous month.

Books in foreign languages are now arriving, and it is interesting to see the eagerness with which these are taken out as soon as they are available. The library already has books in French, Italian, Spanish and Yiddish, and others on the way are in Bohemian, Polish, Modern Greek, Russian and Roumanian.

An interesting recent development of the work is the establishment of small collections in the contagious wards at the Base Hospital. There have been numerous cases of the minor contagious diseases in the camp, and the men in the isolation wards have been furnished books from the library. These are made up into special groups for each ward, so marked that the books once placed are not removed from that ward. The books, chiefly novels, are eagerly read over and over again by the men who must stay often many days after they are no longer really sick. These figures, of course, cannot be shown in circulation statistics. A total of between 500 and 600 volumes has been set aside for this use.

PERSONNEL

Louis J. Bailey, librarian of the Gary Public Library, who has been serving as camp librarian at Camp McClellan, is to serve as district supervisor, visiting Camps McClellan, Sheridan, Shelby and perhaps others.

Chalmers Hadley, of the Denver Public Library, has been delegated to organize the library service along the Mexican border.

George F. Bowerman, librarian of the Public Library at Washington, D. C., will take charge of the library at Camp Meade, Md., for April and May.

Adam Strohm, of Detroit, has been author-

ized by his library board to return to the Camp Gordon Library. The War Department plans to make Camp Gordon one of the two largest camps in the country, used not only for the concentration of troops for shipment from southern ports for overseas service, but also as depot for quartermasters' supplies for nine big national army divisions. The library service there has increased so heavily that contracts for the enlargement of the buildings have already been signed.

George F. Strong is acting executive secretary during the necessary absence for some weeks of George B. Utley, secretary of the A. L. A.

Burton E. Stevenson is to go abroad immediately to join Dr. Raney in the conduct of the Overseas service, particularly in France and England.

A memorandum of the women in library war service shows the following assignments:

At headquarters Caroline Webster of the New York State library is considering the opportunities for women in the service with the development of work at the base hospitals especially in mind. Laura Smith of the Cincinnati Public Library is taking charge of the order files for two months. Mary Henthorne, formerly of the Portland Free Library, Oregon, now with the Naval Commission on Training Camp Activities, gives some time each week to the work at headquarters connected with the distribution of books to the navy. Josephine Rathbone, assistant director of the Pratt Institute Library School, after April first will be in Washington for a part of each week taking charge of the personnel.

In the dispatch offices Alice Tyler, director of the Library School of Western Reserve, was given a leave of absence for a month beginning Feb. 25 and was assigned for work at Hoboken to co-operate with Asa Don Dickinson.

Margaret Mann, head of the catalog department of the Carnegie library, Pittsburgh, has been given one month's leave of absence beginning March 11 and has been assigned to work at Newport News with Mr. Brett.

In state work, Sarah Askew is in charge

of book service to army camps and naval stations in New Jersey. Frances Isom is inspector of the eight forts in Oregon and Washington. Thru Miss Isom's efforts at these points the library needs are rapidly being met.

In a few camp libraries women have been appointed as assistants. At Camp Hancock Anna M. Neuhauser, librarian of the Department of Bureau of Municipalities, Department of Labor, Harrisburg, has been appointed assistant to the librarian. In Camp Bowie, Mrs. Lois W. Henderson, who for some time had been volun-

teering her services, has been appointed assistant to the librarian. At Camp Shelby Mrs. Thomas T. Eyre, wife of an army officer, has been appointed assistant to the librarian. At the Base Hospital in Camp Wadsworth, Ola Wyeth, librarian of the modern language seminar, has been appointed hospital librarian. Miss Wyeth will live at the hospital with the nurses and will organize the work for the staff as well as for the patients.

Recent appointments for camp library work, not hitherto recorded, are the following:

<i>Camp</i>	<i>National Guard Camps</i>
Beauregard, Alexandria, La.	Samuel A. McKillop, librarian.
Bowie, Fort Worth, Tex.	I. R. Bundy, librarian.
Fremont, Palo Alto, Cal.	Chas. Burbridge, assistant.
MacArthur, Waco, Tex.	Glen Ely, assistant.
Shelby, Hattiesburg, Miss.	Ernest L. Johnson, assistant. Mrs. Thomas T. Eyre, assistant.
Wadsworth, Spartansburg, S. C. (at Base Hospital)	Ola M. Wyeth, assistant.
Wheeler, Macon, Ga.	L. E. Thomas, assistant.
<i>Camp</i>	<i>National Army Camps</i>
Devens, Ayer, Mass.	Herbert W. Fison, assistant.
Grant, Rockford, Ill.	Truman R. Temple, librarian.
Upton, Yaphank, L. I.	Nathan P. Levin, assistant.
<i>Other Camps</i>	
Military Branch, Chattanooga, Tenn.	Raymond J. McCoy, assistant.
Kelly Field, near San Antonio, Tex.	Harold T. Dougherty, librarian.
<i>Naval Station</i>	
Camp Perry, Great Lakes, Ill.	Edward O'Meara, assistant.

LIBRARIES AND THE FOOD ADMINISTRATION

The libraries of the United States are co-operating with the Food Administration by means of the following organization:

On the staff of each State Administrator is a Library Director of Public Information. It is the duty of this director to see that the libraries of his state put before their patrons general and local food information. To assist in this task, six to ten letters are sent monthly to each director and a *Bulletin* containing notes and suggestions is sent monthly to every library.

Each library is asked to assign a definite space for the period of the war for a Food Conservation section. The following uses of this space are suggested:

Bulletin Boards

1. One bulletin board to be reserved for food facts and only timely, up-to-date material to be posted.

Books

2. Have on shelves a permanent collection of books on food production and conservation, these not to circulate, in order that they may at any time be accessible to any one wanting the information.

Magazines

3. Attention is to be called to articles appearing in current magazines, bearing on the food problem.

Pamphlets

4. Have on hand, pamphlets issued by the U. S. or state governments and all valid information to be obtained, regardless of its source.

Recipes

5. Start a file of economical recipes featuring local food products.

Lectures

6. Where a library has an auditorium, see that it is used as frequently as possible by speakers talking on the food problem. When practicable, have food demonstrations.

Exhibitions

7. Arrange for exhibitions to arrest attention and arouse interest, with the idea of following up with information of more constructive and permanent value.

Advertising

8. In any food show or state fair ask for space for a library booth in order to demonstrate to the public the library's possibilities as an information bureau.

School Co-operation

9. In co-operation with local schools call for posters and compositions on food subjects, to be exhibited in libraries.

Maps

10. It is hoped that one library in each county will display a crop and industry map of the county, in order that the local resources of a district may be called to the attention of the people.

Card Indexes

11. All libraries have been asked to make card catalogs of the agencies in their vicinity doing war service work, and of all agencies printing anything of value relating to food.

People Reached

12. Thru libraries, properly mobilized, seven-tenths of our population should be reached. There is a library for every 200 square miles of territory and for every 6000 inhabitants in the U. S. Now is our opportunity to utilize this great existing organization.

As Distributing Centers

13. The following library distribution plan is about to be tried by several states because: (1) there is a library in every large town; (2) librarians are trained to handle printed matter; (3) it is fitting that public documents should be stored in public buildings.

The Federal Food Administrator is given a list of all the libraries in the state, and

the bulletins are sent by a population pro rata to each library. If there are towns without libraries, some other institution is selected. Coincident with the shipping of printed matter a letter is written to the county food representative notifying him of the number of bulletins sent to each town in his county and requesting him to notify the different people interested in the distribution of the material, stating how many bulletins are allotted to each. Any undistributed matter may be returned to the library whence it was taken and the librarian may distribute such material or any material remaining two weeks uncollected by the persons to whom it was assigned. If possible, the libraries of a county are to report periodically to one county library as to the number of bulletins on hand, these reports to be cumulated and submitted to the director.

OTHER FORMS OF SERVICE

The following memorandum of the Cleveland Library's activities was crowded out of the March issue:

Cleveland Public Library

In its period of intensive work for the Camp Library Fund the Cleveland Public Library and its co-workers raised over \$35,700; as distributing agent for a district including Northern Ohio and adjacent parts of four other states, it has prepared and shipped 12,000 books, and has forwarded, without opening, twenty-three boxes from Rochester, N. Y.

Briefly summed up, its other war activities have consisted in furnishing publicity, supplying facts and figures, distributing literature and furnishing numerous volunteer workers for the local Draft Board and all the other campaigns, including Food Conservation, Red Cross, Liberty Loan and War Savings. Members of the staff are serving on most of the important war work committees.

To convey an idea of the amount of time and service expended it is necessary to enlarge a little upon the specific part taken in each campaign.

In the interest of Food Conservation an Information Bureau was conducted at the Main Library during the summer of 1917.

The library has answered an ever increasing volume of telephone questions about canning, drying and food substitutes, frequently furnishing recipes, and in a prominent place in the Main Library and in most of the branches there is a special table and bulletin board devoted to Food Conservation information which is conveyed by bulletins, posters and exhibits. The library has also distributed thousands of federal, state and local leaflets and bulletins, and has heavily duplicated thruout the system the best books and pamphlets on War Time Economics and Food Conservation. The heads of departments and branches have now organized into a committee to do active work during the Food Conservation Drive of the week of March 19 and especially to tie up the information work of the library with that of the "Patriotic Shops" soon to be started in Cleveland.

During the two Liberty Bond campaigns special meetings were held to interest employees, and during the second a Library Liberty Bond Club of ninety members was formed, each one of whom is making regular payments on a fifty or hundred dollar, four per cent bond thru the accounts division of the library, in whose name the bonds were secured.

Practically an auxiliary War Stamp campaign was organized within the limits of the system, with the double purpose of inducing the staff to become savers by this easy method, and to instruct them as to the best means of interesting the public. Schedules were arranged so that every member of the staff could attend one of the three meetings addressed by some member of the local War Savings Committee, stamps were put on sale at the Main Library and all the branches, and follow-up clubs were organized at many of the branches to keep interest alive and ensure prompt payment. During February, \$169 worth of Thrift Stamps were sold at the Main Library alone.

Beside furnishing volunteer workers for the Red Cross campaigns, Red Cross stamps were sold at all the libraries at Christmas time, and the club rooms of several of the branches are being used for the meetings of Red Cross surgical bandage, sewing and knitting circles.

The city campaign for providing scrap books for wounded soldiers was organized and conducted by the library and the scrap books prepared under the direction of the library committee. General instructions as to content and specifications for making were issued by the committee in convenient form for distribution. So far, 500 scrap books have been made by children's clubs and other library organizations; 3000 made by Cleveland school children and 400 by those of the Cleveland Heights schools are ready for shipment, besides many more made by individuals. For weeks the library has collected, sorted and clipped material and has supplied it to the workers wherever needed. Booklets containing two or three carefully selected short stories have been prepared in considerable numbers, as well as 500 scrap books in the form of six uniform sized cards enclosed in stout, easily-opened envelopes.

An attractive cover plate for the scrap books was designed and executed as the gift of a local artist and two of our Cleveland art-printers. It pictures a Red Cross ship under full sail, and the legend, quoted from "Parnassus on wheels," reads: "Love and Friendship and Humor and Ships at Sea—there's all Heaven and Earth in a Book."

The library has from the beginning paid especial attention to buying books which would promote the prosecution of the war and educate correct public opinion; books which give reliable accounts of the progress of the war, books in regard to production and economy and on instruction in military methods, including Red Cross and hospital work. Various annotated, patriotic lists have also been compiled and distributed, including "Military art and science," "Books about the war," "Democracy," "Thrift," and "Women's war service."

Fifteen of the staff took Red Cross first aid courses, and the staff is supporting a French war orphan.

All of our trained men are going in turn to give their services at camp libraries. Several of the trained women of the staff have been released on leave of absence to do important war work in Cleveland, Washington, Columbus and elsewhere.

SOME OF THE TREASURES IN THE LIBRARY OF TRANSYLVANIA COLLEGE

THE Library of Transylvania College, in Lexington, Ky., had its beginning in 1783 when, according to the trustees' records of that year, the Board of Transylvania Seminary "received word that the Rev. John Todd of Louisa, Virginia, has presented to the Seminary a Library and Philosophical Apparatus for the encouragement of Science in this Institution." Much appreciation is expressed in these old records of the "liberal gratuity of Mr. Todd towards the introduction of useful Knowledge in this Western Country." There is also much discussion of plans for transporting the gift across the Alleghenies. We read later that the "Library" has been received, and that a member is appointed to convey to Mr. Todd, "in the manner that will be most agreeable to him," the thanks of the Board. On the Transylvania shelves to-day stand several old volumes bearing on their flyleaves the inscription, "Rev. John Todd."

Among the initial transactions of the Transylvania Seminary Board was the passing of a resolution to expend a sum "not exceeding £50" to purchase books for the use of students. The frequency with which this appropriation is repeated is surprising, in light of the conditions of that early period.

When, in 1798, Transylvania Seminary of Lexington and Kentucky Academy of Pisgah, nearby, united to form Transylvania University, the aims of the Board became more ambitious and we read of sums of \$500 being spent from time to time to increase the libraries. Kentucky Academy had brought to this union books valued at £288. The value of those belonging to Transylvania Seminary is not recorded.

The citizens of Lexington responded generously to appeals in behalf of their university. In 1821 Dr. Charles Caldwell, of the Medical College, took with him to Paris \$17,000 with which to buy books for the medical library. He writes in his autobiography, "The time of my arrival in Paris was uncommonly and unexpectedly

propitious to my purpose. The ravages and waste-layings of the French Revolutions had not yet entirely passed away. Toward the close of that catastrophe the libraries of many wealthy and literary persons had found their way to the shelves of the booksellers. No sooner was I apprised of these precious repositories than I procured permission to ascertain of what they consisted. Some of them were richly stored with venerable literature. . . . I found and purchased at reduced prices no inconsiderable number of the choicest works of the fathers of medicine from Hippocrates to the revival of letters. Hence the marked and decided superiority of the Lexington Medical Library, in those works, to any other in the West and South and probably in the whole United States,—not excepting that of Philadelphia, the parent school of medicine in the Union."

The medical library, 8000 volumes, is almost intact and is doubtless the most valuable of the various collections. It is particularly rich in the works of authors who mark the early milestones of progress in the science of medicine. A few of these works are: Hippocrates, Paris, 1679, 13 vols.; Galen, Venice, 1597, 4 vols.; Brasauolus, Venice, 1597; Alexander of Tralles, Basel, 1533; Fallioppius, Wechel typ., 1600; Avicenna, Venice, 1608; Forestus, Rotthomagi, 1653; van Helmont, Lyons, 1655; Perdulcis, Paris, 1649; Paracelsus, Geneva, 1658; Bonet, Geneva, 1684; Thoma Willis, Geneva, 1680; Etmulleri, Lyons, 1690; Zacchia, Leyden, 1661; Chovet, Geneva, 1684; Sennert, Lyons, 1676; Ambrose Pare, Paris, 1607; Valentini, Frankfurt, 1723; Hoffman, Geneva, 1761; Lancisius, Rome, 1745; Heister, Amsterdam, 1739; Boerhaave, Leyden, 1727; van Sweiten, Paris, 1775; Wepfer, Scaphusi, 1727; Ruysch, Amsterdam, 1787; Harvey, London, 1766; Sauvages, Amsterdam, 1786; de Graf, Amsterdam, 1705; Cruikshank, London, 1795.

These books, with one or two exceptions, are folios, bound in vellum or gold stamped leather. Their exteriors, as well as their beautiful plates and type, are a delight to the booklover. Among other works of interest are early nineteenth century publications on the sylvia and flora of North

America, numerous ornithologies, profusely illustrated with handsome, colored plates. The bound manuscript theses of all medical graduates from 1818 to 1859 form a valuable collection.

The Law College of Transylvania, developed and fostered by the genius of Henry Clay, possessed a library the equal, perhaps, of that of the college of medicine, but unfortunately it has not been so well preserved. Its American Archives and early government documents are very valuable.

The academical library, built up by gifts and purchases innumerable, has interests as varied as its sources, the texts, the dedications and forewords, the bindings, the publishers, the printers' marks, the book plates, and, lastly, the inscriptions, presumably written by the owner's hand.

In 1834, "His Britannic Majesty, William IV" presented 81 folios, in each of which is bound a slip which states that the volume is "to be perpetually preserved in the library of Transylvania University." Among these works are four volumes of the Doomsday Book, reproductions of the Harlean and Cottonian manuscripts, Statutes of the Realm under the various kings, and books of charters.

In 1824, A. F. Michaux presented, thru Dr. Samuel Brown of the Medical College, a huge Chinese dictionary with translations in French and Latin. On the inside of the cover is a paper, its four corners held by old-fashioned wafers, on which is written in French, "To Dr. Samuel Brown, from his very devoted servant, F. Andre Michaux, Paris, Sept. 14, 1824."

In the Hargrave collection of State Trials in England are to be found the proceedings of the trial "of Capt. William Kidd, at the Old-Bailey for Murder and Piracy on the High Seas," the trial of Anne Boleyn, of Lord Cobham, and that of an archbishop who is tried for heresy.

The most sumptuous volumes in the library are the "classicks," massive, vellum-bound, many of them in perfect condition, tho their years are numbered by centuries—four centuries—the oldest of them. On the margins are often found notes made by some reader, in Greek letters as clear and

perfect as the type. Among the earliest works are: Demosthenes' Orations, Basel, 1532; Dionysius Halicarnassus, Wechel, 1596; Museum Wormianum, Elzevir, 1604; Dion Cassius, 1591, Oratorum Veterum, 1575, and Thucydides, 1564, the three published by Henry Stephanus, founder of one of the most famous publishing houses of the sixteenth century; Isaac Casaubon's Reflections on Athenian Philosophy, 1600, dedicated to Henry of Navarre; Diogenes Laertius, 1594, dedicated to Philip II of Spain; Rhetorica Aristotelis, 1543; Quintus Horatius Flaccus, 1543.

The many rare volumes represent the most famous publishers of the sixteenth and seventeenth centuries; Froben of Basel, scholar printer-publisher and friend of Erasmus; Froschauer of Zurich, known chiefly thru Zwingli; Petrus of Basel, publisher of the Luther Bibles; and, following up the Reformation period, Robert Stephanus, son of Henry mentioned above, publisher of the final revision of Calvin's "Institutes"; Plantin of Antwerp, noted for the beauty and importance of the production of his presses; Elzevir of Leyden, whose works were called "jewels of typography"; these and others which were made when printing was one among the fine arts.

A word about the bookplates and I shall end, tho my story is only begun. Three dignified, vellum-bound folios are the proud possessors of a cardinal's bookplate, three others wear the beautiful plate of an archbishop. There are plates with Moor's head, others with helmet and mailed wrist, suggesting the beginnings of heraldry, plates of doctors, lawyers, some with artistic design, and still others with simply a name.

To one plate only can I attach a history. There are on the shelves five small volumes of the "Craftsman," 1729, in handsome leather bindings. In each is a large bookplate of ornate but graceful design, bearing at the base these words in flowing script, "Gabriel Jones, Attorney-at-Law, Virginia." In 1776 Kentucky, then a province of uncertain status in the eyes of her parent, Virginia, sent as agents to the Virginia Assembly, George Rogers Clark and

Gabriel Jones. They were instructed to negotiate for a supply of powder, for defense against the Indians. Arrived at Williamsburg, these two Kentuckians had some difficulty in gaining an interview with Gov. Patrick Henry, but finally their request for powder was placed before the Council. To the request was added the statement that "a province not worth defending was not worth claiming," a remark supposed to carry the hint that if Kentucky did not receive means of defense from Virginia, the source from which she had a right to expect it, she would declare her independence and defend herself. The powder was granted and the difficult journey back to Limestone was covered in safety, but between that point and Lexington, Indians attempted to seize the powder and in trying to prevent its capture, Gabriel Jones was killed.

Gabriel Jones was a backwoodsman and an Indian fighter. He was also a scholarly gentleman, as his beautiful volumes with their tasteful bookplate show. The trustees' list of Transylvania Seminary and Transylvania University is a roll of the founders and early statesmen of Kentucky. That they were men of iron mold history has shown. Of the fact that they were also men of scholarly attainments and aspirations, the library of Transylvania is a noble witness.

ELIZABETH SPENCER NORTON.

EDUCATIONAL FILMS IN SCHOOL

ABOUT a year ago the Lincoln & Parker Company of Worcester, Mass., producers of edited motion pictures and motion picture apparatus for schools and colleges, started a course in United States geography. This course is said to have been filmed and edited by educators of national repute, and during the past year has been leased to many schools throuth the country. Other courses which this company has in preparation are physiology and hygiene, agriculture, domestic science, English and classics, Nature study, etc. An expedition recently sent to South America is filming subjects to be used in their course in world geography.

A more elaborate use of moving picture

films and lantern slides as an aid to text books in the public schools has been advocated by Dr. John P. Garber, superintendent of the public schools of Philadelphia.

PHOTOSTAT AND WAR COLLECTIONS EXHIBITED AT PRINCETON

A NUMBER of special exhibits were prepared in the Library at Princeton University for the alumni visit on Washington's Birthday. Writing of them in the *Princeton Alumni Weekly* for Feb. 27 Dr. Van Hoesen, assistant librarian, says:

"The more especial features were the photostat exhibit and various European War collections, the former prepared by Mr. Vinton Duffield, head of the photostat department, the latter under the direction of Mr. Peck, superintendent of special collections.

"The photostat exhibit attracted a great deal of interest, many of the alumni lingering and examining the details, having their signatures photostated and studying the demonstrating work. The exhibition material was gathered and classified by departments, with the purpose of showing the varied applications of this modern method to all departments of the library work. The method is still new enough to be a matter of curiosity to most laymen, and its varied application to administrative work is a matter of surprise even to most librarians. The simplest aspect of copying documents is familiar to a good many, but the applications to administrative details, for time saving and so-called efficiency purposes, are as new as their economies and advantages are obvious.

"Both the economy and the convenience and rapidity of copying were shown in the examples furnished by the Administration department in the copying of plans, blueprint and otherwise, of manifolding letters and reports at short notice for committee meetings, and the like.

"In the purchase department the most ready and obvious advantage of the photostat is the fact that books so rare that they cannot be found for purchase, and so expensive that if found they are almost un-purchaseable, may be copied for collections when they are needed and at relatively

small expense. Other books or manuscripts which are unique and absolutely un-purchaseable, and yet may be indispensable to a scholar's research, may be photostated if they can be borrowed, at small cost of money or time. Similarly, defective books may be very easily completed by the insertion of a few pages in photostat copy. And finally, the purchase department submitted a sheet of bookplates of reduced size for use on pamphlets and other less important material received in considerable bulk.

"The printing and binding departments showed (1) samples of binding dummies, or photostat copies of the bindings of books to serve as directions for the binding of continuations of sets or periodicals and the like, (2) various labels and signs which can be enlarged from typewritten sheets much more readily and rapidly than they can be set up in type and printed.

"The cataloging department showed various short cuts of cataloging by simply copying from catalogs in print, and a new departure in cataloging things by actual photograph instead of by description. Such items were the facsimiles of title pages or rare works with long titles, of rare books and manuscripts where one may want to show not only the title page but the binding, front and back, and even the painted fore-edges of the leaves, of posters, of pictures and broadsides in general, and of museum objects such as coins and medals, cuneiform tablets, etc., etc.

"The exhibition department showed several samples of the possibilities of making an exhibition completely illustrative of a subject of which we have already in the library a nucleus of rare or fundamental things, such as the exhibition illustrating the history of the art of illumination in manuscripts for which the Garrett illuminated manuscripts furnished the basis, a condensed war posters exhibition, etc., etc.

"The reference department showed a number of different examples of the copying use, according as consulters of the library asked for extracts from magazines, encyclopaedias, unique manuscripts or what not, for copies of maps, plans, pictures, manuscripts, or even of whole

books and mss. Perhaps the most striking use in the reference department is the compiling of synthetic indexes or bibliographies which can be taken in photostat copy from any number of different sources and, by cutting and rearranging, be photographed in alphabetical order or any other order desired. Examples of this work were joint lists of books on the war and of foreign newspapers in several different libraries.

"The exhibition of war material included the library's collection of war literature, the Strong collection of newspaper clippings on the war, several collections of war relics and war posters, and a collection of military correspondence forms and postcards. The collection of books is one of the larger of the American collections and consists of five or six thousand regularly cataloged books and pamphlets. One feature of this exhibit was a joint catalog of war books in this library, the Library of Congress, the New York Public Library, and certain other libraries which publish printed cards, compiled for the use of professors and historians working in the field. A similar useful compilation was the list being prepared by Dr. Morse, the History Reference Librarian, of foreign newspapers taken, during the war, and kept on file in the larger American libraries.

"The Strong collection of newspaper clippings on the European war, presented by Mr. Benjamin Strong, of the Federal Reserve Bank of New York, consists of eighty-seven large volumes of clippings from the *New York Times*, the *New York Sun*, the *New York Tribune*, and *New York Evening Post*, arranged in chronological order so as to present a consecutive newspaper account of the war in all its aspects.

"The exhibit of war relics included the collection loaned by Malcolm Robertson '15, several objects collected by Clifford N. Carver '13, a small collection given by John W. Garrett '95, along with his war posters collection, and similar collections of Marion Eppley '06, and others. The largest of the library collections is the Lytle collection, which has been much in demand for exhibits at Buffalo, Detroit,

Boston, and elsewhere—and was at the time, unfortunately for this occasion, on exhibition at Fort Leavenworth, Kansas.

"The exhibit of war-posters included the collection of 677 posters recently contributed by Mr. Benjamin Strong, together with the John W. Garrett '95 collection (155 foreign posters), a collection of Russian posters presented by Joshua Butler Wright '99, and various contributions from Sydney R. Taber '83, Miss Hudnut and others. Altogether the number of posters hung in the room was not far from 800, exclusive of duplicates. Almost every available spot was covered and the effect of numbers alone was striking. The individual posters were none the less striking, both in the eloquence of their appeals, thru picture or word, to economy, work, manufacturing of munitions, charities, patriotism and, perhaps, particularly in the case of the French posters of the Garrett collection, in their simple artistic beauty."

ELIZABETHAN LIBRARY GIVEN TO UNIVERSITY OF TEXAS

THE gift to the University of Texas Library of the famous collection of Elizabethan literature formed by the late John W. Wrenn of Chicago, is one of the important library events of the year in the Lone Star state. The gift was made possible by the generosity of Major George W. Littlefield, a Texas cattle king and member of the board of regents of the University of Texas, who paid \$225,000 cash to secure the collection for the university. It embraces 5300 volumes, all of the Elizabethan period, and is said to be one of the finest collections of books bearing upon that epoch of literature in the world.

Its possession places the University of Texas among the world's great libraries that have to be reckoned with in looking to original sources of English literature and in certain lines of English political history. There is no first folio of Shakespeare, but there are superior copies of the second, third and fourth folios. In the collection are practically complete sets of the first editions of Fielding, Swift, Dryden, Pope and countless others.

There is a collection of royal decrees and proclamations of the times of Charles I and Charles II that are of great value.

It was quite by accident that the attention of President R. F. Vinson, of the University of Texas, was called to the fact that it might be possible to purchase the Wrenn library. R. H. Griffith, Ph.D., associate professor of English in the University of Texas, was in Chicago during the Christmas holidays. While there he desired to do some research work in English literature of the Elizabethan period. He visited the public and other notable libraries of the city, but failed to find the information he was seeking. He was about to abandon his search when someone to whom he mentioned the matter suggested that he try the Wrenn library, which, altho a private collection, was accessible to students of English literature. Mr. Griffith was astounded at the wealth of ancient volumes and perhaps unrivaled collection bearing upon the Elizabethan period that were contained in the Wrenn library. On his return to Austin he mentioned the matter to President R. E. Vinson, and it was immediately thereafter that the negotiations were opened that were successfully consummated the last of February.

Besides his many other benefactions, Major Littlefield a few years ago donated \$40,000 to the University of Texas, this sum going to create what is known as the Littlefield fund for Southern history. The collection of historical works and data bearing on the history of the South which the university has already made and will continue to make by reason of the generosity of Major Littlefield will, it is hoped, place that institution in possession of the most complete and valuable collection of published material relating to the history of the South that is to be found in the country.

CARNEGIE GRANT, JANUARY, 1918

THE only grant made for library purposes by the Carnegie Corporation during January was an original gift to Smithfield, Utah, for \$9000.

RECENT MOTION PICTURES DRAWN FROM STANDARD OR RECENT LITERATURE

It is interesting to note that the National Board of Review of Motion Pictures, which prepares this list and which reviews practically all the motion pictures exhibited in this country, has been asked to make selections of pictures which will be particularly suitable for use in the camps. Special effort is being made by the Training Camp Commissions of the War and Navy Departments to provide fine motion entertainments for the soldiers and sailors in the training camps. With this in view, a committee of the leading motion picture producers and distributors has been formed to co-operate with the Government commissions, and pictures are to be furnished by the co-operating companies at rates which make their use practically a donation of the industry to the soldiers.

This month's list of pictures drawn from recent or standard books is as follows:

Amarilly of Clothesline Alley, 5 reels, Artcraft. Star—Mary Pickford.

A photoplay drawn from the novel of the same name by Belle K. Maniates, showing in parallel lines the life of the Upper Ten and the Submerged Tenth, to the advantage of the latter.

Cavanaugh of the Forest Rangers, 5 reels, Vitagraph. Star—Alfred Whitman.

Based on the novel of the same name by Hamlin Garland. The film contains many beautiful "long shots" illustrating some of the experiences of a forest ranger.

Heart of the Sunset, 7 reels, Goldwyn. Star—Anna Q. Nilsson.

Based on Rex Beach's book of the same name. It is a story of the borderland between Texas and Mexico during the recent Mexican Revolution.

His Royal Highness, 5 reels, World. Star—Carlyle Blackwell.

Based on the story of the same name by Anthony Hope, which may be described as one of the "Zenda" type.

My Four Years in Germany, 10 reels, My Four Years in Germany, Inc. Star—Halbert Brown.

Based on the book of the same name by James W. Gerard, United States Ambassador to Germany. It is a particularly good picturization of the experiences described by Mr. Gerard.

Revelation, 7 reels, Metro. Star—Nazimova. Adapted from Mabel Wagnall's "A rosebush of a thousand years." A strong picture of the Latin Quarter in Paris and other parts of France.

Revenge, 5 reels, Metro. Star—Edith Storey. Based on the novel, "Hearts steadfast" by Edward Moffat. The photography is particularly artistic and the chief character is well presented.

Ruggles of Red Gap, 7 reels, Edison. Star—Taylor Holmes.

A well-acted and finely photographed version of the story of the same name by Harry Leon Wilson.

Stories by O. Henry: The rathskeller and the rose, 2 reels; and An American live wire, 5 reels, General Film Co.

Sunshine Nan, 5 reels, Paramount. Star—Ann Pennington.

Adapted from "Calvary Alley" by Alice Hegan Rice.

The Desired Woman, 5 reels, Vitagraph. Star—Harry Morey.

From the story by Will N. Harben.

The Shuttle, 5 reels, Select Pictures. Star—Constance Talmadge.

A picturization of the book of the same name by Mrs. Frances Hodgson Burnett. The photoplay produces fairly well the story of the book, altho it is not an easy one to present in this form.

The Unbeliever, 7 reels, Edison. Stars—Raymond McKee and Marguerite Courtot.

Based on Mary Raymond Shipman Andrews' "The three things." It is a war drama of unusual quality and compelling interest.

TRAVELING LIBRARIES INTRODUCED IN PORTO RICO

"WITH the recent signing of a contract for the construction of 20 circulating library bookcases the board of trustees of the Carnegie Library at San Juan have taken the first step in a long cherished project of bringing the advantages of the library to all the people of Porto Rico," says a writer in the *Christian Science Monitor*.

"It is planned to send out cases containing from 60 to 100 books in English and Spanish, as well selected as practicable, to each municipality, taking advantage of the already existing organization of the Department of Education and having the books in charge of the supervising principal or principal teacher. A beginning will be made with 20 libraries and the service will be gradually extended to cover each municipality and separate *barrios* large enough to warrant the expense. Each library will remain 30 or 60 days in a place or even longer if it is found necessary and practicable. The inauguration of this service will in no way interfere with the service of the library to local readers, as the books sent will be duplicates of those already on the shelves.

"Notwithstanding the fact that the location of the new building, a little aside from the present center of convenience, has caused the desertion of most of the readers who daily filled to overflowing the rooms in the old building, the number of persons taking books, which also decreased to a

marked extent, is returning gradually to the former figure. The board of trustees has enlarged the staff by the appointment of two children's librarians.

"A special effort has been made to furnish a very good selection of books on efficiency and modern business activities. The latest works in administration, finance, banking, auditing, accounting, income tax procedure, office methods and work, systematizing, etc., are on the shelves with works of more general character on efficiency, personal and business, and the great principles underlying commerce.

"A recent comparison of the library catalog with a catalog of the latest and best books on business preparedness and efficiency issued by the best known book firm in the United States shows that after deducting special volumes, to be found only in the very largest libraries, not only are 95 per cent. of the remaining volumes already on the San Juan library shelves, or ordered for immediate delivery, but that of the remainder, the library has probably more than half in other works and still others which are not mentioned in the book firm's list. A small number of general works appealing to lawyers, engineers and other professional men are purchased annually, besides a good assortment of books of belles-lettres, history and biography. There is a fine set of reference works, constantly being added to, and on convenient racks and tables are all the magazines of a general character in Spanish and English. The best war books, a number of them in French, are also available.

"The library is rich in Porto Rican books and has a very fine set of reproductions of old Spanish texts and maps and charts, the gift of Archer Huntington of New York."

. . . We get no good
By being ungenerous, even to a book,
And calculating profits . . . so much help
By so much reading. It is rather when
We gloriously forget ourselves and plunge
Soul-forward, headlong, into a book's profound,

Impassioned for its beauty and salt of truth—
'Tis then we get the right good from a book.

—ELIZABETH H. BROWNING.

LIVING WITH BOOKS

THE following paragraph was written by Walt Mason expressly for the Kansas Library Association meeting at his home town, Emporia, in October, 1917:

"How good it is to live with books, to sit with them in quiet nooks, to dwell with genius all the day, while runs the weary world away! The guardians of the printed tomes, which circulate in Kansas homes, to educate, amuse and cheer, and who are now assembled here, inhaling Lyon county dust, have in their charge a greater trust, than keepers of a treasure chest, where piles of gold and silver rest. For books, as all the world agrees, have shaped the nations' destinies; upon the shelves, where volumes rise, the wisdom of the ages lies; the inspiration of the seers, the poetry of all the years, the jingle of the jester's bells—all this in every library dwells. You hand out Shakespeare by the yard, and deal in every deathless bard; your shelves in heavy lore abound, you dish up science by the pound, you furnish 'ologies' galore, and customers still call for more. There is no greater work on earth than sending knowledge, wit and mirth, set down in ink by hands inspired, to homes where people, worn and tired, forget, while turning o'er the page, the grievous weight of toil and age."

Library Organizations

WESTERN MASSACHUSETTS LIBRARY CLUB

The winter meeting of the Western Massachusetts Library Club was held at the Forbes Library, Northampton, Feb. 20. In addition to the usual list of books of the year suggested for smaller libraries, the club has undertaken to publish a list of 100 popular books on the Great War. It was felt that there was a call at this time among library readers for such a selected list. The list in proof was submitted to the members for revision at the meeting. The initial cost of the undertaking is borne by the club, so that the price of the lists to libraries will be but a trifle over \$1 per hundred.

After the discussion of the books of 1917 and of the war list, the president, Mr. Wellman, introduced Professor Herbert Vaughan Abbott of Smith College, who took as his subject "Way of reform in modern drama."

He was followed by Mary K. Brewster, press agent of the municipal theater of Northampton, who gave a brief sketch of the history and ideals of this theater. The theater has a resident manager this year for the first time, Melville Burke, who described some of the difficulties in the path of a manager of a municipal theater. His problems are very different from those of the manager of an ordinary stock company.

In the afternoon the club members were the guests of the Smith College Library and Forbes Library at a performance of Stanley Houghton's "The younger generation," which was exceptionally well played by the Northampton Players at the municipal theater.

GEORGINA E. CARR, *Secretary*.

TORONTO DISTRICT LIBRARY INSTITUTE

The annual meeting of the Toronto District Library Institute, was held at the Academy of Medicine, 13 Queen's Park, Toronto, on Wednesday evening, March 6, at 8 o'clock. Thirty-one libraries were represented, with an attendance of seventy-one, of whom fifty-three were delegates.

The officers for 1918-1919 are as follows: Honorable President, Hon. R. A. Pyne; president, Prof. D. R. Keys, librarian of the Canadian Institute; vice-president, William Prendergast, Normal School; secretary, Eva Davis, Toronto Public Library executive, Principal C. G. Fraser, Manning Avenue Public School; Prof. R. E. L. Kittridge, librarian, Trinity College; N. H. Brown, librarian, Oakwood Collegiate Institute; Prof. N. S. N. McLay, McMaster University; Katherine G. Begg, librarian, Canadian Manufacturers' Association; Dr. George H. Locke, chief librarian, Toronto Public Library; Dr. E. A. Hardy, Toronto Sunday School Association.

EVA DAVIS, *Secretary*.

Library Schools

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

Since Washington does not invite the transient traveller, the spring trip will be made to the libraries of the Hudson and Mohawk Valleys.

Five more stars have been added to our alumni service flag: Mary V. Bolton, 1903, is doing reconstruction work in France under the Red Cross. Anna M. Neuhauser, 1915, is an assistant at Camp Hancock. Truman R. Temple, 1916, has been drafted into camp library work. Margaret J. Guerini, 1917, is

at work in the Ordnance Department. Ruth McKinstry, 1917, has been called from the Osterhout Free Library to A. L. A. War service headquarters in Washington to assist in the book ordering.

The Vice-Director has been asked to help in the matter of the personnel of the camp library service during the executive secretary's six weeks' leave of absence from Washington. Her time will be adjusted so that she will spend three days in Washington and three days in Brooklyn.

A pleasant feature of the recent visit of W. O. Carson, Inspector of Public Libraries of Ontario, to the two Library Schools was a dinner given him by the Council of the New York Library Club at the Cosmopolitan Club in New York City.

Andrew Keogh, librarian of Yale University, gave his annual lecture on March 5 on the problems of the college library, and Mary E. Hall, librarian of the Girls' High School spoke on March 12 on high school library work.

For several years past the School has enjoyed the opportunity of a visit to the Morgan Library and the privilege was extended to us again this year. Miss Greene and Miss Thurston had the tables covered with rare and interesting books and took down from the shelves, in answer to requests, many treasures new and old.

Cards have been received announcing the marriage on Jan. 27 of Estelle M. Campbell, 1915, to Prof. William Campbell of Columbia University.

A letter was received from Johnson Brigham of the Iowa State Library telling of the marriage of Grace A. Cooper, who has been on his staff since her graduation in 1907, to Frank Briggs of Webster City, Iowa.

JOSEPHINE ADAMS RATHBONE,
Vice-Director.

LIBRARY SCHOOL OF THE UNIVERSITY OF WISCONSIN

The academic schedule was suspended for February and March to emphasize the practical side of library work under faculty direction. Thirty-six libraries of the state and the office of the Governor co-operated with the school by receiving students for field work on a schedule of definite library hours. The appointments were made for various forms of library work according to the need of the library, the previous experience of the student, or the student's progress in the classroom. Besides the usual number of assignments for general experience, thirteen ap-

pointments were made for work on library records, such as shelf-listing and inventory, re-registration and loan statistics, checking accessions and withdrawals, and for cataloging, either revising old catalogs, or beginning new ones.

Two libraries had students assigned for reclassification, changing from the expansive to the decimal form, with all that it involved of relabeling, changing call number on catalog card, book card, pocket, etc. In the absence of three librarians, students took their places as acting librarians. Several special libraries in the Capitol afforded experience in both technical and reference work, and in filing and indexing. Because of the great demand in federal offices for this work, more field assignments were made for experience along these lines than in former years.

Especial emphasis is being put on war-work for libraries, work for children, and reference. The students received definite instruction for the national service work that can be accomplished thru libraries and are afforded every opportunity to co-operate with the local librarian in this service.

SUMMER SESSION

The twenty-third summer session of six weeks is announced for June 24 to August 3. This course offers those already engaged in library work some technical training in keeping the most essential library records and some knowledge of approved library extension and new methods.

The number of students is limited, and the course is open only to properly qualified workers in Wisconsin, unless it is found that Wisconsin librarians applying for the course are less than the number which can be properly accommodated in the school room.

MARY EMOGENE HAZELTINE, *Preceptor.*

SIMMONS COLLEGE LIBRARY SCHOOL

Visitors this month, most of whom have addressed the classes, have been J. Randolph Coolidge, Jr., and John A. Lowe, who contributed much to the course in library buildings, and W. O. Carson, who gave a vivid impression of the work of Ontario libraries. Annie Carroll Moore was a welcome visitor at the "Exchange" hour, contributing her bit by showing some of the good results which had been a by-product of the recent fuel emergency in the New York Library branches. In the high school library course Frances Bickford, of the Bridgeport High School Library, Margaret Kneil, of the Somerville High School, and Miss Eaton, libra-

rian of the Lincoln School, gave us of their experience.

A visit was made March 1 to the Widener Library, and on April 13 it is planned to visit the A. L. A. Camp Library at Camp Devens.

SUMMER COURSES

The usual summer classes in library work will be held during the six weeks from July 8 to August 16.

The first three weeks will be devoted to a course in cataloging and classification with Miss Howe as instructor. The second three weeks will be given to a general course dealing with the selection, purchase, circulation, and reference use of books, with Miss Donnelly as instructor. A course in library work with children will be given July 8-26, by Helen Martin. The three courses are open to persons engaged in library work, and the children's work is open to kindergartners and elementary school teachers also.

The Massachusetts Free Public Library Commission will hold its annual three day conference at the college during the summer session, a feature which adds much to the interest of the six weeks.

The fee for each one of the three courses is \$15, or \$24 for two. Either of the courses of the first three weeks may be chosen and followed by that of the second three weeks, or any one of the three may be carried alone. Room and board may be had at the College dormitories.

The Registrar of Simmons College, Boston, or the Director of the Library School will be glad to send the special bulletin of courses on request.

JUNE RICHARDSON DONNELLY, *Director.*

BOSTON UNIVERSITY—LIBRARY COURSE

Recent special lectures include: Clarence E. Sherman, librarian, Lynn Public Library, on "College and university libraries"; Dr. Robert P. Bigelow, librarian, Institute of Technology, "The library of the institute and technical literature"; Frederick J. Allen, assistant director, Bureau of Vocational Guidance, Harvard University, "The literature of vocational education." From the college faculty, Prof. Charles Rittenhouse, author of "Elements of accounts," on "Library accounting."

On Monday morning, March 25, students from the Library School of the New York Public Library, on their annual visit, called at the college to visit the Business Administration Library, the Commercial Museum and the Secretarial Laboratory.

RALPH L. POWER.

CARNEGIE LIBRARY SCHOOL

Special lecturers for the month were Lutie E. Stearns of Milwaukee, Wis., who gave three lectures March 12 to 13, on "The problem of the book for the adolescent girl," "The library and its relation to present day problems," and "Why a librarian?" and James Francis Burke, state director for the Western Pennsylvania, National War Savings Committee, who spoke upon War Savings Stamps. Caspar Carl Certain, head of the department of English, Cass High School, Detroit, lectured March 12 to students in the school library course on "What the English teacher expects of the library," and "School libraries south of the Mason and Dixon line."

Several marriages of graduates are announced: Margaret Louise Bateman, 1908-09, to Sherman R. Ramsdell, Feb. 21; Blanche L. Dodds, 1916-17, to Lloyd G. Lyman, Mar. 6; Helen Louise Jackson, 1911-12, to Hendrik Brusse, Feb. 15; and Esther Dodge Porter, 1919, to Harry Bliss, Jr., Feb. 22.

Mrs. J. Milton Ronsheim, 1914-16, is engaged in library work in Camp Sherman, Chillicothe, O.

SARAH C. N. BOGLE, *Principal*.

WESTERN RESERVE LIBRARY SCHOOL

At present the school is especially interested in the War Service work of the American Library Association. Mr. Brett, Miss Tyler, Mr. Strong, and Mr. Vitz, of the faculty, have been or are actively engaged in it.

Prof. A. S. Root of the Oberlin College Library is giving his course on the history of the printed book. A brief series of lectures on school management is being given by members of the Cleveland Public Library staff, Martha Wilson, librarian, Woodland branch, discussing the state supervision of school libraries; Annie S. Cutter, supervisor of grade school libraries, the management of such libraries; and Bessie Sargeant Smith, supervisor of high school libraries, the type of book selection and general policy of high school libraries. Other members of the Cleveland Public Library staff have discussed the following subjects: Mary R. Cochran, head of the sociology division, "Books of sociology," and Annie P. Dingman, head of the foreign division, "Americanization," tracing the history of the movement and present aims. Prof. C. C. Arbuthnot, of Western Reserve University, spoke on the book selection problems connected with materials in economics.

The students have had the advantage of hearing lectures and informal talks by the following out-of-town speakers: Feb. 8, J. H.

Dice, of the Ohio Library Commission, "Ohio library extension"; Feb. 14, Mary E. Ahern, "Present day librarianship"; Feb. 23, Miriam Carey, "Are librarians social workers?"; Mar. 7, Marie L. Shedlock, "Hans Christian Andersen," this lecture being given under the auspices of the Cleveland Kindergarten Training School.

ALICE S. TYLER, *Director*.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

According to the plan adopted for practical work in 1916-17 it is provided that students spend two weeks in the field at the opening of the second half-year, and one day per week thereafter until school closes in June. It has been felt that work deferred until after considerable instruction has been received is likely to be of relatively greater value to students, and more easy for librarians and department heads to observe and supervise; it makes possible also more consecutive effort, and protects students in some measure from the loss of time and energy incident to city transportation. The first assignments for the current year began on Feb. 4. Inasmuch as the fuel shortage about this time forced the temporary closing of a large number of the branches of the New York Public Library, all concerned were laboring under abnormal conditions and it has consequently been more difficult than would ordinarily be the case to pass upon the results. Reports from those librarians to whom students were assigned, however, as well as the observations of the faculty, indicate that the present arrangement has distinct advantages from the standpoints of the student, of the school, and of the libraries in which practical work is done.

The course in which there are scheduled the visits to libraries and related institutions in New York City and vicinity also began with the opening of the second half-year. One afternoon per week is devoted to this, and an occasional hour in the course in administration is given to reports upon it. So far trips have been made to the libraries of Columbia University, Union Theological Seminary, New York University, College of the City of New York, and the Russell Sage Foundation, and to the bookstore of the Baker & Taylor Company. The schedule for the remainder of the year will take the class to The Brooklyn and Queens Public Libraries, to the Newark Free Public Library, to the plant of the H. W. Wilson Company, and to museums and special libraries.

Series of lectures have been conducted re-

cently by Andrew Keogh, Isadore Gilbert Mudge, and Effie L. Power. In connection with his tour to eastern library schools W. O. Carson, inspector of public libraries for the Department of Education of Ontario, gave an address descriptive of library conditions in Ontario.

Margaret Jackson, of the faculty, has been confined to her room for some weeks by illness, as a result of grippe and its after-effects. It has been necessary for the time to distribute her work, the greater part of it being carried by the faculty, with some assistance from members of the staff of the New York Public Library. Miss Power, while conducting her courses in children's work and literature, was compelled to leave her duties for a few days by reason of the death of her father at Conneautsville, Pa.

The annual inspection trip for this year included visits to Albany, Boston and Providence, and covered the period of March 23-28.

ERNEST J. REECE, *Principal*.

RIVERSIDE LIBRARY SERVICE SCHOOL

The Riverside Library Service School closed a very successful session March 2. The teachers and lecturers were as follows: Dr. Arthur E. Bostwick, St. Louis (Mo.) Public Library; Mrs. Ida Mendenhall Beseler, formerly of New York State Normal School at Geneseo, now of Anaheim, Calif.; Alice M. Butterfield, Riverside Public Library; E. P. Clarke, president, California State Board of Education; Joseph F. Daniels, Riverside Public Library; Lillian L. Dickson, Riverside Public Library; Lyman Evans, district attorney, Riverside; Mrs. Mabel Frances Faulkner, Riverside Public Library; Adelaide Hasse, chief, documents division, New York Public Library; Margaret Mann, head cataloger, Carnegie Free Library, Pittsburgh, Pa.; Lieut. Geo. E. Price, military instructor, Polytechnic High School, Riverside, Calif.; W. Elmo Reavis, head of Pacific Library Binding Co., Los Angeles.

Students receiving certificates were as follows: Caroline Hubbard Bailey, East Auburn, Calif.; Mrs. Nellie C. Bartlett, Pocatello, Idaho; Nelle M. Bate, Mason City, Iowa; Mrs. J. E. Boyle, Chico, Calif.; Helena F. Curtiss, La Verne, Calif.; Dorothy Deming, East Auburn, Calif.; Margaret Eastman, Sacramento, Calif.; Jessie Fraser, Twin Falls, Idaho; Joanna L. Gaylord, Los Angeles, Calif.; Margaret D. Guthrie, Corsicana, Texas; Jessie A. Harris, Whittier, Calif.; Carolyn Alpha Henry, Santa Ana, Calif.; Lucille Hood, Pocatello, Idaho; Mildred H.

Pike, Whiting, Iowa; Elizabeth M. Sheppard, Ontario, Calif.; Betty Mary Smith, El Paso, Tex.; and Grace M. Stoddard, Missoula, Mont. This is the smallest class in attendance ever held but we are at war and the whole western country feels it very much indeed.

Riverside is to have a government aviation school. The site has been selected about five miles from the city limits at a place called Alessandro. Contracts have been let and work will begin at once. It is estimated that two or three thousand aviators, ground men, mechanics, etc., will be here before summer. The officials engaged in selecting the site have considered among other things submitted to them the use of the Riverside public and county free library. There will undoubtedly be a branch established at the aviation camp.

This influx of a small army of aviators will mean a most emphatic influence upon our book purchases, which means another cruel cut into fiction funds and another very decided step forward in the reorganization of our library on a war basis.

Plans for training camp librarians at the Riverside Library school have been abandoned. It had been expected that a course in the training of camp librarians would be established here, but the plan has been given up thru lack of recognition from the A. L. A. war service. Several applications had been received from prospective students.

Edith Ell, 1916, is now Mrs. Laufenberg, and lives in San Bernardino.

Mildred Ross, 1916, was married Feb. 9 to Chas. J. Wheeler, and lives in Riverside.

Inez Harmer was married Jan. 30 to John Knudson Northrop, and lives in Santa Barbara.

Rita C. Keane, 1917, student at the University of California, is cataloging the University High School Library.

Mr. and Mrs. Chas. C. Arnold on Feb. 22 entertained at an evening reception at their home on Victoria Hill. The young women on the staff assisted Mrs. Arnold.

JOSEPH F. DANIELS.

CALIFORNIA STATE LIBRARY SCHOOL

On Feb. 26, the class had two lectures by Lutie E. Stearns, who has been on a lecture tour in the west. One lecture was on "The rise and fall of the modern magazine," a subject of vital interest to library workers, at the present time more than ever before; the other lecture was on "The librarian, the library and education," and brought out the possibilities for good of the library in any community.

On Feb. 19, Katherine Post Ferris, librarian of the Kings County Free Library, spoke to the class on the progress and development of the work in Kings County.

The course in children's literature given by Eleanor Hitt has been completed.

MILTON J. FERGUSON.

*LIBRARY SCHOOL OF THE LOS ANGELES
PUBLIC LIBRARY*

Lutie Stearns talked to the school on Feb. 20 on "The library as a social factor in the community" and "The rise and fall of the modern magazine." Sarah M. Jacobus, librarian of the Pomona Public Library, presented some ideas on library service from a fresh viewpoint in a talk on "Cues from business men." Mabel Haines was another February visitor. Her talk on "The library's relation to social betterment" was especially valuable since she has the point of view of the library as well as that of the social worker. C. C. Parker supplemented the course in publishing houses with a most interesting talk in which he summarized the work of some of the younger firms. Charles E. St. John of the Mount Wilson Solar Observatory talked on "American learned societies and their publications." The selection of religious literature for a public library was the subject of a talk by Dr. Carl S. Patton.

Miss Adelaide Hasse's visit was of special interest because of her early connection with the Los Angeles Public Library. She lectured to students and members of the library staff at an eight o'clock staff meeting, after which members of the Alumni Association held an informal reception in the class room.

Marguerite Cameron, Riverside Summer School, 1916, and formerly librarian of the Uinta County Library, Evanston, Wyo., has been accepted as a special student for the remainder of the school year.

Florence Elsey was married in New York City on Feb. 8 to John Philip Storck. Mrs. Storck is one of the many librarians now engaged in war service. She expects to continue her work in New York City.

THEODORA R. BREWITT, *Principal*.

LOUISVILLE FREE PUBLIC LIBRARY TRAINING CLASS

The training class of the Louisville Free Public Library ended its fifteen-week session February 2. Nine students were enrolled for the course including the librarian of the Shelbyville Public Library. They are as follows: Mary Benton, Gladys C. Grove, Laura Jefferis, Irene Matthews, Sarah Peden,

Dorothy Schoen, Preston Settle, Jeannie Read Sampson, and Lila L. Terrell.

Lectures were given in reference work, public documents, circulating work with adults and children, story telling, cataloging, subject headings, classification, ordering, accessioning and business methods, and literary criticism. In addition, penmanship, pen printing and use of typewriter were taught.

The class is limited to twelve each year, two of whom may be from out of town who have definite connections with Kentucky libraries.

*LIBRARY SCHOOL, CARNEGIE LIBRARY OF
ATLANTA*

Gertrude Stiles, supervisor of binding, Cleveland Public Library, gave her regular course of lectures on binding during the week of Feb. 11. On the afternoon of Friday, Feb. 15, Miss Stiles lectured on fine book bindings, using her collection of slides to illustrate the lecture. After the lecture the library class gave their annual valentine party in the class room, inviting the local librarians to meet Miss Stiles.

Mrs. Edna Lyman Scott gave her course of lectures on children's work from Feb. 18th to March 2. Mrs. Scott gave a story telling recital on the afternoon of the 28th. This was the day on which the camp librarians of the southeastern states were holding a conference in Atlanta and the school had the pleasure of having some of the librarians present at the recital while others came in later for tea.

TOMMIE DORA BARKER, *Director*.

*COLUMBIA UNIVERSITY—SUMMER COURSES
IN LIBRARY SCIENCE*

The summer session at Columbia will be held from July 8 to August 16. The courses in library science are planned especially for persons with some experience in library work, and will be given by the following instructors: Bibliography, Helen Rex Keller; administration of the high school library, Mary E. Hall; normal school libraries, Martha Wilson; cataloging and classification, Miss Keller; public documents, Adelaide R. Hasse; indexing, filing and cataloging as applied in business, Miss Warren. University credit is given for all courses.

Inquiries concerning the work should be addressed to Helen Rex Keller, at Columbia University, New York City.

IOWA SUMMER LIBRARY SCHOOL

The State University of Iowa announces the seventeenth session of the Iowa Summer School for Library Training at Iowa City, June 17 to July 26. Miram E. Carey, super-

visor of state institutional libraries in Minnesota, will direct the course. As last year, the work will dwell considerably on the relation between the library and the school, but will not lose sight of the problems facing a small public library. Blanche V. Watts will give instruction in cataloging and reference, and Grace Shellenberger, librarian of state institutions, will give a three weeks' course in children's literature.

Apply to Miss Jane E. Roberts, University Library, Iowa City, Ia., for further information and application blanks.

Librarians

ADAMS, Florence, Pratt 1913, has resigned the librarianship of the firm of Cravath & Henderson, New York, to return as librarian to the Polytechnic Preparatory Country Day School.

ADAMS, Ida, Simmons 1908-13, has a position in the circulation department of the Seattle Public Library.

ALLEN, Anita, Simmons 1911-15, has returned to Simmons College Library after organizing the Niles Library at North Jay, Maine.

ASKEY, Hazel E., Wisconsin 1913, began work Dec. 1 as assistant in the Siskiyou County Free Library, Yreka, Calif. She had been assistant in the California State Library previously.

BADGER, Evelyn, has resigned from the Cedar Rapids Public Library to go to the Library Association at Portland, Ore.

BEALS, Mrs. J. B., who has been head of the reference department of the St. Paul Public Library for over eighteen years, has resigned.

BLACKWELDER, Paul, for the past twelve years assistant librarian of the St. Louis Public Library, resigned Feb. 15, and his resignation has been accepted.

BREVOORT, Carson, Pratt 1915, has been made assistant in the library of the Commercial High School in Brooklyn.

BROWN, Martha J., Library School of the New York Public Library 1916-17, has accepted a position in the Indianapolis Public Library.

BURKE, Mildred M., Western Reserve 1911, has taken a position as assistant in the deposit department of the Chicago Public Library.

BURNS, Anna, Pratt 1908, formerly head of the Central Circulation department of the New York Public Library, has been made librarian for Haskins and Sells, certified public accountants, New York City.

CHURCH, Lucy, Simmons 1904-08, is a first-class clerk in the personnel division of the Ordnance Department, Washington, D. C.

COULTER, Mabel, California 1914, has resigned her position as assistant in Kings County (Calif.) Free Library, to become librarian of the newly established San Benito County Free Library, beginning work March 1.

COX, Fannie E., Wisconsin 1914, accepted a government position recently as index clerk, Design section, French Warfare branch, Gun division of the Bureau of Ordnance.

CRAIG, Helen M., Pratt 1909, has accepted a position on the staff of the Engineering Library of the Western Electric Company, New York.

CROSS, Mildred R., has been appointed librarian of the Swanton (Vt.) Public Library to take the place of Mrs. Lewis Hogle, resigned.

CROWELL, Edith, Library School of the New York Public Library 1911-13, has left her position as librarian of the Bernardsville (N. J.) Public Library. She is now with a branch of the U. S. A. Ordnance Department at Perth Amboy, New Jersey.

CUMMINS, Catherine, Simmons 1907-12, has resigned her position at the Woodstock branch, New York Public Library, to be with her sister.

DAILEY, Lilla B., Riverside 1915-16 long course, and for the past two years librarian at National City (Calif.) Public Library, has been appointed to a position with the Ordnance Department at Washington, D. C.

DAVIS, Ruth, Washington 1916, has been pointed general assistant in the Whitman College Library, Walla Walla, Wash.

EVANS, Verna M., Wisconsin 1914, was married Dec. 12 to Fred H. Clapp of Ontario, Cal. Miss Evans has held the position of cataloger in the San Diego (Calif.) Public Library.

FAWCETT, Eleanor M., Wisconsin 1912, has resigned as librarian of the Oskaloosa (Iowa) Public Library to accept a position in the Public Library of Cedar Rapids.

FLOYD, Florence M., died at her home in Long Beach, Calif., on March 10 after a very short illness. She served as an assistant for several years in the Public Library in Sedalia, Mo., later accepting a position as assistant in the University of Texas Library. She resigned this place to take a year's training in the University of Illinois Library Training School. From there she went to the Kentucky Library Commission, where she was assistant secretary until January, 1918.

GAGE, Laura J., Wisconsin 1915, has been made cataloger of the Oak Park (Ill.) Public Library. For the past year she has been assistant in the Superior (Wis.) Public Library.

GILPIN, Margaret, Wisconsin 1917, has accepted the position of librarian of the Public Library of Nashwauk, Minn.

HAESSELBARTH, Adam Christian, for ten years librarian and for many years contributor and correspondent of the *New York World*, died of acute dilatation of the heart, following a week's illness of grip, at his home in Leonia, N. J., Jan. 19.

HANNA, Gladys, Los Angeles 1917, has resigned her position in the Long Beach Public Library to accept an appointment as index and catalog clerk in the War Department.

HARRIS, Helen M., New York State Library School 1915-16, has resigned as librarian of the Queen Anne High School Library, Seattle, to become librarian of the Lincoln Park High School at Tacoma.

HEWITT, Edna, for some time an assistant in the California State Library, has been appointed assistant librarian in the Sutter county library, California, with headquarters in Yuba City.

HOGG, Frances M., Wisconsin 1916, has resigned as cataloger of the Great Falls (Mont.) Public Library to accept a similar position in the La Crosse (Wis.) Public Library.

HOWE, Alice C., Pratt 1893, has given up her position in the catalog department of the New York Public Library and has gone to her home in Prattsburgh, N. Y., for the summer. Miss Howe helped to reorganize the library of Ursinus College, Pa., also the library at Corning, N. Y., and was a cataloger in the General Theological Seminary Library for two or three years; was then assistant in the John Crerar Library in Chicago and went into the

catalog department of the New York Public Library in September, 1908. She worked in both the Astor and Lenox Libraries before they were consolidated in the present Central Building in 1911.

HUTSON, Cecelia. Word has been received of the death in February of Miss Hutson, who was a faithful member of the staff of the Cleveland Public Library for over thirty years, beginning her service in March, 1885. In 1915 Miss Hutson was obliged to ask for indefinite leave of absence on account of ill health, and tho she recovered sufficiently to hope for a time that she might be able to return to her work, the hope was not destined to fulfillment. Miss Hutson held numerous assignments during her service in the library, including the librarianship of the West Side Branch for a number of years.

KANE, Annise, Simmons 1906-10, is now cataloger in Pennsylvania State College.

KING, Agnes, Wisconsin 1914, accepted a federal appointment on Jan. 1, and is in the Statistical branch, subsistence, a part of the Warehousing division of the Quartermaster General's office. Miss King was chief of the children's department in the Emporia (Kans.) Normal School before undertaking war work.

KOSEK, Anna, has resigned her position as cataloger in the Public Library at Cedar Rapids, Iowa, to take a similar position in the Lincoln Library at Springfield, Ill.

LEROY, Maude, Wisconsin 1912, resigned from the cataloging department of the Minneapolis Public Library to accept a federal appointment in the Statistical branch of the Quartermaster General's office.

LUITWEILER, Helen, Simmons 1910-11, is now cataloger in the Radcliffe College Library, Cambridge, Mass.

MCCONNELL, Winona, California 1915, was married, Feb. 27, to Dr. John E. Kennedy, at her home in Elk Grove.

MCCOY, Helen R., New York State Library School 1912-13, has gone to the Denver Public Library as reference assistant.

MCKECHNIE, Alexandra, Library School of the New York Public Library, was married to Edward A. Irving in the summer of 1917.

MCMANIS, Rumana K., Wisconsin 1915, has accepted a position in the branch department, New York Public Library.

McVETY, Margaret A., has resigned her position as reference librarian of the Carnegie Library of Pittsburgh, Pa., to accept an appointment with the Life Extension Institute in New York City.

MARIOTTI, Guido, New York State Library School 1916-17, has been transferred from the Library of the Biological Survey, Washington, D. C., to the Legislative Reference Division of the Library of Congress.

MARSHALL, Mary K., Western Reserve 1914, is an index and catalog clerk in the Ordnance Department at Washington.

MATTSON, Edith L., Wisconsin 1913, has been elected chief of the information bureau or commercial library of the National Safety Council, Chicago.

POPE, Mildred H., New York State Library School 1915-16, has resigned her position as librarian of the Lincoln Park High School Library, Tacoma, to accept a similar post at Queen Anne High School, Seattle.

PRICE, Florence, Wisconsin 1917, has resigned from the reference department of the Des Moines Public Library to accept a position on the staff of the Iowa State Library.

PRALL, Beatrice, first assistant librarian at the Little Rock Public Library, has been appointed librarian to succeed Dorothy Lyon, resigned.

ROBERTS, Bessie M., who has been the assistant in charge of the order department in the University of Missouri Library, has gone to Washington, D. C., to do cataloging and index work in the Ordnance Department.

ROESLER, Edna, Wisconsin 1916, has been promoted to be librarian of the new East End branch, Superior (Wis.) Public Library.

RUGGLES, Helen, Simmons 1913-17, is doing filing for the Western Electric Co., Engineering Department, New York.

SANFORD, Nelle, Riverside 1914-15 long course, for the past two years cataloger at Bakersfield (Calif.) Public Library, has been employed as index and catalog clerk in the New War Risk Insurance Bureau, Washington, D. C.

SALZMANN, Helen, Library School of the New York Public Library 1914-16, has resigned as librarian of the Lamont Memorial Library, McGraw, N. Y., to become a branch librarian in the New Haven Public Library.

SAVORD, Ruth, Western Reserve 1914, is now assistant to the supervisor for the Western Union Telegraph Co., New York City.

SPICER, Inez, assistant cataloger in the University of Missouri Library, has accepted a position in the Quartermaster's Department at Washington, D. C., where she will do cataloging and index work.

STEALEY, Laura, Simmons 1911-12, of the Seattle Public Library, died at Seattle, Feb. 28, 1918.

VAIL, Alice I., Pratt 1913, and a member of the staff of the Pratt Institute Free Library, has succeeded Miss Adams as librarian for Cravath and Henderson in New York City.

WOOD, Margaret, Simmons 1913-17, is librarian in the Stoneham (Mass.) Public Library.

WARREN, Katharine, Simmons 1910-14, is doing special work on United States historical pamphlets at Harvard College, Cambridge.

WATSON, Dorothy, Library School of the New York Public Library 1916-17, has resigned from the Library of the United Engineering Societies to accept a position in the Department of Technology of the Library Association of Portland, Ore.

WATSON, Marion, Library School of the New York Public Library 1912-14, has left the library of Columbia University and has taken a position in the Extension Division of the New York Public Library.

WILDER, Edna H., Library School of the New York Public Library 1914-16, has left her place in the New Haven Public Library to become librarian at Middletown, Conn.

WOODS, Winifred, Riverside 1916-17 long course, has been employed as librarian at National City (Calif.) Public Library.

WRIGHT, Edith I., of Springfield, Mass., and for the past year an assistant in the New York Public Library, has been appointed librarian of the Public Library at Brattleboro, Vt.

YUST, William F., B.L.S., New York State Library School 1901, has been granted a leave of absence until May 1 by the Rochester Public Library to take charge of the A. L. A. Camp Library at Camp Wadsworth, Spartanburg, S. C. Mr. Yust succeeds George G. Champlin, assistant reference librarian, New York State Library, who was obliged to leave because of illness.

THE LIBRARY WORLD

New England

VERMONT

Middlebury. Provision for a bequest of \$25,000 was made to the village for a library, and \$10,000 for the benefit of Middlebury College, in the will of Colonel Ilsley, recently probated here.

Montpelier. A note in the *Bulletin* of the Vermont Library Commission says that the Vermont Historical Society, with the opening of its new quarters, is planning to enlarge both its field and usefulness. Lillian E. Bishop has been engaged as assistant librarian and custodian. The society will soon occupy the large room at the rear on the first floor of the new state building. The genealogies and local histories belonging to the Vermont State Library are to be placed with those of the society. Besides the regular genealogical and other reference work, the many pamphlets and manuscripts, now inaccessible, will be cataloged. Among these are old and important historical documents. With ample room for the books and exhibits belonging to the society, and the entire time of the person in charge, the society expects to be a more active force than in previous years.

MASSACHUSETTS

Amherst. *The American Architect* of Jan. 23, 1918, contains a series of illustrations and plans of the Converse Memorial Library, at Amherst College, Amherst, Mass.

Beverly Farms. *The American Architect* for Jan. 16, 1918, contains a series of illustrations and plans of the Beverly Farms Library, Beverly Farms, Mass.

Cambridge. Cambridge Boy Scout officials, faced with the problem of providing afternoon occupation for Scouts left at leisure by the new early closing hour of the schools, have been aided in reaching a satisfactory solution by Librarian Cummings, who has set aside a room in the library for the exclusive use of Cambridge Scouts. The room will be open daily (except Saturday) from 2-5 p. m., under the supervision of older Scouts from a committee of five, which has been chosen to assist in arranging an attractive program. Special books will be provided for study in the various requirements and in the Merit Badge subjects. Mr. Cummings has also consented to prepare a list of books suitable for Scout officials

which will be placed on the shelves for boys desiring wholesome amusement. Present plans contemplate the establishment of a committee of three Scout officials which will be directly in charge of arrangements and will develop a program of entertainment and instruction. Cambridge leaders are of the opinion that the opening of the Scout room will attract wide attention among Scouts and increase the usefulness of the library to them.

Hampden. At the last town meeting it was voted to move the town library from its present quarters in the Adams house on Main street to the Town Hall Building. The library now has about 4000 volumes, all housed in one small room, and long since outgrew its quarters. E. A. Day, one of Hampden's citizens, has offered to furnish bookcases for the new location.

Holyoke. Because of the lack of finances and an inadequate supply of books and periodicals, the Holyoke Public Library has announced in a statement issued by Frank H. Willcox, librarian, suspension and closing of the children's department on Mar. 1. Admission is made in the announcement that Holyoke, by this step, will be the only community in the entire state in which children are without library facilities.

Westfield. At a special town meeting Feb. 20, provisions of the will of the late Milton B. Whitney, by which Westfield was to benefit at the end of five years thru a bequest of \$80,000 and accrued interest to build a library, to be known as the Whitney Library, to replace the old Westfield Atheneum, were complied with. The meeting was attended by a scant score of voters. Expected opposition failed to develop. Mr. Whitney directed that three-fourths be used for a building fund with which to construct a Whitney Public Library and that the remaining one-fourth be used to establish a Whitney Library fund. In event it was found three-fourths of the principal and accrued interest were insufficient to meet the cost, the town was given the right to take the whole or any part of the remaining one-quarter to use in the building fund. He also directed that the library should be located on the present Atheneum site in Park square. The plans for the building are to be approved by the executor of the will. Of the rest of his estate, one-half is to be put on deposit and the income is to be

paid to his wife during her life. Upon her death, the principal is to be turned over to the Atheneum and placed with the previous bequest for a Whitney Library fund. One-half of this fund is then to be available for purchase of books and periodicals, and one-half for the ordinary running expenses of the Atheneum. If the town had failed to take advantage of the bequest within 12 years the fund was to have reverted to Williams College.

RHODE ISLAND

Pawtuxet. The Anthony Public Library was gutted by fire Jan 4, when 7000 volumes, valuable oil paintings, documents of local historical interest and all of the library's fixtures and furniture were destroyed. The loss is placed at \$10,000, partly covered by insurance. The building was a one-story brick structure, with a granite foundation, and was built in 1902, at a cost of \$4500. Besides the 7000 volumes, among which were many standard works of reference, history, biography, travel and literature, there were a number of documents, dealing with the early history of the village, in the library archives. A number of volumes given to the library from Senator Anthony's collection were fortunately saved, Miss Myra Anthony, the librarian, having kept them at her home. The loss of the library, aside from its financial aspect, comes as a heavy blow to the valley, as it was one of the few such institutions so badly needed here. It served people from Washington, Quidnick, Arctic Centre, Centreville, Crompton and Riverpoint, as well as the people of Anthony.

CONNECTICUT

Bristol. The annual report of the Bristol Public Library for 1917 is prefaced by a short history of the library, which has just completed its first quarter-century. Established Jan. 1, 1892, the library occupied rooms, or rather a room and a large closet, in the Ebers building on the site of the city building, until December, 1896. From that date until August, 1906, a dwelling house which stood on the site now occupied by the present library building was the home of the library. The present building was occupied ten years ago—August, 1907. While the old building was being razed and the new building erected, temporary quarters were found across the street. In February, 1904, a branch of the Public Library and a free reading room was opened at Forestville by The Sessions Clock Company. The corporation supplied and furnished a building which is better adapted for the purposes for

which it is used than the housing provided for many of the public libraries in the state. Since that time the building has been kept up, heat and light furnished, newspapers and periodicals supplied and an attendant provided eight hours each week day by this public-spirited corporation. The library to-day has 35,337 volumes on its shelves.

Middle Atlantic

NEW YORK

Clifton Springs. At the annual meeting of the Pierce Library the matter of discontinuing the present annual dues of 50 cents per member and making the institution a free public library was discussed and laid on the table until the next meeting. With a balance of \$553.60 in the treasury, \$500 was invested in a Liberty bond, as an endowment fund.

Ithaca. Mynderse Van Cleef, a practicing lawyer and president of the Ithaca Trust Company, has given to the Tompkins County Bar Association his large and carefully selected law library, placed in two commodious rooms on the second floor of a fireproof building, with light, heat and service provided. A stenographer who will also act as librarian is in daily attendance, and the use of the books is free to all.

Norwich. Guernsey Mem. L. N. Louise Ruckteshler, lbn. (Rpt.—1916-17.) Accessions 590; withdrawals 317; total 13,525. New registrations 335; total 4571; population 8345. Circulation 42,850. Receipts \$4039.32; expenditures \$3085.10, including \$432.63 for books, \$150.95 for periodicals. Fourteen story hours held brought 1063 children together, after epidemics of infantile paralysis and minor children's diseases had abated. War activities have been furthered, the county Red Cross campaign headquarters having been the library, where county and community societies also meet. The report is mainly statistical, paper conservation being practiced.

Shortsville. For several years the King's Daughters of the Shortsville Presbyterian Church have placed at the disposal of the public a circulating library, which has been liberally patronized and enjoyed by the residents of this section. The organization has this year secured 200 volumes from the State Traveling Library, and placed the books in the reception room of the Mutual Banking Company in the Pratt block. A librarian is in charge every Saturday afternoon from 3 until 6 o'clock.

Utica. It is probable that a bond issue will be asked this year to be used in fitting up Faxton Hall as a West Utica branch of the Public Library, as the use of this building for library purposes has been granted to the board. The building was erected in 1867, and has had no improvements and few repairs since. When the building was turned over to the library board last November it was found that the tin roof, which had been on the building 50 years, was in bad shape. A new roof has been put on at a cost of \$460.20, which will probably be taken care of privately. The building is well located in the heart of a manufacturing district and has an abundance of light. The sum of \$4300 will be needed to fit the building up in the condition it should be for library purposes.

NEW JERSEY

Glen Ridge. Mayor Henry S. Babbage, on behalf of the citizens of the borough, has accepted from Henry S. Chapman the deed for the new Free Public Library erected by Mr. Chapman at Bloomfield and Ridgewood avenues, at a cost of \$25,000. The borough donated the site.

Newark. Confronted with a shortage of funds and the refusal of the City Commission to grant an increased appropriation, the board of trustees of the Newark Free Public Library has decided to close all of the branch libraries in the city, with the exception of the Business branch in Beaver street and those at the Cleveland and Lafayette schools. This action will affect the Ferry, Roseville, Springfield, Clinton avenue, West Side and Vailsburgh branches. The library trustees sought an increase of about \$34,000 this year, making the total appropriation \$187,000, a sum well under the limit of appropriation allowed by law. The closing of the branches, says Mr. Dana in a statement to the press, "will make it possible for the trustees to add somewhat to the store of books and to the efficiency of the staff at the Business branch on Beaver street, which will undoubtedly become a larger distributing center for books of a general character than it has been for several years. The arrangement will also enable the trustees to make more complete and to handle more efficiently the libraries in the Cleveland and Lafayette schools. For many years the library has sent to school rooms small collections of books for the use of teachers and pupils, for use in the room and for home reading. Of these school room libraries there are now 315, with a total of 13,000 volumes in the school buildings of the city. The decision to close the

branches will permit the library to strengthen this department of its work.

Orange. The library, which had been closed since Dec. 21 because of the lack of fuel, reopened Mar. 13. The Orange Valley branch reopened the day before.

Paterson. An exhibit of South American birds, insects and plants collected by Thomas Hallinan, an electrical engineer, has been on view in the Public Library's lecture room, where Mr. Hallinan had it installed at his own expense. In one corner was a reproduction of a Central American jungle, with dense undergrowth, bright-colored birds and sluggish sloths hanging from the trees, and in another a vista of a North Chili desert, with its dull-hued birds and animal life. Other exhibits were in glass-covered cases, with descriptions of natural habits so that school children could read. It is hoped that this exhibit will influence others to contribute natural science curios so that a permanent museum may be established.

PENNSYLVANIA

Philadelphia. An oil portrait of Congressman George S. Graham, former district attorney of Philadelphia, was presented to the Law Library in City Hall, Mar. 5, by a committee of the Law Association of Philadelphia.

South Atlantic

DISTRICT OF COLUMBIA

Washington. The recreation room fitted up in the Public Library, with billiard table, writing and reading materials, for the use of uniformed men, has been discontinued.

Washington. According to the last report of the Commissioner of Education, for the year ended June 30, 1917, the library of the Bureau of Education, the most extensive library on education in the United States, now has approximately 150,000 bound volumes and pamphlets. The library's chief function is as a working collection for the bureau's specialists, but it is also consulted by outside educators. Where possible loans are made, 3009 being so lent in the year. The library's information is made public thru the monthly *Record of Current Educational Publications*, and thru special printed, mimeographed or typewritten bibliographies. During the year 221 were prepared, making the total list available well over 1000. The school library exhibit material, as well as the collection of lantern slides, was shown in a number of places during the year. A set of 40 slides was made for use in library

campaigns, illustrating library extension work with special emphasis on county libraries.

VIRGINIA

Richmond. Tho this city has no public library, interest in the topic is not allowed to languish. The Y. M. H. A. held a "book benefit" for its library Mar. 3, the price of admission being one book. The volumes received materially increased the library's resources. The association has the largest library on Jewish topics in Richmond and one of the largest in the South. It is used for reference by both Jew and Christian. During the evening Alfred E. Hirschberg spoke on "Why Richmond needs a public library." Superintendent George Benedict delivered the principal speech of the evening on "The value of a library." A week later Miriam S. Tyler, librarian of Rosemary Library in the John Marshall High School, addressed members of the Junior Council of Temple Beth Ahabah on "A public library for Richmond."

NORTH CAROLINA

Chapel Hill. The annual report of Louis R. Wilson, librarian of the University of North Carolina, for the year ending Aug 14, 1917, showed that during the year the library did a great deal to aid students of the University and individuals and institutions in the state in securing desired material and information. Two thousand volumes were added making a total of 79,205 volumes for the library. In addition, to help build up the South American collection, approximately 1880 duplicate titles were bought from the Library of Harvard University. This addition, with that of the North Carolina collection, on which work was already begun, will greatly promote the usefulness of the library. The cataloging and building up of the North Carolina collection was undertaken thru the interest of an alumnus, and will be carried on this year under Mary L. Thornton, assistant librarian at the University of Georgia for several years. During the year 34,106 books were issued from the desk. Debates, special reading and general reading caused almost every student to make use of the general library or one of the department libraries. The various organizations of the university also drew constantly upon the library's resources. In recent years a great effort has been made by the library to make itself available to the public. The library does this both by answering questions and loaning books on special subjects and by participating in the work of the Bureau of Extension. In response to requests for information, 1187

letters were written during the year and 1360 books and pamphlets were loaned. Visitors were admitted to carry on special investigations. The income of the library amounted to \$11,561.58. Expenditures amounted to \$11,195.01, including \$4583.42 for salaries, \$418.45 for binding, \$3107.50 for books and periodicals for endowed departments, \$860.55 for books and periodicals for unendowed departments, \$979.19 for books and periodicals for the general library and \$76.77 for books for the Summer School. In order to encourage students to do more general reading, open shelves were secured for the walls of the lobby and between 600 and 1000 of the best books in the library were placed upon them. Professor Norman Foerster directed this work and the results were very satisfactory. The courses of instruction in library administration given to students in the university and teachers and librarians thruout the state proved very beneficial. As the Summer School has grown, the library's exhibits held for primary, grammar and high school grades and for the use of teachers in their professional equipment have been of great value in helping in the selection of good books.

GEORGIA

Brunswick. A movement is on foot to transfer the city's prisoners to the county jail, and to have the building now being used as city jail converted into a gym and library with free bath rooms and other amusements for the working people of the city, especially the shipbuilders and the newcomers. Mayor J. Hunter Hopkins is anxious to have some place provided where they can spend their free time among wholesome surroundings, write letters, read newspapers and good books. Innocent games of some description are also one of the proposed amusements proposed for the new place.

Savannah. Thru the co-operation of William Minot, president of the Port Wentworth Terminal Corporation, the Savannah Public Library will be able to establish a branch at Port Wentworth in the near future. Five hundred dollars has been offered for this purpose by Mr. Minot and this sum was accepted by the board of managers of the library at its February meeting. The branch will try to serve all the employees of the various industries located at Port Wentworth. It was decided at the same meeting to charge a fee of \$1 per year to people who wish to borrow books and who neither live nor have their business in Savannah or in Chatham county.

East North Central

MICHIGAN

After voters of a township have voted to establish a township library their action cannot be rescinded, is the opinion of the attorney general's department, in answer to a query from Almont township, Lapeer county. Some of the voters there who sought to be relieved of the township library tax started an agitation to have the question submitted to the electors at the spring elections. The opinion, written by J. Lee Pryor, is that where the voters have approved the plan and the library board has been organized there is no means of rescinding their action. The opinion is based on the fact Michigan has no statute which would permit such action.

Grand Rapids P. L. Samuel H. Ranck, lbn. (Rpt.—yr. ending March 31, 1917.) Accessions 11,970; withdrawn 1019; total 171,259. New registration 7579; total 28,072 (population according to census of 1910, 112,571). Circulation 457,737. Income \$85,073.05. Expenditures \$62,718.57, including \$9408.30 for books, \$2567.23 for periodicals, \$3866.13 for binding and \$35,538.03 for salaries. The library has begun an analysis of costs with a view to getting definite information of the cost of service for each branch of work and at each point in the city. This cost system when fully worked out will be a most valuable library tool. It has already demonstrated that to serve a patron at the West Side branch, used exclusively by the library, costs more than twice as much as the average cost for the same service in any school branch.

OHIO

Toledo. The Anna C. Mott branch of the Public Library was opened in January with about 4000 books on its shelves. The Frances D. Germain branch was also opened during the month.

INDIANA

Indianapolis. A business branch of the Public Library was opened on the main floor of the old library building in February, with Ethel Cleland, formerly in the Indiana legislative reference bureau, in charge. Two special features of the service given by the business library are the telephone service and the delivery station service. The Advertisers' Club of Indianapolis co-operated with the library in establishing the business branch.

Rockport. A suit to enjoin the Rockport library board from letting the contract for

the erection of a building has been filed in court. This promises to be an interesting suit with several city attorneys on each side. The board as a whole purchased the Steitler lot on Main street and the citizens thought the matter was settled. Later a proposition was made to have the library on Walnut street near the court house. The suit now seeks to have the building erected on the original purchase.

Polo. The Buffalo Township Public Library was closed from Dec. 7 to Mar. 1 for lack of fuel.

East South Central

KENTUCKY

Lexington. The Public Library has begun to establish auxiliary libraries in the various school buildings. The experiment will be tried first in the Junior High and Russell schools, and if they prove the success anticipated, will be extended to other schools. About 200 volumes will be placed in each school, largely those recommended in the course of study for outside reading.

ALABAMA

Birmingham. The Birmingham High School was destroyed by fire in February, and a movement was immediately started by the alumni to replace its library. Annie V. Lynch, one of the graduates, started the movement, and subscriptions are being received by the *Birmingham News*.

West North Central

MINNESOTA

Buhl. Because of the delay in receiving materials, the opening of the Buhl Public Library, set for Mar. 8, had to be postponed to a later date. The congestion of freight in the east held up the shipments of materials for the finishing of the library and also many of the books that were to go on the shelves. The building was started last fall and was to have been ready by Jan. 1, but delay in receiving the material handicapped the builders. The new library is located at the Buhl park site, which will give the library building a splendid lawn, a feature lacking in most of the Range libraries.

IOWA

Iowa has been redistricted by the Iowa Library Association executive board. Because

of the growth in numbers of public libraries in the state, eight districts were created instead of six. The following cities were designated as meeting places for the several districts: Manchester, Oskaloosa, Red Oak, Denison, Cherokee, Mason City, Muscatine, and Des Moines. Waterloo was chosen by the board as the meeting place for the state convention to be held in October, 1918.

Des Moines. After two years of agitation of the subject, the library board has voted to establish a branch in Highland Park as soon as a suitable building can be found, and it will probably be opened early in April.

Moline. A branch of the Public Library has been opened in the McKinley Grammar School. The branch is open on Wednesdays and Fridays from 3 o'clock until 5 o'clock, and on Monday evenings from 7 o'clock until 9 o'clock.

West South Central

OKLAHOMA

Bristow. Laying the corner stone of the new Masonic Temple of this city was conducted by the Grand Lodge of the state, Mar. 6. The building when completed will cost perhaps \$30,000 and will be two stories and basement, 46 x 140 feet, outside dimensions. The first story will be devoted to civic purposes, such as a public library, a rest room, gymnasium and several other public rooms. The second floor will be used entirely by the Masonic order.

ARKANSAS

Mrs. H. D. Tomlinson of Butler, Ark., state chairman of library extension, A. F. W. C., has requested the librarians all over the state to send her a history of their library and a picture of the building, if possible, for the exhibit at the G. F. W. C. biennial in Hot Springs. In addition to this, Mrs. Tomlinson is planning to have an exhibit of an ideal traveling library. District presidents have been asked to send her the names of the district chairmen of library extension, in order that she may communicate with them concerning the work outlined for the state.

TEXAS

Austin. The John H. Wrenn library, a collection of original manuscripts and first editions dating from the pre-Shakespearean period, has been bought in a Chicago sale of

the University of Texas for \$225,000. The money for the purchase was a gift from Major George W. Littlefield, of Austin, Texas, a member of the board of regents of the university.

Mountain

COLORADO

Denver. It was expected that the two new branches of the library, one in West Denver and one in Berkeley park, would be completed during the month of March.

UTAH

A tax-supported library in every town with a population of 1000 or more, and a county library in every county seat, are ideals which Mary E. Downey, state library organizer, has set before the library-supporting citizens of the state. The county library idea, if it is carried out, will probably require further assistance from the state legislature. A Salt Lake City paper of Mar. 7 prints a list of counties and towns where effort will be made to start libraries, in carrying out this program. In the twenty-five counties listed, only four are already so well supplied with libraries that no further action is needed.

Salt Lake. The Public Library has opened its first deposit station at the Waterloo Pharmacy. The new branch is open to the public from 4 to 6 o'clock each Wednesday and Saturday. Five hundred books for both adults and children have been installed, with Josephine Devereaux in charge. While the branch will be permanent, its success will determine whether or not other deposit stations will be inaugurated over Salt Lake.

Pacific

CALIFORNIA

Pasadena. The private library of Henry E. Huntington, now divided between this city and New York, will presently be housed in a fine new building to be erected adjoining Mr. Huntington's residence here. Myron Hunt, a Pasadena architect, has been chosen to design the building, and has made a tour of the country to acquaint himself with the details of the best library buildings. The building will be L-shaped, the reading room and bookstacks occupying one side of the angle, with work rooms on the other side. The library will probably be open for reference use to outside workers.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature. Material printed in this department is cumulated each year in the "American Library Annual."

CLASSIFICATION—FOR ENGINEERING LITERATURE

In the Proceedings of the American Society of Civil Engineers for December, 1917 (Vol. XLIII, no. 10, p. 2292-2322), Dr. Charles Warren Hunt gives a résumé of the activities of the society for the past twenty-five years and appends to his report the proposed classification for an engineering library compiled under his direction by Eleanor H. Frick and Esther Raymond of the library staff.

Civil engineering is the only class which has been expanded in detail. Certain subjects have, of necessity, been classed arbitrarily, the principal thought being utility. For example, "Water Wheels" are placed under "Water Power" rather than under "Hydraulic Machinery" and "Locomotives" under "Railroads" rather than under "Steam Engines."

The same nine subdivisions are used as the first general sub-divisions under each main class, and may also be used with sub-divisions of any class.

- .01 History
- .02 Laws and Legislation
- .03 Statistics
- .04 Costs and Estimates
- .05 Contracts and Specifications
- .06 Drawings
- .07 Congresses
- .08 Exhibitions
- .09 Tests. Laboratories

The main divisions and their principal subdivisions are given below. All the classes are considerably expanded in the published outline.

DIVISIONS

000 GENERAL

- 010 Engineering Bibliographies
- 020 Engineering Encyclopedias
- 040 Engineering Directories
- 050 Engineering Societies
- 060 Engineering Periodicals
- 070 Patents
- 080 Engineering in General
- 090 Materials of Engineering

100 CIVIL ENGINEERING

- 110 Structural Engineering. Bridges. Buildings
- 120 Surveying
- 130 Railroads
- 140 Street Railroads
- 150 Highways
- 160 Hydrology. Hydraulics. Dams
- 170 Waterways
- 180 Water Power. Water-Works. Irrigation. Drainage
- 190 Sanitation

200 MECHANICAL ENGINEERING

- 210 Power Transmission. Millwork
- 220 Heat Engineering

- 230 Automobiles
- 240 Aeronautics
- 250 Hydraulic Machinery
- 260 Machinery for Special Purposes
- 270 Machine Shops
- 280 Miscellaneous Types of Power

300 ELECTRICAL ENGINEERING

- 310 Electric Measurement
- 320 Dynamo-Electric Machinery
- 330 Control
- 340 Transmission
- 350 Telephone
- 360 Telegraph
- 370 Lighting
- 380 Chemical Electricity. Batteries
- 390 Other Uses

400 MINING ENGINEERING

- 410 Prospecting. Mine Surveying
- 420 Excavation and Working
- 430 Drainage and Sanitation
- 440 Transportation
- 450 Ventilation
- 460 Lighting. Signaling
- 470 Electricity in Mining
- 480 Accidents. Safety Measure
- 490 Mining Special Kinds of Ore

500 METALLURGY

- 510 Iron and Steel
- 520 Gold and Silver
- 530 Copper
- 540 Lead
- 550 Tin
- 560 Zinc
- 580 Other Metals
- 590 Assaying

600 GAS ENGINEERING

- 610 Natural Gas
- 620 Materials
- 630 Manufacture and Works
- 640 Storage
- 650 Distribution
- 660 Utilization
- 670 By Products
- 680 Management

700 CHEMICAL TECHNOLOGY. MANUFACTURES

- 710 Chemicals. Dyes. Paints
- 720 Ceramics
- 730 Metal Manufactures. Machinery
- 740 Lumbering. Wood Manufactures
- 750 Paper Making
- 760 Textiles
- 770 Leather Manufacture. Tanning
- 780 Foods and Beverages
- 790 Miscellaneous Industries

800 MILITARY AND NAVAL SCIENCE

- 810 Military Science. General
- 820 Fortifications
- 830 Ordnance
- 840 Naval Architecture. Shipbuilding
- 850 Yards
- 860 Navigation. Shipping
- 870 Naval Science. War Vessels
- 880 Naval Strategy and Tactics
- 890 Naval Organization

900 OTHER SUBJECTS

- 910 Philosophy
- 920 Religion

930	Sociology
940	Philology
950	Natural Science
960	Useful Arts (Other than Engineering and Manufactures)
970	Fine Arts
980	Literature
990	History

DICTIONARIES—USE OF

War terms: their pronunciation and definition; where to find them and how to keep up-to-date. Mary Emogene Hazeltine. *Wis. Lib. Bull.*, Jan., 1918. p. 6-11.

With the dispatches from the front bringing into the daily news strange names of places and people, together with whole colonies of new words in military matters and methods of warfare, it is the librarians' problem to meet this emergency. The average library has the three American dictionaries, the New International Encyclopedia, Lippincott's Gazetteer and the Pronouncing Biographical Dictionary, and Phyfe's "Eighteen thousand words often mispronounced." Miss Hazeltine gives a list of words tested in these books, with surprisingly satisfactory results. The words chosen include place names, personal names, war terms, and slang. The test for slang was least satisfactory, but in Empey's "Over the top" is a quite complete glossary of slang and military phrases of the war, while in Christian's "Rhymes of the rookies" are brief glossaries of army slang and English army slang.

For the new words Miss Hazeltine says we must depend on newspapers, pamphlets, and magazines, clipping and keeping in a scrap-book accessible alike to staff and public, any notes on pronunciation or definition of single words or lists of words. The Lexicographer's Easy Chair in *Literary Digest*, Words of the Week in the *Independent*, and By the Way in *The Outlook*, are specially useful.

Miss Hazeltine gives a descriptive list of the dictionaries she has consulted, and her characterization will be useful in judging the nature of the different volumes.

EXHIBITS

The Syracuse Public Library has had a special exhibit of its work and resources in *The Post-Standard* windows. It showed Public Library books for grown persons and children, photographs of the work of the library, printed matter issued by the library, an illuminated and illuminating statement of what the library did with its money last year, and a map showing where the main library, its stations and its branches are located in the city.

To add a historical color to the exhibit there was a likeness of Samuel J. May,

preacher and abolitionist, who was a library supporter in his day, and two or three other reminders of the beginnings of the library movement in Syracuse.

A very interesting exhibit was held in the Exhibit Hall of the Syracuse Public Library during the month of January. A great display was made of pictures, books and manuscripts relating to Edward Noyes Westcott and his book, "David Harum," published twenty years ago. For several reasons the library thought David Harum deserving of so much praise and attention. The book was written in Syracuse and the scenes laid in and around this locality. But two far more important reasons for the holding of this exhibit were: first, the author's relation with an interesting period in the history of the city when it was beginning to grow from a small to a big town; second, the value of the book as a piece of American literature.

Many of Mr. Westcott's contemporaries have stated that Mr. Westcott spent much of his early life in Homer and that one David Hannum of Homer and Mr. Westcott's father, the late Dr. Amos Westcott, were intimate friends. This fact has led to the frequent question whether David Hannum, whose life was much the same as that of David Harum, was the real inspiration of the book or whether David Harum is a fictitious character, created by Mr. Westcott's own imagination.

Every item of the exhibit proved of great interest to the many thousands who attended. Among the articles shown were a copy of the original manuscript presented to the library by the author's daughter, newspaper clippings concerning the author and his book, a scrap-book of newspaper clippings kept by Miss Violet Westcott at the time of the appearance of the book, and parts of the film production of the story.

Numerous editions of the book were displayed. There was a copy of the first edition, a copy of another early edition (1899), an illustrated edition of 1900, a limited edition with illustrations, and a Canadian edition.

Another feature of great interest was the collection of photographs of Mr. Westcott, and the author's autograph. The autograph was signed to a typewritten copy of two conundrums which Mr. Westcott wrote as a gift to Dr. James C. Carson, who presented the manuscript to the library. Among the portraits was Mr. Westcott as a schoolboy, as a business man, and in middle life.

There were many items concerning William

H. Crane, who acted the part of David Harum on the stage. There were five photographs of Mr. Crane as "David Harum," a bas-relief of Mr. Crane as "David Harum" and Mrs. William H. Crane's own scrapbook, containing theater programs and critical reviews of "David Harum" on the stage.

There was also a photograph of David Hannum, of his home in Homer, and a copy of Arthur T. Vance's biographical sketch of David Hannum called, "The real David Harum."

An exhibit of this sort ought to result in a lasting memorial to keep alive a memory of the most important mark in literature made by any author in this part of the country, and ought also to prove to all the value of preserving papers, pictures and other material relative to any important person or subject, particularly one in which their own locality is concerned. The best and safest way to preserve this material is to deposit it with the public library where it may be employed for the interest of all.

LIBRARIANS AND ASSISTANTS—TRAINING

How to be a secretary. Jennie Thayer Schrage. *Wis. L. Bull.*, Jan., 1918. p. 12-14.

The success of an organization frequently depends upon the efficiency of its secretary, who often proves the most important officer the society possesses. A librarian is often called upon to be secretary of some meeting or organization because of her reputation for order, system and accuracy, and unless she possesses these qualities she will fail to make a good secretary.

A secretary's duties are two-fold, recording and corresponding. Sometimes these are performed by two different officers, but in most cases the duty of looking after the correspondence and the records falls upon one person.

The first duty of the secretary is to keep the minutes of all meetings. All minutes should contain the time and place of meeting; motions made, with their originators and results; a complete record of all business transacted, with the signature of the secretary. To avoid errors they should be kept on some sheet of paper during the meeting, rewritten in their permanent form immediately after the meeting, and copied into the record book after they have been read to and approved by the members at the next session.

If resolutions of thanks have been passed during a meeting, the secretary should write the necessary notes to the persons concerned immediately after the meeting.

If new officers or committees have been appointed, the secretary should inform them of their duties.

As often as the constitution of the organization calls for it, she should make a report covering all the meetings for the period included, giving number of meetings, attendance, important business transacted, additions to the membership and resignations, and some account of the work accomplished in that period of time. This report enables an outsider to judge of the progress of the organization. If this report is to be printed, she attends to its printing.

The secretary issues notices of meetings, which in a small organization are written or telephoned and in a larger body are put in a newspaper. In a state organization, notices must be mailed long before the convention is held in order to get the members ready. A good reminder in the case of frequent meetings is a calendar marked with the date of meetings and date on which they are to take place.

Together with these notices she should send the programs. If programs are delayed in being sent out early enough because of trouble in securing certain speakers, the convention call should go out about a month before the meeting and should contain the time, place and plans for the program. The program can be mailed later. The secretary should preserve a copy of all programs, clippings or newspaper write-ups, letters received and sent out.

After a meeting of a state library association a typewritten report including a résumé of everything in the program of interest to librarians should be sent to the *LIBRARY JOURNAL*, *Public Libraries* and the *State Library Bulletin* for inclusion in the current issue. Whenever possible papers read at meetings should be obtained for publication and preservation in the records.

If changes in the constitution are made, they should be recorded immediately.

For future reference reports of officers or committees should be placed in the files immediately after having been read to the organization. They should be placed together with all the material relating to the meeting at which the report was read.

Should a librarian be chosen secretary of her Library Board, she must notify the members a day or two before each meeting and prepare whatever matters are to be brought up, *i. e.*, plan the routine of the meeting.

Another important part of the secretary's work is keeping an up-to-date membership

roll. The easiest way to keep this roll is using a card index where changes and additions can easily be noted. In the case of a new member, it is up to the secretary to send him a few personal words urging him to attend some important meeting. Perhaps in this way the secretary can gain the friendship and loyalty of a new person to the organization.

A secretary will find it of great benefit to her to read Roberts' *Rules of Order*, especially that section devoted to her duties.

If everything is observed and done by the secretary with minute care to the time of the election of her successor, there will be no difficulty on the part of the new officer in taking up her new job where it had been left off by her predecessor.

LOCAL HISTORY COLLECTIONS

Historical preparedness. Dr. Solon J. Buck. *Minn. P. L. Comm. L. Notes and News*, Dec., 1917. p. 109-112.

The average person usually thinks of history as something dealing with the past, and fails to connect the history of the past with the history of the present. It is now fairly well recognized that one of the principal functions of history is to enable us to understand the present and see the reasons for the existence of certain conditions. Many have felt the history of local communities too unimportant a thing to be worthy of consideration. On the contrary, it is important, for a community is part of the whole country and citizens often wish to secure an account of the work of a certain section in the making of history. Teachers are now beginning to realize this and are commencing to lay greater emphasis on the importance of local history.

Most people show considerable interest in anything connected with the American Revolution or the Civil War, as letters, newspapers and relics, and similar material of the present day will hold a like interest for future generations. Usually one thinks of the history of war as having to do principally with military matters, but we are now beginning to realize that every phase of the life of every community is affected by the nation being at war.

Present times which are so full of stress offer unusual opportunities for the collection of local war material, and for this reason librarians now find the collection of this matter for future reference their principal consideration.

The most important class of material for this local history is the newspaper and it is essential that public libraries preserve com-

plete files of all newspapers published in the community. Some libraries wishing to preserve this material have adopted the policy of clipping pertinent items from the newspapers and placing them in envelopes or scrapbooks. This enables one to classify the material and have it ready for reference, but unless complete copies of papers are also kept this is not recommended. A better device is the preparation of a classified card index to the significant matter in the papers relating to local participation in the war. The Minnesota Historical Society started this sort of an index soon after the war began. Files of all the papers from April to August were examined and everything of importance relating to the state's connection with the war was noted on these cards. From August 1st on, the indexing has been confined to a liberal selection of papers representative of other localities and different political, social, economic and religious interests. The point of view of the society would be different in compiling an index for its own local library, thereby doing away with the duplication of its work.

A collection of handbills, posters, programs and photographs for the benefit of the historian and exhibition purposes should be preserved. Some of this will probably disappear and the remainder of the collection will seem as interesting as similar items of bygone periods.

Manuscript records should also be preserved. Many organizations engaged in some war activities have been formed and practically all of them keep some records as minutes of proceedings, reports and correspondence files. Much of this material finds its way into the library as soon as it ceases to be of current use. Similar organizations existed during the Civil War, but little is known about their activities as most of their records have disappeared. Another interesting form of manuscript material consists of letters from soldiers to the people at home, and likewise letters written from the homes to the soldiers. This helps one to obtain some knowledge of army conditions and conditions in particular localities. It is difficult to get this material, but upon agreement that it will not be made accessible for a certain length of time, without the consent of the depositor, the difficulty is often removed.

The care of the ephemeral and manuscript material is an important problem. Such as is not wanted for the present but may be at some future time should be packed away for selection and arrangement at some later time. The rest should be roughly classified, dated

and filed in manila folders, which should be kept in vertical files or "transfer" boxes. Each collection of correspondence should be arranged chronologically, and individual manuscripts according to subjects, but the mixing of printed and manuscript matter is not advisable. Flat or vertical filing with as little folding as possible is the best method.

There are several ways of collecting this war material. Publicity is an important factor. Then, too, the librarian should lay aside anything which may prove of any future value. A program where one is available should be saved every time a member of the staff attends a meeting, and similarly with posters and handbills. The last method and one of greater importance than the foregoing ones is to come in contact with men connected with newspaper offices. From them material, such as communications, letters from soldiers, photographs and literature can be obtained with more ease than when applying to some individual.

NEWSPAPER LIBRARIES

In Syracuse, N. Y., the *Post-Standard* Library added 100 books of reference and 127 books of fiction last year. In connection with the complete card index of local stories running in the daily and Sunday editions, there has been added the war and military division. This comprises a complete record of war and military affairs, names of all enlisted men going from Central New York, National Guard and conscripted men. In the picture morgue there have been added several hundred photographs and engravings of prominent men, women, places and buildings in United States and Europe. The books in the loan division are circulated continually among the staff.

The *Syracuse Journal*, now in a new building, also has a library on its second floor. Its most important feature is the file of the *Journal*, which is almost complete for the 75 years of its existence. The rest of the books are chiefly works of reference, while the cuts and mats used in the paper are also cared for here.

OVERDUE BOOK WEEK

On Oct. 1 the Newark Public Library, as a war economy measure, discontinued the sending of reminders and fine notices.

The public is learning the idea, but bad weather and the closing of branches made it difficult to return books. Hence "Overdue Book Week," January 30 to February 6, and later extended to February 16, was devised to recover overdue books.

Colored circulars informing the public of this "Overdue Book Week" were distributed freely.

No fines were charged on any overdue books returned within this period. This saved the public and the library money. For, as the circular pointed out, contrary to the belief that the careless book borrower who pays fines helps support the library, the library finds it costs much more to find and get back the books that careless borrowers keep overtime than all the fines the library gets.

OVERDUE BOOKS

The Kansas City Public Library uses a library-made card to get overdue books back to the library. The message is typewritten or mimeographed on a plain manila card, which must not be of regular postal card size nor called a postal card. It reads as follows:

Library Regulations—I

KANSAS CITY PUBLIC LIBRARY

To Library Patrons:

Your attention is called to the following important rule, enacted by the Board of Education:

"The borrower shall be subject to a penalty of two cents a day for any book kept overtime, and no volume may be drawn until such penalty shall have been paid."

Errors in charging books will be corrected if cards are sent to the library. Cards will be returned. Have you an overdue book? [Or, Is your book overdue?]

KANSAS CITY PUBLIC LIBRARY.

In his memorandum sent with the card Librarian Wright says: "This has been tried, and is working well. Saves one cent postage, less cost of blank card; gets book back; saves time."

PERIODICALS—CATALOGING

The Library of Congress has just issued a "Guide to the cataloging of periodicals," prepared by Mary Wilson MacNair. While intended primarily for the Library of Congress staff, the pamphlet forms a welcome manual for all who are concerned with the recording of periodical literature.

As T. Franklin Currier of the Harvard College Library writes: "It is concise, well planned, clearly expressed and covers in a thoro-going fashion the various points that arise to trouble the bibliographer and cataloger. Aside from the long established and uncomfortable rule of entering a periodical under its latest title the only chance for criticism seems to be rule 22; all of the collections mentioned under this rule would be better entered under their titles with added entries from the names of the magazines.

"As to the general principle of entering periodicals whose names have changed under the latest title, this practice forces the library to reprint the whole entry with each successive

change. Will the Library of Congress do it? A much simpler method for both cataloger and uninitiated searcher is to make the earliest name the main entry and add to this the successive changes of title, one by one, as they arise. Each new title must naturally have its own entry with a note referring to the earliest name for the complete history, and for convenience a statement as to the date when the entire set begins.

"This method saves constant reprinting or retyping and frees the cataloger from the embarrassment, sometimes startling, of recording a periodical title as existing several years before the fact, as in the third example on page 20."

STAFF MEETINGS

At the January (1918) meeting of the District of Columbia Library Association, certain innovations in the conduct of the meeting were introduced.

Mr. Houghton reported as chairman of the program committee the adoption of an order of business which was to include besides the speaker of the evening a short talk on new organizations in the District of Columbia, such as the Food Administration, Council of National Defense, etc., two ten-minute book reviews and a series of questions asked and answered by members of the association. Mr. Houghton particularly emphasized the last item as having in it the possibility of making the association of practical value to the members, it being the hope of the program committee that the association might become a clearing house for all sorts of library information. Questions are to be sent to the secretary of the association and by her sent out with the announcement of meetings so that members may be prepared with answers.

The following questions which had been submitted to the association were read by the president: Is there any index to the Commerce reports, other than the Government's skeleton index. *Ans.* The Standard Daily Trade Service, published by the Standard Statistics, New York City, which indexes the Commerce reports of the previous day. Cumulates every three months and is annotated. 2. Is there a good list of trade directories available? *Ans.* Lists of directories have been compiled by the Librarians of the Department of Agriculture, the Department of Commerce and the Federal Trade Commission. 3. Is the list of house organs (magazines issued by business firms) published in *Printers' Ink* in 1916 the latest and best published? *Ans.* A list was published in *Postage* for

August, 1917. The Food Administration, Trade and Technical Press Section, has a list of nearly 800 to which their weekly bulletin goes; this is of course not published. 4. Is there available for a library that cannot purchase books such as "Ayer's newspaper annual" an up-to-date list of technical and trade papers? *Ans.* *Advertising and Selling* magazine publishes such a list every year and a separate list of farm papers. Mahin's "Advertising data book," N. Y., 1916, contains such a list.

STANDARDIZATION OF LIBRARIES

Concerning standard library service. Lucy L. Morgan. *Mich. L. Bull.*, Sept.-Oct., 1917. p. 82-84.

In the library world of to-day standardization or uniformity is one of the most important subjects. Without uniformity there is no definite basis for the library laws and legislation necessary to put library work on such a footing as to receive the recognition and compensation of an effective public service. Efficiency is the aim of the public library, and in order to receive a rating for its efficiency some standard must be established below which good library work must not fall. It is up to the librarians themselves to find this standard and bring about the legislation necessary for proper public service.

To consider the question of standardization of library service, standardization of libraries must be considered. There is a nationwide tendency among libraries to be individualistic. It is a wrong tendency, for uniform action on their part is a most desirable thing. The growth of libraries has been such that standardization must come and not until then will library work develop uniformly.

There are several questions which may be considered in setting a library standard. Having been given a certain population and certain taxable property, what should be the income of the library; the circulation of books in relation to the number of volumes; the circulation in relation to the income; the number of readers in relation to the population; the hours the library should be open; the number of people on the staff; the extent of their education and training; the extent of special forms of work to be undertaken?

With this as a model, the standard efficiency of libraries could be charted by classes, and against this model the individual library could be measured. This would show where the library fell below the standard requirements for its class.

At present the A. L. A. committee on stand-

ardization is working on this problem, and as soon as their recommendations have taken definite form it would be well to fall in line with them. Undoubtedly many libraries would then find themselves far above their minimum class rating, and the others would have a clearer idea of just what service the libraries should give to their public.

As for standardization of librarians, the tide in that direction has already set in. Libraries are frequently facing inclusion in a civil service system, sometimes as the result of a general civil service law in cities of a certain class. Experience has shown that where civil service has been extended to assistants in public libraries the results have been detrimental to library efficiency. Experience, tact, personality and initiative mean as much as technical knowledge.

Certification of librarians has been proposed as likely to result in better library service than civil service. Several states have already taken steps towards certification. In California the county librarians have always been certified by a board of examiners. The New York Library Association's committee on the "merit system in libraries" puts all appointments on a basis of probation, with a certificate to come when it is earned.

Since certification of librarians is a desirable thing, the question of how to test the competency of librarians arises. A uniform standard of competency is undesirable because a person may be incompetent in one thing and competent in another.

The standardization of librarians will help to solve such important questions as the kind of test for librarians, the qualifications for entrance to library service, the preparation for this service and the special training of each librarian.

Large budgets, more pay, shorter hours and longer vacations are but a few things which are of vital importance to public library development. In most cases these have long been deserved but have been unprocurable because of the lack of uniform equipment in libraries.

TRAVELING LIBRARIES

The progress of traveling libraries in Baroda during the last six years has been remarkable, according to a report in the *Library Miscellany*. Beginning with a stock of 83 boxes and 2400 books, the traveling library branch at present possesses 444 boxes and 13,950 books. In the first year 90 boxes were sent out to 49 centers, and they circulated 7000 books among 2574 readers. In the fourth year 354 boxes

were sent to 302 centers, which distributed 15,303 books among 7556 readers. During the fifth and sixth years, *i. e.*, during 1914-15 and 1915-16, the work of reorganizing the whole scheme was undertaken and for this purpose boxes and books were called back to the center for six months; therefore during these two years circulation went down. The average expenditure per year on this scheme is about Rs. 3000, and during the last six years the Baroda State has spent on these traveling libraries Rs. 16568-4-1 in the following manner: Rs. 11,413-7-4 on books, Rs. 2463-12-9 on boxes and Rs. 2691 on maintenance charges.

The boxes sent out are of two sizes, holding 15 and 30 books, and the collections are both "fixed" and "open-shelf," the latter being made up anew for each trip. Special collections are arranged for women and children, for farmers and artisans, for teachers and school boys, and for those speaking other than the Gujarati language. The collections may be kept for three months, after which they must be returned to the Main Library for an overhauling before being sent to another town.

Bibliographical Notes

The San Francisco Public Library has published again its annual cumulation of additions to the library as recorded in its *Monthly Bulletin*.

The list of books suggested by the Grand Rapids Public Library for a "better home" library was printed in the library's *Bulletin* for December.

The technology division of the Cleveland Public Library has finished its list on subways, begun last spring. It is not exhaustive, but comprises about 300 classified entries, prepared in a 36-page mimeographed list.

Photographs dealing with the British operations in the war may be secured by libraries at cost price (15 cents each) from the British Pictorial Service, 511 Fifth avenue, New York, of which Geoffrey Butler is manager.

In volume X of "Islandica," an annual relating to Iceland published by Cornell University Library. Halldór Hermannsson has edited Gísli Oddsson's "Annalium in Islandia Farrago" and "De mirabilibus Islandiae," manuscripts of the early seventeenth century.

A very useful pamphlet on "Removal of stains from clothing and other textiles," prepared by Harold L. Lang and Anna H. Whitelsey of the staff of the Home Economics

Office, has been issued by the United States Department of Agriculture.

The January issue of *Special Libraries* is devoted to women and war-time problems, and contains much excellent material, including a list of the war emergency courses offered by colleges in different parts of the country, and a bibliography of the war-time occupations and employment of women.

A new directory of periodicals is now being compiled by *The Editor*, which for years has issued annually "1001 places to sell manuscripts." To the statements of editorial requirements formerly included, will be added statements of circulation, cost of advertising, size of page, etc.

The library of the Tempe Normal School of Arizona has recently compiled a list of about 200 books suitable for a school library. The list is based on the course of study in the school and attempts to provide books for every grade up to the high school. In choosing editions the matter of clear type and sufficient leading have been specially considered.

"Emergency training in shipbuilding" is the title of the third bulletin issued by the Federal Board for Vocational Training at Washington. It embodies the results of a survey of occupations in the shipbuilding field and attempts to point out how public and private schools in or near places where shipbuilding is carried on may, thru evening or part-time classes, help in training men for employment at the yards.

A list of Syracuse authors past and present, about two hundred and seventy-five in all, is printed in *Syracuse Libraries* for December. This list does not include the names of Syracuse University men, as these were published not long ago by the university itself. The Syracuse Public Library is also inaugurating a series of "citizenship leaflets," of which the first two tell "How Syracuse is governed," and "Some books for voters."

Emergency Fleet News is a new weekly published by the United States Shipping Board Emergency Fleet Corporation (1319 F Street, N. W., Washington, D. C.) as a medium for co-ordinating the work of the various divisions and departments. The first issue is dated Feb. 28. The corporation, which is housed in twelve buildings in Washington, has about 2000 employes, and has supervision of 147 shipyards which require at present no less than 200,000 men.

In his book on the life of Cardinal Ximenes, one of the makers of modern Spain, James

P. R. Lyell has included an account of the Complutensian Polyglot Bible, the cardinal's *magnum opus*. This material, as well as the census of existing copies printed in appendix A, and the bibliography and handlist of works issued under the direction of Cardinal Ximenes, has not hitherto been accessible to English readers in detailed and connected form. The book is published by Grafton.

The Committee on Public Information, 10 Jackson Place, Washington, D. C., has issued and will issue during the coming year, a series of booklets bearing upon the War and America's part in it, as the first step of a campaign to secure the aid of the educational forces of the country in the promotion of a clear and intelligent understanding of the war. It is planned to put a copy of each booklet into every school, and every library should also make special effort to secure the complete series.

In J. Byron Deacon's little book on "Disasters," whose proof sheets were fortunately ready on the very day of the Halifax disaster, the Russell Sage Foundation has published a compact and at the same time comprehensive account of the experiences of the American Red Cross in disaster relief, which every library should own. The book states clearly the procedures which, if taken promptly after disaster, can greatly reduce loss and suffering, and also indicates the measures of preparedness which are also possible.

A new series of leaflets has been started thru the joint action of the Department of Agriculture and the Food Administration, giving practical advice in very simple language on how to use the foods the government asks us to eat so that economical, appetizing, and well-balanced meals may be prepared. Recipes sufficient for a family of five are included. Titles of some of the leaflets are Start the day right with a good breakfast; Do you know corn meal?; A whole dinner in one dish; Make a little meat go a long way.

A primer on shipbuilding, called "Shipbuilding for beginners," prepared to instruct the volunteer shipbuilders from inland communities in the mysteries of the technical terms common to the seafaring man, has been written by A. W. Carmichael, assistant naval instructor, U. S. N., and may be secured from the Industrial Service Department of the Emergency Fleet Corporation in Washington.

The Manitowoc Ship Building Company at Manitowoc, Wis., publishes a little house

organ called the *Service Club Bulletin*, the first number being issued in February.

In the "Guide to the law and legal literature of Argentina, Brazil and Chile," by Edwin M. Borchard, the Library of Congress has published the fourth volume in its series of guides to foreign law. Dr. Borchard was the library's law librarian from 1911 to 1916, and the work is the result of studies made in the foreign law collections of the Library of Congress and also in the countries named.

The St. Paul Public Library has just published a selected list of its books on retail merchandising. It is a six-page folder numbering 60 titles, and includes books on department store work, business finance, accounting, credits and collections, advertising, show cards, window trimming and display fixtures. It is the third of a series, the first of which was on advertising, the second on office work.

A number of publications of the City of New York are distributed by the Municipal Reference Library, and they are described in a circular entitled "Monographs and reports on municipal problems: some recent reports of exceptional interest published by the City of New York," a copy of which may be had for the asking. Among the titles listed are: The building code; Basic quantity food tables; Monograph on infantile paralysis; Hall of Records power plant; City manager plan for New York City; Reports of Mayor's Committee on Taxation; Reports of Mayor's Committee on Unemployment.

The Russell Sage Foundation, thru its publication department, has been sending out to libraries all over the country a circular letter embodying "three wishes," urging librarians to take fuller advantage of the valuable reference service furnished free by the foundation and to seek regular information on new publications. The foundation is already helping many libraries in the selection of their books on social subjects, and its own publications, always issued at a price much below cost, are very valuable contributions on the many questions relating to social betterment.

A pamphlet of 28 pages has been prepared by Theodore Wesley Koch and printed by Dent on "The University of Louvain and its library." Mr. Koch has sketched the history of the university from its foundation in 1425, putting special emphasis on the library and its treasures and making the account of the destruction of the library as brief as possible. A number of illustrations are given, showing

the library both before and after the invasion, and the pamphlet is issued, as Mr. Koch states in his preface, "in the hope of interesting a wider circle of booklovers (especially in the United States) in the upbuilding of a new library for the university."

A very interesting chart has been compiled for the Committee on Public Information, showing the general organization of the Executive branch of our national government. The Executive is placed in the center, surrounded by the ten departments and the Council of National Defense, and each of these is subdivided again into its numerous component parts. Independent but closely co-operating institutions such as the Library of Congress, American Red Cross, Government Printing Office, Pan-American Union, National Academy of Sciences, National Research Council and United States Botanic Garden, are placed in scrolls immediately outside.

The *Pasadena Library and Civic Magazine* is now in its second year. It is an enlargement of the *Bulletin* formerly published by the library, and has been broadened to note important civic as well as library activities, its aim being to give proper publicity to the Library, and bring the library and the business people in closer touch. The magazine is printed on the Municipal press, and thru the Board of Trade and a number of stores, as well as thru the Library, it is widely but not indiscriminately distributed free of charge. There is also a large mailing list. The *Magazine* is edited by Mrs. G. Packard DuBois, who is also extension worker for the library and in charge of the school libraries.

A useful classified and annotated selective list of French books has been prepared by Brentano's under the title "Suggestions for forming a library of French books." For the sake of keeping the list within a reasonable number of pages, the classic writers of the seventeenth and eighteenth centuries have been excluded, as have been all works on science and technology. As the catalog is arranged, the material is grouped under the following headings: Literature (prose, poetry, drama, and a few younger writers), History of France, Geography and natural beauty, Art in France, and Dictionaries, grammars, study of the language. A short note at the beginning of each section gives a few details of arrangement, and the list of each author's works is followed by a brief estimate of their character and the author's standing.

An excellent series of "Lessons in community and national life" is being issued by the Bureau of Education of the Department of the Interior, in co-operation with the Food Administration. The lessons are issued monthly, under the editorial supervision of Charles H. Judd, director of the School of Education of the University of Chicago, and Leon C. Marshall, dean of the School of Commerce and Administration in the same university. The lessons are prepared in three sections: A, for the upper classes of high schools; B, for the upper grades of elementary schools and the first class of high schools; and C, for intermediate grades of elementary schools. Each section contains three or four lessons, and eight numbers of each section will be issued. Single copies are 5 cents each, and special rates are made for purchases in quantity.

The publication of the Minutes of the Common Council of the City of New York, 1784-1831, is announced. Editorial work on these minutes has been going on for over a year, under the supervision of a special committee whose chairman is Victor Hugo Paltsits, of the New York Public Library, and whose secretary is Dr. C. C. Williamson of the Municipal Reference Library. The completed work will probably require twenty octavo volumes of 800 pages each. Ten volumes are now ready for delivery and it is expected that the entire work will be completed by the middle of 1918, with the exception of an index, now in course of preparation, to be published in one or two volumes as soon as possible. These volumes are printed on the purest rag paper obtainable, and bound in stout library buckram. No copies will be available for free distribution, but the set will be sold for much less than the cost of printing.

The National Child Labor Committee has published "Child welfare in Oklahoma," the report of an investigation conducted under the direction of Dr. Edward N. Clopper for the University of Oklahoma. Its importance lies in the fact that Oklahoma is the first state to appreciate the advantage of preceding legislative action by thoro state-wide inquiry, so that its measures for the protection of children may not be spasmodic and unrelated. Following Dr. Clopper's introduction, the other chapters are on "Public health work" and "Recreation," by Gertrude H. Folks; "Education" by Elizabeth Howe Bliss; "Child labor" by Lewis W. Hine; "Agriculture" by Charles E. Gibbons; "Juvenile courts and probation," "Institutional care of children" and

"Home finding," by Mabel Brown Ellis; "Poor relief," by Eva Joffe; and "Parentage, property, and general protection," and "Administration," by W. H. Swift.

At the Institute meeting in Atlantic City Dr. Wilson of Clark University spoke in strong endorsement of the "Collection Horizon" of books on the treatment of wounds and of new diseases due to the war. The books are published by Masson et Cie., 120 Boulevard Saint-Germain, Paris, and are promptly translated and issued in England by the University of London Press. The French edition sells in this country at 5 francs each, and the English mostly at 6/. Seven of these books were reviewed in the London *Times* literary supplement for Jan. 18, their titles being: Hysteria, or Pithiatism; After-effects of wounds of the bones and joints; Treatment of infected wounds; The psychoneuroses of war; Syphilis and the army; Typhoid fevers and paratyphoid fevers; and Dystenteries, cholera and exanthematic typhus. In October, 1917, twenty-one titles had already been issued in the French edition, and eight more were in preparation.

There is to be published a Library of Moral Education Literature of which President Charles McKenny of the Michigan State Normal College, Ypsilanti, will be the director, and Professor H. L. Latham of Adrian College, Michigan, editor-in-chief. This Donor's Library on Character Education will be composed of several volumes of extracts from writers on education who have contributed in books, pamphlets and articles to the best opinion as to methods of educating the character of children and youth. It will be published at the expense of the business man who has offered the \$5000 prize for the best children's code of morals, and who is providing the award of \$20,000 for the interstate character education methods research. The aim is to evolve improved plans for character education in public schools. One library will go as a gift to each state group of collaborators for use during the research year, and at the completion of the research each state group will turn the library over to the state superintendent's office for general circulation among the teachers of the state. A few copies will be offered for sale to educational libraries.

An extended critical bibliography of publications relating to the war is printed as a war supplement to the *History Teacher's Magazine* for March. The list was prepared by George Matthew Dutcher, professor of

history in Wesleyan University, in co-operation with the National Board for Historical Service. As far as possible the compiler has made his notes directly from the books concerned. The list proposes to include books on the causes, problems, and issues of the war, the question of war and peace, and on the several countries involved. It omits, with a few exceptions, periodicals and periodical articles; pamphlets; official publications; technical or specialized works; memoirs, diaries, etc.; histories of the war, unless valuable for material other than military; poetry, literary appreciations, and philosophical speculations. Only a few books of unusual interest published prior to 1914 are included, and none issued since November, 1917. The bibliography contains about 600 titles, of which 133 are marked with a single star and 24 with double asterisk. The latter group (listed at \$37.80) is recommended for small libraries, and the two selected groups (valued together at \$333.40) for good larger libraries.

Open Round Table

LIBRARY PROGRAMS FOR LIBRARY MEETINGS

Editor Library Journal:

At the recent meeting at Atlantic City your correspondent was constrained to wonder "Why the Institute?" Or, for that matter, why library meetings at all? For the most part, during the last few years the program topics presented have been on subjects that were more related to social welfare or pure entertainment or general culture than library topics, and in most cases, when libraries or library work has been touched upon at all, it has been with labored effort, and the subject literally dragged in by the heels. The situation has developed so that if one wishes to discuss library matters he must cut the meetings and attach himself to some cosy group of well-known librarians (also "cutting"), either by invitation or "pure gall," and thus derive knowledge of what is doing in the library world, or inspiration, often both. But what of the great number of little or less known librarians, who, lacking the necessary acquaintance or "pure gall," must look with envy on those cosy groups, and who must perforce lose the chance of either knowledge or inspiration?

Seriously, I believe that our own calling has enough problems, interest, and big men and women in it to warrant a certain number of meetings each year. I also believe that when these big men and women talk on our own problems and matters of interest to us, we ought to have a chance to hear them. And furthermore that the program of the meeting should include these important facts of such talks.

At Atlantic City this was not so. Two of our most prominent librarians attended *our* meeting to talk at a private gathering on most interesting topics to a small group of the "elect." True, there was an invitation extended to outsiders to attend this meeting, but while fairly legible, it was confined to a 3 x 5 inch space and posted in an inconspicuous place. The nature and size of the invitation were defended on the grounds of modesty; it was thought the subjects would not be of general interest! A practical way of disposing of pamphlets so that they could be of service to the public without costing the whole book fund to bind them, a remedy for the pamphlet pest, not of interest! And again, the

practical use of photography in library problems of no interest! As well talk of some unusual and delicate operation in surgery and demonstrated by the Mayo Brothers not being of interest to some unfortunate country doctor who never would be in a position to use the knowledge gained! But who will deny that a new insight into the bigger things has not lent inspiration to all who were favored to hear? It is an unfortunate fact that some of the most interesting library topics, when presented as program topics at all, are discussed before small groups to which one may be welcome or not, at the whim of the select group. Our A. L. A. meetings have been likened to a 3 ring circus. In proportion, what of our Atlantic City meeting? Counting the two sessions of the A. L. I. there were six meetings and a "function" in a day and a half!

Now, may I ask just what is the A. L. I.? I have heard some of its biggest members declare that its existence was unwarranted. Hence, I repeat, why the Institute? Does it represent the American spirit of democracy? Or does it exist because it wants to discuss topics purely "library," with the modest desire of not inflicting such technical topics on the masses? Would it not be a good plan to test the masses regarding their interest? Certain special sections or associations do discuss library topics, sometimes three and four meetings being held at the same time, all of them of a character that should be and usually is of interest to all librarians. Are we to be narrowed down to specialties and lose touch with the work as a whole? The A. L. A. exists and the meetings are made possible only thru the numbers who can never be specialists, but who would be better repaid for their membership and time if they could come into a little closer touch with the more important librarians and specialists. The general practitioner in library work has to prescribe for many special ailments in smaller communities, and it is in the hope that some help will be gained from attending library meetings that most librarians attend the meetings. To continue longer the kind of programs we have been having at many meetings in the last few years, in my opinion is actually not honest. Some librarians get benefit from the meetings, but not from the program sessions. Since, however, this is the only way the great number have of getting any benefit, I maintain that it is not fair to compel them to wrestle with their conscience or disappointment, according to whether a Library Board or themselves are paying for the "outing." If there

are not enough problems, and capable and interested (and interesting) speakers to keep the present pace of library meetings, why not accept the philosophical as well as business principle of supply and demand to guide us, and cut out some of the meetings? Then perhaps the meetings can be devoted to discussions of matters concerning our own work, rather than a series of opportunities for speakers with a "hobby" to connect his steed with a few elementals of our own calling. An occasional diversion of real merit and not too far off the line is desirable, but we should retain a better balance than has been true of the last few years. There is something wrong with meetings that hold their audience thru courtesy and duty alone. The best meat of our programs is in the section or special meetings. May we not hope for a speedy dawn of sanity in these matters?

Very truly yours,

C. A. GEORGE.

*Free Public Library,
Elizabeth, N. J.*

Lots of library folks will say Amen to Mr. George's letter, and the profession should hear the pros and cons from other librarians and assistants. Won't some of the latter tell us what they think?

LIBRARIANS' SHORTCOMINGS

Editor Library Journal:

Why do librarians have their letter heads printed with the name of the city or town, leaving off the name of the state or country? Of course almost every one knows such places as New York, London, Chicago, Boston, but there are thousands of small towns that are not so well known as these cities. The same name applies to several cities in different states as Salem, Springfield, Portland. More than once I have received communications from librarians, when I have been obliged to resort to the postmark on the envelope to determine what state the communication came from, tho written on the regular library stationery.

Just now I am in a quandary. I have a request from a librarian for a slight favor which I would like to grant, but cannot because of insufficient data. The letter head reads, *County Borough of Darlington. Edward Pease Public Library, Crown Street, Darlington.* The address on the outside of the envelope reads, *Darlington Public Library.* The postmark says Darlington, very distinctly, but the country is so blurred as to be utter-

ly illegible. It bears a canceled penny stamp, and is marked "Opened by the censor." Lipincott's New Gazetteer of the World gives fourteen Darlington's, twelve in United States, one in England, and one in Australia. I cannot find the name of the Edward Pease Public Library in any directory of libraries at my command. I assume therefore that the request comes either from England or Australia, but which?

Probably the LIBRARY JOURNAL reaches both of these and several other Darlingtons, and a notice in it might tell my librarian friend that I am anxious to serve him as soon as I can find out what part of the world he is in. I can think of no other way of reaching him unless I communicate with both England and Australia.

Speaking of shortcomings of librarians, there is another equally flagrant. Why do some librarians put the date before the name of the month? I know this is the English way, but no business man writes in that way. Of course 13/3/18 can mean only March 13th. But what does 4/8/17 stand for? If written by a business man one would know it meant Apr. 8, but if it was a few months old and came from a librarian one would have to look at the postmark on the envelope to be sure. It might mean Aug. 4.

GEO. H. LAMB.

*Carnegie Free Library,
Braddock, Pa.*

We echo with much feeling Mr. Lamb's protest against the aversion some libraries feel against the "commercialism" of the complete address. We have lately received two checks, unaccompanied by any letter of instruction but apparently intended for subscriptions. One was sent by "Reed Institute" and the other by "Curtis Memorial Library." With the postmark in both cases obliterated, and no other clue to their location, these two institutions will probably wonder why the JOURNAL fails to reach them promptly.

In their annual reports also many libraries fail to give their location clearly. The same mail that brought us Mr. Lamb's letter brought a very attractive booklet on "The Harbor Springs Christian Association" and its library. No doubt we ought to have known Harbor Springs, but we didn't, and it was only by the aid of a reading glass that we deciphered the sign of the post office in one of the pictures, and finally ascertained that Harbor Springs is in the State of Michigan. But why not say so boldly on the title page?

THE NEW HOME OF THE MINNESOTA HISTORICAL SOCIETY IN ST. PAUL.

THE LIBRARY JOURNAL

Vol. 43

MAY, 1918

No. 5

THE book drive has succeeded thus far beyond expectation and tho no exact figures are yet obtainable, it is known that over two and a half million volumes have been given by the American public during and since the initial week. The New York Public Library with its splendid esplanade on the main thorofare of fashion and shopping, its tables heaped with books brought in by handfuls or in automobile loads, enjoying the help of John Foster Carr as captain on the quarterdeck with his megaphone, has naturally led the van, so that from Greater New York alone over 450,000 books have already been collected. The result has varied elsewhere according to the activity of the drive. Philadelphia has yet to wake up and warm up to the work, as she has collected only by the ten thousand, while New York has collected by the hundred thousand. In the smaller places many libraries have done phenomenally well in proportion to population, while others lag behind. This means that there are books to be had everywhere in abundance, and that it is vigorous local effort that is needed to call them out and put them at the service of our boys. The generosity of the public has been shown not merely in quantity but in quality. Most of the books are just the reading that the soldiers need, and others, unavailable for direct use, are turned into money for book purchases. In some cases donors have given valuable editions which could be sold at prices furnishing several copies of good editions volume for volume, and the War Council has asked that in all cases where donated books are sold, whether in this way or to second-hand dealers or in other ways, either the money should be turned in to the treasurer of the A. L. A. at Chicago or that accounting should be made to him for

monies thus or otherwise received. It is important that the public should appreciate what it has done, and it is proper that the library organization should show its own appreciation, by such accounting, even where monies are given or used exclusively for local purchases or expenses in connection with the campaign.

THE Director General and his staff have kept steadily at work and the members of the War Council have given their continuing attention in respect to book distribution. In accordance with General Pershing's request for fifty tons of book space each month for the A. L. A., permitting the transportation of a hundred thousand books a month, tens of thousands have been shipped from the dispatch offices at Hoboken and Newport News, and the library at Camp Upton, for example, was for a time almost depleted as the result of the placarded request that each soldier should take with him one book for service "over there," by which means each regiment on arrival abroad will have its regimental library. But a fresh supply, from purchases and gifts, of 10,000 books was promptly on hand for transfer to the emptied shelves. Abroad, Dr. Raney, acting for the Director General, has investigated and reported on the status of American work both in England and in France, where the Y. M. C. A. and the Red Cross are the distributing agencies for books, under the general supervision of A. L. A. experts, and it is to Dr. Raney's careful work and tactful handling that we owe General Pershing's requisition. Burton E. Stevenson, who has done such fine work at Camp Sherman, has recently sailed to supplement Dr. Raney's work, and every precaution has been taken to make the supply of books overseas continuous and effective.

THE appointment of Mr. Roden to the librarianship of the Chicago Public Library has given the greatest satisfaction to those who knew his work in Chicago, his loyalty to his late chief, his appreciation of the task before him and the dangerous situation from which his appointment relieved that city. Of the dozen candidates, only three were librarians of experience, and none of the others, so far as can be learned, were of that proved executive ability which had from time to time, as notably in the case of Justin Winsor, brought new men into important library posts. In carrying out the great plan which Mr. Legler left as his legacy to Chicago and the library world, Mr. Roden has an opportunity opening before him which is unsurpassed in this country, and everyone will wish well to him as he proceeds with the building up of this great memorial to his beloved predecessor by the splendid achievement of the noble task before him. It is often a problem of difficulty and delicacy whether an important post shall be filled by promotion from within a library or by new blood from without, and the civil service examination in this case has proved a happy means of solving this difficulty.

IN the early days of the LIBRARY JOURNAL, changed titles were such a problem and plague to libraries that Mr. James L. Whitney, then editing a department of "Pseudonyms andonyms," devoted considerable space to entries of changed titles, and from this material made up his little handbook called "A modern Proteus." Very useful this was in those days, when so many queries had to be cleared up for catalogers. Nowadays there are fewer such questions, yet they are perpetually recurrent, and librarians feel aggrieved against publishers when they find themselves buying a book under a new title which proves to be an old acquaintance otherwise entitled, and al-

ready on their shelves. On the other hand, publishers, especially in importing editions, sometimes find the title made abroad a hindrance rather than a help to the book because of its un-descriptive or un-American mode, and thus titles are honestly changed in the interest of author, publisher and reader alike. Librarians feel that they have a right to ask that in such cases it shall be made quite clear, possibly thru an explanatory note on the title page verso, that it is the same book which they have known under the previous title. The LIBRARY JOURNAL is always open to announcements of such changes, and it would be well if publishers as well as librarians would give notice of changed titles thru our columns.

WE have now collected for the *American Library Annual* returns from a large proportion of libraries for entry in the general list which will again be a feature of the *Annual* in its 1917-18 volume. Many libraries have not responded, but data now sent will be used if the entry for this particular library has not already been shaped. It is intended to make the list, as in 1915-16, comprehensive of libraries of general character, and to replace the tabulated form by individual entries, which will contain more information than heretofore as to each library. In scheduling the contents of libraries, we have proposed to give books and pamphlets separately, where separate statistics were sent us, thus covering the "pieces" of the Bodleian or Harvard category; but practice in this respect is not yet sufficiently standardized to make statistics uniform. Another interesting question in statistics is presented by a correspondent, who gives reasons why binding should be considered in the returns of book purchases, as oftentimes rebinding takes the place of a new purchase. These are proper subjects for the standardization committee of the A. L. A.

LIBRARY ACCOUNTING*

By JEAN L. GREENHALGH, *Supervisor, Accounting Department, Columbia University Library*

AT this time when all libraries as well as all the institutions organized for social betterment or for profit are feeling the stress and strain resulting from the great war, it seems appropriate to discuss the means by which libraries keep their accounts. The word "account" used in its broadest sense means not merely a narration or statement of facts, but something systematic and orderly.

FUNCTIONS

The functions of a library accounting department are not different from those of any other institution of like size and scope, provided, of course, that we limit the term "accounting department" to financial accounts, eliminating the vast array of figures and statistics which are not related to finance. One of the first essentials of a successful accounting department is that its head should be a trained accountant and, as Warren says in his book on "Business," "such a one like an artist can paint a picture of a man, a house or a horse, a sunset or a range of mountains. He may specialize on one class of subjects, as animals or portraits, but he can undertake any of the others with some assurance of success." A trained accountant who is thoroly grounded in the fundamentals of accounting is usually able to take hold of any kind of accounting and conduct it successfully. Hence such an one is better fitted to fill this position than the average trained librarian.

An ideal librarian is one who combines all the qualities of a man of culture, of learning and bookish interests, with those of the business man. There probably are such librarians, but they are few. Librarians, who are not usually business men or kings of finance, have more need of special assistance in handling accounts than does the man whose whole interest is centered in finance. The library accounting department, therefore, is the safeguard of the librarian. He is the one officer upon

whom the ultimate responsibility rests for the proper expenditure of funds, and he cannot pass upon recommendations unless he has available an accurate statement of the funds. This is the primary function of the library accounting department, but it has other functions which are subordinate.

LIBRARY ACCOUNTING AT COLUMBIA

The present phase of library accounting at Columbia University dates from July 1, 1914, when the system in use was installed. Prior to that time various methods had been used. At one period all of the accounts of the library were kept by the head of the order department. At another the book order accounts were kept by the order department and the salary and miscellaneous accounts by the librarian's secretary. In no case were the accounts kept by persons who had been trained in accounting. Their chief interest was in other work and it was neither fair to the library nor the persons involved to place this burden upon them. Undoubtedly the work was done as well as it could be done under these conditions, but in the nature of things the librarian could not be given that full and accurate information which he needed in order to perform his duty intelligently. Moreover a system which probably worked well at the beginning became less and less workable as the university and the library increased in size.

The result was that in January, 1914, Mr. Hicks, the assistant librarian at that time, recommended to the president the installation of a central bookkeeping system for the library. In a subsequent letter the proposed system was described in detail and the plan was approved by the finance committee of the board of trustees to take effect July 1. As described in the Report of the assistant librarian, June 30, 1914, page 5, "The new scheme of financial administration may be outlined as follows: (1) Allotment of all funds at the beginning of the fiscal year in accordance with the provisions of the budget; (2) a central

* Paper read at the Annual Conference of Eastern College Librarians, Columbia University, Dec. 1, 1917.

bookkeeping system; (3) weekly reports by the bookkeeper to the office of the librarian, of the balances on all funds; (4) the librarian to approve no expenditures for which funds are not available as shown by these reports. The bookkeeper is responsible also for requisitioning all supplies thru the university bureau of supplies and for their receipt and distribution to library departments." This system with certain additions, seen to be desirable by experience, has now been in operation for over three years. It has been of the greatest assistance to the administration of the library and to the heads of the department librarians having an interest in the expenditure of funds, and during the present administration this centralization has been greatly increased.

DESCRIPTION OF RECORDS KEPT

The records kept by the Columbia University library accounting department may be described as (1) a general ledger which is a record of bills in their most highly summarized form, totals only, passed for payment according to funds and allotments; (2) a purchase ledger which is a record of bills passed for payment according to dealers to whom payments are made; (3) an outstanding order ledger which is a record of outstanding orders according to funds and allotments. All of these ledgers are specially designed loose-leaf books kept in post binders with rulings adapted to our particular need. These books are kept in three different binders for the purpose of convenience, so that more than one person can be working on the different ledgers at one time.

The first record is a general ledger opened on the debit and credit basis, appropriation or amount available by income on the credit side of the ledger, and all expenditures on the debit side. Each fund and allotment of fund has a separate page. From this ledger the status of the funds or any of the allotments may be learned at any time.

The purchase ledger is precisely similar to the first, operated in the same way, except that a page is given to each dealer to whom payments are made, and credits are

made in the same way. The date and total of each bill is entered here and it is the only place where this is done. Entries are made on the general ledger and the purchase directly from the bills and these entries are made every day, so that the bills may be passed on to the university disbursing office for prompt payment and also that the actual amount may be charged to take the place of the estimated amounts, which transaction releases money to the funds. Duplicates of these bills are kept in the accounting department.

The third record is a record of outstanding orders, which is kept thruout the year. When a book is ordered the list price is entered in this ledger opposite to the order number. When the bill for that item is passed, the proper corrections according to discounts and international exchange are made and the item discharged, but in the meantime the total of outstanding orders according to each fund is available to be added to the actual amount expended, as shown by the general ledger. This outstanding ledger is important inasmuch as an order, when placed with the dealer, becomes an obligation just as truly as an expenditure. Hence the account should be mortgaged by setting aside this amount.

In addition to these records a journal is kept which takes care of certain entries that cannot properly find a place in any one of the other records, such as the transference of moneys from one fund to another by order of the librarian.

From the above three records the accountant compiles periodically a balanced statement for the use of the librarian, who thus has before him a chart showing the exact financial status of the library funds. Similar statements for department librarians and heads of departments are made on request for the use of the persons directly interested.

Once a month statements of the salary, emergency, incidental and other funds of the library not book funds are made. This statement shows the amount of the appropriation, the amount outstanding, expenditures, actual balances and estimated surplus or deficit at the end of the year on the basis of the present spending. If at

any time the heads of the departments desire analyses of their funds or allotments such detailed information can be given. For instance, only the other day one of the professors asked for such an analysis of the fund for which he was responsible. He wanted a detailed statement of all expenditures and outstanding amounts covering a period of two years. Such a statement was easy to give him from the records which we keep and he was much pleased to find that nothing had been charged to that fund that did not belong there.

Another function of the accounting department is that it can be of great assistance to the librarian in making up his annual budget. The detailed information which can be given of the past year's expenditures serve as a foundation for the coming year's budget. Some needs of the past year might have been overestimated and some underestimated. With the reports from this department the librarian is often able to see where he can retrench in one place and perhaps launch out in another.

DETAILED DESCRIPTION OF PROCESS

The use of the records above described may be best explained by taking an actual instance of a book ordered and the accounting records that are made. We will assume that a professor in the applied science department recommends to the department librarian that a certain book be purchased, for instance, "Electrical guides," by Hawkins. The department librarian then makes out an order card and in addition a duplicate which is to be retained in the Applied Science Library as a record of books recommended for purchase. On this card and on the original order card the list price is indicated. The fund from which the book is to be purchased is indicated in the upper left hand corner of the order card. This recommendation, signed by the applied science librarian, is sent to the order department where it is checked to indicate that the book has not already been ordered thru some other recommendation. In due course the card reaches the librarian or his deputy and is approved. Before approving the book it is possible by means

of the weekly statement above mentioned for the librarian to ascertain whether the funds are available for the purchase of the book. It should be remembered, however, that the department librarian has the duty of refraining from recommending purchases for which funds do not exist. The card on being returned to the order department with the librarian's approval serves as authority for ordering the book, which is then done. At this point the order department makes a duplicate of the order card, which is placed in its outstanding order file. The original order card is sent to the accounting department where the order is recorded in the outstanding order ledger no. 3 of the records above described. That is to say, the list price of the book is entered as a charge against the fund from which the book is to be paid and it is by this means that the weekly statement to the librarian includes not only actual payments, but outstanding charges. The card then goes back to the order department, where it is placed in the outstanding file, for the temporary duplicate that has been made. This duplicate is then destroyed.

In due course of time the book is received, with or without a bill. If the bill accompanies the book, the book card and bill may be checked together, but if the bill has been delayed and must be claimed the book is passed thru after comparison with the order card only. This card in such a case is kept out of the files until the bill has been claimed and received. This having been done and the bill checked, discounts having been indicated on the order card, both the card and the bill are sent to the accounting department. The bill, of course, contains the O.K. of the head of the order department. With card and bill in hand, the accountant then enters in the outstanding ledger the actual charge for the book, cancelling the list price, and in ledgers 1 and 2 he enters the charge on the appropriate pages for funds and allotments, after which he places his initials on the order card, which card he returns to the order department to be filed in the received order file, while the bill, which must always be in duplicate form, is now

treated as follows: duplicate bill on which the O.K. of the head of the order department has been placed, is filed in the bill file of the accounting department, while the original is initialed by the accountant, the approval stamp placed ready for the signature of the librarian. After he has signed the bill it is sent immediately to the bursar of the university for payment by check.

As soon as this system was installed, involving as it does immediate passage to the bursar of bills as soon as they are approved so that there is no accumulation of bills either in the order department or the accounting department, we began to have complaints from book dealers. At the end of a month or more they would receive from the bursar checks for lump sums including all of their bills that had been passed up to that time. They received from the bursar no itemized statement of payments and so were unable to credit the payment against the proper items. The dealers from whom the greatest number of purchases were ordinarily made were asked to send bills in triplicate.

When these were ready to be sent to the bursar, the original and triplicate of each bill were sent to him with the request that when it was forwarded it be accompanied by the triplicate. This plan has proved to be satisfactory to dealers and to avoid much inconvenience and uncertainty, both to them and to the library.

SUPPLY RECORD KEPT BY THE ACCOUNTING DEPARTMENT

We have here in Columbia a bureau of purchases and supplies and a department of buildings and grounds thru which we place the library orders, but the library accounting department is responsible by direction of the librarian for the requisitioning of all supplies and equipment, their receipt and distribution to different departments, and reporting to the proper source all library repairs. The supply record is a classified card record of the purchases of all supplies by date, article, requisition number, of whom ordered and amount. A subdivision of this record also shows by departments the articles and amount consumed.

We have a room specially adapted in which to keep these supplies which make possible the ordering and carrying of stock one year in advance, which is a saving in price and a very great convenience in having the material with which to work on hand when needed. This supply record card is made up from the requisition or order book which is in duplicate form, original sent to bureau of supplies, duplicate retained. When goods are received, the duplicate is stamped with the date received and we follow up unfilled orders by going thru this book once a week. From the card records we prepare monthly a statement for the bureau of supplies showing requisitions filled but not billed. Such a process is a protection against bills being carried over for payment from another year's appropriation.

The bursar also keeps an outstanding order record on this fund from which supplies are ordered. It is important that the accounting department keep this outstanding record also because many time orders are not released from the bursar's outstanding record after the bill has been paid, which omission holds back money to the fund.

RELATION TO THE BURSAR'S OFFICE

Every university and college has its bursar or treasurer's office, which is the business department of the university; but as every business having branches keeps its own record in addition to the record of the main office, so the library, which is a department of the university, keeps separate books as a check and for immediate information. These books are not duplicates of the bursar's books but serve as analyses of records.

For instance, suppose John Doe sends in a statement that the library owes him a bill of \$25.50 dated Aug. 29, the bursar would not be able to tell from his books whether or not this bill had been paid without a considerable amount of labor, and the only record in the university which would give this information immediately would be the purchase ledger kept in the library accounting department. The bursar does not keep a record of individual dealers from whom the university does its

purchasing. The only way this item could be traced would be by going thru all the library fund entries, drawing all the bills for John Doe, or going thru the whole disbursement ledger of the whole university, and even then it could be skipped.

The process in the library accounting department would be very simple. The accountant would take John Doe's statement in hand, turn to his account in the purchase ledger, look for bill of \$25.50, dated Aug. 29. This record would tell the story, paid or unpaid, and the information could immediately be passed on to the dealer. We receive from the bursar monthly statements showing expenditures against the different funds. These statements are not always up to date inasmuch as the bursar's books are of necessity at least thirty days behind and many times immediate information is desired. Furthermore, the checking up of these statements sometimes show errors of posting to wrong accounts and the omission of cash credits. These errors are reported immediately to the bursar who makes entries accordingly on his books. The prompt corrections save much time and trouble for the auditors and many times release money to the fund which would otherwise be held back to the end of the year when the auditor discovered the error; and inasmuch as all unexpended funds, except book funds, revert to the treasury at the close of the fiscal year, many times money would be lost to the library.

LOCATION OF THE DEPARTMENT

It has been the experience at Columbia that the accounting department should be within easy reach of the librarian's office, in fact, attached to, or a part of it, so that he may at any moment learn the status of any fund or get any information which would naturally come within the scope of this department. It should be separate from the order department, and all other departments, in order that it may serve as a protection and safeguard to them all as well as to the library as a whole.

We do not say that we have a model system here at Columbia, but we do say that the present system works as a double check on all entries and transactions, and

since this system has been installed no bill has ever been paid twice, which was not the case previous to this time.

The librarian at Columbia need not worry about the overdraft of funds. As Warren says in his book on "Business": "He leaves the worry to the system, which is so constructed that it bears the burden of all the details. System is like a machine, it can do things no mortal can. A man by himself cannot pull much of a load, but he can construct an engine that will pull a heavily loaded train across the continent at fifty miles an hour. The strength of even a giant is very small when compared with a locomotive and the biggest business man can do very little unless he has a system, but with it he can work wonders. As the engine needs coal, water, a steady fire and oil bearings, so does a great system need some attention; but the system, not the engineer, bears the burden and pulls the heavy load."

CONFERENCE ON CHILDREN'S READING

The fourteenth annual conference on children's reading will be held in the Ryerson Library at Grand Rapids Saturday, May 4. Everyone interested in boys and girls and in their reading is invited to be present and to take part in this conference.

The general subject for discussion will be "Patriotism—how may children's reading be used to foster it?" Speakers will discuss the following aspects of this subject, after which the whole matter will be thrown open for general discussion.

1. Can and should we foster a spirit of patriotism thru children's reading without inculcating hatred and a spirit of braggadocio?

2. Characteristics of good books which foster patriotism.

3. A brief review of some books for children which foster patriotism.

4. The ethics of patriotism: How can we foster patriotism thru children's reading in a way that is consistent with the idea of love for humanity?

CO-ORDINATION OF TECHNICAL LITERATURE

BY KENNETH C. WALKER, *Librarian, New Jersey Zinc Company, New York City*

"In spite of the greater efficiency of the individual American, the collective work of the Germans was far greater in efficiency than the work of the American." This statement was taken from an editorial in the *Australian Statesman and Mining Standard*.

"The collective work . . . was greater." In that short sentence there is a statement of vast importance.

As one who is in charge of one of industry's new and promising departments, the industrial library, I was very much impressed with the above statement. Further, this statement made above only served to quicken my desire to work toward some organization that would establish the ideals set forth in the following articles abstracted from the *Engineering Record* for Mar. 25, 1915, the *London Engineering* for May 25, 1917, and included in this last periodical an account of a report in the *Bulletin* of the Société de l'Encouragement pour l'Industrie Nationale.

The first article referred to reads in part as follows:

"There are to-day in this country a large group of engineering libraries of great value *collectively*, but not suitably co-ordinated. Of course, the splendid collection of the engineering societies in New York with some allied groups in the same city, form a source comparatively accessible to those in the immediate vicinity. In other cities special libraries exist which probably contain matter of great value practically unknown even to the librarian. United effort is just beginning to take effect, and efforts are being made to furnish bibliographical and other information.

"The trouble is that these efforts are generally individual and have not been fully correlated. Would it not be possible to form an association of engineering libraries, which could work out in co-operation a systematic scheme for rendering more available the facilities of the country? . . . To do the work would necessarily require considerable expenditure, but it would be timely and money well spent."

In the second abstract from an editorial in *Engineering* we have the following statement: "We are all of us made conscious at times that, whilst documentary particulars about subjects we desire to study exist, we are unable to lay hands upon them because we do not know where to look . . . This fact has so forced itself on the attention of thoughtful men, that many efforts of one kind and another to produce complete indexes of all technical literature have from time to time been made. . . . France has for many years taken a *lively* interest in the subject of industrial documentation and it now proposes to raise the question again at the approaching (1916) conference of the Société de l'Encouragement pour l'Industrie Nationale. . . . The object is to consider the creation in France of a central information literary reference office of a kind which would afford the industrialists of the country all particulars that might be useful to them in the 'economic struggle.' The problem is of the very greatest difficulty . . . and if we also are to establish in this country (England), as we shall no doubt desire some day to do, an index similar to the kind in the example set by Belgium and by France . . . it will be of the utmost value to us."

C. E. K. Mees, in his paper, "Production of scientific knowledge," published in *Science* for Nov. 30, 1917, makes another plea for substantially the same ideals conveyed in the above statements.

The question should at once arise in the mind of every progressive American industrialist "What can I do to keep American industry apace with the trend of foreign industrialists as intimated in the above extracts?"

The American industrialist can do just this: Aid in the establishment in this country of a Technical Affairs Information Service so far superior to any other already established that all foreign industrialists will come to this country for aid from this Technical Affairs Information Service as they have in times past for detailed industrial problems.

We have the machinery in this country already in operation in the form of the four hundred or more industrial houses' libraries, technical libraries of public libraries, and college libraries including as well certain society libraries. We all know that after the war there is going to be an intensified business or economic struggle in which every method for economizing operations will be needed urgently. If France can in this hour of supreme struggle still stop to plan a central literary reference office, certain it should be, that America, with her vast opportunities, should consider the problem as a national issue and as a serious issue.

Believing that some sort of action is urgently needed to bring this issue to a head I have made an attempt to outline a sequence of operations, if we may so speak of the following outline, merely as the pin boy in a bowling alley would set up the pins to start a game. If we don't set up our pins (a poor simile perhaps) we will not be able to play the game, and if the industrialists do not play the game the industrialists will be the losers, not the pin boy.

Here, then, are the parts of this proposed organization: (1) The selection of a suitable committee to investigate thoroly the operations and results of operations of the technical libraries of the country, including business houses, industrial houses, college, society and public libraries, with a view toward determining how real co-ordination may be realized in practice as well as in theory. (2) Upon the completion of this committee's report establish a central Technical Affairs Information Service whose sole duty shall be to carry out the results of the report made by this investigating committee. (3) As the largest part of this Technical Affairs Information Service would be to gather all information relating to technical information in print its first task should be an attempt to establish a card catalog covering the subjects of physics, chemistry, both pure and applied, geology, engineering, including mechanical, civil, electrical, gas, aeronautical, automobile, hydraulic and air engineering, mechanical trades, and building. This can

be done for the greater part by subscribing to the printed cards of the Library of Congress, the John Crerar Library, Harvard University Library, University of Chicago, Carnegie Library of Pittsburgh, New York Public Library, and by no means least, the United Engineering Societies Library, covering the subjects outlined above. Added to the subscription of these printed cards, which represent for the most part cards for material in books and pamphlets only, there should be included all the indexes available to periodical and society literature. This proposed card catalog would not only represent a key to a vast amount of literature but would furthermore constitute a directory of the resources of the country. (4) Added to this file of cards there should be a file of cards representing the material indexed in technical reports compiled by the various "open corporations" that would permit the indexing of reports made to them and by them. (5) On the staff of this Technical Affairs Information Service there should be certain men of good technical repute who would act as securers of technical information from individuals and in fact all individuals known to be available for information should be indexed in this card file. (6) Once on its feet this proposed Technical Affairs Information Service should establish international relations with such bodies as the International Institute of Bibliography, the Concilium Bibliographicum, and any other organizations of a similar nature known to exist in Allied countries. (7) The main purpose of the ultimate work of this Technical Affairs Information Service should be to act as a large mail order house for technical literature information to its subscribers and in this way not only aid those organizations already operating libraries or similar departments, but serve as a special library to organizations who cannot see their way clear to establish a fully equipped technical or special library. (8) At the earliest moment branches of this central body should be established in centers where the "trade" is sufficient to warrant branches in order that the subscribers may be supplied with information at the earliest possible moment. (9) This

Technical Affairs Information Service should be advertised widely so that the number of co-operators will be enlarged and the annual assessment thereby lowered.

With taxation for a "starting fund" of one-half of one per cent of the annual income of the enlisting co-operators say to the number of two hundred, a small per cent of the total number of industrial houses in this country, I believe a sufficient sum would not only be realized to put this proposed Service on its feet, but would leave a suitable sum that could be used as a trust fund, the interest of this trust fund going toward the annual maintenance. The annual assessment, if an annual assessment is made instead of a service basis charge, would, of course, decrease as co-operators increased.

That the above suggestions have faults is obvious, but what of that? The main thing is to get somewhere. The finished product would work out as the organization grows. The next thing is to get the committee proposed. With a competent committee, I believe that by starting with the suggestions as outlined above the industrialists of this country would have a tool at their disposal well worth any investment placed against the account of this proposed Technical Affairs Information Service. Then let us, in the words of the street, "Go to it." Every day that is lost by putting off the organization and operation of this Service means the waste of so many hours of valuable executives' and other highly paid men's time, which in this present hour of need, is no small item. Technical information is being made by the second, and placed in available sources never before known. We cannot afford to let this information go unharnessed.

THE CENTRAL LIBRARY FOR STUDENTS IN LONDON

"ONE of the most useful institutions which have been established since this war began is the Central Library for Students, at 20, Tavistock Square, London, W. 1," says a writer in the *Publishers Circular*.

"In December, 1915, the Central Joint Advisory Committee on Tutorial Classes made application to the Carnegie United Kingdom Trustees for assistance in the establishment of a Central Library for Students. The application was received favorably by the trustees, and the following generous grants were made for an experimental period of five years: £600 to assist the establishment of the library; £2000 for additions to the stock of books; £400 per annum, on condition of £320 per annum being raised by voluntary contributions.

"The purpose of the library is not only to ensure that all *bona fide* students coming under its notice shall be helped in their studies as they are unable to obtain the use of the necessary books elsewhere, but also to stimulate and develop higher study on the part of those, for the most part isolated students, who, owing to the lack of book facilities and book guidance, have been content with a lower level of knowledge than they are capable of acquiring.

"That the fulfilment of this purpose by the establishment of a central library has been long desired by many experienced librarians and scholars is a matter of common knowledge. The gap which it fills has indeed been obvious. It is true that the conception of a library to meet the needs of all kinds of students is large, and it is clear that it can only be realized gradually and without undue haste.

"It is also evident that a central source of bibliographical information is much needed; therefore, it is the intention of the Library to meet this need, aided as it is by a panel of expert and representative advisers, which is being extended to cover all departments of study. As lists of books are drawn up they will be supplied to all libraries needing and desiring them. Such lists will, of necessity, be revised from time to time.

"The number of volumes issued during the period Oct. 1, 1916, to Feb. 28, 1917, was 2005 lent as follows: To 93 individual students, 255 volumes; to 59 groups of students, 1270 volumes; to 18 societies, institutions, etc., 480 volumes."

THE BINDING OF PAMPHLETS AND THE REBACKING AND REINFORCING OF BOOKS*

BY D. W. DUFFIELD, *formerly Superintendent of Printing and Binding, Library of Princeton University*

IN taking up the subject of book binding one is apt to think, first of all, of those wonderfully decorated specimens that are shown to us from time to time by those who love the beautiful and the artistic, but as much as we all may aspire to be a Cobden Sanderson, a Roger Payne or a Zaehnsdorf, as librarians we must be contented for the present, at least, with the more practical and somewhat less handsome product.

The question of library binding is one to which every librarian is compelled to give his careful attention. For it is the prompt and proper binding and repairing of books and pamphlets that is going to add quite as much to the usefulness of the library as the prompt ordering, classifying and cataloging. At the present time great difficulty is being experienced in the production of good binding, not to mention the inability of the binder to match the style in shade and color of former volumes bound.

Good leather is almost a thing of the past, even if the librarian can afford to pay double the price he did eighteen months ago. During the past two weeks I have written five leather dealers for samples of olive levant morocco and in each case received the same reply: "The samples enclosed are the best we can do." These samples were very ordinary American morocco with a heavy embossed levant grain and a very, very heavy levant price. But with leather gone out of our reach, we are most fortunate in having at our disposal such an excellent material as Holliston library buckram.

Long before the price began to soar on leather, our library began to standardize in the Holliston product, and at the present time we are putting 75 per cent of our periodicals in this material, matching the shades of the leather bindings as nearly as possible.

Miss Askew has asked me to tell you something about how we do our binding at Princeton, and not so much what we do there. First of all, I want to talk for a short time on the binding and storing of pamphlets. I include storing under the head of binding for this particular style of pamphlet, because the process does not seem finished until it is stored or filed on the shelf.

There are a great number of pamphlets that come in every library that are of minor importance, yet must be kept for a time at least on file in convenient form, such as school reports, municipal reports and government advance sheets, etc. Each day as the pamphlets are received they are turned over to the pamphlet clerk who immediately prepares a manilla folder for each. This preparation consists of type-writing on the extended edge of the folder the name of the author, title, and imprint. The pamphlet is now placed in the folder and every two or three days the accumulation is sent to the bindery. It is understood that this style only includes pamphlets under 100 pages. This being the case, no reinforcing of the manila folder is necessary, and straight flat sewing or wire stitching is used to hold the pamphlet in. This work is done by the bindery for 60c. per 100. The pamphlets are now returned to the pamphlet stack where they are filed in closed pamphlet boxes in their respective collections. A special section of the stack has been set apart for this work.

It might be well to mention that the typewriter used for this title work is fitted with an 18-inch carriage so that the 12 x 15 inch folder used for our music scores can be handled quite as easily as the other two standards, 7 x 9 $\frac{3}{4}$ and 9 $\frac{1}{2}$ x 11 $\frac{3}{4}$, used for our regular file.

TEN CENT PAMPHLET BINDING

All pamphlets of over 100 pages, and those less than 100 pages which are likely to be much used, are bound in what is

*A paper read before the New Jersey Library Commission School at Asbury Park, June 1, 1917.

termed a ten cent binding. The pamphlets are sent to the bindery each Friday, and are done up at once in the following manner:

First of all the covers are removed and placed in the pamphlet for future use, using care to see that they do not go back in the crease so as to become sewed in. Cambric is cut in strips one and one-half inches wide. This can best be done by getting ten or twenty yards at a time and, after carefully folding it, have it cut in one and one-half inch sections by a regular guillotine paper cutter. Cut two pieces of this cambric the length of the pamphlet, then lay a piece of waste paper on the pamphlet one-quarter inch from the back and give the exposed one-quarter inch a smooth coating of paste using a brush or finger. Remove the waste paper or card, which you have used as a guard, then place one of the cambric strips on the pasted surface, allowing it to extend out back of the pamphlet, turn the pamphlet over and repeat the same on the other side. It is well to lay the freshly pasted pamphlet aside and proceed with the next. When the weekly accumulation has been prepared in this way, and the pasted cambric has become quite dry, they are ready to be stitched. This may be done either by punching and sewing, or by machine wire stitching in case of the very thinnest. To punch and sew with three stitches a little less than one-quarter inch from the back, using no. 18 Hayes thread, *waxed*, is the very best method, however. Sewing having been completed cut two folded sheets of plain white paper the exact size of each pamphlet. Any ordinary book paper is quite good enough for this purpose. Lay one of these folded sheets on a piece of waste paper, then lay the second on it allowing one-quarter inch of the folded edge of the lower one to show; lay a piece of paper or thin cardboard one-quarter inch from the back of the top sheet and paste the exposed edges, lift the first sheet and place it over the stitching using care to see that the fold is even with the back of the pamphlet. This can be done easily by creasing the cambric over the back.

See that the end papers are firmly pressed down over the stitching, then fold the cambric back over the end papers and paste it down.

The pamphlet is now ready for boards. Take a no. 50 Binder's board (Gane Brothers, New York City) and if you have not a regular card shears get a pair of heavy scissors or tin snips, measure off the boards and cut them the length of the pamphlet and the width minus three-eighths inch; place them on both sides of the pamphlet allowing three-eighths inch to extend at the back, using care to see that they are square on all sides with the pamphlet, tip slightly to hold in place. Strips of book cloth should be cut two and one-half inches wide and several yards in length. A dark color is desirable as it goes well with most pamphlet covers. Take one of these strips, cut it the exact length of the pamphlet, crease it over the back so that there is an equal amount on both sides; these creases will help to guide in placing the cloth after gluing. Hot glue is really the only thing that should be used at this time to coat the cloth for the back of the pamphlet, but a cold glue-paste known as "Arabol" (Gane Brothers) answers very well. The cloth having been given a smooth coat of glue is carefully placed over the back of the pamphlet and rubbed down with a folder. We are now ready for the sides. Remove the original covers from inside the pamphlet; trim them so as to center the lettering, design, etc., making the three edges flush with the boards but leaving about three-quarters of an inch of the cloth covered back exposed; paste these original covers on the boards. This will finish the pamphlet as far as the outward appearance is concerned, but it is yet to be lined. To do this raise one of the boards and give the end paper an even coat of paste all the way to the back, now close and repeat the same on the other side, close and put in press or under weight. The pamphlet is now entirely finished unless you have a guillotine book cutter, then the edges might be trimmed slightly. A typewritten label may be made, lettered lengthwise and pasted over the back of the pamphlet, the title always reading from the bottom up.

PAMPHLET VOLUMES

Individual pamphlets having been taken care of, I would call your attention to a method of gathering together complete or incomplete collections of pamphlets, periodicals, school serials, etc. From time to time the various files are gone thru and whenever a substantial lot by one author, or under one subject, are found accumulated, they are taken out and systematically punched and sewed together. A typewritten form giving title, author, number, etc., is filled out and pasted or glued over the back. The collection is now cataloged, given a number, and is placed on the shelves as a bound volume. In the cases where numbers missing in such collections come to the library after the collection has been stitched together, the uniform punching and sewing make it possible and convenient to cut apart the original collection and insert the missing number. This has proved most useful in the treatment of our school serials and booksellers' catalogs.

PAMPHLET BOXES

Before going into the subject of binding and repairing of books I think it well to consider the various styles of pamphlet boxes. We only use one kind for our regular file, which is made dust proof and is reinforced bottom and top with cloth, ends being of wood to which the folded front and back are nailed. This is really quite an important feature as it makes the box far more substantial than it would be if only made of cardboard and reinforced on the corners. The cover of this box is hinged to the back and is boxed on three sides with a 1-inch cloth covered apron, which when closed makes the box quite dust proof and holds in place most securely the upper half of the front, which is hinged inside and out with cloth. This hinged front, which drops down when the lid is raised, allows great convenience in the filing of pamphlet material. All parts where not covered with cloth are covered with a black agate marbled paper. We manufacture our own boxes, but very good ones can be secured from the trade. Great care must be exercised in the selecting, however, as there are many good looking

boxes on the market which simply fall apart after a very short period of use.

One of the most convenient styles of box used for sorting and temporary storing, is open on two sides. This box is very simple in its construction, consisting of one continuous piece of cardboard folded around and tacked to a wooden end, the outside front being covered with white paper allowing plenty of room for bold labeling. We use this style to a great extent for our Booksellers Catalog. The convenience of this open box led Dr. Richardson to the idea and the making of the first pamphlet box and book support which is now manufactured and sold by the Library Bureau as the "Princeton Pamphlet Box and Book Support." We are using these boxes in large quantities, and find them useful in a great many ways, such as the labeling of our European War collections, where it is most convenient for us to include in them a collection of pamphlets on a particular subject, country or individual. We also use them as book supports at the end of each shelf where the subject and class number can be boldly displayed, giving a general location at a glance.

REBACKING OLD BOOKS

Passing from the binding of pamphlets to binding of books we are naturally interested in what can be done in the way of restoring and making the unsightly book on the shelves less noticeable. We have from time to time taken a glue pot and brush in hand and gone thru the stack, touching up a loose corner or back, but this would have to be done often if we would have our shelves neat and attractive. So to better this scheme of touching up here and there with glue, we now go thru systematically and collect those books with a back off, one side gone, etc., take them to the bindery and treat them to a ten-cent rebacking.

The method of doing this is as follows: The books are collected in groups in boxes and the titles copied by typewriter on a strip of paper somewhat carefully arranged, using one continuous strip for each box of books. The binder then takes the covers off, if there are any left, also the back

or remnant of the back. He next tips on all loose pages, and fly leaves in case they bear notes, with a single manila end paper on either side. A piece of canton flannel is then glued over the back of the book, extending about three-quarters of an inch on to the end papers. The old boards are now placed back into position and a piece of cloth (generally taken from a box kept for odds and ends) is cut an inch and a half longer than the board and wide enough to extend an inch and a quarter on each side when placed over the back. This cloth is now placed in the book ready for future use. The back of the book is measured and a piece of heavy paper cut the exact width of the back and the exact length of the boards. This is also placed in the book with the cloth. The book is now ready for recasing. As in the case of the ten-cent pamphlet binding, hot glue should be used, but "Arabol" will do nearly as well. Take the strip of cloth and paper out of the book, adjust the boards so that they are square with the book but extending one-eighth of an inch over all three sides. If the book had a tight joint or was laced originally it will be necessary to cut one-eighth inch off of the back of the boards so as to allow a space of one-eighth inch in the joint for the creasing in of the cloth cover. Having the boards carefully placed, glue or paste up the cloth, and lay in the center of it the piece of heavy paper which was cut the width of the back of the book. Now place the cloth and paper carefully over the back of the book, being sure to see that it extends equally over the sides and at each end. Lay the cover off the book with the back down, fold the extended ends of the cloth over on the inside of the cover and rub down with a folder, turn the cover over and see that the cloth is down tight on the other side. Place the book back in the cover and crease the joints in with a folder. The book should be put in press or under weight at this stage. The next step after the book has been left to dry for a short time, is to line it as in the case of the ten-cent pamphlet, but as this volume has been bound before and there is a call number and bookplate in it, it would only add work

to cover them up, so, instead of lining up with the whole end paper it is cut off just long enough to cover the cloth that was turned in at the ends. After the book is lined it is again pressed and is then ready for the typewritten label, which is cut from the strip and pasted on the back of the book.

It is well to mention in connection with this style of rebacking that the saving of all old book covers will be found a considerable help in supplying the missing covers to the books to be rebacked. This form of rebacking is one of the simplest forms of binding and one that might be undertaken in any library, as no more machinery is necessary to do this work than to do the pamphlet work. The process involved is nearly the same as in a one-half cloth cased binding and any one having accomplished results in this form is in a fair way to do regular cased in work.

We hear a great deal of talk about the wonderful results that librarians are having in reinforcing the binding of their new books, and it has been well proven that this added expense is a most profitable investment, as the life of the original binding is often doubled. I think I am quite safe in stating that any assistant who has been trained to do the rebacking just described would find even less difficulty in the reinforcing of new work. The only difference is that in the case of reinforcing, the end papers should be lined with a strip of cambric and sewed to the canton flannel backing. In doing the reinforced work as much of the old backing as possible must be removed so that the canton flannel will be of the most use in strengthening the stitching.

ADVANTAGES OF A LIBRARY BINDERY

It would be hard to enumerate the many advantages of having your own bindery. In the case of our bindery we are not in some instances able to compete in price with some of the outside binderies, as they are advertised, but the satisfaction of knowing just what is going into the binding in the way of material, workmanship, etc., not to mention the great advantage of having the book always in the library and *accessible* most of the time, makes us feel

that the bindery is quite indispensable. Just a few figures to show what it really means to equip and stock a bindery. Our machinery, including type and finishing apparatus, cost us \$750. The stock necessary to carry on properly all styles of library binding at the present time would cost approximately \$250, making a total expenditure of \$1000. We started our bindery 13 years ago, doing about \$500 worth of work the first year. Our report for last year shows 4052 volumes bound, 125 volumes of newspapers sewed in red rope paper, 800 volumes rebaced at 10 cents apiece, 101 collections of pamphlets punched and sewed, 477 pamphlets bound regularly at 10 cents, 10,973 pamphlets sewed in manila folders, and 29,505 volume numbers gilded.

It is unnecessary to describe in detail the kinds of binding that we do. As a matter of fact we only have two distinct styles, namely, cased and laced bindings. In the former we do everything from a pamphlet at 25 cents in one-half cloth with paper sides to our regular periodical in full Holliston buckram at 65 cents, the same sewing and the same reinforced cambric joints being used for each. In the laced bindings we put all books bound in morocco, light or heavy, at least 80 per cent of our periodicals, and all regularly bound newspapers. All sewing is done "all along" wherever the size of the signature will permit, overhand sewing being used only where the periodical has been reduced to single pages by the taking out of the advertising matter.

BINDING NEWSPAPERS

The question of newspaper binding is quite a serious one, not only because it involves the expenditure of a great deal of money, but also because of the difficulty in securing the proper material to support such a volume. Both these points have been greatly relieved, however, by the use of Holliston buckram. One of the best methods for temporary newspaper binding is to have the volume sewed regularly with reinforced end papers, cloth joints and the cords cut off at regular lacing lengths. The end papers and first sections are tipped as in the case of regular binding. A sheet

of heavy red rope paper is then cut equal in width to the length of the volume and two and one-half times the volume's width. Glue up the back of the sewed volume and fold the red rope paper around it so that there will be a finishing flap of one and one-half inches on the front. Crease the paper over the back and rub until tight with a folder. Insert a piece of binding tape thru both top and bottom of the cover about three inches from the front; paste this down inside of the cover and glue a small piece of the same paper over it, cutting these tapes off about 15 inches in length so that they may be tied around the front of the volume to keep the red paper in place. A label pasted on the front, containing the name and date of the paper, makes it very convenient to locate these volumes on the shelves. The great advantage of this method is that the temporary binding may be discarded at any time, and the volume bound in regular style. This style of binding costs the library 50 cents, plus the cost of the paper.

FORMULA FOR PASTE

Our formula for wheat flour paste is as follows:

Take two pounds of good wheat flour (poor flour will not make good paste); sift and mix this into a creamy batter by adding gradually one quart of luke warm water in which has been dissolved one ounce of alum. This batter must be whipped until every lump has disappeared and it has the consistency of thick cream. Six quarts of water should be placed on the fire and allowed to boil for at least ten minutes, then pour steadily on the batter, stirring vigorously, until the paste has been properly cooked. This can be determined by the color, which will have changed from a white to a light gray. This should make about nine pints of thick paste. While hot pour into air tight cans or crocks. This paste will keep under ordinary conditions two or three weeks. Ten drops of wintergreen or carbolic acid will have a tendency to prolong this time, and in the case of the latter, it may prevent to some extent the attacks of insects.

THE LIBRARY THAT JOAB STARTED

BY ALICE SPENCER GEDDES LLOYD

[EDITOR'S NOTE.—We are indebted to Mr. Frederic H. Sidney, of Wakefield, Mass., for calling our attention to this very interesting work which Mrs. Lloyd, altho an invalid, has been able to organize in the mountains of Kentucky.

Three years ago, Mr. and Mrs. Lloyd went from Boston into the Kentucky mountains in hopes that Mrs. Lloyd's delicate health would improve, and finding the climate agreeable they decided to locate at Ivis, Knott county, in the Caney Creek section, one of the most isolated districts in mountains.

As soon as Mrs. Lloyd had become settled at Ivis she began to organize a community-service club, and when the club was well under way, with the help of the mountain folk Mrs. Lloyd constructed a building to be used as a civic center, free school and public library. Just how this came about Mrs. Lloyd tells in her story. Friends in the North have supplied Mrs. Lloyd with books for the school and library, but there is still great need of books and periodicals of all sorts, for this little library supplies 11,000 book-hungry souls eager for information.

Both day and evening free schools are conducted at the library. They are the only schools of their kind in the county, and the ages of the pupils enrolled in the night school range from 17 years to 83—sufficient evidence that the mountain folk are eager and willing to learn.

With all the reading matter there is in the world it seems a pity that these men and women should want for books and magazines. They are a splendid race of people, the only pure bred Americans in our country today. They are the people of Lincoln and Daniel Boone; if we can help them by furnishing them the means to increase their store of knowledge we are doing a valuable work both for the state of Kentucky and for the nation as a whole.

The post-office address of this community center is Caney Creek Community Center, Pippapas, *via* Wayland, Floyd county, Kentucky. The workers will be glad to send literature and answer questions. Address either Mrs. Arthur W. Lloyd, one of the founders; or Miss Leila Budd, executive at Radcliffe Cottage.]

JOAB cannot read—yet. Joab is a mountaineer of Kentucky. He is not, however, a Lincolnian mountaineer, altho the same strains mingle in his blood.

Joab is stubby and bent. His peaked face and ferret, tho kindly eyes, flanked by high cheek-bones, seek to peer out the more intently because of the hump in his back: a hump that has achieved for him—and surely the noun is not inappropriate, since he has a library to his credit—the pseudonym of "Humpty-Joab."

"Humpty-Joab" was not born with his hump. He has gradually acquired it. From the age of six years onward (altho not vastly upward, as far as stature is concerned) he has needed a shelf on his back, not for the limited library, that he might become Lincolnian, but for the loads of corn and fodder which, from dawn to dark, year after year of harvestings, barefooted over the stubble, he has "packed" from the sheer mountains of his inherited acres to

his cabin of logs that sits in the "Holler" thru which the Creek of Caney flows, zig-zag.

No! I cannot truthfully admit either that Joab can read the books in the library he started; or that he is Lincolnian.

Lincoln was but temporarily, thru the mere accident of birth, a Kentucky mountaineer. Joab is permanently, thru the unmitigated frustration of opportunity, a man of "The Lost Tribes of America."

Neither is Joab's mother of the type of woman of the mother of Lincoln. Zuraphy, Joab's mother, is witchy—a cauldron-brewer of "yarbs" of mystic magic. She is also, but quite incidentally, one of the best shots in the county. Perhaps were her qualifications for motherhood less uncanny and less belligerent, Joab might be a trifle more Lincolnian.

But it is folly to haggle with destiny. Joab is as he is (and none of us, community workers, has the least desire to alter him by a jot): entirely gentle and always amenable, albeit complacently and contentedly paternal; perpetually but patiently weary with his incessant plodding with the coal and wood, up the mountains and down, for the stoves in the various buildings of the Caney Creek Community Center; vaguely rather than specifically hopeful that his future in one of the Model Homes of our Community Center will yield, from his blighted formative years, even for him—a limited fruition; determinedly insistent that his children shall now have the "eddcation" that his uncanny and belligerent inheritance and an opportunity-less environment have thwarted for him.

It is to Joab ("Humpty-Joab") that the Caney Creek Community Center and Free Library and Model Homes owes its inception.

"Ef you-all what they call 'community workers' will cum tew the Creek of Caney, I air aiming tew deed off tew you-all a right smart strip uv my farm. Hit haint much as fer as the land air concerned. Hits erbout petered out. Hits certainly

SNAPSHOTS FROM CANEY CREEK—NAPOLPON, WHO LOVES "POETRY VERSES," BEST; A REMOTE "HOLLER" WHERE THE "YARNING FOR LARNING" IS GREAT; ZURAPHY, THE MOTHER OF JOAB; A MEETING AT THE LIBRARY ON THE ERADICATION OF ILLITERACY; JOAB AND HIS HAPPY FAMILY

washed out. But hit air totally ad-e-quate fer the building thet I air aiming fer you-all 'community workers' tew build on a strip uv my farm."

"But what sort of a building *do* you aim fer we-all to build on this strip of your farm, Joab?" questioned the future founders of the Caney Creek Community Center and Free Library and Model Homes: an unique mountain plantation for community uplift that has now absorbed all the farm of Joab and nearly as large an acreage across the Creek of Caney; upon which land have been built not only the building that Joab wanted (The Caney Creek Community Center and Free Library) but Radcliffe Cottage for an administration cottage; the Smithampton Industries Building; the Hamilton Lodge dispensary, the Cushman-Burton hospital, and a series of light and sunny Model Homes; with a Wellesley Recreation Hall partly subscribed for.

"I haint in no way partieler about the shapings uv my building," condescended Joab. "But I do aim fer you-all 'community workers' tew riz up on my strip uv land, a building that'll give my Onnie and Zildy and Rufus and Marthy and Phronie—a chance; and me and my woman a chance thet we-all kin live not liken but un-liken the hog." And then he added propitiatingly, fearing lest he had appeared autocratic, "You-all know jest ez well ez I know thatt we haint none on us hed never no chance at all."

We knew it!

And just because we knew it, to the torture of our souls, we accepted from Joab (with its attendant obligations "tew riz" a building replete with opportunity) a strip from his inherited, impoverished acres. And at the end of the deed, Joab made a cross:

his
Joab + James
mark

Upon the strip of land, we workers built The Caney Creek Community Center and Free Library.

A year or so later, Joab James ("Humpy Joab") signed his name proudly, with a wild curve of the alliterative J's, to an-

other deed. This deed sold for \$1000 cash, his entire farm that had come down unto the generations; and from which, for lack of "community workers" to advise, his ancestors had sold for pottage the lumber and mineral rights.

Phrasing the lack of a realization of the value of ready cash which is a characteristic of the primitive mind of a man who lives chiefly thru barter, Joab explained:

"I haint a mite uv use fer the \$1000. Hit haint filled with no meaning tew me. I brought you-all tew the Creek of Caney and when you-all hed the need uv more room, hit certainly would hev been unthoughted in me tew refuse. But now I aim fer you-all tew git fer me more land somewheres where hit'll not disfurnish you none. I don't re-quire thet \$1000. I want the \$1000 to be land fer my children tew marry and settle on. You-all keep the money; and fer hit, git me land."

We kept the \$1000 (that a generous helper had sent us) until not so very far away (for how could we *ever* lose sight of the progeny of Joab) we bought a splendid farm and deeded it to "Joab James, his heirs and assigns forever."

"I allowed all erlong thet hit would work out erbout thet air manner," concluded Joab of the complacent faith. "The Lord wouldn't hev led me tew give you-all my farm fer nuthing. And thet \$1000 certainly were nuthing. He knowed you-all would git me more land fer hit. He knowed I wouldn't suffer none by the transaction; seeing ez I hev saved the Creek uv Caney tew the U-nited States of Amerikey."

And it was thus that the Creek of Caney came into its own.

(Parenthetically it may be added that Joab is, in minor matters, supreme dictator of the Community Center, because—"You-all know ez I got you-all tew come tew Caney 'in the beginning'"—actually as much of a beginning of a new life to Joab, as Genesis—"and I jest nat'rally *do* hanker to see them Ben Davis's planted right erbout *here*." And as it really does not make a scrap of difference exactly

where the fruit-trees are planted; or exactly where the strawberry beds are placed on the sunny slope above the "bottom"; and just because Joab did get us to come to the Creek of Caney; and just because we love it as if we had been "riz on hit"; and just because we have dedicated our lives to the race of Joab and trust never to leave them—just because of all this that Joab has come to mean to us volunteer "community workers," we are willing to pay tribute from our souls (as Kipling has to Gunga Din) to "Humpty-Joab."

But what has this to do with "The library that Joab started?"

A great deal!

The library is in the building that is bringing a chance to Onnie and Zildy and Rufus and Marthy and Phronie and Joab and the woman of Joab—and the 1400 other mountaineers that the Caney Creek Community Center and Free Library has now come to reach with its community service.

"The library that Joab started" isn't so very much of a library as libraries go. It has but a few over 6000 volumes solicited and contributed by friends of the workers from all over the United States: 6000 volumes, classified and cataloged and shelved according to Dewey. But, small tho it is, the library is like a lamp in the darkness—a library whose import is reaching stunted persons: cramped souls that for 200 years have been groping like the blind, hopelessly and astray.

The books are not read very much—yet!

They are waiting for the leaven to work!

They know, as the community workers know, that but two out of ten adults on the Creek of Caney could read and write when Humpty-Joab made his mark on the deed to the strip of land upon which the library stands. Knowing this, the books are not merely parallels to the shelf-list catalog. With equal impartiality as to historical verisimilitude they display their colored plates to Noah, to Napoleon, to George Washington. By their very presence (on a creek where there is not even mail service) they entice to the arduous road that must be traveled to the Town of Opportunity: the road from Illiteracy to Literacy—as untamed and rocky a trail as the

creek-bed and mountain roads of the Creek of Caney.

Of a night, with the gasoline lanterns hanging from the ceiling in "The library that Joab started," the books more patiently look down from their cases along the sides of the wall at the young-old women and the early-broken men who grope their way from the darkness into the "moonlight school"—there dully to struggle to decipher the primer; there crampingly to form the letters into their own names. Terribly hard it is, with the brain creaking at its unwonted strain. In spite of the effort, in spite of the discouragements—steadfastly the books in "The library that Joab started" exert their compelling influence on Joab and the race of Joab: signifying a quest like that of the Grail, success in which gives life more abundant.

Saddest perhaps of all it is, when the great grandchildren of Alamanda (Alamanda, the blind) feel for the primer in the hands of the community worker, peer into it, holding it an inch from their filmy eyes, and then hand it back, tremblingly: "I reckon I hez tew remain ez ignorant ez I alwuz hev bin. There haint no use fer me tew try tew learn tew read them books. I jest kaint see. . . ."

And after that, comes the planning by the community workers for the next group of eye-afflicted from among the race of Joab to be taken in a jolt-wagon, in charge of the district nurse of the Caney Creek Community Center, to the railroad in the next county; and from there to a hospital in the great city, to receive remedial lenses or perhaps be saved from total blindness.

At times, also, the books themselves from "The library that Joab started" are packed into traveling library cases and wedged into a jolt-wagon; and carried thru the trails to some remote "Holler" where the "yarning fer larning" is one of the saddest tragedies of frustration of which the Caney Community workers know.

Slightly extraneous may appear an account of how the Caney Creek Community Center has come possessed of a jolt-wagon of its own in which to cart the books from "The library that Joab started"—yet it seems excusable to admit that it is not Joab alone who has faith that the Lord will

not permit His servants to labor in His vineyard, among the race of Joab, for nothing.

One of the volunteer workers at the Caney Center, a Bostonian to the core, had conscientiously placed \$300 in a Boston bank (she having no other resources) to die with. She had reckoned that to be placed decorously in a Boston tomb would cost \$300. But, as does nearly every worker who once feels the throb of the heart-beats of a race like unto that of Joab, she has decided she will not even return to Boston to die. The Creek of Caney, where the mists float down the valleys late of a misty morning, is to be her earthly abode until the coming of "the angel with the darker drink." Similarly with Joab and his \$1000, the worker discovered that \$300 was an utter superfluity. It costs nothing at all (not a cent) to die and be decorously laid under the earth in the virgin forest, that circles in many places the Creek of Caney.

Hence, she has drawn her \$300 from the Boston bank. With it she has purchased a cross-eyed mule ("A mule never *did* pull with its eyes, anyway," she extenuated) and another mule and a jolt-wagon.

What for?

To take from "The library that Joab started" books out thru the "Hollers" that slumber in the ever-narrowing valleys: valleys that are invariably turning to wind slenderly thru a Gap; then flattening in wrinkles into another valley—each slumbering sepia smudge forming a "Holler" reiterating, to this walled-in heart of the United States, the purposeless monotony of mere survival.

"Joab had the higher vision," admitted this community worker of the Creek of Caney, who is the possessor of a perfectly decorous cross-eyed mule in place of a perfectly decorous Boston tomb. "The Lord God of Hosts never in the world intended that I should sell my soul for a marble slab. The compensations of a cross-eyed mule are vastly more exhilarating, even exuberant, than a sarcophagus of marble.

"But really, we must do something for Euphemia. She is certainly going blind.

She could not spell half as many words out of the speller as when I visited her last week. Now, with our own wagon, *and* my cross-eyed mule, maybe we can get up another group of eye-afflicts the first of the month—"

And it is ever thus!

"The library that Joab started" yields constantly many and varied, amusing and sad, hopeful and hopeless, by-products. The last by-product is a post-office that literally will put the Creek of Caney into the United States. And the post-office is equipped and ready and waiting for the red tape of the government to tie it to a creek-bed mule-back carrier route; and it has been placed, in honor of Joab, in the Caney Creek Community Center and Free Library that stands on the strip of land that Joab gave that opportunity might come to the race of Joab; and the name of the post-office, out of "The library that Joab started," is Pippapass.

"I haint exactly understanding the whole uv hit, ez you-all hev bin so kind ez tew explain," puzzled Joab, pausing in his "packing" of coal and wood to "warm" by the fire in Radcliffe Cottage. 'But ez I understand hit, my post-office is named after a little girl away off in foreign parts that haint maybe hed no more eddication than me! but that went erbout when she didn't hev no coal nor wood to pack (like uv a Sunday here with me) a-singing and a-doing good unknowing to herself. I kaint sing a note; but I hev studded that I am sumwhat like that thar Pippa. I jest went right erlong and done the best I knew; and I give you-all first a strip where my library and my post-office now air; and then I giv you-all all the land I hed; and I been studying that I haint neither ever a-going tew know the whole of what I *did* do when I saved this yere Creek uv Caney tew the U-nited States uv Ameri-key."

The community workers at the Caney Creek Community Center and Freem Library and Model Homes are also unable to weigh the entire ultimate value of the service they are rendering to the nation; but they are certainly justified in admitting that all they ever do will owe its inception to "The library that Joab started."

BOOK SERVICE FOR OUR SAILORS AND MARINES*

BY MARY C. HENTHORNE

DURING the four months from Nov. 1, 1917, to Mar. 1, 1918, the American Library Association has made a splendid record in supplying books to the sailors and marines in our Naval Training Stations and on our vessels. The Navy Department Commission on Training Camp Activities, appointed by Secretary Daniels to organize and develop welfare activities for the men of the navy, asked the Library Association to undertake this most important task of supplying books for the navy as it had previously undertaken the task for the army at the request of the War Department Commission. Mrs. Finley J. Shepard, as chairman of the library committee of the Navy Department Commission, has a representative at the office of the commission in Washington who co-operates closely with the War Service of the A. L. A., and another representative in New York at the International Headquarters of the Young Men's Christian Association.

Before the library association and the commission began organized work, local agencies, such as the Red Cross and the public libraries, aided by private enterprise, had supplied many books to help meet immediate needs. Statistics for much of this work will probably never reach the Library War Service headquarters in the Library of Congress. Consequently reports will not contain the complete figures. Yet available records show that in four months' time over one hundred and twenty naval stations, including hospitals, have been cared for and more than one hundred vessels.

Navy library work divides naturally into two branches—work with the naval stations on land, and work with the boats. Questionnaires were sent by the commission to the commandants of stations, asking for a statement of library service already being rendered, and of needs to be met. This station questionnaire also asked about the educational qualifications of the men. The replies show that a surprisingly large per-

centage of the men have had high school work and many college training. This is true of the men on shipboard also. Through the head of the Chaplain Corps, Chaplain John B. B. Frazier, questionnaires were sent to a large number of vessels. Meanwhile the library association sent circulars to librarians near naval stations, asking them to report needs from their standpoint. This systematic work soon resulted in the sending of many gift and purchased books to naval stations and ships.

Naval stations are of many kinds and sizes, from the large training camps containing twenty thousand men to the tiny coast patrol station with perhaps twenty men. No station is too small to have its needs supplied. One base with several hundred men is situated on an island isolated from the main land much of the winter season. The appeal came from the Y. M. C. A. secretary to supply books there, keeping in mind the fact that the majority of the men were college men. It was not necessary for the secretary to assure the A. L. A. that the books would be thoroly used in order to have them sent. Stations which have no Y. M. C. A. secretary are visited by one from a larger camp who supplies books from his stock and changes them when necessary. An excellent system of traveling libraries has been established at one of the submarine bases.

In training stations containing less than a thousand men to those with over thirty thousand, books will be found in charge of the chaplain, usually in the recreation building, and of the secretaries in the Y. M. C. A. and K. of C. huts, and in the barracks.

In the navy the chaplain is the formal head of the library work in the stations and on boats, co-operating with the Y. M. C. A. and K. of C. in the proper supply and distribution of reading matter.

Recreational reading is supplied mainly from the gift books so generously given by the American people in response to the library association's call. Technical and reference works and general informational books, so-called "non-fiction," are purchased

* Miss Henthorne is Mrs. Finley J. Shepard's secretary in Washington with the Navy Department Commission on Training Camp Activities.

from the fund raised by the A. L. A. last year.

Separate library buildings similar to those in the army camps have not been found necessary except in a few cases as ample space has been made available in existing structures.

An anonymous gift of \$10,000 made the erection of a suitable library possible at the Naval Training Station at Great Lakes, Ill. This building is identical in plan with those in the army camps. It is ninety-three feet long by forty feet wide and contains one large room, capable of accommodating two hundred readers and fifteen thousand books, and two small bedrooms. The supervision of the building and the organizing of the work were in charge of John F. Phelan of the Chicago Public Library. There is at present a resident librarian, who has two regular assistants, with some special help in addition. An automobile service provides for the distribution of books to the various centers thruout the station.

Some smaller separate library buildings have been provided in other ways to meet particular conditions, but most of the work, as stated before, is carried on from centers provided in Navy Department and other recreational buildings.

At Harvard College, the Navy Department maintains Radio, Aeronautic, and Ensign schools. The college library is open to the students. Its large collection is supplemented by purchases of the A. L. A. Several thousand gift books are housed in the Chaplain's building. Other universities are doing similar work for the Navy.

At Bensonhurst on Long Island, library work is carried on at the Y. M. C. A. hut. The following report shows that the work is done under difficulties, but it is, nevertheless, appreciated. "The hut was full to overflowing with sailors reading, writing, sleeping, playing checkers, and some were dancing to the strains of the camp band, which was playing loudly in the midst of things. The room was blue with smoke, but after the first minute we got used to that, and were able to draw a long breath, and see what was going on. There was a platform for moving pictures and other en-

tertainments, a piano, and an old reed organ. At one side of the platform was a corner twelve feet square, where the secretary has his little library, and is trying desperately hard to make it look attractive. There were shelves across one end sufficient to hold 200 books, gift of the Brooklyn Red Cross. The secretary expects to have more shelves made to separate the 'library' a little more from the rest of the big room. He wants 600 books, classics and new war books, and novels of the modern type, also magazines." This modest request was taken care of immediately.

In several places local libraries have received permission from the commandant to open branch stations. This is true at the training station at Balboa Park, San Diego, and the camp at the university in Seattle.

A very interesting field of work is that in the naval prisons. During war time minor infringements of rules receive, necessarily, rather severe punishment. The men being disciplined in this way are given every opportunity to make good and to be returned to the service. Lieutenant Commander Thomas Mott Osborne is doing wonderful work with his "Welfare League" at one prison. Here the men control subject to Lieutenant Commander Osborne. Special books have been supplied them for both study and pleasure reading.

Library work in both army and navy hospitals is being organized by Caroline Webster. As the wounded men are returned from France the task of providing for them will continue to grow larger and more important. Nearly all of the naval hospitals have some books of their own. Circulars have been sent out asking the bed capacity, size of staff, present reading matter supply, and estimated needs. Various organizations and libraries have made scrapbooks, which are distributed as required. One of the orderlies from Walter Reed Hospital was asked whether the men really liked these scrapbooks. He replied, "Indeed they do. Sometimes when the ward is quiet there is suddenly a loud chuckle or a shout of laughter and one of the boys says, 'Look at that now! Ain't it the funniest ever?' as he points to some picture or story in the scrapbook he is using."

Reading matter, for use in contagious wards, which may be destroyed when it has served its purpose, is sent when requested. The library association is preparing to send a woman librarian to any hospital in which the medical officer in command wishes such service. "Her work is to make the connection between the man and the book; it is for her to reach the man with the book that is needed; and in doing this, she must visit the wards, carrying books, reading aloud, telling stories (if her talents be in this direction)." When occupational courses are installed for convalescents the librarian must see that books relating to these courses are included among the other books. A request has already been received to place a library in a convalescent home for sailors to be opened soon in Norfolk.

Subscriptions for general magazines cannot be placed by the A. L. A. at present. This need is being met now thru the A. L. A. by the Department of Navy Recreation of the Woman's Naval Service, Inc., which is sending a selected list of periodicals to such hospitals as are designated by the War Service. Pensacola, Charleston, Portsmouth, N. H., New Orleans, the Virgin Islands and the U. S. S. Barney are already being served thru the generosity of this committee, of which Mrs. Edward T. Stotesbury is chairman. A number of periodicals, furnished free by publishers, are also sent to hospitals. Requests for books and magazines have been received from several hospital ships. There will be an increasing demand for this service.

Dispatch offices at Atlantic ports are handling books for both army and navy. One is in charge of Asa Don Dickinson, and another is being organized by W. H. Brett. Most of the gift and purchased books for naval bases abroad are sent thru these offices, as well as books for the fleet. Putting books on transports for the soldiers belongs to the army library work but supplying libraries for their crews is a part of the navy work.

In summing up the program of navy library work being developed on land it is found that stations of all kinds are being served—naval and marines training stations, city recruiting offices, aeronautic sta-

tions, submarine bases, coast patrol stations, naval hospitals and prisons, coaling stations and fuel plants, recreational centers, naval clubs, radio stations, quarantine camps, receiving ships, naval ammunition depots, naval proving grounds and rifle ranges. From Portland, Maine, to Alaska, from Minnesota to Key West and San Diego, in Panama, Cuba, Porto Rico, Haiti, the Virgin Islands—wherever our sailor lads and our marines are found, there are library books also. Library work is organized abroad, so that books are now available at the different naval bases for the fleet and for the naval aeronautic service.

The Navy Department has, for many years, systematically supplied certain classes of boats with libraries for both officers and crew, and has set aside a fund for magazines. This has heretofore been adequate, but the sudden expansion of the navy has caused a demand for an increased number of books. The American Library Association has been more than glad to help the Department handle this situation. Battleships, armored cruisers, submarine chasers, submarines, fuel ships, scout patrol boats, and even tugs, have sent appeals to Library Headquarters. These requests are usually "rush orders," for our boats cannot wait, but move quickly and quietly in and out of the harbors. One vessel reports, "We are at an isolated radio station in Alaska the greater part of the year; want library for crew; also good technical library for reference use of officers, to include works on civil engineering, light railway construction, radio, electrical and hydraulic engineering, aeronautics, athletics, (fencing, boxing and wrestling)." A ship with 900 men and a goodly library modestly asks for one atlas and an unabridged dictionary. Another wants song books. One boat received from the custom officers four hundred volumes formerly part of the library of a German vessel. On board another ship the library, containing several hundred volumes, is reported to be open one hour daily, with an average circulation each day of eighty books. Five thousand magazines were issued on a recent round trip voyage. One chaplain, having collected money for books for his men, asked the A. L. A. to select and prepare them for use.

The quality of reading done by the men of the navy ranks as high as that in any community of civil life, possibly higher because of the particular needs created at present by the war, which is necessitating so much intensive study along special lines. The library books are a great aid to the men who are in the educational classes conducted by the naval authorities and the Y. M. C. A. Commercial arithmetics and geographies, books on business English, English literature, French, Latin, Spanish, algebra, trigonometry and chemistry are among those asked for by the men who are studying for higher rating and for Ensign's commission. The demand often comes in this form, "Please send us books suitable for high school work in the following subjects," leaving the selection to the A. L. A.

General books of travel and guide books, especially on France and Russia, are popular, as well as general and individual biography and history. Social hygiene, first aid, sanitation and kindred subjects are frequently called for. Requests are sometimes made for books like Draper's "History of the intellectual development of Europe," his "Conflict between science and religion," Bowne's "Essence of Christianity," and "Psychology and the navy." There is a long leap from these to the cook book that one sailor lad carried happily away from one of the dispatch offices.

War narratives are in constant demand, necessitating the purchase of many duplicate copies of books like "Over the top," "The first hundred thousand," Gerard's "My four years in Germany," and Service's "Tales of an ambulance driver." Poetry of all kinds is keenly appreciated, not alone war poetry and volumes by individual poets, but good anthologies containing the old-time favorites.

Then novels, the lighter essays and dramas—there is much of this kind of material needed for recreational reading. After a hard day's training it is a relief to a tired man to sit down in some corner and bury himself in an absorbing story. There is a wide range of taste to be satisfied here. Naturally, the men demand O. Henry, Kipling and Mark Twain among the first. Jack London, Rex Beach, Mc-

Cutcheon and Tarkington are soon worn to pieces. Adventure and detective stories are much called for by the younger men. The navy has many boys of seventeen and eighteen in its service called by the spirit of adventure. Provision has always been made for their reading, but especial attention is paid to them now.

The marines are very appreciative of gifts of books. Recently over three thousand gift and purchased books were sent to different stations in Haiti, San Domingo and Cuba. Even the Marine Band has not been forgotten. Letters have been received at headquarters expressing the appreciation of both officers and men.

Much has been accomplished toward meeting the need for reading material in the navy, but the Navy Department Commission and the American Library Association both feel that there remains much more to be done. Information concerning book needs is welcomed by both organizations. Requests will be taken up and acted upon promptly, sometimes direct from the A. L. A. and sometimes thru local libraries. The association is in constant communication with many librarians whom they have authorized to handle library problems in stations in their vicinity. The best brain power in the library world is at work handling this vast problem for both army and navy and any aid rendered the War Service from any source is a step forward in accomplishment.

The following statement is a summary of the recorded achievement for the navy of the American Library Association during the first four months of its work, or up to Mar. 1, 1918:

	121 Naval Stations and Hospitals	100 Vessels	Total
A. L. A. purchased books	18,979	673	19,652
A. L. A. gift books..	96,867	12,146	109,013
Gifts from other sources	19,916	4,055	23,971
Supplied by Navy Department		31,067	31,067
	135,762	47,941	183,703

Many thousands of gift and purchased books have, of course, been sent since Mar. 1, and more are being sent all the time.

MINNESOTA HISTORICAL SOCIETY MOVES INTO NEW BUILDING

ON Jan. 16, 1918, the reading room in the new building of the Minnesota Historical Society was opened to the public. The work of moving the society's collection of books, manuscripts, and museum objects had been going on since Dec. 1. Many of these had been stored away for years in dark and dusty vault rooms and closets in the basement of the Old Capitol building where the society formerly had its headquarters, and in equally grimy and inconvenient store rooms in the sub-basement of the present Capitol building where the society has had its rooms since the building was completed in 1905. For several years the quarters assigned to the society had been growing more and more inadequate, with the result that an increasingly greater number of its actual working-collection of books and newspapers had to be consigned to the afore-mentioned temporary oblivion. In the same process the members of the rapidly increasing staff had been driven to find temporary office-room in almost inaccessible alcoves and cubby-holes among the promiscuously scattered stacks and wooden bookcases. It was, therefore, with a feeling of intense relief that we celebrated the completion of the strenuous work of moving our 125,000 books, pamphlets, and newspapers from various widely scattered resting places to the ample space provided for them in the new building.

MOVING THE COLLECTIONS

Possibly a short account of our methods in moving our book collection will be of interest to librarians facing similar problems. We had constructed for our use wooden boxes of $\frac{3}{4}$ -inch pine with $\frac{1}{2}$ -inch ends and bottoms, 35 inches long, 23 inches wide, and 12 inches deep, over-all measurements. These dimensions were determined by the size of the stack elevator in the new building, which had to carry up all of the books, but experience proved that they answered satisfactorily the requirement of holding the maximum load that could be handled with the least amount of

wastage of labor and packing space. Half-inch cleats for handles were nailed across the ends of the boxes with a $\frac{3}{4}$ -inch clearance for grip. These boxes were constructed by a local box factory for seventy cents apiece. At first we tried boxes with $\frac{1}{2}$ -inch sides but a few days of wear and tear convinced us that the $\frac{3}{4}$ -inch sides, tho costing eight cents apiece more and making the boxes heavier to handle, were in the end more satisfactory. One hundred and twenty of these were sufficient to keep a two-horse team going back and forth over a three hundred yard haul with few delays. Two gangs at both the loading and receiving ends were needed to keep the work going at maximum capacity. Occasionally, in spite of every effort, there would be some unavoidable congestion at one end or the other; and, in fact, the only solution of this problem is a certain amount of mobile labor which can be transferred on short notice from one end to the other, tho even this expedient is not a perfect solution.

The scheme of location in the new building had been carefully worked out in advance, shelf for shelf, as nearly as was possible. In the case of our many stored books much estimating was necessary, which resulted in some last minute shifting. Manila P slips marked with the number of the floor, stack, tier, and shelf were placed in the books which were to stand at the beginning and end of each shelf. The numbered sides of the slips were faced toward each other, so that whenever a shelf was broken in being packed, as happened in nearly every box, we could tell by the direction in which the slips were faced whether we were dealing with the last end of a shelf or the first end.

The empty boxes were brought into the stacks in the old building loaded three high on small hand-trucks. A library assistant directed the removal of the books from the shelves to the boxes, having them placed backs up, one layer deep, and packed solidly to prevent upsetting by careless teamsters. Two rows of ordinary books, practically the equivalent of two three-foot shelves, could be packed in each

box, running lengthwise of the box. The folios, of course, had to be packed specially. The boxes were then reloaded on the trucks, each box being kept from slipping off from the one below it by properly spaced cleats on the bottom. They were then trucked outside of the building and piled up for the teamsters. At the new building they were taken up to their respective floors on four-wheeled, rubber-tired, furniture trucks, and the question of shelving was easily disposed of, if no mistakes had been made in slipping the books. It was found that two men working with the elevator could feed the boxes at about the right rate of speed to two shelving gangs working on different floors of the stacks.

The average number of people engaged in the moving operation, in so far as the library was concerned, was six members of the library staff and twelve day laborers, including the two teamsters. With this force the main part of our collection of approximately 125,000 books and pamphlets was moved in about two weeks.

CONSTRUCTION OF BUILDING

The construction of the new building was first authorized by the legislature of 1913, and \$500,000 was appropriated for the purpose. The building was originally intended to house the state supreme court also, but after the architect's estimates had been submitted, it was found that the appropriation was inadequate to erect a building that would answer the needs of both institutions. Accordingly an amendment was enacted by the 1915 legislature, eliminating the supreme court and providing for the use of any part of the building that the society could possibly dispense with, by other state departments at the discretion of the Governor. The plan, as finally drawn, provided for the needs of the society, the Public Library Commission, and the States Education Department. It is hoped, however, that the latter department will in the near future be provided for elsewhere. In that event, its present rooms will be used by the Historical Society for work with the state archives, and for expansion of its other activities, many of which are still cramped for space.

The building itself, which is located on

a commanding eminence opposite the State Capitol, is constructed of gray granite quarried at Sauk Rapids, Minnesota, and the marble of the main staircase and the floors of the corridors and stack rooms is from quarries at Kasota, Minnesota. The style of architecture is Roman Renaissance reduced to its simplest elements. The central motive is an Ionic colonnade projected over a recessed loggia. The building is of five stories, set on sloping ground, so that the shipping-rooms of the Historical Society and the Public Library Commission, tho located on different floors, are both accessible to the service driveway in the rear. The Public Library Commission occupies the south end of the building on the two lower floors. The State Education Department has a corresponding location on the main and second floors, with some additional rooms on the west side of the building. The rest of the building is occupied by the Historical Society.

The stack room extends thru four full stories in the rear portion of the building from the basement floor to the second floor ceiling, enclosing an eight-tier, enameled-steel, self-supporting bookstack, with a capacity of 384,000 volumes. Under the present contract, the shelving and floors for the four lower tiers have been omitted; however, the framework is ready for the installation of shelving as needed. The newspaper stack, occupying the central portion of the west front of the building, is four tiers in height, with a capacity of 20,000 bound newspaper volumes. Automatic booklifts are in each stackroom and a push-button elevator for the use of stack attendants is in the main book stack. The newspaper reading-room is directly above the newspaper stacks on the main floor (the second floor above the basement); the main reading-room occupies the north end of the same floor, opening at one end into the newspaper reading-room, and at the other, into the present lower floor of the stackroom. Both of these reading-rooms are open to the public from 8:30 to 5 on every day except Sunday; and the intention is, as soon as possible to keep them open evenings and Sunday afternoons. As a rule, books are issued for reference use only,

but in some cases they are loaned for home use for a few days.

The administrative offices and cataloging rooms are on the second floor, the latter opening directly into the stackroom. The third floor is to be devoted entirely to museum and gallery purposes, altho one of the smaller rooms will be used temporarily for an auditorium until more space on the lower floors is available.

LIBRARY RESOURCES OF THE SOCIETY

Some information concerning the society's collection of books and newspapers, together with a statement of methods used in the building up of this collection, may be of interest to librarians. From a historical standpoint one of the most valuable parts of the collection is the file of Minnesota newspapers, numbering about 10,000 bound volumes and ranking among the half-dozen largest and best-cared-for newspaper collections in the country. As the society was founded in 1849 by the first legislature of the territory of Minnesota, and the first newspaper in Minnesota, the *Pioneer*, now the *Pioneer Press* of St. Paul, was founded the same year, the society was on the field early enough to secure complete files of most of the important Minnesota papers. At present four hundred and one of these are being received regularly, including at least one from every county in the state. In the past lack of space has discouraged the building up of a collection of papers from outside of Minnesota; but as this difficulty is now obviated, the present plan is to acquire a representative selection of newspapers from other states.

The first clause in the statement of the objects of the society, as defined in the by-laws, reads as follows: "To collect, arrange, and preserve archives, records, and historical material . . . illustrative of and relating to the history of Minnesota and the Northwest in particular and of North America in general." The stress in collecting is, therefore, laid primarily on securing material relating to the history of Minnesota. In addition to acquiring all possible public documents, the society conducts strenuous begging campaigns by correspondence to secure the publications of societies and organizations thru-

out the state. Publications by individual Minnesota authors, without regard to the subject, are acquired whenever possible, either by gift or purchase, and are kept in a special collection. The other obvious field which is cultivated to the fullest extent is that of publications about Minnesota. Members of the staff scan the columns of the principal newspapers of the state for publications in all of these classes. They also index the papers for biographical or obituary notices of prominent Minnesotans. In addition, the society has a field agent who makes periodic trips to different parts of the state and collects as much of this sort of material as possible.

The manuscript collection containing several hundred thousand pieces of original manuscript material is probably of more interest to the investigating scholar than is the printed material. The most important of the single collections of manuscript material are the papers of Ignatius Donnelly, numbering about 50,000 pieces, the papers of Rev. Edward D. Neill, Governor Alexander Ramsey, General H. H. Sibley, Colonel J. H. Stevens, James W. Taylor, Samuel J. Brown, W. H. Houlton, and Franklin Steele, averaging several thousand pieces each. All of these men were intimately connected with the early history of Minnesota and the Northwest and their private papers constitute an invaluable source of first-hand historical information.

Outside of the Minnesota field, the collection of genealogical material including town and county histories is no doubt the most notable feature of the library, ranking among the half-dozen leading collections in the country. About half of the popular patronage of the library is attributable to this collection. To the reference librarian it frequently brings perplexing problems in the shape of impatient family-hunters who expect to trace their entire family history in a few hours of random reading in books that the librarian will obligingly place before them. On the whole, however, this is a satisfactory kind of reference work in that the inquirer usually knows exactly what it is that he or she is looking for, and it has its foundations in the very bed rock of history.

The society has recently begun to specialize in the history of the Scandinavian element in the United States. Minnesota is an ideal location for this kind of work, because she has a larger number of Scandinavians in her population than any other state. Since the University of Minnesota had been collecting Scandinavian material for some years, an agreement was reached with the regents, by which the collection of the university will be confined to Scandinavian languages and literature and materials relating to the history of the Scandinavian countries themselves, while the collection of the Historical Society will consist of materials relating to these peoples in America. In accordance with this agreement, the university library transferred to this society the extensive and valuable O. N. Nelson collection, which it had possessed for a number of years. The society has had the assistance of Scandinavian experts in the bibliographical work of building up this collection, and there are usually on the staff one or two assistants with a reading knowledge of the Scandinavian languages to help in caring for the collection. The order department keeps in touch with the more important Scandinavian publishing houses and readers go thru the various Scandinavian periodicals for titles of publications that will be of value in this collection. A list of some seventy-five Scandinavian-American newspapers and magazines was recently circularized and satisfactory results are already beginning to appear.

In the field of early American travel and history, the society has a very full collection. In fact, the ordinary bookseller's catalogs of Americana yield but few items of value to the library. There is a well-rounded collection of books on political science and economics which is constantly being improved. With the notable exceptions of geology and archaeology, pure science does not generally come within the scope of the society's collections, but there is a good selection of standard text and reference books in the other sciences. The society is a government depository, and has

a collection of government documents which is unusually complete. The fields closely allied to history, such as biography, and travel and description, are cultivated almost as intensively as is history itself, with especially notable results in the case of American biography. There is a comprehensive collection of Indian material, especially that pertaining to the history of the Sioux and Chippewa Indians, which is so closely bound up with the early history of Minnesota. The policy is to develop all sides of this collection, archaeological, linguistic, anthropological, as well as the more strictly historical. The collection of bibliographical reference books is unusually good, including a complete set of Sabin's *Bibliotheca Americana*.

In presenting this brief and rather inadequate survey of the library's resources, I am only too conscious of the many deficiencies of the collection. My idea is, by emphasizing its prominent features after the manner of a caricature, to fix a definite picture of it in the mind of the interested reader. This is the public aspect of it, so to speak, the characteristics by which it will be known to fame. It is often true in the case of a library, as with a much-caricatured individual, that the less prominent features of the subject are of more interest to those who know it well. The casual browser in our library, not bent on serious historical research, will find his appetite for books of general cultural and literary interest well satisfied. It is the intention to place still more emphasis on this class of literature, in connection with the campaign to advertise the facilities of the library, and to popularize its use. The new building will be dedicated at the time of the annual meeting of the Mississippi Valley Historical Association to be held here from May 9-11; and following up this initial publicity, measures will be taken to impress upon the minds of possible readers, that this is a public, not a private, institution as many people erroneously believe, and that the library can offer them help in many ways that they little suspect.

C. EDWARD GRAVES, *Librarian*.

THE ROSWELL P. FLOWER LIBRARY AT CORNELL

IN 1897, Roswell P. Flower gave five thousand dollars to the New York State Veterinary College at Cornell University, Ithaca, N. Y., for the purchase of books. In April, 1901, Mrs. Roswell P. Flower gave ten thousand dollars to be added to the unexpended balance of the \$5000 to endow a library for the college. The library was established and named in honor of the ex-Governor. The income of the endowment is used solely for the purchase of books and periodicals to keep the library abreast of the advances in all that pertains to comparative medicine. In the library hangs a portrait of ex-Governor Flower and under it a tablet with the inscription "The Roswell P. Flower Library, Founded 1897." The exercises in recognition of these generous benefactions were held in the amphitheater of the Veterinary College, June 12, 1901.

This library contains the choice collection of veterinary books made by the late Dr. John Busteed, the founder of the New York College of Veterinary Surgeons. It includes a number of rare and valuable works, dating from Carlo Ruini (1602 A. D.). The collection also includes a number of pamphlets and water color illustrations. It furnishes a valuable history of veterinary science and to the artist it provides the classic folios of Gurlt, Stubbs, Brunot, Leblanc and Trouseau, Snape, Blaine and Leisering in artistic, descriptive and surgical anatomy. The Flower Library also contains the library of Dr. W. L. Zuill, formerly a professor in the veterinary department of the University of Pennsylvania, consisting of many veterinary classics in the French language. The library has in successive years been the recipient of many valuable gifts.

The permanence and high quality of the Roswell P. Flower Library is secured. It keeps in touch with the most advanced literature in the various fields of veterinary medicine, hygiene and surgery.

Already the library has more than 5600 volumes and a collection of students' theses. There are in addition large numbers of reprints, pamphlets and

bulletins on animal diseases. There are more than thirty complete sets of current veterinary and allied journals. All of this material is scientifically classified, cataloged and indexed upon its receipt. One hundred veterinary, medical and closely related technical periodicals are taken regularly, keeping the library up to date with the literature of America, Great Britain, France, Switzerland, Germany, Austria and Belgium.

Supplementing the resources of this library are the libraries of the various other colleges and departments of Cornell University, notably that exceedingly valuable collection of publications in the department of entomology.

The library is of great assistance to the faculty and students. It is also consulted by those of every college in the University and by many teachers in other institutions thruout the country. It is gradually becoming a reference library for the veterinarians of the state.

FRANCES B. VAN ZANDT, *Librarian.*

NEWARK PLANS A SOUTH AMERICAN EXHIBIT

DURING May and June a South American exhibit will be held in the Newark Museum. While its general object will be to stimulate interest in the great possibilities for trade with all South American countries, the museum has selected the Republic of Colombia as the special subject of this exhibit.

The museum has sent out letters to the leading firms having trade relations with Colombia soliciting contributions of material that will illustrate her resources, her economic, business and trade conditions, her possibilities of development by American capital, the products she now exports and those she can and will export when her internal transport facilities are properly developed.

Half of greatness is grit. When intelligence is backed up by the determination not to back down, the only thing under the sun that is impossible is something that can not be imagined.

CHILDREN'S WAR WORK EXHIBITS
IN EVANSTON PUBLIC LIBRARY

It is a fact quite well established that our public schools constitute one of the most fruitful and inspiring parts of the public library's field of activity, and so many more opportunities for co-operation and close affiliation between the two institutions are now offered than have ever before been held forth that it seems as if a near future day is promised when they might really come to a full understanding of each other. It has become quite a common thing for us to preach co-operation between our schools and our libraries, but I suppose that we librarians, while we announce ourselves as vigorous defenders of good co-operation, therewith often unconsciously assume that the "co" part of the word is vested in the other party. In fact, it seems that in every bit of co-operation someone does a considerable amount of "second fiddling," and I don't mind admitting that in the activities described in the following paragraphs we of this library did play that part.

During the week of February 9 there was held in the Evanston Public Library an exhibit which in interest aroused exceeded perhaps anything in the way of exhibits ever shown here before. Someone had conceived the rather startling notion that children, always entertaining, could even be useful under certain predetermined circumstances. So the children of the public schools were organized and set to work on a multitude of tasks grouped under the general term "War Relief Work." It is not here necessary to speak of the particular methods employed in the performance of these tasks, but it should be stated that, beyond the guidance and instruction necessary in order that the pupils (some of whom were only six years old) might be able to do the work at all, no help was given, each child being required to work out his own salvation on the particular sweater or bonnet or flannelette bootee that he had chosen as his visionary goal.

The results of this effort exceeded everything that was ever claimed for it. We hurried in a lot of temporary shelving so

that the books of the children's room of the library might make way for the exhibit, and when the work of installing the display was completed, the public was invited to inspect the work of the children—443 picture puzzles, 79 pin cards, 27 shot bags, 23 glass covers, 114 pillows, 156 checker boards and boxes, 65 pairs of knitting needles, 3 rag rugs, 200 paper dolls in envelopes, 250 loose paper dolls, 392 splints, 306 bandage rolls, 886 tampons, 13,986 gun wipes, 88 quilts, 17 knitted baby comforters, 14 knitted squares, 84 knitted soldier sweaters, 6 knitted soldier scarfs, 3 pairs of knitted wristlets, 5 trench caps, one helmet, 53 knitted baby bonnets, 18 knitted baby sweaters, 2 knitted baby scarfs, 2 pairs of knitted baby booties, one pair of knitted baby mittens, 30 knitted wash cloths, 7 pairs of flannelette booties, 9 flannelette bonnets, 4 velvet bonnets, and 15 flannelette baby jackets.

There were hundreds not only from Evanston but also from Chicago and other cities who came to see the exhibit; and a goodly number of the "grown-ups," as they examined the work of the little folks, thanked their lucky stars that they were not called upon to do as well. Even as I write this, many of these very articles, made by the industrious hands of many little children, are serving their serious purpose in the most desperate places where humans dwell to-day.

Just now we are exhibiting in the rooms of the library the food conservation poster work of our school children. Every class of every school in the city from the kindergarten to the high school has contributed to this poster exhibit, and about 500 posters look down from our walls and exhort our readers and patrons, thick and thin alike, to eat this and save that in order that a variety of dire calamities might the sooner befall the kaiser. Here, too, the children have been allowed to work out their own ideas with only a helping hand now and then to keep them within the borders of sanity. Originality has been emphasized, and, while it must be admitted that in a few instances the work is tolerated by virtue of its originality only—and how much so-called progressive library work

does not this single foundation stone sustain—yet in the large majority of cases there is a surprising amount of keen wit and ready analogy displayed. Of course, there are some examples of gross crudeness, but not nearly so many as one might expect, and a considerable number of the posters are really artistic in their execution.

The variety of themes that have suggested themselves to the children are interesting to note. The poster that displays a score or more of farmers performing a sort of goose-step past a poem reading

Sing a song of sixpence,
A field full of wheat,
Four and twenty farmers
Linked against defeat,

is only one of many whose themes parody Mother Goose or other rhymes. Personification of inanimate things and of animals has an appeal to children, and especially do they seem to love to endow animals with the powers of speech and cool war-time reasoning. One very large pig with a very small head solemnly announces that it is "on the way to France" while another near by optimistically philosophizes that it is "safe on Saturday anyway." Fishes everywhere—and chickens, too—display the most spirited self-sacrifice in offering themselves for meatless day consumption, and any number of disconsolate dogs and rats bemoan the change that has come over the nation's garbage pails in the more recent months. Uncle Sam and Columbia and Old Glory stand forth, of course, everywhere amid personified sugar sacks calling for help in the sea of war; fat boys promising to reduce, and crows on fences protesting against the activity of Farmer Hoover in the corn fields, are frequent.

It is a great satisfaction to know that this work has been worth while. Whether it is the first time it has been done in just this way signifies little since this is a poor time to exploit priority: but our library is glad that it has been able to co-operate so extensively with the schools in a piece of work of this sort. The providing of space for exhibits has after all been the least part of our co-operation. The records of a thousand tasks well done and

accomplished under unprecedented circumstances surely provides a splendid inspiration to go on and accomplish more, and our very efficient school authorities recognize that this inspiration is only a small part of what the public library can contribute toward the educating of American children.

MARCUS SKARSTEDT, *Librarian.*

STENOGRAPHERS AND TYPE- WRITERS WANTED

THE United States Government is in urgent need of thousands of typewriter operators and stenographers and typewriters, both men and women. All who pass examinations for the departments and offices at Washington, D. C., are assured of certification for appointment. It is the manifest duty of citizens with this special knowledge to use it at this time where it will be of most value to the Government. Women especially are urged to undertake this office work. Those who have not the required training are encouraged to undergo instruction at once.

Examinations for the Departmental Service, for both men and women, are held every Tuesday, in 450 of the principal cities of the United States, and applications may be filed with the Commission at Washington, D. C., at any time.

The entrance salary ranges from \$1000 to \$1200 a year. Advancement of capable employees to higher salaries is reasonably rapid.

Applicants must have reached their eighteenth birthday on the date of the examination.

For full information in regard to the scope and character of the examination and for application blanks address the U. S. Civil Service Commission, Washington, D. C., or the Secretary of the U. S. Civil Service Board of Examiners at Boston, Mass.; New York, N. Y.; Philadelphia, Pa.; Atlanta, Ga.; Cincinnati, Ohio; Chicago, Ill.; St. Paul, Minn.; St. Louis, Mo.; New Orleans, La.; Seattle, Wash.; San Francisco, Cal.; Honolulu, Hawaii; or San Juan, Porto Rico.

CAMPAIGNING FOR BOOKS IN A SOUTHERN COLLEGE TOWN

CHAPEL HILL, the seat of the State University of North Carolina, is a small country town with a population of not more than 2000, faculty and "townspeople." The college library is the only one in town, and from it was conducted a most interesting campaign for books during the A. L. A. book week. It began with three darkies and their motley teams on the Monday morning, and ended with the big pile in its "chicken-coop pen" in the central hall of the library on Saturday afternoon.

It is hardly fair, however, to date its beginning from Monday morning. The previous weeks had contained much planning, more advertising, and still more preparatory begging—tho after the fall drive for actual dollars it was a comparatively easy matter to go about "prying books from their owners," as Frederic C. Haskin puts it. For advertising, the large black posters of the soldier balancing a huge pile of books and the smaller Gaylord posters were displayed in most prominent places—in the library itself, on trees down the main street, in store windows, and best of all, in the post office. It might not be recognized for the post office until the noon train came in, and the whole town was seen to enter its door within the next hour, from khaki-clad freshman to elderly professor. Then one would conclude that it was the best possible place in which to catch the public eye.

In addition to the posters, announcement of the collection was made in college chapel (compulsory), and articles were culled from the *A. L. A. War Bulletins* to be printed in the *Chapel Hill News* and college weekly, the *Tar Heel*. Citizens were told that the Boy Scouts would call for books on Monday and Tuesday. Collections were to be made in the student dormitories by freshmen, and all were given the alternative privilege of bringing their books in person to the library and adding them to the pile in the main hall. Both articles ended with an invitation in capitals to COME TO THE LIBRARY AND WATCH YOUR PILE GROW.

The receptacle for this pile occasioned

much anxious thought. Finally the college carpenter was called in and ordered to construct a fence, dimensions five feet square. This sounded enormous, but "nothing venture nothing have." The completed article was made of mosquito wire with wooden frames, and while it provoked no little merriment and ridicule, and was permanently christened the "pen," yet it proved fully adequate and gave a fine view of the books thru the sides. The library has a large square hall, with delivery desk in the rear and reading rooms on either side, so the position of the pen in the center of this hall could not have been better. The students were captivated immediately.

The first plan had been for the Boy Scouts to go to the houses on foot and carry away the books in their arms, but hopes ran high for a large collection to equal the \$160 given in the fall, and finally three teams were boldly engaged, Unc' Green, Unc' Bob, and Ernest. Their wagons were of the variety depicted by children in their first artistic attempts, with about the same irregularity of line. Ernest had a mule, of apparently unambitious disposition.

At the appointed time on Monday this noble cavalcade drew up at the back door, the scouts came running over the green with a whoop, rejoicing in an early release from school, the wagons were decorated with posters, and each horse—and mule—received a small American flag behind his right ear. Unc' Green was dissatisfied with the resulting uneven appearance, and demanded a flag for his steed's left ear, too. There happened to be just one more, and his darky soul was satisfied. The mule team was not so popular, and finally the two smallest boys were obliged to take possession of it. However, a ginger cake apiece assuaged all sorrows, and with a rattle and bang the A. L. A. special delivery trucks were off!

The returns fulfilled every hope. There were scores of attractive books—fiction, such as O. Henry, Conan Doyle, Oppenheim, John Fox, Basil King, Gaboriau; also volumes of up-to-date history, poetry and essays. For the rest of the week books rained into the pen. Two hundred volumes

were sent in from the neighboring towns of Hillsboro and Cedar Grove, and these included a choice set of French novelists, in translation. The students gave most generously both of textbooks and favorite stories. Their Y. M. C. A. book exchange sent over a wagon load from which were selected several hundred respectable looking volumes, many of them French grammars and stories, with vocabularies. Some of the texts contained interlinear assistance and remarks of varying degrees of acerbity, but the former will give help to the new readers, the latter perhaps remind them of days gone by.

As the pile increased it became a great center of attraction. Boys surrounded it all day, picking up this book and that, reading a page here and there. They exhibited it with pride to their friends. Professors were heard to wish for a chance to read some of the fiction. Toward the end of the week so many surmises were expressed regarding the number of books in the pen that it gave rise to the idea of a guessing contest. Why not keep the pile intact on the Saturday and invite everyone to hazard a guess on its contents?

There was some perplexity over a suitable prize, but it was finally decided to allow the winner the privilege of selecting five dollars worth of new books to be given in his name. No sooner said than done. New posters were prepared advertising the contest, and articles written for the papers. On Saturday morning a new blankbook and freshly sharpened pencil appeared at the desk, and everyone who came in was buttonholed and asked to register. The results were most amusing. They ranged from four hundred to four thousand. One boy brought a foot rule and proceeded to measure and figure, another was reported to be working it out by logarithms, while a lady said that she had dreamed the number—1263—the night before.

Monday morning there was a great sorting and counting, and there proved to be a total of 1495, with 513 fiction, 594 French textbooks—enough to stock every camp in the United States it seemed—and the rest non-fiction. The prize was won by a boy who had guessed 1497, but he was closely

followed by two others who tied for second place with 1492, a patriotic choice. Additional gifts brought the grand total up to 1560, from which not more than two per cent must be discarded.

This campaign not only stimulated interest in the soldiers' reading and brought together books for it; it also proved to be a good advertisement for the library, and gave the partakers therein many enlivening moments.

CORNELIA S. LOVE.

A WARNING AS TO LIBRARY BULLETINS

WE are asked to call the attention of librarians to an experience of the Plumb Memorial Library at Shelton, Conn., with the Library Bulletin Company, with which Mr. and Mrs. M. F. Dyer are connected. This company printed a bulletin for this library for 1915 and 1916, collecting local advertisements from which the expenses of the publication and the profit of the promoters were paid, so that the bulletin cost the library nothing. For a bulletin in 1917 money was collected from advertisers, but nothing further was done, and letters sent to the address of the company at Box 146, Norwalk, Conn., received no reply; a special delivery letter sent to the same address was forwarded to Newark, N. J., and returned from that post office as unclaimed. Nothing has since been heard of the people. The Mattatuck Press, Inc., of Waterbury, Conn., thru A. H. Tyrrell, reported to the Plumb Memorial Library that there was a printing bill of \$1100 which was unpaid, and that no trace could be found of the concern which had had the bulletins printed. It is understood that the libraries at Chicopee, Mass., Westfield, N. J., and East Orange, N. J., have had similar trouble. The library at Shelton has made good to the advertisers who had paid the Library Bulletin concern, and has issued its bulletin for the past year by the help of new advertisers, so that it has been done without expense to the library. We print this information that other libraries may avoid trouble of this kind thru dealings with irresponsible people.

WINDOW DISPLAY BY THE CITY GAS COMPANY, DETROIT

THE BOOKS COLLECTED AT THE UNIVERSITY OF NORTH CAROLINA STIMULATING INTEREST IN THE BOOK DRIVE, NORTH AND SOUTH

VISIT TO SIXTEEN MILITARY CAMPS

THE following report was written by J. I. Wyer, Jr., chairman of the War Service Committee, describing a tour of inspection which he made in March:

On Mar. 8 I left Albany for a visit to as many of the cantonments and national guard camps as could be reached in a three-weeks' absence. Between that date and the 29th the following were visited:

Dix, Wrightstown, N. J.
 Meade, Admiral, Md.
 Lee, Petersburg, Va.
 Wadsworth, Spartanburg, S. C.
 Sevier, Greenville, S. C.
 Gordon, Atlanta, Ga.
 Fort Oglethorpe, Chattanooga, Tenn.
 Pike, Little Rock, Ark.
 Beauregard, Alexandria, La.
 Logan, Houston, Texas.
 Ellington Field (aviation), Houston.
 Travis, San Antonio.
 MacArthur, Waco.
 Bowie, Forth Worth.
 Funston, Junction City, Kansas.
 Great Lakes Naval Training Station, Great Lakes, Ill.

While the first object of interest at each camp was naturally the camp library and the A. L. A. War Service centered in the library building and reaching out from it into all parts of the camp, no such visit could be made without seeing much of the military and social life of the various camps. The journey was strenuous but very interesting, an unusual and significant experience.

Whenever possible these camps, probably by design, have been located rather remote from cities or large towns. This is especially true of Camps Upton, Dix, Meade, and some of the aviation fields. I was surprised at the ease and informality with which civilians, both men and women, are admitted to most of these camps. The aviation fields, of course, are rigidly guarded and sightseers strictly excluded; but the cantonments and national guards are surprisingly easy to enter. I was challenged for a credential in but two camps, Gordon and Funston, and the latter camp was the only one in which a formal pass was necessary to reach the camp library. On the other hand I saw, particularly on Satur-

days and Sundays, women, usually attended by male escort, sometimes alone, in the camp library, the Y. M. C. A. huts (sometimes playing checkers with soldiers), in the buildings of the Knights of Columbus, in the mess halls at meals with both men and officers, and in all parts of the grounds. Trolleys and jitneys from nearby cities enter the grounds without formality and their passengers come and go freely thruout the camp.

Other impressions are of too many stretches of bad roads between town and camp; of the hotel lobbies of camp towns thronged with soldiers and their friends; of the visiting family groups marked so often by unsmiling mothers and the evident atmosphere of parting; of a monotonous sameness of architecture and military routine, which, nevertheless, permits of distinctive differences among the several camps; and, most of all, of the amazing progress in less than a year towards a great national army.

As for the library service. The typical A. L. A. buildings are finished in every camp visited except Beauregard (construction delayed by two months quarantine) and Ellington Field where no building has been authorized. These buildings are in all cases quite the most attractive in the camp with the single exception in a few instances of the hostess houses. Sometimes the library is the only painted building. They are noted everywhere for their warmth, their bright lighting, their distinctive and impressive exterior appearance. Considering that they were all built from the same plan there is a considerable and interesting variation among them due to differences reflecting the initiative and personality of organizing librarians. Two or three camps have requested additions but my general impression was that a building one hundred feet long in nearly every case is sufficient for an adequate book collection and for the work incident to handling books and passing them on to branches and stations.

The book collections now range from 9000 to 25,000, the average for the fourteen big camps visited being 17,000. No camp visited had more than half enough

books and in certain of the larger more permanent camps 50,000 or more books can be used to advantage. This book shortage will be remedied by the recent Book Campaign which was actually at work during my days in Texas camps. On the other hand nearly every camp has as many books as it has been able to prepare for use. Many thousands of books have been and still are delayed in shipment. A few have been lost, especially early shipments of gift books. It was certainly wise for the Washington office to withhold shipments of new books until buildings were ready so that they should not be distributed to unorganized agencies administered by others.

There is high praise everywhere for the admirable selection of the purchased books, not only from librarians but from officers and men who pronounce it particularly comprehensive and well rounded for so small a collection.

Personnel. There are now about a hundred regular employees in thirty-five camps, an average of slightly under three to a camp. No building should have a staff of fewer than three. And it is easy to see how the best librarians can use four or five in addition to the local service that can be had at any camp.

Continuity of service is extremely desirable. The best showings were uniformly made where a good man has been in charge for several months; every change impairs efficiency. The personnel, especially of chief librarians, is becoming impressive and includes some of the best men in the country. This is as it should be, but it would be better if these men could arrange for longer service than the one, two or three months which is the utmost many of them have been able to render.

Considerable additional service is available by detail from the commanding officer or some of his staff or subordinates. Such help is usually conscientious objectors, prisoners, physically disqualified men, laborers and occasionally able-bodied enlisted men, tho the War Service Committee discourages requests for the latter, and naturally the commanding officers feel that their business is to train all able-bodied men to

fight and not to detail them for library work. Besides this official help much excellent help has been given by officers' wives, the staff of the public libraries in camp towns and by volunteers secured by these public libraries.

Extension Work. The obvious agencies are the Y. M. C. A. huts (ten or a dozen in each large camp), the K. of C. buildings, the camp hospital, barracks buildings, soldiers' clubs in camp towns, officers' clubs, remount stations, the trenches, artillery stations, outposts, quarantine camps both incoming and outgoing, quarters of the commanding general.

If the stock of books suffices for provision to the barracks the number of branches in any camp may easily be two hundred. At present it is usually from fifteen to twenty, tho one or two camps have been able to lodge collections of fifty to seventy-five in a good many barracks. With 1000 books in each Y. M. C. A. and K. of C. building, 2000 in the hospital, divided among nurses, officers, convalescents and medical staff, fifty books in each of 200 barracks and several hundred in other obvious branches, 25,000 to 30,000 may well be used. These in addition to 10,000 in the central building would probably provide a sufficient permanent stock. Beyond this the number of books that may go to soldiers leaving for France can only be conjectured. Thousands are constantly being used thus in the eastern camps tho the stock of books west of the Mississippi is too small yet to permit such depletion.

Publicity. Everywhere the heavy work of organization and building has postponed desirable publicity. The most obvious and effective opportunities have been overlooked or neglected and in too many camps the collections of books in the various agencies give no hint that the A. L. A. has anything to do with their provision or administration. In common thought they are doubtless credited to the "Y," the K. of C., or to friends from home.

Each library could well use two hundred posters or placards thruout the camp.

Other publicity agencies not yet fully utilized are the camp papers, home soldier

correspondence, local daily papers, movies in camps and in camp towns.

The Work. Nothing could be better than the fine spirit of the men and women in all the libraries or more gratifying than the satisfactory and rapidly growing results.

Relations with the military authorities and the other Fosdick agencies are nearly always cordial and effective. When such relations are not satisfactory it is quite as usually due to inertia or indifference of the librarian or to his undue absorption within his building.

All our librarians agree that a camp library is a "man's job" calling for the best ability and qualities in our very best men. There is nearly unanimous agreement that women can be largely used for assistants and for branches in the base hospitals, and it is gratifying to record that the commanding officers are nearly all willing to allow women to be thus used.

The A. L. A. work seems to compare favorably with the work of any other army welfare agency in its organization, unity, conduct and success. This is measured not only by what can be seen but what is heard from officers (especially the commanding generals) and men, as well as in the favors accorded to it and the manifest approval of it by camp authorities.

Relations with Washington. There is no word anywhere save of praise for the War Service office in Washington. Comments are numerous and emphatic that following the establishment of headquarters at the Library of Congress there resulted at once an admirable organization which gives decisions promptly, which confers abundant authority in an astonishing range of matters, large and small, which encourages initiative among librarians, which is business-like, prompt and effective. The speed of the special book service in particular comes in for favorable comment. These sentiments were especially in evidence at the Waco conference.

Waco Conference. The district conference of twelve camp librarians was held at Waco, Texas, Mar. 21. There were also in attendance W. R. Raymond, the southwestern war work secretary of the Y. M.

C. A. and the librarians from Waco, Dallas and Baylor University. The conference seemed fruitful and abundantly worth while.

CARNEGIE CORPORATION TO STUDY AMERICANIZATION

THE Carnegie Corporation of New York has undertaken to finance a study of the existing methods by which Americanization is being fostered in this country, so that the various agencies which have arisen in the past twenty-five years, together with other older influence and experience potent in uniting the foreign with the native born, may be joined in common aims and efforts for the general welfare. The inquiry will be under the supervision of Allen T. Burns of Cleveland, who has a number of specialists in various fields associated with him. An advisory council now being organized will include Theodore Roosevelt, John Graham Brooks of Cambridge, and Dr. John M. Glenn, director of the Russell Sage Foundation.

For convenience the study has been separated into the following divisions: Schooling the immigrant; The press and the theater; Adjustment of homes and family life; Legal protection and correction; Care of health; Naturalization and political experience; Industrial and economic amalgamation; Treatment of immigration heritages; Neighborhood agencies and organizations; Rural developments.

The purpose of the study is to learn the most effective methods in each field, and its method will be comparative and constructive thruout, typical communities in different sections of the country being selected to illustrate the work in each field.

For each division of the study a chief who is a specialist of national influence in his field, will be appointed, and each will be assisted by a number of field workers. The reports in their final form will be the work of the specialists who will be, individually, the responsible authors. Of interest to librarians is the announcement that Dr. C. C. Williamson, the librarian in charge of the Municipal Reference Library in New York City and president of the Special Libraries Association, has been appointed statistician for the survey.

LIBRARY WAR SERVICE

BOOK CAMPAIGN

THE intensive book campaign in March was a success. Actual figures cannot be given as the reports are not yet complete, but more than 2,500,000 are in sight.

The campaigns in many cities were conducted on a very elaborate scale. For the most part the librarian assumed the responsibility of campaign director; in many places, however, some member of a prominent civic club assumed this responsibility and gave it practically his whole time during the campaign week.

Schools and colleges in some cities collected a large percentage of the gifts and helped to keep the standards high. The Boy Scouts in most places made a special campaign for boys' books and assisted largely in the actual assembling of all books donated. All types of organizations have given liberally of their time and of their enthusiasm, and once again the library has demonstrated its ability to assume a place of leadership in the community.

Material not suitable for use in the camps or overseas, whether in the form of magazines or books, should be sold and the money sent to Carl B. Roden, treasurer of the A. L. A. at the Chicago Public Library. It is very important that nothing be sold which bears the A. L. A. label in any form, and also that nothing be sold which is not obviously unsuited to the use of the soldiers.

It is assumed that the public understands the above policy. At Oakland, California, it was made particularly clear in a circular of questions and answers used in the book campaign. The circular included this:

"Will the books I give all be used for the soldiers and sailors?"

"Yes, but those that are not suitable for camp libraries will be sold and the money added to the War Library Fund."

SOME FIGURES FROM THE CAMPAIGN

Itemized returns from the book campaign in different sections of the country are nec-

essarily inadequate and fragmentary, but a few figures taken from letters written at different dates may give some indication of the results of the special drive the last week in March. Every writer adds after the figure given, "More books are constantly coming in."

In St. Louis, where the drive was conducted in co-operation with a Red Cross and Y. M. C. A. campaign for recreational material, about 20,000 books were received during the week. In other southern cities figures have been sent in as follows: Nashville, 44,000 (30,000 collected by the Kiwanis Club); Louisville, 25,000; New Orleans, 13,000; Memphis, 20,000; Birmingham, 19,000; and Atlanta, 11,000. Cincinnati collected 35,000. St. Paul, Minn., had about 25,000 volumes; Detroit, 17,000; Cleveland, over 70,000. In New York City (including Brooklyn and Queens), 432,000 had been collected up to Apr. 19. Tacoma gathered about 6000, and the state of Washington as a whole reports 35,000 available so far.

BOOK SHIPMENTS

From the Library War Service headquarters come a few specific suggestions which all librarians are asked to bear in mind:

1. Ship the best books first. This enables you to avoid the necessity of facing all at once the rather difficult problem of elimination.

2. Remember that it will not be possible for the camp librarians and the dispatch offices to handle within a few weeks the total number of books collected, and that it will be necessary for many libraries to hold their books for a month or so.

3. When shipping instructions are received from headquarters or the state agency, books should be shipped very promptly and the necessary report made promptly. (It is not always necessary to ship the total number of books at one time if the requisition is for 5000 or 10,000

volumes. But some books should be started immediately after the order has been received. Promptness is especially important in the case of shipments to a small camp, for in many cases these camps are entirely without reading matter.)

4. The preparation of books should be in accordance with the instructions given in the little four-page leaflet entitled: "Sorting gift books and preparing them for use," except that shelf list cards need not be prepared even for non-fiction if the books are known to be going to Hoboken or Newport News.

5. Unless you know that the books are going to Hoboken or Newport News, assume that they will be ordered to a camp and that the shelf list cards should be prepared for non-fiction.

6. Books that need and are worth re-binding should be held for later instructions.

7. Paper-bound books, if suitable as to content, will be found useful, especially in the contagious wards of hospitals. They may be sent along with other books to the larger camps.

NEARBY CAMPS

These should be served by the local libraries and library commissions. The Library War Service headquarters is especially desirous at this time of extending the service to *every military and naval camp and station in the United States*, no matter how small. It is, therefore, urgently requested that information as to service rendered by local libraries or information as to needs of gift or purchased books at any camp be sent in as promptly as possible. Probably 300 points are now being reached by the Library War Service, but there are undoubtedly others, new or comparatively small, which have not yet been served.

OVERSEAS SERVICE

Mr. and Mrs. Burton E. Stevenson of Chillicothe, sailed for France early in April. They will be associated with Dr. M. L. Raney in the Overseas Library War Service. Reports from Dr. Raney show that he has established working relations with military and naval authorities and

with the voluntary organizations in France, and that there is a tremendous need for books.

This need is being met in several ways. From one of the dispatch offices last month approximately 42,000 volumes were shipped—for the most part on the decks of the transports. During the next few weeks similar shipments in quantity will be made from another dispatch office.

General Pershing's request that tonnage be granted in the cargo vessels to the extent of 50 tons a month has been granted.

Arrangements have also been made to ship within the next few weeks, 25,000 volumes on the Red Cross tonnage—this at the request of the Red Cross representatives in France.

There have also been some shipments on the naval vessels.

It is impossible to make shipments to specific units or to specific places in France.

A building, which will be used primarily as a dispatch office, but to some extent also as a reading and reference room, is in course of construction at Newport News. The boxes shown on the preceding page are those in use at the Hoboken dispatch office for shipping books for transport and overseas use. Each unit box, which has one shelf, will hold about forty books and a few magazines, and these units may be bolted together to form a bookcase in which the books may be easily examined. The Y. M. C. A. representative on each transport, to whom these boxes are delivered "on deck," opens the cases and makes the books available to the men during the voyage across, repacking the volumes and seeing that the boxes are forwarded on arrival at the other side.

MEXICAN BORDER

Chalmers Hadley, librarian of the Denver Public Library, during the last three weeks has been investigating the book needs of the soldiers along the Mexican border. His final reports have not yet been made, but the preliminary reports indicate a great need for books among the scattered troops from Yuma, Arizona, to Brownsville, Texas. It is thought that traveling libraries supplied from two or three main centers will be found necessary.

LIBRARY BULLETINS

Attention has been called to the fact that many public and other library bulletins have not yet printed a good article about the war service of the American Library Association. These are a medium of publicity that certainly ought to be used. Headquarters will be glad to supply the information from which an article can be written at any time. Pictures can be furnished if they can be used. It is suggested, however, that the editors of these bulletins arrange if possible to get pictures of library service from a nearby camp in which the A. L. A. has a representative.

CAMP LIBRARY BUILDINGS

The building at Camp Beauregard, Alexandria, La., one of the National Guard camps, was long delayed by the quarantine in the camp. Contract was placed Mar. 26,

and the building will shortly be opened. In the meantime, however, books and magazines have been circulated in the camp, considerable quantities of fiction having been given out to the soldiers, with a rubber stamp marking in explanation of A. L. A. ownership.

The increasing number of men, now 35,000 at Kelly Field, the great aviation camp near San Antonio, Texas, has made it necessary to provide a building and full library service there. Needs had previously been cared for by the Camp Travis Library. Harold T. Dougherty of the Newton, Mass., Public Library, is in charge. The building will be opened early in April, but in the meantime extensive service is being given.

BOOK BUYING AND SHIPPING

About 300,000 books have now been purchased from the funds of the association. Practically none of these are fiction. The camp librarians have been surprised at the large proportion of non-fiction called for by the soldiers, and especially at the quantity of technical material in demand. Oftentimes hurry calls come to headquarters, at the Library of Congress, for books which seemingly have no connection with the war. For instance, several books on scene painting must be rushed to some camp. On inquiry, it is found that these are for men studying camouflage. Photography seems to be playing a large part in the work of the Signal Corps. Logging, ice making, laundry work are more "reasonable."

On many subjects, it is difficult to find material in book form. For instance, electric wiring in the trenches, "buzzaphones" information for ammunition train officers, aerophotography, homing pigeons, cantonment building construction. Except for confidential pamphlets of the Government, there is little to be found on these subjects outside the magazines, and no headquarters magazine service has as yet appeared possible. Much time is consumed at headquarters in looking up books on such subjects (often telephoning or writing to various army officers and commissions) and in selecting books and ascertaining publishers and prices, before placing the orders.

The resources of the Library of Congress are of inestimable value, and a very great amount of assistance has been rendered by its staff.

After the selection of books has been decided, order sheets are typed. These are made in quadruplicate: first to the publisher; second, to the camp; third, for the publisher's file; and fourth, for the camp file. There is also an alphabetical file of order cards.

METHOD OF SHIPPING BOOKS

The order sheet gives instruction to the publisher as to where the books are to be sent, direct to the camp or thru the New York Dispatch Office. Books ordered in response to camp requests are generally sent by express or parcel post, to avoid the congestion in freight, even in quartermaster freight. When army officers, and enlisted men too, ask for books on military subjects, it is obvious that the books must reach them as promptly as possible.

In the case of books that are ordered for all camps, many of the shipments are handled thru the New York Dispatch Office. Here the invoices are checked up and the books distributed to the sorting bins, thence going by quartermaster freight to the individual camps. According to the latest reports, the best time made by quartermaster freight is between three and five weeks.

A considerable stock of books has been accumulated at the New York Dispatch Office. These number about 500 titles and from one to fifty copies each. Many of the orders arriving at headquarters are filled by calling on the New York Dispatch Office stock. This has somewhat reduced the number of small orders that have to be placed with the publishers. The proportion of orders for special books has grown larger as the increasingly diversified needs of the soldiers are reported to the Washington office.

GIFT BOOKS AT THE CAMPS

Before the book campaign began, reports were received at headquarters from each of the large camps as to how many books were needed by the camps themselves and how many would probably be

needed in the next six months for distribution to the troops leaving for overseas. The total number of books called for by the thirty-seven camps for use in the camps was 648,000 and for overseas, 570,000. Many thousands of books have already been distributed by camp libraries among troops leaving the camps for service in France.

PUBLICITY IN THE CAMPS

Thru the co-operation of Mr. Dana, the Newark Public Library has prepared placards that have been posted at all the Y. M. C. A. and K. of C. branches in the large camps. In addition, a large framed poster has been placed in the vestibule of each of the camp library buildings, explaining the work of the association and the gift of the building by the Carnegie Corporation. This is only the beginning of what may prove necessarily a great extension of publicity work.

USE OF THE CAMP LIBRARIES

Already many of the camps have reported that their buildings are being crowded to the utmost every evening and all day Sunday. One camp reports 900 men counted at the main library during a single evening. Camp Greene reports that the men do not wait until the day's drill is over, and that on one day at ten o'clock in the morning there were 133 men in the building. Most of these men, however, were officers. The surprise and delight of the officers in finding so much and such good material on military and technical subjects is quite marked. The use of the military material has become so great that at a recent conference of Texas librarians, headquarters was requested to prepare a more detailed classification of these books. The man who wants a book on machine guns, for instance, does not fancy having to look thru two or three hundred titles in the military arts.

Some camps are now reporting a circulation as large as 17,000 per month. This includes the use of books from the main building and also from the Y. M. C. A. and K. of C. branches and from regiment and company stations. The report forms call for count of actual loans. There is in addition probably a larger auxiliary use of books than in the ordinary public library.

Two camps report that over fifty per cent of their circulation is non-fiction.

EXTENSION WORK AT THE CAMPS

Already many camps have made plans for an extensive system of branches and stations. The use of Y. M. C. A. and K. of C. buildings as branch libraries naturally occurred to all camp library workers last fall. As a further development of Camp Library extension, plans were also made by some of the librarians to install collections of from 50 to 100 books in each regiment headquarters or in the company mess halls or barracks. The supply of books has not been sufficient for this in some camps. With the influx of new gift books, however, it is likely that large numbers of these small distributing points will be established at every camp. The system of charging books at such points is very simple. Headquarters has encouraged the use of the "honor system," whereby each soldier charges his own books.

the box is opened, the book cards are placed back in the books, and the books are returned to the shelves for circulation again. All the usual library red tape and many of the practices have been entirely eliminated.

RED TAPE IN CAMP LIBRARY WORK

Everyone at the beginning of the work was anxious that red tape should be reduced to a minimum in the hope that soldiers would thus find the camp libraries easier for them to use than public libraries at home. The changing theories in regard to "red tape" and routine methods in Camp Library work would furnish material for an interesting chapter.

Last fall it was assumed that soldiers would read largely fiction, that it would be sufficient to place the books on the shelves without much of any record, and that probably all that would be needed as a charging record would be a slip of paper naming the book borrowed, and signed by the borrowing soldier.

<p style="text-align: center;">DROP CARD HERE </p> <p style="text-align: center; font-size: small;">INSTRUCTIONS FOR MONITORS</p> <ol style="list-style-type: none"> 1. When books are sent to Stations a Transmittal List goes with them. 2. Put last copy of this on side of Bookcase for Men to Consult. 3. You may have a card file. The small compartments at the end are for your records. Put second copy of Transmittal List on last. 4. Every day when books are sent out the book cards that the men have dropped in, being them on a bench. Arrange as possible, with as clean record sheet. 5. As soon as you take out the books dropped into Box by men. Find book card in your records, and get book in book pocket. Put book back on shelves, but never till you find the right book card. 6. On return from Library, slip up all books that are in that you wish to charge back to men and have them ready. Cover all book-cases of your List of books that you are returning. Put a slip in package asking how many books you are returning. 7. When books are sent you on special request, add three or bottom of book names of your List. 8. You may use a work list of men who have overdue books. 	<p style="text-align: center;">HOW TO BORROW A BOOK</p> <ol style="list-style-type: none"> 1. Select Your Book. Look inside Back Cover 2. Take Book Card out of Pocket. [Sample] 3. Write Name, Regt., Company, and Date, on Card 4. Drop Card in Slot at Left <p style="text-align: center;">RETURNING BOOKS</p> <ol style="list-style-type: none"> 5. Bring Book Back inside 14 Days 6. Drop Book into Opening above this Sign <div style="font-size: x-small; border: 1px solid black; padding: 2px; margin-top: 5px;"> <p style="text-align: center;">Address _____ City _____</p> <p style="text-align: center;">A Bill on the Merit</p> <p style="text-align: center;">Name _____</p> <p style="text-align: center;">Regt. _____</p> <p style="text-align: center;">Company _____</p> <p style="text-align: center;">Date _____</p> <p style="text-align: center;">Book No. _____</p> <p style="text-align: center;">Title _____</p> <p style="text-align: center;">Author _____</p> <p style="text-align: center;">Editor _____</p> <p style="text-align: center;">Publisher _____</p> <p style="text-align: center;">Price _____</p> <p style="text-align: center;">Date of Issue _____</p> <p style="text-align: center;">Date of Receipt _____</p> <p style="text-align: center;">Date of Return _____</p> <p style="text-align: center;">Date of Issue _____</p> <p style="text-align: center;">Date of Receipt _____</p> <p style="text-align: center;">Date of Return _____</p> </div>	<p style="text-align: center;">TAKING MAGAZINES</p> <ol style="list-style-type: none"> 1. Take your choice of Magazines from shelf below, 2. No record is kept for Magazines 3. Bring Magazines back in a few days and put on shelf.
<p style="text-align: center;">ASK FOR WHAT YOU DON'T SEE</p> <ol style="list-style-type: none"> 1. On side of this Bookcase are Pencil and Paper. 2. If you want any Book or Magazine, or a book or information on any subject, just fill out a slip and drop it in Card-Box and Library will see that you get it. 		

The library stations are in most cases in the shape of traveling book boxes, containing from 50 to 75 books, and the books travel with the boxes, in order to avoid unnecessary records of the exchange of individual volumes. The book boxes have been designed so that the soldiers can charge their own books by the "honor system," and are placed in company mess halls or barracks where the soldiers can get books at any hour of the day or evening. The soldier selects his books, and on the front of the bookcase finds a large placard instructing him how to charge them. He takes out the bookcard, writes his name, and drops the card thru a slot. When he returns the books, he drops the book itself into a closed box. When the company monitor finds time to attend to the library,

As such methods are impractical in a public library, so they proved impractical in the Camp Libraries. Technical books that retail for \$3.00 or \$4.00 each, can hardly be placed on the shelves without being listed or cataloged, nor be lent from the building without some probability of their return. Many men may be waiting for the same book. The necessity for some arrangement of the books, some record of what books are in the library, and some note of who has a book and when it is due, is therefore essential. The three-place decimal classification is now used for all non-fiction. Each camp library also keeps a shelf-list and author catalog of non-fiction. As for fiction, this of course has not been classified, nor have any call numbers been assigned. At first it was thought

that no list of fiction would be needed. But as the problem of duplication of copies and their distribution and transfer from one point to another in the same camp developed, it became clear that at least a shelf-list of fiction would be required, and most of the camps have arranged for this.

In short, any approach toward red tape has been made only after a thoro trial of the simpler methods, or lack of method. It has been interesting to discover that these developments are due entirely to actual demands occasioned by the needs of the soldiers who use the libraries.

VISITS AND CONFERENCES

During the month of March the chairman of the A. L. A. War Service Committee, J. I. Wyer, Jr., made a tour, mainly in the South and Middle West, of about half of the thirty-seven large camps which are now provided with fully organized camp libraries. For part of this tour he was accompanied by Dr. Herbert Putnam, the general director of the A. L. A. Library War Service.

At Waco, Texas, on Mar. 20, a conference of camp librarians was held in the Waco Public Library, all arrangements for which had been made by Miss McCauley, its librarian. Librarians of the public and university libraries in the neighborhood were also present.

Dr. Frank P. Hill, of the War Service Committee, started Apr. 20 on a tour of the southeastern camps. Such visitations are of great value, both to the camp libraries visited and to headquarters.

HOSPITAL LIBRARIES

The base hospitals at the following camps now have librarians attached to their staffs: Camp Devens, Ayer, Mass.; Camp Gordon and Fort McPherson, Atlanta, Ga.; Camp Upton, Yaphank, N. Y.; and Camp Wadsworth, Spartanburg, S. C. The librarians are in most cases living at the hospitals.

At Camp Devens the hospital authorities have granted the A. L. A. the use of a room 30 x 60, which is being attractively furnished with rugs, wicker chairs and low bookcases. Eventually a fieldstone fireplace

is promised. E. Kathleen Jones, librarian at McLean Hospital, Waverley, Mass., is organizing the work at Camp Devens and reports the heartiest co-operation on the part of the medical staff and the Red Cross.

Miriam E. Carey of St. Paul, Minn., who is organizing the work at Fort McPherson, reports that Col. Bratton has given the hospital library the use of a large room in the post exchange as its "headquarters" and has furnished a tea wagon to be used in delivering books to the wards.

Ola M. Wyeth, from the University of Illinois Library, who is in charge at Camp Wadsworth, writes: "My visit to the wards continue to be popular and the officers have even taken to sending for me at odd times when they run out of reading matter. I like that as an appreciation of the system. The boys in the wards are growing more particular about the choice of books and it seems to me I will never be able to supply the demand for books of adventure."

A ward master in the Base Hospital at Camp Upton wanted a Rabbi to have a look at a Jewish patient who he thought was rather peculiar—possibly out of his head—because he clung so tenaciously to an old newspaper. Upon investigation, the Rabbi found that this Jewish boy, quite bewildered, since he could neither speak nor read English, for ten days had had nothing to read but an old Yiddish paper, and was nearly beside himself for want of mental occupation. The Rabbi called upon the hospital librarian, Katherine Tappert, who, altho there was but little of Hebrew and Yiddish on the shelves, was able to provide some suitable material and to do for the patient what the doctors could not do.

The hospital libraries in the large camps will be administered as branches of the main Camp Library. Books will be supplied to them from the Camp Library collections, but, in addition, books especially suited to hospital needs will be purchased.

The principal work of the hospital librarian is to make the connection between the man and the book. She must reach the man with the book that he needs, and the reports from the women already at work indicate that this thought is clearly before them.

WAR SERVICE COMMITTEE MEETS

A meeting of the War Service Committee of the American Library Association was held at the New York Public Library, at 10 a. m., Apr. 4, 1918, with the following members present, being a quorum of the committee: J. I. Wyer, Jr., E. H. Anderson, F. P. Hill, C. F. D. Belden and W. H. Brett; Thomas L. Montgomery, president of the American Library Association, Herbert Putnam, general director of the War Library Service, and R. R. Bowker, editor of the LIBRARY JOURNAL, were also present.

Among the matters of interest brought before the committee and items of business transacted were the following:

Finance Items. Chairman Wyer submitted the monthly finance statement for Mar. 30 from the American Security and Trust Company, showing assets in cash and securities aggregating \$755,531.46; also statement, Apr. 1, from William L. Brown, disbursing officer for the Library War Service, showing unexpended balance in his hands of \$358,868.58.

The chairman further submitted copy of report from Arthur L. Bailey, chairman of the A. L. A. Finance Committee, as made to the Executive Board of the association, showing that in accordance with the recommendation of the War Service Committee of Dec. 29, 1917, his committee had audited the accounts of the War Finance Committee. This report was accompanied by detailed statements from the chairman of the War Finance Committee covering receipts and expenditures in the various funds handled by this committee and which were the subject of the audit.

Sales of Undesirable Books, Magazines and Newspapers. The committee, taking under consideration the sale of undesirable books, magazines and newspapers, which has been in vogue from the outset, but which has never been formally authorized by the committee, voted that any sums realized from the sales of unavailable books, magazines, or reading matter, whether gift material or other, should either be turned over to treasurers of local campaign committees or be accounted for directly to the treasurer of the A. L. A.

Visits to Camp Libraries. The chairman reported that he had visited sixteen camps and camp libraries Mar. 8 to 29, and that twenty-one different camps where there are library buildings have already been visited by members of the War Service Committee and five additional camps by the General Director. It was voted that as many of the additional camps as practicable should be visited by the chairman or some other member of the War Service Committee designated by him between this time and the A. L. A. conference.

Use of Enlisted Men. The secretary laid before the committee a letter from a certain librarian stating that in his opinion there are more than enough competent librarians now in military service to take care of the camp libraries without drawing on the A. L. A. funds, and that to obtain their service a government order from the War Department should be applied for.

As this letter touches the policy of the War Service Committee in constituting the personnel of its war library service it was unanimously recorded as the sense of the committee that any application to the War Department such as this communication would imply, would be quite unwarrantable, as would any request for such continued services of enlisted men as is likely to interfere with their military preparation or duties.

Overseas Service. There were laid before the committee and read in full two detailed reports (Jan. 21 and Feb. 26, 1918) by M. L. Raney on the conditions affecting its overseas service in Great Britain and France.

CAMP LIBRARIANS MEET IN TEXAS

The librarians of the Southern group of camps met in conference at Waco, Texas, Mar. 21. J. I. Wyer of the New York State Library, representing the Washington headquarters of the Library War Service, presided. The following camp librarians were present: Winthrop Chenery, Camp Pike; S. A. McKillop, Camp Beauregard; J. F. Marron, Camp Travis; W. R. Watsabaugh, Camp Logan; Earl N. Manchester, Camp Cody; H. T. Dougherty, Kelly Field; L. L. Dickerson, Camp Doni-

phan; Irving Bundy, Camp Bowie; Joy E. Morgan, Camp MacArthur. Other persons interested were present and took part in the conference. Among these was W. R. Raymond, supervisor of educational work for the Y. M. C. A. in the Southern camps. Mr. Raymond stated that at every point in all the camps he visited he found the American Library Association energetically at its work and ready to co-operate with all other agencies in camp. He was especially pleased with the effectiveness and cordiality of the co-operation between his organization and Library War Service. Everyone present felt that Library War Service is the biggest opportunity that has been presented to the library forces of the nation and that the librarians in all parts of the country are rising to meet that opportunity in a way that will make a large contribution toward the winning of the war. Mr. Wyer brought many useful ideas and much inspiration into the conference and the general exchange of ideas gave each one present a better grasp of the work to be done.

SPECIAL ACTIVITIES AT CAMP DEVENS LIBRARY

The Camp Devens Library is so built that it permits of the use of part of it for lectures without disturbing the other. The building is the trifoil or cloverleaf plan, and in the ell at the rear of it is a fireplace, with adjacent settles, and roomy comfortable round tables. For lectures and talks around the hearth stone, chairs are quickly placed in the open spaces and the lights turned out if a lantern is to be used, and the rest of the building goes on with its service to readers and book borrowers.

Professor Louis Bliss Gillet, formerly of Wesleyan University, now at Columbia, spent a week at the library and read at the fireplace each evening. He considered recent war poetry in comparison with that written at the beginning of the conflict, treating of poems of Robert Nichols and Siegfried Sassoon in contrast to those of Rupert Brooke and others. He read also essays and book résumés and discussed books and reading with the men informally, going from shelf to shelf with groups of men.

J. Randolph Coolidge, Jr., of Boston, gave a course of six "Talks on France" illustrated with lantern slides and photographs, on Wednesdays and Saturdays from Apr. 6 to Apr. 20. The subjects of the talks were: 1. The outward appearance of France in ordinary times, scenery, roads, streets and buildings; 2. The finest buildings in France, outside and inside; 3. The statues and sculpture of France and French taste in design; 4. French painting and painters, French pictures in this country and "over there"; 5. Prominent Frenchmen of to-day, statesmen, soldiers, artists, writers. Accompanying the lectures exhibits of large photographs loaned from the Children's Museum of Boston, were arranged on the walls of the library, and men studied them with care and interest. A satisfying result of the talks is the drawing of books on France and a sympathetic interest in such things.

An army order from Washington has required every officer to file in the Intelligence Office two photographs of himself. Bachrach Studios received the commission at Camp Devens to make portraits of each officer. The librarian accepted the suggestion of the Division Headquarters that the sittings be made in the library because of the superb publicity. Several hundred of officers will come to the building, and experience to date has shown that the building has made its appeal to those who have come for the first time so satisfactorily that they will come again and again. And this means that the men will come under officers' direction. The largest day for attendance so far is 1134, not including 193 officers, which is a count and not estimate.

THE BEGINNINGS OF A BASE HOSPITAL LIBRARY

From Ola M. Wyeth, who has been appointed hospital librarian at Camp Wadsworth, comes this fine letter on her work there, which will be read with a great deal of interest by the women of the profession, from whom the librarians for the hospitals will be recruited:

Now that a precedent has been established and women are being admitted to the camp libraries and base hospitals, it may interest

some prospective workers to know something of the life in one of these places.

Camp Wadsworth is near Spartanburg, S. C., and is located in what was once a pine forest. Many of the trees have been left standing, thus softening the effect of crude new buildings and the general air of barrenness. Another fact which tends to lend picturesque quality to the camp is that most of the enlisted men live in tents. These harmonize with the surroundings and are especially fascinating at night to one standing on a prominence and looking down upon their canvas tops glowing from the reflection of the lights inside.

The particular section in which the library and hospital are located, however, is covered with one-story wooden buildings devoid of paint and uncompromisingly plain in outline. The library, with its neat little building all freshly painted and wearing an air of permanence, is a pleasant contrast to its neighbors. I need not describe it, as you have all seen pictures and heard descriptions of camp libraries and this one is very similar to the others.

The base hospital is not one building, but a group of buildings and that group is being added to as fast as carpenters can work. Each ward is a separate building, the whole group being connected by a covered runway. As there are at present thirty-six wards, besides the administration offices, quarters for nurses, medical officers and medical detachment, operating room, dental clinic, mess hall and post exchange, chapel, morgue, and many other smaller offices, you can see that it covers a vast amount of space. There are about eight hundred patients at present, with the number bound to increase with the approach of warm weather; about one hundred nurses and more arriving every few days; three hundred medical detachment boys and a demand for as many more, and about seventy physicians and surgeons. I am giving these statistics to show the number and type of the patrons of the library.

Technical books for the physicians and surgeons are supplied by the Surgeon-General's Office, while the New York Medical Library and the Library of Congress will loan books and magazines not so secured for short intervals. The nurses have been supplied with a few books on their specialty which have been very helpful in organizing among the medical detachment a class on the rudiments of nursing. As for the rest of the collection, it is being compiled on the same basis as that of the Main Library—a few representative books on all sorts of subjects, with special reference to the needs and desires of our special classes of readers.

Until the Red Cross building is finished, the library headquarters are in the chapel. It is not so conveniently located as I might wish,

as my nearest neighbor is the morgue, but it does very well as a makeshift. Owing to a shortage among the detachment men, I am still without shelving or tables, so cannot make this into a very satisfactory reading room, but it is my intention to do so as soon as possible. However, my most eager readers are not able to come to the library and to them, the men in the wards, I carry the books and magazines and am always sure of a warm welcome.

The need for work of this sort has been felt most keenly. Testimony to that effect comes in from all sides. An ex-patient said to me one day: "Gee, when I was sick over there we were tickled to death to get a magazine six months old." The librarian at Spartanburg has told me of the men who have come to her and voiced the need for books at the hospital. The first day that I visited the wards the men were incredulous and hesitant about availing themselves of the privilege offered. Some of them timidly asked me how much it cost. Now they waylay me as I walk along the runways, ask me how soon I am coming to their ward, request certain books, etc. I am busy with my note book taking down their suggestions a good deal of the time. Before visiting the Officers' ward the first time I wondered whether they would appreciate my coming, and went in with a distinct feeling of timidity. I have since been reassured, for my weekly visits are not enough for them and they send for me on an average of three times a week.

And now I would like to take my readers on a visit around the wards. I have not yet been provided with a book cart, principally because the kind suitable for this work will have to be made to order. At present, I am using the food cart between hours and have an orderly to push it. We start out with about seventy-five books and a bunch of magazines and usually circulate from thirty to fifty books in two hours, altho one day we distributed seventy. We can visit about five wards in that time. As the food cart is too big and too noisy to take into the wards, we stop at the door and fill our arms with reading matter.

The ward is a long, narrow room with fifteen or twenty beds on either side. Near the door is a large, round stove and around it several chairs. The men not confined to their beds are usually grouped there, especially if the weather is a little cool, some playing cards, some trying to match the pieces of a picture puzzle, and perhaps a few knitting. I deposit my books on a nearby table and these men gather around and choose their books. "Have you got any of Zane Grey's books to-day? Did you ever read the 'Riders of the purple sage'?" Say, that is the best book ever written." "What adventure stories have you? I can't get interested in anything unless it is exciting," says another. This is

the popular clamor and I can never supply the demand for books of this type. Stories of the war always prove popular, and the more serious books on that subject always arouse interest. "Is it true?" asked one man on picking up Belloc's "Elements of the Great War. "That's what I want. Something true."

We leave this group and approach the first bed patient. He announces that he wants a story, but on looking at our stock is quite as apt to choose some biography or book of travel. Poetry appeals to some. One man had been taking out a different book of poems each time that I came. "You seem to like poetry," I said. "That's my business," he answered. "I write poetry for the magazines and I like to read somebody else's poetry once in a while." He has promised to compose some for me before my next visit. Another man has become so attached to Stedman's "Victorian anthology" that he renews it each time that I come. He would like to own a copy, but \$2.00 makes a pretty big hole in a private's salary.

Now and then some one will ask for a book along his line of business, such as advertising, telegraphy, etc., and others are much interested in learning more about the great business they are engaged in at present. Often they like to chat over the books they have read and are my best advertisers. One afternoon I piled my books on the foot of one bed and its occupant interested all his neighbors by giving a synopsis of nearly every book that I had.

It is interesting to note the type of men who read the best things. One is often surprised. One quiet, refined lad who spoke of his library at home, and seemed thoroly acquainted with all the better writers, proved to be a vaudeville actor from Broadway. Another, who seemed to particularly enjoy my visits and who discussed modern English novelists and the leading poets of the day with an amazing aptitude, was none other than an ex-prize fighter and was in the prison ward because he would not submit to discipline.

There are a few who have been ill a long, long time and grow morbid and need cheering up. What better method can be imagined than to supply them with wholesome reading? "I don't want to impose on you," said one patient of seven months' standing, "but you don't know what these books mean to me." I furnish him with about six books a week.

There are a few who have been ill a long, permit them to read. I am trying to interest the convalescent boys in reading aloud to them, and when I get a little time I read them a story myself. There are quite a few who do not know how to read. To them, especially, the scrap books give infinite delight, tho, indeed, all the men love them.

To the contagious wards, we send many magazines and the more worn books, which are to be burned eventually.

The work is still in its infancy, but new possibilities are opening up constantly. We are to have a pleasant and commodious room in the Red Cross building and when we are installed there perhaps I can write a fuller and better description of library work in a base hospital but I have endeavored to show you what we are doing now and what are some of the satisfying phases of work of this kind. I would like to add one word more about the attitude towards women in this particular camp. The fact that the nurses are here, makes the presence of the librarian perfectly natural. I have served at the loan desk in the camp library several times and the men have not seemed any more surprised than if it were an ordinary public library. Everywhere, the women in camp are treated with the greatest consideration and courtesy. We are welcome at the Y. M. C. A. entertainments, the Liberty tent, etc., and the greatest freedom is given us. It is no sacrifice to do camp library work so far as I have experienced it, but a great privilege.

LETTERS FROM THE CAMPS

Camp Zachary Taylor, Kentucky

From Camp Taylor George T. Settle, the camp librarian, writes:

Library work at Camp Zachary Taylor is progressing favorably. We have on the shelves at the central library and branches in the Y. M. C. A., K. of C., Salvation Army, Base Hospital, etc., 15,696 volumes, with a total circulation of 10,266. Of this 3,081 volumes were circulated at the main building. Our records show that 70,502 soldiers used the library during the month. This included Gen. Harry C. Hale, in command, Gen. D. B. De Vore and other officers.

The Burleson magazines were turned over to the library to be assorted and distributed on March 20, by Gen. Hale in command.

Raymond J. McCoy of the Cincinnati Public Library was transferred to Fort Oglethorpe on Feb. 10 and George L. Lewis, librarian of the Atheneum Library, Westfield, Mass., has been with us since Mr. McCoy left.

A branch was opened in the Y. M. C. A. building at the Remount Station the day it was completed, and the day the soldiers reported at the heavy artillery camp at West Point, twenty miles south of Louisville, books and magazines were there for them.

One of the interesting parts of camp library work is with the soldiers at the base hospital. We are arranging to open a library with a trained assistant in the Red Cross building just as soon as it is completed. This work is in the hands of a committee appointed by the camp librarian, with Mrs. Cale Young Rice in charge. Mrs. Rice's reports on the work there are most interesting. Her committee visits the base hospital two or three times each week. Each bed is visited and

library books and magazines, and scrap books are left with the men. In addition to this, the ladies write letters for the sick and give them delicacies, fruit, etc.

Our campaign for books in Louisville was most successful. By actual count we have received at the Main library more than 15,500 volumes, with the three high schools, six branch libraries and several large department stores and a theater yet to send in their report. We estimate that we have collected more than 20,000 volumes. In addition to library work at Camp Zachary Taylor there are two large soldiers clubs in the city. In giving books, a great many are named for this purpose. Several thousand volumes have been received but we do not count them in our report.

PERSONNEL

The organization of a personnel file of possibilities for the camp library service has been progressing at headquarters during the past month. A circular letter was sent out to Library Schools, State Commissions and the larger libraries, asking for suggestions of men and women who might be available for this work. As names came

in, an application blank, which had been carefully prepared to bring out a maximum of information, was sent to each person suggested, and the applications have been indexed by subject; so as to yield instantly information, for example, as to who have applied for hospital libraries, who live in the southwest, who could begin work at once, go anywhere, serve for any length of time, for expenses only, or for any given salary, etc., etc.

There is now at hand a file of applications from over two hundred men and women, who can be drawn on as vacancies occur. The need is still great for more men, capable of taking charge of camp libraries or assisting in them, and many personal letters have been sent, or are by way of sending, to librarians who have not yet volunteered or been drafted into the service.

Recent appointments for Camp Library work, not hitherto recorded, are the following:

National Guard Camps

Camp Beauregard, Alexandria, La.....	Wm. Marzolf, assistant.
Camp Bowie, Ft. Worth, Texas.....	Elizabeth Eckel, assistant.
Camp Cody, Deming, N. M.	Wm. H. Powers, librarian.
Camp Greene, Charlotte, N. C.	John R. Johnston, assistant.
	J. M. Karper, assistant (transferred from Camp Lee).
Camp Hancock, Augusta, Ga.	Kate D. Ferguson, assistant.
Camp Logan, Houston, Texas	Lois L. Watsabaugh, assistant.
Camp McClellan, Anniston, Ala.	Ely Nelson, assistant.
	Ernest L. Johnson, assistant (transferred from Camp Shelby).
Camp Shelby, Hattiesburg, Miss.	Wm. Blair, assistant (transferred from Camp McClellan).

National Army Camps

Camp Devens, Ayer, Mass.	Kathleen Jones, library organizer at Base Hospital.
Camp Dix, Wrightstown, N. J.	H. B. Van Hoesen, librarian.
	Henry N. Bowman, assistant.
Camp Dodge, Des Moines, Ia.	Harley W. Chandler, assistant.
Camp Funston, Ft. Riley, Kans.	L. E. Fitts, assistant.
Camp Gordon, Atlanta, Ga.	Miriam E. Carey, library organizer at Base Hospital.
Camp Grant, Rockford, Ill.	Chas. F. Zak, assistant.
Camp Lee, Petersburg, Va.	Gladys D. Nicholas, assistant.
	Robert R. Green, assistant.
Camp Lewis, American Lake, Wash.	Ellen G. Smith, assistant.
Camp Meade, Admiral, Md.	G. F. Bowerman, librarian.
Camp Sherman, Chillicothe, Ohio	Gordon W. Thayer, acting librarian.
	C. A. Read, assistant.
	H. C. Leidigh, assistant.
Camp Upton, Yaphank, N. Y.	Katherine Tappert, library organizer at Base Hospital.

Other Camps

Kelly Field, San Antonio, Tex.L. A. Sandusen, assistant.
 Camp Merritt, Tenafly, N. J.John O. Oliver, assistant.

Naval Station

Camp Perry, Great Lakes, Ill.M. S. Dudgeon, librarian.

Matthew S. Dudgeon, secretary of the Wisconsin Free Library Commission, has been given leave of absence to serve as camp librarian at Camp Perry, Great Lakes, Illinois, beginning Apr. 1.

Henry B. Van Hoesen, assistant librarian of the Princeton University Library, has been given leave of absence thru April and May to serve as camp librarian at Camp Dix, Wrightstown, N. J.

William H. Powers, librarian of the South Dakota State College Library at Brookings, S. D., has been given leave of absence to serve as camp librarian at Camp Cody, Deming, N. M., beginning Apr. 20.

Sophie K. Hiss, of the Cleveland Public Library, is associated with W. H. Brett in the work of the A. L. A. Dispatch Office at Newport News, Va.

Charles E. Rush, librarian of the Indianapolis Public Library, has been given leave of absence for Library War Service at headquarters. He will give some attention to publicity and to the work in smaller camps and stations.

Eleanor Gleason, librarian of the Mechanics' Institute Library, Rochester, N. Y., has joined the staff at headquarters.

C. O. S. Mawson, editor of the new atlas issued by Doubleday, Page & Co. last year, has been sent to the dispatch office in Hoboken to assist Mr. Dickinson. Miss Bucknam of the Queens Borough Public Library succeeded Miss Tyler in that office during April.

Helen E. Vogleson of the Los Angeles County Free Library went to Camp Kearny Mar. 20 to take charge of the library during the absence of J. H. Quire. She will stay at least a month assisting with the organization after Mr. Quire returns. The Los Angeles County Board of Supervisors has authorized Celia Gleason, librarian, to schedule the staff for special duty at Camp Kearny as needed.

THE DISPATCH OFFICE AT NEWPORT NEWS, VA.

It was a fertile field which faced the workers of the A. L. A. Dispatch Office at Newport News. The embarkation headquarters at this point have gathered in the vicinity thousands of soldiers and sailors who throng the camps and naval bases. A survey of the community at once uncovered wonderful opportunities for service.

Special lines of government work are in progress at the two large aviation camps—Morrison and Langley Fields, and these create a real need for books on technical subjects. Camps Stuart and Hill, which correspond to cantonments at other points, house thousands of soldiers, and the large base hospital at Camp Stuart has hundreds of patients, all of whom need books. There is an equal demand for reading matter for men in the Navy. Already over 3000 volumes have been asked for by the great naval base at the old Jamestown Exposition grounds. Battleships, patrol boats and naval training schools are asking for libraries.

The work of the Dispatch Office must answer the demands from the men in khaki and the men in blue who are waiting at this point for orders to go to France. And it must also answer the urgent call for books which comes from overseas.

An unique opportunity for service came last week when a captain coming into this port told of a wireless message he had received from a passing hospital ship. They had "signaled for books" and needless to say a case was soon made ready so that when this captain makes his return voyage he may leave with the patients on this hospital ship a well selected library.

Books for camps and naval bases are being housed by the Y. M. C. A., whose workers are looking after the circulation at present. The organization of the library work at this point is similar to that of a

central library and its branches. A library building is under way at the Embarkation headquarters in the town of Newport News. From this center the distribution will be made to the outlying agencies and shipments prepared for overseas.

ILLINOIS LIBRARY CO-OPERATION WITH FOOD ADMINISTRATION

Following up the article by O. E. Norman on the "Libraries' part in the first food exhibit," further account of the work of the Illinois library publicity committee is furnished by George A. Deveneau, publicity director.

A series of Library Letters have been prepared and sent thruout the state. The response of the Illinois librarians to the appeal of the Federal Food Administration has been most encouraging, and, as a result, not only have the librarians secured really adequate collections of books and pamphlets on the general subject of food, but they have succeeded in bringing this literature to the attention of their public.

"In co-operation with the local Woman's Committee of the Council of National Defense, the Farm and Home Advisors of the Agricultural Extension Service of the University of Illinois, and the high school teachers of art, domestic science, and agriculture," writes Mr. Deveneau, "the libraries have held food shows and other exhibits that have attracted many people to the library who had never come to the library before.

"At Freeport, Ruth P. Hughes, the children's librarian, who was placed in charge of this food work by Harriet Lane, the librarian, planned and carried out a food show which brought to the library four thousand people within the week, to see the instructive exhibit. Miss Hughes, with the assistance of May Davenport, the Freeport high school librarian, and of the school superintendent, conducted a poster contest before the food show was held which aroused the interest of the whole community. At the time of the food show a conference was held in the library of all of the county representatives of the Woman's Committee of the Council of National Defense, and lecturers from the University

of Illinois, the Woman's Committee, and the Food Administration gave a series of instructive talks. Alma Kruse, the high school domestic science teacher, with the assistance of her classes, prepared the food exhibits at this food show.

"The excellent work which was done at Freeport has been duplicated by the librarians of Joliet, Decatur, Bloomington, Evanston, Gilman, and over thirty other Illinois towns.

"A word regarding the organization of our State Library Publicity Committee may be of interest to you. The committee consists of the following persons, who, in turn, are in charge of sub-committees: Jane P. Hubbell; Lydia Margaret Barrette, chairman of the sub-committee on food production; Anna May Price, chairman of the sub-committee on library conferences; Jessie M. Woodford, chairman of the sub-committee on food shows and exhibits; Marcus Skarstedt, chairman of the sub-committee on library publicity; and Prof. John Edward Lake, head of the department of art and design of the University of Illinois, chairman of the sub-committee on food posters.

"In our work we have secured the co-operation of the Art Institute of Chicago, students of which have designed a very remarkable series of food posters, photographs of which we can send you; of the University of Illinois; of the Drama League of America, and of other agencies.

"The work which is being done in Illinois is, as you doubtless know, only part of a nation-wide movement, and the library publicity directors of Washington, Oregon, New York, New Jersey, Pennsylvania, and many other states are doing work of great interest and significance."

A SMALL-TOWN FOOD CONSERVATION EXHIBIT

In the Public Library at Dalton, Mass., a very successful food production and conservation exhibit was held Mar. 15, both afternoon and evening, with an attendance of 275.

Dr. Anna Wood, assistant to the food administrator for Berkshire county, presided at the afternoon meeting, and introduced Mrs. R. H. Brown, executive secre-

TWO OF HOBOKEN'S FORMER SALOONS NOW SERVE AS HEADQUARTERS FOR THE A. L. A. DISPATCH OFFICE.
A THIRD SALOON ACROSS THE STREET IS USED FOR STORAGE PURPOSES

tary of the food department of the Women's Municipal League of Boston, who gave a most instructive talk on "The mechanism of food conservation."

Miss M. L. Turner, manager of the Liberty bread shop of Boston, talked of her work and gave many valuable war recipes. Samples of her liberty breads were passed about for the audience to taste. After Miss Turner's talk she demonstrated the making of her breads and muffins.

F. G. Crane, county food administrator, presided at the evening meeting. Miss Turner spoke again on all substitutes for wheat flour. The meeting was open for discussion and for an hour and a half it was most interesting and instructive.

The library was most artistically decorated for this occasion with potted plants and spring flowers everywhere. Two exhibits were of particular interest. One showing the value and necessity of use of corn, was built in by the fireplace, using a large picture of Uncle Sam as a center piece, and surrounding it the various articles into which corn enters. The other illustration was used to convey the importing of various products by means of railroads and showed that only by the co-operation of everyone is the road to victory open.

The local food display was most interesting. Twenty-five people sent in breads, cakes and muffins made with well-tried recipes, these recipes being attached. This exhibition was held in the junior room of the library.

On a table at the entrance to the rooms was placed a grain grinder to show that grains ground at home are a great saving. The grains exhibited were wheat, barley, corn, soy bean, buckwheat flour, etc. A lightening butter machine was also exhibited showing the saving of 45 per cent of the butter bill.

Thru the courtesy of the Free Public Library Commission, the Women's Municipal League and Amherst Agricultural College and the U. S. government, many free recipes and pamphlets of information were distributed.

PROMOTING THE SALE OF THRIFT STAMPS

"On to Berlin" is the slogan by which the Sioux City Public Library stimulates

interest in the sale of thrift stamps to children. Colored maps of the war zone have been conspicuously posted at the Main Library and all the branch libraries, and miniature white flags fashioned and placed with the purchaser's name on the first of sixteen trenches which surround Berlin. With each succeeding stamp purchased the child's flag is advanced a trench until with the sixteenth, Berlin is reached.

With each Baby Bond a star or stripe is placed upon the flag until eventually the white flag is transformed into an American flag.

The children have received the idea with much enthusiasm. The maps are being rapidly covered with flags of the many contestants, all of whom are intent upon reaching Berlin first. No child is satisfied until he carries an American flag to Berlin.

The Sioux City Public Library is an authorized agency for the sale of thrift stamps.

OTHER FORMS OF SERVICE

Binghamton Public Library

The library's report gives the following outline of war service:

Local newspaper card index of all war activities in Broome county.

Card directory of all war service organizations in Broome county.

Poster Collection—Permanent file of war posters (Army, Navy, Liberty Loan, Red Cross), programs, etc., for every branch of the service.

Arrangement of Books by Special Subject—Aviation (magazines, technical books); food (posters, free U. S. Dept. Agriculture pamphlets); Red Cross (magazines, books on hygiene, class study); war manuals (technical books); War in Europe (history, narration, etc.).

Maps—Large wall maps, maps for circulation, table maps for reference.

Bulletin Boards—Changed weekly. Liberty Loan, Food Conservation, local notes, war recipes, portraits.

Books and Magazines to Cantonments—Public co-operation thru press and pulpit.

Documents—Bureau of Information Washington, D. C., furnishes, free, documents covering all phases of the war; docu-

ments issued by foreign governments on file for reference use.

Advertising—Lantern slides shown in motion picture theaters; local newspapers.

Connecticut State Library

Following the taking of an automobile census of Connecticut in the spring of 1917, the work of conducting the state military census and the state agricultural survey was turned over to the State Library. All blanks are returned to the library where the data is compiled and the records preserved. The agricultural survey, besides giving personal data for each individual, records the area of the land owned or rented and its availability for crops, timber, or pasturage; itemized reports on the crops harvested in 1917; an estimate of the crops planned to be harvested in 1918; the supply of livestock and machinery on hand; and the number of employes.

The military census, besides the usual blanks for men and women, has a revised blank for the registration of individuals who have had nursing training or experience. The report on the nurses and nursing resources is printed as a public document.

Riverside, California, Public Library

For winning the war the Riverside Public Library and the Riverside Library Service School have organized in the following manner:

The school and the staff have an association known as the Riverside Library League, which is also the War Savings Society. Joanna Gaylord, 1918, is the president, and Nelle M. Bate, 1918, is the secretary. This league has volunteered to do all the record work for the Riverside War Relief Council, which has charge of all the money raising campaigns and is organized over both county and city. The Council is preparing a very thoro directory and record of all persons who contribute either money or services. The record goes into details and a part of the record will be useful for a survey of alien enemies. It will become also a source of genealogical and biographical reference in years to come. After the war has been won the whole record will be deposited in the Riverside Public Library as in a department of

archives. There has been given over for the use of the Council one section of the reading room (about 20 x 40 ft. of floor space), the whole of the map room, and all of the bindery. During a campaign the Council has an organization of more than two hundred workers; more than a dozen typewriters are in use and more will be added.

The new aviation camp situated at Alesandro has been named March Field. It is nearly ten miles from the center of Riverside. The Library League is making plans for branch library service at March Field, another branch at the Soldiers' and Sailors' Club in the city of Riverside, and such other stations as may be needed for the enlisted men and civilian employes.

The general entertainment committee of the Riverside War Camp Committee Service will be assisted by the Library League and Lillian Dickson, reference librarian, is chairman of one of the committees having such matters in charge. It is planned to have the course in story-telling completed at an early date so that a number of the 1918 class may be ready to tell stories to soldiers as a part of the entertainment plan.

The librarian is a member of the executive committee service which assumes the work assigned by the Fosdick Commission.

Co-operative Advertising in Detroit

The display shown in the window of the City Gas Company of Detroit, Mar. 14-25, was planned by Mr. Brewer, a young man in the advertising department of the Detroit City Gas Company, who also urged all members of the Detroit Display Men's Association to co-operate in the book campaign. Only a few hundred books were collected at this company's office, which is not on a main street, but all the branches of the library must have received books as a result of this window display because the addresses of the branches were given on a poster in the middle of the window. Surmounting the globe with its motto, "Our boys are 4000 miles from home," was the slogan, "No books too good for a soldier," and the books shown from the camp library supply were suggestive of titles that would be suitable and acceptable.

CARNEGIE LIBRARY GRANTS, FEBRUARY AND MARCH, 1918

THE following library grants were made during the months of February and March by Carnegie Corporation:

ORIGINAL GIFTS, UNITED STATES	
Jennings County (North Vernon), Ind.	\$20,000
Lowell Town, and Cedar Creek and West Creek Townships, Ind.	12,500
	\$32,500

INCREASES, CANADA

Tilbury, Ont. (to cost \$7000)	\$2,000
-------------------------------------	---------

The following resolution was adopted by the trustees of Carnegie Corporation at their meeting held Nov. 7, 1917:

Inasmuch as every dollar spent on erecting public buildings or private dwellings, which are not strictly necessary or do not contribute to the efficiency of the country in the prosecution of the war, reduces by the amount of such expenditure the resources of the country in money, in material and in skilled labor, besides tending to enhance the cost of these latter, it was

Resolved, That no new applications for the erection of library buildings will be considered and that further allotments for the erection of library buildings while the war lasts will be made only in cases where correspondence has already advanced so far as to imply a decision on the merits of the case.

A CONVENTION to consider the standardization of trade catalogs is to meet in the Hotel La Salle, Chicago, May 22. This convention is in charge of a special committee of the National Association of Purchasing Agents, which has already taken the matter up with 575 associations representing various industries and trades, and 287 trade paper publications. After adopting one standard size for catalogs, it is proposed to have a standardized file for their storage, and catalogs which fit this file will have the best chance of preservation. The size $7\frac{1}{2} \times 10\frac{5}{8}$ inches is suggested as being peculiarly suitable for a standard catalog, and the suggestion is made that letter heads also be made to conform, so that typewritten data may be filed with the catalogs. This standardization of catalogs will also make possible considerable economies in printing charges.

EXAMINATION FOR COUNTY LIBRARIANS

THE next examination to be given by the California board of library examiners under the county free library act of 1911, will be held at Los Angeles on June 7-8 and at Sacramento June 14-15, for those wishing to qualify for the position of county librarian. This examination will be given to eastern librarians on the same terms as it is given to residents of California, tho one unfamiliar with the conditions and peculiarities of California counties might in the beginning enter the service with a certain handicap. Full information will be sent those who may be interested in the examination, if they will apply to Milton J. Ferguson, state librarian and chairman of the board, State Library, Sacramento, Calif.

U. S. CIVIL-SERVICE EXAMINATION FOR LIBRARY ASSISTANT

THE United States Civil Service Commission announces an open competitive examination for library assistant, for both men and women, on May 22 and June 19, 1918, in various parts of the country, for vacancies in the Departmental Service at Washington, D. C., or elsewhere, at \$900 to \$1200 a year, or higher or lower salaries.

Competitors will be examined in the following subjects, which will have the relative weights indicated: Library economy, (30), cataloging, classification, and bibliography (35), German, and either French or Spanish (10), and education and experience (25).

At least one year's training in a recognized library school or one year in a training class in a library using modern methods and one year's experience, or three years' experience in a library using modern methods, is a prerequisite for consideration for this position.

Applicants should apply for Form 1312, stating the title of the examination desired, to the Civil Service Commission, Washington, D. C., or to the local secretary of the United States Civil Service Board.

SERVICE IN MEMORY OF WINONA MARTIN

A SERVICE was held in the Rockville Centre Club in Rockville Centre, Long Island, Mar. 31, in memory of Winona Caroline Martin, the Y. M. C. A. canteen worker who was killed in Paris in a German air raid Mar. 11, and who was formerly in charge of the Public Library there. Dr. Franklin T. Lane presided and several clergymen made addresses. Dr. James Sullivan, state historian, told of her work as a librarian, and Fletcher S. Brockman, assistant general secretary of the National War Work Council of the Y. M. C. A., spoke of her work with the Y. M. C. A. One of Miss Martin's poems was read. A bronze tablet, with her portrait and appropriate inscription, will be placed in the library as a memorial to her.

American Library Association

LIBRARIANS WITH THE COLORS—AN HONOR ROLL

The American Library Association wants a card index of the name of every librarian who is in the *military or naval service* of the United States or Canada, or any of our Allies. May the association have the help of all who read this announcement, and know of librarians who are serving with the colors?

Send the information, if convenient, on a white, punched 3 x 5 ordinary catalog card.

1. Name (inverted) of man in the service. (If handwritten be sure to write very legibly.)
2. Name of library with which he was connected, town, and state or province.
3. Position he held in library; e.g. librarian, cataloger, general assistant, etc.
4. Military position now held (rank, arm of the service, etc., e.g. First Lieutenant, Infantry).

Mail this card *promptly* to the American Library Association, 78 East Washington Street, Chicago.

We want a service flag at the Saratoga Springs Conference the first week in July, and we want every librarian in the service to be represented in that flag.

But even more important, the A. L. A. wants to keep this Roll of Honor as a permanent and valued record, which in due time will doubtless be printed.

GEORGE B. UTLEY, *Secretary*.

Library Organizations

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

The regular meeting of the District of Columbia Library Association was held Monday evening, March 8th, in the Music Room of the Library of Congress.

The election of fourteen new members was reported.

The president called on Miss Colcord for a review of the "Adventures and letters of Richard Harding Davis." After sketching the events of the earlier years of Davis's life, Miss Colcord read a few extracts from his letters to give a taste of his racy style and the entertaining manner in which he set forth his experiences. A pleasant side light on his character was his devotion to his mother, to whom he wrote regularly. Miss Colcord spoke of his early success as a writer not only of stories and novels but more especially of his quite wonderful work as a war correspondent in all parts of the world and in the wars of all nations.

Dr. T. W. Koch read a paper on work which is being done with soldiers blinded in the war to enable them to return to active life and to earn a livelihood. He outlined the work carried on abroad as well as that which is being planned in this country. He dwelt upon the need of books for these soldiers, books, of course, printed in raised type and which must not only furnish entertainment but should cover scientific subjects and the various lines of work for which the soldiers are being trained.

A. J. Klein of the Service bureau, Committee on Public Information, made an appeal to the members of the association for assistance in the work of listing and arranging informational matter in regard to all lines of work in the government departments.

A pleasant innovation was the rendering of several selections from MacDowell, by Gladys Pratt, one of the newer members of the association.

Burton E. Stevenson, formerly librarian of the Chillicothe Public Library, now with the Library War Service work in Washington spoke on the "Human side of camp library work." Camp library work has, he told us, brought out the human side of librarians, sometimes lost in the red tape and routine of ordinary library work. The best men are needed for organizing the work; the library must serve the need of men of varied interests and from all conditions of life; litera-

ture of all kinds is wanted; fiction, at Camp Sherman, from which Mr. Stevenson drew his illustrations, formed only 38 per cent of the whole. Every private wants to become an officer, every officer is studying to make himself proficient in his own especial line and to put himself in line for promotion, and they ask for books on all sorts of technical subjects, books on the war, text-books of foreign languages, especially French, as well as good literature, poetry and fiction. War library work, Mr. Stevenson said, was the great opportunity for library workers and they must not fail to prove themselves ready and able to meet it.

F. W. Ashley, chairman of the committee appointed by the association to cooperate with the American Library Association in the drive for books, spoke on the campaign in Washington. The Public Library had already gathered 2000 books, the Library of Congress by means of competitive team work, over 7000 and another 1000 had come in from miscellaneous sources. A publicity campaign was being carried on thru the newspapers, and thru speakers in the public schools; the help of the churches had been enlisted thru the ministers; clubs also had been approached and the Boy Scouts were organized for house to house canvass. He emphasized, as had Mr. Stevenson, that all kinds of books were wanted and books more than money, tho the latter was never to be refused. The object of the campaign should appeal to every Washingtonian, as an opportunity for them to pass on to our soldiers the books which have been a source of pleasure, instruction, and inspiration to them.

The president, W. J. Hamilton, announced that as he was about to take up the duties of secretary of the Indiana library commission, he should have to resign his position as president of the District of Columbia Library Association. This announcement was heard with regret by the members of the association and especially by those on the Executive board who have had the privilege of working with Mr. Hamilton.

Alice O. Atwood, *Secretary*.

NEW YORK LIBRARY CLUB

The March meeting of the New York Library Club was held March 14, at 3 p. m. in the United Engineering Societies Building.

The first speaker was Harrison W. Craver, director of the United Engineering Societies Library, who spoke on the combined and re-organized library. He gave a sketch of the origin and merging of the libraries of the four

societies, and spoke of the problems arising out of their union, two principal ones being the cataloging and the classifying.

The next speaker was Alfred D. Flinn, secretary of the United Engineering Societies, who read a paper on "What the engineer expects from the librarian."

Mr. Flinn urged that material be well classified and cataloged, with many analyticals, and suggested that librarians could be most helpful by saving some books, eliminating others and teaching the public to be discriminating.

Following Mr. Flinn's paper five new members were elected to membership. The next meeting was announced for May 22 at the Metropolitan Museum.

There was a rising vote of thanks to the United Engineering Societies for their courtesy in granting the use of their building to the club, after which the meeting adjourned.

ELEANOR ROPER, *Secretary*.

CHICAGO LIBRARY CLUB

The April meeting of the Chicago Library Club was held at the library of the Commonwealth Edison Co., Mr. Manchester, second vice president, presiding.

Mr. Utley, Secretary of the A. L. A. spoke on the A. L. A. activities of 1917-18. Mr. Utley quoted the statement by Ex-President Taft that the libraries' work for the soldiers is the best of all welfare work that has been done. Mr. Utley said that thousands of people not officially connected with libraries had helped in the drive for books, and reported briefly on the general progress of work with enlisted men.

E. N. Manchester, who has been librarian of the camp library at Deming, New Mexico, told of his experiences. Deming had a population of 2000 before the camp came; it now has from 4000 to 5000. The town is two miles from the camp and contains little of interest to the men. The library building is near headquarters and the camp post office, and is the most sand-proof building in camp. Mr. Manchester found that the soldiers do have time to read, as they have some days of rest and their evenings. The library did not have to advertise and the average daily circulation in February was 200 volumes. From 25 to 30 per cent was fiction but non-fiction books were often asked for that could not be had. There were 18,000 books in the library when Mr. Manchester left, 8000 in the central collection and the rest in 21 stations in different parts of the camp. Many soldiers read the magazines only, but books by Rex Beach, Harold

Bell Wright and Jack London and the "Tarzan" books are very popular. Requests were made for Russian, Turkish, Arabic and Bohemian books. Mr. Manchester emphasized the fact that the Washington office had been most helpful to camp libraries in backing their work.

JANET M. GREEN, *Secretary*.

MISSOURI VALLEY LIBRARY CLUB

The March meeting of the Missouri Valley Library Club was held in the auditorium of the Kansas City, Kansas, Public Library, Thursday evening, Mar. 14.

Willis H. Kerr, librarian of the Kansas State Normal School at Emporia and camp librarian at Funston, spoke to the members of the club and their friends on "Books, soldiers and war." Mr. Kerr told of the significance of the library at Funston to the officers and men. This war demands of the soldier not only intensified military training, but in addition requires such a high degree of scientific knowledge that both officers and men feel that they must respond with studious application. Most of the men find that in spite of strenuous duties, they have more time to read and study than they have ever had before and as a result one of the problems of the camp librarian is to get the right kind of scientific and technical books to the men at the times when they are most needed. Mr. Kerr suggested to those present that in the book campaign they use their influence in securing for camp libraries not only the attractive and interesting recreational reading, which is so obviously needed, but that they send out requests too for books on technical subjects for which there is such a large demand.

The next meeting will be held at William Jewell College, Liberty, Mo., April 12.

KATE DINSMOOR, *Secretary*.

ONTARIO LIBRARY ASSOCIATION

The eighteenth annual meeting of the Ontario Library Association, Easter Monday and Tuesday, was probably the best meeting in the history of the association. The attendance, the program and the keen interest thruout all the sessions were very striking features. A fairly large number of new memberships, both within and without Toronto, was another feature. Altogether over sixty libraries outside Toronto were represented. The untiring efforts of the Chief Librarian of Toronto and his staff added very materially in bringing the convention up to high water mark.

The morning session was devoted to rou-

tine business, and the annual report of the secretary covered the library activities of the province and referred to library work in the other provinces of Canada, and touched on the outstanding activities in Great Britain and the United States. The past year was a year of steady progress in Ontario and other parts of Canada, and the coming year promises to be fuller of activities.

Some of the features of the past year were the Summer Library School, the Library Institutes, the development of local library associations, the opening of the new Barrie building, a considerable increase in general circulation thruout the province, a gratifying improvement in the book selection of the libraries, and an increase in the importance attached by library boards to the library qualifications of candidates.

After words of greeting from Controller Robbins, representing the City Council, and the Hon. Mr. Justice Kelly, representing the Public Library board, A. L. Boyd, Toronto, presented the first afternoon topic, "The personal element in the work of the librarian." This was an analysis of the fundamental features in personality, and will stimulate many librarians to better service. "What do the people think and say about the Public Library, and why?" was treated by Mrs. William Dorrington, Alton; Eleanor Holmes, Picton, and Arthur Kinsinger, Niagara Falls, in bright, brief papers. William Briden followed with a discussion of "Materials for efficient library service," noting especially the development of children's work in his library. The afternoon was closed by E. Wyly Grier, R. C. A., on "Canadian art and its relationship to the library." This distinguished Canadian artist handled his theme in a masterly way, not only delighting but informing and stimulating his audience.

In the evening the Chief Librarian of Toronto, Dr. George H. Locke, acted as chairman, and introduced the president, Mary J. L. Black, of Fort William. "Concerning some popular fallacies" was Miss Black's topic, and if any benighted individual supposed that a woman could not be a very efficient president of the Ontario Library Association that fallacy was certainly exploded. Miss Black dealt with the fallacies concerning the public library on the part of both the public and the librarian.

Sir Robert Falconer, K.C.M.G., president of the University of Toronto, in his address "What a public library can do for the development of a community," sketched a reconstruction of society upon which we are

now entering. The new educational and industrial life which we are facing will make such demands upon our public libraries as will compel the highest kind of service. To measure up to this service is not only the privilege but the absolute duty of the public library, and means a quality of service which is not general at present.

The informal reception following the paper covered the various rooms of the Reference Library, and the John Ross Robertson collection of historical pictures was much admired, as was the Robertson collection of pictures of Canadian birds.

The Tuesday morning session provided a feast of good things, beginning with Mr. Fred Landon, of London, whose topic "Dealing with newspapers" was treated from the standpoint of one who had the widest knowledge as a journalist before he became a librarian. Colin G. Hawkins, Brownsville, told a thrilling story in his address on "Reaching our rural readers." Anybody who imagines the modern farmer to be a back number should hear Mr. Hawkins' story; it reads almost like a fairy tale. The community activities of that little rural center of less than 250 people were bold and daring to a degree, and the results have been inspiring. "Training the public to demand the best" was the topic by the Rev. James P. Patterson, of Sarnia, who handled it in an attractive and suggestive fashion, sparkling with wit. W. J. Sykes, Ottawa, gave a scholarly treatment of the important topic "Biography for a Canadian library." His list of the 100 best biographies for a Canadian library will be widely circulated thruout the province, and will affect a good deal of the buying in this department.

An informal round table on children's work was held on Tuesday afternoon, at which Carrie Banting, Hamilton, and Norah Thomson, Sault Ste. Marie, were in charge.

A very interesting item of the annual meeting was a luncheon tendered by the women librarians to Miss Black, as the first woman president.

The officers for the current year were elected as follows: President, F. P. Gavin, B.A., The Public Library, Windsor; first vice-president, D. M. Grant, B.A., The Public Library, Sarnia; second vice-president, B. Mabel Dunham, B.A., The Public Library, Kitchener; secretary-treasurer, E. A. Hardy, B.A., D. Paed., 8r Collier St., Toronto. Councillors: W. J. Sykes, B.A., The Carnegie Library, Ottawa; W. H. Murch, The Public Library, St. Thomas; Wm. Briden, B.A., The Public Library, St. Catharines; Miss E. Moir,

Toronto; Norah Thomson, B.A., The Public Library, Sault Ste. Marie; Mary J. L. Black, The Public Library, Fort William. Legal committee: Norman Gurd, B.C.L.; His Honour Judge Hardy; The Hon. Mr. Justice Kelly. Distribution of public documents: L. J. Burpee, W. J. Sykes, E. A. Hardy.

E. A. HARDY, *Secretary.*

Library Schools

NEW YORK STATE LIBRARY SCHOOL

This year's library visit (Apr. 1-6) was shortened to a week instead of the usual ten days. The chief difference in the schedule was the necessary omission of visits to several of the libraries in and around Boston. Springfield, Worcester, Boston and Providence were visited.

The Library School of the New York Public Library and the Pratt Institute School of Library Science visited the school, the former on the afternoon of March 16; the latter on March 18. Both parties were entertained in the school's rooms on Saturday evening, the 16th by the faculty, resident alumni and the few students of the New York State Library School who were not away on field practice work.

Katharine Van Dyck of the Junior class has been obliged to discontinue her work on account of home duties. Rachel A. Harris, 1917, whose work last year was interrupted by illness has returned to complete her course.

Theodore L. Cole of the Statute Law Book Co. has given, thru the State Library, nearly four hundred bookplates to the school's collection. With the plates is included a clipping from the New York *Evening Post* of Apr. 2, 1898, describing the New York State Library *ex libris* collection of that time. The present collection, tho larger than the old and in some respects better, still lacks a number of the older American plates previously owned by the State Library. Many scarce library bookplates and labels of early date are included in Mr. Cole's gift.

The school has received from T. C. Tai, of the class of 1918, a full set of blue prints of the plans of the Tsing Hua College Library of Peking. This is an official governmental library founded and maintained by the Boxer Indemnity Fund. The library, of which Mr. Tai is chief librarian, now has a building planned by Murphy and Dana of New York according to modern American library ideas. The building and equipment will cost upward of \$600,000 and will eventually house the

books in European languages which the college is collecting. A separate building for the Chinese books is contemplated.

Since the last LIBRARY JOURNAL letter, the following lecturers have addressed the school:

Feb. 14. Isadore G. Mudge. College library administration (2 lectures).

Feb. 18. Corinne Bacon. Some recent poetry; What it means to be a librarian; Trials of a subject bibliographer (3 lectures).

Feb. 21. Josephine A. Rathbone. Movements and tendencies in modern 19th-20th century literature.

Feb. 25. W. O. Carson. Library conditions in Ontario.

Mar. 1. Mlle. Marguerite Clément. Literary and publishing interests in France.

Apr. 13. Henry N. Sanborn. Library commission work.

FRANK K. WALTER.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

The inspection tour this spring began on March 23 and ended March 28. Its itinerary included Albany, Boston and Providence. The librarians and staffs of the various institutions visited extended every courtesy, making the trip profitable and enjoyable. The library inspection which is the purpose of the tour is being supplemented thruout the current half-year by afternoons spent in some of the important institutions of New York City.

Practical work for the months of April and May includes periods of war service, each student being given an assignment to one of the A. L. A. Dispatch Offices, either under Robert Vail at the New York Public Library or under Asa Don Dickinson at Hoboken. The immense amount of routine work to be done at these offices furnishes opportunity both for rendering help and for becoming conversant with the methods of assembling books and of sending them overseas and to the cantonments.

On March 19 the school had a lecture on "The rise and decline of the modern magazine" by Lutie Stearns; and on March 20 an address on "The social aspects of library work" by Alice Tyler. Miss Shedlock spoke on April 11 on "The technique and development of story telling," and many of the students have taken advantage of further opportunity to hear Miss Shedlock in a series of evenings given by her at Greenwich House on the Tuesdays in April.

Since last writing a number of reports on the war service of former students have been received. Kathryn Arthur, 1914-15, is index and catalog clerk for the Marine Intelligence Branch of the United States Army Transport Service, New York City. Ellen Brown, 1916-17, is assistant to the Director of Home Economics of the United States

Food Administration for Virginia. Mary A. Waring, 1911-12, is record-clerk at the headquarters of the South Atlantic District of the United States Coast Artillery, Charleston, S. C. Nelson McCombs, until recently a member of the present class at the school, has returned, in response to orders, to Camp Stuart, Va.

Cecilie Andresen, an advanced student, left on March 9 for her home in Norway. Miss Andresen held a position on the staff of the New York Public Library and had hoped to complete her work at the School, but by reason of conditions in her native country, felt it necessary to avail herself of an early sailing.

ERNEST J. REECE, *Principal*.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

The field trip of the class of 1918, Saturday, Mar. 23 to Friday, Mar. 29, was an unqualified success. The first stop was made at Poughkeepsie where the Public Library was visited in the morning and Vassar College in the afternoon. Saturday night to Tuesday morning were spent in Albany. Saturday evening a party was given by the Albany School to the New York and Pratt Institute Schools whose visits to Albany coincided for a few hours. On Monday the Education Building and the High School and Normal School libraries were visited. The Troy Public Library and the Rensselaer Polytechnic Library were visited on Tuesday before taking the train for Utica, where the program included a luncheon given by the trustees and staff, an automobile trip to Hamilton College at Clinton, a tea at the home of one of the students of the class, and a party in the evening at the residence of F. T. Proctor, president of the board of trustees. Thursday was spent in Syracuse where the University, Public Library and the firm of Gaylord Brothers entertained the party. At Rochester six resident Pratt graduates vied with one another to give a royal welcome. A program was prepared that had seemed impossibly long on paper, but which proved completely possible under the energetic and inspiring leadership of Miss Zachert, and by Friday afternoon six libraries had been visited there.

The class paid a postponed visit to the Brownsville Children's branch of the Brooklyn Public Library on Friday afternoon, April 5. Clara W. Hunt, superintendent of the Children's Department, gave the third of her

lectures on planning a children's room. This was followed by a tea, after which the students had an opportunity of observing the library in the full swing of the after-school rush. A brief visit was made to the adult branch where Miss Burgess gave an interesting talk on the Brownsville neighborhood.

Lutie E. Stearns, formerly of the Wisconsin Library Commission, spoke to the school on March 19 on the patriotic service that can be rendered by librarians during the war. The first visiting lecturer of the spring term was Theresa Hitchler, head cataloger of the Brooklyn Public Library, who talked on the organization of the catalog department. On April 9 Sarah B. Ball (class of 1902), librarian of the United States Rubber Company, spoke to the class on the methods employed in a business library.

Eleanor Gleason, 1904, librarian of the Mechanics' Institute Library in Rochester, has volunteered for war service at headquarters in Washington. Two more of our graduates have gone into foreign service. Mary A. Dawson, 1910, sailed several weeks ago for work under the Red Cross in Italy, and Carol Hurd, 1912, has gone to France in the canteen service. Katherine Tappert, 1910, has been appointed to organize the hospital library at Camp Upton, Long Island.

The entrance examinations for the class of 1919 will be held on Friday, June 7.

JOSEPHINE ADAMS RATHBONE,
Vice-Director.

THE ST. LOUIS LIBRARY SCHOOL

The course given by outside lecturers during the second term was opened, Jan. 2, by Mrs. Harry January, secretary of the Consumers' League of Missouri, who gave a convincing talk on "The responsibility of the citizen for industrial conditions"; L. N. Dougan, principal of Shaw School, gave two lectures, one to the children's librarians and Library School on "Nature books for children," and one to the school on the "Literature of ornithology." Mrs. Philip N. Moore of the health and recreation department, Woman's Committee of the Council of National Defense, addressed the school, Jan. 21, on the subject "Woman's share in war work." W. L. N. Gifford, librarian of the Mercantile Library, lectured on Americana and English periodicals, both lectures being given at the Mercantile Library and followed by an examination of the library's collections on those subjects. Lillian L. Dickson, reference librarian of the Riverside Public Library, visited the school and spoke briefly of the county library work in Califor-

nia. On Jan. 29, the students were the guests of the Froebel Society and spent an hour listening to Miss Marie L. Shedlock of London, who lectured on "The story as a fine art," with many delightful examples.

Mary E. Downey, secretary and library organizer of the Department of Public Instruction of Utah spoke to the school, Feb. 12, on the H. W. Wilson publications and also on her work in Utah. F. W. Faxon, of the Boston Book Company, on his annual visit to St. Louis talked to the class of his interesting experiences in "Completing periodical sets."

Work during the field period, Jan. 28-Feb. 23, included assignments at six branches and in the following departments, catalog, reference, art room, and children's departments. Two of the students made a title catalog for the library at Barnes Hospital, and one student was assigned to the Washington University Library, for the latter half of the laboratory period. The schedule of appointments was changed at the end of two weeks so that the students might have a more varied experience.

The school attended one session of a conference held by the Missouri Children's Code Commission at the Central Library on Tuesday, Mar. 26, and heard the papers and discussions on the subject of "Child labor and education; present standards."

The students of the Library School took charge of the afternoon schedule at the "Recreation Depot" from 2 to 5 p. m. during the two weeks of the recent drive to secure books and recreational material, which in St. Louis was operated as a combined campaign of a number of different organizations, under the guidance of the War-Camp Community Service Board.

BOSTON UNIVERSITY—LIBRARY COURSE

The following lectures have been given by members of the university faculty: Prof. Harry B. Center, "Newspaper advertising for libraries"; Prof. Ralph B. Wilson, "Methods of handling data for teaching."

D. N. Handy, librarian of the Insurance Library Association of Boston, is giving a series of six lectures on: "Business conditions which make information and its use indispensable"; "Organization of business literature and information: arrangement and classification"; "Filing and shelving material"; "Sources of information"; "Indexes available." These lectures are given in connection with the War Emergency Division and the library classes are attending rather than have them duplicated later.

Margaret S. Locke, assistant librarian of the College of Business Administration, has had supervision of the courses during the past month.

RALPH L. POWER.

CARNEGIE LIBRARY SCHOOL

The school was closed for spring recess, April 1 to 6.

Carrie E. Scott, head of the children's department of the Public Library, Indianapolis, gave a course of seven lectures on "The administration of small libraries," April 8 to 13. Mrs. Gudrun Thorne-Thomsen of Chicago lectured on "Storytelling" April 15 to 20.

The Library School attended a patriotic meeting held in the Carnegie Music Hall, April 9 under the auspices of the Carnegie Institute of Technology. Among the speakers was the Count de Beaufort of the Belgian Army.

Ernestine Rose of the faculty spoke on "Librarianship as a vocation" at the Ohio State, Ohio Wesleyan and Otterbein Universities, March 16 to 19, and at the Vocational Conference held at Wooster University, March 20.

SARAH C. N. BOGLE, *Principal*.

UNIVERSITY OF ILLINOIS LIBRARY SCHOOL

During the month of March the seniors who had not already done the required month of field work were assigned to work in the following libraries: Oak Park Public, Rockford Public, Evanston Public, and the University of Illinois Library. The number of students who are willing to work a month in the summer appears to be increasing, and if libraries are able to offer good work and good supervision in the summer months, all the field work may possibly become summer work.

Edna Lyman Scott, lecturer in children's work and literature, was in residence at the school for five weeks, beginning March 4, meeting the seniors daily and the juniors twice a week.

A luncheon and reunion of alumni and former students living in and near Chicago was held March 30, in the rooms of the Brownleigh Club. Twenty-six were present, including Miss Simpson and Miss Curtis, from the faculty, both of whom made short addresses.

Harry Amsterdam, junior, has withdrawn from the school.

E. O. Fontaine, junior, has been called to the colors.

Nora Kirwan, stenographer in the school office for nearly six years, has resigned to enter the service of a Philadelphia company.

P. L. WINDSOR, *Director*.

SIMMONS COLLEGE SCHOOL OF LIBRARY SCIENCE

The lecturers during the last month have been John A. Lowe, who talked on March 15 on "Library buildings," and on April 6 on "Advertising," and Lutie E. Stearns, who spoke on March 22 on "The rise and fall of the modern magazine."

The regular visits for the month were to the Newtonville Technical High School, and the Brookline Public Library. Thanks to the courtesy of Mr. Lowe, a group of over fifty of the seniors and college graduates visited the camp library at Camp Devens on April 13, where they enjoyed not merely the sight of the camp library activity, but also a visit to the camp itself.

SUMMER COURSES

A class for preparation of workers in base hospital libraries will probably be given at Simmons College during the summer session, July 9 to August 16, if the demand is sufficient for it. Further details will be given later. A plan is being worked out at the suggestion of the A. L. A. War Headquarters, in consultation with the Camp Devens library authorities, Miss Kathleen Jones of the Waverley Hospital, and others well qualified to give assistance in such work.

JUNE RICHARDSON DONNELLY, *Director*.

LIBRARY SCHOOL OF THE LOS ANGELES PUBLIC LIBRARY

The date for the annual visit to the San Diego libraries was set ahead so that the class could attend the meeting of the Southern District of the C. L. A. which was held at Camp Kearny on March 9. The three days' trip was crowded with events which included besides the library visits and the meeting, the big military review and an inspection of the various camp activities and their headquarters under the guidance of Mr. Quire, the camp librarian.

The library literature class has been transformed for the remainder of the year into a series of "mock meetings." Each meeting will represent an occasion on which the librarian may be called upon to talk. The first was a Parent-Teachers Association meeting. The topic for discussion was "How to interest children in reading." The rôles of teacher, parent and librarian were taken by different members of the class. A student

chairman introduced the speakers and led the discussions. Teachers explained their methods. After the adjournment of the meeting a few moments were devoted to criticism by instructors who suggested improvements in subject matter and manner of presentation.

On April 3 Zaidee Brown talked to the school on library commissions and the problems of library organization.

Nearly a thousand books for camp libraries resulted from the school's share in the March book drive.

The school has recently adopted a French orphan.

THEODORA R. BREWITT, *Principal*.

CALIFORNIA STATE LIBRARY SCHOOL

During the month several very interesting lectures have been given before the library school class. On March 7, W. E. Henry, librarian of the University of Washington Library, who had been in charge of the Camp Fremont Library at Palo Alto, gave a very entertaining account of his work with the soldiers. On March 15, Charles A. Murdock of San Francisco gave some personal reminiscences of Bret Harte, whom he knew as a young man in Humboldt county, California. James D. Blake, of Newbegin's, San Francisco, spoke to the class on March 26, on "Selling books and giving service, versus giving books and selling service," bringing out the analogy between the book-selling business and library work.

J. H. Quire, camp librarian of the Camp Kearny Library, spent the week of March 26 to 30 at the State Library. During the week he gave before the class a series of three lectures on legislative reference work. At the regular monthly staff meeting he described the development and work of the Camp Kearny Library, laying special emphasis on the personal phase of the service.

March 30, six members of the class, with several of the State Library staff, attended the joint meeting of the fifth, eighth, and ninth districts of the California Library Association at Oroville. The trip included a luncheon served at the Butte County Free Library; the afternoon program, conducted at the Oroville Public Library, the key-note of which was war library service; and a picnic supper on the banks of the Feather river.

MILTON J. FERGUSON.

RIVERSIDE LIBRARY SERVICE SCHOOL

Dorothea L. Smith, Riverside 1916, has resigned the librarianship of the State Normal School at Chico, Calif., and is going to

France as index and filing secretary of the Stanford Women's Civilian Relief Unit. She is the second Riverside girl to go to France. The first was Hilda M. Smeal, who is driving an ambulance. Several other Riverside graduates have gone to Washington or are on their way to enter civilian service. Among them are Lela Clapperton, Julia Clapperton, Nelle Sanford and Lilla B. Dailey.

Lucia C. Hoisholt, Riverside 1917, was married on March 14 to Capt. Nolan West Ferguson, Oakdale, Calif.

The announcements for the summer school beginning June 24 will be mailed about the middle of April and in these announcements the Riverside Library service school makes a departure from the ordinary summer school program by offering both elementary and advanced work. The work for high school librarians will be emphasized in the summer school.

JOSEPH F. DANIELS.

UNIVERSITY OF MICHIGAN—SUMMER LIBRARY COURSE

Courses in library methods are offered in the University of Michigan as a part of the regular summer session, July 1 to Aug. 23. They will be under the general charge of the university librarian, William Warner Bishop, as director, and instruction will be given by members of the University Library staff.

F. L. D. Goodrich, reference librarian, will take the classes in classification, ordering and accessions; Esther A. Smith, head cataloger, will teach cataloging; Fredericka B. Gillette, assistant reference librarian, will give reference and desk work; William C. Hollands, superintendent of printing and binding, book-binding; and Esther Betz, assistant in cataloging and classification, will assist in revising.

The course on the high school library will be given by Dr. Laura E. W. Benedict, of New York City. Special lectures will be given by Byron A. Finney, reference librarian *emeritus*, on public documents; Prof. Azariah S. Root, on college library administration; Samuel H. Ranck on public libraries and rural libraries; Sarah C. N. Bogle, library work with children (6 lectures).

The courses are planned to meet a demand from University students for an elementary knowledge of library methods. Many students in the past ten years have taken these courses, sometimes as an aid to their work in research or to their prospective work as teachers, and again as an introduction to library work. University credit is given for satisfactory work in the course. All persons desiring to take any of the courses in library

methods must be admitted by the university librarian *before registering* for the work.

**PENNSYLVANIA FREE LIBRARY COMMISSION
SUMMER SCHOOL**

The Summer School for Library Workers will open its eighth year at State College, July 1-Aug. 9, for a six weeks' term in connection with the Summer Course for Teachers. Admission will be limited to those who are already in library work or are under written appointment to library positions. The course in general follows that of other years. In addition to the course for librarians there is one intended particularly for teachers, which covers the use of books and the elementary points in library organization. It can be taken by teachers as one of the courses in the summer school and entitles the student to credit. The work is similar to that outlined by the N. E. A. for students in normal schools.

For full information write to the Free Library Commission at Harrisburg, Pa.

**UNIVERSITY OF MISSOURI—SUMMER
LIBRARY COURSE**

The University of Missouri will conduct a Summer Library School, June 10 to July 20.

This will be given in cooperation with the Missouri Library Commission and the St. Louis Public Library. The teachers are: Alice I. Hazeltine, Ph. B., supervisor children's work, St. Louis Public Library; Emma K. Parsons, A.B., reference librarian, University of Missouri; Bertha Uhlemeyer, A.B., assistant cataloger, St. Louis Public Library; Elizabeth B. Wales, secretary, Missouri Library Commission.

**COLORADO AGRICULTURAL COLLEGE—
SUMMER LIBRARY COURSE**

Courses in library work will be given in the State Agricultural College at Fort Collins, Colo., June 3 to July 12. Courses in cataloging, classification, book ordering, etc., will be given by Margaret S. Williams of the University of Illinois Library; children's work, by Elfreda Stebbins, librarian of the Fort Collins Public Library; and reference use of books, by Charlotte A. Baker, the college librarian.

The course is intended primarily for librarians who, on account of distances in this section, are not closely associated with other libraries. College credit will be given to those having a high school diploma. A fee of \$10 will be charged. Full information may be secured from Charlotte A. Baker, College Library, Fort Collins, Colo.

Librarians

ALLEN, Mrs. Philip L., B.L.S. New York State Library School 1911, has been appointed librarian of Stephens Junior College, Columbia, Mo.

AYERS, Mary Frances, chief of the music department of the Minneapolis Public Library and member of the staff since 1896, died on Feb. 22 after a long illness. She remained at work until two weeks before her death when an operation became necessary.

BLACKHAM, Bessie, has been appointed librarian of the Uinta County Public Library at Evanston, Wyo. She succeeds Marguerite Cameron who recently resigned to go to California.

BLESSING, Arthur R., B.L.S. New York State Library School 1916, has been promoted to the assistant librarianship of the District of Columbia Public Library.

BOGARDUS, Mabel, Pratt 1913, who has been out of library work for a year or two, has returned to the staff of the New York Public Library and is at present in the Seward Park branch.

BOYLE, Susie, assistant librarian at the West Hoboken, N. J. Free Library, has resigned.

BRAINERD, Jessie, Library School of the New York Public Library, 1911-13, formerly of the Newark Free Public Library, has been since April 1 librarian of the Hackensack (N. J.) High School.

BRYAN, Clara, has resigned her position as member of the cataloging staff of the St. Paul Public Library, to become index and catalog clerk in the War Department at Washington.

CAMPBELL, Ida, for ten years past an assistant in the St. Louis Public Library, has accepted a position as assistant librarian of the B. F. Goodrich Company's Library at Akron, Ohio.

CARR, Flora F., librarian at Mankato, Minn., has been granted a six months' leave of absence to go to Washington to work in the Ordnance Department. Maud van Buren, who was formerly librarian at Mankato, will take Miss Carr's place during her absence.

CARSON, Jessie May, Carnegie 1903, has gone to France where she will assist in reconstructing the village of Soissons.

CARTER, Martha Rodes, Carnegie 1911-1912, was married April 3 to Commander Roe Reed Adams, U. S. N.

CHICHESTER, Edith, Simmons 1909, has a position in the Reference catalog department of the New York Public Library.

DEUTSCHBEIN, Marie, Los Angeles 1916, was married to Laurence Gardner in Washington, D. C., on April 1.

FANNING, Elizabeth, Simmons 1916, has resigned as librarian of the Social Service Library, Boston, her resignation to take effect July 1, on account of her approaching marriage to C. K. Crennan.

FERGUSON, Kate, Illinois 1914-16, for nearly two years librarian of the Douglas Township Public Library, Gilman, Ill., where her work has been unusually successful, has resigned to enter the Camp Library at Camp Hancock, Ga.

FRANKENBERGER, Charles, formerly at the College of Physicians in Philadelphia and for many years in charge of the Jefferson Medical College Library in that city, is now librarian of the Kings County Medical Society in Brooklyn.

GILL, Elizabeth, children's librarian at the Carnegie Library, Cheyenne, Wyo., was married on Feb. 11 to Marvin H. Taulbee of the 83rd Field Artillery. Mrs. Taulbee is now at Palo Alto with her husband.

GILPIN, Margaret, for the last seven months assistant librarian at the Hibbing (Minn.) Public Library, has resigned to accept the position of librarian of the Nashwauk Library.

GRIFFIN, Jeanne, for the past year in charge of the social science division of the St. Paul Public Library, has resigned to take a position in the library at Kalamazoo, Mich.

HAGGENS, Frances E., assistant in the central children's room of the Somerville Public Library, has resigned.

HAMILTON, William J., New York State Library School 1912, has resigned the assistant librarianship of the District of Columbia Public Library to succeed Henry N. Sanborn as secretary of the Indiana Public Library Commission.

HEILMAN, Lura F., Carnegie 1912, was appointed children's librarian in the Morristown, N. J., Public Library on April 1. Miss Heilman was graduated from the University of Wisconsin in 1911 and has held several positions. She has been a branch librarian in

Evansville, Ind., a children's librarian in the New York Public Library, and organized the children's department in the Public Library at White Plains, N. Y.

HOBBS, Martha, who has been employed in the catalog division of the St. Paul Public Library has gone to Washington to enter war service as indexer and filer.

HYDE, Dorsey W., for some time connected with the research bureau of the *American City*, has been appointed to succeed Dr. Williamson as the librarian of the Municipal Reference Library in New York City.

JENSEN, Evelyn, a graduate of Ann Arbor, has accepted the position of assistant librarian of the Carnegie Library, Cheyenne, Wyo.

JOHNSON, Mildred, Illinois 1916-17, librarian of the School of Commerce, Northwestern University, is in Washington engaged in war work.

KERR, Fannie, of the Kalamazoo Public Library, has secured an appointment as assistant librarian at Buhl, Minn.

LUITWIELER, Helen, director of the library training class and editor of *Library Publications* in the Somerville Public Library, has resigned to take charge of the catalog department in the Library of Radcliffe College.

LUNN, Minnie, an assistant in the order department of the Louisville Free Public Library since April 26, 1905, died at 3 o'clock Sunday morning, March 17, at St. Joseph's Infirmary. She had recently undergone a surgical operation.

MONAHAN, Anna, Simmons 1908, is now first class yeowoman, Aviation Corps, U. S. Navy, with headquarters at the Massachusetts Institute of Technology.

MORTON, Frances, who has been city librarian in Beatrice, Neb., for a number of years, has resigned to take a government position in Washington. Miss Morton was formerly librarian at Lincoln and also at Falls City.

NEWCOMET, Edith, Library School of the New York Public Library 1916-17, has been appointed to the staff of the Main Reading Room at the New York Public Library.

PATTERSON, Elizabeth Edith, Carnegie 1903-1904, has accepted the position of librarian of the Public Library, Pottstown, Pa.

PECKHAM, Ellen Wheelwright, Carnegie 1915-1916, is in charge of a children's room in the Public Library of East Orange, N. J.

PRINGLE, Mary P., resigned her position as reference librarian of the Minnesota Public Library Commission on Feb. 18, to accept a position as clerk in the War Department at Washington.

RANKIN, Ina, Pratt 1909, has taken a position in the library of the Rockefeller Foundation.

RETVEDT, Ragnhild, New York State Library School 1914-15, resigned her position in the Drammen, Norway, Folkebibliotek, to become reference assistant in the Deichmanske Bibliotek at Christiania.

RICE, Beth Clark, began work in the Syracuse Public Library on April 1 as head of the young people's room. She is a graduate of Vassar College and the library course at Drexel Institute, has been first assistant in the Wylie avenue branch of the Carnegie Library at Pittsburg and has been in charge of the William street branch at Buffalo.

ROGERS, Mary, Simmons 1916, is children's librarian in the Aguilar branch of the New York Public Library.

SAVAGE, Elta Virginia, who resigned her position as reference librarian at Duluth on Jan. 1, has been succeeded by Harriet Dutcher of the catalog department of the State University Library of Columbia, Ohio. Miss Dutcher is a graduate of Pratt Institute Library School and has been previously employed in the reference department of the Pittsburgh Carnegie Library.

STEEL, Edwina, Carnegie 1916, has been appointed children's librarian of the West End branch of the Carnegie Library of Pittsburgh.

SULZER, Ruth, for several years assistant librarian at Butte, Mont., has been named librarian to succeed Gertrude Nichols, who has received a leave of absence for one year to do Red Cross work in Europe.

TAFT, May E., Simmons 1912, has a new position as cataloger in the Dental Library of the University of Pennsylvania, beginning work June 1.

TAYLOR, Grace A., Pratt 1917, has accepted a position in the Quartermaster's Department at Washington.

THOMAS, Arthur N., of the Library of Congress, has accepted a three months' appointment to the staff of Ohio State University Library.

TIDD, B. Hazel, has resigned as assistant librarian of the Deborah Cook Sayles Public Library of Pawtucket, R. I. She was married in April to Gilman L. Moulton of York Harbor.

WIGMORE, Ethel, Simmons 1917, has been appointed assistant librarian in the University of Maine, at Orono, beginning work May 15.

WATKINS, Marie, of the catalog department of the St. Louis Public Library, has accepted a position as indexer in the Ordnance Department at Washington, D. C.

WHEELER, Pearl, formerly of the Des Moines Public Library staff, is now in charge of the work of cataloging the public document division of the Wyoming State Library at Cheyenne.

WALKER, Elizabeth, 1916, has resigned her position in the Los Angeles Public Library to accept an appointment as index and catalog clerk in Washington.

WILKENS, Harriet E., of Fayetteville, N. Y., has been appointed as assistant on the staff of the Syracuse Public Library. She is the former librarian of the Fayetteville Library and has spent four years in the catalog department of the Syracuse University Library, where she made a specialty of French and English literature.

WILKINSON, Mabel, librarian of the Platte County Library at Wheatland, Wyo., was married on March 8 to E. L. Etheridge of that city.

WILLIAMSON, Dr. C. C., librarian in charge of the Municipal Reference Library in New York City, resigns May 1 to become statistician for a new committee on Americanization for the Carnegie Corporation. He is to be succeeded by Dorsey W. Hyde. W. N. Seaver continues as assistant librarian.

WILLIS, Henry A., for fifty-five years a trustee of the Fitchburg, Mass., Public Library and for twenty-six years its president, died in that city early in April. Mr. Willis had always taken a lively interest in the work of the Fitchburg library and had been very prominent in library circles in his section of the state. He had been a discriminating benefactor to the institution in ways that have been from time to time duly acknowledged, and was a generous contributor to the art treasures of the library. In his will he left the sum of \$10,000 for pictures to be hung in the art gallery.

THE LIBRARY WORLD

New England

MASSACHUSETTS

Boston. A portrait of Charles K. Bolton, librarian of the Boston Athenæum, was recently executed by John S. Sargent by order of the trustees of that institution. The commission given Mr. Sargent was a graceful tribute by the trustees to Mr. Bolton on his rounding out 20 years of service as librarian on March 21. This picture will complete the collection of portraits of the librarians of the Athenæum, numbering seven during the 114 years' history of the institution. Altho it is a sketch, executed in a few hours, the Bolton portrait is declared by all who see it a perfect likeness.

Mill River. At the annual town meeting it was voted to accept \$5000 from the Carnegie Corporation of New York for the purpose of building a free public library.

Northampton. Two interesting albums containing individual photographs of members of Co. I, the local company of the state forces, have been made up by the Forbes Library. The first, bound under the title "Co. I, 2nd regiment, M. V. M., Northampton, Mexican border, 1916," contains 115 photographs of members of the company on service in Texas, and the second, with the binder's title, "Co. I, 104th infantry, American Expeditionary Forces, Great war, 1917," those of all members of the company up to the time of its leaving Camp Beckmann, Greenfield, late in July, 1917. The photographs were taken by Charles H. Howard and the negatives are now in the possession of the library. The library has also made a roster of Co. I giving rank, date of enlistment, date and place of birth and nearest relative, with residence, of its members, complete to July, 1917.

Saugus. The Dearborn Contracting Co. of Lynn has been awarded the contract for the new Carnegie library to be built at a cost of \$15,000.

Somerville. The new East Somerville branch library, situated on Broadway between Illinois and Wisconsin avenues, was opened to the public Mar. 30, and during the day 400 books were given out. Carrie L. Williams, who has been connected with the Somerville Public Library for three years, is in charge of the branch.

Middle Atlantic

NEW YORK

Ontario. The Ontario Library has been moved into more commodious quarters in the Fewster block. This will be a change greatly appreciated by both workers and patrons and was made necessary by the increasing growth of the institution. During the months of January and February 1500 books and magazines were circulated, which is an increase of more than 50 per cent. over the same months of 1917.

PENNSYLVANIA

Philadelphia. The will of Mrs. Jennie B. Kinsey, widow of former Judge John K. Kinsey, bequeathing a large collection of books to the city, for one of the Free Library branches, has been probated here.

South Atlantic

NORTH CAROLINA

Durham. The Durham Public Library property was sold at public auction, Mar. 14, for \$21,000, Gilbert C. White being the successful bidder. The property was sold in order that the library could secure funds for the purpose of building a new library in another section of the city.

GEORGIA

McRae. The Karl McGregor library was formally opened Mar. 24 at the McRae-Helena Public Schools. This library is a memorial to Karl McGregor, one of the pupils of the school, who accidentally killed himself last Thanksgiving day while out hunting.

East North Central

MICHIGAN

Boyerne City. The opening of the new library has been indefinitely postponed. The opening was to have been March 15, but due to the inability of the school board to secure desirable speakers this ceremony must take place at a later date.

OHIO

Sandusky. Establishment of a musical department in the Carnegie Library promises to be an important outgrowth of the community sings. The committee in charge of the sings has had many requests for the use of the 250 odd song books employed during the rendition of the selections. These books are to be turned over to the library, and in addition 22

persons already have volunteered to contribute their songs to the proposed library.

Toledo. Just how much the people of Toledo were in want of sufficient reading matter but were unable to secure it because of the distance to the Public Library and its one branch is shown by their use of the five new branch libraries which were opened in different parts of the city in the period between Dec. 1, 1917 and Jan. 13, 1918. The *Toledo City Journal* for March 16 makes an analysis of the figures of use for this first two months of service. Each of the branches contains about 4500 volumes. During January and February of this year, the number of new borrowers registered in the main library was 6983, being more than five times the number of new registrations for the same period last year; 4227 of these registrations were made in the juvenile department,—more than ten times the number for the same period last year. By March 11, an average period of ten weeks since the opening of the branches, 9949 cards had been taken out for the first time. At this rate 50,000 new registrations will be made in 1918 at the branches alone, as compared to 33,339 borrowers in the main library and its one branch in 1917. During the two months, January and February, from 300 to 700 books were circulated daily in the branches, or 79,249 in all. In the main library 49,022 books were circulated. At several of the branches the auditoriums are used freely for meetings of many organizations, among them the Girl Scouts, National Defense League, and Red Cross, and at the South branch arrangements were made to house the headquarters of the next Liberty Loan campaign for that district.

INDIANA

Indianapolis. Perhaps other librarians will be glad to read the following criticism of the new central library building of the Indianapolis Public Library written by the famous architect and critic, Mr. Ralph Adams Cram of Boston. This quotation is taken from a personal letter to the architects of the building, and is now authorized for publication. Because of Mr. Cram's interest in Gothic architecture, his remarks on this classical building are all the more impressive: "The Indianapolis Public Library is, I think, one of the most beautiful secular buildings in the United States, and I cannot think of any similar modern structure in any part of the world that goes beyond it. That it is the best example of the application of classical architecture to library design is, I think, demonstrable. I

have never come in contact with anything which seemed to me so complete in its planning, its organism, its scale and its consummate beauty; beauty of form, line, color and detail. This is real and convincing architecture. I never expected to see anything of the sort in my own day and generation. What I am writing is not the result of sudden enthusiasm or a desire to please. I am discharging a moral duty when I tell you that this library is as perfect a piece of classical architecture as any I have seen in modern times."

East South Central

KENTUCKY

Louisville. The request of James C. Moffet that a clearing-house of information relating to the business of the city be established as a permanent department of the library has been referred to the library committee. Approval of the proposal has been expressed in resolutions adopted by the Advertising Club, the Board of Trade and the Louisville Federation of Social Agencies.

Louisville. Tributes to the flag in prose and verse, song and flowers were given Mar. 11 when a beautiful American flag and a flag-pole were presented to the Jefferson Branch Library on the occasion of the fifth anniversary of the founding of the library. About 1500 persons took part in the ceremonies incident to the flag raising, and many children were present, representing the Duncan-street School, Salisbury School, St. Patrick School and Madison-street and Western Departmental School.

ALABAMA

Mobile. The city commission has been petitioned by the officers of the Mobile Public Library Association to take over the property and operate it as a free library association until \$50,000 could be raised to operate it.

West North Central

IOWA

Des Moines. On Feb. 15 the Des Moines Library Club and the Press and Authors' Club combined to present John Masefield to a large audience in a lecture in the Plymouth Congregational church.

MISSOURI

St. Louis. The St. Louis Public Library has acquired, on deposit, the valuable scientific collection of the St. Louis Academy of Science, numbering about 25,000 volumes,

largely the transactions and memoirs of scientific and technical societies. The Academy has leased its building on Olive street to the Engineers Club and has accepted an invitation, first made several years ago, and standing since then, to take advantage of the improved housing conditions offered by the new fire-proof central building of the Public Library. This transfer places at the disposal of students and investigators who use the Public Library, one of the most valuable tools for scientific research in the Mississippi valley and its vicinity. The addition is the largest single deposit of books in the history of the St. Louis Public Library.

NEBRASKA

Omaha. The Omaha Public Library has opened branch libraries at Fort Omaha and Fort Crook. By direction of the officers in charge at these two army posts these libraries have been placed in the headquarters of the Y. M. C. A. Deliveries of books are made from the Main Library at regular intervals. The library rules have been modified and a soldier may now borrow books immediately upon application. The many special requests for books for use at the balloon school have prompted the purchase of technical books of this class. French text books and dictionaries have also been purchased in duplicate and all special calls receive prompt attention. Magazines are being sent direct from the publishers to the Fort Crook Reading Room. The call for books for these libraries received a ready response from Omaha citizens and about 1500 volumes were sent to the Main Library for use at these two branches. The European histories and new war books, including personal narratives so much in demand, are being supplied by the Main Library.

West South Central

OKLAHOMA

Miami. J. L. Heckenlively has been commissioned to prepare the plans for the new Public Library which is to be erected this spring. The Carnegie Corporation has made a grant of \$10,000 for the building.

Tulsa. The need of the Public Library for a considerable increase in funds, particularly book funds, is set forth in a front page article in the *Tulsa Democrat* for April 7. The library, with a beautiful new building and stack room for 50,000 volumes, has an annual income of only \$7000, and but 8400 books on its shelves. Seventeen hundred of these were donated by one individual last year. Com-

parisons are made with other cities of approximately the same population but with much better library facilities, and the article closes with the admonition "Let us boost before we boast!"

TEXAS

Austin. It is not definitely known as yet when the transfer of the Wrenn library to the Library of the University of Texas will take place. The collection is being cataloged in Chicago. Arrangements for the accommodation of the library will also have to be made in the University library building. It is stated that Harold Wrenn, son of the collector of the library and one of the trustees of the estate, plans to come to Austin when the collection is moved here and will give his personal attention to the placing and arranging of the books.

Wichita Falls. The library building to be known as the Kemp Public Library, from its donor, J. A. Kemp, will be ready for use soon. Christmas, 1916, Mr. Kemp announced that he and Mrs. Kemp would give to Wichita Falls as their Christmas gift their former home, a splendid stone structure near the business section. Architects found, however, that the building would be difficult to remodel to suit the needs of a library, so Mr. Kemp had plans drawn for a new building, especially adapted to library purposes, and let the contract for a \$25,000 structure. The library is being built in Lamar Park, near the center of the city. The city will provide for the maintenance of the building, Mr. Kemp's gift being the building completed. A librarian, Polly Roberts, formerly of Fort Worth, has already been employed by the library association and is at work on the book lists. The sum of \$10,000 has been raised by individual subscriptions to supply the books and care for the librarian's salary for the time being. It is expected that the city charter will be amended soon to provide a fund for the maintenance of the library.

Mountain

UTAH

Smithfield. It is reported from this town that preparations are being made for the erection of a \$9000 Carnegie library building.

ARIZONA

Phoenix. The newest branch of the Public Library, to be known as the First Avenue branch, is located in generous quarters on the second floor of the new Public School Administration building, 331 North First avenue. It is in charge of Miss Esther Boone, as

librarian. Miss Boone is a graduate at the Kansas State Normal school and an experienced teacher. For the past three months she has been engaged at the main library studying library methods. For the present, the First Avenue branch will be kept open from 9 o'clock each week day morning until 1 o'clock each afternoon. When the patronage seems to warrant the extension of these hours, this will be done.

CALIFORNIA

Fresno. Branch libraries have been opened at the Fink-Smith and California field playgrounds under the charge of Emma Wienke. The Kirk school branch library has been in operation for some time and is in charge of Mrs. George Comfort in the evenings and Miss Wienke in the afternoon. Arrangements are being made to establish a branch library among the Indians at Auberry.

Los Angeles. In a supplement to the April number of *The Liberty Bell* the Society, Sons of the Revolution, in California present a sketch of a proposed library and museum to house the society's historical and genealogical reference library in a manner befitting the "Repository of the Southwest."

Marysville (Yuba Co.) The first step toward the establishment of a County Free Library for Yuba county was taken by the supervisors, with the passing, by unanimous vote, of the resolution of intention fixed by law. At the September meeting of the supervisors, after the new budget has been made to include the upkeep of the library, the final steps will be taken to make the library a certainty.

Oakland. The Twenty-third Avenue branch of the Public Library was dedicated Mar. 14. The library was erected at a cost of \$35,000, a Carnegie grant.

Sacramento. The city commission on April 2 accepted from the contractors, Knowles & Mathewson, the new library building at Ninth and I streets. The plans were drawn by Loring P. Rixford of San Francisco.

San Francisco. Sunset branch of the Free Public Library was opened and dedicated Mar. 24 with appropriate ceremonies in which hundreds of the neighborhood residents took part. The new building, which is accounted one of the finest of the group of branch libraries in the city, is at Eighteenth avenue and Irving street, and will serve a large district south of Golden Gate Park.

SASKATCHEWAN

Regina. The *Regina Library*, originally a monthly paper published by the Public

Library, then absorbed into the now defunct *Regina Municipal News*, has been revived once more and is distributed free from the library and all its branches.

ENGLAND

Birmingham. In *Book Auction Records* (vol. 15, no. 1) Albert Mould, librarian of the Handsworth branch library, Birmingham, has contributed an article on "Some literary associations of Birmingham," in which he touches on some of the writers who made Birmingham their home, the newspapers which appeared from time to time, and the special library facilities which the city affords.

Cambridge. It is not generally known, says a writer in the *Bulletin* of the John Rylands Library, that for some time it was practically Lord Morley's intention to give the library of the late Lord Acton to Mansfield College. This would have necessitated very considerable additions to the buildings, and that fact was one of the main reasons which made him finally decide to bestow the gift on Cambridge University.

Norwich. The Norwich Public Library has received for its local collection a donation from A. H. Patterson, the eminent Norfolk naturalist, of "a large and valuable collection of his writings and sketches, comprising his manuscript note-books from 1878 to 1916 (including original drawings, printed articles and letters), a complete set of his published works relating to the natural history of Norfolk, and about a thousand of his political, football and fishing cartoons of local interest."

SCOTLAND

Glasgow. Since the Commercial Library was opened in November, 1916, as a special department of the Public Libraries of the city, it has been visited by over 40,000 persons in search of business information. A large number of inquiries by telephone and letter have also been dealt with by the staff. It is expected that in the near future an extension of the accommodation will be made.

INDIA

Baroda. A concise and comprehensive sketch of the Baroda library system was prepared by Newton M. Dutt, state librarian at Baroda, and was read at the first all-India conference of librarians held at Lahore last January. The December *Bulletin* of the Central Library was a record of the English accessions for 1916-17, while the January number contained bibliographies of bibliographies, of library economy, and of printing and binding.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature. Material printed in this department is cumulated each year in the "American Library Annual."

ADMINISTRATION

War economies for libraries. *L. Occurrent.*, Jan., 1918. p. 1-3. Editorial.

With the high cost of library supplies and with no increase in its income, there is no course left to the library of to-day but to practice economy in every way possible. Usually a library finds it necessary to spend its whole allowance and this money goes towards book buying, building maintenance, including heat, light and care, and library service.

It is difficult to tell just where library economy should be practiced. The service of providing reading rooms and meeting rooms is closely connected with the book service. Shall the library then cut down on the building service to save fuel? Many people will argue that if the library is open shorter hours or fewer days, much fuel and light can be saved and perhaps part of the janitor's and librarians' salaries cut down. But the library should be open every day, especially in these times of war activities, since it serves as a public meeting place and also shelters the poor in the cold weather when coal is high.

Not even the most economical library board would think of reducing the salary of the librarian or of any of her assistants. Such action would be penury, not economy.

Shall the saving then come in the matter of book and supply purchasing? Yes, it does seem most proper to buy as few books and tools as possible, and these should be selected with great care. Less fiction should be bought. More use will then be made of those books already in stock, especially non-fiction. Publicity may lead to a large circulation of the old books. Altho it may be desirable to have all magazines bound, many numbers can be used unbound by keeping them in pamphlet cases.

The libraries of Oregon have adopted the slogan: "Let us not ask for new fiction. There are plenty of good old stories. People are giving up their sons and are doing without meat, wheat and sugar. Can't we do without light reading? Let us put our money into serviceable books and let the library win the war."

In a small library, however, where the borrowers may have read a good part of the collection of fiction, it may be necessary to add some new novels, but even here it is best to

buy popular copyrights and inexpensive editions of standard works of fiction. In these times a good part of the book money should go towards buying books that will "help win the war." Some subjects to select are food conservation, economy and thrift.

But after all, we cannot read books pertaining to the war all the time, and light reading at times has a distinct value. Reading is a good form of recreation and light reading helps to relieve one of much anxiety and bring some joy, even if it is but for a little while.

Another means of economizing is to use a cheaper commercial grade of stationery supplies. Slips and other paper supplies should not be wasted. More books must be cleaned and mended and lights in any room not in use, turned out.

If the librarian exercises great care and much thought in buying and using supplies, it will be unnecessary for the library to keep open fewer days, cut down its salaries or staff, and it will be doing its bit to help our boys win the war.

ADVERTISING. *See* Publicity.

BLIND, WORK WITH

In the Salt Lake Public Library a class which includes most of the adult blind of the city meets regularly. There are about twelve who attend the readings which are given four times a week and include lessons in reading the raised types, and in typewriting when desired.

Helen Crawford is now supervisor. The room is supported by an outside auxiliary, and free transportation for the blind on the street cars, to and from the reading room, is given by the Utah Light and Traction Company. The State School for the Blind at Ogden lends its books in raised type for the use of the blind. A grafonola has been given the room, and a little music now follows each reading.

CARE OF BOOKS

The first of January a new bulletin was put in the children's room of the Collinwood branch of the Cleveland Public Library. It was headed by a picture of Boy Scouts in camp, washing hands, brushing hair and tidying up in general; and the caption, "Clean hands, clean hearts, clean books."

The children were told that if they would show their books to the children's librarian before taking them home and then show them to her again on returning them, that if the books were returned in good condition as when taken, they could have their names on the honor bulletin, with a star for each additional book kept clean and a gold star for every ten. This explanation was accompanied by a little talk on the proper care of books.

"We hoped by this method to lengthen the lives of the books and at the same time to teach a little personal hygiene," writes the librarian. "The plan has been more successful than we thought possible. At the end of two months the children are more enthusiastic than ever. The bulletin is watched for changes with the same interest as the tape in a stock exchange. Several teachers come in often to examine it for names of their pupils.

"One boy, whose name is on the bulletin brought in another boy and was overheard explaining its meaning to him. 'You see my name up there? Well, that means that I try to keep my hands clean and always wash them before I read a book and bring my books back without getting them torn, or marked up, and I don't say bad words.'

"'Tony's name's up there,' remarked the other, 'and he says bad words. I've heard him lots of times.'

"'Aw,' said the first boy, 'What if he did; he ain't going to any more.'

"The groups of children come and go, but the Clean Hands Bulletin remains the center of attraction."

CATALOGING

The Public Library of New South Wales is issuing in printed form some of the cataloging helps worked out by its staff and adopted by the library. Recently received in this office was an "Extension of Dewey's 790-799—Amusements," which is partly based on the suggestions of Wright and Hamer in the *Library World* of February, 1915, and develops the original subdivisions given by Dewey to one, two, or three places, 796 Athletic and outdoor sports, and 797 Boating and ball games, being worked out most fully.

CLASSIFICATION—OF MEDICAL LITERATURE. *See* Medical literature of the war—Classification

EUROPEAN WAR—CLASSIFICATION OF MEDICAL LITERATURE. *See* Medical literature of war—Classification

EXHIBITS—OF WAR MATERIAL

The Grosvenor Library of Buffalo had on exhibition during April a collection of war posters. The English posters, some one hundred in number, were placed first, and included some of the finest of the English, with two in Welsh and several Canadian. Besides the picture posters there were a good many with phrases or notices only. Later, examples from Australia, New South Wales and South Africa were added. Of particular interest historically at this time were ten Greek picture placards of the war and three from Poland. The American posters and a few choice French and Italian specimens followed, and the whole exhibit continued thruout the Liberty Loan campaign.

The exhibit was not only patriotic, but gave examples of poster art and fine printing, and showed the psychology of the appeals.

In Newark an exhibit was held from Mar. 14 to Apr. 15, devoted to our soldiers in camp and our sailors at sea, showing how they live; what they wear, from socks to cap; and what they carry, from coffee cup to bayonet. There was also included a block model of Camp Dix, camp newspapers, a mine, a torpedo and various souvenirs.

—ON FOOD CONSERVATION

The Boston Public Library has been presenting a series of exhibits on wartime foods. Prepared dishes are shown, leaflets containing the recipes are given on request, and original posters are displayed. An expert on foods is in charge to answer all inquiries.

The co-operating agencies are Boston Women's City Committee on Food Conservation; Free Public Library Commission of Massachusetts; Massachusetts Branch of the Women's Peace Party; Massachusetts Normal Arts School; Massachusetts Public Interests League of Anti-Suffragists; Massachusetts Woman's Suffrage Association; Miss Farmer's School of Cookery; National Civic Federation; School of the Museum of Fine Arts; Special Aid Society for American Preparedness; Women's City Club of Boston; and Women's Municipal League of Boston.

In South Bend, Ind., there was a production, conservation, and thrift show for five days in March in the High School, Chamber of Commerce, and Court House. The Public Library had a booth in the high school gymnasium, and issued a four-page list of "Books on the farm and garden."

INCUNABULA—CENSUS OF

The census of incunabula owned in the United States and Canada, which was begun

under the direction of John Thomson, of Philadelphia, some twenty years ago, has been continued by the Bibliographical Society of America.

The census now consists of some ten thousand titles, with notes of ownership about the year 1900. Nearly all of these were in the larger public libraries, and have not changed their location. Many of the copies in private hands, including a considerable number of the more famous books, such as those in the library of Robert Hoe, have changed hands. Many more have come from Europe, to the libraries of Mr. Huntington and a hundred other collectors who were unknown twenty years ago and are largely unknown now except to their personal friends.

The committee of the Bibliographical Society which has undertaken to edit this material consists of George Watson Cole, Charles L. Nichols, Victor H. Paltsits, and George P. Winship. Under their direction the information on the cards is being typewritten on sheets, in uniform entries. The form of entry for each title consists (a) of the number under which the title appears, if entered, in Hain's *Repertorium Bibliographicum*; (b) of the author's name, if known, or otherwise the name by which the book is commonly known, with abundant cross-references; (c) the briefest title which will identify the book for anyone wishing to find it and knowing what he is looking for; (d) the place of printing, shortest form of printer's name, and date, if known; (e) format; (f) reference to Copinger, Reichling, Proctor, and occasionally to Campbell, Pellechet, and special monographs like De Ricci's *Caxton* or Redgrave's *Ratdolt*; (g) and abbreviations showing where copies are to be found in this country.

The plan is to provide merely a census of copies of these books which are available in America. No attempt is made to contribute information for students of bibliography or the history of early printing. All details are omitted which ought to be looked for where they will be found in authoritative form, in the standard works like the *Catalog of the British Museum Fifteenth Century books* or the promised German general catalog of incunabula.

In its present form, consisting chiefly of data gathered some years ago, the list is worth the cost of printing. Its value will, of course, be increased by every new title or additional copy that can be included. The number of these will depend largely upon the extent to which anyone who knows of copies of early

printed works in small libraries or in private collections co-operates with the committee by informing them of these books. There are, it is estimated, a thousand fifteenth century books hidden in American book-cases, belonging to persons who inherited them, or who bought them as curiosities, as souvenirs of foreign travel or because a friendly bookseller recommended them.

The committee, thru George Parker Winship, librarian of the Harry Elkins Widener Memorial Library, Cambridge, Mass., earnestly solicits a communication from anyone who knows where there is a fifteenth century book in America.

Publication of the list began in the April issue of the *New York Public Library Bulletin*.

INFORMATION—ORGANIZATION OF

The control of industrial and scientific information. R. Rintoul. *Jour. of Soc. of Chem. Industry*, Feb. 28, 1918.

The importance of organization in industry cannot be too strongly emphasized at the present time, and the object of this note is to direct attention to one department common to all industries, in which organization is of paramount importance. This department may be called the Intelligence Department, because its function is to collect and re-distribute information which may be of use in connection with the normal working or development of the industry in question. Its function is, in fact, to act as the memory of the concern and it must be able to supply to the executive of other departments clearly drawn-up statements of such facts or figures as are requisite for their guidance.

The information which it is the duty of this department to collect must be drawn from very varied sources and in almost any form. It may be collected from books, periodicals, dissertations, casual articles in popular magazines and in the daily press; staff reports on original work and on manufacturing experiences; analysis of costs, yields, plant output and of conditions affecting labor; as well as from reports to agents and customers and from many other sources. The daily correspondence of an industrial concern also yields an important harvest of information which is well worth conserving. It should be a fixed rule that all information of current value which comes into the hands of any department of such a concern should be passed to the Intelligence Department for record. In too many cases in the past, valuable information has been consigned to the limbo of the for-

gotten or by chance remembered, instead of being recorded under some definite system which would ensure its being brought forward for consideration at a time when it could be made use of with advantage.

It should be clearly realized that even in a concern of moderate size the volume of important information to be handled by the Intelligence Department will be such that it must be dealt with in a very special manner if useful results are to be obtained. It does not require a vivid imagination to picture the chaos which would reign in a department dealing with such a stream of raw material without the assistance of the most thoro organization. It is not sufficient that the information shall be filed within the four walls—it must by some means or another, be reduced to a condition in which it is readily accessible and in which any item can at once be traced. As it reaches the department it may be looked upon only as potential knowledge, and it is the duty of the department to see that it becomes essential and available for all time.

It may be added that in addition to the main purpose for which it exists, the index has proved itself of great value in connection with industrial research. In very many cases when an investigation is under consideration, and before a definite decision to proceed with it can be arrived at, it is necessary to prepare a preliminary report on the state of the present knowledge on that particular subject. In this connection the index can play a most important part if the essential information has been recorded, because the required information is already in a concentrated form and can either be epitomized or expanded with the minimum amount of labor. It also proves useful in many unforeseen ways. It allows of a rapid review of any particular field in which the industry may be interested, it possesses a marked value as a source of suggestions for future development and research and assists in the control of the policy underlying the subjects for research. It is not too much to say that an index of this nature constitutes one of the most important instruments of research available at the present time.

LIBRARIANS AND ASSISTANTS—MEDICAL OFFICER FOR

The St. Louis Public Library now has a medical officer, in the person of Dr. Harriet Stevens of this city. Her duties are to fall under three heads: 1. General examination and report regarding sanitary conditions. 2. An annual physical examination of the members of the staff. 3. Report of individual

cases of illness, especially where sick-leave is asked. The first physical examination of members of the staff is now in progress. Assistants may be examined by their family physicians if there is good reason for making this change in the rules. The Medical Officer is at the Central Library every Thursday at 11:30 a. m., when she may be seen and consulted by any members of the staff.

The officer's duties do not include the medical treatment of anyone. Examinations are made in Library time and at the Library's expense.

—TRAINING OF

How to be a treasurer. Julia Wright Merrill. *Wis. L. Bull.*, Dec., 1917. p. 295-297.

A librarian may at any time be called upon to serve as treasurer of some organization of which she is a member, and altho the work may seem a little difficult at the beginning, she will find out after a little experience how valuable this knowledge of business methods really is.

The duties of the treasurer, who is usually elected or appointed at the annual meeting, are several. Before she takes up her duties for the year the outgoing treasurer must pay all the expenses of the meeting and record and receipt the dues received. After balancing her bank book she sends the newly elected treasurer a check for the balance with a copy of her annual report, her account book, membership file, and sometimes a box of old records. When the new officer receives the check and opens a bank account for its deposit then her year's work has begun. The best way to open the account is to use the name of the organization followed by the treasurer's name or to enter it directly under the treasurer's name with "treas." after it. The same form should be used in signing checks, endorsing checks, etc. Stub records should be kept to show the size of the account and the bank book should be balanced frequently to show the treasurer's figuring.

Bills should be paid promptly and by check, for the cancelled vouchers are as valuable as the receipted bill. Both records should be kept until the end of the year (sometimes longer) when the accounts are audited. Several organizations require the o. k. of the president and secretary on a bill before it is turned over to the treasurer. In the case of petty cash, as for postage, the treasurer may take it from her own pocket, and as often as desired a bill made for the articles and approved, may be paid by check. The same thing is true in the case of an outside speaker attending an annual

meeting. After subtracting the expenditures, which are shown by the checks, and the amount deposited in the bank, the account book and bank book must agree.

In the usual three by five card catalog, which the treasurer keeps, payment of members for a number of years are shown. The files should contain the date of payment, with the amount and period covered. Also, as often as the by-laws call for, notices for dues should be sent out. Here a post card or the notice and a coin card put into one envelope ought to be used. The treasurer must be tactful in the wording of these cards. When the money is received, entry is made in the file and account book and a receipt for the amount sent. Small dues must not be overlooked. It is the treasurer's duty to see that dues do not remain unpaid thru carelessness. Treatment of members whose dues remain unpaid for some time should vary according to the purpose of the organization.

Last year in the Ohio Library Association the treasurer, who is always ex-officio chairman of the membership committee, chose her fellow members to represent the larger libraries of the state and the districts into which the state was divided for institutes. Each committeeman worked to get new members and also to collect dues from old ones and then sent in one check covering all the payments, besides other information about resignations and change of addresses. This brought better results than did all the letters the treasurer had hitherto sent out.

Reports are also made by the treasurer at meetings. The monthly report includes the balance at the last report, receipts since, total income, expenditures and balance. The annual report should include the balance reported the last year and the total receipts for the year, making the total income. Expenditures included should be grouped in large classes and made the basis for the next year's budget. The balance between receipts and expenditures must agree with the bank book balance. The report, bank and account books and bills or vouchers must be turned over to the auditing committee, which reports on them before the treasurer's report is accepted. This helps to keep matters straight and is for the treasurer's protection as much as for the club.

Sometimes as a member of the executive committee she helps plan policies and programs.

References may also be made to Robert's *Rules of Order* for a further account of the treasurer's duties.

If the treasurer has done her work well thruout the year, she will be proud to show her records and will reflect creditably on her own library.

MEDICAL LITERATURE OF WAR—CLASSIFICATION

War bibliography. Mrs. Grace W. Myers. *Bull. of Med. L. Assn.*, Oct., 1917. p. 25-27.

Since the outbreak of the war Mrs. Myers, who is librarian of the Treadwell Library in the Massachusetts General Hospital at Boston, has kept a file of all articles in medical journals dealing with the peculiar effects of modern warfare.

This has been kept up to date, and now forms a special division in the catalog, under the heading "War (World)," with all references carefully classified under the following subdivisions, to which new subdivisions are added as needed:

- Aeroplane workers (Diseases of)
- Ambulance work
- Appliances (of all kinds)
- Aviation
- Biologic therapy
- Disabled soldiers
- Education (Military)
- Epidemics
 - Cerebrospinal fever
 - Dysentery
 - Jaundice
 - Typhoid fever
 - Typhus fever
- Food
- Hospital ships
- Hospital trains
- Hospital units
- Hospital (Civil) and the war
- Hospitals
 - Base
 - Field
 - Military (in general)
 - Open-air
 - Portable
 - Temporary
- Hygiene (Military)
- Injuries of war (in general)
- Medical profession in war
- Mexico
- Munition workers (Diseases of)
- Naval medicine
- Preparedness
- Radium (Use of)
- Soldiers (Diseases of)
 - Gas infection
 - Malaria
 - Nephritis
 - Nervous affections
 - Shell shock
 - Soldier's heart
 - Syphilis
 - Tetanus
 - Trench foot
 - Trench fever
- Surgery (Military) in general
 - Abdominal
 - Amputations
 - Anesthesia
 - Orthopedic
 - Plastic
- United States Army
 - Medical Department
 - War Department
- United States Navy
 - Medical Department
- Wounded (Care of)

Wounded (Transportation of)
 Wounds (Treatment of)
 Abdominal
 Chest
 Fractures (Gunshot)
 Genito-urinary
 Head and face
 Hemorrhage (Secondary)
 Joint
 Neck
 Nerve
 Septic
 X-ray (Use of)

Bibliographical Notes

The Bodleian Library at Oxford has once more revised and published its "Rules for the cataloguing of printed books."

A revision of his "Guide to periodicals and serials" is being made by Henry O. Severance, librarian of the University of Missouri. The new edition will be issued in September.

A second edition, rewritten and enlarged, of Frank K. Walter's "Periodicals for the small library," has been issued by the A. L. A. Publishing Board.

The California Library Association has published its "Handbook and Proceedings of the annual meeting, 1917," following the custom of recent years.

An interesting discussion of "Some books of occultism" is given by Alma Olson in the November-December issue of the *Michigan Library Bulletin* (p. 103-107).

If you want a "dictionary definition" of *camouflage*, look in the French-English military technical dictionary published by the Government Printing Office.

"Two brothers: accounts rendered" is a little memorial volume published in England in honor of the two sons of Alfred W. Polard, of the British Museum Library, who were both killed in active service in France.

Municipal Facts, formerly a weekly published by the city and county of Denver, has now become a monthly. Vol. I, no. 1, is devoted chiefly to the great municipal organ dedicated in March in the city's Auditorium.

"Emotional poise in war time: how the libraries can help the public," by Edith Kathleen Jones, librarian of McLean Hospital, Waverley, Mass., has been reprinted from *Public Libraries* in pamphlet form.

The technology division of the Cleveland Public Library recently prepared a short bibliography on shell manufacture for the *Bulletin*

of the Cleveland Engineering Society. A list on incandescent lamps was also compiled for the same society.

The Division of Reference and Research of the Cleveland Board of Education is collecting the courses of study in public schools in various cities, and the collection is available to teachers in the city and to workers from the Public Library.

"The meaning and the mission of music," an address originally given by John Ridington, acting librarian of the University of British Columbia in Vancouver, before the Vagabond Club of that city, has been printed by the author for private distribution.

The Educational Directory for 1917-18, published by the Bureau of Education, contains a list of approximately 1700 public and society libraries, with the name of the librarian and the number of bound volumes each contains. College and university libraries are not listed.

The December number of the *North Carolina Library Bulletin* was a special "food conservation" number, with suggestions for ways of conservation, notes on the libraries' response, books on conservation and on vegetable gardening, and an outline to be used with children on how they can help save food.

A "List of books for Wisconsin high school libraries," with indicated classification and cataloging, has recently been issued by C. P. Cary, state superintendent of schools in Wisconsin. The list was prepared by O. S. Rice, supervisor of school libraries, and Bertha Bergold, assistant librarian.

The state food administration for Washington has started a *Weekly News Letter*, which will be sent to the various departments of the U. S. Food Administration, Washington, D. C., and to all the library directors of the forty-eight states, as well as five hundred copies to the libraries, colleges, high schools, etc., in Washington.

A chronological table showing what is proved and what is not proved about Shakespeare's life and work has been compiled by William Poel, the English Shakespearean scholar. First printed in the *Monthly Letter* of the Elizabethan Stage Society, the table will be reprinted in the quarterly *Bulletin* of the John Rylands Library of Manchester and will also be separately published by the library.

Lists entitled Banking, Trust companies, International finance, and Investments were recently prepared by the Cleveland Public Library. Ten minutes after their arrival in the sociology division a hundred copies were taken by a lecturer, to give to his class of bank employes.

The statement prepared by Paul Brockett, librarian of the Smithsonian Institution, for the National Research Council regarding scientific publications from Germany, was first printed in the Proceedings of the National Academy of Sciences for December, 1917 (p. 717-721), and has now been reprinted separately.

The American Red Cross, thru its department of civilian relief in Washington, D. C., has issued three pamphlets on home service which should be in every library—a "Manual of home service" ((second edition), a "Handbook of information for home service sections," and "This side the trenches with the American Red Cross."

A paper on "The value of the study of art in our institutions of higher education" was prepared by John Cotton Dana for the annual meeting of the College Art Association of America in the Metropolitan Museum at New York Mar. 29. The paper was printed and distributed to the members of the association prior to the meeting.

Library Service for March 15, published by the Detroit Public Library, gave a page to the work of the boy farm recruits, under the caption "Fighting in overalls," and included a short list of farm books for high school and college boys. The Detroit Library had a "made in America" exhibit of books and pamphlets on war gardens, in the open shelf room of the main library, during March.

The January-February number of the *Michigan Library Bulletin* is a patriotic number, giving not only war activities of the libraries individually and thru the A. L. A., but also of the D. A. R. and other patriotic women's organizations, an outline of the functions of the Woman's Committee of the Council of National Defense, and the plans for a community survey of the state in April.

"The quarter-centennial celebration of the University of Chicago, June 2 to 6, 1916," is a record of the many activities with which the university commemorated the completion of its first quarter century. The record has been compiled by David Allan Robertson, who

acted as executive secretary for the celebration, and is issued by the University of Chicago Press in a handsomely printed and illustrated volume of over two hundred pages.

Three important bulletins have been published by the Department of Agriculture on home gardening: Farmers' Bulletin no. 934, is on "Home gardening in the south"; Farmers' Bulletin no. 936, "The city and suburban vegetable garden"; and Farmers' Bulletin no. 937, "The farm garden in the North." The department and the state agricultural colleges have many other publications which will be found valuable.

The latest addition to Mr. Dana's series on modern American library economy, as illustrated by the Newark Free Public Library, is devoted to "Color-and-position filing"—the color band method devised by Mr. Dana for filing pamphlets, books, maps, documents, letters and other material. This pamphlet describes the principle in outline and certain of its applications, and other more special modifications and applications are to be described in a later pamphlet.

The University of Michigan has already received thirteen subscriptions for photostat facsimiles of the *Kentucky Gazette* from 1787 to 1800, and nine for the *Detroit Gazette* from 1817-1830. The price for the first is not to exceed \$850 for the complete set bound in buckram, and for the second \$750. These two papers are of prime importance to students of western history for the source material they contain on the political, economic, and social features of pioneer life.

The *Collectors' Digest* is a new bi-monthly devoted to philately which promises to be of much value to collectors. The first number, for January-February, contains among other things a list of some thirty philatelic journals published in the United States during 1917; a general index to special articles in these magazines; an index to the material on pre-cancelled stamps, postal markings, and postal service; a Who's Who in philately; and a list of organizations interested in stamp collecting.

The New York Public Library has available for distribution copies of the "Memoir" of the late Dr. John Shaw Billings, librarian of the Surgeon General's Office, and first director of the New York Public Library, written by Dr. Fielding H. Garrison, and published by Messrs. G. P. Putnam's Sons in 1915. Libraries or librarians who wish the book and do not now possess it, may secure a copy by

forwarding postage to H. M. Lydenberg, New York Public Library. The shipping weight of the book is about three pounds.

The American Red Cross has been designated as the exclusive distributor of the official United States and French motion pictures. Sets of 50 or 60 stereopticon slides, with descriptive lecture, have also been prepared. They will be obtainable from any one of the thirteen division managers of the Red Cross in this country. Requests and remittance (10 cents) for catalog of slides should be sent either to the nearest division manager or to the American Red Cross, Bureau of Pictures, 120 West 41st street, New York City.

The Western Massachusetts Library Club has financed the publication in quantity of a 12-page selected list called "Some popular books on the Great War," which the libraries represented in the club are distributing. The list was compiled by Grace Miller. Enclosed in the copy received from the City Library of Springfield was a book mark list with thirteen (unlucky number!) "glad books" on one side, and fourteen "sad books" on the other, the whole the product of the State Street Junior High School print shop.

Recent, or recently revised, pamphlets on child labor issued by the National Child Labor Committee are "Children in food production" (pamphlet 277, revised); "Child labor, education and mothers' pension laws in brief" (no. 249, revised); Dr. Klopper's "Causes of absence from rural schools in Oklahoma" (no. 281); Mabel Brown Ellis's "Child labor and juvenile delinquency in Manhattan" (no. 282); the thirteenth annual report of the general secretary (no. 283); and "Children in agriculture" (no. 284).

The National War Garden Commission (Maryland Building, Washington, D. C.) has published an excellent illustrated "garden book" of 32 pages on "War vegetable gardening and the home storage of vegetables," and also a leaflet on the necessity of garden planting. These will be supplied in moderate quantities, without cost, to any library desiring them. In lots of 1000 or more the commission will be glad to supply them at the cost of printing, which is \$15 per thousand, with the imprint of the library on the cover, if desired.

A proof copy of a pamphlet on "The utilization of the data of the automobile industry through bureaux of information," by Ernest

A. Savage, city librarian in Coventry, England, has been received. In it Mr. Savage presents to The Institution of Automobile Engineers what a librarian means by a bureau of information; how, in such a bureau, data of a specific industry can be accumulated and used, why they should be confined within bounds, and why they should be co-ordinated with a central bureau containing a reserve of data for all kinds of research.

A "Handbook of manuscripts in the Library of Congress" has been issued from the Government Printing Office. The handbook is the co-operative product of several members of the manuscript division, and is planned to present the whole resources of the division comprehensively. The origin of each collection is stated, when known. A grouping of the larger collections under subjects precedes the main body of the volume, and an index of over two hundred pages follows the text. Beginning with 1917 the manuscript accessions as recorded in the Library of Congress reports will keep this record up to date.

The Regina (Sask.) Public Library devoted its whole Bulletin no. 41 to "Gardening for greater production." Last year the library published in March a bulletin on the selection of vegetable seeds for use in Regina gardens, and this present bulletin is prepared with the cooperation of George Watt, head gardener for the provincial government. Following some general remarks on the preparation of soil and cultivation of plants, a list of vegetables suitable for Regina gardens is given, with recommendation of certain varieties and general directions for their cultivation. All varieties mentioned have been personally tested by Mr. Watt. A short list of books and magazines on gardens and gardening is printed on the last page.

The fine food conservation bibliography compiled by the State College of Washington, Pullman, Wash., has been revised, and the most recent books and periodical articles added. W. W. Foote, librarian of the college, is also a member of the staff of the Federal Food Administrator of Washington, and his bibliography has been endorsed by the war-service committee of the American Library Association and by the U. S. Food Administration. The subjects covered are general dietary principles; food supply and the national emergency; nutritive value of foods; planning of meals; diet of infants and children; studies of staple foods, such as fruits, cereals, vegetables, meats, dairy products,

sugar, honey, beverages; cooking and fuel economy; food economics, such as substitutes; utilization of left-over materials; elimination of luxuries and stimulants; utilization of garbage and waste; food preservation, canning and preserving; marketing and distribution. This bibliography is now in use in every state in the union, both in the libraries and in the home economics schools.

Open Round Table

THE INSTITUTE AND ITS PROGRAMS

Editor Library Journal:

Referring to the letter of Mr. George, in which he asks "Just what is the A. L. I." and "Why the Institute." The A. L. I. is a small association specializing on the research aspect of libraries. There are two clean-cut library tasks; first, the spreading of knowledge; second, research or the discovery of new truth. The constant task of mankind is contribution to knowledge and the turning of scientific results into common knowledge. Most library associations emphasize the educational aspect, the spreading of common knowledge. The A. L. I. simply emphasizes the study or research side. It is, however, not therefore an antiquarian or scholastic body; it is an intensely practical organization. It aims to encourage actual research of a live character, but it is, above all, directed on library methods of aiding scientific research. The scope of its work is fairly shown by the programs of its meetings. These concern research in the book sciences, and publication of results, the higher education of librarians, teaching of the book sciences and especially practical methods of getting the books for research workers and saving the time of such workers—such matters as joint lists for the locating of copies or for inter-library loans, the copying of documents, collecting and care of material on the war, the work of public records and archives, location of special research collections, care of coins, engravings, posters, etc.

As for "Why the Institute," America is rich in libraries for education or the spread of common knowledge, but it is scandalously poor in books for research and in facilities for introducing the research worker to what we have. The need at the research end is enormous and pressing. Nobody seems very much alive to it. There is little place for the topics in general association meetings. Proper attention might save thousands of years of highly paid research time. It is the most needy end of the American library business. The A. L. I. is simply a modest effort to jack up that end—for lack of a better instrument. Its members will welcome any person or institution who will do it better or do more of it, or 40 institutions. The Institute is often told that something else can do it better, but that something else doesn't bring it off. Meantime it does what it can. Let

me therefore, in reply, ask this other question. What other association is there among the scores of library associations and library schools which is definitely trying to promote this end of the American library problem? Suppose the group is neither wise or mighty and what it pulls off is slight: isn't this better than doing nothing? Doesn't a vigorous, useful purpose justify existence?

Mr. George farther asks "Does the Institute represent the American spirit of democracy?" To this I say, yes. The essence of democracy is that all men are protected in their equal rights. The Institute has as good a right to existence as any other unobtrusive group—or any other library association. It is true that membership is limited, but so is membership in a baseball team or a family, or a workmen's union. American democracy stands for these. We have had communistic experiments in America, but they have never succeeded. The A. L. I. is a team which plays its game with 100 members or less and prefers to work shorthanded rather than have members inexperienced or uninterested. The present president tried to have the number enlarged, but was convinced in a discussion that a forlorn hope does better with limited membership.

It is farther democratic because it invites, and has for several years invited all librarians to the game, free of expense. It is a strictly amateur organization. It does not even require membership fees for admission to its discussions. In practice any live member of the A. L. A. has also been welcomed to the floor and has had no difficulty in getting the presiding officer's recognition. If this isn't in the direction of democracy on the part of a modest businesslike association, what can be? Not even the United States Congress admits every citizen who comes along to take part in its discussions.

Mr. George's objection to the inconspicuous advertising of the openness of the meeting is not quite fair. The notice was printed on the programs and these were on a take-one desk, as well as posted at the most central point. Moreover, the Institute is in fact modest about the matter. It does not urge attendance but welcomes it and meantime attends diligently to the business which it has marked out for itself.

The real point of Mr. George's complaint is the decrease of definitely guided discussion in our Library Association meetings. This is commonly ascribed to the growth in numbers, and it was one reason originally alleged for

limiting the A. L. I. to one hundred members. The Institute has so far outgrown this belief, that it freely invites attendance and has not found it necessary so far to limit sharing in discussion. It has had some very first rate stuff from non-members, even papers. It is more bent on having something done and getting life and stimulus for itself than on any detail. Its discussions do not decrease and they are interesting to its members, but the throng attending from outside is not so great as to justify advertising itself as a special attraction in Mr. George's three-ring circus. If by any chance a crowd should come, it is the opinion of those who have watched the A. L. A. in its beginning that a very large meeting can be handled quite well in discussion with a little stricter parliamentary procedure. Growth in numbers does not necessarily diminish interesting debate. As a general rule the questions which are interesting to many are best debated to advantage in the presence of many; those to few among few, and research work is in a vast minority.

It is always good to hear Mr. George's trenchant criticisms. He is now professionally absorbed in the spread of knowledge side, but he knows something of the research field. His criticism is not really aimed at the Institute but at no-discussion meetings. He almost seems to imply that he thinks Institute discussions worth attending. This would be a much appreciated compliment, but, compliment or no compliment, the Institute hopes to continue its retiring existence, attract to itself all the live workers that it can, and make some contribution, however tiny, to the vast problem of aiding the discovery of new truth.

E. C. RICHARDSON,

*President, American Library Institute.
Princeton University Library.*

ON LIBRARY PROGRAMS IN GENERAL

In a personal letter another librarian, who has attended the Atlantic City meetings for many years, as well as those in other states, says in comment on Mr. George's letter in the April "Open Round Table":

"The programs of the Atlantic City meetings are indeed subject to Mr. George's criticism, but I do not think this criticism applies to the programs of any other meetings with which I have been familiar. The various state associations to which I have belonged usually stick pretty closely to the discussion of library topics. Personally, I like to have one or two good speakers on the program who are

not librarians, but who can speak inspiringly on either sociological or literary topics. The chief value of the library meeting is a vague inner inspiration which we gather, and usually we library folk need inspiration on other topics than filing of pamphlets and the use of the photostat. For instance at one of our Pennsylvania state meetings Professor Spaeth of Princeton greatly inspired me in the matter of Masefield and Rupert Brooke and I am sure that I was able to catalog better or even file pamphlets better because of that inspiration."

CHANGED TITLES AGAIN

Mr. Wyer calls attention to the fact that "Poetry of heroism" selected and edited by John and Jean Long and published by G. P. Putnam's Sons, is the same as "Poetry of empire; 19 centuries of British history" published in London by Jack. The publishers' explanation is that "it was thought that the title as worded was not likely to attract favorable attention on the part of American readers. . . . There is no question, of course, of deceiving the public or of securing an unwarranted business advantage. The purpose of such a change is simply to meet, as publishers of experience know it is necessary to meet, the preferences and the prejudices of the bookbuying public."

Another changed title reported by Mr. Wyer is

Our flag in verse and prose. Edited by Robert Haven Schauflier. New York. Moffat, Yard & Co. 1917.

This is printed from the same plates as

Flag day. Its history, origin and celebration as related in song and story. Edited by Robert Haven Schauflier. New York. Moffat, Yard & Co. 1912. (Our American holidays.)

"The two books," writes Mr. Wyer, "are identical in content save that the latter title has different prefatory material. Can the publishers or any ethically minded person give any good reason why even this slight variation should have been made in the title of this book? Such variation can only create the impression that the two books are distinct and will serve to persuade libraries and individuals, too, to buy a duplicate."

ON LETTER HEADS AND DATES

Editor Library Journal:

"Confession is good for the soul," but it seems to me Mr. Lamb was rather rash in exposing himself to hostile criticism along various lines by his letter as given in L. J. 43:304. A librarian is supposed to *know* a lot of things offhand. That Darlington letter-head, County Borough of Darlington, and the cancelled penny stamp and "opened by censor"

(no such notice except in England) would to my mind at once label it as of English origin. What is the use of looking in a gazetteer for 14 U. S. Darlingtons, when that one feature, a penny stamp, means that it is English and English alone? It cannot be Australia for it would bear an Australian stamp.

This is only a county law library but we have a few useful books outside of law. Stepping over to Clegg, "International directory of booksellers and bibliophiles manual, 1914." I had no difficulty in locating on page 412, top of page, "Darlington, Edward Pease Public Library, W. J. Arrowsmith, Librarian" and eight lines of condensed information.

I agree with Mr. Lamb about the mixing up of dates and if librarians cannot stop to write dates correctly they ought to use a dating stamp. And they should have their names printed on letter sheet. Usually they do, but sometimes an assistant uses the letter-head, and then in some cases you are lost. Commercial firms sometimes fail to recognize any relation between my signature at bottom of page and my printed name at top—Wire being such an unusual name. So when in doubt as now I simply put a pen and ink scroll around my name as an index to it.

G. E. WIRE.

*Worcester County Law Library,
Worcester, Mass.*

It may be easy, as Dr. Wire suggests, to deduce, from the penny stamp and the censor's mark, that Mr. Lamb's Darlington letter came from England—but it should not be necessary. We agree with Mr. Lamb that a business letter-head should bear so complete an address that it will be unnecessary to have recourse to books of reference to determine the location of the firm or institution.

H. G. WELLS AND THE LIBRARY

Editor Library Journal:

If the LIBRARY JOURNAL used "The philosopher's public library," by H. G. Wells, in his "Social forces in England and America," (Harper, N. Y., 1914), I missed it. . . . It is too worth while to be missed, so—

No. 6

THE Saratoga conference in the week including the Fourth of July, will be doubly a patriotic gathering—in its discussion and aim as well as in its date. Saratoga of late years has been raised from the low estate to which racing and gambling propensities had brought it down, and it is regaining the public favor in which it was held by past generations. The Springs, at one time sadly commercialized, have been redeemed with beautiful surroundings under the management of the State Reservation Commission, and the enlarged Congress park with the beautiful Trask Memorial by Daniel Chester French affords a delightful recreation center for summer visitors. The hotel at which the A. L. A. will gather is one famous in the history of watering places and capacious almost to the A. L. A. maximum. Thought and talk will, of course, center on the war—the remarkable achievement under A. L. A. auspices during the year since Louisville, and the further plans which the director general and the War Council will lay before the conference. But in the general meetings, and especially in the auxiliary meetings, there will be many other topics of interest, and we hope for a large attendance. In view of the question raised in one quarter whether the money spent in coming to the conference might not be better spent for a Liberty Bond, the answer should be plain, that attendance at these national gatherings should both enhance the spirit of patriotism and provide for patriotic work. The choice should be to use the money for convention attendance. If a library conference had not been held in 1917 the great library work for our soldier boys during the past year would not have been done. It may be added that altho no post-conference excursion has been planned this year, Saratoga is the natural starting point for many delightful trips of a few hours or a

few days' duration, as the one-day trip thru Lake George and Lake Champlain, or a longer one into the Adirondacks, where Mr. Dewey offers the hospitality of his Lake Placid Club to all in attendance on the convention.

PATRIOTISM is not intolerance, and intolerance should not be considered manifestation or proof of patriotism—but quite the contrary. Many who were pacifists before the war, and who still oppose war as such, have been moved by the cumulative German atrocities against humanity, by the whole trend of world events, and especially by President Wilson's exposition of American ideals of peace, to follow him into the belief that only by vigorous and successful prosecution of this war to the end can the world be made safe for democracy or anybody in it, whether living in America or in Germany. There are still pacifists who deprecate not only war but this war. Few of them, however, have been obstructionists, and if, as peaceful people, they have held their peace, they are entitled to respect and to tolerance. This was the fair-minded view of the Portland Library Board in answering the charges made by a sensational newspaper against Miss Hunt, an honored member of the Portland Library staff. The board's finding may well serve as a model in like cases and fully exonerates Miss Hunt from letting her minority opinions interfere in any way with her excellent library work. But sensational journalism still hounded Miss Hunt and the library authorities, until she proffered her resignation as the only peaceful solution of the question so unnecessarily raised. Oregon has made such splendid record as a state in every relation of war work that her patriotism is splendidly salient; there can be no question about that. It is a pity that the record of the state should

have this slight blot on the 'scutcheon thru intolerance on the part of the local press.

It is nothing short of misfortune that politics are again running riot in Ohio and that the expiration of the term of the worthy and effective president of the Ohio State Library Commission, Prof. Park of Cincinnati, has been made the occasion of replacing him by a less experienced head for that important body and for displacing Mr. Charles B. Galbreath, one of the best of state librarians. His successor is a gentleman who held the office during Mr. Galbreath's previous term of dismissal and who has since been an employe of the Democratic State Committee. We have only words of welcome for those coming anew or again into the library circle, but we cannot voice too strongly the feeling of protest which will be so general thruout the library profession, at the displacement by the spoils system of so good an official as Mr. Galbreath. Ohio, despite the good library work at both ends of the state, at Cleveland and Cincinnati, as well as at Dayton and other intermediate points, is a state sadly behind the neighboring state of Indiana in library matters, Indiana being best and Ohio worst in the record of Carnegie libraries. Under the spoils system this could scarcely be otherwise.

THE one possible disadvantage of civil service examinations for important library posts is well illustrated in the admirable letter from Chalmers Hadley of Denver, in regard to the Chicago appointment. Mr. Hadley and Mr. Perry enrolled themselves for the examination quite as much to make sure that the library profession was really represented in candidates as from personal desire or expectation, Mr. Roden's long local experience naturally giving him great advantage in the competition. These two gentlemen did a considerable service to the library profession and to the public in this way, and it is a pity that they should seem to be placed in the position of disappointed

candidates for public office by such mistaken publication in respect to the appointment as has been made by the newspaper press. Both made creditable showing in the examination and came thru it with fine credit to their work in their respective localities, and we trust that the local authorities in their two cities will cordially appreciate the compliment involved in the fact that they came next to the successful candidate.

THE admirable letter addressed by library school authorities to trustees rightly emphasizes the fact that assistants are being taken from library work in embarrassing numbers by the higher remuneration offered by Uncle Sam and by business houses. The government is, in fact, deranging industry in every quarter rather seriously by offering abnormally high salaries for filing work and other light service, in positions which have the disadvantage that work will cease when war conditions are over. This last is forgotten for the moment by those who flock to such positions and leave libraries and other employers in the lurch. That our schools are in the same box with our libraries is illustrated by the utterances of N. E. A. authorities. Unfortunately the remedy is not in the hands of most library boards or school boards. Our most important libraries depend upon state or municipal appropriations, and such demands have been made both upon our states and cities under war conditions that library and school appropriations are trimmed rather than expanded in the year's budgets, despite the need of higher salaries. Trustees are generally willing to provide for adequate pay, if they can get the money to do it with; but here's the rub! If their budgets are curtailed, they cannot increase salaries. It is difficult to see any satisfactory solution of the dilemma during the war, and trustees and librarians alike can only pray that the war may soon come to an end with a just and enduring peace which will again restore normal conditions.

AFTER-WAR NEEDS OF REFERENCE LIBRARIANS

BY CARL L. CANNON, *Assistant, Information Desk, New York Public Library*

IN these times when many new and insistent needs are pressing upon librarians, one may very properly be considered presumptuous for calling attention to still others. A more timely paper, for example, would be devoted to suggesting how to do without much of what we already have. Yet if statesmen and business men find it good policy to give a share of their time to after-war plans, why, indeed, should not librarians mark their example?

In the haze that surrounds what may or may not be true after the war one thing stands out pretty distinctly and that is that the character of reference work in American libraries will be changed appreciably. Even if the struggle should last longer than two years, or three years, it seems reasonably certain, now, that America will be a creditor rather than a debtor nation, that she will have a merchant marine and more foreign trade. It is absolutely certain that she will have a persistent interest in foreign diplomacy, even tho a league of nations should not materialize, and that there will be returned to her a large body of intelligent young men who have lived abroad for some time. Naturally these influences will direct her interests away from home more than before, and should and will arouse a keener interest in world geography, history, languages and commerce. This interest will undoubtedly cause a demand for more reference books written from an American point of view, for none know better than a reference librarian how unsatisfactory for American use are many foreign books. Facts may be as true in one country as in another, but in their marshaling and application they are distinctly national. It has often been remarked, for example, how many times *The New International Encyclopedia* is to be preferred to the *Britannica* in American libraries, despite the fact that it is probably less scholarly. Technical librarians find it difficult to adapt foreign manuals due to differences in practice between the countries. Similarly the relative importance of

and interest in countries and ports, varies if viewed from New York or San Francisco, rather than London or Hamburg. History, also, needs to be re-studied in its relation to the Western continents; American jurists will wish to say something about the future development of international law, and information pertaining to foreign trade offers almost limitless possibilities for re-handling and re-shaping. True, much has been written on these questions, especially since 1914, but it has not yet been condensed, tabulated, and indexed in a form the most satisfactory for reference work. J. Ellis Barker had this in mind when in his "Great problems of British statesmanship" he says: "On Dec. 10, 1914, Prof. C. K. Webster stated in his inaugural lecture delivered before the University of Liverpool:

"You will look in vain for the books which can teach Englishmen the connection of their own country with the political life of the Continent during the nineteenth century. Such books cannot be improvised on the spur of the moment in the midst of a national crisis. . . . Few will dispute that the study of our diplomatic history in the past century is of real and immediate importance to-day. Yet the work has scarcely begun. . . . Neither Canning nor Palmerston is known to us, except by loose and inadequate records."

This statement is exceedingly humiliating. It seems incredible, but unfortunately it is only too true."

If it is true in England where a relatively large amount of thought is devoted to political matters, how much more is it true of the United States whose people derive so much of their information of the Continent from British sources.

As to languages, most noticeable at present is the lack, in some tongues, of dictionaries of graded scope and price. And might it not be permissible, here, to call attention to the genuine need for a good advanced English grammar based on scientific principles?

Credit must, of course, be given to many excellent American books already in the

field, but of these, it must be conceded, those relating to domestic affairs are foremost. Bailey's "Standard cyclopedia of horticulture," Appleton's "Cyclopedia of American biography," and the Wilson company indexes, to mention only three, are examples of useful works of distinctly American origin. The Public Affairs Information Service seems to be a remarkable step forward, not only because it supplies a current bibliography on necessary subjects, but because it is based upon the idea of library co-operation which, despite its early tribulations as well as successes in the United States, still has its best days ahead.

But the result of the war will not lessen interest in the study of our own country, a study which could be greatly aided by the addition of a few much needed reference books. For example, why should we not have a good gazetteer of the United States? Its vast areas and numberless lakes, rivers, towns and mountains probably preclude an attempt for this country on anything like the scale achieved for France by Joanne in his *Dictionnaire Geographique et Administratif de la France et de ses Colonies*, in nine folio volumes, but we might reasonably expect a good one-volume work after the manner of Lippincott's or Longmans'.

Most librarians can testify to the usefulness of *The Statesman's Year Book*. In this a British publisher has done for the United States what has never been so well done here, namely, given in brief condensed form, information (brought down to date each year) about every state in the union. Without wishing to see *The Statesman's Year Book* supplanted (for its information about foreign countries would still make it indispensable) it could be hoped that some American annual publication such as *The New International* or *The American* year books might do for the various states what *The Statesman's Year Book* does for about two hundred and eighty world states, thus giving the fuller treatment required for satisfactory use in this country. This feature could be added without changing the character of the rest of the book, the more easily so, since the service necessary to make the addition is

already built up. But while the American states have a year book which in part meets the demand, there is no such information available for American cities. Perhaps most librarians have been faced with some such request as, "Give me some recent information about Tulsa, Oklahoma, for I am considering it as a future place of residence. I wish to know about its railroads and interurbans, its industrial and commercial possibilities, its schools, churches, government, climate, etc." Now something can be gleaned from different well-known sources such as *The World Almanac*, *The New International Year Book*, and from reports of city bureaus if the library is fortunate enough to have them, but complete up to date facts gathered in one place are not to be found.

There are certain things about cities that every one who is interested in them wants to know, just as there are facts about states and empires in such general demand that the editor of *The Statesman's Year Book* has been able to know them and condense them into his book of 1560 pages. *The Municipal Year Book* does this for British cities, and that it is appreciated is shown by its twenty-one years of successful existence. But while it might serve in some respects as a model for a similar American book, in others it should not be followed exactly. More should be included in the portion devoted to information about individual cities, and the general review of the year's municipal events might be dropped entirely since this is already included in existing reference books.

One wishes to know the meaning or origin of the name of the city, its date of founding or incorporation, a brief chronology of principal events in its history, form of government, system of education, institutions, courts, art collections, museums, libraries, markets, water supply, municipal property, source of income, public works, railroads, trolley connections with important centers or nearby parallel lines, climate, etc. Most of this information will vary little or only in part from year to year.

One wishes also to know the officers of the city, its area in acres or square miles,

foreign and native born population, statement of municipal finance including funded debt, grand tax roll, receipts and expenditures, principal industries, churches, with brief religious, educational, vital and election statistics, miles of streets and important publications issued by the city or chamber of commerce. Such information would, of course, have to be revised yearly, but would have to be complete only for the larger cities. In the *Wisconsin Blue Book* for 1915, the comparative statistics of different cities of the state are analyzed and conclusions drawn in the form of a general summary. A map of the state is inserted showing the location of the larger cities, and their importance is indicated by dots of varying sizes. A general discussion of geographical and other factors that influenced their foundation and growth follows. Brief tables are appended giving the number of establishments (comparative figures for different years) average number of wage earners, value of products, rank among the cities of the United States, etc. Some such yearly summary for the various states would be useful to precede the account of cities considered individually.

The question of course is, granted such a work would be exceedingly useful, who will attempt it? The answer is that several existing agencies are in a favorable position to publish it if a demand were assured. Publishers of year books who have correspondents in the various states with access to the public records could undertake it either as a new work, or as a modification of their present publications; or, such concerns as the H. W. Wilson Company, who possess collaborators in the persons of state and municipal librarians or the publishers of the *National Municipal Review*, who already have a contributing staff at hand.

Publishers of such an annual might depend for its sale not alone on libraries, but upon banks, investment, wholesale and bond houses, and in fact, all business concerns with interests thruout the United States, as well as city and state officials, and numerous organizations interested in city affairs.

That our new post-bellum relationships will make it possible to urge the publication in English of annuals international in scope,

such as the *Internationales Jahrbuch für Politik und Arbeiterbewegung*, the *Année Sociale Internationale*, or the *Geographisches Jahrbuch* is questionable, altho there will be a wide demand for such material. We already have the International Institute for Agriculture at Rome, with its valuable publications in English. Is it too much to hope that more will be organized dealing with other fields of human interest?

In conclusion it may be added that these questions seem rightfully to belong to the field of library discussion. Reference aids such as the above do exist and have paid for themselves in countries less rich than America. We cannot make the books ourselves but interest in our own work and that of our co-laborers, the public, causes us to take some thought as to how we shall answer legitimate questions. Publishers know that we reflect the interests of the reading, working public, and in the past have asked librarians for suggestions both regarding the improvement of their present publications, and the launching of new ones. This fact coupled with our interest gives rise to the hope that perhaps suggestions in this case, if sown in due season, would not fall on stony ground.

LIBRARY ASSOCIATION PLANNED IN BOSTON

A COMMITTEE whose personnel included Helen G. Estey, J. H. Friedel, chairman, E. D. Greenman, D. N. Handy, Ethel M. Johnson, Florence A. Johnson, town room, and G. W. Lee, arranged for a meeting at the Town Room, 3 Joy street, Boston, Tuesday evening, May 21, to consider the advantages of forming (and possibly to form) what may be called the Boston Special Libraries Association, or perhaps better, the Boston Libraries Association, leaving out the word "special" in the light of the growing interdependence of libraries.

It was hoped that Mr. Belden and the members of the examining commission, then at the Boston Public Library, (Mr. Anderson of New York, Dr. Bostwick of St. Louis, Mr. Brett of Cleveland), would be present and extend the discussion to the possibilities of the proposed Municipal Reference Branch.

THE PACKAGE LIBRARY AND ITS INCREASING POPULARITY

BY LENOIR DIMMITT, *Extension Librarian, University of Texas*

ABOUT ten years ago, while serving as secretary of the Wisconsin Library Commission, Frank A. Hutchins came to the conclusion that while traveling libraries consisting entirely of books were a great boon to the people, there was something lacking in the service. Books at the best can only give information which is a year old. In order to form correct judgments in regard to present-day questions the public must have information more recent than books can furnish. Mr. Hutchins decided that this need could be met most satisfactorily by following the plan of the commercial clipping bureaus, that is, the best articles from current periodicals should be clipped and all those on the same subject gathered together into packages. Then these packages, instead of being rented as in the case of commercial bureaus, were to be loaned free of charge.

As an outgrowth of this idea the first package library was established by Mr. Hutchins in the Extension Division of the University of Wisconsin in 1907. Its success was immediate. Other universities seeing the value of this kind of work have since followed the example set by Wisconsin. Among those now having package libraries are the University of Indiana, the University of Michigan, the University of Washington, and the University of Texas, the latter falling into line in August, 1914.

Here in Texas, the package library is in the Division of Information of the Department of Extension, and is called the Extension Loan Library. It has no connection with the Main University Library. Its original purpose was to assist the Interscholastic League debaters, many of whom, scattered thru all parts of the state, had no means of obtaining material on the live questions of the day which they wished to discuss. However, the use of the library was never limited to debaters, and women's clubs, teachers and all other organizations and individuals were invited to use it.

That the establishment of the Extension

Loan Library filled a long felt need of the people was fully proved by the flood of requests which began to pour in upon the announcement of its opening. During the first year of its existence 1570 package libraries were circulated. Since then the circulation has been gradually increasing until in the year ending in September, 1917, there were 2535 packages loaned. Requests come from all parts of the state. There were only 34 counties in the state out of the whole number of 251 to which package libraries were not sent during the last year.

It is impossible to tell how many patrons we have as each library is often shared by a group of people. A list of 2500 borrowers may represent a patronage of 10,000, or more. One teacher writing for an extension of time on her library says, "I have used the package to good advantage in my school. Another school wishes to use it and several other persons besides."

Many letters from all parts of the state tell a story which is very pleasant to hear. A lady in San Benito writes, "This literature I found very valuable, in fact, I cannot over-estimate the value of having access to such a library for all who live in this remote part of the state." There are some very constant patrons who never return a package library without asking for another to take its place.

The majority of the requests received are for material to assist teams in getting up debates, to provide subject matter for club or institute papers, and to furnish material on which school essays can be based.

A list of subjects most frequently called for during a year can be said to show the trend of public thought during that time. In 1916-1917, aside from single tax, which being the subject for the interscholastic debate was naturally in the lead, the six most popular subjects were: woman suffrage; universal military training; increased armaments; immigration (including the literacy test); education (many different

phases); and Mexico. It is interesting to note that the first four of these were also included in the list of most popular subjects in the package libraries in both Wisconsin and Indiana in the same year. Just now we are receiving most frequent calls for libraries on compulsory industrial arbitration, government ownership of railroads, woman suffrage, European War (in its many different phases), Red Cross, and Parent-Teacher Associations.

Sometimes requests are received which cannot be answered by means of package libraries. Perhaps it is for information which should be answered by a specialist. In that case we have the privilege of calling on other resources of the university, for it is the purpose of the Extension Department to place these at the disposal of every citizen of the state. The University of Texas is well able to furnish information along many lines, having at its command professors who are authorities in their particular fields, and having in its possession the largest library in the South.

Recently a club woman who lives in a small town down on the Mexican border wrote that a little group of music lovers there had formed a club and had chosen the opera as their subject for study this year. She wanted suggestions as to the best methods of study and lists of references to any books which we could supply. This request was sent to the head of the Music Department, and it received his prompt attention. When we mailed the answer to her we told her of the generous regulations under which we are allowed to borrow books from the Main University Library for our patrons. The references which we sent her were made to books which we could procure for her in this way.

We receive many inquiries as to where different kinds of information can be obtained. Teachers write to find out what books they can buy which will be of most help to them in teaching certain subjects; farmers want to know where to get information about raising certain kinds of crops, etc.

Now as to the sources from which we gather our material and the way in which

it is prepared for circulation. We have very few books, the basis of our supply consisting of magazines, newspapers and pamphlets. The library receives two copies of three daily papers and 125 periodicals. It is necessary to have two copies because in clipping the articles often overlap. Our maintenance fund is so small that we are forced to do much begging, and it is astonishing how much good material can be obtained in this way when the publishers from whom we are begging are told about the kind of work we are trying to do. We receive many bulletins by exchange with other colleges, state departments, and agricultural experiment stations. Besides, we keep in touch with many organizations, such as the National American Woman Suffrage Association, which send us their publications free.

There are a number of aids available which point out material of value in this work. Many of our periodicals are indexed in "Reader's Guide," while recent pamphlets, bulletins, reports, legislation, etc., are indexed in the *Public Affairs Information Service Bulletin*. A valuable list of free pamphlets is to be found each month in the "Shirt Sleeve Literature" column of the *Wisconsin Library Bulletin*. Then there are some magazines which list current publications on special subjects from which material may be selected. For instance, lists on social questions are to be found in the *Survey* and lists on labor questions in the *Monthly Review of the U. S. Bureau of Labor Statistics*. *American Forestry* under its "Current Literature" column lists publications on auxiliary subjects as well as on forestry. In the September number alone I found references to four pamphlets on such varied subjects as Arbor Day celebration, forest utilization, description and travel, and conservation of resources, all of which, containing good material on subjects for which we often get calls, I obtained free by writing to the publishers.

I have frequently been asked how we begin to make up packages on new subjects. As our periodicals come in we shelve those indexed in "Reader's Guide" and clip the articles as they are needed.

All others are read and clipped at once. The articles which are worth while are classified according to the Dewey classification and shelved in pamphlet boxes. Pamphlets are also classified and shelved at once. It is from these sources that we draw our material if a request comes thru the mail for material on a subject on which no package library is made up.

If it is a new subject for which there is no immediate call, but for which we think there will soon be a demand—perhaps a demand which we expect to help create ourselves—the process is more complicated. We had an instance of this kind a short time ago. Dr. Reed, the head of the Music Department in the university, told me that he wanted to try to help raise the standard of public school music in the state, and asked me to help him by preparing package libraries on different phases of the subject to lend to the teachers. We had no libraries made up on the subject at that time, so had to begin to collect material.

First, the pamphlet boxes containing the clippings and pamphlets were searched and some good articles found. Then, by consulting "Reader's Guide," other articles were found and clipped. This gave us a few packages to start on. Then we wrote to some of the best music periodicals, describing our work and asking for free subscriptions. The publishers of two of the magazines have already responded favorably and have started sending us their magazines. By going thru the *Monthly Record of Current Educational Publications*, references to free pamphlets were found and ordered. Next the notes on new publications in the *Musician* were examined and found to contain references to a few free publications, and on glancing thru an article on public school music in the same magazine two other free bulletins were noted. Then the advertisements in a few music magazines were gone thru hurriedly and again something was found. Next a letter was sent to each of the state music associations in the United States asking for their annual reports containing papers and proceedings. Last, Dr.

Reed was asked to recommend a few of the best text books for public school music. The publishers of these were written to and asked to donate some of their books, mention being made of the good advertisement they would obtain by having their books included in our packages. So all together we are fast making a good collection of material for the package libraries without cost to us except the postage we use on the "begs."

In preparing the clippings to be put in the packages, the long articles are fastened in covers of manila paper or brown Kraft wrapping paper by means of Challenge eyelets. The shorter articles are pasted on manila sheets which are tied together to make a little book of clippings. Credit is always given to the magazine or newspaper from which the clipping is taken. After being classified according to Dewey and given Cutter numbers, all the clippings which are to form a library on a certain subject are fastened together with rubber bands and placed in vertical filing cases.

The cataloging is very simple, only subject cards being made. "Reader's Guide" serves as our subject-heading book. This solves the problem of wording new subjects better than anything else, since it is the vital current questions which are dealt with in the packages. Unfortunately, we have no such help when it comes to solving our classification problems, which are numerous.

For the European War the latest edition of Dewey only gives the number 940.913 with no sub-divisions, and as material on different phases of the war are called for almost every day we were forced to devise a scheme of our own for this subject. Of course, all libraries have similar classification difficulties, but a package library has to contend with them about a year sooner than does the conventional library. About two months ago I wanted a number for food conservation, and not being able to find one which was satisfactory, I went to the Main University Library to see what they were doing with it. I failed to find this much-talked-of subject in the catalog so asked the head cataloger about it. She said no books had been published

on the subject yet, consequently their difficulty in regard to it was still in the future. So we cannot get help from other people's experience, but have to work out our own salvation.

Because the demand in the Extension Loan Library constantly outgrows the maintenance fund, we are forced to refer requests coming from residents of towns where there are good public libraries, or from students of other colleges to their respective libraries. Preference has to be given to the people living in the rural districts and small towns where there are no library facilities.

There is no need of advertising in this library. We indulged in a little of it this fall, and the result was so immediate and

overwhelming that a student assistant had to be added to the staff to help care for the new requests. At present it is taking a staff of four persons on full time and one on half time to meet the demands made on the library, and as we have reached the limit of our salary fund for the year, we dare not do any more advertising, much as we would like for every one in the state to know about the library and take advantage of its loans.

Indeed, the people in all the states where package libraries have been established have seized the opportunity so eagerly for obtaining the kind of information offered by them that it is surprising that more universities have not established like institutions.

LIBRARY VENTURES IN THE KENTUCKY MOUNTAINS

BY MARY ELIZABETH LANE, *Librarian, Talladega College*

It was with a sense of high adventure, that I went last summer, accompanied by one of the Talladega College teachers, into the fastnesses of the Cumberland hills in Kentucky. First, from Talladega, a circuitous route to Lexington, Ky., then straight eastward to Ashland, Ky., and from there back down to the southwest to Wayland, Ky., a little mining town on a spur of the C. & O. Railroad. There we were met by Mrs. Arthur Lloyd, founder of the Ivis Community Center, and a stalwart mountaineer, the possessor of a jolt-wagon, and a pair of mules. All afternoon we rode, as we thought, in peril of our lives, thru creek bottoms, and over rocky trails, getting farther and farther back into the hills. Miss P. and I were seated at the back of the wagon on my steamer truck. The brake was on my side, and every few minutes, I ducked to escape having it drag over my head.

At dusk, we came to Caney settlement, on the creek of that name, where the Lloyds have established the second of their community centers. Picture to yourselves, a few unfinished buildings—Wellesley Cottage, a schoolhouse, a barn, and a number of small offices on a sloping hill, backed

with magnolia trees, and facing across a narrow road, another hill rising abruptly, and you have the settlement as we saw it that night. Later in the summer several other buildings were erected. Two or three mountain girls had supper ready for us in the temporary shack which then served for kitchen and dining room. The girls were eager in their hospitality. They had placed a small wood fern in the center of the table, and they very evidently wished us to enjoy our supper of baked chicken and biscuit.

Next morning in the same jolt-wagon, we journeyed on toward the southwest to Ivis, where the Lloyds' cottage and the library were to be in my care for the summer. Ivis is scattered along the main creek of Troublesome, with many cabins up the branches, and in the coves. The families are wide awake and progressive, with a keen sense of their responsibility for the education of their children. We found them people of sterling qualities, cordial and hospitable to strangers who came among them.

At a spot along Troublesome, where the valley widens more than at any other place for miles, there is a long rambling frame

building, with a wide veranda and two or three flights of stairs leading up to it. Situated on the slope of a hill, in a commanding position in the most beautiful valley which I saw in Knott county, it is indeed ideally located. Many a night as I sat on the top step of the veranda, and watched the sun go down behind the cleft in the hills, followed by the wonderful afterglow, the dimming light, and the crescent moon and Venus standing out in the purple sky, have I thought, This is indeed Happy Valley. Shut off from the rest of the world, away from active preparations for the war, it was difficult to realize the horror of it. Not that the mountaineer has no means of knowing what is going on. Many of the families have their daily paper from Cincinnati or from Huntington, West Virginia.

On entering the clubhouse, we found on the first floor two or three as yet unfinished rooms. One was the library room, where I found over three thousand well-selected volumes. Back of this is another unfinished room intended as a kitchen for domestic science lessons, while upstairs, running the entire length of the building, is the unfinished hall, with a few rough boards for seats. Here, we held our so-called "Moonlight meetings." *Every* Friday night all summer, we gathered for a talk. One night, it was "What is going on outside the mountains"—a war talk by a young lady from New York City, who was doing some research work on Caney. Another night I read some letters from a friend who has done canteen work on the war front in France and in Belgium. Other talks were given by a Louisville friend, and by Miss Ward of Hunter College, New York City. One night the county demonstration agent from Hindman came over and talked about the necessity for planting winter wheat, and raising more hogs. This last I considered unnecessary for I met them all along the way on my daily trip to the post office.

When Mrs. Lloyd first started the library, she sent to the Kentucky Library Commission for an organizer, so I found it in good shape—classified by the simplest form of the Dewey decimal system, with a card catalog, and Gaylord posters placed

about the really attractive room. Elizabeth Stacey, the young mountain girl who had worked with Mrs. Lloyd to get the library in shape, came daily to assist in circulating books and to work on the cataloging of books which came in every day by parcels post. She has executive ability of a high order, combined with a desire to be of use to her people.

Later in the summer she went over to Caney to assist Mrs. Lloyd with her clerical work. On the morning in September when I left the little railway station at Lackey and saw her for the last time, she was on her way to the tiny village of Boscoe to establish a small branch library in a store. The storekeeper had asked Mrs. Lloyd for books to keep in his store, in order that he might help the school teachers of the community. Himself, uneducated, he desired to give to others opportunities from which he had been debarred.

In the hills everybody works at planting and hoeing the corn which is the staple crop. Men, women, boys and girls, all toil on the steep hillsides or along the creek bottoms, in order that there may be no failure of the crop. One girl was characterized by her fellow laborer, a man, as "the hoeingest girl on the creek." About the middle of July after last hoeing, the public schools open and continue in session until the end of February. Very little children rarely go to school after winter sets in, for the always atrocious roads are then at their worst.

After corn planting, just as the schools were opening, I had a class in library methods, which met three afternoons a week. There were six young women in the class, to whom was taught classifying, cataloging, current events, and English literature. In the fall one of these girls went back to the Hindman Settlement to continue her high school course, and two went to Berea. Another I left in charge of the Ivis library; but have heard since that she has gone to Boscoe to care for the little branch library there.

Traveling libraries have been sent out from the Ivis Community Center Library into the towns round about. It was a regret to me that I did not have the opportunity to go to the schools with the

boxes of books which I got ready for them. But a series of rainy days early in September, muddy roads and impassable creeks, made it impossible. Humans might have stood the trips; but we "allowed" that the books could not.

One Sunday afternoon, a neighbor, who taught all the week miles away on Beaver Creek, came to get some books to carry in his saddle bags with him on his next trip to the school. I was struck by one remark which he made about a certain book. Opening it, his eye caught one sentence which he liked. "There," he said, "I want that book. If you don't get but one sentence from a book which helps you, it is worth while." How many of us in trying to swallow an entire book, get nothing at all, finally.

Very much might be done for the schools all over the counties for miles about, if the valuable books housed in the Ivis Community Center Library could be carried to the school houses. This is quite an undertaking because the roads are notoriously bad. It is to be hoped that the road commissioners will see their way clear to get good roads thru those shut-in counties in the country of creeks, thus opening to the world a charming section of our country.

On a glorious September day we came out of the hills, and heard again, for the first time in three months, the sound of trains. Behind, we left kind friends who were sending their sons to the training camps and their daughters to colleges—people who in a few generations will no longer be shut in behind the hills.

At the third annual Better Community Conference held at the University of Illinois, Apr. 4-7, the following librarians appeared on the program of either a general session or a section meeting to present the relation of the public library to the community life: Anna M. Price, "The press and the library"; P. L. Windsor, "The campaign for camp libraries"; Helen Goodnow, "The library and the school"; Edna Lyman Scott, "The library and young people"; G. A. Deveneau, "The library and the farm"; F. K. W. Drury, "The library and the minister."

THE LIBRARY MOVEMENT IN MONTICELLO, UTAH

[Editor's Note: Mrs. Palmer is the wife of a man in the U. S. Forestry Service, who has been located at Monticello, Utah. She has entered wonderfully into the spirit of pioneering life, and besides bringing up her own family of children has entered a desert claim, is now teaching in the public schools, and is the heart and soul of much of the life of her community. The following paper was submitted as one of the themes for the renewal of her teacher's certificate.]

OUR little hamlet is far from the maddening crowd, being located one hundred and five miles inland, south of Thompson, Utah, on the D. & R. G. railroad.

While our natural conditions are ideal, our dry farms the finest in the country, our herds of Hereford cattle second to none, yet one may imagine how limited our opportunities for culture are. True, we have God's great out-of-doors and the good people have lived near to Nature's heart and have read the "sermons in stones," but there is a broader culture that comes only with an intimate comradeship with books—the best literature.

This medium of culture has until recently been denied the major portion of our community. They all love books—are hungry for them. It seems a shame that no opportunity has been given to satisfy this literary hunger.

Several forces have contributed their quota to this state of affairs. The stern struggle for existence in the earlier days was the dominant factor and crowded out the finer things of life. Since the sage brush has been conquered and the people have had a few leisure moments to stop and take stock, they have come to realize that while they measure up favorably to their fellow man, physically, spiritually and mentally, yet one phase of development has been neglected. This is the spiritual uplift, the development of the inner man. This development can be attained thru the medium of good books—becoming acquainted with our best literature. From every point of view this is desirable in the making of citizens, since good books provide food for the imagination and the heart, inspire ideals of high and noble living and clothe beautiful thoughts in the pure and lovely garb of gracious language. In other words, literature should stimulate us and furnish something for us to emulate and thus make us richer.

Some four years ago our people began agitating the library question, and the movement receive a hearty response from every family in Monticello. Each family contributed at least twenty-five cents to the library fund and at the next municipal election a library tax was voted. This tax is still in force, but does not furnish adequate funds for all library purposes.

There was already a small nucleus for a library. A few books, possibly one hundred in number, mostly reference, belonged to the school, and the Young Ladies' Mutual Improvement Association had about sixty books on hand.

A library board of six members was duly appointed and they decided to combine the two small libraries into a co-operative concern and name it the Public Library of Monticello, Utah. The municipality, the school district, and the Mutual Improvement Association were heartily in accord with the movement. The town council agreed to provide a janitor and lights. The school board agreed to furnish a room for the books, also fit up a reading room, furnish fuel, and provide a librarian. The Mutual Improvement Association agreed to turn in the reading course books each year. This arrangement was highly satisfactory as it left our small library tax intact to purchase books and magazines.

A room was fitted up in the school-house as a reading room, and kept open three nights a week. The teachers took turns acting as librarian. The Newark card system was installed and the library in a measure systematized.

Recently on Miss Downey's recommendation, the full set of books used in the classification and cataloging of libraries was purchased. Last summer Isabelle Redd, former secretary of our library board and a very public-spirited woman, took at her own expense the library course at Chautauqua, New York. On her return she was made librarian and immediately proceeded to classify our library. This classification revealed not only our weak points but our strong ones. The library was found to be strong in literature, fiction, history and the useful arts, especially agriculture.

We now have approximately nine hun-

dred volumes on our shelves. Mr. F. B. Hammond, Jr., of Moab, Utah, enriched our library by donating ninety choice volumes of historical tales, also many reference books. We have also received many donations from other public-spirited men. The library board at a recent meeting authorized the expenditure of \$74 for new books.

The *Ladies' Home Journal*, *Saturday Evening Post*, *Literary Digest*, *National Geographic Magazine*, *Utah Educational Review*, *American Forestry*, *Youth's Companion*, and numerous newspaper exchanges come to our reading room. Last year the public school conducted a magazine shower and the reference room was enriched by some eighteen hundred worth-while magazines.

Our great difficulty has been to secure the fifteen cents per capita school tax. There has been a minimum expenditure of this fund to date and our most urgent need is more children's books. It was a pleasant surprise to the purchasing committee when George A. Adams, president of San Juan school board, recently turned over \$53 per capita tax. No more will the librarian be asked "Aren't they ever going to buy any more books for the boys and girls?"

Another source of revenue was the establishment of a Lyceum course of lectures. This Lyceum course was quite well patronized, the season tickets of twelve lectures selling at \$2 each, or 50 cents for one lecture. After all expenses were paid there remained \$82 which was divided equally between the Mutual Improvement Association, which was purchasing a piano, and the library, to purchase reference books. Dr. Gowans kindly consented to help the good work along and the Lyceum had the pleasure of a lecture during his recent trip into San Juan.

Last spring the library board concluded that the public school teachers had done their full duty as librarians. The funds still being at ebb tide and the shelves crying for new books, the library board decided to have each of the six members pledge themselves to care for the library one month. This plan worked out very

nically and carried us up to the time our librarian returned from Chatauqua.

We are planning to give the public library permanent lodging in the old schoolhouse when our handsome modern building is completed. The location is ideal for such a purpose, and the grounds are commodious and attractive, lending themselves readily to a civic center plan. The building with a few alterations could be used for at least ten years. Before that time has elapsed, we hope to be in a position to apply for a Carnegie building.

Our field is growing and we are constantly serving a larger number of people. We have a large settlement of dry farmers east of us who are eager to patronize us and it is surprising how many of our local people are acquiring the library habit. Then too when the boys come in from the range there is some place for them to go for a spiritual uplift and they do not need to congregate on the corner and whittle.

The establishment of a Library and Reading Room at Monticello has long been my "dream child." I fully believe that the coming years will see him develop into a sturdy youngster who will prove of inestimable value to the present inhabitants of the "former home of the primitive man in Sunny San Juan."

WORK THAT PAYS

A FEW weeks ago, a man who had been recently transferred from one Cleveland branch to another, after asking for several books, stopped at the librarian's desk and paid tribute to the library. "I had to stop school when I was fourteen years old and go to work," he said. "I didn't know very much and I knew it, and so I made up my mind I'd get my education on the side, if I could. Miss Wood and Miss Manche at Woodland planned out a course equivalent to a high school course, including mathematics and science as well as the arts, literature, and history, and I dug away at that. Then they worked out a higher course and guided me thru that, and I feel that everything I have in the way of knowledge I owe to the Cleveland Public Library. It's a great institution."

THE STATE SUPPORTED LIBRARY ACTIVITIES IN WASHINGTON

A most valuable document and one that will bear much careful study is the "Report on a survey of state supported library activities in the state of Washington" made by the State Library Advisory Board to and at the request of the Washington State Library Commission.

In 1915 the present State Library Advisory Board was appointed for the purpose of advising the State Library Commission in regard to the control of the miscellaneous department of the State Library, the Traveling Libraries and the State Historical Library, as well as to give advice and counsel to all libraries and communities wishing libraries in the state, and to consider the desirability of certain proposed new measures.

The board was organized with the following members: John Boynton Kaiser (M. L. S.), President, Tacoma; Mrs. Josephine C. Preston, vice-president, state superintendent of public instruction, Olympia; J. M. Hitt, state librarian, secretary, *ex-officio*, Olympia; Mrs. Henry McCleary, McCleary; Mrs. H. W. Patton, Hoquiam; and Mrs. O. K. Williamson, Prosser.

In order to enter upon its new duties with a full understanding of library conditions in the state, the board planned a survey of all state supported library activities. Its plan of operation and report is patterned after that of the New York Bureau of Municipal Research which has conducted so many successful surveys: (1) To study existing organization and methods; (2) To make a critical appraisal thereof; and (3) To offer constructive suggestions for corrections. The recommendations made are of two kinds: First, those which may be made effective without change of present governmental powers; second, those which require amendment of the existing powers and organization.

The state-supported library facilities of Washington consist chiefly of the State Library and the State Traveling Library Department under the State Library Commission and the State Law Library in charge of the Supreme Court, all at Olympia; the libraries of the State University

in Seattle, the State College in Pullman, and the three Normal School libraries at Cheney, Bellingham and Ellensburg.

There are also libraries more or less developed in each of the state's charitable, penal and reformatory institutions thruout the state and small special libraries in the offices of various state departments and commissions in Olympia. The state archives are mainly in the separate state offices as yet, tho some have been transferred to the care of the archives commission and deposited in the State Library under the immediate supervision of the State Librarian, who by law is named State Archivist. The Washington State Historical Society in Tacoma is maintained by state funds and has a small unorganized historical library.

The field was divided under the following headings, and a report made giving the findings and recommendations of the special committee investigating each: State Library, Library extension, County libraries and rural school library work, State educational institutions, Library training, Libraries in state charitable, penal, and reformatory institutions, Work with foreigners. The reports are all printed in full.

Summed up very briefly, the findings of the board are "that primarily the state-supported library activities in Washington need greater financial support, a greater measure of responsiveness to visible needs and opportunities on the part of the Library Commission, and an infusion into the service of workers whose professional ability, personality and capacity for leadership will create the desired responsiveness in the commission and inspire in the legislature that confidence which deems it a privilege to be allowed to share in making certain the achievements that are possible.

"These are the needs. In the judgment of this board a new commission law is not a *prime* need. The consolidation of two boards which, combined, number seventeen members, into one of five, or the elimination of both with a transfer of their combined duties to the State Board of Education, seems to us too obviously advantageous to require argument."

Made specific, the recommendations are summarized as follows:

A. THOSE WHICH CAN BE MADE EFFECTIVE WITHOUT A CHANGE IN EXISTING LAW

I. *The State Library.*

1. The development of a State Library policy true to the present day conception of the State Library's part in the state's program of library service. Include—

a. A more liberal construction by the commission of its powers, duties, privileges and opportunities, and an exact definition of the respective functions and limits of the State Library work and Traveling Library work.

b. A definite effort to secure larger appropriations, at least \$18,470, for the State Library for the biennium 1917-1919, to be apportioned as outlined on page 51 of the report.

c. Provide a trained cataloger for the State Library.

d. Provide a stenographer for the State Library.

e. Provide larger funds for books and binding.

f. Provide the facilities and staff necessary to render special service to the legislature and state officials by means of a legislative reference department.

g. Require at least one year of professional library school training in all employees hereafter added to the State Library's technical staff.

h. Provide facilities for handling the archives entrusted to the care of the State Librarian.

i. The reference collections of the State Library should provide a special medical library for physicians.

II. *Library Extension.*

1. The development of a policy of library extension true to the present day conception of extension work in the state's program of library service. Include—

a. An effort on the part of the Library Commission to secure adequate financial support for the various forms of state aid contemplated by existing law, viz.: A state library organizer and field worker; the publication of a quarterly bulletin of library information; and money grants to small public or school libraries distributed according to rules established by the commission, somewhat similar to the New York plan.

b. A correlation and differentiation of the work of the State Library and the Traveling Library Department by a ruling of the commission definitely fixing their separate and distinct functions and co-operative possibilities.

c. The addition of a cataloger to the Traveling Library Department.

d. A definite effort to secure larger appropriations for extension work and a Traveling Library Department budget of at least \$19,915, as detailed on page 63.

e. Insistence on at least one year's attendance in a training school for librarians as a

minimum requirement for all additions to the technical staff.

III. County Libraries and Rural School Library Work.

(See B, 1, 2, below.)

IV. State Educational Institutions.

1. The formulation on the part of all concerned of a policy for the collection, preservation and publication of state historical data acceptable to the State Historical Society, the State University (its Department of History and its library), the Historical Department of the State Library and to the State Archives commission.

2. A conference of representatives from the State University, State College, State Historical Society, State Library, Traveling Library and Library Commission to determine such phases of a co-operative program of library service as may be mutually advantageous, such a conference to discuss among other things:

a. In what fields is each library unusually well prepared to answer specialized reference questions?

b. What special facilities have the University and the State College for co-operating with a State Legislative and Municipal Reference Bureau if one should be established?

c. In view of the distance from the Traveling Department to Eastern Washington, should the State College thru its extension division or library attempt similar service?

d. Should the state have a second state library organizer and field worker stationed at the State College?

e. How best may the library extension work of the various agencies be co-ordinated?

f. What rules for interlibrary loans would be most beneficial to all concerned?

g. What union catalogs or union lists of periodicals are advisable?

h. Can a satisfactory policy of building up special collections on different subjects in each institution be worked out?

V. Library Training.

1. That the Department of Library Economy at the State University continue its present policy looking forward also to a time when outside demands will warrant its development into either a full one or even two year graduate library school leading to a professional degree.

2. That if consistent with the other requirements of the curriculum and if arrangements can be made satisfactory to all concerned, the library department students do a certain amount of practice work in the various state-supported libraries needing professional help.

3. Require a formal course of instruction in the use of libraries of all university students planning to teach just as the State Board of Education requires such a course as a prerequisite to graduation from normal school.

4. That the feasibility of a summer school course in library training be investigated.

VI. Libraries in the State Charitable, Penal and Reformatory Institutions.

1. In the state's program of library service include specific provision for the development of institutional libraries and for their adequate supervision:

a. By the part time service of the library organizer and field worker recommended under Library Extension; or

b. By adding to the Board of Control's staff a qualified institutional library organizer.

c. An adequate fund and a well-selected book supply.

d. Ascertain whether the Department of Library Economy at the State University can co-operate on the solution of this problem.

e. Develop co-operation between the other state-supported libraries and the libraries in these institutions.

f. Supply each institutional library with A. L. A. Handbook no. 10, entitled "Manual for Institutional Libraries."

VII. Work with Foreigners.

1. Let the state, thru a special library service and as indicated in the report, participate more effectively in the increasingly important problem of Americanization.

VIII. Budget.

1. The State Library budget recommended by the Advisory Board for 1917-1919 calls for \$18,470; the Traveling Library budget for \$19,915; the Advisory Board if continued for \$875.

2. The Library Commission should present a Commission budget including the State Library and Traveling Library.

IX. Miscellaneous.

The question of centralized book purchasing by the Commission on behalf of small libraries should be seriously investigated.

X. The Commission Should Make a Biennial Report to the Governor.

(Rem. & Bal., Sec. 6978.)

XI. The Commission Should Clarify by a Ruling the Conflicting Laws Relative to the Distribution of State Documents.

XII. The Regular Inspection of Libraries Not Owned by the Public but Free to Them Should Be Provided for.

(Rem. & Bal., Sec. 6972.)

B. RECOMMENDATIONS REQUIRING LEGISLATION TO BECOME EFFECTIVE

I. Library Legislation.

1. County public libraries should be made possible in Washington as elsewhere by the immediate passage of a county library law based on the bill provided on page 113.

2. The consolidation of school libraries and small public libraries where such consolidation would be mutually beneficial should be made possible by such legislation as is proposed.

3. Libraries in cities of the first class should be granted an adequate minimum of support (at least three-quarters of a mill on the dollar of assessed valuation) below which city councils cannot go. (Full text of proposed bill on p. 119.)

THE GATES MEMORIAL LIBRARY IN PORT ARTHUR, TEXAS

THE formal opening of the Memorial Library, "a gift of Dellora R. Gates to the people of Port Arthur," Texas, was held Saturday, May 18, at four o'clock in the afternoon. The exercises, over which President A. J. Price of Port Arthur College, presided, included music by the Port Arthur Band; presentation of the gift, by Mrs. Dellora R. Gates; presentation of books, by Herbert Henderson, president of the School Board; acceptance on behalf of the city, Mayor John W. Tryon; and acceptance by the Library Commission, R. L. Drake.

That Port Arthur to-day is one of the controlling seaports of the Gulf, that it is enjoying a commercial supremacy unprecedented in the South, is almost entirely due to the vision of John W. Gates. It was he that saw the latent possibilities in a barren marshland; his faith inspired the people of a little struggling village, at the brink of bankruptcy, to see thru hardship possibilities of a great future. It was he that gave money liberally for the development of the commercial, physical and moral welfare of Port Arthur. It is peculiarly fitting that his wife should make possible in memory of her husband and son, a Public Library where the people of Port Arthur, now on a firm commercial basis, may attain a higher life thru greater intellectual development. The people of Port Arthur love Memorial Library—not so much because it is a princely gift, and not so much because of its architectural beauty, but rather because of the spirit that prompted it. This spirit is as truly a part of the library as the columns that adorn the entrance.

LOCATION

Midway between Lake Shore drive and Proctor street, facing Stilwell boulevard, and just across the street from a group of buildings, consisting of the Port Arthur College, Dormitory and the High School, stands Memorial Library. The grounds, covering a plot approximately 385 x 320 feet, have been planned and designed by the Griffing Brothers, landscape gardeners. The park is beautifully set with camphor,

oleanders, pomegranate, *ligustrum japonica*, roses, crape myrtle, *arbor-vitae*, cape jasmine and palms. The semiformal arrangement of the grounds, with the profusion of tropical plants, combined with the classical perfection of the architectural line of the building, forms a perfect harmony.

ARCHITECTURE AND CONSTRUCTION

The library is built of reinforced concrete. The exterior walls are of Bedford, Indiana, limestone backed with brick and hollow tile. Six large columns of limestone, 23 feet high and 2 feet 3 inches thick at the base, and slightly tapering to their richly carved caps of limestone in classic Renaissance style, adorn the loggia. The roof of the building is a five-ply Texaco roofing felt, laid over a foundation of concrete, and has a top finish of Ludowici of 6 x 9 inches quarry tile.

The floor is of damp-proof cement. The building is absolutely water and fire proof.

As architects, Mrs. Gates chose a firm of national reputation, Warren & Wetmore of New York City. The contractor was the George A. Fuller Contracting Company of New York, Chicago, and Houston.

INTERIOR

Entering the building thru the loggia, one comes into the vestibule which is separated from the reading rooms by low partitions of glass and glazed metal. The floor is of marble tile. As one faces the loan desk, he sees to his right the adult reading room, to the left the reading room for children. These rooms are plastered imitation limestone to match the exterior. The rooms have rich ornamental friezes and cornices. The ceiling is finished to correspond. Much of the wall space is occupied by the windows which in themselves are very ornamental. They measure 7 feet 8 inches x 15 feet 4 inches, and have small panes in the Dutch style.

Back of the loan desk, is the reference room. In the front of the building at the corners are the toilet rooms with the latest equipment in sanitary engineering. The walls and floors are of white marble tile. The wainscoting for the entire building is of marble. To the rear on the right is the workroom; to the left is the librarian's office.

INSIDE AND OUTSIDE THE GATES MEMORIAL LIBRARY,
PORT ARTHUR, TEXAS

A mezzanine floor extends above the librarian's office, work room and toilet rooms, which is used for reading rooms and magazine files. The rooms are connected by galleries four feet wide.

Gas-steam radiators furnish the heat.

EQUIPMENT

The furniture for the library was installed by Library Bureau and Art Metal Construction Company. The shelving is of metal in olive green finish. The loan desk, attendants' desks, chairs, catalog cases, periodical cases, newspaper racks, bulletin boards and filing cases are oak finish. The very best of everything has been selected. The doors and other wood of the library are of quarter sawed oak. The floors of the entire building are covered with dark green battleship linoleum.

SIZE

The exterior of the building is approximately 90 feet wide, 70 feet deep, 40 feet high. The loggia is 13 feet 4 inches by 58 feet 5½ inches. The ceiling height is 29 feet. The rooms are divided as follows:

Adult reading room, 33 feet by 37 feet; children's reading room, 33 feet by 37 feet; entrance to loan desk, 17 feet; reference room, 14 feet 10 inches by 40 feet 8 inches; librarian's office, work room, and reading rooms, each 12 feet 4½ inches by 15 feet 8½ inches; toilets, 11 feet by 12 feet.

THE LIBRARY BOARD

That the Memorial Library is a gift to the entire people of Port Arthur is clearly illustrated by the representative nature of the library board. In fact, the composition of this board is something unique in the development of library administration in Texas. Men as individuals are not chosen as members of the board, but representatives are chosen from every interest that has made Port Arthur what it is to-day. The resident superintendent of The Texas Company, the resident superintendent of the Gulf Refinery, the superintendent of the Kansas City Southern Terminals, the commissioner of public improvements, superintendent of schools, president of Port Arthur College, president of Board of Education of Port Arthur Independent School

District, and president of the Department of Federated Clubs of this city, constitute an automatic library board. The members of the board representing as they do civic, business, technical interests and school system, indicate the harmony existing between representatives of the various interests of the city in their mutual efforts for service to an entire people.

BOOK INSTALLATION

Public spirited citizens of Port Arthur have raised a fund of \$5000 for the purchase of new books.

In conference with the library board, the librarian selected experts along the line of each field of knowledge to meet in consultation with her in the selection of books for each subject. For instance, the science books were selected by the chief electrical engineer of each refinery, the chief chemist of each refinery, the head of the mathematics and science departments of both the High School and the Port Arthur College. The fine arts committee comprised the president of the Symphony Club, the heads of the departments of music and art of both the High School and Port Arthur College, a representative of the Griffing Brothers' Nursery, and a representative architect of the city. Every committee had available for its use thru the librarian practically every American Library Association publication, such as guides, comments, lists, bibliographies, and materials of like nature.

RELATIONS WITH THE SCHOOLS

As regards the schools, the following points roughly outline the general policy:

(1) A branch library of 3000 volumes will be maintained at the new Franklin School building. This library will serve some 2700 students. The books will be accessioned and administered from Memorial Library. Periodicals of professional nature will be made available for the fifty-seven teachers of that building. Supplementary sets of books will be handled from the library.

(2) The students of the high school and college have free access to the library.

(3) The school board has purchased fifty of the leading periodicals covering the work of every department. These are

handled by the librarian thru the principals of the respective buildings.

(4) The librarian is planning to give a lecture once each term to each class in the High School on the use of reference tools, indexes, atlases, almanacs, year books and encyclopedias.

(5) A training class, consisting of sixteen girls, is conducted by the librarian. These pupils receive full high school credit for the course. The course comprises five hours' laboratory work each week, and one hour lecture. The use of reference books, the Dewey decimal classification, the building of numbers, and the preparation of the books for the shelves, are emphasized. References desired by ministers and others are kept on file and handled by this class.

RELATION WITH THE CLUBS

The close correlation between the clubs and the library may be briefly summarized.

(1) The president of each club in Port Arthur, together with an appointee of each respective club, were given representation on the book committees.

(2) The librarian is corresponding secretary of the Department of Federated Clubs and all club correspondence becomes a part of the records of her office.

(3) The librarian was consulted in the selection of the year's programs, and these were submitted to her for bibliography on available material.

(4) The librarian and assistant librarian attend all club meetings which their work permits.

(5) The president of the Department of Federated Clubs shall each year automatically become a member of the library board.

MRS. EDW. S. CARTER, *Librarian.*

Books on explosives are being removed from the open shelves of public libraries all over the country, in compliance with a request from the Military Intelligence Branch of the federal government at Washington. In the case of books the execution of the request is a comparatively simple matter, but complications have developed in a number of instances where files of periodicals are involved.

INSTRUCTION FOR PAGES

LIKE other large libraries the Los Angeles Public Library has found the page problem difficult to solve. The open shelves, the great number of visitors, and the large daily circulation, make it difficult for even the most energetic of pages to keep the books always in neat order on the shelves. Then energetic and intelligent pages are not easy to find, and after they have been carefully trained, they often find more profitable occupations elsewhere. To meet this problem we have given a course of six lessons, each one hour long, to all the pages who have been in the library less than three months, and each new page is to be taught the same essentials before he begins to work.

The aim of the course is to give the boys a knowledge of the elementary principles of classification and alphabeting and a feeling of responsibility as a part of the library staff. An outline of the instruction planned was sent to the heads of departments for criticism and amplification, and many practical details were added to the theoretical teaching. Monthly staff meetings of the pages are held to give further emphasis to points not fully grasped in the lessons, and to stimulate an interest in books.

The first lesson is devoted to an explanation of the Decimal classification. The need for classification and for careful arrangement and the psychological effect of orderly shelves on the reader's attitude toward the library are discussed. The boys learn why a book out of place is lost. After a brief outline of the ten classes and the mnemonic features of the D. C., books are arranged by class number. Before the next lesson the boys spend an hour examining the D. C. and learning the ten main classes.

Book numbers are explained in the second lesson. The Los Angeles Public Library uses both Cutter and colon numbers, and peculiar modifications in 800 and 100 for biographies of authors and philosophers, and an exercise based on the intricacies of arrangement in these classes is most profitable. Boys who have been in the library for months suddenly realize the reasons for the arrangement, instead of doing the work

mechanically. In the third lesson class and book numbers are reviewed, and a difficult problem given which fixes these principles in mind.

Alphabeting in the fourth lesson covers the arrangement of fiction and the rules for anonyms, pseudonyms, prefix names, compound names, women's names and compilation without editor. This gives an opportunity for a few words on the characteristics of individual books, and what may be learned from handling them and reading only what is printed on the outside if this is done intelligently.

In the fifth lesson practical suggestions on shelving are given: how to arrange books by class number first, how to use the truck, how to place books on the shelves, looking at the numbers both before and after, how to avoid too many books on the shelf, how to use book supports and what to do with oversize books. Other duties of pages were mentioned, such as pasting dating slips, keeping catalog trays in the case, regulating ventilation and lighting, and watering the plants. One boy naively suggested that a duty of the page in the periodical room is to tell the men to take their hats off and keep their feet off the rounds of the chairs.

The personal attitude of the pages and their responsibility to the public are the subjects of the last lesson, but the ethical purpose is so disguised and the moral precepts so tactfully given that it is the most interesting of all. The library spirit and the possibility of service to the community are developed thru the old illustration of books in chains in contrast to the modern ideal, and it is a joy to see how interested the boys are in the pictures of old libraries, and phrases trite to librarians are anything but commonplace to them. The share of the pages in the work of the library is more than keeping the books in order; courtesy toward the public and the other members of the staff, and such minor virtues as promptness, neatness, no unnecessary talking, and efficiency are needed. To sum up the whole duty of pages, they were told a typical Alger story, in which the luck of the hero brings him impossible glory, and in contrast the true story of an eastern librarian whose success was due to his

own efforts combined with persistence and a love of books.

The boys have not become unnaturally good at once, but their efficiency has increased since they understand the reasons for many things they did in a haphazard way before. Since they have learned a polite formula to say to patrons who interrupt them as they shelve the books, they have less temptation to shout "Gang way," pushing their truck thru the crowd of borrowers, and complaints about the rudeness of pages are no longer heard.

The examination given at the end of the course covered all the points mentioned above and showed that the essential elements were really mastered. Perhaps the most enlightening were the answers to the question, Name as many duties of a page as possible. One boy wrote: "The right ways are Kind, Clean and Useful. Do not talk with other pages, and if a patron is in your way always say 'Pardon me, I have to put this book away.' Pick papers from the floor. Keep books straight and off the table. Open the windows. Be polite. Keep the light good. Keep busy all the time. Do not talk to the public and send them to the information desk for information. See that plain labels are on the books."

If all the pages are "kind, clean and useful" need we ask more of them?

MARION L. HORTON, *Instructor,*
Library School of the
Los Angeles Public Library.

THE PENDULUM SWINGS BACK IN OHIO

JOHN HENRY NEWMAN of Columbus, former state librarian and fire marshal, on May 10 was again named librarian to succeed C. B. Galbreath, Republican. The position pays \$3000.

For several months Mr. Newman has been in charge of Democratic state headquarters. He will begin his new duties June 1.

At a reorganization meeting of the Library Commission held May 10 Clayton A. McCleary, Columbus member, in whose law office the commission met, was elected president to succeed C. W. Park, Cincinnati, Republican, whose term expired.

THE SOLDIER IN THE LOUISVILLE FREE PUBLIC LIBRARY

CAMP Zachary Taylor lies just outside of Louisville, but it has come to be the center of almost every branch of activity in the city. The presence among us of thousands of soldiers has necessitated a reorganization of every sort of work and recreation on a war basis. The community has met the demands and every effort has been made to handle the problems presented in a broadly intelligent manner, Germany is not the only evil influence to be fought if the world is to be a safe place, and many who are not in uniform are banded together into an army which is fighting real battles a long way behind the front lines.

The library has been called on to do its part and has had to meet an entirely new need. This has been a peaceful, unmilitary community, reading a great many books in the course of a year. We have not needed the great collections of specialized material necessary in large manufacturing and business centers. When the soldiers came they wanted very definite things. They asked for books and material which no one had ever asked for before and sometimes we had to ask them to spell what they wanted, and they couldn't always do it. So many of these soldiers were as new at the game as the library assistants that they could help very little. Now we have learned a few terms. We know a little about ballistics, H.E., T.N.T., and other heretofore obscure military topics.

The library is information bureau and general headquarters for all strangers who will use it. There have been many soldiers in town for a few hours who have come to us for help and found what they wanted. We have aided many women who came, trying to find places to live. We have provided them with books, directed them to the Red Cross, helped them in any way possible and many ways which would not have been thought possible a year ago. Families of men in camp wander in very frequently, or the boys bring their visitors to show them the library with a nice pride, feeling a sort of part ownership in the place because they have used it.

Early in September the board of trustees

of the Louisville Free Public Library extended to all soldiers in uniform, officers and their families, all the privileges of the institution. The soldier needs no identification but his uniform to enable him to take out a book. He is asked only for his name, his company or battery, and the name of his superior officer. Cards are issued to him at once and his privileges as a borrower clearly explained to him.

As soon as these men began to assemble and come into the town they found the Public Library. On the afternoon of the board meeting which decided the policy of the institution towards the soldiers, there was a young non-commissioned officer of the regular army who presented himself at the desk and asked for a library card. He was made to understand the necessity for a short delay till word came from the meeting as to the method of procedure, but we urged him to choose his books. He was the first soldier given a library card and he had it five minutes after the librarian's recommendations were accepted by the board. In the meantime he told the assistant who was helping him that he had been around a "good bit" and he always found the library if there was one—then he could have books to fall back on until he had found friends. He has used the library hard all winter, appearing regularly on Wednesdays and Saturdays.

The slowness with which some of the drafted men were put into uniform at first, caused an interesting complication one Wednesday. Three boys evidently fresh from the country—for the clay of the roads still clung to their boots—had stumbled into the library on their first visit to town. They came in, looked around, and walked straight to the main desk. The oldest boy, who seemed the least shy, asked for a card and explained that he was a soldier who had not yet been given his uniform. He wanted to know what we could do for him. When he was informed of the rule which made a uniform necessary merely for identification, he walked off and said he would be back shortly. His companions waited for him in the lobby and in a few minutes he triumphantly produced a sergent to vouch for him. After his cards

had been issued he drew out a worn wallet and asked what the fee was. He hadn't grasped that a free library was free to all. He told the assistant that he came from a place twenty miles from the railroad where there were never any books, and when he heard he was to come to Louisville he made up his mind "first thing" to use the library "no matter what it cost." He might never have another chance. He took a volume of Nietzsche because he had heard he was to blame for the war, and a book by Marden on success.

They have come to the library by the hundreds—these young men—who for a little while are living among us. They have come for every purpose. There are the serious young officers connected with the schools in the camp, who have discovered not only the aid to be had from our book shelves but the quiet to be found in our reading rooms. For several days in the early winter one young lieutenant wrote diligently all morning, and each day as he went out to lunch he brought his growing pile of notes to the front desk to be cared for while he was away. Each day he told the assistant receiving the package of its great importance to him and the government, and prophesied dire results if the notes were mislaid. We finally told him we felt they were much too valuable to entrust to a mere "call shelf." His sense of humor came to his rescue and nothing happened to the notes.

We have been called on not only to help the teachers in the various camp schools, but hundreds of boys preparing for examinations have looked to the public library for books on their special topics. We have helped them to get the algebra, chemistry or physics they used when they went to school or college, or have persuaded them that just as good material could be found in the text books available. We have used every French text book in the system and begged for them thru our friends and thru the public and private schools with splendid results. Demands for material not already in the library have been met by buying the books the soldiers recommend or the best material available on the topics asked for. The needs of one man are as important as

the next and the young officer asking for an instructor for the banjo had his book ordered just as promptly as the man who wanted something special on aerial navigation.

During the cold, disagreeable days of the winter many men came to the library to spend a few hours browsing among the books, with no intention of taking cards, but they nearly always found something too tempting to be left behind unfinished. Many men took several books at a time in order to avoid being marooned at camp without books. One Saturday night a young lieutenant asked at the desk for a copy of *Rasselas*. While it was being brought he told the attendant that on account of the severe cold there were many free hours a day for him and he felt he must not waste all of that time. He meant to "get busy" and read some of the great books that every one is supposed to have read. A high school teacher had once talked at length of *Rasselas* and because she knew about books he was starting with that.

One home-sick boy who wanted to talk had brought his cards from his home library to prove that he was entitled to be trusted. He asked for a map of Camp Taylor for he wanted to know how far he had walked to the street car. He was quite overcome when he saw the distance but he thought it well worth while when he found he could take an armful of music back to camp with him to play on the mess hall piano.

From an army composed of every element included in the civil population of this country, every variety of demand will come. The new men are still confused in their efforts at mental readjustment and frequently they want to go back to the old favorites they knew "before the war." Every variety of book is wanted according to the background of the individual soldier. Much interest has been shown in a little shelf of modern poets. Some men want war books—first, last and all the time—and others will have nothing to do with the extremely popular personal narratives of adventure. The taste of the army public is as varied as the types and individuals

which compose the army. There is no visible difference in the reading of officers and privates. It all depends on the man. There is, of course, no distinction in the library's efforts to serve all in uniforms. Such of the marines as present themselves are provided with cards just as the soldiers are.

A middle-aged and distinguished looking major presented himself one busy afternoon at the desk and asked where we kept the catalog. It was so plainly in sight that the assistant followed him to see that he got what he wanted. He was looking for Watts-Dunton's "Poetry and the renaissance of wonder." Unfortunately the book had not yet come. The fact that such a title was being asked for by such a man interested the assistant. By showing a little willingness to talk and to listen it didn't take her long to find out that the stranger had been making a tour of inspection of southern camps, was interested in libraries, and had several hours on hand before train time. That he was an important personage had been evident from the first. He had visited the libraries near all the camps he had inspected and had many questions to ask concerning the local problems and needs.

An interesting situation arose recently when a conscientious objector presented his pass to prove his army connection and asked for cards. There are a hundred or more of these men not in uniform, awaiting the government's decision as to their cases. Cards were issued to the applicant and he went away with his full allowance of books. His companions have been coming in since and registering every week.

The women and children who are here because of having relatives in the camp, have used the library for all sorts of purposes. A slight woman came into the open shelf room one rainy night and in short order stated her difficulty. She was on her way across the continent and had expected to knit socks all the way. Between Cincinnati and Louisville something happened to her sock. She didn't know just what. It was too late for Red Cross headquarters. She had just an hour more before train time. Was there anyone in the library who could help her out so that she

could go ahead and knit? There was a hurried consultation, reference to directions tried and found adequate, a hasty ripping of several rows of work, a further consultation, the unfamiliar click of needles in the open shelf room and the traveler went on her way, her confidence restored and her sock progressing.

When a man in uniform presents himself and asks for a card it is easy to proceed, but his wife wears no uniform and some very amusing things have occurred as a result of our efforts to take care of soldier's families. One demure, elderly lady came to the desk and the assistant, in her desire for information, framed her question a little bluntly. "Are you here with a soldier?" The lady was plainly shocked at such a personal question and drawing herself up with dignity informed the uncomfortable librarian that she was not.

But there are few such difficulties and no limitation to the desire to serve on the part of the staff of the library. That the service is keenly appreciated is proven many times a week. Many men and many women leaving under orders have come to return their cards and have expressed in many ways their gratitude for the books and the help we have given them. The following quotation from a letter from a young officer leaving for another camp shows the spirit in which the library's efforts are received: "Also accept my thanks for the many courtesies offered me by the personnel of your library during the past few months. I found the management to be one of the most efficient that I have ever had the pleasure of dealing with."

That spirit and such appreciation make the work easy. Behind the joy of service in this case is the added joy which the library assistant gets from doing her bit. She cannot fight but she can help perhaps to make a little happier the days which these men who are to fight are spending among us, and who shall say that her service is less valuable and less needed than that of other women who have the time for work she cannot do?

JENNIE M. FLEXNER,
*Head, Circulation Department,
Louisville Free Public Library.*

CAMP LIBRARY ADVERTISING

My colleagues in camp library work will understand that there are periods when the pressure of accumulated work leaves no time for any kind of active advertising and that there are other times just after men have been sent to camp and are ordering their lives according to the new situation, when advertising is of first importance. They will understand, also, that no one of the schemes tried is feasible under all conditions. However, each has worked in important instances as we know from having checked results.

The purpose of a camp library is service to all the men in camp, with the primary object of helping to win the war. There may well be conceived the secondary purpose of helping to build up qualities of citizenship valuable to our civic life after the war. The library cannot serve these purposes in any complete sense without making itself felt in all departments of camp life, which, being a new institution, it can do only by carefully planned advertising.

All of the men in the command at Camp MacArthur, in Waco, Texas, are reached by the library posters which are put up as soon as the new army unit is settled in one of the camps we serve. We use a small poster about seven by nine inches in size. This is printed on cheap cardboard in display type after the fashion of sale bills. It is brief, but carries the heading **YOUR CAMP LIBRARY** and calls attention to the location of the building, hours open, subjects upon which we have valuable collections, and the fact that there are branch libraries in all Y. M. C. A. huts. The line **AMERICAN LIBRARY ASSOCIATION** is run in bold type at the bottom of the page. We sometimes get permission to post these ourselves, or, as in one case, send a supply of them with a letter like the following to the commanding officer. In this case both the letter and poster were read to all men in the command and posted widely.

April 18, 1918.

The Commanding Officer,
Aviation Camp, Waco, Texas.

It will help the camp library in its efforts to serve the men under your command if you will have the accompanying bulletin read to all units and posted on all bulletin boards and

in all mess halls. It supersedes other posters which may be removed. We are especially eager for the men to be told:

1. That they may borrow books without cost or red tape;
2. That books may be kept two weeks;
3. That several books may be drawn at one time.

Respectfully,
JOY E. MORGAN, *Camp Librarian.*

Y. M. C. A. secretaries are glad to run in their motion picture machines slides calling attention to the library. It is worth while to give each branch one or two titles in numbers sufficient to justify their being featured on slides thus:

READ "THE FIRST CALL"
BY ARTHUR GUY EMPEY
20 COPIES IN THE BRANCH
LIBRARY IN THIS BUILDING
GET A COPY OF THIS BOOK
BEFORE YOU LEAVE TO-NIGHT
AMERICAN
LIBRARY ASSOCIATION

A slide like the one here given can be quickly and easily made on the typewriter by using the Radio Mat Slide made by the Radio Mat Slide Company of New York. We buy materials complete for making these slides at ten cents each. Liberty theaters are also glad to run slides for the library. We find a slide advertising a definite book or class of books more effective than one of a general nature. When a soldier unaccustomed to using libraries is induced to borrow one book he learns how easy and simple it is to get books and becomes a regular patron.

Trench and Camp is an excellent advertising medium. Living news is always good advertising. It is more important that there be some news in every issue than that there be a considerable quantity only occasionally. Pictures are always good. Our copies of *Trench and Camp* that carried the exterior view of the library building were taken almost immediately. Most of them were sent home by men who wanted their people to see their "new home."

We tack on the lid of each of our two hundred traveling library cases a poster like the ones sent out for the company bulletin boards. These cases of fifty books each are loaned to the companies within a few days

after their arrival in camp. Usually men are held in quarantine for a couple of weeks after arrival and their appreciation of having these books during their first days in camp leads them to the library when once they are free to come.

The Surgeon General's department has run slides in connection with the campaigns of education in social hygiene. These slides, which are run several times during the course of an illustrated lecture, call attention to the excellent collection of books on social hygiene that is kept at the library.

In addition to these and other methods of advertising that will occur to anyone on the ground, the library can do what every good business man does—try to make every patron a permanent patron. This requires that the atmosphere created by the library and its staff be one of cheer, of welcome, of willingness to serve, of appreciation of men and of books. The best advertisement is SERVICE.

JOY E. MORGAN.

UNIVERSITY OF CALIFORNIA'S LIBRARY OF FRENCH THOUGHT

THE University of California is distributing in pamphlet form the account of the dedication exercises held when the Library of French Thought was transferred to the university's control last fall. The library of French thought, consisting of some 2500 of the best books of science, literature, philosophy and other subjects, was first formed by the French government for exhibition at the Panama-Pacific International Exposition held in San Francisco in 1915. These books were assembled shortly after the battle of the Marne, at a time when France, after winning an epochal victory, was still fighting for her territory and her very life. At the close of the Exposition, the library, representing the achievements of some of the greatest French thinkers, was presented by the French Republic to the University of California, under the patronage of the Friends of France. The library is used for the benefit of the students of the university.

The day chosen for dedication exercises by the Friends of France was Sept. 6

(Lafayette's birthday), 1917. Ceremonies were held at a quarter before four o'clock in the afternoon in the French Room of the University Library. Monsieur Edouard de Billy, accompanied by three officers of the French army, was sent from Washington to represent France at the dedication.

The gift was formally accepted by W. H. Crocker, regent of the university, who announced the collection would be placed in a room especially prepared for its reception. The room now set aside for the collection is decorated in a manner suggesting the charm of the room used at the Exposition in San Francisco. The decoration is sober, books are easily accessible, and the whole disposition recalls the quiet atmosphere of Paris libraries.

The guests at the ceremonies (necessarily limited to about one hundred and fifty by the size of the room) comprised the regents of the university, the faculty of the department of Romanic languages, the consul general of France, representatives of the French colony, and the general committee of the Friends of France. Porter Garnett, secretary of the Friends and trustee of the Library of French Thought, presided. Trustees of the library were then appointed by the Friends of France.

The society of the Friends of France, consisting of a group of California citizens, was permanently organized in December of 1915. At the Panama-Pacific International Exposition, on Nov. 27, they conducted ceremonies in honor of France and in recognition of her contribution to the Exposition. The purposes of the society are: first, to perpetuate and accentuate the ancient friendship existing between the democracy of France and that of the United States; and second, to disseminate the products of French thought and to foster appreciation of the best French thought amongst the people of America.

CARNEGIE LIBRARY GRANT

THE only library grant made by Carnegie Corporation during the month of April, 1918, was one for \$7500 to Marlette Township (Marlette), Ind.

THE REFERENCE ROOM IN THE LIBRARY OF THE U. S. NAVAL WAR COLLEGE AT
NEWPORT, RHODE ISLAND

THE SCOPE OF THE U. S. NAVAL WAR COLLEGE LIBRARY AT NEWPORT

WITH the exception of the Marineakademie of Germany, an institution of somewhat different type, the U. S. Naval War College at Newport was the earliest institution established for the advanced study of naval science. Since its foundation in 1884, however, a number of similar schools have sprung up, notably the Royal Naval War College, England, the Ecole Supérieure de Marine, France, and the Scuola Navale di Guerra, Italy.

The U. S. Naval War College differs in scope from the other institutions akin to it. It is not a college in the strict sense of the term, nor even a graduate school, but rather a continuing conference of naval officers of high rank, who spend a year or more in the study of the general principles of naval strategy, tactics, policy, and also logistics, which concerns itself with the problems of the supply, equipment, transportation and care of military and naval forces. In addition to these topics, may be added international law, for naval activities both in time of peace and of war involve many questions coming within that field.

The development of a library that would answer as adequately as possible all of the demands made by the War College within these somewhat limited fields formed an important part of the plans of the founders, Admiral Luce and Captain Mahan. The latter, indeed, as we learn from his own works, made the library an object of especial attention, and carefully scanned book-catalogs from all sources in order to obtain works of value on the subjects under consideration in the institution.

The library collections, thus being determined by the scope and policy of the War College, are not, nor can they ever be, extensive, and no endeavor is made to develop them beyond these predetermined fields. A large proportion of the literature of naval science, even—that which relates to technology, shipbuilding, arms and armor, etc.—is not sought. In these topics a small reference collection has been found sufficient.

Within its field, on the other hand, the

collection is fairly complete. This is particularly true of the literature of naval strategy and tactics, a number of early works on these subjects being included, such as "Naval evolutions" by Paul Hoste (translated from the French in 1762); "Tactique navale" (1763) by Morogues; "Rudimentos de tactica naval" (1776) by Salazar; "Cours élémentaire de tactique navale" (1804) by Ramatuelle; "Naval tactics" (1802) by Clerk; "Naval battles" (1824) by Ekins, etc. These are mainly of historical interest, the vital material being found in the modern treatises such as those of Mahan, Corbett, Colomb, Darnieux, Daveluy, Bernotti, Maltzahn, Stenzel, etc.

As much of the literature in a collection so highly specialized is to be found only in foreign languages, a small percentage of which has been translated into English, it has been necessary to provide manuscript translations of important treatises. Of these the library has a considerable number on file, among which might be noted, Bernotti, "Fondamenti di strategia navale"; Depuis, "Le Droit de la guerre maritime"; Janson, "Das Strategische-u-Taktische Zusammenwirken von Heer u. Flotte," etc.

No effort has been made to develop any more than a fairly good reference collection on the naval situation in the different countries, it being considered sufficient if the library can answer questions regarding the latest developments as far as they are made public. For this purpose official publications, yearbooks, and similar publications are provided.

The same might be said of the literature of land warfare and general military science. Only the outstanding works, such as those of Jomini, Clausewitz, and particularly valuable treatises of recent date on the conduct of war, find a place on the shelves. Among the most important works of this class are the staff histories of the various wars, such as the Russo-Japanese, the South African, etc. A very complete collection of literature relative to the European War is being collected which includes a vast number of ephemeral items, such as pamphlets, clippings from newspapers and periodicals, etc. The latter are arranged by subject in file cases.

There is a good working collection in International Law, stress being laid on source material. Hence the collections contain such works as Marten's "Recueil général de traités," "British and foreign state papers" and other collections of similar nature. The library is also a depository for the publications of the Carnegie Endowment for International Peace.

As the periodical literature of military and naval science is very important, and often gives the latest developments in these fields, the library subscribes for all authoritative publications in English and foreign languages. The bound files of these form an invaluable reference collection. In addition the proceedings of technical societies are received, such as the Naval Institute Proceedings, The Navy Records Society, Naval History Society, Society of Naval Architects and Marine Engineers, etc., etc.

The special collections of the library are classified according to a scheme of its own, which is a modification and very extensive expansion of the Library of Congress system. The L. C. classification, however, is closely followed in other groups, such as History. As far as possible the L. C. cards are used in the catalog. This is in dictionary form, and is based upon subject headings designed to meet the special demands of the War College. Hence many headings are included not to be found in other arrangements, and, in addition, the catalog contains a large percentage of analytical entries and cards for periodical articles of importance.

Charts of the ocean, of course, are necessary in the maneuvers required by the war game, hence the Naval War College has a very complete collection of United States and foreign charts. The Hydrographic Office, the U. S. Coast and Geodetic Survey and the British Admiralty charts are kept on file and new accessions and revisions added when issued. In addition to the charts, the library has an extensive collection of maps and atlases, among them many detailed maps, particularly of the present European War.

EDWIN WILEY, *Librarian.*

MARITIME PROVINCES ORGANIZE LIBRARY ASSOCIATION

A MEETING of library workers, convened by Dr. Cutten, president of Acadia University, in Wolfville, Nova Scotia, was held Apr. 17 at 8 o'clock in the library building of the university. Delegates from Halifax, St. John, Amherst, Yarmouth, Moncton, Canning, Truro, Windsor, and other places, were present.

In the absence of Professor McMechan, who was expected to deliver the opening address, Canon Vroom of Kings College, addressed the gathering on the duties of libraries and library workers in building up Canadian ideals and citizenship. This was followed by a general discussion.

On the following day, at the opening session, papers were read by Miss Vaughn, librarian of St. John, on co-operation in library work, and by Miss Lindsay of Dalhousie University Library, on cataloging. These were followed by an address on the establishment of libraries in Maritime towns, by E. J. Lay of Amherst. In the afternoon Dr. Rand of Harvard, briefly addressed the meeting. After discussion the formation of a Maritime Library Association was decided upon, and a committee composed of Harry Piers of the Provincial Library of Nova Scotia, Miss Lindsay and Prof. McMechan of Dalhousie University, and Miss Barnaby of the Halifax Library, was appointed to draw up a constitution and by-laws.

E. J. Lay was appointed the first president of the Maritime Library Association; Mrs. Ingram, librarian of Acadia University, the first secretary; Miss Vaughn, vice-president for New Brunswick; and Miss Barnaby vice-president for Nova Scotia. As there was no representative from Prince Edward Island the appointment of a vice-president for that province was deferred.

It was decided to hold the next meeting in Wolfville in May, 1919.

The session broke up with a hearty vote of thanks to Mrs. Ingram and Dr. Cutten and to the delegates who had read papers, and all left with high hopes for the future of library work, too long neglected, in the Maritime provinces.

LIBRARY UNION ORGANIZED IN BOSTON

ABOUT fifty employes of the Boston Public Library met in that city May 15 for the purpose of organizing the Library Workers' Union. Its avowed object is to improve working conditions and wages for employes at both the main building on Copley Square and its branches. The meeting was addressed by City Councilman James T. Moriarity, well known in local labor circles, who assured those present that with a union it was almost certain that a salary increase would be granted next year, thus making it clear that there was little hope for an advance at present. Mabel Gillespie, a representative of the Women's Trade Union League also addressed the meeting.

The union was organized before the meeting adjourned, with but four dissenting votes.

The report of the meeting in the Boston *Herald* showed a point of view so peculiar that it is worth quoting.

"According to one of those who attended last night's meeting," wrote the reporter, "the librarian has some radical ideas which, if put into effect, would result in the elimination of a goodly percentage of the present number of female employes. According to this informant, Mr. Belden is convinced that he should have only college girls at work in the institution.

"While at present some college girls are employed there, the great majority of them are girls who attended high school and then went into the world to earn livelihoods. These girls consider themselves fully as well equipped to carry on the work as are any of the college graduates. They started at the bottom of the ladder and progressed upward until they occupy desks or other posts of importance.

"Under the former librarian, Mr. Wadlin, conditions as regards that issue were agreeable. The girls were advanced from time to time and had but little if any occasion to find fault."

Charles K. Bolton, librarian of the Boston Athenæum, was moved by this presentation of a so-called basis for appointment and promotion to library positions, to write a letter to the same paper, which was an

admirable statement of the true library point of view. Mr. Bolton wrote:

The announcement that some employes of the Boston Public Library have organized a Library Workers' Union is of more than ordinary importance. The present movement, engineered by a City Hall politician and a leader in labor circles, is evidently an attempt to bring a closer connection between the staff at the Public Library and the politicians who vote appropriations. The Mutual Benefit Association, thru which a certain group of employes have dealt with the trustees in the past, ignoring the librarian, is now to give way to a more effective organization. The fundamental purpose in this movement may be, as was said at the meeting, to improve conditions and salaries. The obvious result will be to break down discipline, without which no great organization can be effectively managed.

The librarian should be the executive officer. With the experience of Russia before our eyes it should not be necessary to use a column of argument to justify orderly government, and yet this Library Workers' Union, not on account of its good intentions, but on account of its evil possibilities may wholly upset good administration in the Boston Public Library.

If we may believe the report of the meeting, a good deal of time was taken up in the denunciation of college-bred women as library employes. What are the fathers and mothers, who are making personal sacrifices that their daughters may have a college training, to think of the proposition that a labor union has been organized in a literary and intellectual institution in order to oppose the employment of these young women when they have finished their technical training? It was said that young women without college education "considered themselves fully as well equipped to carry on the work as any of the college graduates." If these young women are to be taken at their own estimation in fixing salaries and assigning tasks and not on the judgment of the librarian, have we not reached a Russian standard of "self-determination" in the Boston Public Library?

It has from time immemorial been the rule among professional men and women that an organization of themselves to advance wages is unprofessional and undignified. These employes of the Boston Public Library are, therefore, setting themselves against the customs of the professional class to which library employes have always claimed that they belonged, together with doctors, lawyers and clergymen. These 50 employes may, if they desire, form a union, but it will be a day of disaster for the Boston Public Library if they are to crowd out those other library employes who feel that their work is a profession. To those who consider library work a profession is due in a large measure the past glory of the Boston Public Library as an institution of learning and service.

LIBRARY SALARIES AND WAR CONDITIONS

THE Association of American Library Schools, which is an organization of the following schools, Carnegie Library School, Pittsburgh, Pa.; Library School, Carnegie Library of Atlanta, Ga.; Library School of the New York Public Library; Library School of the University of Wisconsin; Library School of Western Reserve University; New York State Library School, Albany; Pratt Institute School of Library Science; Simmons College, Department of Library Science; Syracuse Library School, and University of Illinois Library School, has had a committee considering the question of library salaries. This committee, of which J. I. Wyer, Jr., was chairman, with Josephine A. Rathbone and Alice E. Tyler the other members, recently sent out the following circular letter to a large number of libraries:

To Library Trustees and Librarians:

This letter is addressed on behalf of the Association of American Library Schools to those who employ men and women trained for library service in order to set before them a serious situation brought about by war conditions and by the demands of modern business.

The past ten months have brought a wholly unprecedented demand from government departments (especially those charged with war work) and from business houses, etc. for persons skilled in the handling and filing of correspondence and office records.

The fact that technical details incidental to library practice give facility in such work has caused librarians to be sought for it. Ten library schools, members of this Association, report that many of their graduates have recently left libraries to take up filing and indexing work in government and commercial offices. To this number may be added many others without library school connections. Probably 1000 persons receiving salaries of from \$500 to \$1000 have been drawn out of active library work by initial salaries of \$1000 to \$1500 for work which (in government offices) will continue at least for the duration of the war and which in business houses will be permanent.

The situation has affected directly or indirectly nearly all libraries and has become a grave one in some of the larger libraries of the country, as the following figures will show:

54 members (19%) of the staff of the Reference Department of the New York Public

Library resigned during 1917 to take better paid positions, while 154 persons (27%) resigned from the Circulation Department during the same time. From the Brooklyn Public Library 30 persons have resigned during the last year to go into business libraries or to the War Department; from the Cleveland Public Library 24 assistants have left for similar reasons. These figures do not include janitors, pages or mechanical employees.

The machinery of a large library is complex and delicately adjusted, and the continuing loss of so many experienced workers means a readjustment that is wasteful of time and money. That the profession should be subject to this draft upon its personnel at this particular time when it is suddenly confronted with an important service and many new responsibilities arising from the war, draws attention sharply not only to the effect but to its causes. The chief of these causes may be set forth in two words "small salaries."

Concretely the situation may be illustrated by the following example: The graduates of the Pratt Institute Library School, class of 1917, who have gone into library work are getting an average salary of \$845; those who are in government and business positions are getting an average of \$1177. The average salary of all Pratt Institute graduates is only \$1164; of those in business libraries \$1449.

The library schools are the principal channels thru which trained workers are recruited to fill library vacancies. Save incidentally, they do not train filing clerks or teach office organization and routine. If good people are to be attracted to the library schools and held in library work when trained, libraries must pay salaries at least equal to those offered elsewhere to persons with even less education and special training.

Libraries have not recognized that the standards of library schools have now become the standards of the profession, that library school training has set new standards for all library service, even its lowest grades, and that the diversion into other work of the carefully selected library school product will affect all libraries. This recognition must in self-protection take the form of higher salaries—salaries which shall meet government and business competition for special training and ability. This matter is respectfully urged upon the attention of library trustees, municipal and state authorities.

THE Boys' Knitting Club in the Clark branch of the Cleveland Public Library has a regularly appointed reader who reads aloud at every meeting and does not knit. One of the boys made two sweaters in a month.

FORCED RESIGNATION OF MISS HUNT IN PORTLAND, OREGON

THE Library Association of Portland, Oregon, passed thru a most unpleasant experience in April. An affidavit was filed with the library trustees by two canvassers for the third Liberty Loan, who deposed that the assistant librarian, M. Louise Hunt, had refused to buy Liberty bonds at their solicitation, "because she did not believe in war and refused to support it."

The story was given to the papers, and the filing of this affidavit necessitated the calling of a special board meeting to investigate the charges. Miss Hunt was called before the meeting and submitted the following statement:

Some of the statements that appeared in an evening paper of April 12 are true, but they are so stated that the general impression given of my opinions and attitude are incorrect.

I do not wish to discuss the article in detail, but simply to state that I am, and always have been, intensely and wholeheartedly concerned for the best interests of the United States.

This is my country. I was born here. My ancestors were born here for many generations back. Both sides of my family fought in the Revolution and also in the Civil War. I am an American, and no one can more earnestly desire to see America leading in the world's progress to a higher civilization. It is increasingly a source of pride to me that in this conflict our President now stands head and shoulders above the statesmen of the other warring nations. His aims and ideals and those of other earnest people with whom I disagree are my aims and ideals. The disagreement is purely an honest difference of opinion about the methods which will best achieve those ends.

At no time have I desired to be an "obstructionist." I merely wish to claim the constitutional American right privately to hold a minority opinion.

At the close of the examination the following resolution was offered:

Resolved, in the matter of charges publicly made against Miss M. Louise Hunt, assistant librarian, the board at a meeting called for that purpose has had read newspaper article and affidavit of the solicitors of the Liberty Loan Committee upon which the same is based, and has taken Miss Hunt's statement and examined her orally concerning the same, and is now of the opinion that the newspaper article and the affidavit do not correctly represent the

facts, and finds that there is no cause for further action on the part of the board in the premises.

Resolved further, that the president appoint a committee to make written statement of the views of the board as expressed at the meeting.

A committee appointed by the president of the board prepared a statement which was sent to all the papers. It read as follows:

The Board has carefully considered the charges brought against Miss Louise Hunt thru the press and by affidavit. After such consideration and a thoro examination of Miss Hunt as to her position in the premises, the Board finds that Miss Hunt is not chargeable with any overt act of opposition or criticism of the policy of our Government.

Miss Hunt is a faithful and valuable public servant. She is in opinion opposed to war at all times. Most members of the Board have long been cognizant of these views; they have not been publicly expressed. The expressions complained of were elicited from her in a manner which did not permit her to state them with clearness. They were given in answer to questions and not volunteered. These statements were so construed and published as to give them a meaning not intended by Miss Hunt.

Her conduct has never in any way obstructed, or tended to obstruct, the activities of our Government. She is, in principle, opposed to any such obstruction or to any encouragement or incitement to obstruction in others.

Her duties in carrying out the war savings stamps campaign in the Library have been conscientiously and efficiently performed. None of the Board shares in any degree her opinions. However, the Board feels that the right to one's own conscientious opinion is the very foundation of human freedom, and we are not willing to give up in advance the very thing for which the best and bravest of us are now fighting, and which our ancestors risked their lives to win for us.

Then, instigated by the *Evening Telegram*, a sensational paper, the Liberty Loan committee demanded Miss Hunt's resignation, which she sent in to the trustees, rather than prolong the unpleasantness.

Miss Hunt's resignation read:

April 14, 1918.

To the Directors of the Library
Association of Portland, Oregon.

Gentlemen:

Because I do not wish in any degree to hamper the usefulness of the Library, and because I am unwilling to place upon the

Library Board the burden of a conflict to maintain its brave stand for freedom of conscience, I hereby tender my resignation as Assistant Librarian, to take effect at once.

Very truly yours,
M. LOUISE HUNT.

This resignation was read to the board at a meeting April 15, and was accepted with but one dissenting voice. The only objector was W. F. Woodward, who had moved that Miss Hunt's resignation be tabled and that she be discharged. When this was voted down he made a quite unwarranted attack upon the patriotism of Miss Isom, the librarian, for which he was roundly condemned by the other members of the board, who emphatically expressed their complete confidence in her loyalty.

PRINTED ANALYTICAL CARDS

THE University of Chicago Library is about to print analytical entries for titles in the following collections not already covered by the cards of the Library of Congress:

1. Collection des poètes champenois antérieurs au XVI^e siècle. Reims (etc). 1847-64. 24 vols. There will be 14 titles. L. C. has cards for the following: v. 4-5=11-21001; v. 11=13-26917; v. 14-15=11-3087.
2. Colección selecta de antiguas novelas españolas. Madrid, Viuda de Rico. v. 1-12, 1906-1909. There will be 12 titles.
3. Biblioteca rara, pub. da G. Daelli. Milano, G. Daelli e comp., 1845-65. 63 vols. There will be 47 titles. L. C. has cards for the following: v. 1=17-13126; v. 2=4-7191 rev.; v. 12=17-24593; v. 16=2-24165; v. 18=17-6312; v. 35=12-10688; v. 41-43=2-28035; v. 60=17-12550; v. 61=17-12549; v. 63=3-26781.

Orders will be received until July 1, 1918. Price one cent per card. Cards will, as usual, include indication of subject headings. The call number, according to the Library of Congress classification, will appear at the bottom of the card. Libraries desiring to order should specify the number of sets wanted. All communications may be addressed to the Associate Director, The University of Chicago Libraries.

THERE is more reason for saying grace before a new book than before a dinner.—
CHARLES LAMB.

HOW ONE AMERICAN GIRL DIED IN FRANCE

THE National War Work Council of the Y. M. C. A. authorizes the following account of the funeral ceremonies in Paris for Winona Martin, formerly librarian in Rockville Center, Long Island, who went over to France to do canteen work with the Y. M. C. A.:

Draped by the American flag, over which lay flowers of France, the first American victim of a Hun air raid over Paris, Winona Martin, reverently was carried to her last rest, according to a letter received from Paris. Miss Martin was lying ill in a hospital when a boche aviator dropped a bomb thru the roof, killing the American girl and four other women. Miss Martin was the first secretary of the Y. M. C. A. to be killed.

The story of her supreme sacrifice is told by Carl Holliday in a letter to the War Work Council of the Y. M. C. A., as follows:

"An hour ago I helped to bear into the American Church in Paris the coffin containing the body of the first Y. M. C. A. secretary killed by an act of war and the first American victim of a Paris air raid. Strangely enough, that first victim—that first Y. M. C. A. secretary to be slaughtered—was a woman, Winona Martin of Rockville Center, Long Island. And yet, is it strange? Could the Hun have desired a better revenge upon America than the death of this quiet young woman who had come to offer cheer and what aid a woman's hand and voice could give to our soldiers?

"Toward midnight the Germans came over the city, and for one vivid hour attempted to fill heaven and earth with terror. One of their marks was the Red Cross hospital where Winona Martin, stricken with illness, was lying. A roar of bursting shell, a red, angry flash, a crumbling of walls, a strange silence, and Winona Martin and four other women had given their lives as further sacrifices to German frightfulness.

"There is significance in this girl's death. Does it not illustrate the advancing tide of

woman's influence? For here was one, a member of a men's organization, willing to undergo a man's hardship and privations, prepared to march and labor with men, and at length dying a soldier's death. And especially does it seem to show the growing seriousness of the American women toward this vast conflict—that this quiet student, a librarian by profession, should leave her books to cross the ocean and help the people of another nation throw off the burden of brute tyranny. Is it not another and a striking evidence of the growth of universal brotherhood in these latter days?

"It was a strangely solemn meeting in that church so far away from America—the group of Y. M. C. A. secretaries in their Army garb; in the high pulpit the clergyman, also in military uniform; the coffin covered with the flag of America and heaped with the flowers of France. There was no sermon—her sacrifice spoke more eloquently than any words.

"A reading from that Bible which for 300 years has been the foundation of American civilization, a couple of hymns sounding very odd with so few voices of women, and then the placing of the casket in the church vault, there to remain until this world disaster is over.

"I have read her record card at the Y. M. C. A. headquarters in Paris. On it, in her own handwriting, are the words, 'For the duration of the war and longer if required.' Longer than the duration of the war will linger the memory of this girl—the first American woman in Paris to lay down her life for this struggle against wrong, and the first martyr among those wearers of the red triangle who may be found toiling in every camp and trench of France."

HERTY COLLECTION OF CHEMICAL JOURNALS GOES TO UNIVERSITY OF NORTH CAROLINA

THE University of North Carolina has just purchased for \$2655 the valuable collection of chemistry journals which for the past five years has been deposited in the library of the department of chemistry by Dr. Charles H. Herty, formerly professor

of chemistry and president of the American Chemical Society. The purchase was made possible by a special appropriation from university funds augmented by the generous gifts of money and books by alumni and friends of the Chemistry Department. The purchase represents 1100 volumes, which runs the total number of chemical journals now owned by the university up to 5000 and makes it one of the most complete collections of chemical journals to be found in the universities of this country.

The collection just purchased is especially valuable for the number of complete sets of the most important journals of European countries. The *Annales de Physique et de Chimie* has had continued publication since 1789, even thru the trying period of the French Revolution, when one of its editors, the great Lavoisier, was beheaded. This set is complete to the present. The famous journal of the French Academy, *Comptes rendus de L'Academie des Sciences de France* (1835—to date), containing many announcements of famous discoveries, is also complete. Several of the journals of the national chemical societies are included in the collection. Such are, *Gazetta chimica italiana*, the journal of the Chemical Society of Italy; *Monatshefte für Chemie*, the journal of the Austrian Chemical Society; *Recueil des travaux chimiques des Pays-Bas*, the journal of the Chemical Society of Holland and Belgium. Besides these national journals there are several devoted to special phases of chemical investigation. *Zeitschrift für anorganische Chemie* (completing the partial set already owned by the University; *Chemiker Zeitung*; *Moniteur Scientifique* (complete); *Zeitschrift für den physikalischen und chemischen Unterricht* (complete); *Chemische Zeitschrift*; *Chemische Revue über die Fett-und-Harz Industrie*; *Färber-Zeitung*; *Archiv der Pharmazie* (1874 to date) and *Kolloid-Zeitschrift* (complete).

The university is particularly fortunate in being able to procure these journals at this time, for war conditions have diminished the supply of such periodicals and have greatly increased the demand for such literature in all countries.

RECENT MOTION PICTURES DRAWN FROM STANDARD OR CURRENT LITERATURE

THE list of films based on books which has been printed in recent numbers of the LIBRARY JOURNAL was reprinted in the last issue of the *Cleveland Women's Journal*, in which the Cinema Club of Cleveland has a department. In the club's annual report the president says of the two photoplays based on Mark Twain's "Adventures of Tom Sawyer": "It is reported in the libraries that since the appearance of these films it is impossible to supply the demand for Mark Twain's books, which indicate how much the library and motion pictures react upon each other."

Brave and Bold, 5 reels, Fox. Star—George Walsh.

Perley Poore Sheehan's "Four forty at Fort Penn" turned into a stunt motion picture comedy.

M'liss, 5 reels, Artcraft. Star—Mary Pickford.

A picturization, well done, of one of Bret Harte's tales.

Passing of the Third Floor Back, 6 reels, First National Exhibitors Circuit. Star—Forbes-Robertson.

In this picture Sir Johnston Forbes-Robertson, who starred in the stage presentation of Jerome K. Jerome's well known work, is seen to advantage and the story is well presented.

Resurrection, 5 reels, Paramount. Star—Pauline Frederick.

A photoplay based on Tolstoi's great work of the same name.

Stories by O. Henry: The Rubaiyat of a Scotch highball, The buyer from Cactus City, The brief début of Tildy, The purple dress, The enchanted profile, 2 reels each, General Film Company.

The Reason Why, 5 reels, Select. Star—Clara K. Young.

This is a picturization of Elinor Glyn's story of the same name.

The Red, Red Heart, 5 reels, Universal. Star—Monroe Salisbury.

Honoré Willis's novel, "The heart of the desert," done into a photoplay.

The Trail to Yesterday, 6 reels, Metro. Star—Bert Lytell.

This is a picture based on a novel by Charles Alden Seltzer.

The Two-Soul Woman, 5 reels, Universal. Star—Priscilla Dean.

Gelett Burgess' novel "The white cat" turned into a motion picture.

Wolfville Tales by Alfred Henry Lewis: Cynthia, pet-named Original Sin, Clients of

Aaron Green, Tucson Jennie's heart, 2 reels each, General Film Company.

His Majesty, Bunker Bean, 5 reels, Paramount. Star—Jack Pickford.

A picturization of part of the laughable story of the same name from the pen of Harry Leon Wilson.

Masks and Faces, 6 reels, World.

A picturization of Charles Reade's story of Peg Woffington. The cast makes it one of the unusual pictures of the year, including as it does, Sir Johnston Forbes Robertson, George Bernard Shaw, Gerald du Maurier, Weedon Grossmith, H. B. Irving, Sir John Hare, Sir James Barrie, Dennis Neilson Terry (a relative of Ellen Terry), Gertrude Elliott, Sir Arthur Pinero, Dion Boucicault, Viola Tree, Sir George Alexander, and many others who have made the English stage illustrious.

Over the Top, 9 reels, Vitagraph. Star—A. Guy Empey.

A spectacular production based on the book of the same name by Sergeant Arthur Guy Empey, who plays a leading part in the photoplay.

Rich Man, Poor Man, 5 reels, Paramount. Star—Marguerite Clark.

An adaptation by George Broadhurst of the novel of this name by Maximilian Foster.

Stories by O. Henry: Lost on Dress Parade, The Buyers from Cactus, each 2 reels, General Film Company.

The Bells, 5 reels, Pathe. Star—Frank Keenan.

A picturization of the play made famous by Sir Henry Irving and Richard Mansfield. The character of Mathias assumed by Irving and Mansfield is well done by Frank Keenan.

The Bluebird, 6 reels, Artcraft.

Maeterlinck's masterpiece done into motion pictures in a manner which makes it one of the best photoplays of the year.

The Boss of the Lazy "Y," 5 reels, Triangle. Star—Roy Stewart.

A photoplay adapted by Charles Alden Seltzer from his novel of the same name. It makes a particularly good photoplay.

The Business of Life, 5 reels, Vitagraph. Star—Alice Joyce.

Robert W. Chambers' novel of the same title is the basis of this photoplay.

The Girl who Wouldn't Quit, 5 reels, Universal. Star—Louise Lovely.

The screen version of James Oliver Curwood's story, "The quest of Joan." It is a western mining melodrama.

The Landloper, 5 reels, Metro. Star—Harold Lockwood.

This is an adaptation of Holman Day's novel of the same title. It is a romance in which the leading character becomes a tramp as the result of a wager, and finds a real purpose in life.

The Return of O'Garry, 2 reels, General Film Co. Star—Ned Finely.

One of three photoplays describing the adventures of O'Garry of the Royal Northwest Mounted Police. It is based on the story of the same name by Mrs. L. Case Russell.

Up the Road with Sally, 5 reels, Select. Star—Constance Talmadge.

This is a photoplay based on the novel of the same name by Francis Sterrett. It is a farce comedy full of hearty laughter.

LIBRARY WAR SERVICE

What Has Been Done

- 36 camp library buildings erected.
- 117 librarians now in the field.
- 464 camps, stations, and vessels served.
- 109,403 selected books sent overseas.
- 300,000 books purchased, largely technical.
- 1,349,000 gift books sent to camps and stations.
- 5,000,000 magazines (including Burleson magazines) distributed systematically.

ECHOES FROM THE BOOK CAMPAIGN

THE book collection has continued through April and May, and all expectations as to book receipts have been exceeded. The last returns indicate that thousands over three million books have been donated and that the number will reach four million within a few weeks.

As fast as possible orders are being sent from headquarters so that these books will be placed where most needed. A million and a half books have already been distributed—and the others will soon be needed.

From the Free Public Library of Sioux City, Iowa, the librarian, Clarence W. Sumner, writes us:

"You may be interested to know the results of our book campaign in Sioux City. I think you will agree with me that Sioux City, with a population of 65,000, compares favorably with cities much larger in size, judging from reports printed in the last issue of *Public Libraries* and the *LIBRARY JOURNAL*.

"We attribute the success of our campaign to the number of organizations working, the spirit with which all entered into the work and the publicity given to the campaign. Laundry wagons alone brought in 5563 books, and the total collected was 22,658."

During the campaign in New York city one of the regular circulars of appeal was sent to Colonel Roosevelt, who responded with a generous check. He was asked to add to the personal interest of his gift by suggesting the titles to be chosen and also by writing a line of dedication. To this he promptly and cordially responded, the books chosen being "Our mutual friend," "The

antiquary," and "Guy Mannering." The inscription was reproduced and used as a bookplate in each volume, and a poster like the following was sent to each library in which the volumes were placed:

THEODORE ROOSEVELT

has presented to the A.L.A. camp libraries a large number of copies of these three books: *Our Mutual Friend*, *The Antiquary* and *Guy Mannering*. All these teach "both manliness and decency," he says, and *The Antiquary* and *Guy Mannering* are "best for soldiers."

Some of these books from Col. Roosevelt are in this library. They contain this facsimile card:

To the men who are going overseas to fight for the honor and interest of America and of all mankind, and who thereby make all other Americans free their debtors.

Theodore Roosevelt
April 6th 1918

SPECIAL CLASSES OF BOOKS STILL NEEDED

Baedeker's guidebooks are still needed. A complete set of Baedeker's guidebooks to the countries of western Europe should be placed on every transport sailing from this country, according to the request received by the A. L. A. Library War Service. No longer can these guidebooks be used as kindly conductors to the best hotels and *pensions*, art galleries and cathedrals, or as suggestions for sight-seeing trips and sojournings. They are needed now to

help win the war, by giving officers and men detailed information that will enable them to adapt themselves most readily to their new environments.

"Americans should withhold none of their possessions that will help our boys," said one woman, when bringing to the library her treasured and well traveled volumes. Now is the time to commandeer these idle books and give them a chance for service never anticipated when they were purchased.

The soldiers likewise need books in foreign languages, and such books are becoming scarce in America. It is almost impossible to buy them since the war has held up shipments from Europe. Thousands of the men in training in U. S. camps are foreigners, with little or no ability to read English, and the A. L. A. camp librarians wish to supply them with books they can read. A recent census of Camp Devens, at Ayer, Mass., given in the *American Leader* magazine, shows 40 different languages in use, ranging from French and Italian in the majority, to Maltese, Egyptian, and Gaelic. Americanization of these men is taking place thru their camp training and classes in English, and is simplified if their confidence can be gained thru the pleasure given them in books of their own language. Foreign books or papers, in good condition, will be welcomed at the nearest public library and reported to Washington headquarters.

MAGAZINES NEEDED

There is also special demand for magazines such as *Punch*, *Judge*, *Life*, *Popular Mechanics*, *Popular Science Monthly*, *Scientific American*, *Atlantic Monthly*, *Harper's Magazine*, *Scribner's*, *Century*, and others of this character, not more than two months old. Monthly story magazines, of more than transient interest, are especially desired, and the public should be urged to forward them thru the U. S. Post-office Department.

A service that is much appreciated is being rendered by many librarians who are distributing gift magazines on the troop trains. In one city in the South the librarian keeps a large supply of magazines at

the terminal station at all times. The welfare workers of an organization are always on hand to see that no train leaves or passes thru the yards without reading matter, and the eagerness with which the donations are received is a proof that they fill a real need.

From Camp Doniphan L. L. Dickerson, the librarian, writes: "I am convinced that the only way to meet the problem of reading on trains is to have the magazines sorted and in bundles and placed directly in the coaches. Officers and men are enthusiastic over this provision. We almost missed one train and shot the car in after the troops entrained to be welcomed with, 'Here comes the library; shoot 'em thru the windows; swing "Henry" on behind and bring him along.'"

The A. L. A. has undertaken to provide books and Burleson magazines for the Salvation Army huts close to the large camps, and to render similar service at the Y. W. C. A. Hostess Houses.

CENSORED BOOKS

The latest circular of information sent to the camp libraries says that Freitag-Loringhoven's "Deductions from the world war" is not to be circulated in the ordinary way. The Intelligence Office at Washington says: "The book should be read by every officer. . . . While there is no objection to this book being circulated among officers of the Army, it is not believed that it should be sent out to the libraries provided for the enlisted men." "A German deserter's war experiences" has also been found unsuitable, and every camp librarian has been asked to send in to Headquarters any copies on hand.

NEW CAMP LIBRARY BUILDINGS

At Camp Beauregard and at Kelly Field camp buildings are now in use. A building has been constructed for the dispatch office work at Newport News.

MEXICAN BORDER SERVICE

Ethel McCollough, librarian at Evansville, Indiana, arrived in El Paso on May 10 to organize and manage a traveling library system for the troops along the Mexican Border. This territory, with head-

quarters at El Paso, will extend from the vicinity of Deming, New Mexico, to and including the "Big Bend" district.

Traveling library boxes filled with books about the war, books on military subjects, and general reading, will be exchanged among the various posts and stations along the border so that in the course of a few months several hundred books will be made available to each soldier.

Harriet Long, librarian of the Brumback Library, Van Wert, Ohio, is in charge of the border section east of the "Big Bend" district, with headquarters at San Antonio, Texas.

CONFERENCES AND VISITS MADE

Dr. Putnam, general director of the Library War Service, addressed the convention of the General Federation of Women's Clubs at Hot Springs, Arkansas, on May 7, on "Library war service." An exhibit of photographs illustrating camp library work was prepared for the convention. Dr. Putnam is now making an inspection tour of camp libraries in the west.

In April, Mr. Utley, executive secretary of the Library War Service, gave addresses on the work at a staff meeting of the University of Chicago Library, before the Chicago Library Club, the training class of the Chicago Public Library, the University of Illinois Library School and the Kentucky Library Association.

Dr. Hill of the War Service Committee, on his recent trip to southern camp libraries, has visited Camps Greene, Jackson, Hancock, Wheeler, Johnston, Shelby, Sheridan, and the stations at Charleston, Paris Island, Pensacola; also many co-operating public libraries. On May 9 he addressed the Alabama Library Association at Montgomery.

STATISTICS OF CAMP LIBRARY SERVICE

In the *War Library Bulletin* for April, two pages are given over to a tabulated report of service in the main camps, where the A. L. A. has regularly organized libraries, with trained librarians in charge. In addition to the name of the camp, the table shows the number of books in each, the number of gift books en route, the number purchased for the camp between No-

vember and March, the number of branches and of stations, and the names of the librarians and assistants who are carrying on the work. Adequate statistics for circulation were impossible to secure from some camps, so it was considered better to omit them. The figures for the month of April, for all camps, however, were as follows:

Beauregard	2,670
Bowie	10,670
Chickamauga	11,610
Cody	13,926
Custer	6,790
Devens	6,600
Dix (Main only)	1,865
Dodge	11,026
Doniphan	14,526
Fremont	8,114
Funston	11,969
Gordon	6,386
Graht	4,526
Greene	10,209
Hancock (Main only)	7,198
Jackson (Main only)	6,100
Johnston	6,700
Kearny	16,909
Kelly Field (Main only)	58
Lee	6,500
Lewis (not including stations)	10,384
Logan	11,170
MacArthur	8,354
McClellan	11,905
Meade	7,930
Merritt (Main only)	6,458
Perry	2,250
Pike	3,648
Sevier	7,750
Shelby	9,000
Sheridan	14,052
Sherman	14,384
Taylor	10,266
Travis (Main only)	2,799
Upton	8,247
Wadsworth	9,610
Wheeler	17,354

HOSPITAL LIBRARIES

Tho many appointments to hospital libraries are still pending the following definite appointments have been made to cantonments and post hospitals:

Fort Bliss—organizer, Mrs. V. G. Humphrey.
Cape May—organizer, Miss E. B. Cook.
Devens—librarian, Miss C. L. Williams.
Gordon—organizer, Miss Miriam Carey.
Greene—librarian, Miss Marie F. Wait.
Lakewood—organizer, Miss Sarah Askew.
Lewis—librarian, Mrs. I. A. Kidder.
MacArthur—librarian, Mrs. Frances Morgan.

McPherson—librarian, Miss Gertrude Avey.
 Fort Riley—librarian, Miss Margery
 Quigley.
 Upton—librarian, Miss Katherine Tappert.
 Wadsworth—librarian, Miss Ola Wyeth.
 Wheeler—librarian, Miss Mary Lonyo.
 Williamsbridge—organizer, Miss E. K.
 Jones.

Miriam E. Carey, who organized the library service at Fort McPherson Hospital and the base hospital at Camp Gordon, has been appointed field director of all hospital library work in Tennessee, North and South Carolina, Georgia, Florida and Alabama, with headquarters at Atlanta.

Book service from headquarters is now reaching over seventy army and navy hospitals and Red Cross convalescent houses, and twenty civilian hospitals caring for army and navy men. At a camp or post where there is a library, the hospital library is managed as a branch of the camp library. But at the large base or general hospitals where there is no camp library, permanent collections of books are needed and trained librarians placed in charge.

Any prejudice that existed in the minds of the military concerning women at camp libraries fell as the chaff before the wind when the hospital library was mentioned. Even the most prejudiced of the "old school" officers admit that it is women and not men who are adapted to minister to the sick.

Women are employed as nurses in all the base hospitals, so difficulties of living which are well nigh insurmountable at some of the camp libraries are easily overcome at hospitals where living can be arranged for with the nurses.

When the camp library is five miles from the base hospital and there is only a corner of the Post Exchange to use as a library, the librarian works under difficulties. Book delivery to the wards is usually her first way out.

Training for hospital librarians will be given in a short course at Simmons College during the summer session, July 9-Aug. 16. This will be under the direction of Miss Jones of the McLean Hospital and will include practice work in Massachusetts hospitals. This will provide a corps of trained

workers who may be able to enlist for the duration of the war.

Bedside occupational courses will probably be installed in the base hospitals and education of the handicapped will be carried on. Books related to the subjects taught will be bought for these hospital libraries.

For hospital work in France, Miss Jones of McLean Hospital, spent a week in April at Hoboken working with Mr. Dickinson on selection of 25,000 books to be turned over to the Red Cross.

OVERSEAS SERVICE

Approximately 163,000 books had been sent overseas by the American Library Association up to May 15.

Mr. Stevenson, who arrived in France after the middle of April, has reported several conferences with representatives of the organizations that use our books, and with army officials. Transportation and warehouse space are being supplied by the army.

At the request of Mr. Stevenson special collections of books on technical subjects are being made up for overseas shipment. Each collection will be put in a separate box which will be marked to show the contents. And every box so marked will contain exactly the same books. Thus it will be possible for the association's representatives in France to send forward to the proper destination even the technical books, without opening the boxes. The preliminary order for this shipment comprised from 10 to 50 sets on the following subjects: Automobiles, aviation, electricity, military, naval, railroads, sanitation, and general technical. The number of volumes in each set varies from about 25 to 50.

Dr. M. L. Raney has returned to America from his service as A. L. A. representative in Paris.

MORE WORKERS NEEDED

In order to make sure that no man in the profession escapes an appeal to take part in camp library work, a letter has been sent to all members of the A. L. A., and to every library on the A. L. A. mailing list, asking: (1) For men librarians who will go into Library War Service. (2)

For names of men formerly connected with library work, who might be secured for the service. (3) For names of men not in the profession, who are not subject to military service, who with a little formal instruction might be useful in camp libraries. Camp library work needs men of real

executive ability, men who know books, not merely as scholars, but who can see and solve the problem of getting the right book into the hands of every man in camp. It needs men of common sense, of some dignity, and men who are used to roughing it, who can stand strenuous work.

RECENT ASSIGNMENTS TO CAMP LIBRARIES

Camp Beauregard, Alexandria, La.	Mrs. W. G. Moorhead, Assistant Miss Lucy F. Rahn, Assistant
Chickamauga Park (Ga.), Chattanooga, Tenn.	Justin Davis, Assistant Bernard Busby, Assistant Olga William Jones, Assistant
Camp Custer, Battle Creek, Mich.	Samuel H. Ranck, Acting Librarian Earl C. Bryan, Assistant Russell Gulick, Assistant
Camp Devens, Ayer, Mass.	Frank H. Whitmore, Librarian Mrs. George S. Maynard, Assistant Miss Carrie L. Williams, Hospital librarian
Camp Dodge, Des Moines, Ia.	Eric Janssen, Assistant (transferred from Camp Pike)
Camp Funston, Fort Riley, Kans.	Miss Margery Quigley, Hospital librarian
Camp Gordon, Atlanta, Ga.	Miss Catherine P. Walker, Assistant Mrs. Edna Barrett, Assistant
Camp Grant, Rockford, Ill.	Jesse Cunningham, Librarian
Camp Greene, Charlotte, N. C.	W. H. Duncan, Librarian Miss Marie F. Wait, Hospital librarian
Camp Humphreys, Virginia	Charles E. Rush, Organizer. Wm. M. Hepburn, Librarian Harold T. Stubbs, Assistant
Camp Kearny, Linda Vista, Cal.	Miss Helen E. Vogleson, Assistant Miss Mary Dale, Hospital librarian
Kelly Field, San Antonio, Tex.	Leslie T. Little, Assistant
Camp Lee, Petersburg, Va.	Basil B. Wood, Assistant (transferred from Camp Gordon)
Camp Lewis, American Lake, Wash.	Mrs. I. A. Kidder, Hospital librarian
Camp MacArthur, Waco, Tex.	Paul Reed, Assistant Mrs. Francis Morgan, Hospital librarian
Camp McClellan, Anniston, Ala.	Helmer E. Johnson, Assistant
Camp Meade, Admiral, Md.	Murray F. Pratt, Assistant R. D. Williams, Assistant
Camp Mills, Mineola, L. I., N. Y.	Charles H. Brown, Supervisor C. W. Foss, Librarian John E. Fitzpatrick, Assistant
Camp Pike, Little Rock, Ark.	F. Jay South, Assistant
Camp Sherman, Chillicothe, O.	Harry H. Wiggin, Assistant
Camp Taylor, Louisville, Ky.	J. E. Stanfield, Assistant
Camp Travis, San Antonio, Tex.	Miss Marion Darwin, Assistant
Camp Upton, Yaphank, L. I., N. Y.	George G. Champlin, Assistant
Camp Wadsworth, Spartanburg, S. C.	John C. Sicklely, Librarian
Camp Wheeler, Macon, Ga.	Miss Mary Lonyo, Hospital librarian

PERSONNEL

E. Gertrude Avey of Cincinnati, Ohio, is serving as hospital librarian at Fort McPherson Hospital, Atlanta, Ga.

Louis J. Bailey, librarian of the Public Library, Gary, Ind., who has been supervisor of Camps McClellan, MacArthur and Shelby, is now in charge of the Dispatch

Office at 31 West 15th st., New York city.

Emma V. Baldwin of the Brooklyn Public Library, will be at Headquarters for a few weeks following May 23, assisting especially in the compilation of a handbook of camp library practice.

Charles A. Brown, assistant librarian, Brooklyn Public Library, is organizing the

library service at Camp Mills, Mineola, L. I., N. Y., and at other army and navy stations in the vicinity of Brooklyn.

Earl W. Browning, librarian of the Public Library, Niagara Falls, N. Y., is organizing library service in the naval stations in the vicinity of Charleston and Paris Island, S. C.

Jesse Cunningham has been released by the St. Joseph, Mo., Public Library for a few weeks' service as librarian at Camp Grant.

Mary Dale, librarian of the Los Angeles County Hospital, has been given leave of absence to serve as hospital librarian at Camp Kearny.

W. H. Duncan, librarian Commercial High School, Brooklyn, N. Y., has been appointed librarian at Camp Greene for several months.

C. W. Foss, reference librarian of the Brooklyn Public Library, has been appointed librarian at Camp Mills.

Blanche Galloway is serving as library organizer at Pelham Bay Park, N. Y., Training Camp.

W. H. Hepburn, librarian of Purdue University, Lafayette, Ind., has been released by his library for several months to serve as camp librarian, Camp Humphreys, Va., a new engineering camp.

Marion Humble has been released for a few weeks by the Detroit Public Library and is assisting at Headquarters.

Mrs. V. G. Humphrey, formerly institutional librarian in Nebraska, is organizing the library service at the Fort Bliss Hospital, El Paso, Texas.

Willis H. Kerr, who has been librarian at Camp Funston, Kans., for several months, will join the force at Headquarters early in June. He will make frequent advisory visits to the various camp libraries, giving special attention to the educational activities in the camps.

Mrs. I. A. Kidder, librarian at Corvallis, Oregon, is in charge of the hospital library at Camp Lewis.

Mary Lonyo, formerly on the Detroit Public Library staff, is hospital librarian at Camp Wheeler.

Margery Quigley, librarian of the Divoll branch, St. Louis Public Library, has been

released to serve as hospital librarian, Camp Funston.

Samuel H. Ranck, librarian of the Public Library, Grand Rapids, Mich., is serving as librarian at Camp Custer during the absence of J. S. Cleavinger for about one month.

Charles E. Rush is organizing the library service at Camp Humphreys, Va. Mr. Rush will be in charge of publicity at Headquarters for a few months following his service at this camp.

John C. Sickley, librarian of the Adriance Memorial Library, Poughkeepsie, N. Y., is librarian at Camp Wadsworth.

Truman R. Temple, who has been librarian at Camp Grant, will become a field or district representative for the Library War Service about June 1.

Marie F. Wait of the Princeton University Library, is hospital librarian at Camp Greene.

Frank H. Whitmore, librarian of Brockton, Mass., Public Library, is serving as camp librarian at Camp Devens, Mass.

Purd B. Wright, librarian, Kansas City, Mo., has been serving as librarian at Camp Funston during Mr. Kerr's absence.

Malcolm G. Wyer, librarian of the Nebraska University and organizer of the camp library, Camp Logan, Texas, has joined the staff at Headquarters in Washington.

LETTERS FROM THE CAMPS

Camp Wheeler, Georgia

From Camp Wheeler Frederick Goodell, librarian, sends the following "report of progress," with a word of caution on the end:

The library at Camp Wheeler has now passed the formative period and has settled down to the steady grind as a part of the camp equipment. Now that we have a fair supply of books on the shelves we are filling up and expanding the branches and stations. With the books on the way to the camp as a result of the last drive we hope to establish much needed stations in company headquarters and mess halls.

We now have 35 distribution points. In order to furnish service in so many places it has been necessary to spread the book collection very thin in spots. This would not be wise, perhaps, in most camps, but Camp Wheeler sprawls over so much territory (it is now the largest camp in point of area) that it has been necessary to bring the Camp

Library to the thousands of soldiers stationed beyond walking distance of the main building.

I judge from the camp librarians' letters in the *LIBRARY JOURNAL* that the methods in use in the various camps are much the same. The administration of branches, the Base Hospital service, the distribution of magazines seems to be done in about the same way everywhere. I suppose we all try to fill the obvious need in the obvious way. So there is nothing particularly new about the things we are trying to do at Camp Wheeler.

I feel very strongly, tho, that we camp librarians must guard against that favorite vice of librarians—fussiness—now that we are apt to have more time on our hands. Fads, fancies and frills are not worth the powder to blow them up in a military camp. The Camp Library should be as business-like as the Ordnance Corps or the Quartermaster's Department. We have splendid buildings, splendid collections of books, the soldiers are making good use of the library service, the military authorities have come to see in the A. L. A. the most important organization working in the camps. Let us not spoil it all by hanging May baskets on the door knobs. Cute little tricks that hold the Swamp Hollow Ladies' Library Association breathless are very apt to impress soldiers as being merely soft. In a town library we can pass rules and fuss about regulations until only brother (or sister) cranks and juveniles will tolerate us. In the camps we must appeal to red-blooded he-readers or close up shop. Let us pull together to keep the cream puff school of library science out of the camps. An excellent motto for a camp library would be "The most books to the most readers with the least possible fuss."

Camp Grant, Illinois

From Camp Grant Truman R. Temple, librarian in charge, sends an appeal to other camp librarians to help him complete his file of *Trench and Camp*, which merits attention. He writes:

May I make an appeal thru your columns for assistance in completing my files of the various editions of *Trench and Camp*? I have a fairly complete set of most of the various editions, but none is intact except that of Camp Grant where I am now stationed. I have already placed a set of our issue in the Chicago Public Library, and my plan is to turn over the collection which I am now making to some library of the first class for safe keeping. I have a large supply of the various issues of Camp Grant which I shall be glad to exchange with any other camp librarian. Certainly no librarian needs to be told how valuable a set of these publications will become: and no time is to be lost in getting them together. I have been surprised

to learn how many Y. M. C. A. secretaries are obliged to admit that they have not preserved a complete file of the issues of their own camps. I may be addressed by any one interested at the Free Public Library, Leavenworth, Kansas, where I shall soon return.

I have been placing books in a very interesting location this week. About two miles north of the camp are trenches which are ready to receive a regiment at a time for a week's training under conditions as near as possible like those prevailing at the front. All kinds of revetting are used, the place bristles with machine gun emplacements, gas curtains are ready to be dropped instantly upon warning from the outside, and the headquarters are thirty-five feet underground. Opening from one of the trenches is a Y. M. C. A. dugout twelve feet under ground. It is the only one of its kind in this country and is said to be the largest anywhere, measuring thirty-two by seventy feet. It is expected that reading matter will be especially welcome here and I have chosen the best collection that I have yet sent out for the boys.

In addition to the stations and deposits which we are establishing about the camp proper we are making up a collection of about a thousand books to go with the three regiments of artillery when they start for their long course of work at the ranges in Sparta, Wis., next week. The idea was suggested to the librarian by the remark of a lieutenant of artillery who rather regretfully said: "I'm just beginning to find out what a fine collection you have. I wish I had got the habit sooner. I just wish we could take you with us when we go on our hike next week."

This work seems more important to me every day that I spend in camp. To give you a bird's-eye view of our work I wish to describe the last five men who have come to the desk where I am now writing. The first returned a volume of Gulick's *Dynamic of manhood* and the third volume of a work on the war. He apologized for the latter's being overdue, saying that "It's a work that you have got to study, not just read." The next man asked for a work on "Commercial art" something on advertising. "I don't want to get rusty on this subject you know." He is typical of a large class who are trying to fit themselves for more useful work when they come back. The third borrower was evidently of foreign birth. He took out a story of the class usually read by boys of twelve or fourteen. I fancy that it suited his needs. The fourth was so youthful in appearance as to be noticeable. He had selected a book by O. Henry and another by Herrick. "I read O. Henry to cheer me up after Herrick." "Does Herrick depress you?" "Well, he always seems in such a deliberately bad humor." The last of the five brought back a copy of

Ibsen and a book of easy French for which there is great demand. He immediately selected a similar book and a copy of Tennyson's poems. While I was writing this, the first man mentioned had chosen a copy of "Company training" and a textbook on geometry. Also three officers had selected seven books among them on the war or technical military works. I am pleased to note how the officers and men drop their formalities of rank and use the library freely in common.

The above may give a slightly one-sided view of things, for there is not the preponderance of non-fiction that is indicated. The proportion is about half of each. But in circulating wholesome fiction we are just as truly serving a high end as when we are putting out heavier works. It helps to fill up the hours of idleness which may prove dangerous, and also to get the mind out of ruts made by routine work.

READING MATTER AT THE FRONT

We are beginning to get letters from the other side relative to reading matter. In response to an inquiry at Base Hospital No. 8 as to the most acceptable donation for the pleasure of both staff and patients, it was stated that a group of American magazines regularly dispatched would be most appreciated. The Red Cross was supplying bundles of magazines twice a month, but these were largely English publications, and there was a general hunger for the familiar American ones also. The modest list submitted asked for the *Atlantic*, *Harper's Monthly*, *Scribner*, and *North American Review*, to which have been added the *Bookman*, *Munsey*, and *Life*, as well as a weekly roll of New York papers. Concerning the interest in the latter, opinion seems to be divided; in the case of magazines—new magazines—and books, there is no division of opinion.

Wallace B. French, formerly of the New York Public Library and now attached to the staff of this base hospital, writes in acknowledgment of the first magazines sent:

As for the magazines—they arrived in perfect condition, as well as did the newspapers. May I suggest? I am afraid that the newspapers do not justify their being sent—the pictorial supplements do—for these reasons: we get the news here fairly well in the European editions of English and American newspapers; the magazines give the American views in the boiled-down shape and we don't

have the time to read the more elaborate versions in the daily publications; newspapers require more space than magazines and tonnage is vital; and more pleasure is derived per dollar invested in the case of books and magazines. I believe you will welcome my suggestion and accept it in the same spirit in which I offer it—the good of the cause.

I can't praise too highly the sending of books and magazines. For example, one of the magazines you sent was left in a ward where there were 100 patients; it was passed from man to man and when it no longer seemed to circulate was taken to another ward of an equal number of beds. A very little arithmetic makes apparent at how little cost a man received great pleasure. And truly the greatest happiness was not the enjoyment of the magazine but this great, helpful, inspiring, strengthening thought—that people back home, in the whole as well as individually, sufficiently realized our situation and felt for us to give us these influencing little things.

All I have said of magazines can be doubly attributed to the books. We have about a thousand, with probably more than two thousand Americans here now—so that there is no need of a book case. Of course, there is a nice large one, but no books in it—they're being read! So far I have seen few, if any, books from the A. L. A. but no doubt they are on the way. For us, I think an enjoyable book is the best antidote for homesickness and disgust; for the patient, a better health giver than medication. Perhaps you have read what great efforts are being made to keep the armies in the best of mental as well as physical condition—in fact, I believe that the latter depends on the former. How, then, can you be called "visionaries" when you are working for the same result as are the Y. M. C. A. and the R. C. and hospitals.

Mrs. E. H. Galbreath, who was for several months also at Base Hospital No. 8, says in a recent letter, "If you could but see the gratitude and joy expressed by the men when any of us enter a ward with papers or scrapbooks in our arms, I believe you would feel repaid for the time spent in getting this material together."

And a private in the old "Fighting 69th" from New York City, now at the front, writes: ". . . I also must extend my most sincere thanks for the papers and magazines which you so thoughtfully sent me. And to tell the truth, all the fellows extracted the greatest pleasure from them, as news from home, no matter in what form or how much delayed, excites the greatest

A GROUP OF FOOD CONSERVATION POSTERS DONE BY STUDENTS OF THE CHICAGO ART INSTITUTE FOR USE IN ILLINOIS LIBRARIES

interest. As to your question about the most acceptable literature for the boys over here I can only say that newspapers and magazines containing news from home are always greatly appreciated by men who are themselves so far away from the country where all their interest naturally lies. And I do not need to state that to fellows fond of reading, good fiction is always very acceptable."

CO-OPERATION FROM THE BOOK TRADE

At the booksellers' convention held in New York City May 14-16 Ward Macauley, the retiring president, took occasion to give hearty endorsement to the camp library service of the A. L. A., and urged all booksellers who had not already done so to get in touch at once with their local librarians and find out the many ways in which they could give practical co-operation to the work.

Some of the publishers have used the collection of books for soldiers in their selling talk. In the clip-sheet "From a book lover's diary" sent out by Appleton, General Pershing's request for books for the soldiers inspired the "book lover" to step into a bookshop and select a few titles. Grosset and Dunlap had special rates on a long list of reprints, and sent out effective window cards to the trade. Houghton Mifflin had a list of "books the Piper recommends for you to read, to own, to send to camp libraries," and the signal poster was reproduced on the back of a recent Scribner booklist.

FOOD CONSERVATION THRU LIBRARIES

The service the libraries are rendering in informing the public both in regard to the need for food conservation and the best methods of intelligently observing the recommendations and rulings of the Food Administration has aroused the interest and admiration of many people in all sections of the country who had never before realized the value of the library as an educational factor in the life of the community.

At the coming conference of the A. L. A. there will be a joint session of the League of Library Commissions and of the Agricultural Libraries Section devoted to the consideration of libraries and the food

problem, at which some able representatives of the league, of some representative public libraries, and of the agricultural libraries, will discuss the general subject of library food service.

Illinois has a library publicity committee, the members of which are chairmen of sub-committees. This division of work has enabled the libraries to increase the effectiveness and efficiency of their service. "Library Letters" on food conservation work in the state have been distributed, and others in preparation will contain lists on "The foreigner and the food problem" (literature in foreign languages on food conservation and food production); "Small fruit culture," with a list prepared with the co-operation of Prof. S. J. Bole; a series of library publicity letters which are being prepared by Marcus Skarstedt, chairman of the committee on library publicity, and other material. The page of posters shows part of a series prepared for the use of Illinois libraries in their food conservation campaign by students of the Art Institute in Chicago.

SELLING THRIFT STAMPS

The Woodside branch of Queens Borough Public Library, Greater New York, is using several small signs at the charging desks in order to interest their patrons in War Savings Stamps.

Two of these cards read as follows:

Return your books on time!
We'd rather sell you a
Thrift Stamp
Than make you pay a fine.

You may draw seven books
and three magazines at one time
And buy as many Thrift Stamps
as you have quarters.

HELPING THE RED CROSS DRIVE

In the big parade with which New York City opened the Red Cross campaign for funds on May 18, the New York Public Library was well represented. There were in line 106 from the staff of the Central building, 203 from the branches, and 85 men and boys from the ranks of the pages, janitorial force, uniformed men, etc. In the absence of Edwin H. Anderson, the director, the line was led by H. M. Lyden-

berg, reference librarian, and Benjamin F. Adams, chief of the circulation department. Directly following the library unit—indeed a part of it—were 29 workers, both regular and volunteer, from the A. L. A. War Service. This group was led by Louis J. Bailey, who has recently come to New York from camps in the South to take charge of the dispatch office here, and included R. W. G. Vail, who has been in charge of the office all winter, and John Foster Carr, who directed the publicity campaign so effectively during the book drive. This company carried a banner with the words "American Library Association War Service" on one side, and "A library for every hospital" on the other. There were in all 423 marchers in the library section of the parade.

UNIVERSITY CREDIT GIVEN FOR STUDY IN PRISON CAMPS

THE study work done by English prisoners of war, thru books furnished by the British Prisoners of War Book Scheme (Educational), is now recognized as counting toward a degree by the following British universities: Oxford, London, Birmingham, Leeds, Manchester, Cambridge, Durham, Bristol, Liverpool, Sheffield, Wales, Glasgow, Aberdeen, Edinburgh, St. Andrews, Dublin and Trinity College, National University of Ireland, Queen's University of Belfast, and the Inns of Court and Council of Legal Education. British seamen interned abroad may also pursue studies and receive recognition from the Board of Trade, Marine Department.

FOR THE SOLDIERS

"Neither will I offer . . . that which cost me nothing."

I send my books to you, O brave men bearing
The world's great burden with undaunted
eyes,

For in some little way would I be sharing
Your spirit of unquestioning sacrifice.

And these books were my loves; I held each
dearly,

Even as another holds his wife and child;
Or as a friend whose wisdom counsels clearly;
Or as some kindly wizard who beguiled

Long winter evenings with his magic passes,
Transforming gray to gold, and sigh to
song;

Who poured red wine from seeming empty
glasses,

And waved across life's screen a gay, fair
throng.

Here was a sprightly Ariel, transporting
Around the world my spirit, fleet as his;
Here went I with young Cupid brave, a-court-
ing,

Forgot my loneliness in lovers' bliss.

Here are my poets, who, above wild discord,
Heard Truth's unfaltering voice ring high
and clear:

Who followed Beauty—left on earth the rec-
ord

That her white soul enfolds us, now and
here.

So take my books, with all their varied
graces—

The prophet's sight, the poet's ecstasy,
I shall not grieve to see their empty places
If they are half to you they were to me.

—F. I. B. in the *New York Tribune*.

BOOKS FOR OUR SOLDIERS AND SAILORS

A MILLION NEEDED AT ONCE

SIMPLE
AND
EFFECTIVE
POSTER

Bring all you can get for them. You have some at home—you can beg some from others. The Library ships all books and magazines left here to our men in N. J. camps and "over there". Can you buy some?

OF THE
NEWARK
PUBLIC
LIBRARY

TWO NEW INFORMATION CENTERS IN WASHINGTON

THE Service Bureau created by Executive order of President Wilson to be conducted under the direction of the Committee on Public Information has opened offices in Washington in the Home Life Building, at Fifteenth and G streets, N. W. The bureau, under the direction of Frederick W. McReynolds, professor of finance at Dartmouth College, is designed to speed up war work by making available complete records of the functions, location, and personnel of all government agencies. It will keep on hand city and telephone directories, government reports, reference books, and government publicity matter for distribution whenever desired.

The bureau has already prepared a card index, conveying personnel function, location and telephone number of the officials of all departments who may be seen on official business by those coming to Washington on government business. These indices will be corrected from day to day as changes occur in the departments. In addition, the bureau will maintain a file and index of bulletins, press releases and war publications. It will also have on file for reference purposes, all annual and other reports of all government departments, bureaus and commissions.

The Department of Labor has opened a special educational service under the direction of Roger W. Babson of Boston, with an office in room 816, Department of Labor Building, 1712 G street, Washington, D. C.

Anyone wishing to get in touch with those working on any special phase of the labor problem in Washington, or elsewhere, may communicate with this office for suggestions. The office is kept open until midnight each day for the benefit of strangers passing thru the city.

RUBAIYAT OF A WAR-HUSBAND

A loaf of war bread underneath the bough
A jug of watered milk, a prune—and thou
Beside me knitting. But what's that, if we
Can win the war? 'Twere Paradise enow!

—*Reclamation Record.*

THE Y. M. C. A. IN THE ENGLISH VILLAGE

IN the *Athenæum* for November, 1917 was an article on "The Y. M. C. A. and the needs of the English village" from which two paragraphs relating to co-operation between library and Y. M. C. A. may be of interest in view of the situation in camp libraries here—tho we do not agree with the English writer in all his conclusions.

"Lastly, it will probably be best for the Y. M. C. A. to leave the provision of books and all educational activities to other agencies. Great harm has come in the past from the confused mingling of amusement, religion, and education in villages where attempts have been made to provide reading-rooms for young men. The chief object has been the provision of innocent amusement which will keep people out of the public-houses. This underlying motive has spoilt many efforts by associating village recreation rooms with religious propaganda. It has also damaged the cause of education, and actually prevented many from discovering the abiding sources of noble mental activity which are to be found in literature and music. If your aim is merely to keep people out of the public-houses you will provide concerts and magazines of a nature which may attract people, but will never lead them to a real love of reading or to the appreciation of good music. For the future civilization of the village these two things—music and literature—will be greatly needed. And their greatest enemies are concerts of comic songs and shelves laden with books which people have given away because they find them uninteresting themselves and think they may be good for the 'lower classes.' If the Y. M. C. A. does undertake the work of providing music and literature for the village, it must remember that its task is no longer to provide an hour's distraction for men wearied by the horrors and hardships of war. It will have to provide the best literature and the best music for people who in the delectable peace of the English country-side will have the leisure, as experience proves they have the capacity, for enjoying the great heritage of English

poetry and the English novel and the works of the world's greatest musical composers.

"But perhaps it will be best for the Y. M. C. A. to concentrate on the quite different, but more immediately urgent task of setting up homely recreation rooms—places for smoking and talking and games, where the comradeship of the camp may be renewed—without any other object than that of giving to the youth of our English villages the unspeakable blessing of easy, comfortable, social intercourse. If it attains this end and this end only, the Y. M. C. A. will have done for the reconstruction of village life a work as well deserving of admiration as that which it has already achieved to the admiration of the whole Empire, in the camps and at the front."

ST. PAUL PUBLIC LIBRARY ADOPTS COMMISSION PLAN

At a meeting of heads of departments of the St. Paul Public Library, Apr. 22, the organization of a library council was effected, and a constitution adopted. This action was taken in accordance with the decision of the commissioner of education, Albert Wunderlich, and the librarian, Dr. W. Dawson Johnston, that a commission form of government would be of greater effectiveness in maintaining closer co-operation in the internal affairs of the library.

The object of the council, according to the constitution, "shall be to discuss and determine questions of policy relating to the library, particularly such questions as relate to the co-ordination of the work of different departments," and its membership includes the librarian, assistant librarian, and assistants in charge of divisions and sections. The officers of the Council are president, vice-president, and secretary, the librarian being president *ex-officio*.

At the first of the regular monthly meetings, held May 6, Mrs. J. T. Jennings was elected vice-president, and Myra Buell, secretary, to hold office for six months. Committees were appointed to consider revision of the library rules regarding borrowers' privileges; to report on the training desirable for library assistants; and to

consider with the librarian what principles should be adopted in the preparation of the library budget.

HIGH SCHOOL SCRAPBOOKS

THE A. L. A. owns a particularly fine collection of high school scrapbooks which may be had for a short time just for the asking. These books contain interesting pictures and material on work being done in schools including photos of rooms, arrangement, floor plans, lists of required and voluntary reading, charging systems, outlines of library instruction courses, methods of co-operation with various departments, publicity methods, etc.—in fact, all things pertaining to the administration and the work of a modern high school library.

An itinerary for this collection is being planned for the school year of 1918-19. Those desiring the books during next year should send the request to Helen S. Babcock, librarian of Austin High School, Fulton and Lotus avenues, Chicago, prior to Sept. 15, 1918. The books are packed in a small iron bound trunk 12 by 23—approximate weight 100 pounds. They will be sent C.O.D. from the last place of exhibition to the next and may be kept for a period of two weeks. The itinerary will be planned to make distances as short as possible, thus reducing the expense of express and loss of time. For those interested in this work the collection will be a source of help and encouragement, and in communities where no provision has been made for high school libraries it should arouse an interest and be a real source of inspiration.

THE original proof sheets of Mendelssohn's "Elijah" with manuscript changes by Mendelssohn and by William Bartholomew, who wrote the English words for the oratorio, have been sold by their owner, Dr. Frank W. Gunsaulus, of Chicago, for approximately \$1000. The proceeds of the sale have already been generously given to promote the work of supplying good literature to the boys in camp and at the front, and the manuscript itself has been presented by its purchaser to the University of Chicago.

NOTES ON THE MUNICIPAL LIBRARIES IN PARIS

IN the last four years the public, or "municipal," libraries of Paris have been undergoing reorganization for the general purpose of making them more adequate to the needs of the people by making them centers for the development of public spirit thru the entertainment, instruction, and information they can supply. The *Bibliothèque Administrative* of the prefecture of the Seine, with its two sections, French and foreign, has for its goal the establishment of a working laboratory for those engaged in the city's administration.

There are at present eighty-four of the municipal libraries scattered thru the twenty *arrondissements*. In the year ending in September, 1917, the number of loans was 1,427,798, a decrease of 20,062 from the preceding year. This decrease is attributed to two unusual conditions. During the year work on the collections made it necessary to close the libraries, in turn, for a period which made in the aggregate a total of 454 days. Shortage of fuel and lights in February also made it necessary to curtail the service. Service for army hospitals and for the blind was organized in some of the libraries during the year, and considering the unusual conditions which have made all library work difficult, the efforts to modernize the library service may be regarded as successful to a considerable degree.

The improvement of the printed catalogs has been pursued with especial vigor, so that the readers in each library may have at their service an adequate guide to the collection. New catalogs, for the Ampère, Henri Chevreau, Saint-Louis-en-l'Île, Arago, and Trousseau libraries, were printed before the end of the year; eight others were on the press; and six more were in preparation. The Arago catalog was prepared in dictionary form, modeled on the ones issued by the city of Glasgow. The Trousseau catalog marked an important step in the work of reform undertaken, for it was prepared from the books themselves, without recourse to the cards or to earlier memoranda.

The provision of new books for the municipal libraries was put into the hands of an agent, to facilitate direct purchase by the city.

In the *Bibliothèque Administrative*, work on the catalogs was suspended for lack of assistants. Late in the year the appointment of a translator, also familiar with bibliographical work, made possible the beginning of a reorganization of the material in the foreign section.

Of the two main divisions in this library, the administrative section is to contain the general reference tools—encyclopedias, dictionaries, catalogs, bibliographies, etc.—as well as general works on law, legislation, and administration. It will also contain as complete a collection as possible of works on the organization and administration of Paris, the neighboring communities, and the whole department of the Seine, as well as material on city government in general, whether in France or in other lands. Into the foreign section will go all material relative to countries which are not French territory, the subject matter, not the language in which it is written, determining its location. If the library is to be of the greatest usefulness, this material should be collected and examined by a librarian whose training shall render him competent to give intelligent judgment to its selection and arrangement.

In cataloging the material in this library, white cards are used for the French collections, and colored cards for the foreign section. At least two cards are made for each item. In the French section a subject card forms the main entry and contains the complete bibliographical record, while an author card has an abridged entry. In the foreign section also the subject card is the main entry, while an abridged entry is made under city or country.

Samples of these cards, and much other interesting information on the municipal libraries of Paris, are given in "Bibliothèques municipales et Bibliothèque administrative; fonctionnement du service (octobre 1916-août 1917) avec des notes bibliographiques sur quelques imprimés et manuscrits" issued by the prefecture of the Seine.

American Library Association

SARATOGA SPRINGS CONFERENCE

The fortieth annual conference of the American Library Association, will be held at Saratoga Springs, New York, from Monday to Saturday, July 1-6, 1918.

Headquarters for the A. L. A. and also for all its affiliated societies, will be the Grand Union Hotel, and all librarians attending are recommended to stop there if convenient. A number of smaller and less expensive hotels, however, are available. Rates prevailing for the conference are as follows:

Grand Union Hotel (Headquarters). 680 rooms. American plan exclusively. Rates \$5 to \$7 per day.

Hotel American (Three or four doors from Grand Union). Capacity 250. American plan. Rates \$3 to \$4 per day.

Summer Rest Cottages (5 or 8 minutes walk from Grand Union). Double and single rooms, with meals, from \$2.50 to \$3 each, per day. Also one suite for three (\$10) or for four (\$12) per day.

Strong Spring Hotel (5 or 8 minutes walk from Grand Union). 50 rooms with bath; 20 double rooms without bath; and 20 single rooms without bath. Rates for room \$1.50 and up; meals \$3.00 extra per day, each person.

Adelphi Hotel (Close to Grand Union). Single and double rooms, \$1.50 to \$3 a day per person, for room only; restaurant located in hotel.

Assignments to rooms and correspondence concerning all hotel reservations will be handled by a representative of the A. L. A. who should be addressed: American Library Association, care manager Grand Union Hotel, Saratoga Springs, New York. Reservations can, however, be made direct with hotel if preferred. Members who arrange to stop elsewhere are requested to notify the Saratoga Springs representative of the A. L. A., so that their names may appear in the advance register of attendance. Be sure in writing for reservation to state clearly your desire as to price, hotel arrangements you have made as to roommate, time of arrival, and any other facts which will help our representative in assigning you satisfactory quarters. Be sure to sign your name so as to show whether writer is a man or a woman.

General sessions will be held in the Convention Auditorium, a few steps from the Grand Union Hotel. Other meetings will be held in the Grand Union.

Arrangement for space for commercial exhibits should be made direct with the manager of the Grand Union Hotel. Committees of the association desiring space should communicate with the secretary of the A. L. A.

Saratoga Lake, an attractive sheet of water, is four miles from town, reached by trolley and auto. A very pretty public park is across the street from the headquarters hotel. The Saratoga country abounds in pretty walks and drives. Lake George is about thirty miles distant.

PLANS FOR DAY AT ALBANY

Saturday, July 6, will be observed as "New York State Library Day." The association and its affiliated societies and friends will be the guests of the New York State Library at Albany, stopping off there for the day on the way home. The following plans have been made for our entertainment, and reported to the secretary of the A. L. A. by Mr. J. I. Wyer, Jr.:

11-12:30. Exercises commemorating the hundredth anniversary of the founding of the New York State Library will be held in Chancellor's Hall in the State Education Building. The principal address will be made by the chairman of the Library Committee of the Board of Regents, the Honorable Chester S. Lord, of Brooklyn, or in case of his necessary absence, by the Honorable Charles B. Alexander, of New York City. Brief addresses are expected from the architect of the building, Henry Hornbostel, from former directors of the State Library, to all of which response will be made by President Montgomery.

1 p. m. A complimentary luncheon will be tendered by the Regents of the University, served in the Law Library on the second floor.

2-5 p. m. Conferences and visits of inspection to the New York State Museum on the fourth floor of the building and particularly to the different library divisions and sections. Despite the fact that Saturday is a half holiday the reading rooms are always open and the members of the staff will be in attendance at each division and section. Parties will be formed under competent guides to make a tour of the building; while those who do not care to join such parties, involving perhaps a mile or two of walk, will be welcomed in any section whose work may be of special interest.

Former students of the Library School will be asked to meet in a room to be designated

later, in the Library School suite, for some special ceremony.

Good trains, east, west and south, leave in the neighborhood of five o'clock, and the New York boat leaves at eight. The exercises have been delayed until 11 a. m., so that there may be no unpleasant rush in getting down from Saratoga Springs, which is little more than an hour away.

The Education Building is but a few minutes walk from the Union Station; several car lines connect the two, so that it has not been thought necessary to provide special transfer facilities.

ADVANCE ATTENDANCE REGISTER

An advance attendance register will be printed as usual. We want this to include all those who will attend the conference. The list will be compiled from hotel bookings made thru the A. L. A. representative at Saratoga Springs. All who expect to attend and who do *not* make their hotel reservation thru the above agency should send name, library position, home address and Saratoga Springs address not later than June 20 to American Library Association, care Manager Grand Union Hotel, Saratoga Springs, N. Y.

LIBRARY SCHOOL DINNERS

Library school dinners will be held on Thursday and Friday evenings, July 4 and 5. Programs for these evenings are scheduled to begin at 8:30 instead of 8, so as to allow dinner groups to remain together as long as possible. Those in charge of these dinners or reunions will please write the secretary of the A. L. A., who will gladly help with arrangements. Dinners can most conveniently be arranged for and held at the Grand Union, altho private dining rooms will be available for all.

REPORT OF COMMITTEES ON NOMINATIONS

The following nominations have been made by the committee on nominations, Walter L. Brown, chairman, Mary L. Titcomb, Gratia A. Countryman, George H. Tripp, and Charles E. Rush. The report of the committee has been adopted by the Executive Board.

For president: William Warner Bishop, librarian, University of Michigan, Ann Arbor.
For first vice-president: Charles F. D. Belden, librarian, Boston Public Library.

For second vice-president: Burton E. Stevenson, librarian, Chillicothe Public Library.

For Executive Board (for three years):
Linda A. Eastman, vice-librarian Cleveland Public Library. Adam Strohm, librarian Detroit Public Library.

For Council (for five years): W. Dawson Johnston, librarian, St. Paul Public Library. Joseph L. Wheeler, librarian, Youngstown Public Library. Mary S. Saxe, librarian, Westmount (Quebec) Public Library. Henry N. Sanborn, librarian, Bridgeport Public Library.

For trustee of the Endowment Fund (for three years): M. Taylor Pyne, Princeton.

GENERAL SESSIONS

First Session, Monday, July 1, 8 p. m.
(Convention Auditorium)

Call to order by the president.

Address of welcome—Thomas E. Finegan, deputy commissioner of education for New York State.
President's address: Civilization—Thomas Lynch Montgomery, librarian Pennsylvania State Library.
Informal reception in the Ball Room of the Grand Union Hotel will immediately follow adjournment.

Second Session, Tuesday, July 2, 9:30 a. m.
(Convention Auditorium)

Reports of officers and committees.

Most of the reports will be printed in advance and distributed to members, and will be read only by title and ordered printed as a part of the Proceedings.

Report of the War Service Committee. The report will include those of the chairman of the committee, J. I. Wyer, Jr.; the chairman of the sub-committee on finance, Dr. Frank P. Hill; and of Dr. Herbert Putnam, general director of the Library War Service. The reports will be printed in advance and only brief oral summaries will be presented at this session.

Camp Library Symposium. Conducted by Carl H. Milam, assistant to the director, Library War Service.

1. What men read

- (a) In camps—M. S. Dudgeon
- (b) In hospitals—Miriam E. Carey

2. Sending books "over there"

W. H. Brett

Asa Don Dickinson

3. How the camp library reaches every man

Joy E. Morgan

Frederick Goodell

4. A day in camp

Lloyd W. Josselyn

John A. Lowe

5. Is it worth while?

Adam Strohm

An opportunity will be given for the general discussion of each topic.

Third Session, Wednesday, July 3, 9:30 a. m.
(Convention Auditorium)

Business.

Libraries and the U. S. Food Administration—Edith Guerrier, director of the Library Section of the Food Administration.

What our library is doing to help win the war—a symposium.

1. The county and rural library—Mary L. Titcomb, Washington County Free Library, Hagerstown, Md.
2. The city library—Hiller C. Wellman, City Library, Springfield, Mass.
3. The state library—J. I. Wyer, Jr., New York State Library.
4. The university library—J. C. M. Hanson, University of Chicago Libraries.

What Canadian libraries are doing to help win the war—George H. Locke, Toronto Public Library

Fourth Session, Thursday, July 4, 2:30 p. m.
(Convention Auditorium)

Conference "sing"—Led by Chrystal Brown, Y. M. C. A. song leader, Camp Lee, Va.

Poems of the war: author's readings—Carl Sandburg, Chicago.

Address—(Speaker to be announced).

Fifth Session, Friday, July 5, 9:30 a. m.
(*Convention Auditorium*)

The future of library work—Arthur E. Bostwick, St. Louis Public Library.

The spirit of the war literature:

(a) Poetry—May Massee, editor *The Booklist*.

(b) George F. Bowerman, Public Library of the District of Columbia.

Memorial resolutions for James L. Gillis and Henry E. Legler.

Report of the committee on resolutions.

Report of the tellers of election.

Unfinished business.

Adjournment *sine die*.

The Council will meet on Wednesday morning, July 3, after adjournment of the general session; and also at 4:30 p. m. on Friday, July 5. The program is not yet completed.

The agricultural libraries section will hold two sessions. The first, Wednesday evening, July 3, will be a joint meeting with the National Association of State Libraries and League of Library Commissions. This will be a symposium on libraries and the food problem, among the speakers being Claribel R. Barnett, Carl B. Roden, Edith Guerrier, and H. W. Wells, associate director of the United States Boys' Working Reserve. At the second session, on Thursday evening, papers will be read on "A program for library extension work at Iowa State College," by Vera M. Dixon; "The sources of agricultural statistics," by Mary G. Lacy; and a third on official agricultural literature.

The catalog section meets Tuesday evening, July 2. Willis F. Sewall, of the Adjutant-General's Office, will talk on "War department indexes," and there will also be a symposium on "Cataloging economics."

The children's librarians section will also meet Tuesday evening, but the program for this section is not yet ready to announce.

The trustees' section meets Tuesday afternoon, the general subject for consideration being "What the trustees can do in aid of the Library War Service."

The school libraries section, meeting Friday evening, will consider the reading of the adolescent and its service to patriotism.

In the college and reference section, Friday evening, the program will include "Preservation of bound newspapers," H. M. Lydenberg; "Instruction in bibliography and the book arts in colleges and universities," a discussion led by A. S. Root and George P. Winship; "University and college catalogs in university libraries," a discussion led by J. C. M. Hanson.

The professional training section, Friday afternoon, has planned this program: "The war and library training," Frank K. Walter; "Some experiments in secondary training:

psychological tests conducted in training classes of the public libraries of Brooklyn, Chicago, Detroit, Portland (Ore.) and Washington," Dr. Elsie Murray, professor of psychology, Wilson College, Chambersburg, Pa.; "Neighborhood apprentice class," Emilie Mueser, librarian Lucas County Library, Maumee, Ohio.

There will be several round tables. The government documents round table will be held Friday afternoon, the feature being a discussion of government documents relating to the war, by H. H. B. Meyer. A round table for discussion of matters of interest to camp librarians will be conducted Tuesday evening. Joseph L. Wheeler, assistant to the director, A. L. A. Library War Service, will preside. A round table of the libraries of religion and theology will be held Wednesday evening, for informal discussion.

At the lending department round table, Wednesday afternoon, "Elimination of the use of readers' cards" will be discussed by Jeannette M. Drake, of the Los Angeles Public Library, and there will also be a paper on "Best methods of lending routine." Discussion will follow each paper.

The committee on library training is arranging for a round table conference of training class teachers Wednesday evening. Discussion of the standards of admission to a training class will be led by Marie Newberry of the New York Public Library; the length of the course, the time for practice and study, and the question of paid practice work, by Lucy Morgan, Detroit Public Library; the subjects taught, Adah F. Whitcomb, Chicago Public Library; the elimination of undesirables—how and when, Clara W. Herbert, Washington, D. C., Public Library; the salary suited to students completing the course, Ernestine Rose.

The League of Library Commissions will hold its first session, Wednesday afternoon, when Melvil Dewey will discuss "The functions of the library commission in reconstructing the world after the war," and there will be a symposium on certification of librarians and standardization of libraries. The second session, Wednesday evening, will be a joint meeting with Agricultural Libraries Section and National Association of State Libraries. The third session, Thursday evening, will be a joint meeting with the National Association of State Libraries, for discussion on method of control of state supported library activities.

It is expected that meetings of the Special Libraries Association will be held on Thurs-

day and Friday evenings and Friday afternoon. The program is not yet formulated.

The American Association of Law Libraries will hold three sessions. The first, Tuesday afternoon, will be a joint meeting with National Association and State Libraries. At the second, Wednesday afternoon, "Emergency legislation in the United States and the British Empire will be discussed by Frederick C. Hicks, law librarian, Columbia University. At the third Wednesday evening, John T. Fitzpatrick, law librarian, New York State Library, will speak on "Editing the New York Session Laws."

The first session of the National Association of State Libraries, Tuesday afternoon, will be a joint meeting with the American Association of Law Libraries. The principal address will be on "Workings of the Massachusetts Constitutional Convention," by Lawrence B. Evans, state librarian of Massachusetts. The committees on legislative information service, on skeleton index, and on boards and commissions, will make their reports. At the second session, Tuesday evening, besides the presidential address by Gilson G. Glasier, librarian Wisconsin State Library, "Collecting and cataloging official war documents," Dr. R. D. W. Connor, North Carolina Historical Commission; "Collecting local war material in New York State Library," James I. Wyer, Jr.; "The Connecticut military census and some of its functions," George S. Godard. The third session, Wednesday evening will be a joint meeting with the agricultural libraries section and League of Library Commissions. The fourth session Thursday evening, will be a joint meeting with League of Library Commissions, with round table discussion of legislative reference work and state library exchanges. The work of the New York Municipal Reference Bureau of the Conference of Mayors and other City Officials will be described by William P. Capes, secretary; state library exchanges will be discussed by Mrs. M. C. Spencer of Michigan; and recent changes in library laws, by A. J. Small, law librarian, Iowa State Library.

GEORGE B. UTLEY, *Secretary*.

TRAVEL ANNOUNCEMENT

Saratoga Springs is thirty-nine miles north of Albany, N. Y., on the Delaware and Hudson railroad. No special train service for A. L. A. members attending the convention will be allowed, tho special Pullmans from Chicago to Saratoga without change have been secured.

Below are given the one-way through rail-

road fares on standard lines as at present in force, tax of eight per cent included.

New York City.....	\$4.54
(Round trip \$8.62)	
Philadelphia	7.53
Washington	11.20
Boston	5.49
Chicago	22.17
St. Louis	26.64
Milwaukee	24.38
St. Paul and Minneapolis	32.43
Cincinnati	19.33
Detroit	17.12
Cleveland	14.26
Buffalo	9.29
Omaha	34.75
Kansas City	32.56
Des Moines	32.75

New York Party. The New York party, in charge of Chas. H. Brown of the Brooklyn Public Library (26 Brevoort place), plans to go to Albany Sunday, June 30, on the night boat. Fare from New York to Saratoga on the night boat is \$3.43 one way (round trip \$6.59), but by use of a ten-party ticket, can be reduced to \$3.10. Staterooms (accommodating two persons) are \$1.50 and up; or 75 cents and up for each person, plus ten per cent war tax. Reservations should be made for stateroom berths on the boat not later than June 10, and as much earlier as possible. Make reservations through Mr. Brown, remitting to him one-half the price of stateroom ticket (plus tax of ten per cent) and also the amount of party ticket.

Those attending from points which would bring them through New York City are cordially invited to join the New York party and make reservations through Mr. Brown. [The fare from Philadelphia to New York City is \$2.43; Washington to New York City, \$6.10.]

New England Party. A special party will leave the South Station, Boston, July 1 at 10 a. m. (Framingham, 10:38; Worcester, 11:15; Springfield, 12:40 noon; Pittsfield, 2:30) arriving at Albany at 3:48 p. m.; leaving Albany at 4:45, due Saratoga at 6:25 p. m. [Verify these times as summer schedules may make some slight changes. It is possible that an earlier train may be put on from Albany to Saratoga, connecting with the Boston train.]

Fare, Boston to Saratoga one way, including war tax, \$5.49. Register for this trip *before June 20th* with F. W. Faxon, 83 Francis St., Boston, Mass., sending him the money for parlor car seat only. Buy railroad tickets of local agents. Parlor car seats, including war tax are: Boston to Albany, \$1.10; Worcester to Albany, 88c.; Springfield to Albany, 55c.; Pittsfield to Albany, 28c. Should it be possible to run parlor car through to Saratoga without

change, the additional 33c. can be collected on the train. It is hoped that all who join the party will decide to take seats in parlor car, though of course coaches can be used if any desire to save the small extra outlay.

Chicago Party. John F. Phelan of the Chicago Public Library will be in charge of the special party. Arrangements have been completed with the New York Central to operate special Pullman cars, without change, for the exclusive use of the delegates, leaving Chicago, Sunday, June 30, LaSalle Street Station, at 5:30 p. m. and reaching Albany at 1:50 p. m. next day. Connections will be made with the Delaware and Hudson train at Albany at 4:45 p. m. arriving Saratoga Springs at 6:25 p. m. It is possible that an earlier train may be run between Albany and Saratoga, but between train connections delegates will have an opportunity to tour this interesting city.

The one way fare Chicago to Saratoga Springs is \$22.17 including war tax, and Pullman fare Chicago to Saratoga Springs is \$4.95 lower berth, and \$3.96 upper berth, including war tax. Delegates from Wisconsin, Iowa, Minnesota, Missouri, and others passing thru Chicago are invited to join the Chicago party, and to register before June 20 with Mr. Phelan, remitting Pullman fare to insure reservation. Check baggage thru Chicago to Saratoga Springs, using tags for this purpose which will be furnished upon registration.

POST CONFERENCE

Although it has been decided not to plan any post-conference trip this year, a very attractive post-conference rest is offered through the kindness of Dr. Melvil Dewey. His Lake Placid Club, situated in the most beautiful region of the Adirondack mountains, on the shores of Lakes Mirror and Placid, is readily reached from Saratoga by rail on the New York Central R. R. via Albany or Schenectady; or via Plattsburgh over the Delaware & Hudson R. R. Lake Placid is 120 miles from Saratoga by state roads, and would make a wonderful motor trip, and parties of 6, 11 or 14 could be handled that way. It would also be possible to go through Lakes George and Champlain, and reach Lake Placid Club by motor from Westport, 35 miles.

Dr. Dewey will personally welcome any who come to the club making them members during their stay, without admission fee, and thus give all the benefit of a 50c. a day reduction on meals. That is, meals would be \$3.00 a day to the A. L. A. party. One dollar rooms

are offered free, or a credit of \$1.00 on any larger room or room with bath, and a charge of half regular price for the difference. This is certainly a rare opportunity for an inexpensive rest-outing among the mountains and Adirondack lakes. To quote from Dr. Dewey's invitation: "I will give those who come a library banquet; a 40-mile motor trip to our Stonhous farms, gardens, creamery, grist mill; and another 30-mile trip through our Placid farms, with an afternoon on the lake in the club launch, and a camp dinner on 'Moos Yland'. I will give them the free use of boats, canoes, golf courses, tennis, camps, during their stay; other rides besides the two free ones, at half price for cars or carriages. Our Boston symphony music begins July 8. The party ought to plan to stay at least three days to get a good look at our dooryard which is now 10 miles long, and could remain as long as they wished until rooms were required for the regular tenants. My instinct is to have as many of these hard-worked librarians as possible get an extra nice trip out of it."

It is only necessary to add to the above that no one ever regretted such a visit as that offered, and to ask any who care to go to the Lake Placid Club to write to Dr. Dewey there, of their wishes as to rooms and length of stay. Please write him before June 20 for privilege cards entitling to reductions offered. The travel committee will make arrangements for transportation if those going will apply at headquarters during the first three days of the conference.

F. W. FAXON, *Chairman.*

Library Organizations

AMERICAN LIBRARY INSTITUTE

C. H. Gould has been re-elected a member of the board for a term of five years. Dr. A. E. Bostwick and S. S. Green have been re-elected as Fellows for the usual term of ten years.

The following have been newly elected as Fellows of the Institute:

William Warder Bishop, librarian, University of Michigan.
 Clarence Saunders Brigham, librarian, American Antiquarian Society.
 Thomas Franklin Currier, assistant librarian, Harvard College Library.
 E. A. Hardy, secretary, Ontario Library Commission.
 Frederick C. Hicks, law librarian, Columbia University.
 Richard H. Johnston, librarian, Bureau of Railway Economics, Washington, D. C.
 A. G. S. Josephson, chief cataloger, John Crerar Library.
 H. M. Lydenberg, reference librarian, New York Public Library.

William Stetson Merrill, chief classifier, The Newberry Library.

Miss A. L. Reed, librarian, Vassar College.

Henry O. Severance, librarian, University of Missouri.

Henry B. Van Hoesen, assistant librarian, Princeton University.

Frank K. Walter, vice-director, N. Y. State Library School.

P. L. Windsor, librarian, University of Illinois.

W. N. C. CARLTON, *Secretary*.

*INLAND EMPIRE TEACHERS ASSOCIATION—
LIBRARY SECTION*

A meeting of the Library Section of the Inland Empire Teachers' Association was held April 3, 1918, in the library of the Lewis and Clark High School, Spokane, Washington, the president, Gertrude Buckhouse, librarian, University of Montana, presiding.

Food conservation and war work were emphasized in a series of interesting papers and addresses, before a group of representative librarians of the Northwest. The first speaker, F. A. Adams, Director of Education for Washington, under the U. S. Food Administration, gave an interesting address, emphasizing ways and means of aiding the U. S. Food Administration in food conservation. W. W. Foote, library director for Washington, spoke on "Library publicity and food conservation in Washington." The work which might be accomplished for food conservation, by the libraries and schools' working in cooperation, was pointed out. The eagerness of librarians and teachers to aid in this movement was told in the fine reports sent to the director, from all over the state. A large number of posters made by school children were on exhibit.

George W. Fuller, librarian, Spokane Public Library, spoke on the "War service of the Spokane Public Library," telling of a food show held in January, two campaigns for collecting books which netted over 10,000 volumes, and a third campaign for camp library funds resulting in contributions of almost \$2000.

Elizabeth Stout, librarian, Lewis and Clark High School, Spokane, read a paper by Mary A. Batterson, librarian of the Green Lake branch of the Seattle Public Library, describing a very successful food exhibit held in February at this branch.

Miss M. Z. Wilson, librarian, Bellingham Normal School, gave a brief account of the splendid cooperative work being done at that school, and Lucile Fargo, librarian, North Central High School, Spokane, told of the interest the boys and girls throughout the state were taking in all phases of food conservation and war work.

Dr. James Fleming Hosic, Secretary of the National Council of Teachers of English, Chicago, Illinois, principal speaker of the convention, was the last on the program. His subject was "The importance of the library in the school," and he divided the subject under three main heads, the movement for better school libraries, the importance of the library in the school, and suggestions as to practical procedure.

W. W. FOOTE, *Secretary*.

KENTUCKY LIBRARY ASSOCIATION

The Kentucky Library Association held its tenth annual meeting in Louisville, April 24-25. The experiment was tried this year of holding the library association meeting coincident with the meeting of the Kentucky Educational Association. This association invited the members of the library association to all their meetings and this enabled the school librarians and others interested to attend both meetings.

Wednesday afternoon, April 24, was given up to an inspection of the Camp Zachary Taylor Library and this proved a most interesting feature of the meeting in spite of the pouring rain. Louisville people had generously provided automobiles for the party and they were driven thru Camp Zachary Taylor and were able to inspect the Y. M. C. A. and K. C. buildings, the Camp Library and other places of interest. Arrangements had been made for dinner at the Hostess House and everybody particularly enjoyed the delicious things served in the cafeteria, the time spent in the charmingly furnished building and the musical program furnished by Mrs. George T. Settle and Private Jesse Miller, the "singing soldier" at Camp Taylor.

At 7:30 in the evening the Kentucky Library Association by special invitation attended the patriotic meeting of the Kentucky Educational Association held in the Liberty Theatre at the camp where they had the privilege of hearing a splendid talk by the commanding officer, Major General Harry C. Hale, and a special program of music by the Division Band and the camp song leaders.

The meeting Thursday morning, April 25, was given over entirely to library war service work. George T. Settle, president of the association, presided.

May Wood Wigginton described the work done by the Louisville Free Public Library staff in organizing the library at Camp Zachary Taylor. This included special reference and circulating work done at the Main building for the officers and men and their families,

the establishment and maintenance of stations in the Y. M. C. A. and K. C. buildings and base hospital, the cataloging and classifying of the books and the development of the circulating and reference work in the camp building itself. All of this work the library staff had been able to do thru the patriotic generosity of the Louisville Library board of trustees who had authorized the librarian to use the staff to any extent needed with the result that almost the entire force of the order and catalog departments and such other members of the staff as could be spared had given almost full time thru the winter and spring to camp service.

George Lothrop Lewis, librarian of the Athenaeum Library of Westfield, Mass., who had been resident camp librarian at Camp Zachary Taylor for the past three months, gave an interesting description of his work in the camp library, giving a view of his day's work from the time he was awakened at 5:45 in the morning by a bugle call until lights were out all over the camp at 10:30. He illustrated his talk with a map at the camp, showing the ground that had to be covered by the daily deliveries of books and magazines to all the stations including the one at the Remount station and the one at the artillery range twenty miles down the river, at West Point. He gave the visitors some idea of the tremendous amount of work necessary to keep the camp library running. Many were astounded at the amount of work involved by the sorting and distribution of the magazines received by the camp under what is known as the Burleson act, which is only one of the many routine duties of a camp librarian.

After this view of the work in the library at Camp Zachary Taylor, George B. Utley, executive secretary of the Library War Service, described the work all over the country done by the American Library Association in financing, organizing and equipping camp libraries and other agencies for supplying soldiers and sailors with reading matter. It was a great privilege for the Kentucky librarians to hear Mr. Utley and thus be able to get a bird's-eye view of the work accomplished by the American Library Association all over the country and abroad.

A business session and round table was held in the Main library at 2:30 Thursday afternoon. Fannie C. Rawson, secretary of the Kentucky Library Commission and state director for the collection of books for soldiers and sailors, presided at a round table on the book campaign. She read a report of books collected thruout the state and every

librarian present described her experiences during the campaign.

Mrs. Morris Gifford on behalf of the State Food Administration, spoke on the organization in the state for food conservation, emphasizing the part the libraries could play in the publicity and the organization of the state to this end.

Carolyn E. Adelberg, library publicity director, U. S. Food Administration, in Kentucky, congratulated the librarians on what they had done in advertising food conservation and called attention to a special exhibit of 250 posters on food conservation made by the school children of Louisville and displayed in the Louisville Library.

George B. Utley presided at a round table for discussion of library problems. All the libraries had apparently the same problems: how to make their appropriation meet increased cost of maintenance, and how to make the library service meet the increased demands of patriotic service.

Officers elected for 1918-1919 were President, Miss Susan S. Towles, librarian, Henderson Public Library; first vice-president, Euphemia K. Corwin, librarian, Berea College Library; second vice-president, Henrietta Litzendorff, librarian, Newport Public Library; secretary-treasurer, May Wood Wigginton, head cataloger, Louisville Public Library; member-at-large, Fannie C. Rawson, secretary, Kentucky Library Commission.

MAY WOOD WIGGINTON, *Secretary.*

ROUND TABLE OF MICHIGAN HIGH SCHOOL LIBRARIANS

The round table conference of high school librarians met at Ann Arbor, Mar. 29. The meeting was called to order by the chairman, Miss Poray. After a brief business meeting the remainder of the forenoon session was devoted to a talk by Miss Hodge of Highland Park on the topic, "More than books." In this talk she very ably discussed the special opportunities which the high school librarian has to encourage the individual preferences of the pupils in science, mechanics, or other subjects, and also her opportunities to develop a taste for good literature, by placing before them only the best works, and such as will give them the cultural background which most of them lack in their homes.

In the afternoon session the different librarians gave reports as to what library instruction they were carrying on in their schools, or what special work they had undertaken. From these reports and the discussion that followed many valuable hints were gained for dealing with high school problems.

The committee on instruction in high school libraries stated that they had collected a large amount of material but had not, in the time given, been able to organize that material so as to give a complete report. The motion therefore was made and approved that the committee be continued another year and that the material be combined into recommended courses for high schools of different grades and sizes. Mr. Certain of Cass Technical High School, Detroit, was appointed as an additional member and chairman of the committee. The officers elected for the following year were: chairman, Fanny Ball of Grand Rapids; secretary and treasurer, Mabel Asman of Bay City.

FANNY D. BALL, *Secretary.*

NEW YORK LIBRARY INSTITUTES

A joint meeting of the Hudson Valley Library Club and the State Library Institute was held at the Adriance Memorial Library, Poughkeepsie, N. Y., on May 15, with an attendance of forty-three. At the morning session Burges Johnson, assistant professor of English at Vassar, gave a most interesting and informing talk on the insidious workings of German propaganda, and H. N. W. McGill spoke briefly on the work of the A. L. A. war service dispatch office in New York city. In the afternoon Dr. James Sullivan, state historian, spoke on the library's importance in the maintenance of a true democracy, and Norma B. Bennett, librarian of the Madison, N. J., Public Library, gave a brief but practical talk on library "conveniences," the tools and practical devices whose use makes easy and efficient the physical work of library administration.

A luncheon was given at the Nelson House at 12.30 by I. Reynolds Adriance, president of the Poughkeepsie Library board, to which all attending were invited.

A State Institute was held at the Flower Library, Watertown, N. Y., in connection with the spring meeting of the Northern New York Library Club on Friday, May 17th. There were forty members in attendance, representing fourteen libraries in the district. After routine business, the president of the Library Club spoke briefly on the general topic for consideration, "The library's help in winning the war," and the following speakers gave short talks: Anna R. Phelps, of the State Library, on the work done in Albany in preparing books for the soldiers; Mrs. Francis H. Lamon, president of the Northern New York Federation of Woman's Clubs, on the need of sending to the camps

all the books possible, including text-books; Henry N. Brown, chairman of the War Savings Committee, on the help the library may give to this work; W. I. Roe, manager of the County Farm Bureau, on the relation of the library to this bureau; and Miss Perine of the Flower Library staff, on work with children.

The afternoon session was taken up by addresses by Mrs. R. J. Buck of the Red Cross committee on the work of the library with the Red Cross; D. L. Cornwell, county food administrator, on the importance of food conservation and the ways for the library to help. A conference for small libraries was led by Mary Hasbrouck of the Ogdensburg Library. Mildred Bemis, of the Flower Library, gave a good review on recent war books. The nominating committee, composed of Katherine Perine, Geo. P. Schwartz, and Mrs. Eva Frederick, reported the following slate of officers for the next two years, which was elected: president of the Library Club, Mary Hasbrouck, Ogdensburg Library; vice-president, Mrs. Harriett Merrill, Carthage High School Library; secretary, Mollie Parker, Gouverneur Library; treasurer, Mrs. A. L. Williams, Clayton Library.

Library Schools

NEW YORK STATE LIBRARY SCHOOL

Recent visiting lecturers have been:

- Apr. 23. Herbert Whitlock, state mineralogist, Lettering and the use of lettered signs.
Apr. 29. John Foster Carr. The library and the immigrant.
Apr. 30-May 4. Clara Whitehill Hunt. Library work with children. (5 lectures.)
May 1. Mrs. Flora De Gogorza. Library work with children.
May 10. Anne Thaxter Eaton. The school library.

Herbert Whitlock, curator of minerals, N. Y. State Museum, has given to the school an excellent representative collection of typical lettered signs which illustrate the various library uses of such material.

Commencement exercises will be held Friday a. m., June 14. The address to the graduates will be given by Mr. R. R. Bowker.

At the request of the School Libraries Division the annual Library Institute for high school teachers and librarians of the state will be extended from 10 days to three weeks (July 9-26). It is intended primarily to meet conditions in school libraries of the state. It will cover simple methods of school administration.

The class in business library organization has completed its visits to files of different types in state departments and elsewhere. The files visited were the general files of the State Education Department and the Examinations,

Educational Extension, Legislative Reference, Library School and Visual Instruction divisions of the State Education Department; the Factory Inspections, Workmen's Compensation and Statistical divisions of the State Industrial Commission; the Public Service Commission of the second district and the Research laboratory of the General Electric Co. of Schenectady. Both information and correspondence files and their methods have been studied.

The titles of the bibliographies to be submitted by the senior class are as follows:

Baker, C. W. County government in the United States.

Brewster, Mary B. Index to the files of the Connecticut General Assembly Session of May, 1790.

Buck, Edith M. Index to family names in selected books on New York history in the New York State Library.

Fisher, N. Mignon. Phil May, his life and work.

Howard, Anna. Reading list on Nebraska.

Levin, Nathan R. Educational surveys.

Randall, Elinor E. 250 popular books about music.

Santes, Marie M. Alsace-Lorraine; history and politics from the earliest times to the present.

Tai, T. C. Books on China, published since 1900.

Todd, Nancy H. Selected list of books on Sunday schools and Sunday School work.

Van Sant, Clara. Alaska; its industries, resources and opportunities.

Waller, Florence M. List of engineering colleges and universities with bibliographic references.

Frances Dorrance will submit a survey for a county library for Luzerne Co., Pennsylvania.

Bessie L. Eldridge, Dorothy L. Hawkins and Margaret J. Scott, all of 1919, have been appointed temporary assistants in the New York State Library.

FRANK K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

The annual alumni supper, which will take place on Friday evening, June 14, in the Art Gallery of the Library, will be an informal, war-time affair. The classes of 1898 and 1908 will hold reunions.

The library showed an interesting exhibit of representative examples of fine printing in connection with the Director's lectures on printing before the Library School. The books are specimens from the presses identified with the revival of printing at the close of the last century, and include such well-known presses as the Kelmscott, the Doves Press, Merrymount, Vale, Marion, De Vinne, Riccardi, Essex House, Riverside, and Dun Emer. A few examples of bookplates were also shown, arranged according to types.

On Wednesday, April 17, the Library School of the New York Public Library visited the library and school.

On April 12 the students visited the headquarters of the Brooklyn Public Library, and also the library of the Girls' High School,

where they were interested to observe self-government in full operation. The afternoon of April 19 was spent at the main library of the New York Public Library. The library of Columbia University was visited on May 3, and on May 10 three branches and the administration department of the Queens Borough Public Library. Teas, and a garden party with Miss Hassler of the Queens Library, were features of these visits.

William R. Eastman of Albany gave his annual course of five lectures on library buildings. For several years past Mr. Eastman has said, "This will be the last," but each recurring spring has brought him full of vigor and interest, and we hope to welcome him again in 1919. Miss Mary Hyde of the New York Public Library School is giving the course in the history of libraries this year.

JOSEPHINE ADAMS RATHBONE, *Vice-Director*.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

The list of students and graduates who are engaged in national service has of late received several additions. Letty L. Davis, 1912-13, is librarian for the Red Cross Institute for Crippled and Disabled Men. Since last writing Ralph Gossage, ex-1913-14, has returned to France, this time with the United States Army Ambulance Section. Marian Greene, 1912-13, has sailed for work with the Child Welfare Section of the Red Cross Social Service in France. Carol Hurd, 1912-13 (Pratt, 1911-12) is in France with the Young Women's Christian Association. Nelson McCombs, ex-1917-18, is with the Medical Supply Detachment of the United States Army at Camp Stuart, Virginia. Helen Scarth, 1911-12, is employed in a munitions factory in New Jersey. Fannie Tabor, 1913-14, reports giving service at the library at Camp Sheridan. Students are continuing to do short periods of practice work in the A. L. A. Dispatch Stations at the New York Public Library and at Hoboken. Red Cross Auxiliary No. 234, New York County Chapter, which is operating at the school under the direction of Miss Sutliff, has produced to date one hundred and forty pieces of knitted wear these consisting of nineteen mufflers, thirty-six sweaters, twenty helmets, fifty-two pairs of socks, and thirteen pairs of wristlets.

In connection with the schedule of visits for regular students the class was entertained on May 17 at the new plant of the H. W. Wilson Co. A number of students attended one of the sessions of the sale of books from the Huntington collection which

took place April 24-26. Series of talks by outside lecturers for the month include that on library legislation by W. R. Eastman, and that on foreign fiction by Mary Ogden White. Mlle. Margu r te Cl ment, who is on a mission to the United States representing the University of Paris and a group of French publishers, gave a most instructive talk on French library conditions on May 8.

The work of the advanced students for April and May has been of particular interest. F. W. Jenkins, librarian of the Russell Sage Foundation, has given as a part of the course entitled "The library and the community" a series of ten hours in which housing, recreation, delinquency, public health and related topics have been presented. Courses in "Branch library methods" and in "Special library methods" are now in progress, their content consisting mainly of single lectures by individual workers and experts.

Arrangements for commencement work are nearing completion. The graduating exercises are to take place at eleven o'clock on the morning of Friday, June 7, at which time an address will be delivered by Dr. W. N. C. Carlton, librarian of the Newberry Library, Chicago. On the preceding evening the annual dinner of the alumni association will be held.

Examinations for admission to the class which will enter in September will be given at the rooms of the School on Saturday, June 8, from 9 to 12 a. m. and from 2 to 5 p. m.

Florence De Leon, an advanced student who has been holding a position in the reference cataloging division of the New York Public Library, is now assisting in the Americanization Study of the Carnegie Corporation.

ERNEST J. REECE, *Principal*.

CARNEGIE LIBRARY SCHOOL

Willis H. Kerr, librarian of the Kansas State Normal School, Emporia, Kansas, and librarian of the Camp Funston Library, gave a course of lectures on "Normal school libraries" April 20-23. Mr. Kerr also told of his work at Camp Funston. Margaret Mann spoke April 20 on her experiences at Newport News, where she spent a month as assistant to Mr. Brett. Four lectures on "Biography" were given April 26-29 by Elizabeth Knapp, chief of children's department, Detroit Public Library. Mlle. M. Cl ment, agr g e de l'Universit  de Paris, professeur au Lyc e de Versailles, lectured on French libraries" April 27.

For the year 1918-1919 the Carnegie Library School offers three courses in librarianship:

General library work, Library work with children, School library work. Each course is one year in length and its satisfactory completion is recognized by a diploma.

The courses are sub-divided as follows: *Technical Group*, comprising the subjects pertaining to the practice of library science. *Bibliographic Group*, comprising the subjects distinctly bibliographic in character. *Administrative Group*, comprising those subjects which have to do with the organization and administration of libraries either directly or reflectively. *Contributory Group*, including all subjects which do not fall logically in any of the other three groups, but which contribute value to the curriculum.

Many of the subjects comprised in each group are common to all courses, and form a basic system of instruction given to all students. Wherever necessary this common instruction is supplemented in each course by lectures, class discussion and problems relating especially to the work of that course.

SARAH C. N. BOGLE, *Principal*.

WESTERN RESERVE LIBRARY SCHOOL

During the past two months, the School has had as special lecturers Lutie E. Stearns, who spoke on "The library and present day problems"; W. H. Brett, who gave a talk on his work in the A. L. A. Dispatch Office at Newport News, Va., while at home for a brief stay; and Sarah C. N. Bogle, principal of the Carnegie Library School, Pittsburgh, who spoke to the students on "School library work in Pittsburgh."

The following lectures have been given by Cleveland speakers: "The educational work of the Art Museum"—Helen Gilchrist, of the Museum staff; "Books of the fine arts"—Virginia E. Graeff, Cleveland School of Art; "War poetry"—Walter Graham, of Western Reserve University; "Public speaking"—Prof. Howard S. Woodward, of Western Reserve University; "Cleveland Welfare Federation"—Sherman C. Kingsley, director, Cleveland Welfare Federation; "The European background of our foreign born citizens"—Mrs. Eleanor E. Ledbetter; "Municipal reference work"—Ada M. McCormick, head, Municipal Reference Library, Cleveland.

The courses in government documents by C. P. P. Vitz, and in book binding by Gertrude Stiles, have been completed.

On May 7, the students, accompanied by the director and Miss Willard, made a very pleasant and profitable trip to the Reuben McMillan Library of Youngstown, where the attractive building and the activities of the library were explained by Viola B. Phillips,

acting librarian, and graduate of W. R. L. S. 1914. On the following day, they attended the North-east District meeting of the Ohio Library Association at Niles.

Cards have been received announcing the marriage of Beatrix F. Margolies, 1912, to Abram A. Kalish, New York City; and Mildred C. McAfee, 1915, to Augustus B. Merry, second lieutenant engineers, N. A., New York City.

Alice S. Tyler, *Director.*

LIBRARY SCHOOL, CARNEGIE LIBRARY OF ATLANTA

Lecturers during the spring term have been: Laura Hammond, librarian of the Georgia School of Technology, who gave two lectures on "College library administration." The lectures were followed by a visit to the Library of the Georgia School of Technology. Louis J. Bailey, librarian of the Public Library at Gary, Indiana, talked on April 15 on the "Gary system of education and the Gary Public Library." Miriam Carey, supervisor of institutional libraries for Minnesota, spoke to the school on April 22 on "Librarians and the social sense." Miss Carey is organizing the hospital library work at Fort McPherson and Camp Gordon. Lutie E. Stearns gave two lectures on April 25, one on "Library commission work" and another on "Why a librarian."

Visits have been made by the class to the Camp Library at Camp Gordon, the State Library and to the Byrd Printing Company.

Tommie Dora Barker, *Director.*

SIMMONS COLLEGE LIBRARY SCHOOL

Recent lecturers who have spoken to the school are as follows: Henry N. Sanborn, Commission work; Clara W. Hunt, Children's work; Frederick Hicks, Law books.

The visits of April and May were very enjoyable, and included the all day trip to Providence, where the class had the privilege of seeing the State Library of Rhode Island, the John Hay Library, the John Carter Brown and Annmary Brown libraries, the Providence Athenæum, and the Public Library. On May 10 the class went to the Boston Athenæum and the Massachusetts State Library. The bindery of Fuerst and Company was visited for the first time.

APPOINTMENTS

Members of the class of 1918 have received appointments as follows:

Bowler, Inez. First class yeowoman, U. S. Navy Yard, Charlestown, Mass. Cataloging and classification, Manufacturing Department, Office of Assistant Naval Constructor Cone.

Brewer, Margaret E. Index and catalog clerk, U. S. Signal Office, Washington, D. C.
 McNamara, Katherine. Assistant, Library of Landscape Architecture, Harvard University, Cambridge, Massachusetts.
 Nottingham, Margaret B. Index and catalog clerk, U. S. Signal Office, Washington, D. C.
 Paschal, Nell. Index and catalog clerk, U. S. Signal Office, Washington, D. C.
 Swanton, Helen F. Executive assistant, Utica Public Library, Utica, New York.
 Abbott, Marion J. Assistant in the School of Education Library, University of Chicago.
 Hartzell, Mrs. Bertha V. Librarian Social Service Library, Boston.
 Hatch, Mary. Assistant in cataloging and reference work, Watertown (Mass.) Public Library, Watertown.
 Sampson, E. Elizabeth. Library assistant and reviser, Simmons College.
 Sands, Gladys F. General assistant, Boston Athenæum.
 Timmerman, Hazel B. Children's work, New York Public Library.

SUMMER COURSES

Base Hospital Course

An emergency course of six weeks in preparation for library work in base hospitals is offered this summer, on the suggestion of the A. L. A. War Service, as it is probable that there will be a need for many women for this type of service, both as volunteers and as paid workers.

Success in this field will depend upon personality, a wide knowledge of books, and some appreciation of library ideals and of library methods. Candidates must be at least twenty-five years of age and physically fit, with at least a high school education or its equivalent. College education is an asset, as is also any experience in dealing with groups of men and boys. Previous library experience is not required. The task is to understand the need of the individual man and to know the book to meet it.

There will be 60 class periods, including a final examination, in addition to practice work, reading, and visits to hospitals and libraries.

The morning class each day will be given to technical library subjects, the afternoon class to a special course under the charge of Kathleen Jones, librarian at McLean Hospital. Consideration of the special problems of the base hospitals will be made, keeping in mind the medical and administrative staff, the patients, nurses and enlisted men attached to the hospital. Emphasis will be placed upon the right choice of books.

No guarantee of positions is made, as all appointments will be made from Washington, but as the need seems imminent, a measure of preparedness seems wise.

The technical library work will be given by the regular instructors of the Simmons College Library School. The fee is \$24 for the six weeks. Information may be obtained from

the Director of the Library School, Simmons College, Boston, Mass.

Children's Course

The Summer School Bulletin, p. 9 and p. 44 contains an error in the time assigned to the course in Library work with children, Library S 4, which will be given July 8-26, the first three weeks of the session.

JUNE RICHARDSON DONNELLY.

LIBRARY SCHOOL OF THE UNIVERSITY OF WISCONSIN

The spring quarter of the second semester began on April 3. Various seminar discussions scheduled during the first days of the quarter, connected the instruction of the first semester with the experience afforded in the eight weeks of field work, and gave opportunity for a comparison of methods as related to different types of libraries.

The work of the spring quarter continues the courses in reference, book selection, cataloging, children's work, and library economy, and introduces the work in public documents, subject bibliography, and library administration and equipment. Current topics have been discussed by authorities in different fields. Robert Frost gave a talk on the "Tone of voice" in poetry and letters and also read from his own poems.

The gallery and foyer of the school have always lent themselves to exhibitions which have been arranged to supplement and illuminate various courses. But the present year has been peculiarly one of exhibitions, due no doubt, to the increasing emphasis everywhere on visual instruction. In January, the students themselves had a loan exhibition in the foyer cases, each bringing one article of interest, properly labeled. The arranging of these articles in related groups and their proper display, was excellent preparation for the food and other patriotic exhibits that became part of the field work later. In April, in connection with Miss Merrill's lectures on library extension, the cases were requisitioned for photographs, plans, and charts showing the extension work and plans of various libraries. The A. L. A. exhibit on binding and mending occupied the walls of the gallery at the time of the lectures on binding by Miss Turvill. An illuminating exhibit of books for the blind, literature concerning the work with them, and articles made by the blind, was on view at the time of Miss Welles' lecture on "Work for the blind." Two blind students in the University gave a demonstration of reading for the class. Liberty loan, thrift stamp, and food posters have been displayed

in the gallery, and their composition, lettering, and appeal studied. Other exhibits during the first semester added to the vitality and interest of the daily routine.

May Day is always "open house" day for the school in Madison, home-coming day for alumni, and poster bulletin day for the present class. William Warner Bishop, librarian of the University of Michigan, was the speaker, giving a most able lecture on the "Manuscripts and books of the fifteenth century." The lecture was illustrated with slides, many of them colored, that had been made for the occasion. The audience filled the large auditorium of the Public Library, which fact shows far more than any formal report the interest which Mr. Bishop's presentation of the subject awakened. Following the lecture, a reception was held in the quarters of the School, where a special exhibition of rare books, loaned by the Wisconsin Historical Library and the University Library was a great attraction. The poster bulletins made by the class were displayed in the gallery, and were enjoyed by all the guests, who praised them for their effective coloring, lettering, and timely slogans. There were 55 of these original posters, well hung, which in itself was a problem for the committee of the class in charge.

APPOINTMENTS

Twenty-three of a class of thirty-one are already placed for next year, with positions pending for others, and several temporary places for summer work waiting for any who may be free to accept them. The demand for trained workers far exceeds the supply. The positions filled are as follows:

- Frances F. Bacon, member, Training class for children's librarians, Cleveland Public Library.
- Ruth S. Beech, children's librarian, Fond du Lac (Wis.) Public Library.
- Laura E. Burmeister, cataloger, Library of the North Dakota Agricultural College, Fargo.
- Ruth S. Cochran, assistant, Racine (Wis.) Public Library.
- Catharine Culver, assistant librarian, Milwaukee Journal.
- Julia M. Fink, assistant reference librarian, Aurora (Ill.) Public Library.
- Alice L. Ispording, assistant, Cincinnati Public Library.
- Gertrude Kelly, assistant, Detroit Public Library.
- Ruth M. Lathrop, reference librarian, Madison (Wis.) Free Library.
- Edla M. Laurson, librarian, Mitchell (S. Dak.) Public Library.
- Anna M. Magee, assistant, reference dept., Carnegie Library of Pittsburgh.
- Irene M. Newman, assistant, Minneapolis Public Library.
- Claire Nolte, children's librarian, Antigo (Wis.) Public Library.
- Edna O. Orr, assistant, Cincinnati Public Library.
- Edith A. Recheygl, librarian, Stanley (Wis.) Public Library.
- Jessie E. Reed, branch librarian, Chicago Public Library.
- Jean M. Sharpe, assistant, Library of the University of Michigan, Ann Arbor.

Martha O. Skaar, librarian, Waukesha (Wis.) High School Library.
 Miriam E. Smith, assistant, Library of the U. S. Department of Agriculture, Washington.
 Grace M. Stingly, librarian, Rochester (Ind.) Public Library.
 Geneva A. Twells, assistant, East Side Branch, Evansville (Ind.) Public Library.
 Gertrude Weil, assistant, West Side Branch, Evansville (Ind.) Public Library.
 Mrs. Flora H. Whyte, reviser, Wisconsin Library School.

Elizabeth Royce, who is taking the joint course in the college of Letters and Science and Library School, was recently elected to Phi Beta Kappa.

Saturday, April 6, Liberty Day, found the Library School in its place as a division of the University body in the parade that made a part of Madison's celebration. The marching lines of the School received many commendations from the officers of the parade.

MARY EMOGENE HAZELTINE, *Preceptor.*

BOSTON UNIVERSITY LIBRARY COURSE

Those who have taken one or more library courses during the year include Belinda Wainwright, formerly of the Quincy Library; William Malloney and Nellie Cunniff of the Boston Public Library; Lucy Buker, Waltham Public; Myra Parker and Mabel Young of Babson's Statistical Library; Dorothy Bell of Jackson's Electrical Library; Mildred O'Brien and Agnes Burns of Filene's Reference Library; Margaret S. Locke of the College Library and others not in library work at present.

The work which we are attempting to do for the training of business librarians is certainly not past its experimental stage. The demand for business librarians exceeds the supply many times. I believe that if the work continues there will be facilities for a limited number to qualify for positions of responsibility as business librarians and secretaries.

It seems to me that we ought to have the same idea that Uncle Sam has in training his Army. "It isn't so much what you know when you come to us, but what you learn here and how much you know when you leave here." This does not mean that requirements of entrance and graduation should be discarded, however. An educational institution must always keep its requirements up to standard.

As I write this notice in Washington while preparing my equipment to leave for "an Atlantic port for embarkation," I look back with pleasure on the year's work. My best wishes to those with whom I have had the pleasure of meeting in the class room this year.

RALPH L. POWER.

UNIVERSITY OF WASHINGTON LIBRARY SCHOOL

John Ridington, librarian of the University of British Columbia, on April 18 delivered the last of the miscellaneous yearly lectures given before the Library School. Because of the popularity of the subject "Poetry of the present war," this lecture was thrown open to the entire university, many availing themselves of the opportunity to hear Mr. Ridington.

The Alumni Association of the University of Washington Library School held its annual banquet in honor of the graduating class on the evening of May 21.

Many positions are now being filled by the coming graduates, more than one-half of a class of twenty-three having already been placed definitely for the coming year.

W. E. HENRY, *Director.*

ST. LOUIS LIBRARY SCHOOL

In addition to the regular school courses during April, Dr. George B. Mangold, director, School of Social Economy, gave two lectures on the "Bibliography of sociology."

Mrs. George Gellhorn, chairman of the Woman's Central Committee on Food Conservation and also chairman of the Food Committee of the Council of Defense, Missouri division, gave a resumé of what has been done and what has been planned for the future.

Prof. Roland G. Usher of Washington University, author of "Pan Germanism" and "Winning the war," will deliver an address on "The public library in the national crisis" at the first commencement exercises of the St. Louis Library School, to be held in the library on June 7 next.

CALIFORNIA STATE LIBRARY SCHOOL

On April 12, Rev. Harvey V. Miller, of the Sacramento Congregational Church, gave a very helpful talk before the class on the possibilities of the county library in the isolated rural community. On April 15, Edna Holroyd, a California State Library School graduate of the class of 1915, and now librarian of the Tuolumne County Free Library, told the class of the progress of county library work in Tuolumne county.

Representatives of the State Library and the State Civil Service Commission spent Monday, April 15 in Palo Alto, at Stanford University, and Tuesday and Wednesday, April 16 to 17, in Berkeley, at the University of California, interviewing applicants for the next library school class. The university students making application promise a class up to the usual standard, in spite of the widespread interest in war activities.

MILTON J. FERGUSON.

RIVERSIDE LIBRARY SERVICE SCHOOL

The members of the Riverside Library Service School are divided into three groups for the purpose of visiting county stations and branches. Mrs. Mabel F. Faulkner in charge of the county work is conducting these visiting groups. The first group visited the Elsinore-Temecula Valley, the second group the San Geronio Pass country including Banning and Beaumont, the third group the Hemet-San Jacinto Valley.

The Riverside Library League, composed of Library Service School students and staff members has volunteered to do a great deal of community indexing for war service. The war service directory connected with the Riverside war chest is in their hands and they have recently completed indexing the rules and orders for the local exemption board.

Dr. Herbert Putnam was a visitor in Riverside May 14. The greater part of his time was devoted to a visit at March Field and conference with the officials of the library and the various war service organizations.

JOSEPH F. DANIELS.

LIBRARY SCHOOL OF THE LOS ANGELES PUBLIC LIBRARY

April 22 to 27 was "Visitors' week" when regular courses were suspended in favor of special lectures on subjects of general interest to members of the staff of the Los Angeles Public Library and to library workers from other libraries. A publicity exhibit and several personally conducted visits to branches were features of the week. The program included among others the following talks: Library publicity, by Miss Drake; Collection and care of free material, by Mrs. Brewitt; The war as reflected in literature, by Miss Darlow; Relation of the library to social betterment, by Miss Drake; Professional tools, by Miss Horton; Boys and girls clubs, by Miss Riddell; The right book for each reader, by Miss Zaidee Brown; Library associations, by Miss Haines.

During the month the principal visited Stanford University, Mills College and the University of California for the purpose of interesting college girls in library work as a vocation. Seven talks were given before various college organizations, supplementing the visits and talks made earlier in the year in institutions nearer Los Angeles.

The last days of April were devoted to library visits, a pleasant and profitable break in the class work. The libraries visited were varied enough to illustrate many phases of library work. They included several munic-

ipal libraries and representative high school, college, normal, county branch and scientific libraries, in the vicinity of Los Angeles.

The festivities of the month included a school party for the faculty and members of the Class of 1917, a beach supper following the visit to the Santa Monica Public Library, and tea under Miss Haines' spreading pepper tree in Pasadena, as a pleasant climax to the Pasadena visits.

THEODORA R. BREWITT, *Principal.*

Librarians

ALLEN, Anita M., Simmons 1915, has been appointed assistant in the Extension division, New York Public Library, to begin July 1.

AMES, Harriet C., Simmons 1915, has been appointed assistant librarian at the Rockefeller Institute of Medical Research, New York.

ASHLEY, Mabel, University of Washington 1914, of the Library School faculty, spent the month of April in A. L. A. War Service in Washington, D. C.

BARSTAD, Verna, University of Washington 1915, librarian of the Centralia Public Library, was married April 6 to Lieut. Warren Grimm of Centralia, Wash. Lieut. and Mrs. Grimm are at present in Palo Alto, Calif., Lieut. Grimm being stationed at Camp Fremont.

BATE, Mrs. Lillian Steinberger, University of Washington 1913, died March 30 at Tucson, Ariz.

BELL, Dorothy G., who recently took charge of the library of D. C. and Wm. B. Jackson, electrical engineers of Boston, has resigned.

BOLTON, Charles K., librarian of the Boston Athenæum, is at work on a book which the Athenæum is to publish next winter. It will contain a reproduction of every known portrait of a seventeenth century immigrant to this country, with biographical and critical notes, and will be in two volumes.

BREWSTER, Mary B., New York State Library School 1918, has succeeded Alice Jewett, 1914, as first assistant in the Order section of the New York State Library.

BRODERICK, Florence, Carnegie 1917, has been made librarian of the Woodbury branch, Denver Public Library.

BUCK, Edith M., New York State Library School 1918, has been appointed librarian of Stephens Junior College, Columbia, Mo., and will begin her duties there in September.

CANNON, Carl L., an assistant at the information desk in the New York Public Library, was drafted and sent to Camp Dix in May, where he was attached to Co. A, 412th Infantry.

CLARK, May, Simmons 1915, is on leave of absence from Carnegie Stout Library at Dubuque, Iowa, to reorganize Mt. St. Joseph College Library at Dubuque.

COCHRAN, Helen, reviser for the Wisconsin Library School since her graduation in 1916, died suddenly in Memphis, Tenn., on April 28. Miss Cochran had gone south in January on leave on absence because of ill health, but was so much better that her ticket was purchased for returning to Madison when death claimed her. She was a library worker of scholarship and professional promise and her death is a loss not only to her co-workers but to the library world.

COLDREN, Alice Fanny, Riverside 1914, and recently at the University of Illinois, has gone to Washington to work for the government.

COLLINS, Lillian, University of Wisconsin 1914, has been granted a year's leave of absence from her position as assistant in the reference department of the Seattle Public Library, and has accepted a position in the Ordnance Department, Washington, D. C.

CURTISS, Helena F., graduate of Pomona College, Riverside 1918, has been appointed librarian at Azusa (Calif.) Public Library, beginning work May 15.

DANIELS, Joseph F., librarian of the Public Library in Riverside, Calif., has recovered from an operation which kept him in hospital for three weeks.

DORRANCE, Frances, New York State Library School 1918, will go to the Trenton (N. J.) Public Library in August as chief of circulation.

DUNBAR, Gladys, member of the staff of Riverside Public Library, recently librarian of the Arlington branch, has resigned to become assistant in the management of the O. H. Boyé studio in Riverside.

EASTMAN, Margaret, formerly of the order department of the California State Library, recently of the Riverside Public Library, has been employed as assistant county librarian at Missoula, Montana, and left Riverside May 12.

EKSERGIAN, Nectar M., resigned from the staff of the West Somerville branch of the Public Library on May 4 to accept a position in the Ordnance Department of the United States government, Washington, D. C.

ESSELSTYN, Katharine B., Library School of the New York Public Library 1913-14, has left the circulation department of the New York Public Library to become librarian of the Lamont Memorial Library, McGraw, N. Y.

FISHER, N. Mignon, New York State Library School 1918, has been appointed librarian and supervisor of the files of the Willamette Iron and Steel Works, Portland, Ore., and will begin her duties July 1.

FLEMING, Esther, University of Washington 1914, is spending a few months at her home in Yakima, Washington, recuperating from an operation.

FORBUSH, Rachel B., Western Reserve 1916, has entered upon her duties as librarian in the Public Library at Oskaloosa, Iowa.

FULLERTON, Pauline, a graduate of the New York State Library School and assistant at the information desk in the New York Public Library, has resigned to go to France with the Y. M. C. A. on canteen service.

GALBREATH, Mrs. E. Hadley, formerly on the staff of the New York Public Library and for several months on the staff of Base Hospital No. 8 of the American Expeditionary Forces, has recently been transferred to the Central Medical Department Laboratories of the A. E. F. The order for her transfer came while she was enjoying a seven days' leave in Paris with her mother and brother. She writes: "I miss the country terribly and shall have to become accustomed to indoor work. For the last four months I have spent five to six hours out of every day with farmers and other landlords surveying property and arranging for leases, etc. My work here will be entirely different, and I hear that in a short time when we have moved into other quarters I am to be in charge of a medical library which has been collected. My stay in Paris was anything but quiet. The big guns bombarded the city during the day and air raids came almost every night. Whenever possible old people and children have been sent to country places, but Paris is absolutely calm. Since my departure the guns have been bombarding also at night, which must be tiresome."

GATES, Anna L., assumed the duties of assistant in charge of the social science room in the St. Paul Public Library on May 1. Miss Gates is a graduate of Hiram College, 1905, and of the Western Reserve Library School, 1912. She has had several years experience as a high school teacher, was for three years a member of the Cleveland Library staff, and for the past year has been

assistant librarian in the State Normal School at Valley City, North Dakota.

GREGORY, Vivian, California 1914, assistant in the Yolo County Free Library, has accepted a temporary appointment in the California State Library, to take charge of the camp library work.

HAMMOND, Esther, University of Washington 1917, has withdrawn temporarily from library work and is in Watsonville, Calif.

HARRIS, Rachel A., New York State Library School 1917, has been appointed assistant in the library of the University of North Carolina, Chapel Hill. She will begin her work there in September.

HILSON, Sue E., chief of the children's department of the Free Public Library, Trenton, N. J., has resigned to take a position with the Ordnance Department, Washington, D. C.

HODGSON, James, sub-librarian of the Legislative Reference section of the New York State Library, has been drafted and has gone to Camp Wadsworth in Spartanburg, S. C.

HOTCHKISS, Muriel, Pratt 1917, has resigned from the Public Library of Poughkeepsie, where she has been children's librarian, and has accepted a position in the children's department of the Bridgeport Public Library.

JAMESON, Ethel, assistant at the information desk in the New York Public Library, has resigned to do canteen work in France with the Y. M. C. A. Miss Jameson is a graduate of the Library School of the New York Public Library.

JOHANSEN, Harold R., New York State Library School 1916-17, has been appointed sub-librarian of the Kommunens Folke Biblioteker, Copenhagen, Denmark.

JOHNSTON, Mary Jane, Carnegie 1914, has resigned as substitute assistant, Carnegie Library of Pittsburgh.

KELLING, Lucile, New York State Library School 1917-1918, has been appointed librarian of the Public Library at Centralia, Wash., and will begin her duties in July.

KIMBALL, Theodora, Simmons 1915, has been in Washington several weeks to give advice on the establishment of a reference library for the new Bureau of Industrial Housing and Transportation.

KINGSBURY, Esther, Simmons 1916, is to take a course in nursing at Vassar this summer, with a view to becoming a Red Cross nurse.

LATHE, Helen, University of Washington 1916, was married March 1 to Nathan B.

Evans. Mrs. Evans is continuing her work in the catalog department of the Seattle Public Library.

LEWIS, Helen B., Western Reserve 1915, has become acting first assistant in the Hough branch Public Library, Cleveland.

LINDSLEY, Clara, for the past six years librarian in Waupun, Wis., has presented her resignation to take effect July 1.

LOCKE, Margaret S., assistant librarian at the College of Business Administration in Boston, is to have charge of the library in the absence of Ralph L. Power, the librarian. She will also "carry on" his editorial duties for the present on the *Alpha Kappa Psi Diary* and on *Special Libraries*, both of which are edited by Mr. Power.

LOEFFLER, Olive N., Carnegie 1910, resigned her position as assistant in the children's department, Carnegie Library of Pittsburgh, to accept a position with the Continuation Schools under the Board of Education, Pittsburgh.

LONGFELLOW, Jean, Simmons 1912, is now assistant in the Plymouth Public Library, Plymouth, Mass.

LYON, Dorothy D., librarian of the Little Rock Public Library, was married on March 28 to James Groves at her home in Coudersport, Pa. They are now living at Oberlin, Ohio, where Mr. Groves is the Y. M. C. A. secretary for Oberlin College.

MCCARTHY, Mary Alice, Simmons 1914, is to be librarian for the new Bureau of Industrial Housing and Transportation, Washington, D. C.

MCCUTCHEON, Lydia, University of Washington 1913, is in charge of the Lincoln High School Library, Seattle, during the temporary absence of Louise Smith Baldwin, 1913.

MARKLE, Ruth G., of Somerville, Mass., has been appointed to the staff of the Somerville Public Library.

MOON, Edith Collins, Pittsburgh 1913, chief of the circulation department of the Free Public Library, Trenton, N. J., has resigned to enter the Friends' Reconstruction Service in France.

NICHOLAS, Mrs. Gladys Dixon, Pratt 1912, has been made assistant in the library at Camp Lee where her husband, Major Nicholas, is stationed.

O'SULLIVAN, Mary I., New York State Library School 1915-16, has been appointed head cataloger in Bryn Mawr College Library.

THE LIBRARY WORLD

New England

MASSACHUSETTS

Athol. The Athol Public Library building, started in the spring of 1916, is still unfinished, the main trouble seeming to be the lack of sufficient funds for furnishings. It is hoped that the new building will be occupied before 1919.

Boston. The late William Baird, patent lawyer in New York City, left his private library to Beta Theta Pi.

Boston. The College of Liberal Arts of Boston University has received a gift of a library of about eight hundred books from the widow of Rev. Dr. Henry C. Graves of Somerville, formerly associate pastor of Tremont Temple, Boston. The collection consists chiefly of biblical books aside from many books of general literature, encyclopedias and histories.

Boston. A committee consisting of E. H. Anderson, director of the New York Public Library, Arthur E. Bostwick, librarian of the St. Louis Public Library, and William H. Brett, librarian of the Cleveland Public Library, have been in Boston during May at the invitation of the trustees and librarian of the Boston Public Library to make a survey of that institution's "buildings and equipment, collections, methods of acquisition . . . the service in its inner relations, the service to the public." During the last twenty years in America progress in the great public libraries has advanced remarkably, but, to quote the *Boston Transcript*, "despite all the good things accomplished by Boston's library, the plain fact of the case is that it has not kept pace, in the delivery of this democratic, altogether competent service, with the great popular institutions of several other American cities. The gentlemen from Cleveland, New York and St. Louis come here to suggest some of the ways in which success has been won elsewhere and to give us the benefit of all their experience. In Mr. Charles F. D. Belden the local institution has as librarian a man distinctly capable of carrying out whatever programme they recommend and the Boston trustees sanction."

Holyoke. It is expected that the children's room will be opened again soon. There have been added something like 500 new books and a great number of old ones have been repaired

or rebound, so that the 3000 or so juvenile books are now in excellent condition.

Hudson P. L. Grace M. Whittemore, lbn. (Rpt.—1917.) Accessions, 501; volumes lost or withdrawn, 114; total 12,248. New registration, 304. Circulation, 40,991 volumes. Receipts, 2327.96. Expenditures, \$2327.96, including \$275.68 for books, \$104.91 for periodicals, \$142.56 for binding and \$1218.80 for salaries. Library loans of Italian, Polish, Armenian and Portuguese books were made during the year from the Woman's Education Society of Boston and the Free Public Library Commission. That these were greatly appreciated by the residents who do not read English is shown by the record of 334 volumes circulated from these libraries. During the year Miss J. Maude Campbell, director of work with foreigners for the Free Library Commission, gave some talks on the work done in libraries for the foreigners, with the result that when the library war drive was on, many dollars were contributed by foreign societies. The Hudson Historical Society continued to hold its meetings at the library. The library has been made the storehouse of its treasures until some other place is found. A new rule was made by the library whereby magazines are to be kept by borrowers for seven days only. Heretofore there was no time limit, but because of the carelessness of borrowers this rule was made necessary.

Milton. In her annual report for the year 1917, Gertrude Forrest, librarian of the Public Library, says that, contrary to expectations, the library has been more widely used during 1917, than during any other year since its founding in 1870. The circulation reached 79,697, a very large figure for a small town of 8600. There was noted a growing demand for books of the better sort, and also a considerable use of war books, especially those by well known, or well advertised, authors. A garden class was held in the library last spring with a total attendance of 578 for the eight meetings. On Sunday afternoons in February a friend of the library read stories, plays and poems to an enthusiastic audience. The library has 4067 cards in active use, representing 47 per cent of the town's population, and the average circulation per capita was 9.1. A U. S. A. first Liberty Loan bond for \$5989.15 was a gift during the year as the nucleus of a new endowment fund. The total cost of administration for the year was \$13,762.57.

Middle Atlantic

NEW YORK

New Brighton, Staten Island. The library at Sailors' Snug Harbor was started many years ago for the use of its 900 inmates. It is in two large rooms in the main building and contains about 5000 volumes. The librarian, Capt. J. C. Norton, was appointed to his present position seven years ago, when he became an inmate after fifty-two years continuous service at sea. Tho he is now, as he proudly says, in his eightieth year, his library is kept in ship-shape condition, and he loaned for use 14,966 books during 1917, losing only two.

Rochester. The Business Branch library has been opened for the use of officers and men of the military service who are located here. A special collection of books has been put in the library for them, and these books are not for the use of the public. The library stands ready to supply any special books they may need or desire within reasonable limits. The books are given out to the soldiers on the same lines as followed in the camp libraries, with as little formality as possible. The soldiers are told that while the library is theirs from 7 to 9.30 o'clock each night, they are at liberty to make use of it at other hours of the day. The typewriter at the branch has been placed at the service of the soldiers.

Schenectady. Thieves are believed to be responsible for the fire that broke out in the home of Dr. Frank S. Hoffman, professor of philosophy at Union College, destroying the house and causing the death of two persons, the injury of several others and the loss of thousands of dollars worth of furnishings, books and other valuables. The fire destroyed Dr. Hoffman's library valued at \$25,000.

Syracuse. South Geddes Street library, one of the oldest library stations in the city, has been closed as a result of the opening of the new Delaware branch only four blocks away. The station was established in 1912.

PENNSYLVANIA

Montoursville. At a meeting of the school board here an appropriation of \$100 a year was made for books for the Public Library, which was opened as a station of the James V. Brown Library of Williamsport, March 1, 1911. The Montoursville Library Association provides a room in the borough hall building, with light, heat and janitor service, and the Brown Library, professional supervision.

South Atlantic

DISTRICT OF COLUMBIA

Washington. The Army Medical Museum at Washington possesses one of the finest and most complete collections of medical medals in the country, numbering about 3000 pieces. Among them are a few ancient Greek and Roman pieces, but by far the larger number belong to the last three centuries. There are the jetons of the old French Academy of Medicine extending from 1638 to 1793, when the Academy was abolished by the Revolutionary government. These are of silver and it was the custom in those days to strike one at every election of a new dean, which took place every two years. There are 96 of these pieces in the collection. Of great artistic value are the medals of distinguished members of the modern Faculty of Medicine of Paris, the prices ranging from five to twenty dollars a piece. A number of medals struck by medical schools, medical societies, congresses and hospitals; also some pest and cholera medals and other medals commemorating the great epidemics and famines of the earlier centuries, the touch pieces of the kings of England for the supposed cure of the Kings Evil, represented by a complete series—all these are in the Washington collection.

NORTH CAROLINA

The *North Carolina Library Bulletin* for March contains statistical tables for the public libraries and also for the school and college libraries and for the libraries in colored institutions in the state. The largest public libraries in the state are at Greensboro, Raleigh, Asheville, Charlotte and Durham, and the total number of volumes contained in all five of these libraries is 61,467. Yet this total is over 17,000 less than is contained in the University of North Carolina Library alone. The libraries reporting the largest number of borrowers are Charlotte, 7495; Durham, 6795; Raleigh, 7034; Wilmington, 5325 and Greensboro, 5070. The largest number of additions, the largest receipts, and the largest number of magazines and newspapers received are reported by the Greensboro Public Library. It is interesting to compare the number of volumes circulated by the different libraries. The libraries reporting the largest circulation are Charlotte, Greensboro and Durham, yet the library reporting the largest circulation in proportion to number of volumes is the Gastonia Public Library, each volume in that library having circulated an average of 7.45 times. In Charlotte each vol-

ume circulated 5.95 times and in Durham 5.01 times.

GEORGIA

Cordele. The Carnegie Library was dedicated on the night of April 13, with appropriate exercises. The new building is an old one remodeled, \$10,000 having been given by the Carnegie Corporation in 1903. In 1917, the library having outgrown its original building, the city of Cordele gave \$4239 and the Carnegie Corporation gave \$7556 toward a new building. Work was begun in June, 1917, but owing to delays in shipment of material and the scarcity of labor the building was not finished until April of this year. Besides having spacious juvenile, reading and circulation rooms, mending room, etc., the building has a splendid assembly room. The library is also a county library, the county contributing \$400 and the city \$1800 toward its support. It was the first library in Georgia to have a traveling library for the county schools.

Macon. Work which has been delayed on account of war conditions has been started on the Washington Memorial Library, Contractor W. J. Beeland getting material in readiness for its construction. The building, which will be situated on the corner of Washington avenue and College street, is to be 50 x 90 feet, and is to occupy the site of the residence of the late Col. J. H. R. Washington, father of Mrs. E. W. Bellamy, who deeded the plot to the city in January of last year. The building is erected as a memorial to her brother, the late Hugh Vernon Washington.

FLORIDA

Clearwater. The Public Library on Apr 7 had as guests the following librarians: Mr. Josselyn, state director of the A. L. A. war service, and Miss Elizabeth Long, of Jacksonville; Miss Stelle and Miss Lewis of the Tampa Public Library; Miss Emma Williams, of St. Petersburg, and Miss Nina Compton, of Syracuse, N. Y. This constitutes the largest meeting of librarians ever held in Florida.

St. Petersburg. The recent book drive brought in over 800 books which will be sent to Fort Dade.

Tampa. A little over a year ago the Tampa public library opened with 3800 books. Today there are approximately 10,000 in the library, the majority having been donated. During this first year, 5525 people have registered. There have been 76,680 books circulated during the same period. This averages approximately 13 books read by each person

registered and each book circulated about the same number of times. Demonstrations of food conservation have been held and reference books displayed in keeping with the demonstration. A registration station for the national council of defense for women of America was established; reading lists encouraging patriotic movements were sent out; a financial campaign to raise funds for equipping libraries for the soldiers and sailors, at which \$1200 was collected, was put on; the poster contest to encourage donations of books for the book drive was conducted by Miss Stelle, the librarian, as was the book drive, in which 5000 excellent books were secured for the Arcadia camp. A reading hour for the children has been inaugurated, 1577 children having attended since last November.

Tampa. A conference concerning A. L. A. camp work in South Florida was held at the Tampa Public Library April 8. Those attending were Mr. Josselyn of the Jacksonville Public Library, T. V. McCaul, general secretary of the Y. M. C. A., Mr. Harmon, assistant secretary from Arcadia, and Mr. Linken, general secretary of the Y. M. C. A. at Fort Dade. In these camps A. L. A. libraries will be placed in the Y. M. C. A. buildings and operated by the secretary. In the recent book drive over 5000 books were collected at the Tampa Public Library. In this number are included the books received from Manatee, Lakeland and Plant City. With the help of volunteer typists, students of the business college and a number of high school pupils, they were all cataloged in a day and a half, and packed for shipment to the aviation fields at Arcadia, Fla. Helen Virginia Stelle, librarian of the Tampa Public Library, spent the week of April 29 to May 4 in Arcadia supervising the installation of the camp libraries.

East North Central

MICHIGAN

Hastings. It is expected that the Hastings City Library, which will be located in the new high school building, will be opened to the public early in June. The librarian will be Helene Fairchild of Ann Arbor, formerly an employee of the Detroit Public Library.

OHIO

Youngstown. Because the building occupied by the Haselton library branch the last twelve years is no longer available owing to the sale of the lot on which the building stood, directors of the Reuben McMillan Library have made arrangements with the board of educa-

tion for the continuation of its service in the Haselton and Adams school buildings. These branches will be open daily from 4 to 6 p. m. to children and the general public.

INDIANA

Logansport. Arrangements have been made to establish a branch of the Public Library in the railroad Y. M. C. A.

ILLINOIS

The third biennial report of the Illinois Library Extension Commission for the years 1915 and 1916 shows the following record of successful achievement: 20 public libraries were established, 12 association libraries opened and 14 libraries reorganized on modern methods; 4 libraries received gifts for buildings from the Carnegie Corporation; 3 libraries received bequests for buildings from citizens; 5 libraries received substantial gifts of either money or books; 14 library buildings were completed; 2 district meetings were held; 189 visits to libraries were made by the secretary; 52 public addresses were made by the secretary; 9 library positions filled thru recommendation of the commission; 22,744 books, 128 club programs and 321 pictures loaned; 3 new leaflets published by the commission.

Chicago. The Chicago Public Library has acquired from the Lambert Tree estate the property at the northeast corner of Crawford and Wilcox avenues, 113 x 121 feet, for a stated consideration of \$15,500, as an addition to the site of the proposed Legler regional library. The library previously had acquired the property at the southeast corner of Crawford avenue and Monroe street, 121 x 97 feet, so that it now has the entire west frontage on Crawford between Wilcox avenue and Monroe street, 242 feet, which, with a sixteen foot alley, gives it 258 feet with a depth of 97 feet on the other two streets. While no plans have yet been made regarding the building, its cost is expected to run between \$100,000 and \$150,000.

WISCONSIN

Green Bay. Conspicuously placed in the Public Library of Green Bay, Wis., is the following statement: "This library and each and all of its employees are pledged to the national administration to conduct all educational affairs committed to their care in this library or elsewhere with whole-hearted and unconditional loyalty to the United States."

East South Central

ALABAMA

Birmingham. Appropriations of \$50 per school for libraries, with 34 schools applying

for them, have been made by the county thru the board of revenue upon application by the county board of education. The schools raise \$10 to obtain libraries. The state appropriation will shortly be received. Prof. N. R. Baker, county superintendent of education, has taken steps to obtain the libraries.

West North Central

MINNESOTA

Buhl. The people of Buhl are justly proud of their new library building, erected by Contractor Hugh Fawcett of Duluth according to plans furnished by Sullivan & Halstead, also of Duluth. The furniture was made especially for the building. Its finish is of silver gray oak and matches the woodwork perfectly. In the children's corner there will be three sizes of chairs to accommodate the little ones of different ages. An inclined table has been constructed on which to lay the large story and picture books. Directly under the skylight is the librarian's desk, and back of this are the stacks. There is room for more stacks, but at present only four will be utilized. The remainder of the main floor comprises the adults' reading room, which will contain three reading tables. In the basement is the men's smoking room, which is made accessible directly from the outside. The floor is made of tile and is easily cleaned. Around the huge fireplace are easy chairs where men can come directly from their work and read, smoke and enjoy themselves. The assembly room, in which the stage is located, has a capacity of 160, and, by utilizing the women's clubroom, which can be done by opening accordion doors, the capacity may be increased to 200. Off from the women's room is an up-to-date kitchen. Enid Stafford is librarian.

Duluth. A branch of the Duluth Public Library has been opened in the new Lester Park school.

St. Paul. The University of Minnesota regents are starting plans for a new library and assembly building on the campus after the war, which will include an auditorium capable of seating from 2000 to 4000 persons.

IOWA

Des Moines. The Highland Park Branch of the Public Library, located at Sixth and Euclid streets, was opened May 1, with Maude E. Graham in charge as branch librarian.

NEBRASKA

Table Rock. A home talent entertainment which netted \$100 for the benefit of the Public Library, was given recently under the auspices of the Altrurian Club.

LIBRARY WORK

Notes of development in all branches of library activity, particularly as shown in current library literature. Material printed in this department is cumulated each year in the "American Library Annual."

CHILDREN, WORK WITH

A pamphlet series of 5-cent educational classics is being used in Greenfield, Ind., to satisfy the incessant demand of the smaller children for very easy, large print stories. These can be destroyed and replaced when soiled, and are both cheaper and more usable than the primary magazines.

DEPOSIT STATIONS

A new plan of rewarding the deposit station librarians will be followed this year in Lebanon, Ind. The usual cash prizes of \$3, \$2 and \$1 will be awarded those showing the greatest circulation. All the other school librarians will receive a Thrift card with a thrift stamp on it.

ENGINEERING—CLASSIFICATION

The Deborah Cook Sayles Public Library of Pawtucket, R. I., is revamping the Dewey schedules for "Engineering" in order to bring the classification more into proportion with the books actually on the shelves. In this work it is taking advantage of the new "Proposed classification for an engineering library" compiled by Eleanor H. Frick and Esther Raymond, which was published in the Proceedings of the American Society of Civil Engineers for December 1917, but it is depending mainly on the advice of local Pawtucket engineers and experts in foundry practice. The aim is to give both Mechanical Engineering (now numbered 621, and Electrical Engineering (621.3) a full "division" of ten whole numbers (600-609 and 610-619) so that the notation for those subjects will be proportionate to that for Civil Engineering and its branches (620-629).

The necessary vacuum for such expansion will be secured by removing "Medicine" (610-619) from the class of Useful Arts entirely and settling it in the 100's (Philosophy) between Psychology and Ethics, where it will be flanked by Bodily Cures ("Religion and Medicine," "Faith Healing," and the like) on the one hand, and by Mental and Moral Training ("Child Study," "Adolescence," "Power of Will") on the other.

FUMIGATION OF BOOKS

A new machine for the fumigation of books has been invented by Robert Oldham, of

459 Victoria Place, Salt Lake, according to a news item in the Salt Lake *Tribune*.

The device automatically turns the pages of books of any size, so that fumigating fumes may reach the entire surface of the book. Electricity is the motive power. The invention is simple, and, according to the inventor, may be cheaply manufactured. Several books may be disinfected at one time. The machine is inclosed in a glass case and the fumes may be withdrawn thru a pipe leading outdoors and the books removed without discomfort to the operator.

Mr. Oldham has been engaged in the construction of the machine for three years.

GREAT BRITAIN—SPECIAL LIBRARIES. *See* Special Libraries—In Great Britain.

LECTURES—FOR CHILDREN

During the winter months the Public Library of Mishawaka, Ind., successfully conducted a Saturday morning stereopticon lecture for children between the ages of six and fourteen years. The lectures and the screening of the pictures were in charge of two high school boys who enjoyed their Saturdays spent with the children as much as the little folks enjoyed the pictures.

LIBRARIANS AND ASSISTANTS—TRAINING OF

A plea for advance instruction in library summer schools. [Mrs.] J. T. Jennings. *School and Society*, Feb. 9, 1918. Vol. 7: p. 156-160.

Emphasizes the importance on the part of library workers of the open mind and the tolerant attitude toward a new subject.

What is a librarian? Isabella M. Cooper. *Jour. of the Assn. of Collegiate Alumnae*, Jan., 1918. p. 294-297.

In this paper Miss Cooper replies to some of the charges made by Miss Hasse in the October, 1917, issue of the same magazine. Miss Cooper warns the academic graduate against the danger of seeking to guide without knowing how, and takes the position that both that part of library work which Miss Hasse designates as professional, and the part which is purely technical, should come under the broad term Library Profession.

"The librarian who does not know how to

use wisdom, in technical detail, and has no vision as to the need of records for reference, is worthless as a professional worker, for the reason that when she is absent from her department or goes to another position, or dies, her wonderful power of aiding others dies with her. If she does not attend to the detail herself she must know exactly what is required and how it should be done by her corps of efficient technical workers who should have in them the inherent possibilities of the research worker. The 'careful person with ordinary natural faculties' cannot—and I repeat it—cannot be trained into a cataloger of any value whatever if she has not a broad basic knowledge of general academic information or a profound special knowledge of an individual subject, and an experience in dealing with the people who use the material which she catalogs. She may not use the typewriter herself. That is to be hoped may be assigned to a clerical worker; but she must know how to direct her assistants to prepare such work for the final printing. If this ability does not permeate the entire cataloging force we might all better strive to be Justin Winsors never forgetting anything, than to relegate the material to the impenetrable and useless mass of card catalogs and indexes in expensive furniture taking up valuable space. Catalogers should not sit forever in one room and professional or reference workers in another, scarcely ever seeing each other, often never co-operating in any way whatever."

In other words the separation of the technical and professional is impossible; each is helpless without the other. "Every profession has both phases and no vocation can become a profession until the two are indissolubly fused and made a useful whole."

"This discussion is not based on theory but on a very strong conviction developed thru experience in many phases of library work, including the specialized reference department, four different types of schools either as student or instructor, and circulation routine which in many instances resolves itself into the management of a large office force. This last phase is particularly dependent upon both the so-called technical departments and the reference divisions; and times without number is seriously handicapped and rendered helplessly foolish for lack of adequate co-operation between all departments. Organization, co-operation, interdependence, inter-department commerce should be the watchword, the aim and ambition of all assistants, chiefs and administrators."

LIBRARIANSHIP

The joys of librarianship. Arthur E. Bostwick. *Bull. of the N. Y. P. L.*, Jan., 1918. p. 3-16.

If librarianship has joys, they are to be found in the perfect adaptation of the worker to the work, and this adaptation is the thing to be sought, "letting the joy come as a by-product—as it surely will."

The elements in librarianship favoring adaptability are, first, that it deals with books, the records of life and its products. Whatever the worker's interests, he is sure to find them represented in the library. A second element favoring adaptability is the fact that library work has become progressive. And as the progressiveness of the work depends on the progressiveness of the workers, it behooves every one, from the beginner up to the chief, to be constantly watching for opportunities to improve and perfect some portion of the work. Most chiefs like progress and will promote those who plan it and carry it out.

Some of the greatest progress in the library world must be made in intensive work, and from it will come some of the greatest joys—those attendant upon success in making one blade of grass give way to two. Experimentation in some form is open to every library worker, and this leads up to another joy—the joy of discovering and developing ability. Other joys are those derived from the librarian's contact with the public. To take part in the inevitable future struggle for truth in this country will be another one of the joys of librarianship, and closely connected with it is the task of teaching the public what there is in books and how to get at it. The lack of this knowledge is one of the library's greatest obstacles to success today.

"To persons with a sense of humor work in libraries offers very special joys. The library assistant who could work long at the loan desk, in the reference room, with children, or with the foreign population at a branch, without getting into a state of inextinguishable laughter, is surely the exception."

One of the librarian's greatest joys at the present time should be his opportunity of doing national service—service that is country-wide and linked up with as many other forms of country-wide service as possible.

As for the routine work, much of it may be cared for automatically by the subconscious mind, leaving the higher mental faculties free for constructive thought. If we will, we may well use these periods to perfect ourselves in the details of our work and devise methods for its improvement and expansion.

The present dissatisfaction of library assistants with their work, when it is anything more than the occasional square peg in the round hole, may signify a general misapprehension of what the congeniality of work implies. "Failure to fit oneself to one's work comes never, I prefer to think, from general unfitness for useful activity, but always either from the squareness of the hole in which the round peg reposes or from putting the cart before the horse and thinking that one must love one's work before one can do it well instead of loving it because one is able to do it well. . . . The way to like librarianship is to like it, and the way to fit yourself to it is to stick to it as closely as you may. . . . Those of us who have been at it longest love it most, and we love all its connections, animate and inanimate."

Professional standards. Marilla Waite Freeman. *Pub. Libs.*, Apr., 1918. p. 156-161.

It has long been a moot question in the library world whether librarianship can really assert its claim to be regarded as a profession. It is entirely up to the librarian to prove it such. The "love of books" and the desire to be where there is "plenty of time to read them," will never make one a librarian.

Miss Freeman's advice to girls who are planning to take up librarianship as a profession is: first, a college education if it can be managed; if not four years, then as many as possible. It is impossible to be too well equipped for service as a librarian. If a girl really has the desire with the will power to back it, the college education is bound to come. After college the next step is the library school—for two years if possible or one year at least. A girl should be told of the different library schools and their various requirements and should be shown the circulars of the different schools with their specimen examinations. From her reaction to all this can be learned something of the girl's real character and initiative. To find even one girl who makes the click of decision, and enters upon the long road to real librarianship, is to have raised the standard and quality of the profession, and to have given to the whole community a new idea of the library profession and what it stands for.

It may be necessary sometimes to resort to the short cut to training which the apprentice system provides, but even in this compromise professional standards need not be lowered. Establish the rule that admission to library service shall be conditional upon at least a high school education, and upon ability to

pass a preliminary examination. After the examination applicants should be required to take a course of training in the library without salary and this training should be systematic, definite, and valuable enough to compensate them for the time given and, in turn to compensate the library for the time which the trained assistant must give in instruction and supervision.

The assistant should regard this training as a preliminary step toward regular library school instruction later, and the trained librarian herself should never let false pride stand in the way of filling up the gaps in her own education. The fact that she holds a position of importance should spur her on to qualify for filling it.

There are certain professional duties and privileges which will help the librarian to measure up to standard. One is attendance at state library association meetings. Another is membership in the American Library Association, and the third is the reading of the best library publications.

It is the man or woman underneath the technical training who counts, however. If a librarian regards his library as merely a collection of so much reading matter and measures its usefulness by its circulation, the community will take him and his library at his own rating. But if he recognizes the library as a sort of living tool to reach the thought life of the community, his sense of this and his own responsibility will reflect itself. "For what we are as individuals must inevitably affect what our libraries shall be as institutions. Any intolerance in us will reflect itself in the spirit of our libraries. . . . We should cultivate the inspirational rather than the practical side of our libraries." To cultivate imagination, sympathy, and understanding is one of the most fundamental steps for becoming a real professional librarian.

The dealing with books and methods the librarian's ultimate aim is to reach people which can only be done by taking active interest in the community's affairs. Every opportunity should be seized to present to schools, clubs, and the public at large, the work of the library, its resources and its desire to help in all good works, and the results of such library effort should be recorded. A profession without a literature is scarcely a profession.

LIBRARIES—CHARACTER OF

The changing character of libraries. John Cotton Dana. *Atlantic Monthly*, April, 1918. p. 481-485.

The day of the library of books has gone by; the day of the library of useful print has come. The old belief was that the units which compose a library are books and books only, and must be treated as books even if they are not books. The library of records, the library of useful print, which is taking the place of the library of books only, it is impossible as yet to describe, for it is in process of making and daily takes on new features. It has books, of course. The qualities which distinguish it are due to the inclusion of new material and not to the exclusion of old material. Some of its characteristics may be noted in the special collections of books and of other records of thought and action, formed in the last ten years in hundreds of banks, trust companies, insurance offices, and industrial plants of every kind. The material gathered is of infinite variety, ranging from the latest English Blue Book on education in India to the prospectus of a company for the exploitation of a peat bog in Maine.

And the method of handling the material is as varied as the material itself. Since much of it consists of excerpts from papers, books, and journals, or is of the lowly pamphlet class, it is very conveniently kept in one of the many forms of the familiar vertical file.

Argument for the enlargement of the conception of the general library is reinforced by a glance at the vast quantity of the records of man's thought and action, and at their physical characteristics. For instance, the phonograph disk and the "movie" film present a problem so vast that librarians have not dared to attack it, tho admitting the appropriateness of their inclusion among the records of the world's activities.

As to printed records, these have increased marvelously in quantity in the last thirty years. Between 1889 and 1909 the printing output increased 230 per cent., and the growth of the industry since 1909 has been even more rapid. A very large part of this has been in pamphlets and journals. Much of this is of ephemeral quality—for a brief time, possibly, of the highest value, but not of lasting usefulness. It is this ephemeral quality of the material collected which has changed the character of the libraries. For the day, at least, the items must be included in the field which the library covers; and, being included, they compel a diversion to them of a great part of its librarian's activities. In illustration of this statement, the treatment necessary to make available the reports, propaganda, and journals of the more than one hundred and fifty organizations existing in

this country as a direct result of the war, as well as the similar material put forth by more than fifteen hundred societies of altruistic endeavor, is touched upon briefly.

To check this flood of print is impossible. It creates daily, by its mere presence, new armies of readers for its use. Indexes, guides, keys, and lists of countless kinds designed to help in its mastery, multiply daily. Libraries, societies, city and state and national governments are combining to form agencies to gather and arrange these indexes to the print of the day. So far has the printer outpaced the old type of library—a collection of books.

LIBRARY SCHOOLS—INSTRUCTION IN

Qualifications of the teacher in the library school. W. E. Henry. *Pub. Libs.*, March, 1918. p. 113-115.

The greatest need of every teaching institution is better teaching, and the finest scholars often make the poorest teachers.

Qualifications for efficient teaching fall into two classes, knowledge of the subject and ability to teach. Of course it is unthinkable that anyone should teach well whose knowledge is inadequate, yet this is no more inconceivable than that everyone who has knowledge can impart that knowledge.

For the benefit of those who have not the genius or instinctive ability to teach Mr. Henry suggests these essential qualities and qualifications:

A knowledge in detail of the subject matter to be taught, and a comprehensive understanding of the relation of this detail to all other subjects upon which the student is working, and to the purpose of the student's life-activity.

The teacher must be possessed of an intense human interest in his subject as distinct from mere subject interest as knowledge. He must see his subject as a tool in the student's hand and as an inspiration for life itself.

The teacher must have the power to organize the materials of his subject and set them forth in such a manner that the student may see clearly not only the facts, but the relations and organization of the facts.

And last in this series comes that essential quality of a good teacher—the power to inspire the student with an intense desire to master knowledge and to use the knowledge gained and organized.

The teacher in the library school must do his work in such a manner and with such spirit that the student will have a higher respect for library service than he already possesses and at the end of his curriculum

will have such an organic grasp of it all, that to him it becomes a profession.

MANUSCRIPT—PREPARATION FOR PRINTER

Suggestions for the preparation of the M. A. thesis. Louis N. Wilson. Worcester, Mass.: Clark Univ., 1917. 14 p. (Publ. of the Clark Univ. Lib. Vol. 5, no. 7.)

In these suggestions, first gathered together in 1912, Dr. Wilson has made recommendations on the preparation of manuscript which will be as useful to the librarian as to the candidate for a master's degree.

A simple form is given for the citation of references which will later form the writer's bibliography, and attention is given to the form of writing, spelling, numerals, extracts and quotations, typewriting, index and summary and title page. A short bibliography serves the double purpose of giving useful references for further study of the subject and of acting as a model for those preparing a manuscript for the first time.

MEDICAL LIBRARIES

The medical library in wartime. F[ielding] H. G[arrison]. *Bull. of Med. Lib. Assn.*, Oct., 1917. p. 29-32.
